The *Bhasma Jabal Upanishad* of the Atharva Veda tradition was preached by Lord Shiva himself to sage Jabal Bhusund, and it highlights the fact that Lord Shiva is no ordinary God, or even a senior one being a member of the Trinity of Gods consisting of Brahma the creator, Vishnu the sustainer, and Rudra the concluder, but is the supreme transcendental Brahm himself personified. Shiva is the Supreme Being himself. Refer Bhasma Jabal Upanishad, Canto 1, paragraph no. 1; Canto 2, paragraph no. 3, 6-8.

The *Atharvashikha Upanishad* of the Atharva Veda tradition, in its Kandika 3 declares that 'Shambhu', one of the many epithets of Lord Shiva, is the highest deity to be worshipped and adored, and he represents the fifth state of consciousness that is called the Turiyateet, and to the fourth aspect of the ethereal word OM. This Shambhu or Shiva is Brahm in its best and most pristine form.

The *Yogtattva Upanishad* of Krishna Yajur Veda tradition, in its verse nos. 92-94 says that Lord Shiva, in his form as Rudra, is the patron deity and personification of the fire element, and it is no wonder then that he is surrounded by 'fire-spitting' serpents as a symbolism of this fact. In this Upanishad's verse nos. 98-102 it is asserted that Shiva is the patron deity and personification of the sky element.

The *Dakshin Murti Upanishad* of Krishna Yajur Veda, in its verse nos. 8, 10, 13, 15 and 19 affirms that Shiva is invariably wrapped by serpents.

The *Dakshin Murti Upanishad* of the Krishna Yajur Veda describes Lord Shiva as the south-facing Lord and elaborately elucidates the metaphysical significance of this from.

The *Brihajjabal Upanishad* of the Atharva Veda tradition, in its Brahman 4, verse no. 29 says that the Lord with three eyes (Trinetrum) is the bearer of this world having three aspects or the one who is the foundation upon which all the three Gunas such as Sata Guna, Raja Guna and Tama Guna rest (Trigunadhaaram) and is the one from whom the Trinity Gods (i.e. the creator Brahma, the sustainer Vishnu, and the concluder Rudra) are born. This Lord is none other than Lord Maheshwar, the great

Ishwar or Lord of creation who is also known as Shiva, Ishan, Isha etc. This Lord is synonymous with the supreme transcendental Brahm. This fact is endorsed Krishna Yajur Veda's *Varaaha Upanishad*, Canto 4, verse no. 32, and in *Dakshin Murti* or *Dakshin Mukhi Upanishad*.

As the deity of the fire element, he is said to have 'three eyes' (*Yogattva Upanishad*, verse no. 93), and as the deity of the sky element he is depicted as having a moon tucked in his lock of hairs, besides having five mouths, ten arms and three eyes (*Yogattva Upanishad*, verse no. 100). Now let us see their significance.

The *Ram Uttar Tapini Upanishad* of the Atharva Veda, Canto 5, verse no. 4/42 says that it is Lord Ram who has manifested as 'Maheshwar', the great God. Since this term is conventionally applied to Lord Shiva, it follows that Shiva is actually Lord Ram in this form. Its verse no. 4/43 clearly endorses this view when it says that Lord Ram has manifested himself as Mahadev—the great God. This term 'Mahadev' is also conventionally used for Lord Shiva.

The *Tripura Tapini Upanishad* of the Atharva Veda tradition, Canto 4, paragraph no. 8 describes the great Mantra of Lord Shiva which gives the worshipper the stature equivalent to Lord Shiva.

The significance of the *moon, the five heads and the ten arms*—

Lord Shiva has been depicted in the Purans as having a *crescent moon* on his forehead. The moon is said to have sixteen Kalaas or phases, symbolising the sixteen Kalaas or aspects out of the total of sixty four Kalaas of the supreme Brahm. These sixteen Kalaas represent the visible world which is one fourth part of the entire creation consisting of the remaining of the Kalaas of Brahm. The visible world is called 'one Pada' or one leg or one aspect or Kalaa of Brahm. So, Shiva is the Lord who presides over the entire visible part of creation, and this world is his ornamentation in the sense that the Lord appears to be so beautiful if we consider the beauty of Nature as the astounding beauty and the expert craftsmanship of Shiva on display.

The moon present on Shiva's forehead also stands for the various eclectic qualities called Kalaas that he possesses and which adorn him like the moon. Symbolically, the devotee is advised to follow the example of his chosen deity Lord Shiva and note the symbolism of the Moon on his head. These eclectic qualities should be as prominent as the moon on the head of Shiva and they should form an integral part of the character of the devotee if he wishes to place himself in the position of being called a sincere follower and worshipper of Lord Shiva. Now let us have a glimpse of these *Kalaas*. They are the various eclectic qualities or attributes that an exalted man should possess, and briefly they are the following—(i) Shraddha (श्रद्धा—faith, believe, conviction, reverence, respect, devotion), (ii) Pran (प्राण—life; the very essence of creation; the vibrations of life; the rhythm and essential functions pertaining to life), (iii) Akash (आकाश—the all-pervading, all-encompassing sky or space element), (iv) Vayu (वायु—wind, air element), (v) Tej (तेज—energy, splendour, radiance, glory, might, majesty and fire element), (vi) Apaha (अपः—water element which is the all-important ingredient for life), (vii) 'Prithivi' (पृथ्वी—earth element which is the base or foundation for all mortal creation), (viii) Indriya (इन्द्रिय—the organs of the body, both the organs of perception as well as of action), (ix) Mana (मन—the mind and heart complex and their stupendous potentials), (x) Anna (अन्न—food, the element without which life is simply not imaginable because it provides it with the basic nourishment and energy), (xi) Virya (वीर्य—semen, sperms, standing for courage, valour, potency, vitality and prowess), (xii) Tapa (तपः—austerity and penance, tolerance of hardship as a means of penitence, forbearance as well as carrying out strict religious vows in order to purify one's self) (xiii) Mantra (मन्त्र—the ability to give good advise, the power to contemplate and think, concentrate and focus, logically arrive at a conclusion), (xiv) Karma (कर्म—taking actions and doing

deeds), (xv) Loka (लोक—worldly interactions and behaviours), and (xvi) Naam (नाम—good name, fame, reputation, honour and glory).

Reference should be made to the Chandogya Upanishad, 6/7/1-6 of Sam Veda tradition in this context.

The *five heads* of Shiva stand for the 'Panch Vyom' or the five forms that the sky element is said to have. According to Vedanta, the concept of the *sky* or 'Akash' has many connotations. According to one interpretation, there are *five* subtle skies representing the space surrounding the five sheaths or *Koshas* present in the body of a creature. They are the sheaths that surround the Atma and are called 'Panch Akash'. These are the following—(1) the Food Sheath called Anna Maye Kosh; (2) the Vital Air Sheath called Pran Maye Kosh; (3) the Mental Sheath called Manomaye Kosh; (4) the Intellectual Sheath called Vigyan Maye Kosh; and (5) the Bliss Sheath called Anand Maye Kosh. Refer—Mudgal Upanishad, 4/5 of the Rig Veda.

The *ten arms* of Shiva stand for the ten forms of the subtle sky element. They are the following—(1) Ghatakash—the space inside a hollow pot; (2) Mathakash—the space inside a holy building, such as a holy shrine, a monastery, an abbey etc.; (3) Hridayakash—the subtle space inside the heart; (4) Akash—the vacant or blank space above the earth; (5) Suryakash—the space of the solar system; the space around the sun, or the solar system illuminated by the light of the sun; (6) Paraakash—the space above or beyond the solar system, it is said to burn with the celestial fire; (7) Mahakash—the great sky that is aglow with divine illumination, the heaven; that space which is radiant with a divine glow; (8) Paramakash—the supreme sky beyond the Mahakash, it is said to be very magnificent and encloses everything that exists, including all the other skies; that space which is illuminated, all pervading, all encompassing and full of bliss and felicity; (9) Tattwakash—the elementary space that is at the core of the concept of space, or the space that surrounds the basic elements of creation; by natural corollary it refers to the subtle, sublime, ethereal and supreme space where the eternal, transcendental Brahm has his abode because Brahm is the cause of all the basic elements of creation; there is complete beatitude and felicity there; that space which surrounds the essential truth known as Brahm; and (10) Anatariksha—the physical space where stars are present in deep space; the intergalactic space. Besides these, there is one more space called 'Swarga' which means heaven or the Duloka.

These skies have been ascribed different names just to facilitate understanding, and not because any one form of sky is fundamentally different from the other. For example, the space present inside the mud-pot, called the Ghata-kash, is the same as the space present outside the body of the pot. When the pot is broken, the demarcation wall of the body of the pot is removed, and both the space inside and outside of the erstwhile pot become indistinguishably and inseparably the same. Therefore, the various names are artificial and misnomers.

The *Yogtattva Upanishad*, verse no. 100 says that Lord Shiva is most pure and immaculate, and as clear and clean as pure crystal. He has a crescent moon tucked in the lock of hairs on his head. He has five mouths, is very sober, gentle and pleasant, has ten arms and three eyes.

The significance of the *serpents* wrapped around his body—The coiled serpents around his body indicate the fact that he constantly reminds himself of imminent death because serpents are very poisonous and symbolise immediate death. This helps him to remain focused on his spiritual aim of self-realisation instead of being attracted by the material charms of this material world of sense objects and getting deluded by them. The serpents also signify that Shiva is the Lord of death; he is death personified. Since he is able to wrap the serpents around his body and they cannot harm him, it indicates the fact that he has conquered death. That is why he is called 'Mrityunjay', the conqueror of death.

Again, the coiled serpents represent the Kundalini, the coiled subtle energy center at the base of the spine which when activated can entitle the spiritual aspirant to

experience a burst of stupendous spiritual energy which provides him a glimpse of his own divine powers as well as the powers of the cosmic Consciousness present inside his bosom as his Atma. This Kundalini is activated by doing numerous Yoga exercises as described in the Upanishads on the subject of Yoga.

The coiled serpents may also represent cycles of time in the macrocosm and the basic energy of life in the microcosm in the form of sexual energy.

These reptiles are very ferocious, dangerous, poisonous, and a symbol of male potency. The symbolism is that Shiva is a very potent God who can be extremely ruthless and unforgiving towards sinful creatures. He has exercised extreme self control and has 'girdled' or readied himself in preparation for enduring the greatest of hardships and sufferance for self-realisation as well as to provide the world with liberation and deliverance. The serpents warn his enemies not to fool around with him. That is also why he has fire in one of his hands. This fire signifies his ability to reduce to ashes the entire physical world consisting of falsehood and sins as well as eliminate all impurities, imperfections, faults and shortcomings that cripple the creature's spiritual well being.

The symbolism and significance of the *three eyes of Shiva* have been explained above as a note appended to verse no. 10 of the present Upanishad.]

35-35 ½. This great Shastra (scripture) received by sage Pippalaad (from Brahma) should not be given (divulged, revealed, preached or taught) to unworthy or incompetent subjects or aspirants.

[Who are such unworthy or incompetent people? This is being answered now.] It should not be given to those people who are 'Nastik' (heretics, atheist, unbelievers and sceptics), 'Kritaghna' (ungrateful and thankless), 'Durvritti' (those who have evil tendencies and pervert nature; those who are unscrupulous and inclined to malice and sinful acts), 'Duratma' (those who are sinful, pervert, corrupt and evil) [35], 'Dhambha' (those who are deceitful, impostors, boastful, arrogant, ostentatious, hypocrite, full of vanity), 'Nrishansa' (merciless, cruel and lack compassion), 'Shath' (wicked, crafty, deceitful, cunning as well as stupid and foolish), 'Anrit Bhaasan' (speaking lie and being dishonest in one's speech). [35 ½] (35-35 ½).

36-37. On the contrary it should be given (divulged, revealed, preached or taught) to those people who have the following auspicious virtues in them—'Suvrata' (those who follow auspicious code of conduct and are scrupulous in their thoughts and behaviour), 'Subhakta' (are devoted and committed), 'Suvritti' (those who have auspicious and noble aspirations, volitions, temperament and nature), 'Sushil' (are amiable, affable, modest, polite, courteous, suave, sober, obliging, cordial, soft spoken, well mannered, cultured and civilised) [36], 'Guru Bhakta' (devoted to one's moral preceptor, teacher and guide), 'Daanta' (who is self-restrained and self-regulated), 'Shaanta' (peaceful, tranquil, composed, unruffled, calm, poised and serene), 'Riju Chetas' (who is conscientious, is scrupulous, has auspicious and righteous tendency of the mind and intellect), 'Shiv Bhakta' (an ardent devotee of Lord Shiva), 'Databya' (of a charitable disposition), 'Brahm Karmi' (is inclined to do auspicious, righteous, noble and proper deeds selflessly as a means of serving the Lord known as Brahm; treating each deed and action as Brahm in that form). [37] (36-37).

38. Only such people who are called 'Suvrata' (i.e. who strictly observe the above principles) and 'Swa-Bhakta' (are true devotees of Lord Shiva as well as the Lord who resides in their own bosom as their 'true self'—a reference to the pure

consciousness representing the supreme Brahman) are indeed eligible and competent to be given (divulged, revealed, preached or taught) this great scripture.

Oh the most exalted Brahmin! Otherwise, one should protect this sacred scripture from falling into the hands of unscrupulous and incompetent persons (38).

39. [This verse outlines the benefits of studying this Upanishad.]

A wise and learned person who himself reads and studies this great scripture revealed to sage Pippalaad, or makes others hear it by preaching or teaching it to them—verily, he is freed from the snare of the never-ending cycle of birth and death.

A person who comes to learn and understand its esoteric meaning is able to access Amrit (the elixir of eternity and bliss) as well as find freedom from having to reside in a mother's womb (i.e. having to take a birth again).

A person who regularly reads and studies it is exonerated from the horrendous effects of such grave sins as stealing gold, drinking wine, killing of a Brahmin or any other creature, or being lustful towards the wife of one's Guru (moral preceptor). Instead, he gets the auspicious rewards of having studied all the Vedas. Such a person is rid of small and big sins and their consequences, and becomes cleansed and purified¹.

Hence, a spiritually reformed person is deemed to be one who has surrendered himself to the eternal and supreme Lord of creation, and therefore becomes eligible for liberation and deliverance.

He becomes permanently endeared to Lord Shiva, and finds his ultimate rest with Shiva. He does not have to take a birth again. It is because he becomes one with and inseparable from Brahman, the Supreme Being, the cosmic Consciousness.

This is how Brahman the creator preached this great Upanishad (to sage Pippalaad) (39).

[Note—¹It is to be noted here that this way of pardoning of all sins is a standard method in almost all the Upanishads. Their intent is not to condone sinful acts by easily forgiving the sinner by merely reading this or that scripture, but to highlight the grand and majestic mystical potentials and powers of the scripture in question. Besides this, since every human can err, the scriptures show him the path of redemption if he is really interested and sincere for it. All sinners must be given a chance at reforming themselves, and this is the real intent of this blanket pardoning. Further, if a man is sincere and honest regarding his desire to repent and atone for his past sins and demeanours, and once he is given a chance and shown the path to do so, who in his right mind would revert back to his bad old ways and not reform or amend himself in the hope of leading a more fruitful and respectable life marked by happiness and peace.

If he does not reform himself and become a changed man even after reading and studying the scriptures, then surely such a man does not deserve any leniency and pardon and so the scripture wouldn't forgive him! The benevolence shown by the scriptures should not be misconstrued as them condoning sins and vices or granting a blanket reprieve even against the most horrible of sins just by touching them or reading them. Even to think in these terms is highly incredulous, incongruous and insanity.

Their forgiveness is meant for those who sincerely wish to atone for their sinful past and lead a reformed life. This pardon is not for them who wish to exploit the magnanimity of the scriptures to hide behind them to escape punishment by claiming that now since they have read such and such Upanishad which grants pardon they ought to be forgiven from being punished, only to revert to their bad old ways once pardoned. Even in modern society first time offenders are given a chance at

reformation and change, but any such law granting reprieve should not be misused. Habitual offenders deserve no mercy whatsoever.

This fact has been stressed in a number of Upanishads of the Atharva Veda tradition. For instance—Mahavakya Upanishad, verse no. 12; Bhasma Jabal Upanishad, Canto 1, paragraph no. 10; Ganapati Upanishad, verse no. 17; Devi Upanishad, verse no. 32; Hayagriva Upanishad, verse no. 13; Dattatreya Upanishad, Section 3, stanza 4.]

Chapter 11

Tripadvibhuti Maha-Narayan Upanishad/ Tripadibhutamahanarayano-panishad

This great Upanishad was revealed as a discourse given by Lord Vishnu to the creator Brahma. Brahma had asked the Lord to disclose the secrets of the 'Param Tattva', the Supreme Principle and the Absolute Truth of creation, by knowing which everything becomes known, and which provides the spiritual aspirant with Mukti or Moksha (liberation, deliverance, freedom, emancipation and salvation).

This Upanishad is a magnificent exposition on the eclectic concepts related to Brahm, the Supreme Being and eternal supreme Consciousness, on how a Jiva, the living being, is, on why the Jiva remains trapped in the world, on what are the paths for obtaining Mukti and Moksha, and what do these terms actually mean, on the various forms this creation takes—the gross and the subtle, the visible and the invisible, the one that is ridden by Avidya and Agyan, or ignorance of the truth as well as by Maya or delusions, and the other that shines by the glory of Vidya and Gyan or knowledge, wisdom, erudition and enlightenment, on the four different aspects of this creation which is said to be a manifestation of Brahm, on the mystical meaning of the two esoteric Charms—the Sudarshan Chakra and the Narayan Yantra, and so on and so forth.

It extols and espouses on the supremacy of Brahm, the all-pervading and universally truthful divine entity that is the eternal Consciousness, and the principle of 'unity in diversity' which is at the core of the philosophy of Advaita Vedanta, the eclectic philosophy of 'non-duality'. Though it describes the many forms that the ultimate Authority and the supreme Lord of creation known as Brahm takes, it ultimately points out that they are none but the same Divinity in all these forms. Brahm has been said to have four Paads or limbs, meaning aspects or principal forms. The whole of the known world within imagination, even the invisible one extending to the farthest corner of creation, represent only one Paad called the Avidya Paad. This includes all the Lokas, the Gods and the Jivas. The other three Paads transcend this Paad and are very subtle and sublime in nature; they are called the Vidya Paad, the Anand Paad and the Turiya Paad. [Refer: Canto 1, paragraph 5-6; Canto 4, paragraph 6.]

This Upanishad derives its name from the fact that Brahm, the Supreme Being, is also known as 'Maha Narayan'. One of his Paads, the Avidya Paad, is dominated by the Bhuts (elements); it is the comparatively grosser aspect of Brahm. The other three Paads are of subtle nature. Hence the name 'Tripadvi + Bhut + Maha Narayan = 'Tripadvibhut Maha-Narayan' Upanishad.

The stupendity and immensity of the greatness of Brahm can be imagined by the fact that other Gods who are themselves no less great and powerful are but only a fraction of Brahm; they are merely Brahm carrying out specific functions in these forms. Some of the names of these Gods as mentioned in this Upanishad are 'Maha Narayan', 'Adi-Narayan', 'Narayan', 'Maha Vishnu', 'Viraat Purush', 'Adi-Viraat', 'Brahma', 'Hiranyagarbha', and so on.

The present Upanishad is unique in the sense that it intertwines in its narration two philosophies—one based on the philosophy of Vedanta which recognises Brahm as the Supreme Being, and the other on the philosophy of Vaishnav cult which regards Lord Vishnu as the Supreme Being. In the process it establishes the fact that essentially both are the same as the Supreme Being is known by many names, including Brahm and Vishnu.

The main thrust of this Upanishad is to emphasise the point that though Brahm is said to exist in all these forms, basically it is a 'non-dual' and an immutable divine entity that remains uniform and universal. It is this Brahm that exists as the supreme transcendental cosmic Consciousness and the universal Truth of creation. The question as to why then does Brahm appear to have duality and various evident forms that cannot be simply denied or wished away but are definitely not 'Brahm' is emphatically answered and explained in detail in this grand Upanishad. It is this eclectic divinity known as the non-dual supreme Brahm that is so much extolled and revered by the Vedas and the Upanishads. It is this non-dual Brahm that is the aim of attainment of all spiritual aspirants and seekers of Truth. This Brahm is all-pervading, all-encompassing and all-knowing. It is this Brahm that transcends all known definitions and even extends beyond imagination. [Refer Canto 1, paragraphs 4-6; Canto 2, paragraphs 1-8, 12, Canto 3, paragraphs 1-6; and Canto 4, paragraphs 1-6.]

The Upanishad belongs to the 'Devdarshi' branch of the Atharva Veda (refer Canto 1, paragraph no. 2), and is in the style of long narrative prose as opposed to the system of verses that is usually employed in the Upanishads. It is taught by a learned teacher to his earnest disciple.

The Upanishad consists of a total of eight Cantos divided into two main sections—the first is called 'Purva Kanda' consisting of four Cantos (nos. 1 to 4), and the second is called 'Uttar Kanda' consisting of another four Cantos (nos. 5 to 8).

Canto 1 describes what is meant by the enigmatic and most esoteric term 'Brahm', who he is or what it is. It enumerates the grand characteristics and magnificent divine qualities that make Brahm so unique and enigmatic entity in creation that is lauded and revered by the scriptures, besides describing the four Paads of Brahm, literally meaning the limbs of Brahm, and implying the different eclectic forms or aspects of Brahm, both at the macrocosmic as well as the microcosmic level of creation. The four Paads of Brahm have been explained elaborately in Canto 4, paragraph nos. 2-3, 6, and Canto 8, paragraph no. 4.

Canto 2 expands upon the discussion of Canto 1 and narrates the two basic forms of Brahm—the 'Nirguna' or 'Niraakaar' form which refers to that aspect of Brahm which is without any attributes, is indefinable and invisible, and is beyond the reach of mind, intellect and imagination, and the 'Saguna' or 'Saakaar' form which displays characteristics quite the opposite of Nirguna—viz. it has definite attributes, is

visible and verifiable, is comprehensible and described by the scriptures. In the course of this discussion another very important principle concerning Brahm is explained—the concept of Advaitya or non-duality. Included in this Canto are the description of the Genesis of Creation and the all-inclusive and all-pervading nature of Brahm as the Viraat Purush. The concept of Advaitya in the context of Brahm having different Paads and forms as Nirguna and Saguna is further explained in Canto 8 (paragraph nos. 2-7).

Canto 3 describes the ‘Mool-Avidya’—literally the primary cause of ignorance of the Truth, and the various units of measurement of time on the celestial scale such as the length of one life of Brahma the creator, the length of one life of Vishnu, the length of one life of Viraat Purush, and the length of one life of Adi-Narayan, the Primal Purush. This measurement helps one to understand the *relative nature* of the terms ‘birth and death’, or ‘creation and destruction’, or ‘day and night’ etc. on the cosmic scale. This Canto also explains why Brahm appears to have multifarious forms, and cites a beautiful analogy of the crystal appearing to be red when in proximity with the China Rose flower. It then illustrates the formless omnipresence of Brahm by citing the example of the Fire.

Canto 4 further elaborates upon the concept of Advaitya or non-dual nature of Brahm which was first introduced in Canto 2. It explains why Brahm is imagined or visualised to have a dual form whereas it is not the truth as explained in Canto 3 along with enumerating some of the grand divine qualities of Brahm that make the latter so holy and unique. It also describes who a Jiva, a living being is in a very magnificent manner, and then outlines the path leading to Mukti or Moksha (liberation, deliverance, freedom, emancipation and salvation).

Canto 5 answers three very pertinent spiritual questions—viz. (i) How and why does Avidya (ignorance or lack of true knowledge) reappear once it has been destroyed or eliminated?, (ii) Why does a creature remain deluded and trapped in this world of artificiality, and how to get rid of it and become freed?, and (iii) What is the path to Mukti—or liberation and deliverance from this ensnaring world. In the process it describes in graphic detail the path taken by a devotee of Lord Vishnu when he leaves the gross mortal body and embarks upon his spiritual journey to reach the highest echelons of heaven where Vishnu resides, the heaven known as Vaikunth.

The description is continued in the next two Cantos, Canto no. 6 and 7, as well. These three Cantos, viz. 5, 6 and 7, describe in graphic detail the most fascinating journey undertaken by the spiritual traveller as he crosses the various layers of heaven, called Vaikunth, the abode of Lord Vishnu, en-route to his final destination to the Lord Adi-Narayan, the primordial and primary Lord of creation, the Supreme Being who is also known as Adi-Maha Vishnu.

Canto 6 describes the path through many Vaikunths which are traditionally regarded as being the abode of Lord Vishnu, the Lord who is considered as being synonymous with the Viraat Purush, the Supreme Being and Brahm personified. So by describing more than one Vaikunth the Upanishad alludes to the relative nature of existence and extends the ‘philosophy of relativity’ enunciated earlier in Canto 3.

Further, by citing a number of instances such as the existence of a number of Universes and many Vaikunthas (Canto 6), different time scales (Canto 3), the many Paads of Brahm (Canto 1), and the simultaneous existence of both Saguna as well as Nirguna Brahm the Upanishad highlights the fact that the actual and real Truth, though being always and irrevocably ‘one, immutable and unchangeable’, does appear to have more than one meaning, and a man who gets deluded by this dichotomy and schism is the one who is under the spell of Maya and Avidya.

The second half of Canto 7 is dedicated to the description of the Sudarshan Chakra and the Narayan Yantra which is a worship instrument used in mystical forms of worship of Lord Narayan or Vishnu. All the Mantras used in their construction are given in full along with their location and meaning. A diagram depicting the Sudarshan Chakra is added at the end of this Chapter.

Canto 8 essentially describes the following topics as a sort of summary of the preaching of this Upanishad—(i) the non-dual or Advaitya nature of Brahm (paragraph nos. 1-3), (ii) the four Paads of Brahm (paragraph no. 4), (iii) the proclamation, called the Mahavakyas, of a Brahm-realised person (paragraph nos. 5-6), (iv) the attainment of Mukti (spiritual liberation and deliverance), (v) the two great forms of Yoga, viz. Saalamba and Niraalamba (paragraph nos. 8-9), (vi) the importance of Bhakti or devotion (paragraph no. 12), (vii) how to have the knowledge of the Param Tattva (paragraph nos. 13-14), and (viii) who a true Guru (teacher) is, and his importance.

The Upanishad concludes by emphasizing the profound spiritual benefits of studying and implementing its teachings.

-----*****-----

-----Shanti Paath-----

Please see appendix no. 1 for the English of this Shanti Paath.

Purva Kanda—Canto 1

[Canto 1 describes what is meant by the enigmatic and most esoteric term ‘Param Tattva’ that refers to the essential and fundamental Truth of creation known as the transcendental Brahm, who or what this principal entity is, what are the principles that govern this Param Tattva, along with the essential meaning and nature of Brahm’s various Paads, literally meaning the four limbs of Brahm and implying the different eclectic forms or aspects of Brahm, both at the macrocosmic as well as the microcosmic level of creation. It is in a long narrative prose.

Refer Canto 4 which would further elaborate upon the concepts dealt with in the present Canto no. 1.

This Canto primarily narrates the glorious divine virtues of Lord Vishnu who is also known by the names of Narayan, Viraat Purush and Adi-Narayan, the primordial Lord of creation. The Narayan Upanishad of the Krishna Yajur Veda, and the Vishnu Puran, Chapter 1, Canto 2, verse nos. 1-32, 55-70 are relevant in the context of this Canto.]

1. In order to learn about the secrets of the enigmatic ‘Param Tattva’ (meaning the supreme principle of creation, the essence and fundamental basis of everything in creation, the eclectic and divine entity that is the irrefutable absolute Truth of existence, and its sublime knowledge), the creator Brahm did severe Tapa (penance and austerity) for one thousand years according to the measurement of time based on the scale used by the Gods.

The great Lord ‘Maha Vishnu¹’ was very pleased with Brahma’s great Tapa and felt obliged to appear before him at the end of one thousand years.

Brahma said to him—‘Oh Lord! Please tell me the secrets of the Param Tattva. This is because you are the only one who is competent enough to enlighten about it, and there is no one else who can do it.

Why is it so? [That is, if you ask me why I’ve said that ‘you are the only one who can tell me about it’, I’ll let you now. It is because—]

You are the only one who is omniscient and all-knowing. You are the only one who is almighty and all-powerful.

You are the support, the base and cause of everything.

It is you who has revealed yourself in all imaginable forms and all imaginable things that exist.

It is you who are the Lord of all.

You are the inspirer and the cause of all deeds and actions.

You are the sustainer, the nourisher, the caretaker and the protector of all.

You are even the one who brings everything to an end.

It is you who shows the paradoxical and mysterious characteristic of being both the ‘truth’ or ‘reality’, and the ‘un-truth’ or ‘falsehood’ at the same time on the one hand, and being beyond this paradox or confusion by being neither the truth nor the falsehood, remaining untouched by this controversy on the other hand.

It is you who uniformly pervades every unit of creation, present in its inside and covering it from the outside. [This is because you are all-encompassing and all-pervading. You warp and waft throughout everything, engulf or surround it from all directions, and encircle or girdle everything from the outside.]

On the one hand you are smaller than the smallest, and on the other hand you are larger than the largest.

On the one hand it is you who is the destroyer or eliminator of ‘Mool Avidya’—the primary or fundamental ignorance and its basis or cause, and on the other hand you move around in and are a native of Avidya (ignorance) itself. You are even the foundation upon which Avidya rests; you bear this Avidya (though you are also the one who destroys ignorance). [In other words, you are very mysterious and enigmatic. You destroy Avidya, and at the same time you foster Avidya. The former form of yours as the destroyer of Avidya represents your grand auspicious aspect known as ‘Gyan’ (wisdom, erudition, realisation, enlightenment), while your form as the sustainer of Avidya represents your ‘Maya’ (delusions) that breeds Avidya.]

It is you who is known by Vidya or knowledge; you are the subject that is studied and the object of pursuing that study; you are knowledge itself personified as well as the object of acquiring of any knowledge. At the same time, the irony is that you are beyond the reach of Vidya—i.e. it is not possible to learn about you or know you by acquiring any kind of knowledge.

You are the primary cause of all causes. You are also the collective of all causes. You are even the each individual cause which is distinct and separate from all other causes.

It is you who is an embodiment of eternal and immutable Anand (bliss, happiness, joy, cheerfulness, beatitude and felicity). You are complete Anand. You are even the fraction of Anand or the residual form of Anand.

You are the one who has attained the state of consciousness known as Turiya. [This is the fourth state of existence of consciousness that is transcendental in nature.] You are even the one who goes beyond it and is established in the Turiyateet state. [The Turiyateet state, as the name suggests, is the fifth state which is higher than the Turiya state.]

The eternal scriptures known as the eclectic Upanishads teach about you; you are the objective of their teaching; it is you who is being researched upon and searched by studying the Upanishads. Indeed, it is you who is worthy to be researched upon and searched by studying of all the scriptures.

It is you who is worthy to be researched upon and searched by the great Gods such as Brahma (i.e. by me), Shiva (the concluder) and Indra (the chief God) along with all the other Gods, besides the scriptures (as noted above).

It is you who is to be sought by all those who are known as ‘Mumuksha’—i.e. by those people who wish to attain liberation and deliverance. [That is, you are the destination of those who wish to find freedom for their souls from this entrapping material world.]

It is you who are the object of constant research by even those who have already tasted the Amrit or nectar (of bliss and happiness). [This is because there is no end to you, and one should not be contented by whatever one knows about you, for you are like a vast and fathomless ocean.]

Indeed, you are an embodiment of Amrit. You are indeed Amrit personified. You are Amrit itself! [Amrit is the sublime and divine nectar or ambrosia or elixir of eternity, bliss, happiness, contentedness, beatitude and felicity.]

Indeed, you are ‘Sarwa-Roop’. You are indeed Sarwa Roop. You are Sarwa Roop! [The word Sarwa Roop means one who has revealed himself in all known and unknown forms and shapes that exist in this creation. Or in other words, all forms or units of existence are basically the same Lord who assumes the form of these individual separate units of creation.]

You are a personification of the grand destiny of all the creatures that is known as ‘Moksha’ (emancipation and salvation). You are also the one who bestows Moksha to all. And you are also the one who personifies all the ways and means by which Moksha is (or can be) attained or achieved.

There is nothing besides you (in this creation). Anything that might appear to have any existence sans you is therefore an illusion and a falsehood. This is a certainty. [In other words, if you are removed from this creation, it would cease to exist and have any meaning.]

Hence, you are the speaker and narrator, you are the Guru (teacher and preceptor), you are the ‘Niyantaa’ of all (i.e. you are the regulator of all), you are Sarwa-Roop (i.e. it is you who lives in all forms), and it is always you (and nobody else) who is worthy to be meditated and contemplated upon—this is certain.’ (1).

[Note—¹Lord Maha Vishnu is the personified macrocosmic form of the Supreme Being known as Brahm. Other terms used for him are Viraat Purush, Narayan, Hari, etc. The various incarnations of Vishnu are detailed as a note of Canto 7, paragraph no. 18 of the present Upanishad.

An exposition on Maha Vishnu is given as a detailed note to verse no. 25 of the Sharav Upanishad which is Chapter 10 of this volume.]

2. Lord Maha Vishnu who is an expert in the knowledge of Param Tattva was immensely pleased by Brahma’s prayer, expressed his praise for Brahma and his gratitude by thanking him a lot, and said—‘I shall narrate the secret of the enigmatic concept of ‘Param Tattva’ to you. Listen carefully.

Oh Brahma! The Maha Narayan Upanishad that belongs to the Devdarshi branch of the Atharva Veda containing a sublime conversation between a disciple and his Guru in the form of a discourse has been held from ancient times as being the most famous and authoritative treatise on the concept of Param Tattva.

In ancient times, all great souls (people) who had become enlightened about it had attained Brahm-realisation. Let me tell you about that sublime principle by knowing which all sorts of bondages are destroyed from their root, and by knowing which all that is to be known, all secrets that are to be unravelled, become known (2).

3. The disciple—who was of an exemplary and immaculate character, being calm and poised, sober and disciplined, highly detached and dispassionate towards the material world and its charms as well as not interested in the natural urges of the sense organs of the body, very pure and holy at both the mental as well as the physical level of the body, fully devoted to the Guru, and one who observed the strict codes of austerity and penances—searched and approached a highly enlightened, learned, wise, self-realised and Brahm-realised Guru (moral preceptor, teacher and guide).

Having found him, the disciple most reverentially went round him (did circumambulation in order to show his respect), prostrated himself on the ground before him, joined his palms as a mark of surrender and show of great respect, and approached the Guru most humbly and politely.

The disciple said—‘Oh Lord! Oh Guru! Please be kind to tell me the details of the concept of Param Tattva and its secrets.’

The Guru (teacher) was very pleased and he praised the disciple. [Why did he praise the disciple? It is because very few people would sacrifice the pleasures of life and comforts of the world, and instead treat them as bondages, seeking freedom from this bondage by spending a life of rigorous self discipline, austerity, penance and sacrifice. A good teacher is always glad when he sees a sincere student approaching him for knowledge in which the former is an expert. He begins to treat this student as his own son because he sees in this student an heir who would carry forward his good name, and not only preserve but pass on his knowledge without distortion to the next generation.]

The pleased Guru welcomed the disciple and said—‘I shall narrate the great Upanishad that describes the principles of Param Tattva in a systematic manner to you. Listen carefully (3).

4. ‘What sort is Brahm; how do we know what are Brahm’s eclectic virtues and sublime qualities¹?’ [Clearly, the ‘Param Tattva’ which the disciple wishes to know about is ‘Brahm’.]

Well, the Param Tattva known as Brahm is that enigmatic and esoteric entity that is not limited to or by any given dimension of time. That is, Brahm is uniformly and universally present, in equal intensity or magnitude, in all planes or frames of time—viz. the past, the present and the future. The eclectic and eternal principle that is not subject to being limited by time, that principal entity which cannot be divided or fragmented into segments but remains uniform and constant in all dimensions of time, the divine and enigmatic grand entity that is uniform, steady, immutable and indivisible—verily, such a divine, eclectic, sublime and majestic principle of creation, the Principal Being, the Absolute Truth, is known as Brahm. Incidentally, this Param Tattva is the cosmic Consciousness that is the subject of research and honour by all the scriptures.

Brahm is both Saguna as well as Nirguna. [‘Saguna’= one having attributes and definable qualities. ‘Nirguna’ = the opposite of Saguna; one that has no attributes and definable qualities. Saguna therefore also has a form, is visible and describable, while Nirguna is formless, invisible and indescribable. In this context, refer Canto 2, paragraph nos. 1-8, and Canto 8, paragraph nos. 1-4.]

Brahm is without any beginning, middle or end.

All this, i.e. the entire visible as well as the invisible world, is Brahm. [This is because the entire creation is a revelation of Brahm. Nothing that exists is outside the purview of Brahm.]

Brahm is Mayateet and Gunateet. That is, Brahm is beyond the definition and reach of Maya (i.e. it cannot be subjected to any kind of delusions) and Guna (i.e. it is not subject to being governed by any of the numerous qualities that govern the character and uniqueness of all individual entities of creation).

Brahm is endless and infinite; it cannot be known by logic and visible proof; it is immutable, steady and indivisible; and it is absolute and complete in its self.

Brahm is unique and without a parallel; is an embodiment of supreme bliss and happiness, of beatitude and felicity; is pure and enlightened; is eternally free; is an embodiment of Truth; is all-pervading, all-encompassing and omnipresent; is without having any distinctive categories, divisions or sections that may be different from one another; and is immutable, indivisible, seamless, constant, boundless, uniform and universal.

Brahm is a personification of the eclectic virtue of Sat-Chit-Anand. [That is, Brahm is truthful (Sat), consciousness (Chit) and blissful (Anand).]

Brahm is self-illuminated.

Brahm is beyond the reach and purview of both the mind and the faculty of speech. [That is, Brahm cannot be grasped by the mind, and cannot be described by speech.]

Brahm is out of the purview of all proofs and logics. [That is, one cannot prove the existence or otherwise of Brahm by employing worldly method of using logic and proof to establish or deny the presence of anything or its worth and importance.]

Brahm is the only sublime and eclectic entity that one should strive to know and be acquainted with by the study of various Upanishads.

Brahm cannot be divided by, segregated and categorised into segments or categories by any kind of situation, or any dimension of time, or by any of the myriad forms which Brahm takes in this creation.

Brahm is complete and wholesome in everyway.

Brahm is a personification of the Turiya state of consciousness (which is a transcendental state), is Niraakaar (i.e. is unqualified, having no form, shape, contour, attributes, qualities, characteristics etc. of any kind), and is unique and without any parallel.

Brahm is not compatible with the concept of Dwaitya (the concept of duality); Brahm cannot be known or defined or characterised by relying upon this concept of duality. [In other words, Brahm is 'Advaitya'—it is a non-dual and one of its only kind sublime entity.]

Brahm is synonymous with Pranav, the cosmic Consciousness from which the ethereal vibrations that are heard as the cosmic Naad and visualised as the monosyllabic word OM, has emerged. [The vibrations generated by the cosmic Consciousness created the primordial cosmic energy that powered the dynamo of life in this creation.] This Pranav (Brahm) has taken the form of the Atma, the pure consciousness that resides in the bosom of all living beings and which lends life to the otherwise lifeless gross creation. Therefore, all the Mantras² that have their primary origin in this Pranav (i.e. in the primordial sound of OM which represents the cosmic ethereal vibrations generated by Consciousness, which in turn created the energy that transformed itself into life) are actually an image or reflection of Brahm. The Mantras

can be said to be sound manifestations of Brahm because Mantras are based on letters and syllables which are primarily different genres of sound having their seat of origin in Pranav or OM (4).

[Note—¹The eclectic divine virtues of Brahm have been enumerated elsewhere in this Upanishad also—viz. Purva Kanda, Canto 4, paragraph no. 1.

They are umpteen numbers of Upanishads that narrate the grand and magnificent virtues of Brahm, for instance—(a) Krishna Yajur Veda's Yogshikha Upanishad, Canto 2, verse nos. 15-19, Canto 3, verse nos. 17-22; Kathrudra Upanishad, verse no. 12, 27-28, 30-31, 42; Taittiriya Upanishad Valli 3, Anuvak 10, verse no. 2-5; Skanda Upanishad, verse no. 13; Dhyan Bindu Upanishad, verse no. 4; Varaaha Upanishad, Canto 2, verse nos. 16, 20-21, 26, 29; Canto 3, verse no. 2; and Canto 4, verse nos. 31-32; Yog Kundalini Upanishad, Canto 3, verse no. 35; Saraswati Upanishad, verse no. 50-52; Shwetashwatar Upanishad. (b) Atharva Veda's Mundak Upanishad, Mundak 1, section 1, verse no. 6; Mundak 2, section 2, verse no. 1, 9-11; Mundak 3, section 1, verse no. 3-5, 7-9; Atharvashir Upanishad (full); Naradparivrajak Upanishad, Canto 8, verse nos. 17-18, Canto 9, verse nos. 1, 16-22; Tripadvibhut Maha-Narayan Upanishad, Canto 1, paragraph 4-6. (c) Shukla Yajur Veda's following Upanishads—Adhyatma Upanishad, verse nos. 61-64; Brihad Aranyaka Upanishad Canto 2, Brahman 3. describes this Brahm's two forms in detail.

Brahm encloses this entire creation from all sides, and nothing exists outside the boundary of Brahm. This fact has been asserted in the Shwetashwatar Upanishad of Krishna Yajur Veda, Canto 3, verse no. 7, 9; Canto 6, verse nos. 2, 9; and in Gayatri Upanishad of Atharva Veda, Gopath Brahman, Kandika 38.

The relationship between Brahm and the world has been explained in Kathrudra Upanishad of Krishna Yajur Veda, verse no. 42.

²Mantras—Essentially, they are like formulas or keys that help one to access and benefit from the most mysterious but dynamic spiritual forces of creation. Usually, these forces are represented by different Gods, and each God has his specific Mantra; it is like the case of every individual person having his own identity code. By using a particular Mantra, we are virtually invoking a particular God's powerful forces and harnessing their energy to fulfill our objectives.]

5. Brahm has four Paads (literally meaning limbs or feet, but implying sublime aspects, facets or forms of Brahm)¹. [Refer also Canto 4, paragraph nos. 2-3, 6; Canto 8, paragraph no. 4.]

What are the four Paads of Brahm? They are—Avidya-Paad, Suvidya-Paad, Anand-Paad, and Turiya-Paad. The Turiya-Paad includes the higher echelons of the transcendental state of existence of Consciousness.

What is the difference between these four Paads, or how can one distinguish between them, or what do they signify?

Well, Avidya-Paad is the first Paad, Vidya-Paad is the second, Anand-Paad is the third, and Turiya-Paad is the fourth.

Mool Avidya (or primary lack of knowledge; primary ignorance) is present only in the first Paad (i.e. the Avidya-Paad), and none of the other three Paads have any trace of it. Some Fraction of Vidya (knowledge), Anand (bliss) and Turiya (transcendental state) exist in all the four Paads to a certain extent. [That is, all the four Paads (or aspects or facets) of creation or existence have certain degree of Vidya (knowledge or wisdom or awareness), Anand (bliss or happiness or joys), and Turiya state (of total dispassion and detachment that comes when one is fully satisfied with certain thing and wants no more of it, or when one is even fed-up of too much of anything) in them. The degree, ratio or proportion of their presence may vary from one aspect to another, but it cannot be said that any one aspect is completely devoid of

any one of them. Even the first aspect of total Avidya (or ignorance) has them—viz. (i) the realisation that there is ignorance is a Vidya or knowledge in itself; (ii) it is said that ‘ignorance is bliss’ because an ignorant person is not aware of the hidden dangers or problems, and so he remains happy and contented in his world of ignorance—that is, Anand is present in the first Paad of Brahm with a preponderance of Avidya; and (iii) ignorance of the pleasures, charms and comforts of something eliminates the rising of desires for acquiring it, which indirectly means being disinterested in it or remaining dispassionate towards it—which is equivalent to the Turiya state. If this is the condition of the state of Avidya, or the state of utter stupidity or the state of being inane, then surely the other three states which are more evolved by nature would surely have Vidya (or knowledge), Anand (or bliss) and Turiya (or contentedness leading to detachment) in them in varying degrees.]

If this is the case then what is the difference between the three Paads known as Vidya Paad, Anand Paad, and Turiya Paad? Well, these three Paads are given these names because they have the relevant virtues as a dominant factor or main virtue in them. [That is, the Vidya Paad has Vidya or knowledge as the dominant factor or virtue; the Anand Paad has bliss and happiness as the dominant factor or virtue; and the Turiya Paad has the transcendental state of existence wherein the creature is totally detached from this material world as the dominant factor or virtue.]

In actuality, there is no difference between them. [All these four Paads or aspects of Brahm relates to the four planes in which the same Consciousness exists. It is like the same entity known as ‘water’ existing in different shapes according to the container it is put into, or having different temperatures which make it freezing, cold, cool, warm, hot, scalding or boiling. Then again the same water assumes different forms such as that of ice, liquid water, a viscous fluid like blood, vapour, steam, raindrops, river, ocean, lake, well, and so on and so forth. Similarly, all the four Paads of Brahm relate to the same Divinity known as the cosmic Consciousness. It is knowledge—or the lack of it—that inspires one to treat these four Paads as either being invisioned as an aid for the purpose of study and understanding of an entity which is so mysterious, enigmatic and esoteric as Brahm, or treat them as having independent and separate existence. The former treatment would be called Vidya, while the latter would be called Avidya. Hence, a wise and erudite spiritual aspirant treats all the four Paads of Brahm as looking at the latter from four different angles.]

Out of these four, it is only the lowest one that is tainted by Avidya, for the rest of them are higher in stature and are marked by purity of knowledge, wisdom and erudition that are eternal, constant and truthful. These three higher Paads of Brahm are an embodiment of rare and transcendental level of bliss, are immutable and indivisible, and are magnificently illuminated as being founts of radiance and splendour of grand proportions.

These three exalted Paads of Brahm (i.e. the Vidya Paad, the Anand Paad and the Turiya Paad) are very enigmatic, esoteric, indescribable, indefinable, immutable and indivisible besides being highly eclectic and blissful.

Out of these three, the central Paad known as the Anand Paad has the eternal Vaikunth (the divine abode of Lord Vishnu) in its center. This magnificent Vaikunth is like a center from which is produced a current of immense glory, divinity, radiance and splendour. [This is because Vaikunth represents the hub around which the wheel of creation rotates. Vaikunth is the abode of Vishnu, a cosmic form of the Supreme Being also known as the Viraat Purush, from whom the creation emerged and then spread in all the directions much like the ripples arising from a point on the surface of calm waters of a lake and then spreading out in concentric circles in all the directions.

Later on in this Upanishad a 'Chakra' would be described which symbolise this particular philosophy as expounded in the present paragraph.]

There is a central figure or an image in this Vaikunth which is brilliantly self-illuminated and an embodiment of Anand (bliss and happiness, beatitude and felicity). The brilliant illumination emanating from this central figure or image radiates out from it in all directions like waves of brilliant light and splendour, and it illuminates the Vaikunth. [Since this Upanishad is dedicated to Lord Vishnu, this central figure or central Authority residing in Vaikunth is Vishnu himself. In fact, Vaikunth is the divine abode of Vishnu, and is also known as heaven. Lord Vishnu is radiant like the sun, and his radiance illuminates the Vaikunth much like the sky surrounding the sun is illuminated by the latter. In the context of Vedanta, this central figure would be the pure conscious Atma which is an image of Brahm and which resides in the subtle heart of all living beings. This Atma is the central Authority that exhibits the glorious virtues described here in relation to Vishnu who lives in Vaikunth. The Vaikunth then would be the heart of the creature as well as his subtle body consisting of the mind and the intellect. From the perspective of evolution, the Vaikunth would be a symbol of the entire creation that has come into existence—or the creation which is 'illuminated' in the sense that it has been made alive and activated by the presence of the cosmic Consciousness that has injected life and vitality in the otherwise lifeless and inane universe. Anything that is illuminated is visible; knowledge of it is available; its presence cannot be denied.]

Just like one sees numerous stars in the sky indicating the presence of uncountable universes, there are a number of divine abodes and forms that the brilliantly illuminated and radiant Lord Vishnu has taken. But the chief central Authority that lives in them and which is the source of all glories and illumination is known as Maha Vishnu. [There are countless stars in the sky, and each star is illuminated. There is a world around each of them, much like our own sun which is also a star in the cosmic plane, having its own solar system. But the common denominator in all the stars is the 'light and energy' that emanates from them to illuminate and energise their worlds. Similarly, Maha Vishnu is the central Authority around which the entire creation revolves. According to Vedanta, this central Authority is Brahm, but since this Upanishad is dedicated to Lord Vishnu the former is treated as being synonymous with the latter. The countless stars that dot the sky symbolise the countless forms in which the same fount of light known as Brahm has revealed itself. The stars are characterised by 'light' which is a common factor in all of them. Similarly, 'consciousness' is a common denominator in all forms of life that exist in this creation.]

The divine and supreme abode of Lord Vishnu is visualised as being present in the center of the celestial ocean called Kshir Sagar (or the eternal celestial ocean of milk), and it resembles a pitcher of Amrit (ambrosia). [The 'Kshir Sagar' represents the cosmic ether in which the first ripples of creation were formed. The central point—the nucleus—of this cosmic ocean where the ripples were generated and from where they spread in all the directions and corners of creation or universe is the Vaikunth as envisioned in the Upanishad. The source of energy that caused the ripple of life to be generated was the 'Consciousness' that manifested itself as the Maha Vishnu, the Great Lord. Since the pure cosmic Consciousness is also known as Brahm, it follows that the primary spark of life, the primary cause of creation was Brahm in its manifestation as Maha Vishnu. It is an ocean of 'Amrit' because it is the ambrosia of life that provided the nascent creation its first dose of nutrition, and then

sustained its growth and development endlessly. In other words, like Amrit this Kshir Sagar harboured the creation in its vast cosmic bowl and nourished it.]

Just like the divine patron deity of the majestic Sudarshan Chakra² (a disc-like weapon of Lord Vishnu and an instrument of worship) who resides in the center (or core) of it, and just like the Sun that lives in the center of the solar system, the Adi-Narayan (i.e. Lord Maha Vishnu, the primordial Lord of creation, the Primal Purush from whom the creation, including its creator Brahma, is said to be born) also appears to reside in the center of the Kshir Sagar. [If this is extended further it would imply that the supreme Brahm, the cosmic Consciousness, lives in the core of this creation, and it is around this Brahm that this creation is woven.] (5).

[Note—¹The four Paads of Brahm are the four limbs, legs, aspects, facets or pedestals of Brahm—The four ‘Paads’ of Brahm are the four legs upon which Brahm stands. These four Paads symbolically establish the greatness and supremacy of Brahm as the all-powerful and all-controlling Authority in this creation. Since Brahm is the supreme Divinity that has revealed itself in the form of this creation, since each and every unit of creation is a manifestation of Brahm and without Brahm nothing exists, nothing has any relevance and truth (refer Tripadvibhuta Maha-Narayan Upanishad, Canto 1, paragraph 1), it follows that the entire creation represents Brahm’s four cosmic forms or aspects or facets—which are called the four legs or Paads of Brahm. This is a metaphoric way of saying that the supreme Brahm has manifested himself and is made known to this world by the means of these four mediums.

These four Paads of Brahm have been explained in the present Upanishad in its Canto 4, paragraph nos. 2-3, 6, and Canto 8, paragraph no. 4.

Other references are briefly the following—(i) Sam Veda’s Chandogya Upanishad, Canto 3, section 18, verse nos. 2-6, Canto 4, Section 5, verse no. 2, Canto 4, Section 6, verse no. 3, Canto 4, Section 7, verse no. 3, and Canto 4, Section 8, verse no. 3. (ii) Krishna Yajur Veda’s Brahm Upanishad, verse no. 1. (iii) Atharva Veda’s Mandukya Upanishad, verse nos. 3-7; Nrisingh Purvatapini Upanishad, Canto 4, verse nos. 4-7; Ram Uttar Tapini Upanishad, Canto 3, verse no. 5-8; Par Brahm Upanishad, verse no. 5; Narad Parivrajak Upanishad, Canto 8, verse nos. 9-19.

²The ‘Sudarshan Chakra’ is described in detail in Canto 7, paragraph 3-14 of this Upanishad. The different Vaikunths that are being referred to here as a metaphor for various universes have been described in Canto 6, paragraphs 15-20, and Canto 7, paragraph 16-18 of this Upanishad.

These Vaikunths are the following—]

6. [This paragraph describes the grand and sublime virtues, the eclectic qualities, the magnificence and divinity of Lord Vishnu. A striking similarity is found in *Vishnu Puran*, Chapter 1, Canto 2, verse nos. 1-32, 55-70.

An elaborate note on Lord Vishnu has been appended to verse no. 25 of the Sharav Upanishad which is Chapter no. 10 of the present volume.

The word ‘Vishnu’ consists of two components—‘Vishwa’ meaning the world or the entire creation, and ‘Anu’ meaning an atom. Hence, this is made up of atoms called Vishnu, and therefore the latter pervades throughout this creation. The whole creation is a manifestation of Vishnu. Vishnu must be understood with this perspective in mind.]

It is he (i.e. the divine Being who has been described in paragraph 4-5 above) who is Turiya Brahm (or is the transcendental Divinity known as Brahm). It is he who is also Turiyateet (i.e. the higher echelons of transcendental Consciousness). It is he who is known as Vishnu. [That is, Lord Vishnu and Brahm are the same divine entities. This statement establishes the non-duality between Vishnu and Brahm, and by inference

between all the other units of creation, because each of these units is a manifestation of Brahm or Vishnu, depending upon the philosophy one follows. In this connection it would be interesting to note that Vishnu is also the Viraat Purush, the invisible, all-pervading and all-encompassing cosmic form of Brahm, the form which is regarded as the gross body of Brahm at the macrocosmic level of creation, and from which the rest of gross bodies of creation emerged and evolved. Refer Canto 2, paragraph 10-11.]

It is Vishnu who is a synonym for Brahm, and these two terms are interchangeable as they indicate the same Divine Being.

It is he (Vishnu) who is the personification of sublime 'light'. [Here, 'light' refers to enlightenment, knowledge, wisdom, erudition and such other auspicious virtues that remove the darkness of ignorance and delusions.]

It is he (Vishnu) who is beyond the purview and reach of Maya (delusions), Gunas (attributes, qualifications and specified characteristics), and Kaal (time and eras), all the Karmas (deeds and actions, and their causes and consequences). [That is, Maya, Gunas and Kaal have no affect on Vishnu, the supreme transcendental Brahm.]

It is he (Vishnu) who is the ultimate Truth, and he has no attributes, epithets, titles and honours. [That is, Vishnu is the Absolute Truth known as Brahm, the cosmic Consciousness. The Lord cannot be defined or lauded by any known epithets and honours. No titles or names would be able to bring the glory of Vishnu to the fore because of one simple reason that Brahm is unimaginably beyond the purview of mind and speech.]

It is he (Vishnu) who is known as Parmeshwar—the supreme Lord. [This is because he is the supreme regulator and controller of everything in existence.]

It is he (Vishnu) who is known as Puran Purush—the ancient Lord lauded and extolled in the Purans. [The Purans are ancient Hindu scriptures that narrate the various stories pertaining to manifestations of Brahm as different Gods such as Vishnu, Shiva, Brahma etc.]

It is he (Vishnu) who is expressed or revealed by means of all the Mantras and letters or words of the language. [Since Brahm is consciousness and the very basis of life, all the spoken words, such as the Mantras, are expressions of this Brahm.]

It is he (Vishnu) who is without a beginning and an end (as he is eternal, infinite and imperishable).

It is he (Vishnu) who is revealed in all dimensions or phases of time, space and eras pertaining to the past, the present and the future, as well as in all things that exist in them.

It is he (Vishnu) who is expressed and meant by the term Turiya (which is the transcendental state of existence of consciousness).

It is he (Vishnu) who is unchanging, steady and complete in all respects.

It is he (Vishnu) who is an embodiment of Truth, and an upholder of Truth.

It is he (Vishnu) who is known as 'Atma Ram'—the Divinity that provides liberation and deliverance to the creature when the latter realises that this Divinity is present in his own bosom as his Atma which is pure consciousness. [The word 'Ram' refers to the divine Lord who provides one with Mukti or liberation, deliverance, emancipation and salvation for his soul. The word 'Atma' refers to the soul which is pure and sublime consciousness that resides in the heart of the aspirant. This Atma is the 'true self' of a living being. Hence, the term 'Atma Ram' refers to the eclectic state of self-realisation and enlightenment when the aspirant realises that the Lord who is a provider of Mukti is the one who resides in his own inner being as the Atma or soul. This Lord lives nowhere else but in the creature's own bosom as his Atma, as

his 'self'. This realisation itself frees him from all fetters of ignorance that had tied him down to the gross body as well as the equally gross world.]

It is he (Vishnu) who is not hemmed in by or bound by or subject to any limitations imposed by time and circumstance in their three dimensions—such as the past, the present and the future, or the good, the bad and the routine.

It is he (Vishnu) who is personified 'light' and its illumination, and hence is self-illuminated. ['Light' is a term used to indicate any virtue or factor or quality that removes darkness.]

It is he (Vishnu) who is incomparable and unique in every respect because he is one of his only kind.

What more can be said of the Lord's immutability, uniformity and indivisibility in creation than the fact that there is no division in Vishnu like a day being arbitrarily divided into two parts consisting of a lighted half called the 'day' and the dark part called the 'night', or like one year being divided arbitrarily into various seasons, months and days. [The terms 'day' and 'night' are artificial partition of time created by man based on whether or not the sun is visible in the sky. Actually the sun never sets or rises in the sky, and what one calls a 'day' may be a 'night' on some other part of the earth. Similarly, Lord Vishnu, who is the macrocosmic gross body of Brahm, the Consciousness that pervades uniformly and universally in the entire living creation, is also indivisible. The many forms and names of Vishnu are artificially assigned to the same Lord.]

It is he (Vishnu) who is an embodiment of self-generated bliss; he remains submerged in eternal beatitude and felicity that springs out or effuses out of him spontaneously.

It is he (Vishnu) who possesses magnificence, majesty and greatness of stupendous magnitude, of dimensions that are beyond anyone's imagination and thoughts.

It is he (Vishnu) who is at the core of the 'Atma' of all creatures. [That is, Vishnu is the primary Consciousness that has revealed itself in myriad forms, and that is why he is called 'Atma-Ram'—the basis of the Atma and its most refined and sublime form known as consciousness.]

Indeed, it is he (Vishnu) who is known as 'Parmatma' (the supreme Atma), Gyan-Atma (the enlightened Atma, the enlightened soul), Turiya-Atma (the consciousness that exists in the transcendental state), and so on. It is he who is the divinity implied in all these terms.

It is he (Vishnu) who is Advaitya or a non-dual universal entity in creation.

It is he (Vishnu) who is an embodiment of the highest degree of bliss, beatitude and felicity collectively known as 'Anand'.

It is he (Vishnu) who is known as 'Vibhu'—one who is the almighty, universal, uniform, all-pervading and all-encompassing Lord in creation.

It is he (Vishnu) who is 'Nitya'—always present everywhere with the same intensity and dimension, one who is omnipresent, constant, steady, uniform and universal.

It is he (Vishnu) who is 'Nishkalank' and 'Niranjan'—one who is without any blemishes, aspersions, shame, slander, spot, slur, ignominy, taint, infamy, disgrace and other moral, ethical and spiritual faults of any kind; to have no scars to mar one's immaculacy.

It is he (Vishnu) who has no definitions and attributes; no adjectives or epithets can describe him.

In fact, it is he (Vishnu) who is the only immaculate, un-corrupted and undisputed supreme Lord God of all, called Lord Narayan. There is no one else as exalted and divine as him to be honoured by this name of 'Narayan'.

A wise and learned aspirant who is well aware of the above-described facts and who adores and worships Lord Narayan or Lord Vishnu with this wisdom and perspective is able to obtain Sayujya form of Mukti—i.e. he is able to obtain nearness with his revered Lord. There is no doubt in this statement (6).

[Note—Refer Sharav Upanishad of the Atharva Veda tradition, verse no. 25, which clearly states that it is Lord Vishnu who had created this creation.]

-----*****-----

Purva Kand--Canto 2

[This Canto primarily narrates the two basic forms of Lord Vishnu—one is called 'Saguna' or 'Saakaar' which refers to the Lord's manifested or revealed form or aspect, and the other is called 'Nirguna' or 'Niraakaar' which refers to that form or aspect which has no visible forms and attributes. It goes on to describe the cosmic form of Vishnu as the Viraat Purush, the macrocosmic body of Brahm, the Supreme Being, from whom the rest of creation has emerged. The concept of non-duality between all the forms that Brahm takes, including those of the Trinity Gods such as Brahma the creator, Vishnu the sustainer and protector, and Shiva the concluder, and the chief God known as Indra, is also elucidated.]

1. After having heard the discourse given by the learned Guru (as described in Canto 1), the eager disciple was a little confused. So to remove his doubts, he asked the learned teacher—'Oh Lord! You have said that Vaikunth and Narayan are 'Nitya'—i.e. they are eternal, uniform and steady, being infinite, imperishable and never changing. You have also said that they are the 'Tattva' or the essence of what is known as the Turiya state of existence. But there seems to be some confusion—because Vaikunth and Narayan are 'Sakar'—one that has attributes and virtues (which you have described at length), while the Turiya state is known to be 'Nirakar'—one that has no attributes as it is a transcendental state of consciousness when nothing of the world matters for it; it is a subtle and sublime state of existence.

The Sakar principle has definite form with parts and its characteristic features and limitations, while the Nirakar principle has none of it. The scriptures assert that Sakar is limited and mortal or perishable, while Nirakar is unlimited and eternal or immortal. [This is because anything that has a gross form would ultimately come to an end due to the natural process of aging which is a part of the cycle of creation and destruction.]

Hence, all those entities that have any kind of finite form that has a shape, a gross body and definable features that can be definitely ascertained and described, such as the ones that come under the category called 'Sakar', would be certain to come to an end one day, while those entities that are free from such limitations, and come under the category called 'Nirakar', would logically be eternal, never ending, infinite and immortal. This is not only proved by logic and the process of imaginative thinking but is even practically verifiable. [A simple example would suffice to explain this phenomenon. The element 'air' is not visible, cannot be smelt or tasted etc., and it has no definite attributes, but it is universally present everywhere ever since the creation came into being. On the other hand, its manifested form is the soft breeze

blowing against the face which is pleasantly felt by all, or as the fierce and howling storm which also makes its presence felt in no uncertain terms but in a fearful manner. Both the breeze and the storm arise, gather energy, spend it and then subside to vanish into thin air. The air was present prior to the existence of both the breeze and the storm but no one could make out its presence. The breeze and the storm are manifested or revealed form of this air element which is otherwise invisible and imperceptible. They have a starting point, duration of existence, called their life, and then subside and vanish when their energy is spent. In other words, while the air element, which is the primary cause of these two, is a constant entity that never changes, its manifested form as the breeze or the storm not only have a limited life but also are ever changing.]

Hence, it is logical and correct to say that both Vaikunth and Narayan or Vishnu are not eternal, not infinite, not steady, not constant and not immortal (because they come under the category of ‘Sakar’). Then say, how have you called them ‘Nitya’— i.e. as being eternal, uniform and steady, being infinite, imperishable and never changing, being present steadily, uniformly, consistently, persistently and constantly in all planes of time and place?

The scriptures assert that the Turiya principle is ‘Akshar’—i.e. one that does not decay, one that is imperishable. Hence, it is a well established fact that Turiya is ‘Nitya’.

Nitya and Anitya (which is the opposite of Nitya) are mutually contradictory and opposite by nature. It appears that to have them both (the virtues of Nitya and Anitya) in the same Brahm is very illogical and an incredulous a proposition. Therefore it is proper to say that both Vaikunth and Lord Narayan are ‘Anitya’, or are not ‘Nitya’ (as defined above).’ [(1).

[Note—Refer also to Canto 4 in this context.]

2. The learned teacher dispelled the doubts of the disciple and explained—‘What you say is alright. But the ‘Sakar’ principle is of two types—one with an ‘Upaadhi’ and one without it. [The word ‘Upaadhi’ means attributes, epithets, honours, titles, designation, denomination, degree, definitions, qualifications etc. The word ‘Sakar’ means an entity that has a form and characteristic attributes, an entity that is assigned a particular name and designation, an entity that can be defined, described and understood. Hence, the ‘Sakar with an Upaadhi’ would be an entity that has a form along with definable attributes and characteristic features. In the case of Lord Vishnu and his divine abode called the Vaikunth, these have been described in Canto 1, paragraphs 6 and 5 respectively.]

What is the nature of the Sakar with an ‘Upaadhi’ rider attached to it?

Everything that has its origin in Avidya, or ignorance or lack of knowledge and wisdom, are limited to the Avidya Paad of Brahm (or creation). [In other words, anything that is done out of ignorance or that is sustained by ignorance has any relevance only till the time there is ignorance. As soon as ignorance is removed by the acquisition of knowledge and wisdom, the same thing, the same deed etc. seems absolutely irrelevant, out of context and absurd. Since everything in existence is a manifestation of Brahm and nothing is beyond the purview and reach of Brahm, it is natural that even Avidya is a form of Brahm, though Brahm itself is not ignorance but an embodiment of wisdom, erudition, knowledge and enlightenment. This paradoxical and opposing nature of Brahm is what makes the latter so unique in creation. The concept of Avidya has already been explained in Canto 1, paragraph 5.]

All the things that are categorised as Sakar (i.e. that are definable, describable, with attributes and qualifications) consist of various parts or fractions or aspects or units which are collectively called its 'Avyavs'. All these individual units combine together to give that particular entity its specific characteristics and attributes, its form, nature and identity. These Avyavs help to qualify that entity. This is typical and basic case of Avidya and its effects. [This is because of the fact that the same Brahm exists in all these forms, but it is out of Avidya, or ignorance of the fact and reality, that one distinguishes between any two given entities or situations of creation. He forgets that this distinction is artificial and it does not reflect or depict the actual situation or the truth. Misled by ignorance, one is deluded into believing that Brahm has so many distinct and individually separate forms. To cite a simple example, the sky or space element is basically one and an immutable entity. But this sky is given different names such as Ghatakash or the sky or space that is present in a hollow pitcher, a Mathakash or the sky or space present inside the walls of a monastery, a Mahakash or the sky or space that is present in the vast bowls of the cosmos, etc. But upon close analysis one observes that all of them are the various names given to the same universally one and immutable 'sky element'. Similarly, the same water element is given various names such as an ocean, a sea, a river, a brook, a waterfall, rain water, ice, vapour, steam, moisture etc. This concept of Sakar and Nirakar being the same thing, or having the same meaning when applied to Brahm is explained in paragraph no. 7 below by citing the example of the air element and the earth element.]

Since everything that has a Sakar form also has some or the other kind of 'Avyavs' in it, it is sure to be 'Anitya'. [This is due to the fact that anything that can be defined or described would definitely have limitations as it remains confined to these definitions or descriptions. Its scope becomes butted and bounded by its components. If it goes beyond them, the basic nature would change and so would the description and the definition. Everything that has some qualification must change over time because the criterion used for measuring such qualifications would also change over time. This visible world is a typical case of something being categorised as Sakar, and it is a normal observation that nothing in this world remains constant for any length of time as well as the fact that everything here is perishable and transient. Even the measurement of the length of a day and a night changes; no two days or nights are exactly alike, for everyday a second is either added to or subtracted from them.]

This describes the concept of Sakar principle with qualifications or riders that are called its Upaadhi (2).

3. What is the nature of the second type of Sakar, i.e. the Sakar that has no Upaadhi? [Refer paragraph no. 4 below. The word 'Upaadhi' means attributes, epithets, honours, titles, designation, denomination, degree, definitions, qualifications etc. The word 'Sakar' means an entity that has a form and characteristic attributes, an entity that is assigned a particular name and designation. Hence, 'Sakar without an Upaadhi' would be a sublime entity that is so subtle as to have no specific attributes inspite it having a form, no matter how sublime, and a particular name, no matter how abstract. In this category would come the Viraat Purush, the invisible macrocosmic gross body of the Supreme Being that has no specific attributes and characteristic features, but it nevertheless has a body and a name. This Viraat has been described in paragraph 12 of the present Canto no. 2.]

The 'Sakar without an Upaadhi' is of three types—viz. Brahm Vidya Sakar, Anand Sakar, and a combination of these two called the Ubhayaatmak Sakar (i.e. Brahm Vidya-Anand Sakar). [In other words, the exalted state of existence that is

obtained by the acquisition of the eclectic knowledge pertaining to Brahm is called 'Brahm Vidya Sakar'. The state of existence where Anand or bliss is the dominant and steady factor is known as 'Anand Sakar'. And the state which is the combined result of the two is known as 'Brahm Vidya-Anand Sakar'. Since the exalted state of consciousness that exists as a result of Brahm-realisation is invariably accompanied by eternal Anand, the third state is regarded as the better state because it combines the richness and the goodness of the virtues of Brahm-Vidya and Anand.]

These three forms of exalted existence are collectively called 'Trivid Sakar'. [The word 'Trivid' means having three forms or dimensions.]

The Trivid Sakar again is of two types—viz. Nitya Sakar and Mukta Sakar. [As described earlier in paragraph 1, the word 'Nitya' refers to an entity that is constant and unchanging, while the word 'Mukta' means that which is free. Hence, 'Nitya Sakar' is that form of Trivid Sakar that is constant and unchanging, while 'Mukta Sakar' is that form of Trivid Sakar which is not bound to anything, or is free from everything.]

The 'Nitya Sakar' is one that is called 'Sanaatan'—i.e. that which is eternal, perpetual, primeval, ancient and traditional; it is constant and unchanging. The 'Mukta Sakar' refers to the state of existence that is equivalent to one having attained Mukti (liberation and deliverance) as an auspicious reward of offering of prayers, worship and homage with the greatest of devotion as well as by doing selfless service.

The Mukta Sakar has its roots in profound 'Gyan', or robust and unwavering knowledge of the Truth. In other words, those who are submerged in the thoughts of Brahm, those who have become truly self-realised and Brahm-realised are the ones who are not only spiritually liberated but even their grosser form as the 'body' also becomes an embodiment of Gyan. [This is obviously true because only when a man is acquainted with the spiritual truths would he be freed from the delusory effects of this material world and his gross body consisting of the sense organs which always demand attention for gratification. Such an enlightened and wise man is freed from all kinds of bondages, and this is only possible with acquisition of true and profound degree of Gyan.]

The gross body of such a spiritually liberated person is symbolically deemed to be holy and truthful because it is freed from its grossness. [The gross body normally remains busy in gratification of the sense organs and enjoying the pleasures and comforts of the material world. Since both the sense organs and the world are gross, selfish, corrupted and unholy, the creature's Atma, i.e. his 'true self', that does not free itself from the clutches of the gross body cannot remain unaffected by the body's contaminating effects. But when the creature becomes self-realised, when he understands the purity, the eternity and holiness of his 'self'—which is the not the gross body but the Atma that is 'Sanatan', i.e. is eternal, truthful, unchanging and imperishable unlike the gross body which has characteristics which are just the opposite of the Atma—he begins to treat this Atma and its subtle body consisting of the mind and intellect as his real and truthful body instead of the physical gross body having various sense organs. With this change of perception, the term 'body' also undergoes a profound change in meaning and importance. Instead of being perishable and gross it now becomes imperishable, sublime and subtle.]

But there is a rider—this 'Mukta Sakar' is dependent upon one's wishes; it is optional. [It is only when a man determinedly keeps himself detached from the body and firmly rooted in the Atma—which is the blissful Brahm personified in the form of the pure 'consciousness'—that it is possible for him to obtain Mukti while still having a gross body—or to attain the exalted stature of 'Mukta Sakar'. There might be cases

that inspite of acquisition of Gyan of the highest order a man might still be attracted to the world and the body; he might preach others about the Atma but himself treat his body as his identity. Hence, to really become freed from the fetters of the body is optional. In other words, it is not necessary that by simply acquiring knowledge (Gyan) one would definitely become freed (Mukta) from fetters (Bandhan) of the gross body. It is his 'will' and the 'determination' to do so that actually does the trick.] (3).

4. How can 'Sakar without an Upaadhi' be Nitya (eternal, truthful, immortal and unchanging)? [Refer paragraph no. 3 above. This question arises because all forms that this creation takes are the same Brahm in all their forms. So, if Brahm is 'Nitya', its form as 'Sakar without an Upaadhi' should also be 'Nitya'. But usually anything that is 'Sakar' is deemed not to be 'Nitya'—see paragraph no. 1 of this Canto. So how do we explain this paradox? How do we reconcile these seemingly contradictory situations?]

The answer is this—'Brahm has a cosmic 'form' (i.e. it is 'Sakar') known as the sublime cosmic Consciousness that is extremely subtle and divine as well as is free from any kind of attributes and characteristics ('Upaadhi') that are used to understand and define an entity with a physical form and to relate to it; it has no grossness in it. Besides this, this Consciousness is eternal and infinite, it is all-pervading, all-encompassing and omnipresent, and it is a constant and unequivocal feature of the entire living creation (i.e. it is 'Nitya').

This Brahm is a sublime and subtle entity characterised by the grand and unique virtues of being 'Advaitya' or non-dual, of being 'Nitya' or constant, indivisible and immutable, of being 'Purna' or complete in all respects, of being 'Anand' or an embodiment of eternal bliss and happiness, of being 'Pavitra' or most pure, untainted, immaculate and holy, of being a personification of profound 'Gyan' which is truthful knowledge and enlightenment, of being always 'Mukta' or freed and unbound, and of being an embodiment of 'Satya' or Truth. As would be obvious here, all these attributes have an eternal value; all these characteristics of Brahm are sublime and imperishable by their intrinsic nature.

Hence, an entity (known as Brahm in the form of the cosmic Consciousness and the Truth of creation) that has a form (i.e. is Sakar) and attributes or virtues (known as Upaadhi as described above) is proved to be of an eternal, constant, truthful and imperishable nature (i.e. it is Nitya). [But this 'Sakar' form of Brahm is unique in as much as it has no grossness in it inspite of it being usually identified by things that are wholesomely gross—for instance, it being identified with this physical world which is irrefutably gross and perishable by nature. This is because this world has a whole lot of attributes and characteristic features, and anything that is such cannot be 'without an Upaadhi'. Further, this world has a certain beginning and an end, and anything with these limits cannot be called 'Nitya'.]¹

It follows that there should be no doubt that there is no other greater or more exalted entity than the Sakar form of Brahm. [That is, since Brahm is a non-dual entity that always remains immutable, indivisible and constant in this creation, no matter in which form it exists, it would still remain the same—i.e. it would always remain and retain its exalted stature of being 'supreme and transcendental'. There is no question of one form of Brahm being junior and the other form being senior. Brahm is a non-dual divine entity that is constant and one single whole—it is the pure Consciousness and the Absolute Truth of creation that may vary in its appearance because of the angle from which one tries to understand or see it.]

All the Upanishads and other scriptures unanimously and unambiguously declare that Brahm is one and non-dual, remaining always constant, universal and uniform. Therefore, the three exalted virtues associated with Brahm, viz. Vidya (knowledge), Anand (bliss) and Turiya (transcendental state) have no difference or separation between them. [This means that Vidya, Anand and Turiya go hand-in-hand. When one attains truthful enlightenment or Vidya, he becomes submerged in bliss of self-realisation and Brahm-realisation or Anand, and this state of his existence is transcendental or Turiya in nature.]' (4).

[Note—¹This form of Brahm as the cosmic Consciousness is Brahm's subtlest 'Sakar' form. It is 'Sakar' in the sense that the otherwise nameless and formless Divinity has taken a certain form, no matter how subtle, sublime and diffused it is. The Upanishads unequivocally assert that the entire creation is a manifestation of Brahm. Since this creation has a certain 'form', it is the 'Sakar' Brahm in this form.

But this creation has any meaning only because the cosmic Consciousness is woven into its texture as its integral part; it pervades throughout it. Without the presence of this Consciousness there would be no life in creation, and a dead creation is not worth paying any attention to; it is as good as not being there at all.

But at the same time it must not be forgotten that this 'Consciousness' has no specific gross attributes and characteristics; it is not a gross entity that can be defined and established on some pedestal to give it an honour—that is, it has no 'Upaadhi'. Hence, the visible creation is the 'Sakar' form of the Divinity known as Brahm which is fundamentally 'without an Upaadhi' as it is nothing but pure sublime cosmic Consciousness that has no physical specific attributes or characteristics at all.

So how do we justify these two seemingly contradictory situations? Well, this is exactly what is being explained here. The 'Tattva' or the fundamental essence of this living world and its living beings is not their physical gross form or structure or feature, but the subtle and sublime entity known as the 'consciousness' that lies hidden behind the exterior. This 'consciousness' is invisible and absolutely pure and immaculate. This consciousness is the 'Tattva' or essence of creation, because without it the creation would be meaningless and hollow.

This entire creation—whether the one which is the grosser form of creation that is visible around us with all its living beings we see and interact with in this world, or its subtler form in the heaven where Gods and Spirits live, a world that we cannot see—is a manifestation of Brahm. Hence, when we understand Brahm in relation to the creation we call Brahm as being 'Sakar'. But Brahm is basically the cosmic Consciousness that has no gross form, as it is an absolute sublime and subtle entity. Therefore, Brahm is also 'without an Upaadhi'.

Further, the magnificent qualities associated with Brahm as outlined above are of an eternal nature, hence Brahm is 'Nitya' too.

Thus, the contradictory situations that the 'Sakar Brahm' which should normally be 'Anitya' (transient, mortal and perishable) is indeed 'Nitya' (eternal, imperishable and infinite), and which should normally have 'Upaadhis' (attributes and characteristics) is actually 'without an Upaadhi' have been reconciled.]

5. The disciple asked his Guru—'How would one distinguish between the three forms of Sakar you've mentioned—viz. the Vidya Sakar, the Anand Sakar and the Vidya-Anand Sakar?' [Refer paragraph no. 3, 2nd stanza.]

The learned teacher replied—'Obviously, that Sakar form or aspect of Brahm which has a dominance of Vidya, or truthful knowledge, erudition, wisdom and enlightenment, is known as 'Vidya Sakar'. Similarly, the Sakar form or aspect of Brahm where Anand, or bliss and happiness, is the dominant feature or virtue is known as 'Anand Sakar'. And by the same reasoning, that Sakar form or aspect of

Brahm which has a dominance of both Vidya as well as Anand would be called 'Vidya-Anand Sakar'.

So we conclude that this categorisation is merely to indicate the dominance or the presence of a greater proportion of one particular virtue vis-à-vis the other, but the Principal that is being described is the same. Even if no extraneous virtues are assigned to this Principal the latter would still not lose its intrinsic qualities. Hence we deduce that these categorisations or aspects are artificially assigned to the Principal to highlight one or the other aspect of its principle, divinity, majesty and greatness, but they in no way affect the primary nature of Brahm which always remains one and non-dual. [In other words, no matter what name or designation or quality or epithet we assign to Brahm, whether we call Brahm 'Sakar' or 'Nirakar', whether we categorise this Sakar into different types such as 'Vidya', 'Anand' and 'Vidya-Anand', or even as 'Sakar without an Upaadhī'—none of these would ever change the primary nature of Brahm. They would not affect Brahm in the least.]' (5).

6. The disciple asked his Guru—'Oh Lord! It looks that for Brahm—which is a non-dual, immutable, indivisible, constant, incorruptible, unchangeable and eternal entity that is an image of infinite bliss, beatitude and felicity—this dual concept of being 'Sakar' (one having a form and attributes; one having qualifications) as well as being 'Nirakar' (the opposite of Sakar) appears to be contradictory. So, how can they exist simultaneously in Brahm, or how can Brahm be both? Please be kind to elucidate upon it.' (6).

[Note—In this context, refer Canto 1, paragraph nos. 3-4, 6, and Canto 8, paragraph nos. 1-8 which also deal with the same question.]

7. The learned teacher removed this doubt in the mind of the disciple by saying—'What you said is correct. But when analysed deeply we will conclude that it is indeed possible. Let us take two instances of the air and the earth elements to explain this concept.

Just like the great air element (which is one of the five primary elements of creation, the others being sky, fire, water and earth) has no form, qualities, qualifications and specifications of its own, i.e. it is 'Nirakar', but when it manifests itself in the body of the creature as the latter's ability to speak and express himself (because air in the form of breath and wind passing through the vocal cords in the throat enables a person to speak), along with the patron deity of speech (known as Saraswati), as well as in the form of the various Prans or vital winds which regulate the functioning of the creature's body (such as the Pran, Apan, Vyan, Samaan and Udaan etc.)¹, then this primarily formless air element is deemed to have become 'Sakar', or has taken various forms with their characteristic attributes. For instance, the spoken word is primarily air element making different sounds which are recognised as alphabets.

Similarly, the earth element that is primarily 'Nirakar', or which has no specific form, attributes and specifications, is moulded into various shapes and sizes, each having their own attributes and names. That is, the Nirakar earth becomes 'Sakar'. [For instance, a potter makes many different things of varying shapes and sizes from a clod of earth, and none of his creations have any resemblance to the primary raw material, the 'earth', from which they are made. But does this mean that they are 'not' earth? Certainly, all the forms that earth takes would be only 'earth' and nothing else. This concept has been beautifully explained in Canto 8, paragraph no. 2

of this Upanishad citing the examples of gold made into golden ornaments, and water existing in different forms as ocean etc.]

This applies to all the other elements such as fire, sky and water which are primarily formless cosmic entities—or are ‘Nirakar’, and each one of them assumes some or the other form having attributes—or become ‘Sakar’. [For instance, the formless sky becomes Ghatakash—the space inside a pitcher, or the Mathakash—the space within the walls of a monastery. The fire has different names—viz. the Grahapatya fire—the fire lit in the household hearth, the Ahawaniya fire—the sacred fire lit to invoke Gods during religious ceremonies, the Dakshinagni fire—the sacred fire lit as a witness during charities, the Yagya Agni or the sacred fire of the fire sacrifice, etc. The water element assumes so many common names such as ocean, river, lake, well, spring etc.]

The above narration applies to the gross level of creation. Even when extended to the subtle level of creation, the same principle holds true. These primary elements that are basically formless, or are ‘Nirakar’, are transformed into respective deities having a majestic form and divine attributes or a ‘Sakar’ form. These deities are the formed versions of these elements—or are the ‘Sakar’ manifestations or versions of the ‘Nirakar’. But notwithstanding their physical variations, they are essentially the same. [For instance, the sky element has Viraat Purush as its manifestation; the air element has the Wind God known as Vayu as its manifestation; the fire element has the Fire God or Agni as its manifestation; the water element has the Water God known as Apaha or Varun as its manifestation; and the earth element has the Prithivi or the Bhu Devi as its manifestation. But all these deities can only show the virtues that are characteristic and specific to their primary elements. For instance, the Fire God cannot show the qualities of the Water God, and vice versa. Thus, whether we treat the ‘fire’ as an element or in its personified form as the ‘Fire God’, we are basically dealing with the same entity known as ‘fire’, and not water or anything else.]

That is why there is no cause of any contradiction, dichotomy or schism leading to any kind of confusion or doubt about the non-duality, uniformity and universality of Brahm, or in the fact that the same Brahm exists both in a Sakar as well as a Nirakar form.

When one becomes truly enlightened and wise about the eclectic and divine virtues of Brahm who is supreme and almighty, who is an esoteric and mysterious Being whose magnificence, greatness and majesty are beyond comprehension—it is only then such doubts about Brahm are dispelled.

In other words, when one becomes aware of the factual position that Brahm represents a composite cosmic Authority that is central and supreme in this creation in as much as it is a combined form or unitary form of all the myriad mystical powers and dynamic forces of creation, of all the majesties and glories that have revealed themselves in magnificently vivid forms in this creation—it is only then that he realises that it is not illogical to conceive Brahm as having (or possessing) at the same time qualities and characteristics that apparently seem to be contradictory and poles apart.

It is the lack of this erudition and wisdom that leads to so much doubts and confusions regarding Brahm (7).

[Note—¹The various vital winds or airs and how they regulate the functioning of the body can be summarised as follows in the *Subalo-panishad*, Canto 9, verse no. 1-14 of the Shukla Yajur Veda tradition, there are fourteen vital winds called Prans present in the body. It lists their functions as follows—(1) Pran—this controls eyes and the faculty of sight (verse 1); (2) Apaana—this controls ears and the faculty of hearing (verse 2); (3) Vyan—this controls nose and the faculty of smell (verse 3); (4)

Udaan—this controls the tongue and the faculty of taste (verse 4); (5) Samaan—this controls the skin and the faculty of touch (verse 5); (6) Vairambh—this controls speech (verse 6); (7) Mukhya—this controls the hands (verse 7); (8) Antarayam—this controls the legs (verse 8); (9) Prabhanjan—this controls the anus (verse 9); (10) Kurma—this controls the genitals (verse 10); (11) Shyen—this controls the Mana or the thoughts and emotions (verse 11); (12) Krishna—this controls the discrimination, intellect and wisdom (verse 12); (13) Shwet—this controls Ahankar or the notion of ego, pride, arrogance, vanity etc. (verse 13); (14) Naag—this controls the 'Chitta' or the faculty of concentration, memory, sub-conscious, reasoning (verse 14).]

8. It is well established that the two famous and majestic incarnations of the Supreme Being known as Lord Ram (of the Ramayana fame) and Lord Krishna (of the Mahabharata fame) are none else but the same supreme transcendental blissful Brahm—which is a cosmic, infinite, invisible, non-dual and formless entity having no attributes—that has revealed itself in these two divine forms.

These two glorious incarnations of Lord Ram and Lord Krishna have been repeatedly lauded, honoured and glorified by the scriptures, and their virtues, glories, noble ideals and auspicious deeds have become immortal and renowned in the world. But both these incarnations had their own limitations as they were in human form inspite of them being Lord Vishnu (the Supreme Being in his cosmic form as the Viraat Purush) himself in these forms. They had specific divine attributes, characters and personalities, limited areas or geographical dominions of the earth where they lived and carried out their activities which are well known and documented in the Purans, specific eras with a limited time-span in which they had revealed themselves, and so on and so forth, inspite of them being manifestations of Lord Vishnu who is the cosmic Lord without any kind of limitations and habitations, and the Lord who is assigned the task of taking care of this entire creation (and not only of the limited area of the land under the jurisdiction and rule of a particular king such as the kingdoms where Lord Ram and Lord Krishna lived and ruled)¹.

But Vishnu is only one of the numerous cosmic manifestations of Brahm, such as Brahma the creator and Shiva the concluder for instance. If the majesty, greatness and glories of only two visible human forms of Vishnu as Lord Ram and Lord Krishna cannot be fully narrated, and of which the scriptures themselves have lauded and extolled repeatedly, then say how can one imagine about the majesty, greatness and glories of the Principal known as Brahm of whom Vishnu is only 'one' form?

[That is, inspite of the fact that Vishnu is the cosmic sustainer and protector who is expected to live at all places at the same time and rule over the entire creation as its supreme Lord, when he had revealed himself, say, as Lord Ram, he had to confine himself to a human body as a noble and great king who ruled over the kingdom of Ayodhya which had certain physical boundaries. No matter how great Lord Ram was, his territorial reach was limited to the areas to which the kingdom extended. He was a very kind, magnanimous and gracious king, but this only benefited the citizens of Ayodhya. Lord Ram had liberated many trapped souls from their gross bodies and given them deliverance, but this does not mean that in his physical form he liberated each and every creature born on earth. But such were Lord Ram's great and noble deeds and ideals that his name and fame became immortal and lauded by the scriptures for all times to come. In the context of Brahm it means that if one single human manifestation of Brahm has such immense majesty and glory that the scriptures are never satisfied by lauding it and glorifying it since time immemorial, then say what would be the greatness and glory of the Principal known as Brahm who has a cosmic footprint, whose dimensions are fathomless and infinite,

and of whom Lord Ram is but only one manifestation amongst countless manifestations in as many countless cycles of creation and destruction?]

On the contrary, if one were to treat Brahm as being only Nirakar (i.e. having no forms) then Brahm would be like the sky which also has no physical form. But then, like the sky, Brahm would also become imaginary and without any specifications, an entity that is vividly changing in appearance every now and then, an entity that is full of void, inane and inert. Surely this is not the case with Brahm as the latter is Consciousness and Truth personified.

Therefore, it is wise to accept Brahm in both the forms—as ‘Sakar’ as well as ‘Nirakar’ (8).

[Note—¹Lord Ram lived during the era called Tretiya-yug and ruled over the kingdom of Ayodhya, while Lord Krishna lived in the Dwapar-yug and ruled over the kingdom of Dwarka.]

9. [This paragraph narrates the process of creation from the perspective of metaphysics, and likens it symbolically to the opening and closing of the eyes of the Supreme Being. In this context, refer Canto 3, paragraphs 1-6 of the present Upanishad, and Chapter 1, Canto 2, verse nos. 33-51 of Vishnu Puran.]

The origin, the development and growth, and the conclusion of the ‘Mool Avidya’, i.e. the primary ignorance that is the cause of all delusions and their horrendous consequences that not only create a web known as the world but also keep the creature trapped in it, corresponds to the opening and closing of the eyes of the cosmic Lord known as Adi-Narayan (the primordial Lord Vishnu who is also known as the Viraat Purush, the Primal Purush). [That is, when the Lord opens his eyes it corresponds to the initiation of creation, when he closes his eyes it corresponds to the conclusion of creation, and the period when he keeps the eyes open corresponds to the intermediary phase of development and growth.]

When the universal Lord Adi-Narayan, who is blissful in his true self and self-contented in every way (‘Atmaram’), so wishes and lifts his eyelids, it is then that the ‘Avyakta’ (the un-manifest, imperceptible and invisible) aspect of creation, called the ‘Mool Prakriti’ (the primary Nature), is created. This Avyakta represents the lower feet of the supreme transcendental Brahm (the cosmic Consciousness) which is the primary cause of all things that have come into existence, and which is expressed in the form of this existence in myriad of ways.

From the Avyakta or Mool Prakriti comes into being the ‘Mool Avidya’ or primary ignorance or the cause of falsehood. [The reason behind calling the entire creation as ‘falsehood’ is that it is an imagination of the mind of the Lord Adi-Narayan, the Primal Purush. It is the latter’s ‘wishful thinking’ so to say, and therefore the creation has no actual existence. The world came into being (existence) because the Supreme Being desired or wished that it be so. If he had not so desired or wished, the creation wouldn’t have been in existence at all. But even the Lord himself was so fascinated and charmed by his own creation once it came into being that for a moment he forgot that it is an imaginary thing created out of his own wishful thinking, and instead began to regard it as the real thing. Hence, the rising of ‘Mool Avidya’ or the primary form of ignorance is regarded as having its base in this imaginary thinking that has its origin in the mind. Once it came into being, it acted as the breeding ground for ‘Maya’ or delusions. This tendency to first imagine something and then treat it as the real thing is known as ‘Mool Prakriti’ or the primary nature of all creatures. This explains why ‘Mool Prakriti’ gave rise to ‘Mool Avidya’—because this ‘primary or basic nature’ to imagine things that do not have

substance and any truth in them as the real thing having a truthful form and existence is being 'ignorant of the reality and the truth'.]

It is from the same 'Avyakta' and influenced by the 'Avidya' created by it that the entity referred to as 'Sat', i.e. an entity that is 'truthful' (Sat) but tainted by 'ignorance' (Avidya), was produced. This 'Sat' is that form of Brahm which is undeniably true but is tainted and corrupted by the influence of Avidya. [This refers to the next step of creation when Avidya, or lack of knowledge, led to the primarily 'truthful' ('Sat') Brahm that is characterised by being without any attributes and qualifications to acquire certain attributes and qualifications as narrated below. The importance of 'Sat' in this context lies in the fact that though the creation that would now follow as a manifestation of Brahm is outwardly false but it must always be remembered that hidden in this external façade of falsehood is the immortal and immutable 'truth' of creation that is known as 'Brahm'. This Brahm is 'Avyakta' because it is the pure consciousness that is hidden and secretly present in this creation. It is not visible from the outside like the rest of the creation's physical body. The aspect of creation that is visible is the 'Vyakta' form of Brahm, while its invisible aspect is the 'Avyakta' form of Brahm. Since the world is marked by falsehoods and other impurities called the various 'Vikaars' which become imposed or transposed on Brahm for the simple reason that whatever that exists is nothing but Brahm, it logically follows that Brahm itself becomes tainted with the impurities so synonymous with this artificial creation. This creation is riddled with ignorance and artificiality because it is an 'imaginary creation of the mind' in the first place as outlined above. Therefore we conclude that the primary truthful and sublime form of Brahm becomes tainted and corrupted when it gets associated with this gross world and identified in its form.]

From the Avyakta were further created the 'Mahatattva'—the essential virtues ('Tattvas) that granted greatness and magnificence to this creation, and imparted glory ('Mahat') to it and its creator.

From 'Mahat' was created 'Ahankar', or the sense of ego, pride and vanity (which created arrogance and haughtiness). [The link is obvious. When one has some 'Mahat' or a sense of grandeur, majesty or greatness, it is natural that 'Ahankar' would be produced in its wake, and this would eventually subdue him.]

From Ahankar was created the five 'Tanmatras' or the five sense perceptions. [The five Tanmatras are the perceptions of sound or words, touch, smell, taste and sight. When the primary consciousness representing the creature felt 'proud', or had Ahankar in it that it is enabled and empowered to live a life independently and has been given a body that has magnificent capabilities, it decided that it can hear, touch, smell, taste and see various things and interpret them or make sense of them. Thus were created the five Tanmatras of the creature's body in which the Atma or the pure consciousness lived as his true 'self'.]

From the five Tanmatras were created the five Bhuts such as the sky etc. [The five Bhuts are the five primary elements of creation such as the sky, air, fire, water and earth. This is because to 'hear' there must be a sound, and sound needs 'sky or space' to travel and the medium of 'air' to be transported in the form of waves. Further, it was in the cosmic ether that the first waves were created that produced 'sound'. Similarly for example, 'water' was needed to 'taste' something as the chemicals present in anything tasted needed a medium to dissolve and interact with each other to generate the sense of taste. And so on and so forth.]

From these five Bhuts or primary elements there came into being an 'Anda'—or the 'cosmic egg'. [This 'Anda' or the cosmic egg represented a grosser form that

resulted when all these primary elements of creation interacted with each other; the Anda was a result of this interaction. It is like the case of the male sperm fertilising the female ova to produce the egg from which develops the embryo which in turn metamorphoses into a complex creature with a gross, visible and physical body that has no resemblance to the original inputs of the sperm and the ova which are in themselves very microscopic in form.]

This primary form of creation represents one Paad or feet or aspect of the supreme Brahm. [Therefore, the embryo and the visible world that develops from this cosmic Anda or egg is only one Paad of Brahm. And this Paad is the lower feet of Brahm as already said in stanza 2 of this paragraph. The other Paads of Brahm would therefore represent the vast creation much beyond the known world.] (9).

[Note—It ought to be noted here that paragraphs 9-10 describe the 18 Tattvas or essential elements of creation. They are as follows—Avyakta, Mool Prakriti, Mool Avidya, Sat, Mahatattva, Ahankar, the five Tanmatras, the five Bhuts, Anda or Hiranyagarbh, and Viraat.]

10. This cosmic egg ('Anda') has the primary Lord known as Narayan as its basic empowering Authority as well as its essential ingredient. This Lord Narayan is primarily beyond all Gunas (i.e. who has no specific attributes and is beyond conventional definitions), is immaculate and pure Truth personified, and is eternally blissful, but he has assumed a form that has attributes and willingly allows himself to be surrounded by Maya (delusions) because he so wishes and wants to display his maverick powers in a playful manner.

In other words, the fact that the primarily formless and attributeless Lord Narayan has allowed himself to be mired by Avidya (ignorance) and Maya (delusions) that led the formation of the cosmic Anda (egg) that would eventually create the Brahmaand (universe) is so because the Lord had willingly wished it to be so. He wanted a little fun and play, and therefore sportingly created this world and its accompanying delusions. [This paragraph describes the cause of this creation coming into being. The cause is the Lord's desire to do something magical and out of the ordinary; it was due to his 'wish'. When this happened, the first thing was the appearance of the cosmic 'egg' which was the future universe in its primitive, basic and miniature form. This cosmic egg was the 'causal body' of Brahm because it contained or harboured 'the spark of life in the form of consciousness'. It was 'causal' because it acted as the 'cause' of the universe taking shape and coming into being. Hence, Brahm resided in this cosmic Anda as its Atma or soul. Had it not been for the presence of Brahm in it, the cosmic egg would be like any other 'unfertilised egg' which does 'not' harbour life. And even if this 'unfertilised egg' grew and somehow matured into the shape of the universe, the latter would not have harboured life either because of the absence of Brahm or consciousness in it. This lifeless universe would be without an Atma.]

Lord Narayan is none else but Brahm, the cosmic Consciousness that is behind everything in existence. Since the cosmic 'Anda' or egg harbours the future world in its bosom, it is sure to have the spark of 'life and consciousness' in it, for otherwise it would be inane and dead. So it is said that Narayan (symbolising 'life' and 'consciousness') is uniformly present in this cosmic egg as its vital ingredient; this cosmic egg is completely soaked in life and consciousness which are manifestations of Adi-Narayan; the cosmic egg is therefore a manifestation of Adi-Narayan. [This 'Adi-Narayan' is a term used to imply the Primal Purush from whom the entire gamut of creation has emerged. He is variously regarded as being the supreme Brahm who is

un-manifest cosmic Consciousness that is all-pervading, all-encompassing and beyond any limitations imposed by definitions, as well as Lord Vishnu who resides in Vaikunth, and who is variously named as Narayan, Parmatma, Viraat Purush and Hiranyagarbha. Refer Canto 1, paragraph 5-6.]

The egg therefore has the supreme Lord concealed in it in a subtle form. This Lord is the cause of countless universes coming into being, their sustenance and their conclusion. He is the primary cause of all causes, i.e. he is personified Prakriti or Nature. He is beyond the reach and purview of Maya or delusions, though Maya is created by him and he has allowed himself to be surrounded by Maya in order to create this creation. He is a personified state of consciousness known as Turiya, which is the state of existence which is transcendental in form and nature. It is this supreme and majestic Lord who resides subtly and imperceptibly in the cosmic egg (Anda) described here. [According to Vedanta, this form of Brahm is known as 'Hiranyagarbha', and is also called 'Brahma, the creator'. It is so because from this egg the rest of the creation would eventually evolve. So, Hiranyagarbha is the subtle body of Brahm at the cosmic level of creation. The subtle body consists of the twin instruments of the mind and the intellect which are required to undertake the complex task of creation. This is symbolised by Brahma, the creator, as he is said to have pronounced the Vedas which are the eternal repositories of knowledge and wisdom. It was the creative and imaginative aspect of the cosmic 'mind' that visualised what shape this universe would take, and it was the intelligent and sharp cosmic 'intellect' that actually researched and gave effect to the imaginary conceptions of the mind. Hence, Brahma the creator is regarded as the macrocosmic 'subtle body' of creation. He is also like the cosmic egg because it was he who had given this creation its shape just like the body of a creature is given its shape inside the shell of the egg even before it hatches.]

From this evolves the 'Viraat Purush' which is the 'gross body' of the supreme transcendental Brahm at the macrocosmic level of creation. It is this Viraat Purush from which the rest of creation has emerged. Only a body that has 'life' and 'consciousness' in it is adored and shown attention by all; it is such a body that does not decay and perish. Once the factors of life and consciousness leave the body, it begins to decay and perish rapidly. Hence, this shows that the 'imperishable and eternal' Brahm in the form of the 'cosmic Consciousness' has himself revealed in the form of the Viraat Purush at the macrocosmic level of creation, and by extension in the form of the individual creature that this Viraat transforms into at the microcosmic level of creation. [The Viraat Purush is the sum-total of all the gross bodies in creation. All things that have a shape and form are created from the macrocosmic gross body of Brahm known as the Viraat Purush. In other words, what the individual creature is to Brahm at the microcosmic level of creation, the Viraat Purush bears the same relationship with Brahm at the macrocosmic level of creation. The 'gross body' has various sense organs or perceptions and actions—so when this Viraat transformed himself as a living being, the latter also depicted these sense organs. They are his five organs of perception such as the eye, the ear, the nose, the tongue and the skin, and the five organs of action such as the hand, the leg, the mouth, the genitals and the excretory.]

Therefore we conclude that it is the same Brahm in the form of the cosmic Consciousness that is at the core of life and creation at all levels of its evolution, such as the causal body, the subtle body and the gross body (10).

11. [Paragraph no. 11 describes the majestic form and glories of the Viraat Purush. Refer also Canto 6, paragraph no. 8 and 11.]

The Viraat Purush¹, the macrocosmic, all-encompassing and all-pervading form of the Supreme Being, has countless heads, eyes, hands and legs. [Refer also to This is a symbolic way to highlight the fact that the Viraat is the sum-total of all the gross bodies that live in this creation. The Viraat Purush is a metaphor for the all-inclusive form and all-encompassing nature of the supreme Brahm, as the former represents all living organisms in this creation. According to the theory of Genesis of Creation as outlined in the Upanishads, it is from the Viraat Purush that the whole creation has been moulded; the creation is a manifestation of the Viraat Purush. Since the Viraat is the macrocosmic gross body of Brahm as outlined in the forgoing paragraphs, it follows that the creation moulded out of this Viraat is also a manifestation of the Brahm. Therefore, this creation represents the gross body of Brahm. It is this Viraat Purush who created the creature in his own image. Since there are uncountable forms and varieties of creatures or living beings in this creation, from the single cell organisms to the most complex human, and each individual is an image of the Viraat, it is easy to understand the meaning and import of the statement that the Viraat has thousands of hands, mouths etc. as stated above. Besides this point, another interpretation is that Brahm in the form of the Viraat lives in all the places of this creation at the same time. This is in consonance with the eclectic virtue of Brahm as being omnipresent all-encompassing and all-pervading.]

The Viraat Purush, having countless ears², surrounds the entire creation from all sides and uniformly pervades in it. He is omnipresent, all-pervading and all-encompassing.

He (the Viraat Purush) is both Saguna and Nirguna. [That is, the Lord has revealed himself in numerous forms, thereby becoming 'Saguna'—or the one with discernible characteristics, definable attributes and specific qualities. At the same time, the Lord has no visible form as his primary nature is formless and without attributes—i.e. he is 'Nirguna'. This concept has been elaborately described earlier in paragraphs 2-8 of this present Canto 2.]

He (the Viraat Purush) is a personification of the grand virtues of Gyan (knowledge, wisdom, erudition and enlightenment), Bal (strength, valour, vitality and potent), Aishwarya (fame, majesty, grandeur, magnificence, glory), Shakti (power, dynamism, energy, punch and vitality), and Tej (splendour, radiance, glory, energy, magnificence, dynamism, agility and speed).

He (the Viraat Purush) is established in the form of innumerable worlds of diverse varieties and forms.

It is he (the Viraat Purush) who is the supreme Lord of creation known as the Parmatma, the supreme Atma or soul of creation. He is an embodiment of eternal and unbound bliss, as well as is endowed with all the noble and auspicious virtues and glories that exist in this creation.

He (the Viraat Purush) is absolutely independent (because he is supreme and not subservient to anything). He is all-knowing and omniscient. He is almighty and all-powerful. He is the ultimate controller of everything in existence. And he is an image of all the most auspicious virtues that ensure all-round well being in this creation.

He (the Viraat Purush) is established in the form of a majestic fount of immense 'Tej' (splendour, radiance, glory, energy, magnificence, dynamism etc.) that cannot be described, is endless, and is most divine.

This Supreme Being having the above grand and magnificent virtues pervades throughout the cosmic *Anda* created from the *Avyakta* due to *Avidya* (as narrated in paragraph no. 9). This *Anda* or the cosmic egg is the basis of *Maha-Maya* that has surrounded the Supreme Being (i.e. it is the basis of creation of the great delusion because it is in this form of the cosmic egg that the Supreme Being had allowed himself to assume a form which is not in consonance with his primary nature of being formless).

[As is clear by now, the Supreme Being that is referred to here is the cosmic Consciousness that infuses life in the cosmic egg. The egg has been literally 'fertilised' by *Brahm*, the Supreme Being, who has passed on to it his 'genes' in the form of 'consciousness' possessing all the virtues enumerated herein above. Therefore, these virtues of *Brahm* would naturally be passed on to the 'embryo' that developed in this egg, and the subsequent 'creation' that would emerge from this cosmic egg upon its maturity. It follows that this is the evident proof why *Brahma* known as *Hiranyagarbha* representing the 'embryo', and *Vishnu* known as the *Viraat Purush* representing the 'creation' would be an image or a 'gene-bearer' of *Brahm*, the Supreme Being. Now, once the 'formless' (or *Nirguna* and *Avyakta*) *Brahm* assumes the 'formed' shape of an egg (becomes *Saguna* and *Vyakta*) he is bound to be affected by the characteristics of something that has a 'form', something that is 'Saguna' (one that has various *Gunas* or qualities) and 'Vyakta' (expressed, revealed). In other words, the *Brahm* which was without any *Maya* (delusions) prior to the entire process of creation rolling out has now become surrounded by it, or tainted and affected by it.]

Therefore, the '*Maha-Maya*' is the gross body created out of delusions of the almighty Lord God known as *Brahm* who is naturally and inherently almighty, all-powerful, universal, uniform, non-dual, and an embodiment of un-bound bliss and beatitude.

It is in each pore of the macrocosmic form of *Brahm* known as the *Viraat Purush* that numerous universes or worlds and their gross things are born or created. Each one of them is a revelation of the same Lord *Narayan*; they are images of the same *Brahm*. [It is because, as has been explained above, they carry the genes of their parent known as *Brahm*. In this context, refer to Canto 3, paragraph nos. 11-12 which will make it clear that the '*Viraat Purush*' meant here is not the one which is regarded as being synonymous with *Vishnu*, but is the '*Adi-Viraat Purush*' that precedes *Vishnu* and from whom even *Vishnu*, the commonly known form of *Viraat*, was created. This creation has been visualised as being in different layers like many concentric circles, one higher than its previous one. This concept will be discussed in Canto 6.] (11).

[Note—¹The *Viraat Purush* is the subtlest form in which *Brahm* revealed itself when it had decided to initiate the process of creation. Though 'subtlest' in relation to the rest of creation, but in its self the *Viraat Purush* was the macrocosmic gross body of *Brahm*. It was from this *Viraat Purush* that the rest of the creation was moulded—refer *Aiteriya Upanishad* of the *Rig Veda*, Canto 1, Section 1, verse nos. 1-4; and Canto 1, Section 3, verse nos. 1-2. The word '*Viraat*' itself means colossus, huge, immense, large and vast. This manifestation of *Brahm* covered each minute pore of creation; it pervaded throughout the space that would eventually form the area of the cosmos or the universe. It encompassed everything; it included everything. It encircled or surrounded everything from the outside. It was called '*Viraat*' precisely for this reason. Again, it was called '*Purush*' because it provided the vital spark of life in the form of 'consciousness' and '*Pran*' into the otherwise lifeless primordial cosmic gel so that it could become active, alive and show dynamism. It was called '*Purush*' also because *Brahm*, in the form of the 'consciousness', lived in this creation

uniformly and universally in such a way that the two were inseparable from one another, and to give life to the nascent creation as well as to control it from within. When the creation came into being, this Brahm entered in the body of the creature to take up residence in the living being's body—refer Aiteriya Upanishad, Canto 1, Section 3, verse nos. 12-14.

The word *Purush* has been defined in *Brihad Aranyak Upanishad*, Canto 2, Brahman 5, verse no. 18 explicitly as the cosmic all-pervading macrocosmic form of the Supreme Being, called the Viraat Purush, who had entered each and every body of all the creatures and had taken up his residence there. The word Purush consists of two parts—viz. 'Pur' meaning a city or an abode, and 'Ush' means the one who lives there. Hence, the 'Viraat Purush' is the cosmic Consciousness known as Brahm that lives in each aspect of this creation, pervading throughout it, and including in its ambit everything that exists in any form.

The entire creation was produced by Brahm—refer Atharva Veda's Mundak Upanishad, Mundak 2, Section 1, verse nos. 1-8; Krishna Yajur Veda's Shewatshwatar Upanishad, Canto 3, verse no. 4.

Brahm resides in the subtle space of the heart of the creature—refer Atharva Veda's Mundak Upanishad, Mundak 2, Section 1, verse nos. 9-10; Mundak 2, Section 2, verse no. 1; Mundak 3, Section 1, verse no. 4; Krishna Yajur Veda's Shewtashwatar Upanishad, Canto 3, verse no. 11.

Brahm resides in the gross body of the creature—refer Atharva Veda's Mundak Upanishad, Mundak 3, Section 1, verse no. 4-5; Krishna Yajur Veda's Shewatshwatar Upanishad, Canto 3, verse no. 7.

Brahm is the controller of the entire creation—refer Atharva Veda's Mundak Upanishad, Mundak 2, Section 2, verse no. 7; Krishna Yajur Veda's Shewtashwatar Upanishad, Canto 3, verse no. 1, 7.

²The phrase 'having countless ears' simply means that Brahm, in the form of the Viraat Purush, assumed as many forms as there were creatures who could hear. It also means that Brahm, as the living being's consciousness, heard or became aware of everything that was happening in this creation.

The fact that the Viraat Purush has countless ears and as many eyes and mouths has been also stressed in the present Tripadvibhūt Maha Narayan Upanishad, Canto 6, paragraph no. 11, as well as in Krishna Yajur Veda's Shewtashwatar Upanishad, Canto 3, verse no. 3, 11, 14, 16.

It is a metaphoric way of saying that a wise man who knows the truth of Brahm is also one who is well aware of everything in this creation; nothing is hidden from his knowledge; he is wise, erudite, knowledgeable, enlightened, omniscient and all-knowing. He receives all information and knowledge, but then picks and chooses what is auspicious and righteous. He is not 'deaf' to the teaching of the scriptures. It ought to be noted here that the creature, the living being, especially the human being, is said to be replica of the Viraat Purush. Refer Aiteriya Upanishad of the Rig Veda, Canto 1, Section 2, verse no. 3.]

12. [This paragraph describes the concept of uniformity in creation, the eclectic principle of non-duality, in the context of genesis of creation at two levels—one at the macrocosmic and invisible level of the vast creation that consists of Brahma and Viraat (Vishnu), and the other at the microcosmic level of the visible creation consisting of the Prajapati who is the first male on earth and who produced off springs who would eventually populate it. While the cosmic entities such as the sun, the moon and the stars along with everything else in this creation are the off springs of the Viraat Purush, the visible world where humans live, i.e. the earth and its inhabitants were the off springs of Brahma the creator in his manifested form as the Prajapti—literally meaning the Lord of his subjects. By extension, all

the Gods, all the creatures and all other entities in this creation, both at the macro as well as the micro level of creation, are manifestations of the same Brahm known as Narayan.]

It is from Narayan, or the Supreme Being known as Brahm, that Hiranyagarbha (the macrocosmic subtle body of Brahm, also known as Brahma the creator) was born or created.

It is from Narayan that the Viraat Purush, the macrocosmic gross body of Brahm, was born or created.

It is from Narayan that the Prajapati was born. It was this Prajapati who is the one who produced off springs who in turn would populate this world. [Hence, he is the first Male from whom the rest of the creatures who eventually populated and ruled over this earth were born. He is the ‘first born’ on this earth, and therefore is regarded as a manifestation of the cosmic creator of the physical world known as Brahma. Hence, Brahma, the cosmic creator of this physical world, is often also called ‘Prajapati Brahma’. The word ‘Prajapati’ literally means one who is the Lord of his subjects and is responsible for their care and welfare.]

It is from Narayan that the eleven Rudras (the various cosmic forms or aspects of Lord Shiva, the concluder and one of the Gods of the Trinity) were born or created. [The 11 *Rudras* have been enumerated in note no. 2 of verse no. 3 of Canto 1 of the Nrisingh Tapini Upanishad which is Chapter 7 of the present volume.]

It is from Narayan that the entire creation and its numerous worlds were born or created.

It is from Narayan that Indra (the chief of Gods) was born or created. [The word ‘Indra’ is derived from the root ‘Indri’ meaning sense organs. Hence, he represents the controlling power of Brahm that helps the creature to remain in control of his sense organs, and through them over the world.]

It is from Narayan that all the rest of the Gods were born or created. [These ‘Gods’ represent the various forces of Nature and the numerous powers of Brahm that are necessary to regulate the creation and keep it functioning properly. Hence, they are personifications of these universal forces and powers of Brahm; they are metaphors for various stupendous abilities, the powerful authority and the dynamism of Brahm at the cosmic level.]

It is from Narayan that the twelve Adityas or the Sun Gods are born or created. [The 12 *Adityas* have been enumerated in note no. 3 of verse no. 3 of Canto 1 of the Nrisingh Tapini Upanishad which is Chapter 7 of the present volume.]

In fact, it is from Narayan that all the eight Vasus (the patron deities who preside over the various forms of wealth created in order to sustain this creation and meet its needs), all the Rishis (the exalted and wise sages and seers), all the living beings, and all the Chandas (the innumerable hymns that constitute the body of all the scriptures that are regarded as repositories of knowledge and wisdom) were born or created. [The 8 *Vasus* have been enumerated in note no. 1 of verse no. 3 of Canto 1 of the Nrisingh Tapini Upanishad which is Chapter 7 of the present volume.]

It is from Narayan that each one of them are born and derive their abilities to live, act and do anything, and it is in Narayan in whom they all dissolve in the end.

Hence, it is Narayan who is deemed to be eternal, infinite, unchanging, uniform, universal, imperishable and constant. It is Narayan who is deemed to be the most exalted and supreme. It is Narayan who is deemed to be self-illuminated.

Indeed, everything and everyone in creation is none but Narayan.

It is Narayan who is Brahma the creator.

It is Narayan who is Shiva the concluder.

It is Narayan who is Indra, the chief God.

It is Narayan who has manifested himself as all the chief directions of the compass as well as the corners of these directions (i.e. he is omnipresent and all-pervading in this creation; there is no spot where Narayan is not present).

It is Narayan who is Kaal (time and circumstance in all dimensions).

It is Narayan who is revealed in the form of all deeds and actions.

It is Narayan who is both the formed aspect of creation, called the 'Murta' or Saguna creation, as well as the unformed aspect, called the 'Amurta' or Nirguna creation.

It is Narayan who is a personified form of all causes that lead to consequences, as well as these consequences themselves. It is Narayan who is both the cause and the action that results from this cause. Indeed, Narayan even goes beyond the concept of a cause and its effect to transcend them and remain neutral and unaffected. [That is, inspite of the fact that it is Narayan who is at the root of all deeds and actions in this world, being their cause as he is the supreme inspirer or motivator, he himself remains detached and non-involved in either the deeds or their results.]

It is Narayan who is the only God or Authority that possesses and exhibits such auspicious and noble divine virtues as being the supreme fount of eternal illumination and light because he is self-illuminated, as being a personification of eternal and profound bliss and happiness that comes with Brahm-realisation, as being constant, uniform and eternal, as being unique because he is without an alternative and parallel, as being faultless, taintless, without any blemishes and corruptions, as being indescribable and indefinable, and as being the only absolutely immaculate, holy, pure and divine Lord of creation.

Narayan is so divine, majestic, magnificent, great, glorious and exalted that he is comparable to none. At the same time, he exhibits exemplary humility and remarkable simplicity by not being, or pretending to be, greater than anyone or anything in this creation.

Indeed, those wise and enlightened souls who come to grips with this majestic and mystical divine truth about Narayan by overcoming all forms of doubts and confusions are able to pierce or overcome all fetters (representing ignorance and delusions), and as a consequence they find freedom and deliverance for themselves. They do find freedom and deliverance, and there is no doubt in it!

Those who realise this truth and worship Lord Narayan with this wisdom and erudition are able to not only attain the Lord but also become one with him. Verily, such a man becomes a personification of Narayan himself (12).

-----*****-----

Purva Kand--Canto 3

[This Canto describes the various forms that the supreme transcendental cosmic Consciousness known as Brahm has assumed. In the course of this narration, many questions relating to the various facets of creation are answered—such as what is true and meaningful in this creation, and what is not. It goes on to narrate how the world is perceived from two different angles—one establishing that it is true and other as false, and then explains the actual reality. It outlines the concept of 'doomsday' or conclusion of creation at different planes of existence, of how the different levels of

creation come to an end, and in the process describes the concept of ‘time’ on the cosmic scale. In this context, refer also to Vishnu Puran, 2/8/60-68.]

1. The disciple said alright (i.e. that he has understood what was taught to him in the previous Cantos), and asked again—‘Oh Lord! Oh the most learned and wise Guru (teacher)! You have described the origin of the Mool Avidya (primary form of ignorance). Now please tell me about the development and growth of the rest of this deluding creation called the ‘Prapanch’, and how it evolved in a sequential manner. I want to learn about it.’ (1).

[Note—The word *Prapanch* means all the things that are done, seen and observed in this world which are fundamentally fallacious, artificial and deluding in nature. The word Prapanch covers all notions of worldly deceptions, delusions, tricks, mischief, maverism, cunning, deceit, conceit, fraud, artificiality, illusions, deceptions, falsehoods and concealments of all kinds. Since this world itself has no real existence and is nevertheless transient and perishable, these things and the deeds done by the creature should not bother the Atma which should instead be more concerned with things of higher spiritual value, and focus its attention on things that are real and truthful, things that have true substance in them.

The word Prapanch covers all worldly deceptions, delusions, tricks, mischief, maverism, cunning, deceit, conceit, fraud, artificiality, illusions, deceptions, falsehoods and concealments.

Refer the Tejobindu Upanishad of Krishna Yajur Veda, in its Canto 4, verse nos. 51; Canto 5, verse nos. 75.]

2. ‘Let it be so’, replied the wise Guru, and continued with his preaching.

He elaborated—‘This creation, described as ‘Prapanch’ because of its inherent nature (described above), is called ‘Anaadi’ as it has no discernible beginning. The question arises as to whether this visible or observed Prapanch (creation) is indeed ‘Nitya’, or is it ‘Anitya’—i.e. whether it is robustly true, persistent, constant, steady, imperishable and eternal (‘Nitya’), or not (‘Anitya’). This creates a doubt in the mind of the aspirant. Now let me elaborate.

Prapanch again is of two types—viz. ‘Vidya Prapanch’ and ‘Avidya Prapanch’ (2).

3. The Prapanch of this creation that is categorised as ‘Vidya Prapanch’ (i.e. the creation or revelation of something that is based on true knowledge, erudition, realisation and wisdom) is said to be ‘Nitya’ (i.e. it is deemed to be true, imperishable, persistent, everlasting and robust).

This assumption is established by the fact that this particular sort of creation has its origin in Vidya, or knowledge, wisdom, erudition and enlightenment, which have nothing to do with Avidya, or ignorance and its consequential delusions and deceptions. Therefore, the Vidya Prapanch is a form of creation that is deemed to be a manifestation and spread of Consciousness that is an embodiment of bliss, is eternal and truthful to the core, is pure, untainted, immaculate and holy, and is self-enlightened as well as a personification of the eclectic virtues of wisdom, erudition and knowledge

Obviously, this Vidya Prapanch is ‘Nitya’ (because it is founded on knowledge of the truth that is always constant, eternal and infinite). [That is, that aspect of creation which is based on Vidya is truthful, and ‘truth’ is a virtue that is ‘Nitya’—i.e. it is steady, constant, sustainable, everlasting and unchanging. The opposite of this would be ‘falsehood’ which would be synonymous with ‘Avidya’ or

lack of truthful knowledge of the reality. In the context of creation, this simply means that the aspect of creation which revolves around the sublime ‘consciousness’ as its base and treats it as its ‘essence’ is truthful aspect of creation, and hence it is ‘Nitya’, while that aspect that relies on the physical world and treats it as the truth, which it really is not, is known as that aspect of creation which is ‘Anitya’.] (3).

4. Now, is the second type of Prapanch, called the ‘Avidya Prapanch’, Nitya or Anitya?

Some call this creation arising out of Avidya as being ‘Nitya’ (true, verifiable, real, persistent and infinite) because it continues to flow and spread (like a perennial river that never ceases to flow and never comes to an end). [That is, even if it is accepted that this creation is created out of ignorance and is ridden with delusions and deceits, but it is not deniable that it does exist, that it is visibly observed and therefore its existence proved, that it continues to grow and develop and change every now and then, thereby showcasing its dynamic nature, and that it has no seeming beginning and end because no one knows when it got started and when it would end. Hence, it is deemed to be eternal and infinite. Anything with these characteristics cannot be said to be finite, inane, dead, false and un-true—or ‘Anitya’.]

The scriptures have narrated about the dooms-day, called ‘Pralaya’, when everything in existence would end and disintegrate into nothingness. This is because this creation is deemed to have an origin, a beginning, and anything that has come into existence must come to an end. It does not matter when the origin was, and when the end would come—but the fact is that this creation is not something that can be said to be an end no matter how far it might be in the unknown future, cannot be regarded as being ‘eternal, imperishable and infinite’. Besides this, the world continuously changes every moment, what was in the past is not in the present and would not be in the future, so therefore it cannot be defined or categorised as being ‘unchanging, steady and constant’ which are the necessary requirements for something being ‘Nitya’. Therefore, there are others who regard this creation as ‘Anitya’—one that is *not* eternal, infinite, constant and imperishable (i.e. the opposite of being ‘Nitya’).

Actually, none of these two positions is the truth; none represents the factual position (4).

5. Then, what is the truth; what is the reality; what is the fact?

Well, in fact, the entire Prapanch (revealed creation) having its origin in Avidya is bound to be affected by the latter as it is the cause or root of the former. Therefore, the whole of ‘Avidya Prapanch’ is nothing but an expression and expansion of Maha Maya—the stupendous power of Brahm (or the cosmic Consciousness) to create great (‘Maha’) delusions (‘Maya’).

Since this creation is constantly changing (like the simmering scene observed on hot sand in a desert or the twinkling light of the distant star which is never the same in any two given moments)—i.e. anything that is present in one instant ends in the next and gives rise to something new which again comes to an end in another given instant, in an un-ending cycle of changes—it follows that it is not truly infinite, it is not truly eternal, steady, everlasting, constant, persistent and imperishable. It can be regarded at the best as something that consists of small units soldered together, but it is *not* something that is one single undivided whole, or something that can be called monolithic, one and unfractioned. That is, this creation is *not* ‘Nitya’; or *it is* ‘Anitya’.

Since it is not 'Nitya', it cannot therefore be true, eternal, infinite and imperishable, virtues that come within the definition of the term 'Nitya'. Nothing of substance, worth, truth and reality exists that can have its root or origin in Avidya (or ignorance).

Therefore, this Prapanch (i.e. the manifested creation with all its diversity and variations) which has its origin or root in Avidya is bound to be 'Anitya', or it is false and un-truth. It has no spiritual truth, reality, essence and substance in it (5).

6. Now, what is it that is 'Nitya' then? What is that which can be deemed to have truth, reality, essence and substance in it?

Well, such an entity is known as 'Brahm'. This Brahm is non-dual and unique as it is one of its own kind, having nothing with which it can be compared.

The scriptures assert that there is nothing such as 'duality', or the presence of 'many things' here in this creation that can be called 'truthful and real'. [Obviously, this is because 'truth' will always be 'one', and not 'two'.]

Or, it can be said with certainty that anything that is different or separate from Brahm (or the 'Absolute Truth') has no reality and essence in it; it is false and deceitful; it is imaginary and delusory.

Verily, it is the 'Absolute Truth' that is known as the supreme Brahm. Or, Brahm is the only Truth in creation.

Indeed, Brahm is an eclectic divine entity that is characterised by being absolutely truthful, by being an embodiment of Absolute Truth, absolute Gyan (knowledge that is absolutely truthful) and absolute eternity and infinity (i.e. being truly eternal and imperishable).' (6).

7. The disciple asked again—'If it is true that the creation is impermanent and changes constantly, coming to an end at a certain given time, then what is the sequence in which this conclusion or end happens?''¹ (7).

[Note—¹The world or creation that would now be described represents the fourth Paad of Brahm. This Paad is called 'Bhut' as it is perishable and transient. These Bhuts are the basic constituents that make up this world and are the primary elements of creation in varying degrees of subtlety and grossness. The word 'Bhut' itself literally means one that is like a 'ghost'—i.e. one that is imagined and is not the real thing! It is an apparition. Hence, the world representing the fourth Paad of Brahm, the Supreme Being, is due to the dominance of ignorance of the real truth and lack of truthful knowledge of the reality of Brahm which is actually represented by the other three Paads. This concept is made absolutely clear in Canto 4, especially its paragraph nos. 3-6.]

8. [In order to understand what is being described here in paragraph no. 8 and subsequent paragraph nos. 10-15, it will be fit to have a clear conception of the imagery that is employed for the narration.

The creation started from a point known as Brahm and then spread out in concentric circles just like ripples spreading out from a focal point on the surface of the water of a calm lake. The creation has been envisioned as a structure consisting of many concentric rings of increasing diameter and circumference. These circles or rings are drawn around a central hub or core which is the focal point of these rings.

Now, the first circle represents the domain of Brahma, the creator (paragraph no. 8); the second circle stands for Vishnu, the sustainer, also known as the Viraat Purush (paragraph nos. 10-11); the third circle for the Adi-Viraat, the parent of the Viraat Purush (paragraph no. 12); the fourth for Adi-Narayan (paragraph nos. 13-15);

and the fifth circle represents Lord Tripadvibhut Maha Narayan to whom this Upanishad is dedicated. This Lord is the Supreme Being from whom the rest of the Gods have been born (paragraph no. 15).

The above narration of ever-increasing circles of greater diameters symbolises the expansion of creation. The circumference of any given circle would mark the end of a particular layer or strata or plane of existence. But as any bubble bursts when it has reached its outer limit, this creation also collapses—and this event is metaphorically depicted in paragraph nos. 9 and 16.]

The wise teacher was very pleased, and he respectfully explained—‘One day-time of Brahma (the creator) consists of one thousand cycles of creation and destruction, with each cycle consisting of the 4-Yug period¹ according to the Hindu tradition.

One night of Brahma has the same duration as his daytime.

Therefore, the complete ‘day’ of Brahma as we humans understand this term to mean (i.e. one full cycle of day-time + night-time) would be equal to the total time taken for one day-time and one night-time according to Brahma’s measurement of time at the cosmic level².

During this one day of Brahma, the world known as the Satya Loka (the truthful heaven where Brahma and the other senior Gods such as Vishnu live) is created and destroyed once. [That is, one cycle of creation and destruction of heaven would be equal to one thousand such cycles on earth where mortal creatures live.]

With this cosmic scale of measuring time, fifteen such days of Brahma would be his one ‘Paksha’ or fortnight.

Two such fortnights would be Brahma’s one month.

Two such months would be Brahma’s one season.

Three such seasons would be one solstice in the year of Brahma.

Two such solstices (i.e. the summer and the winter solstices) would make up one year of Brahma.

According to this celestial measurement of time, Brahma’s one life consists of one hundred such years.

This is said to be one life-span of Brahma the creator (8).

[Note—¹The four Yugs are the following four eras or phases of one cycle of creation and destruction—the first is the Sat-yug, the second is the Treta-yug, the third is the Dwapar-yug, and the fourth is the current Kali-yug.

The Satayug which was the great Vedic period of fire sacrifices, the Tretayug culminated with the incarnation of Lord Ram, the Dwaparyug ended with Lord Krishna’s incarnation, and the Kaliyug would end with the great deluge or Doomsday when the entire world would be drowned in water. The next Kalpa would come after that in a cyclic form. This happens because at the fag end of Kaliyug, sins and evils would have reached such a crescendo that the Supreme Being no longer is able to tolerate it though he is most tolerant, magnanimous and forgiving, and decides to finally wind up the whole thing by punishing the world by clean sweeping the slate. Only the righteous and auspicious few survive who would become the progenitors of the next cycle.

The Satayug is also called Kritiyug because elaborate fire sacrifices were done during this phase. It is equivalent to 4800 divine years of Gods, and 17,28,000 human years.

The Tretayug is equivalent to 3600 divine years of Gods, and 12,96,000 human years.

The Dwaparyug is equivalent to 2400 divine years of Gods, and 8,64,000 human years.

The Kaliyug is equivalent to 1200 divine years of Gods, and 4,32,000 human years.

²The days and nights of Brahma are much far extensive than what we understand them to be. The unit of time used to measure one day or life of Brahma is much like we use the term 'light years' when measuring distances of various stars and galaxies in the universe. They are so wide apart and distanced from earth and each other that to measure their distances in terms of earth units such as miles and kilometres would be nothing but madness. The same logic and reason is used to set a separate scale for Brahma and other deities as narrated below.]

9. [The following paragraphs describe the cosmic process of regression or withdrawal or collapse or end of creation. Its creation and expansion has already been narrated in Canto 2, paragraph nos. 9-12.]

At the end of his life the Viraat Purush¹ (i.e. the macrocosmic form of the creator known as Brahma) finds rest in, or withdraws himself into, his primary form known as the Hiranyagarbha. [This Hiranyagarbha is the subtle body of the Supreme Being, also called Brahm, from which the Viraat Purush had emerged earlier. Therefore, the Hiranyagarbha refers to the cosmic embryo that is nourished in the cosmic Anda, the cosmic egg, which was referred to in the last stanza of paragraph no. 9 of Canto 2. The egg laid by birds has a shell enclosing it, and similarly an embryo of humans too has an enclosing membrane to give it protection inside the womb of the mother. This outer shell or membrane symbolises the outer periphery of creation. Everything and all forms of life are within its walls. The womb of the mother where the embryo is lodged and where it develops would then be like Brahm that harbours this embryo in its cosmic womb. Meanwhile, the chick of the bird or the unborn infant of a man remains in complete darkness till the time it is inside the shell or the womb respectively. It is only when it comes out that it is able to see the light of day and become aware of the presence of the world of colourful charms. In other words, it is only when one breaks free from his old habits and chucks his old habitat that he can hope to find something new and exciting. As long as the chick or the infant remained cocooned in the shell or the mother's womb, it had its eyes closed, but as soon as they emerged outside they opened their eyes and observed the colourful and charming world of countless opportunities and forms. Thus, it is only when one employs one's mind and intellect to 'see around' that he is able to see beyond the darkness of ignorance and see the light of Truth.]

The Hiranyagarbha retires or finds rest by retracting or withdrawing itself further into its primary form which is the cosmic causal body where the cosmic Atma, the cosmic Consciousness, lives.

This state of restful existence and no activity of the Viraat Purush, the macrocosmic form of the supreme creator, when the former has withdrawn himself, when he has retracted all his tentacles and decided to take rest for some time by remaining comfortably ensconced in the shell of the causal body in his primary form as the cosmic Atma or Consciousness, is called the period of 'Pralaya' or the cosmic doomsday when everything ends, when everything is dissolved, when everything comes to a rest. During this time there is nothing but void and no activity of any kind. Everything comes to a naught then; it's a state of absolute neutrality and inertness² (9).

[Note—¹The terms *Viraat* and *Hiranyagarbha* must be clearly understood to avoid confusion because they are used for both Brahma as well as Vishnu. The term 'Viraat' means anything of colossus dimensions and nature, something that is vast and infinite. The Viraat Purush is the gross body of the Supreme Being known as Brahm from which the rest of creation emerged—refer Canto 2, paragraph 10-11. This Viraat has his roots in the cosmic egg in which the subtle body of Brahm took shape as the cosmic embryo, called the Hiranyagarbha—refer Canto 2, paragraph 12, stanza no. 1. The latter is so-called because it was hidden in the cosmic womb ('Garbha'), and like the yellow-coloured yolk of the egg it was radiant and golden ('Hiranaya') in colour.

It was from this cosmic embryo called the Hiranyagarbha that the creation emerged, including the Viraat Purush, hence it is called 'Brahma the creator'. Refer Canto 2, paragraph 12, stanza 1.

The Viraat Purush is also the creator of this world as pointed out in Canto 2, paragraph 11, and the former is also entitled to be called Brahma the creator. It must be carefully noted that the difference lies in the level or plane of creation in which a particular entity is being considered for study.

Hiranyagarbha was the primordial cosmic fertilised egg, deriving its name from the fact that its yolk core was yellow and glowing with an incandescent light like the one radiating out from the splendourous Sun in the sky, called the Maartand.

There are different versions regarding this Hiranyagarbha. According to the concept of Vedanta, Brahm is the cosmic supreme and transcendental Consciousness residing in the macrocosmic causal body called the Ishwar. In this context, when Brahm decided to reveal or unfold this creation, first the causal body known as a Ishwar developed the macrocosmic subtle body called the Hiranyagarbha, and from this evolved the macrocosmic gross body of Brahm called the Viraat Purush. This is the picture at the macrocosmic level. All these three sublime bodies of Brahm at the cosmic level—viz. Ishwar, Hiranyagarbha and Viraat Purush—were invisible, subtle, unqualified, without any attributes, all-inclusive and all-pervading. It was the unrevealed form of Brahm. But that was just the beginning.

When this visible world was created, which had attributes and qualifications, the same macrocosmic units of Brahm metamorphosed themselves into their respective counterparts in the individual creature's body. Hence, Ishwar is represented by the Pragyā or the individual's causal body, Hiranyagarbha is represented by the Taijas or the individual's subtle body, and the Viraat Purush is represented by the Vishwa or the individual's gross body.

These three bodies are the three states in which consciousness exists, both at the macrocosmic level as well as the microcosmic level. At the microcosmic level, the Pragyā relates to the deep sleeper state of consciousness called the Sushupta state, the Taijas relates to the dreamer state of consciousness called Swapna state, and the Vishwa relates to the waking state of consciousness called Jagrat state. The three corresponding states at the macrocosmic level are the Ishwar which relates to the cosmic deep sleep state of Consciousness called cosmic Sushupta, the Hiranyagarbha which relates to the cosmic dreamer state of Consciousness called cosmic Swapna, and the Viraat Purush which relates to the cosmic waking state of Consciousness called cosmic Jagrat.

According to Purans, the Hiranyagarbha refers to the Brahma the creator, as well as to the Viraat Purush because Brahma was born atop a lotus that emerged from the navel of Lord Vishnu who is no one else but the Viraat Purush. If the word 'Hiranyagarbha' is to indicate the cosmic egg, then it was from this egg, lodged in the womb-like navel of Vishnu, that Brahma emerged. Hence, the 'original creator' was not Brahma but the Viraat Purush as Vishnu, and therefore the latter is the Hiranyagarbha—the golden cosmic egg. So we conclude that Hiranyagarbha essentially refers to the cosmic egg from which the rest of the creation evolved. Since Brahma is said to be the great grandfather of this creation, he is aptly named

Hiranyagarbha, i.e. the cosmic egg from which this visible and gross form of creation evolved.

This entire concept of Hiranyagarbha being produced from the body of the Supreme Being called Narayan or Ishwar have been elaborately dealt with in Mahopanishad, Canto 1, verse no. 8 of the Sam Veda tradition.

The Hiranyagarbha is very subtle like the mind-intellect of the creature. The mind-intellect is also called the subtle body because it is through this mind-intellect that the Atma of the individual creature creates this world by using the mind's stupendous ability to imagine, envision and conceptualise things, and then using the intellect to justify it to be true, real and logical. But this instrument of the mind-intellect is invisible, is so subtle and hidden from view that its presence is only deduced by its astounding potentials which are manifested in the form of the gross body and its own stupendous capabilities. Whatever the mind wishes to do, it gets it done by the body.

This Hiranyagarbha is like the musk present in the body of the musk deer. The deer is not able to see the musk but is nevertheless maddened by its perfume, running mad in search of the source of the perfume not knowing that it is hidden well inside its own body. Similarly, the creature is unaware that the supreme Brahm is residing in his own bosom as the pure consciousness called the Atma while he spends his entire life searching for it everywhere in the outside world.

There is another connotation to this observation. Since the mind is the creator of the world by its power of imagination, and then sustaining or perpetuating its own creation by believing in the truthfulness and reality of the world, it is therefore the mind itself that can conclude this world. So, while it is like Brahma the creator, it is also like Vishnu the sustainer and protector, and Shiva the concluder. If the same mind can assume three roles, it is not incongruous to believe that the same Hiranyagarbha is Brahma and Vishnu simultaneously. Since Shiva is a synonym used for the supreme transcendental Brahm—because the word 'Shiva' stands for an entity that is truthful, beautiful, auspicious, divine and holy as affirmed by a number of Upanishads of the Krishna Yajur Veda tradition that deal with the 'Shiva Tattwa', this Hiranyagarbha is also Shiva.

Hiranyagarbha is also called Maartanda, the Sun, because of its golden colour and brilliance like the golden yellow and brilliant disc of the sun in the sky. Like the light of the sun illuminates the world and brings everything in it to light or knowledge, the Hiranyagarbha too brings to the fore the intentions of Brahm by revealing this vast creation. The Hiranyagarbha had spread the sacred divinity, the stupendous glory, the dazzling radiance and the brilliant splendour through the length and breadth of the vast realm of the cosmos like the sun spreading its glory on the earth by way of its energy, light, heat and warmth.

The word 'Hiranyam' also refers to 'Amrit or elixir or nectar of eternity and bliss'; it also means 'green'. That is why greenery is associated with fertility, vibrancy, life and abundance of food and plentiful vegetation. The trees are green, and their precursor, the algae and moss, were also green. Indeed the food is the elixir of life in the world—nothing can ever survive without food and water. So, 'Hiranyagarbha' first created these to initiate the process of creation, and then sustained them once the process got under way. The 'Viraat Purush' as well as the 'Hiranyagarbha' are both used often synonymously to indicate the macrocosmic forms of the Male aspect of creation whose female counterpart is called 'Nature' or Shakti. The Shakti is the dynamic aspect of Brahm's creative powers and an effective method of displaying the Lord's cosmic authority.

The *Viraat Purush*, according to metaphysics, is the gross body of the creation and it is this body which is the source from which the rest of the cosmos was moulded or created or manifested. That is, the entire creation, both visible and invisible, is a manifested or revealed form of this Viraat Purush.

Purush has been defined in Brihad Aranyak Upanishad, Canto 2, Brahman 5, verse no. 18 explicitly as the cosmic all-pervading macrocosmic form of the Supreme Being, called the Viraat Purush, who had entered each and every body of all the creatures and had taken up his residence there. According to the Aiteriyo Upanishad of Rig Veda, Canto 1, verse nos. 3, the supreme Brahm created the vast universe and his image in the form of the Viraat Purush, and the Gods were created from this Viraat—Canto 1, verse no. 4. When the mortal world consisting of the visible world was created, the human body was considered as the best image of the Viraat Purush, and thus all these Gods took up their residence in it—Canto 2, verse nos. 3-5. According to the Brihad Aranyak Upanishad of the Shukla Yajur Veda, Canto 2, Brahman 5, verse no. 18, it was this Viraat Purush himself that entered the body of all the creatures created.

The Mundak Upanishad of Atharva Veda, in its Canto 2, section 1, verse nos. 9-10 clearly affirm that it is the Viraat Purush, the macrocosmic all-pervading gross body of the supreme transcendental Brahm, that resides in the body of all living beings as their Atma.

In fact, the entire Mundak (Canto) 2, section 1 of the Mundak Upanishad is devoted to the theme of Viraat Purush, and it says that the entire creation has been created as a manifestation of the Viraat Purush.

According to reverend Sankracharya's commentary on Katho-panishad, Canto 1, Valli 3, verse no. 11 and Canto 2, Valli 1, verse no. 12, the word Purush refers to that supreme entity which uniformly pervades in and completely fills everything that exists. It also refers to one who resides inside any place and completely owns that place. Therefore, this word Purush refers to the supreme transcendental Brahm who has taken up residence in the gross body of the creature at the micro level and in the Viraat Purush at the macro level. This Brahm pervades throughout them in a uniform way even as the sky and the wind element occupy all available space in the creation. That is also why sky is considered as a nearest analogy of Brahm because even the other all-pervading element, the wind/air, is present in it and not outside of it.

According to Vedanta therefore, the word Purush refers to the primary and supreme creator of creation known as the Viraat Purush who represents the macrocosmic gross Male body or aspect of the cosmos and is the first macrocosmic gross revelation of Brahm. Ultimately, this Brahm is the Supreme Being who has revealed himself as the Viraat Purush. The creation unfolded from this Purush when he metamorphosed as the gross body of the entire creation, visible and invisible. Therefore, he is the sum-total of all the gross bodies of all the creatures taken together in this creation at the macrocosmic level, and it is from his macrocosmic body that the entire creation was moulded. In other words, the Viraat Purush represents the entire spread of the cosmos. At the micro level of the world, the individual creature is the counter part of Viraat Purush. In other words, the individual gross body of the creature is the microcosmic form of that Viraat, because the entire creation is a manifestation of the same Viraat; it is an image of Viraat.

Literally, the word 'Purush' means someone who resides in a body. Here the body is the gross forms of the various entities of creation in which the Viraat Purush, as the cosmic manifestation of the supreme Brahm took up residence at the time of creation and does so since that time. When the creation would finally wind up, this Viraat would revert back to his original form as the invisible Brahm. An entire Sukta in the Rig Veda, 10/19 is dedicated to this Viraat Purush

In the Purans, he is also known by other names, such as Vishnu, the sustainer. Since the Viraat is the male aspect of creation and the primary source of life, Vishnu is also regarded as the creator as well as the sustainer of the creation. But since Vishnu, as Viraat Purush, is the macrocosmic gross body of Brahm, the supreme transcendental Being, he is also regarded as being synonymous with Brahm. The entire universe has been created by Vishnu's passive powers using Shakti as its active power and partner.

The word 'Viraat' refers to something that is vast, colossus, immeasurable, fathomless, and infinite and beyond all terrestrial yardsticks. The supreme Lord encloses the entire creation from all sides like an envelop, and at the same time he remains uniformly and inseparably present throughout it like salt which has been dissolved in water. At the time of creation, the Trinity Gods, i.e. Brahma the creator, Shiva the concluder, and Vishnu the sustainer, had all emerged from the Viraat Purush. According to Purans, this Viraat and Lord Vishnu are the same divine factors of creation. The subtler form is known as Viraat, while its grosser form is Vishnu—though the terms 'subtle and gross' are only relative and for the purpose of understanding, because both are the same indivisible Brahm who is non-dual and immutable.

²This *Pralaya* or dooms-day of Brahm is separate from the dooms-day of this mortal world on earth which is only one day of Brahma. It should be remembered that the entire creation is depicted as being in layers or in concentric circles with increasing distance from the center. Refer Canto 6, paragraph nos. 2-9 in this context.]

10. One day-time and one night-time of Lord Vishnu, who is the protector, nourisher and sustainer of the cosmic egg or the 'Anda' (i.e. the entire Universe) created out of a fraction ('genes' or 'sperm') of the Supreme Being known as Adi-Narayan (or the supreme Brahm), is equivalent to one life-time (or life-span) and one sleeping time (or the 'Pralaya' time) of Brahma the creator respectively. That is, one full 'day' in the life of Vishnu is equivalent in length and duration to one cosmic cycle of birth and dissolution of Brahma the creator of this physical world. [One full 'day' of Vishnu implies both the waking phase and the sleeping phase of Vishnu just like our human days are measured which includes the day time when there is sunlight and the ordinary man is usually awake, and the night time when there is darkness in the absence of sunlight. The 'life-span of Brahma' and the 'duration of Pralaya' have been narrated in paragraph no. 9 above. This means that one hundred years in the life of Brahma is equal to one day-time of Lord Vishnu when he is awake, and one hundred such long years of Pralaya when Brahma, in his subtle form as the Hiranyagarbha, rests in the causal body of Brahm, is equal to one night-time of Vishnu when he retires. Therefore, one full 'day' of Lord Vishnu = one full cycle of creation done by Brahma, starting from his current birth, ending in his dissolution, and extending to the point of time just prior to his re-birth in the next phase of creation.]

With this scale of measurement, Lord Vishnu's fortnights, months, seasons, solstices and years are measured.

Hence, one full life-span Vishnu consists of one hundred crore years measured according to this cosmic scale of time that relates to Vishnu as narrated above. [1 Crore = 10 million units. In other words, one life-span of Vishnu = 100 x 10 million years according to the measurement of time on Vishnu's scale.] (10).

11. At the end of his life-span, Vishnu reverts back into his primary form as the Viraat Purush. This marks the 'end' or the dissolution of Vishnu.

When this comes to happen, the universe ends along with all its different formations and layers. This eventuality when the universe dissolves into nothing is the primary form of Vishnu as the Viraat Purush. It marks the beginning of the great Pralaya or dooms-day of the universe, or the resting phase or the sleeping phase of Vishnu¹.

The resting or sleeping period of Vishnu is of the same duration as his life-span. This is the great 'Pralaya of Vishnu' when everything comes to a naught, when there is complete stillness and inactivity, when nothing exists and moves, when nothing shows signs of life and activity. [The 'resting or sleeping time of Vishnu' is when the Lord rests or sleeps peacefully, and depicted in the Purans as the Viraat Purush reclining on the bedstead made of the coiled body of the celestial serpent known as Seshnath who floats on the surface of the celestial ocean of milk known as the Kshir-sagar, and which corresponds to the dissolution of creation at the cosmic level or the circle or plane in which Vishnu resides in the broader perspective of the entire creation. This period is equivalent to one crore years also. This concept of measurement is explained in paragraph 10.] (11).

[Note—¹The ordinary waking phase of Vishnu represents the Jagrat or waking state of consciousness. It is during this phase that a creature (a living being) gets actively aware and involved in the gross external world.

On the other hand, the ordinary sleeping phase of Vishnu marks the Swapna or the dreaming state as well as the Sushupta or the deep-sleep state of consciousness when the sleeping creature is neither aware of the outside world nor does he get involved in this external world for the simple reason that his gross body and its sense organs are totally inactive during this state.

This phase leads to the next higher state known as the Turiya state, or the transcendental state of consciousness. This is of a much longer duration than the Sushupta state, and is a perpetual state of bliss when nothing matters. It is during this state that self-realised ascetics find Samadhi, which is a state of trance. While the Sushupta is only momentary and transient because sooner than later the consciousness reverts back to the dreaming and the waking states, the Turiya state is more steady and long-lasting. Once this state is reached, there is no reversal. This is equivalent to the 'Pralaya of Vishnu' which means that the existence of the gross aspect of creation has been completely done away with.

It must be kept in mind that Vishnu represents that aspect of creation that has already taken birth or already has come into being after it was created by Brahma, the creator, and till the time it is concluded by Shiva or Rudra as its concluder. The entire living world passes through these phases—it sleeps for a certain time and keeps awake for certain duration of time. This rhythm of ordinary humdrum life is represented by Vishnu. An ordinary creature remains involved neck-deep in the affairs of the world around him. He takes care of his possessions and his subjects, desires to possess more and still more, and devise better ways to improve his own living as well as those dependent upon him. He protects his own assets and his body to the best of his abilities. All efforts of his are directed towards attaining happiness, deriving joy and pleasures from his surroundings, and generally taking care of his all-round well-being. This is obviously the role of Vishnu as the caretaker, the sustainer and the protector of creation.

However, there are some rare people who realise the futility of this wild-goose chase, and having had the opportunity to study the Upanishads and other scriptures they realise that true happiness and bliss lies somewhere else, that this world is perishable and therefore the joys and happiness that it provides are also transient. So they decide for themselves to pursue the source of eternal and truthful happiness and joy, which they find in realisation of the truth about themselves, and about the 'pure consciousness' that forms their true 'self'. With this realisation they taste the eternal source of Amrit or nectar that they prefer to remain submerged in its ecstasy and keep suckling it. Then they would have nothing to do with this gross external world.

Therefore, for all practical purposes this world has come to a naught for them, it has ceased to exist, it has dissolved. This is equivalent to the 'Pralaya' or the end of the world for them. Since the living being is an image of Vishnu in his form as the Viraat Purush, it follows that this is also equivalent to the 'Pralaya of Vishnu' when

the world dissolves around him. A lot of imagery and metaphors are used to explain these grand philosophies of the Upanishads.]

12. The one life time and one Pralaya time of Vishnu (i.e. one full life cycle of Vishnu) is equivalent to one day-time and one night-time of the 'Adi-Viraat Purush'. [The word 'Adi' means one that was present at the beginning; the primary and the original entity from which the present has come into being. Hence, the term 'Adi-Viraat' would refer to the higher and subtler form of the Viraat Purush from whom Vishnu has been born or created during the very primary stages of evolution of creation. Vishnu is the grosser aspect or the revealed form of the Viraat Purush. Vishnu represents that aspect or quality or dynamism or power of the Supreme Being which helps to sustain, nourish and protect the creation, including the creator Brahma himself. Applying the logic used for Brahma the creator while describing the process of creation and dissolution, it follows that Lord Vishnu, who is more often than not treated as being synonymous with the Viraat Purush, is like Brahma the creator in the higher echelons of creation. Vishnu is the Brahma of the third layer of the cosmic matrix, the third circle of creation called the Vishnu Loka. The first circle is the mortal world where ordinary creatures live—it is called the Bhu Loka. The second circle is the world where Brahma lives—called the 'Brahma Loka'.

The 'Adi-Viraat' is the subtler and more sublime form of the Viraat Purush from whom this universe in which we live is created. The 'Adi-Viraat' is the form of the Supreme Being that is referred to in Canto 2, paragraph 11 which says that millions of universes are born from each pore of the body of the Viraat. This creation has been visualised as being in different layers like many concentric circles, one higher than its previous one. This concept will be further discussed in Canto 6.]

Hence, one 'full day' in the entire life-span of the Adi-Viraat Purush would obviously consist of one life cycle of Vishnu as stated above. [One 'full day' implies a complete circle of one sunlight time and one night time according to our earth terminology. In cosmic terms it implies one full life-span of Vishnu and one full Pralaya of Vishnu as narrated in previous paragraph nos. 10-11.]

With this cosmic scale of measurement of time, the fortnights, months, seasons, solstices and years of the 'Adi-Viraat' are measured.

Therefore, one life-span of the Adi-Viraat Purush is equivalent to one hundred crore years measured according to this cosmic scale of time that relates to the Adi-Viraat as narrated above. [1 Crore = 10 million units. In other words, one life-span of the Adi-Viraat = 100 x 10 million years according to the measurement of time on Adi-Viraat's scale.] (12).

13. At the end of his life-span, the Adi-Viraat Purush withdraws himself into his primary form known as the 'Adi-Narayan', who is adorned by the Maha Maya and is the primary cause of the Adi-Viraat's existence.

That is, at the end of his life-span, the Adi-Viraat dissolves into the Adi-Narayan, the supreme Brahm, from whom the former had been born, or who was the primary cause of the former's coming into being.

[The Adi-Narayan would be the fourth concentric circle, the higher echelon of creation. He is the more subtle form of the Supreme Being that transcends the Adi-Viraat form. It would be noted that the differences between all these cosmic entities is very fine and subtle. It can be illustrated with an ordinary example. The air element is the same within the earth's atmosphere, but the density of air near the earth's surface is obviously more than the highest point of the atmosphere. Even the percentage or

density of the various gases and other ingredients of air vary at different levels. Hence, as we move up and away from the surface of the earth, the ingredients of the air and the characteristics of the space around the earth change, but primarily they will always remain the air and the sky elements, retaining their intrinsic qualities and virtues. Likewise, the same Supreme Being known as Brahm exists throughout this creation in all its different levels, and this Brahm exhibits different sets of characteristics at each level. It is only the degree of grossness and subtlety that changes, and not the primary nature of Brahm. The fact that Brahm appears to change miraculously and exhibit different characteristics at different points of time and dimensions of creation which are much divergent and not related to the original characters of Brahm as outlined in this Upanishad is an evident form of the stupendous ability of the Supreme Being to create delusions. And this is called 'Maha Maya'—or, the Great Delusion.]

The time during which the Adi-Viraat remains at rest or dissolved is called the period of Pralaya of Adi-Viraat and the dissolution of the level of creation which is associated with him. This period is equivalent to the one life-span of the Adi-Viraat (as outlined in paragraph no. 12 above). [That is, the duration of the period of Pralaya of the Adi-Viraat, or the time when he sleeps or lies in rest, which is equal to the period of his one life-span, would be another one hundred crore years or a 100 million years.]

During this phase of Pralaya of the Adi-Viraat, everything comes to a naught; there is absolute stillness and no activity whatsoever.

[Therefore, one full cycle of existence and dissolution of the cosmos at the level of the Adi-Viraat Purush, which is higher than that related to Vishnu, would consist of one full life-span and one full length of Pralaya or resting phase of the Adi-Viraat.] (13).

14. The one day-time of the parent Adi-Narayan, the Primal Purush, is equivalent to one full life-span of the off spring known as the Adi-Viraat. Similarly, one night-time of Adi-Narayan is equivalent to one period of Pralaya of Adi-Viraat. [The 'Adi-Narayan' is the fifth level of creation in the order of increasing subtlety and sublimity.]

Hence, one 'full day' in the life of the Adi-Narayan consists of one such day-time and one such night-time as measured according to the cosmic scale of Adi-Narayan.

Extended further, his fortnight, month, season, solstice and one year is also measured with this cosmic time scale.

Thus, one full life-span of the Adi-Narayan is equivalent to one hundred crore such years as measured according to the scale of cosmic time that is applicable to the Adi-Narayan (14).

15. At the end of this tenure, the Adi-Narayan goes to sleep or takes rest by closing his eyes as per the wishes of the Tripadvibhut Maha Narayan¹. This is called the 'Nimesh' of the Adi-Narayan, or the time during which the Lord's eyes are closed.

[The subtle world of Tripadvibhut Maha Narayan is the 6th level of creation of the cosmic matrix. The sequence is as follows—1st level is the world mortal creature, called 'Bhu Loka', the 2nd level is of Brahma, the creator, called the 'Brahma Loka', the 3rd level is that of Vishnu, the sustainer and caretaker, and his world known as the 'Vishnu Loka', the 4th level is of the Adi-Viraat, the parent of the Viraat Purush who is also known as Vishnu, the 5th level is Adi-Narayan, and finally the 6th level or circle

of creation is represented by the Tripadvibhut Maha Narayan. In other words, this creation is visualised as consisting of concentric rings, with the 'Bhu Loka' being the inner-most ring, and the Tripadvibhut Maha Narayan as the outer-most ring.]

When this happens, the Mool Avidya and the accompanying Anda with all its various layers dissolve into nothing; their existence comes to an end. This is called the Pralaya of creation at the level of Adi-Narayan. [The universe is visualised as an egg that harbours creation at varying levels of subtlety and development. In order to understand the process of dissolution or regression or withdrawal one must know the process of progression or growth and expansion of the entity that regresses or withdraws into itself. The process of forward motion or evolution of creation has already been described in Canto 2, paragraph nos. 9-12 of this present Upanishad.] (15).

[Note—¹The meaning as to who is the great and the senior God known as Maha Narayan would now become clear. All the divine entities mentioned till now—viz. the mortal world of living beings, Brahma, Vishnu, Adi-Viraat and Adi-Narayan are only one Paad or aspect of the Supreme Being known as 'Maha Narayan'—the Great Narayan or the Great Lord God. This Maha Narayan is the outer boundary of creation of which we are aware, enclosing everything from the outside. These five worlds represent only 'one' aspect or Paad or foot of the Great Lord known as the supreme transcendental 'Brahm', the Supreme Being.

This Brahm is known to have 'four' Paads, hence the rest of the existence that has an extremely subtle and sublime form would logically represent the rest of the combined 'three' Paads of Brahm. These are represented by the Tripadvibhut Maha Narayan—literally meaning the Great Narayan with the divine glories that are representative of his three aspects ('Tri Paad') other than the ones already described in this Canto till now. The Tripadvibhut Maha Narayan is just like the moat that surrounds a grand huge fort. A better imagery would be to visualise this known creation with its limited span as a huge continent, and the Tripadvibhut Maha Narayan as the vast and fathomless ocean surrounding this continent. The fact of the matter is that even in actual practice, the land mass of earth is approximately only one-fourth of the total area of the earth, with the rest three-fourths covered with water, be it in the form of an ocean, a sea or a river. This picture would help to explain the further sub-divisions of the subtler aspect of creation as narrated in the forthcoming paragraph no. 16.

Who essentially is this 'Tripadvibhut Maha Narayan' has been beautifully explained in Canto 4, paragraph nos. 2-6 of this Upanishad.

One can well imagine the stupendity of Brahm if only of its feet is so grand that it covers the entire gamut of creation as we know and even can imagine about.]

The 4 'Paads', or limbs, legs, aspects, facets or pedestals of Brahm—The four 'Paads' of Brahm are the four legs upon which Brahm stands. These four Paads symbolically establish the greatness and supremacy of Brahm as the all-powerful and all-controlling Authority in this creation. Since Brahm is the supreme Divinity that has revealed itself in the from of this creation, since each and every unit of creation is a manifestation of Brahm and without Brahm nothing exists, nothing has any relevance and truth (refer *Tripadvibhut Maha-Narayan Upanishad*, Canto 1, paragraph 1), it follows that the entire creation represents Brahm's four cosmic forms or aspects or facets—which are called the four legs or Paads of Brahm. This is a metaphoric way of saying that the supreme Brahm has manifested himself and is made known to this world by the means of these four mediums.

The four Paads of Brahm stand for the four states of existence of consciousness—viz. the Jagrat or waking state, the Swapna or dreaming state, the Sushupta or deep sleep state, and the Turiya or transcendental state. This fact is affirmed in the Atharva Veda's *Tripadvibhut Maha-Narayan Upanishad*, Canto 1, paragraph 5; Canto 4, paragraphs 1-3.

These four Paads of Brahm have been explained in (i) Sam Veda's *Chandogya Upanishad*, Canto 3, section 18, verse nos. 2-6, Canto 4, Section 5, verse no. 2, Canto 4, Section 6, verse no. 3, Canto 4, Section 7, verse no. 3, and Canto 4, Section 8, verse no. 3. (ii) Krishna Yajur Veda's *Brahm Upanishad*, verse no. 1. (iii) Atharva Veda's *Mandukya Upanishad*, verse nos. 3-7; *Nrisingh Tapini Upanishad*, Canto 4, verse nos. 4-7; *Tripadvibhut Maha-Narayan Upanishad*, Canto 1, paragraph 5; Canto 4, paragraph nos. 2-3, 6; Canto 8, paragraph no. 4; *Ram Uttar Tapini Upanishad*, Canto 3, verse no. 5-8; *Par Brahm Upanishad*, verse no. 5; *Narad Parivrajak Upanishad*, Canto 8, verse nos. 9-19.]

16. The above narration of dissolution or regression of creation, extending from paragraph nos. 7 to 15, pertains to the grosser aspect of creation. The present paragraph no. 16 will describe this process when it becomes finer and more subtle.]

At the time of final dissolution, the Mool Avidya (i.e. the primary and principal form of Avidya)—which possesses such unique and mysterious qualities as being distinct from both truth and falsehood, as being indescribable and indefinable, as being without any specific attributes and characteristic features, as being the cause of the creation, its expansion and dissolution, as being the most ancient and the primary element since the beginning of everything, as being the primary cause of all the other causes, and as being endowed with the greatest of mystical and magical powers known as 'Maha Maya' that ever existed in this creation—withdraws its self, along with all its grand qualities and vivid forms that have expanded in all the directions of creation, into its primary and most subtle form which is at the root of its coming into being in the first place. When this happens, all the above qualities of the Mool Avidya, which make it so unique, enigmatic and mystical, are abandoned, and it reverts back to its unqualified and neutral source, known as 'Avyakta', from which it had sprung at the time of expansion of creation.

The root cause of the origin of the Avidya is known as 'Avyakta'—i.e. one that is not manifest, one that is not expressed, one which cannot be described and known because it is very subtle, minute and atomic in nature. This Avyakta is the secret that is not known. So, the Avidya dissolves into the Avyakta¹.

Finally, at the last stage of dissolution, the Avyakta collapses and dissolves in the Brahm. This situation is akin to the state of existence of the 'fire element' after the fuel is exhausted. [The Fire is an eternal element, and when the fuel is exhausted it just retracts its self into its primary form as the 'Avyakta' Fire. That is, the visible form of the 'fire' becomes invisible and un-manifest, but it has not died in the real sense as it is an omnipresent and eternal entity. When the conditions are conducive and favourable, the 'fire' would jump back to life and become evident; it would be re-kindled.]

In the context of Adi-Narayan, the Supreme Being from whom this creation springs forth, it implies that when the Maha Maya (the great delusions that surround the primary nature and form of the Supreme Being) is removed or discarded by the Lord, he reverts to his principal divine form that is feature-less and indescribable. It was the Maya (delusions, or ignorance of the truth) that had led to the creation of a web of imaginary features around the basically feature-less Consciousness called Brahm. Primary Avidya (primary ignorance of the truth) and Maya (delusions that accompany Avidya) had given shape and form to an entity that has no forms and shapes. Hence, when Avidya and Maya are removed, this principal entity (Adi-Narayan) becomes free from their influence and becomes one without any attributes

and qualifications. The latter form is the principal form of Adi-Narayan, the Avyakta (the subtle and the un-manifest).

In fact, all the creatures (i.e. all forms of life in this creation) acquire or assume their original nature and form (as the blissful 'self', the immaculate 'consciousness') when the Adi-Narayan sleeps².

Even as the colourless crystal appears to be tinged red when it is associated (extremely close; touching) a red-coloured flower of China Rose (*clom eviseora*), and regains its original pristine colourless form when the flower is removed (or the crystal itself is removed), the pristine and immaculate prime nature of Brahm appears to be similarly tainted and influenced when there are Maya and Avidya near this Divinity. When this happens, Brahm appears to exhibit various attributes and qualifications; it appears as having a dual form or existence, and exhibits other such delusory features that are natural effects of Maya and Avidya.

When all such attributes and qualifications that are assigned to Brahm and used to describe the latter are eliminated, what remains is the pristine pure primary form of Brahm that has no attributes, qualities or characteristics; this Brahm has no forms and shapes, no qualifications whatsoever.' (16).

[Note—¹The cause of this entire creation coming into being is that Brahm, the cosmic Consciousness, decided to 'create' it. It is an 'imagination' of Brahm; it was his 'wish' personified. Once the imaginative mind of Brahm created this creation, it began to believe it to be true; the mind become conditioned into believing that something which has no pith and substance, something that is entirely imaginary was actually true and real. This is because this world was Brahm's own creation, and anyone who creates something is highly attached to it at the emotional level.

This had two effects—(i) since Brahm is super Consciousness empowered with stupendous and astounding mystical powers and abilities, the 'imaginary' world created was made 'real'; and (ii) Brahm was so charmed by his own creation that for once he forgot that it is imaginary. As a result, Brahm got sucked in a vortex of delusions which were his own creation.

So, the genesis of this creation and its myriad delusions lie in fundamental 'Avidya' or basic lack of awareness of the reality that had engulfed Brahm at the very first stage of creation. Brahm had forgotten the truth that what unfolded before his eyes was nothing but 'imaginary', that the colourful canvas of the creation was his own 'wishful thinking' taking a shape, and it was no less than the colour of the sky as seen during sunset or the shimmering water as seen in the desert mirage.

Thus, Brahm transformed or metamorphosed into Brhama the creator. This is why the two words—'Brahm' and 'Brahma'—have very close resemblance. Once sucked into the vortex and overcome with both Maya and Avidya, Brahm plunged head-on into the Prapanch of this creation—he became Vishnu to take care of his off spring in the form of this creation.

But when wisdom dawned on Brahm, he decided to get out of it and renounce it. So he became Shiva, the patron God of ascetics and hermits. And finally, fed up with the constant disturbance caused by the steady pricking of the world created by him, and to regain his eternal peaceful and tranquil state to which Brahm was accustomed, he decided to wind up the game—thereby assuming the form of Rudra.

So we see that when the basic or fundamental cause of delusion—i.e. the 'Mool Avidya'—is removed, what remains is the undefined divine entity known as 'Avyakta'. That is, Brahm was 'Avyakta' or unmanifest and unknown till the time Avidya or ignorance overtook him, because once this happened Brahm assumed the role of Brahma to create, Vishnu to sustain what he created, and then Shiva or Rudra to conclude it. These are the 'Vyakta' or manifested form of Brahm. Besides this, the known world is said to be an image of Brahm, and since this creation is visible and manifest for all, it represents the 'Vyakta' form of Brahm.

Therefore, what was fundamentally 'Avyakta' (unmanifest, mysterious and unknown) became Vyakta (manifest, evident and known). This is why the cosmic Consciousness is known as 'Avyakta' while its manifested form as Brahma, Vishnu etc. as well as the world are known as 'Vyakta'.

²This concept must be clearly understood. The individual living being is an image of the Supreme Being known by various names such as Narayan, Viraat Purush or Brahm. When he is awake and active in this world he surrounds himself with so many emotions and feelings. He speaks, tastes, smells, sees, hears, feels, goes here and there, accepts and gives, excretes, and enjoys the pleasures and comforts of the sense objects of the world. Not only this, he hankers for them, yearns for them, fights and commits the greatest of sins for them, and spends his entire life-time pursuing them relentlessly. That is not the end—for at the time of death he regrets that he has to leave behind this ever-so changing world and desires to take birth again to re-live in it and wallow in it once again. This is akin to him being surrounded by Avidya and Maya—because in spite of being aware that this world is artificial, perishable, ever-changing, transient and most deceitful, a world that is a hot-bed of miseries and pains, of turmoil and turbulence, but definitely not a provider of eternal bliss and peace, he still yearns for it and treats it as the true and the real thing. This situation is like the Adi-Narayan being surrounded by Avidya and Maya.

Now, when the same living being sleeps, he is totally oblivious of the surrounding world and its charms. In this state of existence he lives as the 'consciousness' that moves (pulsates, vibrates, radiates) inside his gross body.

In the higher echelons of sleep however, his sub-conscious mind also goes into hibernation, and he stops even to be disturbed by any kind of dream. This is the state of complete bliss. It is the true nature of the creature's 'self' which is the pure 'consciousness' referred above. Since this 'consciousness' is at the core of his existence, it is called his 'soul' or Atma. In the context of the Adi-Narayan, when the Lord sleeps as narrated in this Canto, he is deemed to have discarded all the surrounding Avidya and Maya, and rest in his blissful 'self', the primary cosmic Consciousness that is the only Truth in creation, the Truth that is also known as 'Brahm'.

It must be noted here that all forms of life in creation are images of the same Supreme Being known as Adi-Narayan or Brahm. When the cosmic Consciousness assumes a body, however subtle it might be, it is called Narayan. When it dispenses with this body, it exists in its primary form as the 'Consciousness', and then it is known as Brahm. Any kind of body which has no consciousness pulsating inside it would be dead, lifeless and inert. So, 'Brahm' is the consciousness or the soul or the Atma of Narayan. Hence, Brahm is the 'Adi-Narayan' because it is the primordial and the primary ('Adi') dynamic force of creation known as the cosmic 'consciousness' that keeps Narayan and all his manifestations alive.]

-----*****-----

Purva Kand--Canto 4

[This Canto will narrate the form of the supreme and eternal essence or Tattva that exists when Maha Maya or the Great Delusion that accompanied Mool Avidya or primary ignorance is eliminated. The non-dual nature of Brahm is emphasised once again, along with explaining why Brahm appears to be dual and why this latter notion is fallacious. This Canto enumerates some of the grand and magnificent virtues of Brahm, as well as the four Paads of Brahm from two different perspectives (refer paragraph nos. 3 and 6). It also describes the meaning of the terms 'Unmesh'

(waking) and ‘Nimesh’ (sleeping). In this latter context, refer Canto 3, paragraph nos. 7-16.]

1. [This paragraph enumerates the eclectic and grand virtues of Brahm. Refer also to Canto 1, paragraph no. 1.]

OM salutations! The original and primary form of the supreme transcendental Brahm, the prime Tattva or essence of creation, comes to the fore when all attributes and qualifications having their genesis in Maya and Avidya are dispensed with (as narrated in paragraph no. 16 of Canto 3). [Maya = delusions; Avidya = lack of truthful knowledge; ignorance. Both of them have their own set of problems which they create in their wake.]

Brahm is beyond Avidya (as well as its accompanying Maya), and hence it is most immaculate and pristine pure, most incorrupt and untainted.

Brahm is an embodiment of blissfulness and beatitude of the highest order that comes with supreme spiritual realisation and enlightenment. Hence, Brahm is known as ‘Kaivalya’—the divine entity that is unique and on of its own kind in this respect.

In fact, all the four Paads or primary forms or aspects of Brahm are formless and attribute-less in their principal form. [Refer Canto 1, paragraph 4-6; Canto 2, paragraph no. 9; Canto 4, paragraph no. 6.]

Brahm is immutable, indivisible and uniform.

Brahm is complete in its self; Brahm lacks nothing and is wholesome.

Brahm is self-illuminated and a personification of the divine virtues of Sat-Chit-Anand. [Sat = Truth; Chit = Consciousness; Anand = Bliss.]

Brahm is unique in the sense that it has no Lord over it. There is no entity superior to Brahm. [This is why Brahm is called ‘supreme and transcendental’, and is envisioned as enclosing the entire existence from the outside like a cosmic moat surrounding the fort of the universe.]

Brahm is a personification of all causes and effects.

Brahm is a personification of eternal consciousness and its characteristic bliss, beatitude and felicity.

Brahm is a personification of the eternal values of the highest degree of auspiciousness, holiness, sublimity and divinity.

Brahm is a personification of eternal and infinite Anand—bliss and happiness.

Brahm is a personification of splendour and radiance of immense intensity.

Brahm is complete in all respects, being wholesome and fulfilled.

Brahm represents the combined form of all the visible and invisible forms in which the eternal Consciousness exists.

Brahm is the most astonishing and mysterious entity that embodies the magnificent virtues of Anand (bliss, beatitude and felicity) and grand Vibhutis (grand characteristics and immaculate qualities in creation) of the highest degree and purest form.

Brahm is the pillar that symbolises the eternal consciousness. [Just like any pillar that supports a huge structure, Brahm as ‘consciousness’ is the cosmic pillar that supports life in all its forms in this creation.]

Brahm is a personification of pure Gyan (knowledge, wisdom, erudition, enlightenment) and pure Anand (bliss, beatitude and felicity). Indeed, Brahm is synonymous with Anand that is complete in every respect.

Brahm is a fount of immense electrifying and grand virtues that are as dazzling, splendorous, radiant, glorious and dynamic as the Electric.

Thus, we have just outlined the magnificent and divine form of Brahm that is eternal and immutable.’ (1).

2. The disciple, who had been listening attentively, said to his learned teacher—‘Oh Lord! How is it possible for Brahm to have four Paads (literally feet, but implying the various aspects or designations or forms of Brahm) when it is said that Brahm is non-dual, immutable and without any attributes. Please explain it to me how to reconcile these two opposite characteristics of Brahm.’ [Refer Canto 1, paragraph no. 5, Canto 2 which describes Brahm as being Saguna as well as Nirguna, Canto 3 which describes the different life-spans of various forms of Brahm, and Canto 4, paragraph no. 6 which also deal with the same question.] (2).

3. The wise teacher removes his doubts. He explains—‘No, there is no opposition or contradiction in Brahm. Brahm is unequivocally and irrefutably Advaitya or non-dual—this is absolutely true. In fact, this is what has been emphasised in earlier discussions. No differences or dichotomies have been said to exist in Brahm. [This is because there is nothing except Brahm which is the ultimate ‘cosmic and universal truth’.]

The various forms in which Brahm is said to exist, the so-called different Paads or aspects of Brahm, are simply conceptualisations just to visualise and help understand about something that is primarily beyond the scope of the mind and the intellect to understand and analyse. All attempts to describe Brahm with attributes are just efforts to somehow understand something as divine, esoteric, enigmatic and mysterious as Brahm, an eclectic and divine entity which actually has no attributes. Therefore, Brahm showing duality is non-existent; it is Brahm that is non-dual that actually exists.

So, understand things in the correct perspective and context.

It is said that Brahm has four Paads. Out of them, one Paad (aspect or limb or branch) of Brahm is known as Avidya (lack of true knowledge), and the other three Paads are like Amrit. [Amrit is the ambrosia of eternity. Hence, the other three major aspects of Brahm are eternal and free from ignorance and its accompanying delusions. Refer Canto 1, paragraph no. 5, and Canto 8, paragraph no. 4 which describe the four Paads of Brahm. Refer also to Cantos 2 and 3 which primarily emphasise the fact that inspite of Brahm having myriad of forms and names—visible as well as invisible, microcosmic as well as macrocosmic, independent as well as all-inclusive, gross as well as subtle—primarily all of them are the same and irrefutably refer to the same divine entity known as ‘Brahm’. The different aspects are mainly for the purpose for understanding Brahm, and are the different angles from which the same entity is viewed, studied or explained.]

The divine form of Brahm as having four Paads on the one hand, and as being a non-dual Advaitya entity on the other hand as narrated in this Upanishad is in accordance with the tenets and axiomatic maxims of other Upanishads. They do not clash with each other. [That is, if you analyse the teachings of the previous Cantos, the main point which is stressed is that notwithstanding what Brahm looks like due to the influence of Maya and Avidya, its primary form is the same. Or, that it is the same Brahm which assumes both the Saguna form and the Nirguna form as outlined in Canto 2. Since ‘truth’ is always the same in whatever form or shape it exists, it follows that Brahm which refers to the ‘cosmic and universal truth’ will always be the same, or be non-dual. If there is any confusion of duality in Brahm it is out of Maya (delusions) and Avidya (ignorance). The numerous names and epithets applied to

Brahm also are misnomers because they lead to confusions about the an entity that is without any names and epithets, an entity that has no second or parallel, or one that has no definable forms and attributes which any given name conjures up in the mind. Canto 2 should be read along with Canto 3 in this context as the former stresses that all forms of Brahm, whether Saguna or Nirguna are one, and the latter Canto enumerates the various forms of Brahm as revealed in the form of various layers of creation such as that of Brahma, Vishnu, Adi-Viraat, Adi-Narayan, Tripadvibhut Maha Narayan etc.] (3).

4. The Upanishads describe the magnificent and grand virtues of Brahm known as the ‘Tripaad Brahm’—i.e. that aspect of Brahm which is symbolised by the three divine Paads (limbs or aspects of the Supreme Being) that are distinct from the fourth Paad. The fourth Paad is dominated by Avidya (ignorance) and Maya (delusions) which stand for darkness. Hence, that form of Brahm which is distinct from and not affected by the tainting effects of the fourth Paad characterised by darkness associated with Avidya and Maya is honoured by the holy Upanishads as the ‘Tripaada Brahm’—or Brahm with three limbs or aspects that are free from the darkness. [Obviously, this second form of Brahm would be glorious and radiantly illuminated like the Sun in the dark sky. It ought to be clearly understood here that the 4th Paad is the lowest Paad and covers the whole gamut of known creation as narrated in Canto 3, paragraph nos. 7-15. This 4th Paad is the lowest and the grossest aspect of Brahm where Avidya and Maya are the dominant players—refer Canto 8, paragraph no. 4. Such a creation is transient and ever-changing. It has a certain beginning and an end—something that is quite the opposite of and inconsistent with what one expects from Brahm which the Upanishads unequivocally and unanimously proclaim to be one, non-dual, unchanging, steady, constant, infinite and eternal. So, while the 4th Paad is the lowest aspect of Brahm, the 1st Paad would refer to the highest and the most sublime form of Brahm, with the rest of the two Paads lying in between. These four Paads have been described in paragraph no. 6 of this present Canto 4.]

A spiritual aspirant who honours Brahm in the glorious form as ‘Tripaada Brahm’ is sure to attain Moksha for himself. [This is because he would be dealing with the higher and more evolved stages of consciousness.]

Such an enlightened person should think in the following manner—

‘This ‘Tripaad Brahm’ is beyond darkness. It is a divine fount of light and illumination that itself eliminates darkness.

The Tripaad Brahm is a personification of supreme bliss, beatitude and felicity; it is eternal, imperishable, truthful and most divine; and it is known as ‘Kaivalya’ because it is unique and one of its only kind.

I (the spiritual aspirant) know (am acquainted with) this great Purush (the divine Being, the divine Brahm, the Supreme Being) who is as splendid and radiant as the celestial Sun (‘Aditya’)¹, and who is beyond the reach of darkness (‘Tama’). [The word ‘Tama’ means darkness and it implies a preponderance of the negative virtues of Avidya or ignorance and lack of true knowledge (refer last stanza of paragraph no. 5), and ‘Maya’ means delusions along with all its accompanying spiritual problems. The ‘Aditya’ or the Sun is the only self-illuminated celestial body in the sky, and all the planets are lighted by it. This metaphor of the Sun in relation to Brahm is most apt because it is Brahm that is at the core of life in this creation. Brahm is pure cosmic Consciousness. It is the Consciousness that injects ‘life and vitality’ into the otherwise lifeless and inane creation; it is the Consciousness that ‘illuminates’ this world for the creature in as much as it enables the creature’s body to perceive the

external world through his sense organs of perception just like the celestial Sun lights up the world for him to see with its physical light. The whole creation revolves round this Consciousness just like the planets go around the Sun. The Sun is the sustainer and protector of life on our planet, and hence to liken it with the supreme sustainer and protector known as Brahm is also very appropriate for purposes of understanding. Again, the Sun is the most evident source of light in the world and it removes the latter's darkness by its own illumination which also is another reason for its selection to represent Brahm.]'

Those who understand this and realise the truth of Brahm in the aforesaid manner become a personification of Amrit in this world while they are still alive. [The term 'Amrit' literally means the ambrosia or nectar or elixir that provides eternity and bliss. Hence, here it means that a wise, erudite and self-realised person who has become enlightened enough to know and understand what the essence of the term 'Brahm' is as described in this and other Upanishads indeed becomes highly enlightened and exalted. He accesses the supreme fount of eternal spiritual Truth that provides him with never-ending bliss that gives him eternal peace and happiness. When this is achieved, he becomes a living example of someone who is a personified form of Amrit, someone who effuses ambrosia of spiritual bliss and happiness, i.e. he becomes 'Brahm personified'. Positive energy radiates out of him much like the brilliant light radiates out in all the directions from the Sun. He exhibits all the grand characteristics that are expected from a realised soul who has become Brahm-realised and self-realised, someone who has understood the grand Truth and Reality of creation, someone who has overcome the effects of Maya and Avidya.]

Such a person is said to have obtained 'Mukti'. There is no other way to attain Moksha (final liberation, deliverance, emancipation and salvation). [The 'Mukti or Moksha' referred to here is known as 'Jivan Mukti'—a phrase meaning he has attained liberation and deliverance while his soul or his Atma still lives inside the gross body in this world, or while he is still alive.] (4).

[Note—¹The *Sun* or *Aditya*— The Sanskrit word for the Sun God or Aditya is *Surya*. This word has three connotations—viz. (i) *Sarteha*—one who moves. This refers to the Sun because it moves constantly across the sky. It also refers to the supreme cosmic Consciousness that makes all movement possible. (ii) *Sviriyate*—this means one who receives and accepts. This virtue refers to the fact that all offerings offered to the fire sacrifice are done in the presence of the Sun, and since the latter is the celestial cauldron of fire all the offerings are deemed to be offered to it. In another plane, it refers to the Jiva, the living being, who receives stimuli from the world and then accepts them and deduces that the world from where they originate is real and true. (iii) *Suvateha*—meaning one who shines. This is very obvious in the case of the Sun. This virtue refers to the supreme Self or supreme Consciousness that is self-illuminated and self-effulgent.

Sun God or Surya appears first in the Rig Veda, 1/50. He is one of the chief Gods that sustain life. He is closely related to the Fire God; the Sun is a visible manifestation of the fire element. The sun is regarded as the 'eye' of the Viraat Purush, and at the time of creation when this Viraat Purush revealed himself as the individual creature such as for example a cow, a horse and a man, the Sun God took up residence in the eye (refer Aitereyo-panishad of Rig Veda, Canto 1, verse no. 4, and Canto 2, verse nos. 3-4). He is also regarded as visible manifestation of the supreme transcendental Brahm (refer Brihad Aranyaka Upanishad, 2/1/2; 2/5/5; 3/7/9). The Sun God watched the deeds done by all the creatures (Rig Veda, 1/50/2). The Sun is like the Atma of all the creatures (Akchu Upanishad, Canto 1, verse no. 1; Rig Veda, 1/115/1; Shatpath Brahman, 14/3/2/9).

The Sun is the brightest, the most splendourous, the brilliantly radiant, the most majestic and grandest entity in the entire firmament. The whole length and breadth of the sky is lit with its light; all the objects present in the sky, visible or invisible, are illuminated by its light. It is the eternal and infinite celestial source of light, heat and energy; it inspires, fosters, sustains and protects life in this world; it is synonymous with and a metaphor for life in all its dimensions. Its splendour and radiance makes it an apt metaphor for knowledge, wisdom, erudition, sagacity and enlightenment. As an embodiment of this virtue of knowledge, wisdom, erudition and sagacity he has been held in high esteem and as the great teacher and preacher of eclectic knowledge pertaining to the philosophy expounded by the Upanishads. He had assumed the form of a horse and revealed the Shukla Yajur Veda to the great sage Yagyavalkya. He was also the teacher of Hanuman, said to be incarnate Wind God and Lord Shiva, and who was the great, most ardent and the wisest devotee of Lord Ram.

From the physical perspective also, the Sun is regarded as a fount of light, energy and heat which supports life in all forms in this physical world. No life is imaginable without the presence of the Sun.

The Sun is the source of light, heat and energy for this earth. The Sun regulates seasons and rains, it controls the cycle of day and night, thereby regulating all aspects of life on earth. It is a symbolic personified and visible form of Brahm, the sublime form of the Supreme Being also known as the Viraat Purush, the vast and infinite macrocosmic form of Brahm. No life is imaginable without the Sun. Therefore, it is Pran personified. The Moon is lighted because of the Sun; the Moon has no light of its own but shines due the light of the Sun falling upon it. Therefore, the Moon showcases the magical power of the Sun to light up even distant bodies which have no light of their own. In other words, this Pran element represented by the Sun is capable of injecting life in an entity which has no life of its own, here the instance of the Moon. Since the Moon is lighted due to the inspiration provided by the Sun, it is like the Rayi. The Sun is the inspirer, and the Moon is the inspired one.

The Sun is an excellent example of the gross and the subtle aspects of Brahm. The eternal fire that is burning inside the disc of the Sun is the subtle aspect of Brahm; it provides the power and energy to the Sun to shine and burn. This fire is the 'inspirer' of the gross aspect of Brahm. The disc of the Sun is the 'inspired'—the heat, light and energy that the physical body of the Sun gives is due to the fire burning inside it, but no one can see this fire. The viewer sees the disc of the luminous Sun only which is the inspired aspect of the Sun. The hidden fire in the Sun is the Pran of the Sun because it lends the latter its worth and power to shine. This 'Pran' of the Sun, i.e. the fire burning inside the Sun is Brahm manifested in its subtle form. The visible disc of the Sun, with its dazzling brilliance and splendour, giving out heat, light and energy is the manifested aspect of Pran or Brahm; it is the gross body of Pran or Brahm. Hence, it is the Rayi of the Sun.

But the fire burning inside the Sun is not the complete picture of Brahm which is a transcendental entity that surpasses all definitions. At the most, the fire represents only one of the numerous virtues of Brahm. Therefore, to say that the hidden fire inside the Sun is Brahm personified in a subtle form is only a 'part or fraction' of the entire truth. In fact, the fire is a 'subtle image' of Brahm just like the external luminous disc of the Sun is the 'gross image' of Brahm. The fire embodies some of the grand virtues and characteristics of Brahm. The fire is the 'inspired' aspect of Brahm, and hence it is the 'Rayi' of Brahm because it is inspired by Brahm to burn and give out light and heat. In the context of the Sun, this fire becomes the 'inspirer' and the Sun becomes the 'inspired'. The Sun being a visible manifestation of the stupendous glories of Brahm is therefore the 'inspired' aspect of Brahm. The 'inspirer' Brahm is invisible. So when one worships the Sun as a manifestation of Brahm, he does so both in its subtle ('Amurta') and gross ('Murta') forms as mentioned in this verse. When the gross is worshipped, the subtle is automatically deemed to be worshipped. They both represent the 'inspired' aspect of the sublime

Brahm that transcends both the gross and the subtle. Brahm is the universal ‘inspirer’ of both.

The Sun is at the core of life on earth; it helps in producing food crops of all varieties such as cereals, pulses, vegetables etc. that are eaten by the living being to survive and gain energy and strength. Without the light, energy and heat of the Sun there would be no vegetation on earth. Hence, the Sun is the ‘inspirer’ and the ‘food’ that is produced by the grace of the Sun is the inspired. When the food is eaten it gives the creature energy, strength and vitality. Therefore, that secret and invisible aspect of food that is used by the creature to derive energy, strength and vitality is the Pran of the food, while its external form, its external body is the gross aspect of this Pran. When this food is eaten and digested by the eater, the Pran is transferred to the eater in the form of the latter’s own Pran, and the strength, energetic activity and vitality that the body of the eater shows is the inspired aspect of this Pran. The food therefore is the Pran, and the eater is the Rayi.

All the units of Nature that depend upon some Principal, such as the Moon depending for its light on the Sun, are called Rayi. These units may be visible (having a gross form) or invisible (having a subtle form).

The Surya Mandal, i.e. the divine abode of the Sun God, has been narrated in the Vishnu Puran, section 2, canto 10, verse nos. 1-23. It is also referred to in the Tripadvibhut Upanishad of the Atharva Veda, Canto 5, paragraph no. 15 as falling in the path of a spiritual aspirant who, upon leaving his gross body, is going astride the Garud (the divine vehicle of Vishnu which is represented by the OM Mantra here) through the path of the sky to the heaven where Lord Vishnu lives.

Atharva Veda’s *Pashupata Brahm Upanishad*, Canto 1, verse no. 28 describes why Aditya or the Sun God is worshipped by wise men. “Aditya (the Sun) illuminates the world (i.e. it provides the world its light, life, energy, heat and dynamism). This is why Aditya is worshipped and honoured by wise and erudite persons who seek purity and knowledge.

The Sun gives ‘light’ and removes ‘darkness’. In other words, it grants knowledge and wisdom by removing the darkness of delusions and ignorance. Since the celestial Sun is employed as a metaphor for Brahm and the Atma, it follows that one meditates and contemplates upon the latter two entities to attain true spiritual knowledge and enlightenment that would remove one’s darkness caused by worldly delusions, and which is the cause of all his fears and perplexities. (28).”

According to Yoga Upanishads, the Sun God has his symbolic presence in the naval of the body in the Nabhi Chakra or the Manipur Chakra, and as the fire element in the Mooladhar Chakra, the Swadhisthan Chakra and the Kundalini. The dynamic energy of the sun represented by its life-giving powers is revealed in the form of consciousness that flows in the Pingla Naadi, the nerve passing through the right nostril.

The *Akchu Upanishad* of the Krishna Yajur Veda tradition lists some of the virtues of the Sun God in its Canto 1, verse no. 1 which is exclusively dedicated to his grand virtues as follows—he provides the creature with the ability to see; he lights up the world for him; he provides the creation with its life and sustains it; he moves across the sky with his army of light rays to protect the world from darkness; he personifies the three basic Gunas of Sata, Raja and Tama much like Brahm; he takes the creature away from darkness representing delusions and ignorance towards light symbolising wisdom, knowledge, erudition and enlightenment; he is like the Swan—pure and immaculate; he is the bearer of life; he is the Jatveda (one having whatever is born or created as his property; the all-possessor; one who knows everything and is known by all creation; the word is usually applied as an epithet for the eternal fire element of which the sun is a visible manifestation and container); he is as intrinsically valuable as molten and purified gold; he is Tapa (austerity, penance, sufferance for a noble cause) personified; he is the emperor of creation and is crowned with a

glittering crown and wears an equally glittering robe consisting of rays of the sunlight; he is the son of Aditi, the mother of Gods, and he lives as 'sight' in our eyes.

Aditya or the Sun God, or his visible form as the celestial Sun, has been repeatedly regarded by the Upanishads as a visible *manifestation of the Viraat Purush* who himself is the macrocosmic gross body of Brahm. For example, Sam Veda's Chandogya Upanishad—1/6/3, 5, 6; 1/10/7; 2/9; 2/14; 2/24/12-14; 3/1-11; 3/18; 5/13; 6/4/2 etc.; Shukla Yajur Veda's Brihad Aranyak Upanishad—2/1/2; 2/5/5; 3/7/9; 3/9/5; 5/15; Krishna Yajur Veda's Brahmo-panishad, verse no. 1; Taittiriya Upanishad, Valli 1, Anuvaak 5, verse no. 2.

He is the *eye* of the Supreme Being—refer Aiteriyo-panishad of Rig Veda, Canto 1, verse no. 4, and finds his abode in the creature's eye—refer Aiteriyo-panishad, Canto 2, verse no. 4.

The *Prashna Upanishad* of Atharva Veda, Canto 1, verse nos. 4-6, 8 describes the Sun God as the *Pran*—the vital life giving factor in creation, the life consciousness, and in Canto 1, verse nos. 9, 12-15 as *Prajapti*—the creator, motivator, nourisher, sustainer, protector and caretaker of the subjects of this creation. He is called the Fire God or the Vaishwanar Agni, the Viraat Purush, the Pran or life consciousness that supports all life in this world—Canto 1, verse no. 7.

The *Akchu Upanishad* of the Krishna Yajur Veda tradition is fully dedicated to the Sun God. It has two parts—in its Canto 1 sage Sankriti offers prayers to the Sun God, and Canto 2 contains the metaphysical and spiritual teachings of the Sun God for the benefit of the sage.

The *Taittiriya Upanishad* of the Krishna Yajur Veda tradition, in its Valli 1, Anuvaak 1, verse no. 1, says that the Sun God is known as 'Mitra', literally meaning a friend. This is because the Sun God's benevolence and life-sustaining abilities make him a fast friend of every single living being in creation. He fosters life and is a friend of life rather than being its enemy by annihilating it. He helps the world to develop and grow as well as to acquire its stupendous magnificence and glory—refer *Taittiriya Upanishad*, Valli 1, Anuvaak 5, verse no. 2.

He is also known as 'Savita'—refer *Savitru-panishad* of Sam Veda tradition, and *Shwetashwatar Upanishad*, Canto 2 of Krishna Yajur Veda tradition.

The *Narayan Upanishad* of Krishna Yajur Veda, in its verse no. 1 says that he was born from Lord Narayan, i.e. Lord Vishnu. The same thing is asserted in *Brahmo-panishad* of Krishna Yajur Veda, verse no. 1 which states that Aditya, the Sun God, is a manifestation of Lord Vishnu. But this is understandable because Vishnu and the Viraat Purush is the same Lord having different names according to the degree of subtlety and the scriptural text one is referring to; both are synonymously used. Whereas the Viraat Purush was the macrocosmic gross body of the supreme transcendental Brahm that appeared in the first stage of creation when Brahm decided to initiate it, he was called Vishnu at a little later stage when the visible creation was just about to be initiated, because it is from Vishnu that Brahma the creator was born who later gave shape to the creation itself.

The *Ram Uttar Tapini Upanishad* of the Atharva Veda, Canto 5, verse no. 4/27 says that Surya or the Sun God is a manifestation of Lord Ram who himself is the supreme transcendental Brahm personified.

The Sun God is one of the ten Lokpals or custodians of the world because all forms of life on earth revolve around the benevolence of the Sun.

'Aditya' or the Sun God appears in the Vedas as follows—Rig Veda-- 1/41/4-6; 2/27; 8/47/14-18; 10/185; Sam Veda—395; 397; Yajur Veda—23/5; 34/54; Atharva Veda—5/3/9-10; 16/3.

The *Tripura Tapini Upanishad* of the Atharva Veda tradition, Canto 4, paragraph no. 11 describes the great Mantra of the Sun God.]

5. The supreme source of light that empowers ‘light’ itself to shine and illuminate its surroundings is said to be obviously beyond the reach and purview of ‘Tama’ (darkness). [This is natural because darkness and illumination cannot cohabit or co-exist.]

This supreme source of light and illumination, called the ‘Param Jyoti’, shines above and over everything in creation. It is the light that shines from the above to illuminate everything below. This Param Jyoti (i.e. the Tripaad Brahm) is the base that supports all things in existence, it is the foundation upon which the entire edifice of creation, visible and invisible, rests, it is beyond the scope of the mind and its imaginative powers to visualise and understand it, and it is like the self-illuminated and splendid celestial Sun that illuminates the world below from its exalted position in the sky.

That ‘Tattva’ (principle, essence)—which is one, immutable and non-dual, which is ‘Avyakta’ or un-manifest and indescribable, which is ‘Anant’ or without an end, which is revealed in the form of the world or itself is a combined image of the whole world, and which is ‘Adi’ or the most ancient as it is present since the very beginning—is called ‘Rit’. [The word ‘Rit’ literally means holiness marked by the virtues of truth and righteousness, and it refers to an entity that personifies these glorious virtues. Here ‘Rit’ stands for the Tripaad Brahm which is also known as the Param Jyoti.]

It is this Tattva and Param Jyoti that is designated as ‘Satya’, the Absolute Truth.

Indeed, it is this divine and holy entity that is known as the supreme, transcendental and the purest form of Brahm.

In the aforesaid discussion, the word ‘Tamas’ refers to Avidya or lack of true knowledge (because such a situation is akin to darkness which means ‘Tama’) (5).

6. [This paragraph clearly delineates the four Paads of Brahm. Refer also to Canto 1, paragraph no. 5, and Canto 8, paragraph nos. 4-7.]

All the Bhuts (living creation) combined represent only one Paad (limb, aspect, version, form and manifestation) of the supreme Brahm.

The other remaining three Paads of Brahm are like Amrit; they are equivalent to the ambrosia of truthfulness, eternity and imperishability, the elixir of bliss, beatitude and felicity. [That is, the Tripaad Brahm, the transcendental aspect of Brahm that is much more subtle, sublime and exalted than the one represented by the Bhuts with their limiting and binding effects and comparative grossness, is so divine and holy, so rejuvenating and invigorating spiritually that it is equivalent to Amrit, the ambrosia that is nectar-like and gives eternal peace and bliss to the spiritual aspirant who accesses it. The ‘Bhuts’ refer to the five primary elements of creation from which the creation, both the visible as well as the invisible, has come into being. The creation referred to as Bhut is mortal and transient, and therefore it is not true, it is not eternal, and it is not constant. Hence it is also not the truthful form of Brahm as the latter is eternal, truthful and constant. The world or creation covered under the category of the 4th Paad of Brahm has been described in Canto 3, paragraph nos. 7-16. This is obviously so because all the entities mentioned there are perishable and come to an end—Brahma, Maha Vishnu, Adi-Viraat and Adi-Narayan all come to an end. The Mool Avidya and Avyakta would also come to an end. What remains at the end of the sequence is ‘Brahm’, the ‘Tattva’. This aspect of creation is the 4th Paad of Brahm because of the simple reason that it has a beginning, a known and fixed life-span, and an end. As opposed to this situation, Brahm is supposed to be endless and

without any beginning as it is infinite, imperishable and eternal. But the point to take into consideration at this juncture is the fact that everything in existence is a manifestation of Brahm, that there is nothing in existence that is not Brahm. Therefore, it is logical to say that even this gross and most lowly Paad or aspect of Brahm is also a part of it; the 4th Paad of Brahm is not separate from Brahm.]

The Brahm that is represented by the other three divine Paads, known as the Tripaad Brahm, is established in the 'Param Vyom', the supreme Sky or the higher Heaven. [(i) The word 'Vyom' means the sky, and so it refers to the subtle sky where the supreme Brahm resides. (ii) The three Paads referred to are the 'Satya' or the truthful aspect of Brahm. This aspect of Brahm is regarded as also being equivalent to 'Amrit', the ambrosia of eternity and bliss of the highest degree. (Refer paragraph no. 3 of the present Canto no. 4.) It is also like the fount of 'light'. (Refer paragraph nos. 4-5 of the present Canto no. 4.) It is a combination of 'Vidya' or true knowledge, 'Anand' or bliss and happiness, 'Turiya' which is the transcendental state of consciousness, and 'Turiyateet' state which is the higher state of Turiya. (Refer paragraph no. 5 of Canto 1.) These three Paads of Brahm are collectively recognised as being 'Sat-Chit-Anand'—truth, consciousness and bliss. It is not gross like the 4th Paad, but extremely subtle, sublime and divine. But when 'Brahm' is invoked in a wholesome manner, all the four Paads are to be taken into consideration. Otherwise it would present a deformed and fractured view of Brahm.]

The Supreme Being known as Brahm who is recognised as having the three divine Paads (referring to the qualities of Vidya, Anand and Turiya; the virtues of Satya, Amrit and Jyoti) is established high above and shines from there to illuminate the rest of the world (much like the celestial Sun that shines in the heaven to illuminate the entire solar system). The remaining one Paad of Brahm (i.e. the one aspect of Brahm that is represented by the Bhuts) has revealed itself as the lower world where all the creatures live.

When this lower world having two dimensions, the movable and the immovable, came into being, the Supreme Being secretly entered it as the all-pervading consciousness. [That is, once the lower world moulded from the Bhuts, or primary elements such as sky, air, fire, water and earth, came into being, the primary source of life known as 'Brahm' entered into it as the vital spark of life called 'consciousness'. It was like giving the gross organ of sight, the eye, the ability to see. Just like the eye without its ability to see is as good as dead, the world consisting of Bhuts without this vital factor of 'consciousness' is as good as dead. Anything 'dead' is worthless, useless and decay-able. That is why when this consciousness leaves the gross body of the creature, the body begins to decay rapidly at the time of death. Since this world is subject to change, decay, death and final end, it cannot be a true form of Brahm which is an eternal entity that remains unchanging, that is steady and is imperishable. Hence, this mortal world consisting of perishable gross bodies and its inherent transient nature is not the real thing, and to treat it as the truthful Brahm is indeed fallacious and highly erroneous. But then, why is this world usually regarded as 'true'? Well, the answer is it is due to the fact that this aspect of creation has been created by the fourth Paad of Brahm in which the primary ingredients are Avidya and Maya. What more can one expect from something having its genesis in ignorance and delusions? Refer Canto 1, paragraph 5; Canto 3, paragraph 1-7; Canto 4, paragraph 3.]

Indeed, the three Paads characterised by the auspicious and grand virtues of Vidya, Anand and Turiya are eternal, truthful and imperishable, while the remainder fourth Paad consisting of Avidya is mortal, cause of miseries and is perishable (6).

7. [The disciple asked—] ‘What is the ‘Unmesh’¹ and ‘Nimesh’² of the Atma-Ram Adi-Narayan³?’

[Note—¹The word ‘Unmesh’ means opening of the eyes or blooming of flowers. Here it would mean the conception, the birth or appearance, and the evolution, development and growth of creation. It also refers to the waking state of consciousness in which the mind perceives the outside world through the organs of perception such as the eye, nose, ear, tongue and skin. Therefore ‘Unmesh’ would mean to be conscious of the outside material world of sense objects, and to be involved in it and influenced by it. Refer next paragraph no. 8. Refer also Canto 5, paragraph no. 2.

²The word ‘Nimesh’ is the opposite of Unmesh and therefore means closing of the eyes or withering and falling of the flower. Here it would imply the conclusion of creation till the time the next phase of creation comes. It also refers to the sleeping state of consciousness when the external world is shut off for all practical purposes. It is when the creature becomes contemplative and inward looking, when he is focussed on his Atma, his pure self, rather than the outside world and the gross body. Refer next paragraph no. 8.

³The word ‘Atma’ means the pure consciousness that is the soul and essential life giving and sustaining factor in the body of the creature at the individual level and of the world at large at the composite level of creation. The word ‘Ram’ refers to the Supreme Being, the one who provides liberation, deliverance, emancipation and salvation to the creature as well as the world in which this creature lives. That is why the Beej Mantra or the root letter ‘Ra’ of the word Ram is regarded as the one which provides a creature with Mukti and Moksha. Obviously, this ‘Ram’ is the supreme Brahm who resides in the subtle heart of all as their Atma. Hence, the term ‘Atma-Ram’ refers to Brahm, the cosmic Consciousness that resides in the creature’s heart as his Atma, his soul.

And who is this ‘Atma-Ram then? The answer is ‘Adi-Narayan’. Therefore, the Adi-Narayan is Ram or the supreme divinity known as Brahm who bestows Mukti and Moksha; this divine Being lives in the heart of all living beings as their Atma. The prefix ‘Adi’ refers to the fact that the divine Being referred to here is not the one who is usually referred to as Viraat Purush or Vishnu, or even Hiranyagarbha or Brahma, but the Supreme Being who preceded them. It is from the Adi-Narayan that the other Gods came into being; the Adi-Narayan is their parent. When the time comes for the conclusion of creation these above-named divine entities retract and withdraw themselves into their primary forms in the reverse order of progression of creation as clearly outlined in Canto 3, paragraph nos. 7-16.]

8. The teacher explained—‘To be conscious of the external world, to perceive the outside world of gross material objects by being extrovert and employing the gross organs of perception in the body, is called ‘Unmesh’. It is compared to the opening of the physical gross organ of sight known as the eyes so that one can actually see and observe the presence of the gross physical world.

On the other hand, the sight that is inwardly focussed, that does not need the opening of the physical organ of sight known as the eye to see anything, the in-depth and penetrating inner-vision that comes from wisdom, erudition and enlightenment, the vision that has its origin in the ‘inside’ world illuminated by the consciousness and wisdom residing in the subtle aspect of the body of the creature such as the heart and the mind respectively rather than in the ‘outside’ gross world which is seen by the gross body and which is artificially lighted—this ‘sight’ is called ‘Nimesh’. It is akin to closing of the eyes when one sleeps, because the physical sight is shut off.

To contemplate and meditate upon one’s true ‘self’, to be introspective, to research and discover the truth about one’s own ‘self’ known as the Atma by

meditating and focusing the mind and intellect inwards, to completely eliminate the thoughts and perception of the external gross world, to be introvert—it is equivalent to closing the gross organ of sight in the body known as the eye. It is called ‘Nimesh’ in the spiritual parlance—i.e. the closing of the physical organ of the eye, and instead opening the inner eye of wisdom and enlightenment that leads one to ‘self-realisation’ and seeing the inner world of the pure consciousness.

On the other hand, to search about one’s identity and roots in the gross external existence, by attempting to know about one’s bearing, about who one truly is in relation to his surroundings in this mortal and gross world by examining the perceptions received from the outside world and then becoming aware of one’s bearing and identity based on what is perceived, is akin to seeing anything by the medium of the gross organ of sight known as the eye. This is called ‘Unmesh’ in spiritual parlance—it is seeing or observing anything to establish its existence or becoming aware of it by keeping the eyes open. Since the perception of the things of the world are done by the gross organs of perception, which in this case is looking at things of the world with the physical eyes of the gross body in order to see them and becoming aware of their existence, the way one identifies oneself and relates himself with the surroundings in view of what he sees is bound to be influenced or affected by the medium used for this perception. Since the medium is gross—i.e. since all the physical organs of the body, including the ‘eye’, by which the creature perceives the external world are gross—it automatically follows that the result would be also proportionately distorted and they would present a picture that is not the real thing.

[Hence, one gets deluded and misled. So, inspite of seeing everything clearly he has not seen anything at all. At the most he has seen only the outside features, the external façade, and believes them to be the reality. But the gross organs of perception of the body, such as the eye in the present case, do not have the ability to penetrate even the thin veil of the cloth that surrounds the body, so how can they peep behind and know what this cloth covers or wraps? The physical organ of the eye does not have the ability to see what lies behind the gross exterior façade of the creature’s body, for it is so weak in its penetrating powers that it can’t even see behind his clothes, what to speak of its ability to penetrate the skin, bones, flesh and marrow? In other words, in the metaphysical and spiritual field, a person has only seen and become aware of the exterior face of creation if he does not have the inner eye of wisdom and enlightenment open to see the truth; he has not seen the truth that is hidden behind this external façade. Hence, inspite of technically being ‘awake’ he is actually ‘asleep’, as he is deluded into believing something that is basically untrue as being true.]

The duration of the Unmesh is equivalent to the duration of the Nimesh.

[This is taken from the physical perspective of the world. The physical ‘day’ is divided equally into two halves—the ‘day-time’ which is equivalent to Unmesh because a man is awake then, there is sunlight and he can see everything clearly, and the ‘night-time’ which is equivalent to Nimesh because a man closes his eyes to sleep and there is an all-engulfing darkness which does not allow him to see the external world. The fact that the waking time and the sleeping time—the day and the night—are approximately equal is further highlighted in Canto 3, paragraph nos. 7-15 which detail how the day and the night of Brahma, Vishnu etc. are measured in the cosmic term of this measurement.

But if one were to take a broader view of creation from the metaphysical and spiritual perspective, the Unmesh would be the physical world that comes into existence when the mind thinks about it, and the Nimesh would be its dissolution

when the same mind stops to think of it. This also corresponds to the waking and the sleeping patterns of the physical world as described above. It also implies that one half of a man's life is spent in taking care of his world, and the other half is expected to be spent by him in taking care of his own spiritual welfare.] (8).

9. [This paragraph explains why the dual concept of there being a Jiva or a living being and an Ishwar or the Lord arises. It would be followed up in paragraph nos. 11-13 subsequently.]

During the period of Unmesh (i.e. when the external world is perceived employing the gross organs of perception in the gross body) the Avidya (lack of true knowledge; ignorance of the reality and truth) is the dominant feature. [From the spiritual perspective, the gross world that is seen to exist and the gross body which the creature thinks as his 'self' is out of total ignorance and false notions.]

On the contrary, during the Nimesh period this Avidya is totally dispensed with. [That is, when one turns inwards and contemplates upon the 'truth' of existence by shutting off all sources of delusions that are created by the outside world, it is akin to shutting-off of all ignorance. Then what is observed is free from being tainted by Avidya.]

As soon as Unmesh resurfaces (i.e. as soon as one opens the eye, or as soon as one begins to perceive the existence of the gross external world and starts to relate himself with it, or soon as he becomes extrovert), the factor of Avidya (lack of knowledge of the truth that has its genesis in ignorance) also stages a come-back because it is propelled to the front by the very subtle and hidden Vasnas that are present in the creature. [These Vasanas are his natural passions and desires to enjoy the material comforts and pleasures of the world and its sense objects, to gratify the body and its sense organs. They drive the creature towards the world of artificiality or the world of Avidya, and away from the Truth represented by the world of Vidya.]

As soon as this happens, all the accompanying paraphernalia of Avidya make a colourful and forceful resurgence. With this development there arises the concept of duality as a natural corollary, as a natural follow-up, and as a natural consequence. [That is, once one allows himself to be trapped by Avidya, the latter catches hold of the prey with a vengeance and viciously hold him in its vice-like grip. The creature becomes overwhelmed by delusions that propel him towards believing as true what is essentially untrue.]

Because of the mischief created by Avidya, or because of the lack of knowledge of the reality, there arises the concept of cause and its effect. The creature who is overcome with Avidya during the Unmesh phase of existence begins to see duality in the world—he begins to see or perceive a difference between the Jiva (the individual living creature) and the Ishwar (the Lord who appears to control this creature, who can punish and give reward, and to whom the creature offers his respects and worship)¹.

The Ishwar is designated as being the cause of this creation, and the Jiva is the effect. The existence of this creation with all its units, including the living creature, is attributed to the Ishwar (the Supreme Being; the Brahm; the Adi-Narayan). The product that reveals the dynamism of this Ishwar, the effect of what Ishwar wished to do, is in the form of the Jiva², the living being (9).

[Note—¹Since 'Avidya' is the dominant factor when one begins to relate himself with the gross world, he is bound to be influenced by it. Thus, he begins to see everything through the mirror of Avidya—the state of lack of truthful knowledge

which is driven by ignorance and delusions. Thus he begins to hallucinate. He begins to think or imagine that the moving entity known as the Jiva, the living being with a gross body that shows activity as if it is self-empowered, is a truthful entity. He is convinced of it because he can actually see this Jiva and its physical deeds. But then he also observes that this Jiva is not totally independent because he is punished for his sins or misdeeds and rewarded for his good deeds. Therefore the seer or observer concludes that there must be a superior Authority that controls the Jiva, who punishes him or rewards him according to the theory of cause and effect. He names this Authority as 'Ishwar'—the Lord—who oversees this world, who sits in judgement. Obviously, a distinction becomes evident between the controller and the controlled, the Ishwar and the Jiva. This fallacious notion that the Jiva and Ishwar are two separate and distinct entities is the root cause of the concept of 'duality' or Dwaitya. Actually there is no such thing as is repeatedly stressed in this and other Upanishads. This is because it is the same Consciousness that exists at the two planes of existence known as the Jiva at the micro level of creation, and as the Ishwar (also known by various names as Brahm, Narayan etc.) at the macro level.

²This is because Ishwar, in his primary form, has no physical gross body and does no physical deed. Ishwar is the invisible and eternal Brahm that is the cosmic Consciousness personified. But the physical form of this Ishwar is in the shape of a Jiva, a living being. This Jiva has a gross body, it does so many things and generally carries out the wishes of the Ishwar as the latter's representative. The primary Authority that has resulted in the creation of an entity known as a Jiva is Ishwar, and since the Jiva is vested with all the dynamism and powers possessed by Ishwar himself, since Jiva is a personified form of Ishwar as the latter's true representative, it follows that basically and principally there is no difference between them. To take a worldly example, the representative of a monarch is equivalent to the monarch himself. The representative's insult is insult of the principal, the monarch. Whatever the representative says or does is deemed to be done by his principal, the monarch. Likewise, the Jiva is Ishwar himself personified. But even as the monarch has the right to withdraw his delegated authorities and powers, the Ishwar too can retract himself and this causes the death or end of the creature. That is why as long as this Ishwar lives in the Jiva as the Atma-Ram, the pure 'consciousness', the Jiva is alive and conscious and represents the Ishwar, and as soon as this consciousness leaves the gross body, the Jiva dies. Extending this argument further we can deduce that as long as the Jiva shows auspicious and noble virtues so characteristic and unique to Brahm, the former is like the latter. And soon as this stops happening the Jiva becomes separated from Brahm.

A Jiva/Jivatma (a living being; a creature)—*Who is a Jiva* (a living being) has been explained in the following Upanishads—(i) Atharva Veda's Pashupata Brahm Upanishad, Canto 1, verse no. 12; Naradparivrajak Upanishad, Canto 6, verse no. 3; Tripadvibhut Maha-Narayan Upanishad, Canto 4, paragraph no. 9, 11-13. (ii) Krishna Yajur Veda's Saraswati Upanishad, verse nos. 47-48; Rudra Hridaya Upanishad, verse nos. 41-45; Shaarirako-panishad, verse no. 15; Skand Upanishad, verse nos. 6-7. (iii) Shukla Yajur Veda's Paingal Upanishad, Canto 1, verse no. 12, and the whole of Canto 2.

The *relation between a Jiva and Brahm/Ishwar/Parmatma* has been explained in the following Upanishads—(i) Atharva Veda's Narad Parivrajak Upanishad, Canto 6, verse no. 4 (difference between Jiva and Parmatma); Canto 9, verse no. 10 (difference between Jiva and Prakriti); Tripadvibhut Maha-Narayan Upanishad, Canto 4, paragraph no. 9, 11-13. (ii) Krishna Yajur Veda's Rudra Hridaya Upanishad, verse nos. 41-45; Skanda Upanishad, verse no. 5; Varaaha Upanishad, Canto 2, verse nos. 52-53, 70, 73. (iii) Shukla Yajur Veda's Paingal Upanishad, Canto 1, verse no. 12, and the whole of Canto 2 (subject of Jiva vis-à-vis Brahm).

The reason *why the Jiva remains trapped in this world* has been elaborately explained in Tripadvibhut Maha-Narayan Upanishad, Canto 4, paragraph nos. 9, 11-

13; and Canto 5, paragraph nos. 3-8. How to find liberation from this world has been explained in the present Upanishad's Canto 5, paragraph nos. 9-13.

The concept of *Jiva and Jiva-Atma* has been beautifully brought out in Shaarirakopanishad of Krishna Yajur Veda tradition in its verse no. 15.

Why a Jiva takes a new birth has been answered in—(i) Krishna Yajur Veda's Varaaha Upanishad, Canto 2, verse no. 71, Canto 4, verse no. 40; Yogshikha Upanishad, Canto 1, verse no. 31; Canto 3, verse no. 24; Shwetashwatar Upanishad, 5/10-12. (ii) Shukla Yajur Veda's Brihad Aranyak Upanishad, Canto 4, Brahman 3, verse nos. 12, 33; Canto 4, Brahman 4, verse nos. 4-14; Canto 6, Brahman 1, verse no. 1-6. (iii) Atharva Veda's Tripadvibhut Maha-Narayan Upanishad, Canto 4, paragraph nos. 10-13, and Canto 5, paragraph nos. 3-13; Naradparivrajak Upanishad, Canto 5, verse no. 23; Mundak Upanishad, Mundak (Canto) 3, section 2, verse no. 1; Mundak 3, section 2, verse no. 2; Mundak 3, section 1, verse no. 10; Prashna Upanishad, Canto 1, verse no. 9-10, 13-16; Canto 3, verse no. 7, 9-10.

Relation between a *Jiva and Prakriti (Nature)* has been explained in (i) Atharva Veda's Narad Parivrajak Upanishad, Canto 9, verse no. 10.

Difference between *Jivatma and Parmatma*—(i) Atharva Veda's Narad Parivrajak Upanishad, Canto 6, verse no. 4; Tripadvibhut Maha Narayan Upanishad, Canto 4, paragraph nos. 9, 11-13.]

10. The Maha Maya—or the dynamic powers of Ishwar (Brahm, the Supreme Being) that create delusions of stupendous proportions—is under the control and supervision of the Lord. The Maha Maya is obedient to its Lord, the Ishwar. [In fact, the Supreme Being is called 'Ishwar' because he is the 'Lord of all', including the Maya.]

The Maha Maya works in accordance to the wishes and desires of the Lord. It resolutely carries out what the Lord determines to do. The Maha Maya is eternally empowered by all the majestic and mystical powers and undiluted authority so that it can carry out the Lord's wishes endlessly without interruption.

This Maha Maya is the great progenitor of other forms of endless Mayas which together create a web of delusions.

This Maha Maya is regarded as the magical body that Lord Vishnu (one of the divine forms of Ishwar) assumes when the Lord wishes to do so and play around in a sporty manner. [That is why the various magical feats done by different incarnations of Vishnu are regarded as the Lord's Maha Maya doing them. It is the delusory effect of the Maha Maya that the world believes that Vishnu has taken the form of a human etc. and done this and done that. Actually it is the Lord's Maya that does it for him.]

The Maha Maya is so un-imaginably great in its reach and import, so mysterious and powerful that even the world's creator known as Brahma (who is so wise that he created the Vedas, the repository of all knowledge and wisdom) cannot understand and fathom it.

Those who worship Lord Vishnu and are devoted to him are able to overcome the effects of Maha Maya and easily cross it. [That is, Maha Maya is not able to cast its delusory net on them.]

On the other hand, those who do not have any devotion for Lord Vishnu cannot overcome this great Maha Maya in spite of their best of efforts (10).

11. They (i.e. such people who do not honour Lord Vishnu and therefore are affected by Maya) continue to be trapped in the cycle of birth and re-birth repeatedly for an endless time, being impelled and motivated by the various components of the Antahakarans (the 'inner self' and its various Vasanas and Vrittis—the various natural inclinations, desires, yearnings, passions tendencies and habits etc. of a creature that traps him in the vicious cycle of birth and death and re-birth)¹.

This Antahakaran is the field of activity of Avidya. [That is, when true knowledge is lacking, the accompanying ignorance and related delusions directly affect the inner being of the creature, and through it, his whole thought process, temperament and life. It must be noted that mind and the intellect are important components of the Antahakaran, and it is the mind and the intellect that do the thinking and analysis for the creature. So when Avidya is the dominant player, its influence would be evident in all the spheres of life of the creature.]

At the same time it cannot be denied that the Antahakaran (the subtle inner-self) remains activated and empowered due to the presence of ‘consciousness’ inside the gross body of the creature. Since this ‘consciousness’ that keeps the creature alive and activates his Antahakaran is a reflection, an image, of the cosmic Consciousness which is synonymous with the divine entity known as Brahm, it follows that Brahm is the divine One who is reflected in the inner-self as well as the body of the creature. This ‘reflection’ or ‘image’ of the cosmic Consciousness is called the ‘Jiva’, the living being² (11).

[Note—¹*Anthakaran*—This is the subtle body of the creature consisting of four components such as the mind (Mana), the intellect (Buddhi), the faculty of reasoning, thought, discrimination, understanding and the ability to pay attention and focus the mind and intellect on any subject (Chitta), and the notion of ego, pride and vanity, and their attendant arrogance and haughtiness (Ahankar).

The word ‘Antahakaran’ literally means the ‘inner instrument’ of the creature by which his mind works and receives the world. The word has two components—viz. ‘Antaha’ meaning ‘inner’, and ‘Karan’ meaning ‘instrument that causes the mind to work’. The external organs of the body such as the eye, ear, nose, tongue and skin which are the organs of perception physically receive the inputs from the external world, but their actual functioning is due to this Antahakaran or the inner instrument of the subtle body consisting of the mind and intellect complex because if the latter malfunctions the former are useless.

Out the three states of existence of the creature, viz. the waking, the dreaming and the deep sleep states, the mind is active in the first two states only, and therefore the Antahakaran is related to only the first two states of existence. But even here its main field of activity is internal and not external as is implied in the word ‘Antaha’ itself which means ‘inner’. Therefore, the external organs of the body such as the organs of perception and action are only subsidiary and play an ancillary role only vis-à-vis the activity of the ‘inner self’ consisting of the mind, intellect and sub-conscious as well as the subtle heart which is the seat of various sentiments and emotions. This is simply because the inner self receives inputs from the outside world through the instrument of the external organs, and all the activity of the inner self in relation to the world in which the creature lives depend upon these external organs directly or indirectly.

The Antahakaran functions in four different ways and gets four different names according to these four functions. (1) It is called Chitta or sub-conscious mind and its ability to receive information and remember while performing the function of reception and retention. (2) It is called Mana or mind when it performs the function of questioning, doubting and willing. (3) It is called Buddhi or intellect when deducing, deciding and determining. And (4) it is called Ahankar or ego, self pride, arrogance of knowledge when it identifies itself with each of these functions—when it thinks that it has the ability to remember, to question and debate, to decide and will.

The word would therefore briefly mean the inner self of the creature consisting of the subtle body rather than the outer self consisting of the gross body. It is said to be one of the 19 Tattwas or essential elements that came into being at the very commencement of creation. According to the *Nrisingh Purvatapini Upanishad* of the Atharva Veda, Canto 4, verse no. 4, these 19 Tattwas are as follows—five organs of

perception (eye, ear, nose, tongue and skin) + five organs of action (hand, leg, mouth, excretory and genital) + five Prans or vital winds or airs (Pran, Apaana, Samaana, Udaana and Vyan) + four Antahakarans (Mana, Buddhi, Chitta and Ahankar) = nineteen.

Depending upon how one interprets the word 'Antahakaran', it is said to have one, two, four or five components.

The Antahakaran *one dimension or aspect* is called the Mana, but this Mana itself has two subtler aspects—viz. the mind and the heart because the notion of Mana as it affects the inner self of the creature revolves around the various tugs, pulls, pushes and prodding that the different hues of character traits such as emotions, sentiments, impulsiveness, spontaneity etc. exert on the creature. The word 'Mana' cannot be restricted to the dictionary version of the term as meaning only the mind, because the heart plays an equal important role in the entire setup. This fact has been elaborately described in Tejobindu Upanishad of Krishna Yajur Veda, Canto 5, verse nos. 101-102.

The Antahakaran with *four dimensions* is described in Shaarirako-panishad of Krishna Yajur Veda tradition, in its verse no. 4. These four dimensions are Mana (mind), Buddhi (intellect), Chitta (sub-conscious) and Ahankar or Abhiman (pride, ego, arrogance, haughtiness, hypocrisy, vanity, false self-importance etc.). Again it would be noted that the subtle component of the heart play a secret role in this setup because the ingredient of pride, ego, haughtiness and arrogance along with their sentimental and emotional quotient are very closely related with the heart.

The Naradparivrajak Upanishad of the Atharva Veda, in its Canto 5, verse no. 24 describes four Vrittis that affect a man's behaviour, thoughts, temperaments and deeds. These are also called the four Anthakarans.

The Antahakaran with *five dimensions or aspects* is described in Trishikhi Brahmin Upanishad, Canto 1, verse no. 6, and in Paingalo-panishad, Canto 1, verse no. 9, and in Canto 2, verse no. 3—both of the Shukla Yajur Veda tradition. The five components of Antahakaran are—(i) Mana (mind), (ii) Buddhi (intellect), (iii) Chitta (the faculty of concentration and memory; knowledge and consciousness), (iv) Ahankar (ego, pride, arrogance), and (v) Vrittis (inherent character, traits, habits, inclinations and temperaments of a creature) which decide the basic nature of a person and the way he would react to a given circumstance, the way he would deal, behave and interact with the world, the way he would interpret things, the way he thinks, the things that would appeal to him and the things he would abhor etc.—all depends upon the mental setup tinged with the fundamental character traits that are firmly ingrained in him.

Since the mind, intellect and the sub-conscious are involved in the definition of Antahakaran, it would follow that the following too would be included as the five components of Antahakaran—(i) Praman—knowledge that helps to establish the truth; (ii) Viparyaya—ignorance, delusions, illusions such as imagining a snake in a piece of rope; this is erroneous knowledge; (iii) Vikalp—alternatives; that knowledge which is acquired by hearing of it but may not present the correct picture, such as for example a wooden puppet—there seems an apparent difference between plain wood and the puppet, but they are basically the same and defined with the same word 'wood'; this knowledge is neither true nor false for to say that the puppet is different from an ordinary piece of wood because of its distinctive shape and value would be as much true as saying that it is plain wood; (iv) Nidra—meaning sleep; when a man remains oblivious of any truth just like anything gets hidden in darkness though it is very much there, that man is likened to a man sleeping soundly inspite of the goings on around him and therefore remaining unaware of them; and (v) Smriti—literally meaning memory; it refers to that knowledge which is based on experience and witnessing so that it is etched in memory; such knowledge becomes robust and gets soundly established in mind with the passage of time.

²The Srimad Bhagvat Mahapurāṇ, 4/9/6 describes this concept of a *Jiva being a reflection of the Supreme Brahm* as follows—‘My salutations to the Supreme Being who is almighty and all-powerful. The Lord has entered my heart, enlivens my vital Pran (breath), my limbs and my sense organs, and also empowers my faculty of speech—all of which would otherwise have remained dormant and ineffective.’

The question ‘who is a Jiva’ is most precisely answered in this Canto. A Jiva is a living entity in whose Antahakaran, his inner self, the Chaitanya, the eternal and universal Consciousness, is reflected. The Antahakaran consists of the Mana or mind, Chitta or sub-conscious, and Buddhi or intellect. Therefore, the Consciousness that keeps these units of the inner self empowered, enlivened and activated besides shining in them and imparting them with its own unique virtues which are divine, holy, glorious and sublime is what makes an ordinary living being into a Jiva. Hence, what distinguishes a Jiva from all other entities in creation is the presence of Consciousness with all its magnificent qualities in his inner self so much so that this inner self becomes an embodiment of Consciousness.

A creature who is wise, erudite and enlightened, who can distinguish between the right and the wrong, the correct and the incorrect, who has the power of discrimination so that he can analyse any given situation and decide what is good for him and what is degrading and ominous for his spiritual welfare, who is conscientious and ethical by nature and not under force of circumstances—in short, a creature who lives an exemplary life according to the laws of Dharma, a life of auspiciousness, righteousness and noble conduct and thoughts, who is wise enough to understand the reality about his own self as well as the world around him and know who is ‘true self’ is by grasping the essence of the teaching of the Upanishads and other scriptures has the right to be classified as a ‘Jiva’. The rest are all living beings but not Jiva in the true sense because they are no better than animals, insects, worms and other lower forms of life including the plants which too have life in this creation.

Since this Chaitanya is self-illuminated, glorious and radiantly splendid like the celestial Sun, it follows that the Jiva in whose Antahakaran this Chaitanya shines would be also be shining and radiant as the Chaitanya. For example, if we hold a polished mirror against the Sun, the image formed in the mirror would be equally blinding and splendid as the actual Sun in the sky. Therefore, such a Jiva would be self-realised and Brahm-realised. He would be effusing a holy glow of this Chaitanya around him just like the glow-worm which is radiant from its self-generated light.

From the angle of the more gross aspect of creation, we can understand this concept in a different way. A dead body from which the ‘consciousness’, or life and its evident signs of various perceptions and senses felt by the various organs, has left would not be called a Jiva or a ‘living being’. It would have no use of the components of the Antahakaran either. No amount of ‘Vidya’ or true knowledge can keep the subtle aspect of the creature’s existence such as the mind, the intellect and the sub-conscious on the one hand, and the gross body and its components such as the organs of perception and action on the other hand, activated once the ‘consciousness’ decides to leave the body. This ‘consciousness’ is therefore a personification of Brahm, the cosmic Consciousness, that is at the very foundation of life and existence in this creation. It is this cosmic Consciousness that is reflected as the Jiva or the living being. It has assumed a microscopic form to live inside the individual creature, enabling his Antahakaran to remain activated besides entitling the creature’s gross body to have ‘life’ so as to enable the creature to be called a Jiva, a ‘living being’.

Who is a *Jiva* (a living being) has been explained in the following Upanishads—

(i) Atharva Veda’s Pashupata Brahm Upanishad, Canto 1, verse no. 12; Naradparivrajak Upanishad, Canto 6, verse no. 3; Tripadvibhut Maha-Narayan Upanishad, Canto 4, paragraph no. 9, 11-12. (ii) Krishna Yajur Veda’s Saraswati Upanishad, verse nos. 47-48; Rudra Hridaya Upanishad, verse nos. 41-45;

Shaarirako-panishad, verse no. 15; Skand Upanishad, verse nos. 6-7. (iii) Shukla Yajur Veda's Paingal Upanishad, Canto 1, verse no. 12, and the whole of Canto 2.

The *relation between a Jiva and Brahm/Ishwar/Parmatma* has been explained in the following Upanishads—(i) Atharva Veda's Narad Parivrajak Upanishad, Canto 6, verse no. 4 (difference between Jiva and Parmatma); Canto 9, verse no. 10 (difference between Jiva and Prakriti); Tripadvibhut Maha-Narayan Upanishad, Canto 4, paragraph no. 11-13. (ii) Krishna Yajur Veda's Rudra Hridaya Upanishad, verse nos. 41-45; Skanda Upanishad, verse no. 5; Varaaha Upanishad, Canto 2, verse nos. 52-53, 70, 73. (iii) Shukla Yajur Veda's Paingal Upanishad, Canto 1, verse no. 12, and the whole of Canto 2 (subject of Jiva vis-à-vis Brahm).

The reason *why the Jiva remains trapped in this world* has been elaborately explained in this present Tripadvibhut Maha-Narayan Upanishad, Canto 4, paragraph nos. 11-13; and Canto 5, paragraph nos. 3-8. How to find liberation from this world has been explained in the present Upanishad's Canto 5, paragraph nos. 9-13.

The concept of *Jiva and Jiva-Atma* has been beautifully brought out in Shaarirako-panishad of Krishna Yajur Veda tradition in its verse no. 15.

Why a Jiva takes a new birth has been answered in—(i) Krishna Yajur Veda's Varaaha Upanishad, Canto 2, verse no. 71, Canto 4, verse no. 40; Yogshikha Upanishad, Canto 1, verse no. 31; Canto 3, verse no. 24; Shwetashwatar Upanishad, 5/10-12. (ii) Shukla Yajur Veda's Brihad Aranyak Upanishad, Canto 4, Brahman 3, verse nos. 12, 33; Canto 4, Brahman 4, verse nos. 4-14; Canto 6, Brahman 1, verse no. 1-6. (iii) Atharva Veda's Tripadvibhut Maha-Narayan Upanishad, Canto 4, paragraph nos. 10-13, and Canto 5, paragraph nos. 3-13; Naradparivrajak Upanishad, Canto 5, verse no. 23; Mundak Upanishad, Mundak (Canto) 3, section 2, verse no. 1; Mundak 3, section 2, verse no. 2; Mundak 3, section 1, verse no. 10; Prashna Upanishad, Canto 1, verse no. 9-10, 13-16; Canto 3, verse no. 7, 9-10.

Relation between a *Jiva and Prakriti (Nature)* has been explained in Atharva Veda's Narad Parivrajak Upanishad, Canto 9, verse no. 10.]

12. Some say that all the Jivas (living beings) have the characteristic attribute of possessing an 'Antahakaran'. [That is, all living beings have a subtle component of the body known as the Antahakaran, which constitutes of the Mana (mind), the Buddhi (intellect), the Chitta (sub-conscious) and Ahankar (ego, pride) that determine the individual's personality and qualities. See note to paragraph no. 11.]

Others assert that all the Jivas have the characteristic attribute of having a subtle body that lives in the gross body that is born from or created out the Maha-Bhuts, the great primary elements of creation¹.

Still some others say that the Jiva is the reflection of the Chaitanya (consciousness) in the Buddhi (intellect). [That is, the consciousness that inspires the intellect and enables it to perceive, think, reflect, analyse, contemplate, deduce, decide and determine are the functions that make an entity distinguished from another that cannot perform these intelligent tasks. The entity that shows the above attributes is called a Jiva or a living being who is conscious, and that which doesn't is not a Jiva. Therefore, a living being who is conscientious, wise, thoughtful, intelligent and mindful or 'conscious' of his responsibilities and moral duties would be called a 'Jiva' in the true sense of the word. The rest would be no more than life-less entities such as rocks, or un-intelligent creatures such as plants and other lower forms of animal life.]

All these different forms of Jivas or the classification of living beings into different categories is based on the characteristic attributes that they possess or exhibit. But fundamentally there is no difference between them. [This is accordance with the theory of Advaitya or non-duality that stresses that all forms of creation are

basically the same because they are simply different forms of the same Brahm, the universal Truth. Since ‘Truth’ can be only one and not two, it follows that if the world is to have any meaning in it then it must conform to this basic fact about ‘Truth’—and it is that the ‘Truth’ will always remain one and not two. This at once shoots down the concept of ‘duality’ in creation! We can understand this eclectic phenomenon by a simple instance. Just like the same metal ‘gold’ is called by different names because of the different forms, shapes and sizes into which it is moulded to create various items of ornaments and decorative jewellery having myriad names and values though the primary ingredient is the same ‘gold’ in all of them, or just like the same element ‘earth’ is moulded by a potter into different forms and shapes with varying sizes and contours and given different names though the same element known as ‘earth’ is inherently present in all of them—similarly, all the Jivas or living beings are basically and inherently the same because they have the same universal ‘consciousness’ in them as the primary element that entitles them at all to be called a ‘Jiva’ in the first place. That is, notwithstanding the different definitions of Jiva according to various schools of thoughts and philosophy, the fundamental nature of a living being cannot be changed—and this is the fact that they are called a ‘living being’ because of the presence of ‘consciousness’ in them. Without its presence, no entity would be entitled to be called a ‘Jiva’ no matter how beautiful, important, intelligent or handsome he might be! For instance, the modern world’s computer is very intelligent and performs great calculations in a jiffy, and even helps one to predict the future and trace the past precisely based on intelligent interpretation of the data, tasks that would take a normal man a very long time to do even if it is at all possible for him to do it. But would anyone in his right senses call a computer a ‘Jiva’ or ‘a living being’?] (12).

[Note—¹The 5 *Maha-Bhuts*—They are also called the ‘Panch Maha-Bhuts’ are the five primary elements of creation. They are sky or space, air or wind, fire or energy, water or all forms of liquids, and earth or all forms of solids. The Trishiki Brahmin Upanishad, Canto 1 of Shukla Yajur Veda tradition describes these elements in great detail along with their manifold influence on this creation, including the latter’s very existence. The gross body of the creature is made up of these five elements in varying proportions. According to Trishiki Brahmin Upanishad, Canto 2, of Shukla Yajur Veda tradition, the ratio of these elements in this creation is the following—earth is one half, and the rest half consists of water, fire, sky and air elements in the ratio of one-eighth each.

Refer also to Jabal-darshan Upanishad, 8/5-6; Paingalo-panishad, Canto 2, verse no.2; Yogshikha Upanishad, Canto 1, verse nos. 176-178; Yogtattva Upanishad of Krishna Yajur Veda tradition verse nos. 85-99.

The 12 *Maha Bhuts*—According to the Gayatri Upanishad of Atharva Veda’s Gopath Brahman, Kandika no. 37, the twelve Mahabhuts are the following—Brahm (the Supreme Being), Akash (sky), Vayu (air or wind), Jyoti (light), Aapo (water), Bhumi (earth), Anna (food), Pran (life or the vital winds that sustain life), Mana (mind), Vaani (speech), Vedas, Yagya (fire sacrifice) = 12.

According to Kandika 38, they are the following—Veda, Vaani (speech), Mana (mind), Pran (life; vital winds), Anna (food), Bhumi (earth), Aapo (water), Tej (fire), Vayu (air or wind), Akash (sky), Brahm (the Supreme Being), Brahmin = 12.]

13. [This paragraph essentially answers the eternal question—‘why is a living being called the Jiva trapped in this world’?]

The universal and uniformly wholesome and self-contented Lord known as Lord Narayan always plays sport out of his own wish. The Jiva or the living being too continues to play sport in this world out of his own wish. [Therefore, they appear to

be the same entity. This is true because the Jiva is an image of the Viraat Purush which is one of the many names of Lord Narayan.]

[Just like Lord Narayan or Lord Vishnu getting sucked in the quagmire representing the arduous job of sustaining and protecting this endless world which is his own creation in the first place, thereby robbing the Lord of his peace—] The Jiva, the living creature, (also) gets trapped in the web of this artificial world in his desire for enjoying it. He remains shackled to this despicable and contemptible world of sense objects and materialism in his pursuit of its comforts and pleasures inspite of being aware of its inherent impermanent nature, its turmoil and turbulence, and it being a cause of all his spiritual bondages and miseries. This result in the Jiva remaining trapped in the endless cycle of birth and death in this gross world. [This passion and yearning for the world is contrary to the Jiva's primary form which is the Atma, the pure consciousness, also called the Atma-Ram, and its nature of being enlightened and wise, and consequentially being dispassionate and detached from all grossness that is associated with this world. This basic delusion and ignorance of the reality is the cause of the Jiva remaining trapped in the endless cycle of birth and death in this gross world. This situation is compared to Vishnu remaining involved in the sustenance and protection of the world once the Lord created the Maha Maya—the 'great delusion', and then allowed himself to be served by it or surrounded by it. See paragraph no. 10 of the present Canto no. 4. If the Maha Maya can be so powerful that even Vishnu the Lord is not free from its affects then how can a humble creature be free from it? This is the obvious reason why the Jiva who allows himself to be attracted towards this world gets ensnared by it.] (13).

[Note—The reason why the Jiva remains trapped in the world and the endless cycle of birth and death has been continued and magnificently explained in Canto 5, paragraph nos. 3-8 below.]

-----*****-----

Uttar Kand—Canto 5

[This Canto answers three very pertinent spiritual questions—viz. (i) How and why does Avidya (ignorance or lack of true knowledge) reappear once it has been destroyed or eliminated?, (ii) Why does a creature remain deluded and trapped in this world of artificiality, and how to get rid of it and become freed?, and (iii) What is the path to Mukti—or liberation and deliverance from this ensnaring world. In the process it describes in graphic detail the path taken by a devotee of Lord Vishnu when he leaves the gross mortal body and embarks upon his spiritual journey to reach the highest echelons of heaven where Vishnu resides, the heaven known as Vaikunth. The description is continued in the next two Cantos, Canto no. 6 and 7, as well.

There are many other Upanishads also that deal with the mysterious question 'what happens after death?' Some of them are the following—

- (a) Rig Veda = Kaushitaki Brahmin Upanishad, Canto 1.
- (b) Sam Veda = Chandogya Upanishad, Canto 5, Section 3-10.
- (c) Shukla Yajur Veda = Brihad Aranyak Upanishad, 3/1/3, 3/2/11-12, 3/9/28, 4/3/12, 4/3/33, 35-38, 4/4/1-14, 5/10-5/11, 6/1/1-6, 6/2/2, 14-16, etc.; Subalopanishad, Canto 11.
- (d) Krishna Yajur Veda = Taittiriyo-panishad, Valli 2, Anuvak 6; Kathopanishad, Canto 1, Valli 1, verse no. 20; Canto 1, Valli 2, verse no. 1-6; Canto 2, Valli

2, verse no. 6-8; Canto 2, Valli 3, verse no. 4-17; Yogshikha Upanishad of Krishna Yajur Veda, Canto 3, verse no. 24.

(e) Atharva Veda = Prashna Upanishad, Canto 1, verse no. 9-10, 13-16; Canto 3, verse no. 7, 9-10; Mundak Upanishad, Mundak 3, section 1, verse no. 10; Mundak 3, section 2, verse nos. 1-2; Naradparivrajak Upanishad, Canto 5, verse no. 23.]

1. Paying his obeisance to the Guru who is like a God, the disciple bowed before him and asked again—‘Oh Lord! How and why does Avidya (ignorance or lack of true knowledge) reappear once it has been destroyed or eliminated?’ (1).

2. ‘It is true’, said the erudite Guru and continued to explain. He elaborated—‘Even as frogs, insects and other creatures make their appearance at the onset of the rainy season, the completely subsided Avidya too makes a come-back and resurfaces at the time of ‘Unmesh’¹’ (2).

[Note—¹The term Unmesh has been explained earlier in Canto 4, paragraph nos. 7-9. Unmesh literally means opening of the eyes. So, when the Viraat Purush, the almighty supreme Lord of the creation, opens his eyes, it is the beginning of the process of creation. The first thing to appear is Maha Maya, the Great Delusion. The Lord employs the services of this Maha Maya to create the world. Since the instrument used for this creation is Maya it is obvious that it is like the scene created by a magician, or the mirage seen in a desert. Avidya and Maha Maya go hand in hand because ignorance of the reality and delusions are complimentary to each other. Refer Canto 4, paragraph nos. 10-13.

There is another way of interpreting this word. When a creature opens his eyes he becomes aware of the world and its fascinating charms. When he closes them the world vanishes, and with it its charms. A creature is attracted to the world because of the magnificent scene he sees, which kindles in him a desire, a desire to be near it, to acquire it, to enjoy it, and then to preserve and protect his possessions and augment them. The creature does all this in spite of the fact that the world is mortal and transient, that its charms are illusive and temporary, that it cannot lead to satisfaction but only stokes the fire of more desires and yearnings, that it is full of miseries and pains, of turmoil and turbulence, and that it is like a vicious whirlpool which traps the unfortunate ones who land in it. But then its charms are so very alluring and irresistible that the deluded creature falls prey and cares not. The Unmesh in this case would be opening of the eyes and becoming aware of the charming world of astounding magnificence, so alluring that for once all wisdom is eclipsed and the creature thinks ‘let us taste it and then we will throw it away’. But the wine is very addictive, and once it gets its hold on the creature, he is done in for good.

The second scenario is this. When the creature finds this visible world interesting, he makes so many efforts or does so many deeds and takes so many actions to fulfil his desire to enjoy the world’s attractions and gratify the urges of his sense organs. He succeeds and this stokes his desires and passions further because he wishes to reap more rewards of his deeds, actions and efforts. He cannot completely be contented, so is the nature of the infinite alluring charms of this endless world. So, when he dies, he is unsatisfied and thinks that many things are yet uncompleted, many things are to be done yet. As a consequence of these unfulfilled desires and unrequited love for this world, he takes a birth again. This lands him in the vicious cycle of birth and death that is characteristic of this world.]

3. The eager disciple asked the second eternal question—‘Oh Lord! How and why the Jiva (the living creature) gets trapped endlessly in this world? Why is he deluded and waylaid by it? How can the Jiva find liberation and deliverance from it? What form or shape does the path of Moksha (emancipation and salvation; liberation and

deliverance) take? What is the medium or instrument or channel by which it can be successfully achieved or accessed? What is the way towards Moksha? What is actually meant by the term Moksha? What is Sayujya Mukti? Please be kind to elucidate these eclectic concepts for me.' (3).

[Note—The answer to the basic question 'why is a Jiva trapped and why is he deluded' is explained in paragraph no. 4-8, while the concept of what constitutes Mukti or Moksha is given in paragraph nos. 9-13. The concept of Sayujya Mukti is outlined in paragraph nos. 14-17. Basically, Sayujya Mukti is to become one with the deity worshipped, or to merge with this deity so there is no separation between the worshipped and the worshipper. The deity in this particular case is Lord Vishnu.]

4. The teacher was extremely pleased with the sincerity and eagerness of the disciple to learn. He praised the learner and preached—'Listen carefully. It is because of the cumulative negative effects of the evil deeds done repeatedly in numerous past lives and their accumulated denigrating consequences that the Jiva (the creature) is unable to distinguish between the gross body and the Atma, the pure consciousness that is his true self.

So he is deluded to think that the gross body is his identity and 'self'. Since he has heard that the 'self' is known as the Atma, he thinks erroneously and most stupidly that 'the body is the Atma', that the 'body is the self'. (4).

[Note—In other words, the evil deeds done by a creature so much taint his intellect and wisdom, rousing in him so many passions for the world and the desire to gratify the urges of his sense organs for enjoyment of their respective objects of the world that he forgets about who he actually is. Since the sense organs of the body are the domineering factor in his relations with the world, so as long as he relates himself to the world and keeps enjoying its comforts and pleasures, these organs become most important and relevant for him—simply because he cannot enjoy the world without them. All the deeds done by him, all the actions taken by him and the efforts made by him are channelised through these sense organs and the body. So in due course of time the creature begins to identify himself with the gross body. He forgets that this gross body is not in fact his 'true self', and that the latter is the Atma which resides in this gross body. The body is evident and easy to relate to, while the Atma is such a subtle entity that it needs a lot of patient and purity of thought to become acquainted with it. The creature is in such a tearing hurry to grab as much as he can in as short a time as possible that he loses the inclination, does not have the patience and the desire to know about his roots.

As would be evident now and in the forthcoming paragraphs, this idea of Mukti and why the creature remains trapped in the world has already started in paragraph nos. 11-13 of the previous Canto no. 4.]

5. The deluded Jiva thinks negatively; negativity takes a firm hold of him. He thinks 'I am Agyani and have limited knowledge' (i.e. I am ignorant; I lack wisdom and knowledge); 'I am a Jiva or a living being' (who is separate from the Ishwar—in this context, refer Canto 4, paragraph no. 9, 11-13); 'I am full of great miseries and sorrows'; 'I am trapped in the web of birth and death in this world from times immemorial'.

Due to this negative thinking and its associated depressions, the creature feels absolutely hapless, hopeless and dejected besides being deluded, and so he is unable to recover due to its accompanying hallucinations that are extremely overpowering.

It's such a heady cocktail of immense negativity, lack of truthful knowledge and awareness of the reality that it perpetuates itself endlessly and keeps the creature viciously tied in its vice-like grip. The creature therefore remains trapped in the world

through the medium of the body which helps him to enjoy the world and its comforts and charms. This passion never ends, and so the trap never ends!

If this tendency to be deluded is not overcome, if such negative thoughts are not banished, if the desire to enjoy the world and be passionate about it never ends, if one continues to think in material terms and regard his body as his 'self' instead of the Atma, then it is obvious that this chain can never be broken and the creature can never hope to find liberation and deliverance from it (5).

6. Such a deluded and misled creature continues to experience and enjoy the false and illusionary charms of the sense objects of this world which is dream-like itself, i.e. neither the world nor its objects and their charms have any reality and truth in them.

The creature is so overwhelmed with this fascinating experience that he desires more of it; he expects, longs for and aspires to have more of this world and its sense objects. This never ends as the illusion never ends.

As a result, the creature never finds satisfaction and contentedness; he is never fulfilled and done with. So he keeps on running behind this mirage endlessly, he relentlessly pursues it while it recedes from him the more he attempts to go near it. The whole present life and all the lives henceforth are spent in this fruitless endeavour.

He assumes numerous bodies of infinite varieties and forms, some are honourable and some lowly, some are gross and huge while others are microscopic and most inconsequential and humble. In all these forms the creature does uncountable deeds and accumulates their results which may be good and auspicious as well as bad and painful. Some of the results are enjoyed or suffered by him in that life while others are carried forward to the next birth. Some of his desires are fulfilled in the current life and some remain unfulfilled, causing the Jiva (living being) to take another birth to complete the unfinished task or unrequited desires.

The unfulfilled desires create stronger passions; the mind, the sub-conscious and the intellect which constitutes the Antahakaran (the inner self of the creature) become so much pre-occupied with them that the latter (i.e. the Antahakaran) does not have the time and energy left for anything else. [This is the reason why delusions and ignorance perpetuate themselves.]

This vicious cycle keeps the creature perpetually trapped (6).

7. Such trapped creatures do not even have any inclination to find a way out of the quagmire in which they are trapped. By and by, the creatures even forget that they are trapped at all. So the deception continues; it perpetuates. [Refer paragraph no. 8 below. The reason is that they aren't aware that they are trapped. Since for them the world is the true thing and it is all that matters to them in this existence, and since they believe that their gross body is their true 'self' and the medium for happiness and fulfilment, they have no reason to find out about anything else other than these two entities they believe to be true and fulfilling—viz. (i) the world, and (ii) the body. The world becomes the object, the target, and the body becomes the medium for reaching it, for obtaining it, for getting access to it. In other words, when the deluded creature believes that the world is real and it is the only thing that can provide him with his much sought-after happiness and joy, he uses his body relentlessly in pursuing this world and its sense objects. Therefore, when the foundation of beliefs is false, when the base is shaky and the premise of any decision is wrong, the edifice erected on it is also bound to be illusory, shaky and impermanent, the result of any such decision

would be wrong. How can anything with this background give eternal bliss and peace of mind to the creature who is on the wrong path?]

Hence, what is essentially inauspicious and demeaning, what is basically false and illusionary, what is fundamentally flawed and corrupted, what is degrading and a harbinger of all evils appears to be good, real and auspicious to them. Instead of attempting to find a way out of the logjam, they prefer to wallow in it, remain perpetually engrossed in it, and thereby trapped in it for an infinite length of time.

Due to the reasons of having passions for the world and its fascinating sense objects which are actually degrading, ill-got and bade an evil omen for their spiritual welfare and well being, creatures who are deluded and ignorant of the true situation, those who are overcome with such negative thinking as outlined in the above stanzas, think otherwise. [That is, they think the world and the gross body are for real, they are true, their charms and pleasures are true and real, they give truthful happiness, peace and bliss. So, such deluded creatures keep enjoying the world and the body, and they never attempt to break free from their shackle. The affect is that their Atma, their ‘true self’, remains trapped in the prison of the gross body that is tied to the attractions of the material sense objects of the gross, deluding and intrinsically entrapping world.]

Thus, the path of Moksha, or the path that can free them from this quagmire and deliver their souls, the path that would lead them away from the world and thereby deny them an opportunity to enjoy it, seems a wrong path, a path that is ill-conceived, erroneous, misleading and cumbersome to them. And instead, the path that helps them enjoy the world and gratify their sense organs seems more attractive, charming, correct and practical for achieving the objective of fulfilment by them.

A Jiva (creature) thinks that successful acquisition of desired objects of the world, the ability to fulfil all wishes and achieve all material successes in the world, are the criterion of a fulfilled and successful life in which all contentedness, happiness, majesty, peace and bliss can be achieved by this means.

If he fails in this endeavour, he is overcome with surging sorrows and regrets, he feels miserable, anguished, frustrated and tormented, he feels crestfallen, defeated and failed, he feels agonised, agitated and fidgety—in short, all his peace and happiness take a toss (7).

8. In fact, they do not have any inclination or desire to enjoy the eternal nectar of unbound bliss, profound contentedness, absolute fulfilment, and a sense of immense beatitude and felicity that comes with Brahm realisation that would be possible by turning away from delusions and falsehoods, and towards the truth and the reality.

The reason is that the Jiva (the deluded and ignorant creature) is not aware what the bliss of ‘Brahm realisation’ is and what are its spiritual rewards; he is not aware of the profound bliss, immense peace, a great sense of spiritual fulfilment and contentedness, along with the highest degree of beatitude and felicity that accompany ‘Brahm realisation’. [Had he been aware of the purity and the immensity of such positive virtues as those that come with Brahm and self realisation, he wouldn’t have had the desire or the inclination to settle for something as inferior and of low quality as the deceptive enjoyments, the illusory happiness, the transient pleasures and the imaginary comforts which he derives by indulging in the gross world, that is nevertheless perishable and transient, through the medium of the gross body that is equally perishable and transient. No one in his right mind, and having wisdom and erudition would opt for an inferior option when he has the choice to choose the best with the same amount of effort and energy.]

Such a Jiva is not even aware of the difference between what is ‘Bandhan’—i.e. to remain shackled, to be tied by fetters, to remain bonded and bounded, and what is ‘Moksha’—to be freed and unbound, to be liberated and delivered, to find emancipation and salvation.

The irony is that in the absence of this knowledge they do not even realise that they are bonded, that they are tied down by strong fetters and they are shackled.

Why does this happen; how is that the Jiva comes to such a sorry state?

Well, as stressed above, it is out of the domineering presence of Avidya or Agyan—or lack of truthful knowledge about his real ‘self’ and about the reality of the illusionary world with its equally illusionary charming objects. [He is not aware that the body is not his ‘truthful self’, and that the world, so seemingly charming and alluring, is actually false and illusive; it is a Pandora’s Box of miseries and pains, of tribulations and troubles. Its almost like the case of a fly wallowing and breeding in the filth of the stinking drain without realising where it is or what it is doing.]

Why is Avidya or Agyan so dominant and strong?

It is due to the lack of interest in and a strong natural urge or natural inclination for acquiring the virtues of Bhakti (devotion), Gyan (wisdom, erudition, knowledge, sagacity, skills and enlightenment), and Vairagya (renunciation, detachment, dispassion, indifference and non-involvement).

Why does one lack this auspicious desire or interest?

It is due to immense darkness that has eclipsed the Antahakaran, the inner self of the Jiva. [The ‘Antahakaran’ is overshadowed by Avidya and Agyan (ignorance and delusions). Since it is constituted of the vital thinking apparatus of the creature such as his Mana (mind), Chitta (sub-conscious) and Buddhi (intellect), it is natural that with a corrupted and tainted inner apparatus, the entire thinking process and the ability to discriminate between the right and the wrong, between the correct and the incorrect, are severely compromised, are immensely corrupted. It’s like the corrupted software of the computer which does not allow the machine to function properly. Hence, the creature is seriously handicapped, and he is unable to determine what is good for his spiritual welfare and what is not. This concept has been elaborated earlier in Canto 4, paragraph nos. 11-12.] (8).

9. [Paragraph nos. 9-13 would outline how the Jiva, the living creature, can find Mukti, or liberation and deliverance, from this world.]

The disciple enquired from his learned teacher—‘Then say, in the situation described by you, what is the way by which one can find Mukti (liberation and deliverance) from this world?’ (9).

10. The wise teacher replied, outlining this way—‘As an auspicious reward of numerous good deeds done by a creature (living being) over many births (or lives) in the past, he is fortunate enough to find company of wise, erudite and enlightened ones. These wise ones are like the ripe fruits of the teaching of the numerous scriptures; they are embodiments of the grand knowledge enshrined in the scriptures; they are filtered form of the eclectic tenets and principles of the scriptures¹.

Their association (contact, company and communion) kindles natural wisdom and erudition in a creature to judge for himself what is lawful, morally correct, ethical, right and auspicious, and what is not; what ought to be done and what ought to be avoided; what would be good for him and uplifting for his soul, and what would bog him down and lead to his downfall and degradation.

Armed with this wisdom, sagacity and erudition he would be naturally inclined towards auspiciousness and righteousness; he would be naturally swerving towards higher goals in life, and away from objectives that would be denigrating for him and his soul.

With this auspicious way of thinking and its corresponding behaviour, deeds, actions and activities, all evils and sins are slowly done away with. With this elimination of evil deeds and sinful activities, their attending evil consequences are also eliminated. This results in the Antahakaran, the inner self, to become cleansed, purified and holy (10).

[Note—¹That is, just like the physical fruit of a tree presents the vital nutrients in a ready-made form to be just picked up and eaten, the wise teacher is similarly an embodiment of the knowledge contained in the scriptures because he has already studied them thoroughly, has churned them and extracted their essence to be presented to eager student in a refined and made-easy format through his preaching. It is just like the case of honey that is the essence produced by the honey-bee from the nectar it collects from a wide variety of flowers over a long period of time. Once the fortunate student reaches such a wise and enlightened Guru he would be straight-away accessing the nectar of the scriptures without having to undergo the arduous task of studying the voluminous texts which involves an obvious strenuous exercise of plodding through their endless volumes and then spending a life-time understanding them correctly. Besides this, there is always the risk of misinterpreting the tenets, the principles, the doctrines, the axioms and maxims proclaimed by the scriptures because they are so esoteric and secret that more often than not they seem contradictory and confusing, which would lead to perplexity and frustration on the part of the student. The teacher on the other hand has already done the spade work so to say, and virtually presents the ready-to-eat and pre-cooked meal for the benefit of the hungry and eager spiritual aspirant.]

11. This cleansed and purified inner self is now ripe to receive the blessings of the wise and learned Guru¹. [That is, once the mind, the sub-conscious and the intellect which are the subtle bodies of the creature and collectively called the Antahakaran of a creature, are scrubbed clean of all worldly impurities and imperfections that had earlier tarnished them and had cast their dark shadow on them, the creature becomes ready to receive the light of true knowledge. This can be understood by a simple example. If one wishes to see the Sun being properly reflected in a mirror, the mirror has to be shining clean. Otherwise the brilliance of the Sun would be mired by the unclean and grimy surface of the mirror which would not reflect the glory of the Sun in its true intensity.]

When the Guru becomes pleased, the disciple is blessed by all mystical powers, and he is able to access all knowledge which then becomes easy for him².

With the blessings of the Guru and access to high knowledge, all the disciple's worldly fetters of ignorance and delusions are broken; he is set free automatically.

All auspicious virtues and noble qualities come naturally to him; nothing remains between him and the acquisition of these auspicious virtues and noble qualities.

Just like a man who is born blind can never even imagine what is meant by the shape, form or size of anything, a person who has not had the good fortune of being blessed by a Guru and taught by him can never hope to access any knowledge that is truthful and profound. Without the help of the Guru he is not able to learn the Tattvas (the essential principles of the scriptures) even in crore of Kalpas. [The phrase 'crore of Kalpas' is to indicate a very long period of time. This is because without the help of a practical guide, the complicated and most intricate doctrines of the scriptures

would not be properly and correctly understood by him just as in the case of modern learning in schools, colleges and universities when a student needs proper grooming under the care of an expert teacher in his field of learning to actually become an expert on the subject himself.]

This is why as soon as the Guru becomes pleased and blesses the disciple, all sorts of esoteric knowledge becomes known to him. [This statement is just a symbolic way of saying that the blessing and benevolent grace of the Guru are necessary for acquiring good education. When the teacher is pleased he would take great personal interest and care in the education of the ward, and would not withhold any information from him.] (11).

[Note—¹Refer also to Canto 8, paragraph no. 17 of the present Upanishad.

The word *Guru* has two parts—viz. ‘Gu’ meaning darkness, and ‘Ru’ meaning light. Hence the word ‘Guru’ means a person who can remove the darkness symbolising ignorance and illusions that has engulfed the disciple from all sides and act as a hindrance or an obstacle in his emancipation and salvation by showing him the truthful path, or lighting his path with the light of knowledge and holding out his hands to support him when he falters. Therefore he is an exalted, revered and much sought after person who can remove the darkness of ignorance of his follower by showing him the light of knowledge and guides him whenever he finds himself in a moral dilemma and quandary. He is the person who is both the moral preceptor as well as the spiritual guide of his disciple. He is supposed to act as a neutral advisor to his ward in all matters temporal and spiritual. The disciple is expected to confide in him his greatest of secrets without the fear of betrayal or blackmail. He is the one who is expected to have risen above all kinds of vested interests and keeps the welfare of the disciple as his main objective. He is the one who has transcended the mundane and has acquired sublime awareness of the supreme Reality, because only those who are themselves aware of anything can hope to tell others about it. Therefore it is deemed that only a person of high mental, intellectual, spiritual and ethical calibre can become a true Guru.

A true Guru is treated as being equivalent to the ‘Trinity Gods’—(1) Brahma, the creator, because he creates or helps to take birth good virtues and noble qualities in his disciple; (2) Vishnu, the sustainer, because he nourishes, sustains and helps to inculcate and develop wisdom and enlightenment in his disciple and leads him on the truthful path; and (3) Shiva, the concluder, because he helps to end, conclude and eliminate ignorance and negative traits in his disciple. He is ‘God like’ because he functions in all these capacities at the same time, besides being exalted in all knowledge, being virtuous, of high moral character and beyond reproach, being a source of unbound spiritual energy, being self realised and enlightened, and being eternal in the sense that what he advises to his disciple, the path he shows, the light that he lights in the dark heart of the creature, makes him immortal. The Rudra Upanishad, verse no. 3 explicitly asserts that Lord Shiva is the universal Guru of all, and that the Guru is Shiva personified in this form.

Therefore, a Guru is honoured for the divine virtues that he represents and embodies, that he teaches and implements in his life, for the divinity, for the Lord and for the personification of the great teachings of the scriptures that he exemplifies. It is not his physical body that is of any value for veneration, for the soul and not the body is venerable.

The Advai Tarak Upanishad, verse no. 14-18 of the Shukla Yajur Veda tradition elaborately describes the virtues that a true Guru should possess.

The *importance of a Guru* has been emphasised in a number of Upanishads, viz.—

(a) Shukla Yajur Veda’s following Upanishads—Advai Tarak Upanishad, verse no. 14-18; Shatyayani Upanishad, verse no. 39; Niralamba Upanishad, verse no. 30.

(b) Krishna Yajur Veda's following Upanishads—Rudra Hridaya Upanishad, verse no. 35; Tejobindu Upanishad, Canto 6, verse no. 44; Yogshikha Upanishad, Canto 5, verse nos. 56-59, and Canto 6, verse no. 79; Kathrudra Upanishad, verse no. 39; Shuk Rahasya Upanishad, in its verse no. 21; Brahm Vidya Upanishad, verse nos. 52-53; Yog Kundalini Upanishad, Canto 2, verse nos. 3-4; and Canto 2, verse nos. 12-13; Varaaha Upanishad, Canto 2, verse no. 76; Rudra Upanishad, verse no. 3 (Lord Rudra is the universal Guru).

(c) Atharva Veda's following Upanishad—Manduka Upanishad, Mundak (Canto) 1, section 2, verse nos. 12-13; Tripadvibhut Maha-Narayan Upanishad, Canto 5, paragraph nos. 10-11, and Canto 8, paragraph no. 17, 1st stanza; Bhavana Upanishad, verse no. 1.

(d) A minor Upanishad named the 'Dwayo-panishad' is entirely dedicated to enumerating the chief characteristics of a Guru. It is not known to which Veda it precisely belongs.

²When the teacher (Guru) is especially pleased with a particular student, he would naturally be inclined to pay more attention to him as compared to others. This is natural for him because he sees in this student a spark of great future, a soul who would sincerely and honestly carry forward the teacher's legacy forward and make his teachings as well as his name and fame immortal. As for other less brilliant and devoted students, or those who are just mediocre and run-of-the-mill sort, the teacher has no such grand expectations from them. So he prefers to impart the best of education to his special and most-favoured student. The teacher would even unravel top secrets to him because he is confident that this disciple would never misuse them and also understand these secrets correctly and properly. This relationship is just like a father of more than one son. The father would have a natural love for the son in whom he sees a bright future and from whom he expects the family's good name and fortune to get a boost as compared to those sons who are like blights on the family.]

12. When a truly spiritual, devoted, self-realised and wise Guru showers his divine grace upon the spiritual aspirant it is then that the latter develops an interest in listening to the preaching and being taught about God besides paying attention to such spiritual practices as doing Dhyan (contemplation and meditation) etc. [When the learned teacher is interested in what he is teaching as well as when he pays a personal interest in the pupil whom he treats more as his ward towards whom he has moral responsibility rather than just fulfilling some formal obligation, he puts in his best of effort in what he teaches. The teaching becomes more of a one-to-one conversation and discussion, for the student does not feel shy in asking questions to remove his doubts and the teacher too takes full interest in quenching the student's thirst for knowledge and information. So, when the preaching or teaching becomes a personal interaction, it becomes meaningful and effective. The student and the teacher both feel fulfilled—the former by accepting the knowledge in its entirety, and the latter by giving all that he has.]

With this spiritual pursuit done diligently, all the different Granthis (knots) representing numerous evil Vasanas and Vrittis (passions, desires, inclinations, habits and tendencies) that are present in the heart of the aspirant from time immemorial are untied and done away with. As a consequence, all the Kaamanaas (numerous desires, wishes, hopes, yearnings, expectations etc.) that are present in the heart and the mind (i.e. in the inner self of the spiritual aspirant) are also eliminated (just like a student clarifying his doubts on a topic when his learned teacher explains it to him threadbare).

When this happens, the Parmatma makes his glorious appearance in the thallus at the end of the stalk of the symbolic Lotus that is present in the subtle heart¹. [That

is, when the spiritual aspirant starts practicing meditation and contemplation, when his inner self called the Antahakaran has withdrawn from the external world and instead is focused on higher objectives of life marked by knowledge and enlightenment, when he concentrates his attention inwards and experiences the presence of the self-illuminated and pure consciousness inside his own subtle heart, he is able to have a symbolic vision of the supreme Atma there. This is because his individual Atma is a reflection of the cosmic Atma, as there is no notion of duality in Atma because it is a synonym for the eternal cosmic 'Consciousness' that is non-dual, immutable and universal. It is to be noted here that the subtle aspect of the heart is deemed to be like a lotus flower.]

This fructifies into the development of strong and steady Bhakti (devotion, dedication) for Lord Vishnu. [Refer also Canto 4, last stanzas of paragraph no. 10.]

This leads to the development of Vairagya (complete renunciation, detachment and dispassion) towards the sense objects of the material world.

Vairagya fosters the development of Vigyan (the ability to analyse available information intelligently to deduce the truth behind the external façade which is more often misleading and deceptive, and the ability to find out the reality of anything or any given situation).

The Gyan (knowledge, wisdom, erudition and enlightenment) that comes with Vigyan and Vairagya (obtained as a grace of the Guru as well as of Lord Vishnu) becomes ripe, fruitful, strong, steady and effective by constant, persistent and consistent practice.

When Gyan reaches its full maturity, the spiritual aspirant obtains Jivan Mukti². [What happens when 'Jivan Mukti' is achieved is described in the next paragraph nos. 13-16 below. It basically refers to that form of Mukti or spiritual liberation and deliverance when the aspirant is still alive in this world, has a gross body, does all his required deeds and duties, and generally lives a normal life, but internally he remains completely detached from the both and its sense organs as well as the material world and its sense objects. He remains in a perpetual state of meditation and has reached higher echelons of spiritual realisation when his consciousness stays in the transcendental state called Turiya.] (12).

[Note—¹The following Upanishads endorse the metaphysical view that the subtle heart is like a Lotus—

- (i) Sam Veda = Chandogya Upanishad, Canto 8, section 1, verse no. 1.
- (ii) Krishna Yajur Veda = Panch Brahm Upanishad, verse no. 14; Daskhin Murti Upanishad, verse no. 25; Dhyan Bindu Upanishad, verse nos. 93/1-93/15.
- (iii) Atharva Veda = Narad Parivrajak Upanishad, Canto 6, verse no. 3.

²The concept of *Jivan Mukti* has been explained in a number of Upanishads, e.g.

(a) Krishna Yajur Veda tradition = Sarvasaar Upanishad, verse no. 2; Varaaha Upanishad, Canto 2, verse no. 6, 15, 42, Canto 4, verse no. 1, 21-35, 18-33, 42-43, Canto 5, verse no. 56, 59, 75-76; Yog Kundali Upanishad, Canto 1, verse no. 79-80, and Canto 3, verse no. 33; Katho-panishad, Canto 2, Valli 2, verse no. 12-13, and Canto 2, Valli 3, verse no. 4, 6-15; Akchu-panishad, Canto 2, verse no. 32-39; Tejobindu Upanishad, Canto 4, verse nos. 1-32; Brahm/Amrit Bindu Upanishad, verse no. 5; Yogshikha Upanishad, Canto 1, verse nos. 46-47, 144, 151, 161.

(b) Shukla Yajur Veda tradition = Paingalo-panishad, canto 3, verse no. 5, and canto 3, verse no. 9-11; canto 4, verse no. 6; Mandal Brahmin Upanishad, 1/4/3-4; 2/3/6-7; 2/4/5-6; Adhyatma Upanishad, verse nos. 12 and 43-47; Muktikopanishad, Canto 2; Shatyayani Upanishad, Canto 2, verse no. 19.

(c) Sam Veda = Mahopanishad, Canto 2, verse nos. 37-73.

(d) Atharva Veda = Ram Rahasaya Upanishad, Canto 5, verse no. 11-17; Annapurna Upanishad, Canto 2, especially verse no. 27; Canto 3, especially verse no. 2; Canto 4, especially verse nos. 17, 52, 58-59; Canto 5, verse nos. 5-6, 91-108; Atma Upanishad, verse nos. 10-20.]

13. When Jivan Mukti is achieved, all the gross forms of Vasanas (inherent desires and natural inclinations present in a person) that drive a person towards this world and impels him to do various deeds, both the good deeds as well as the evil deeds, and thereby remain entangled in the web cast by them, are completely eliminated. He no longer hankers after the world; he remains totally detached from, uninterested in and oblivious of it¹.

With the elimination of all gross forms of Vasanas pertaining to the gross world and the gross body, the only ones that remain are the sublime forms of Vasanas—or the higher forms of subtle desires that are auspicious in nature and helps a creature in his all round spiritual upliftment instead of pushing him down into the whirlpool of the world and remaining trapped in its vortex. Such refined or sublime forms of Vasanas inspire sincere and steady Bhakti, or devotion and dedication in him.

When Bhakti reaches its climax, the all-pervading, omniscient and almighty Lord Narayan is ‘illuminated’ or perceived everywhere. The whole world appears to be enlivened by the glory and illumination of Lord Narayan; it appears to be a personification of Narayan.

‘There is nothing but Lord Narayan everywhere’—firmly rooted in this eclectic belief, firmly convinced of its truth, the spiritual aspirant roams anywhere he wishes without any hindrance. [The enlightened aspirant is able to see his Lord in each unit of creation. This is also the tenet of Advaita Vedanta which emphasises that the same Brahm, the eternal cosmic supreme Consciousness, is a non-dual entity that is universal and uniform in the entire creation. Since each unit of creation is a manifestation of Brahm—or Lord Narayan in the present case—it is but natural to see the Lord everywhere. With his own Lord everywhere, he never feels alone or scared of anything!] (13).

[Note—¹When one does not do any deed there is no question of any result accumulating. So the person is freed from their effects, good and bad. ‘Not doing any deeds’ does not mean that he sits idle and lies motionless. It means that since he has distanced himself from the body and its sense organs and is not mentally involved in them, what the body does or does not is of no relevance to him. He does not get emotionally attached to any deed, and does not expect any reward by doing them. He also is unbothered by the punishment incurred by something done by the body without his mental involvement because the pain of punishment is also a relative notion, and with the mind focused elsewhere there is nevertheless no feeling of pain whatsoever. Since such a highly realised person is detached from the body, he also has no attractions for the world and its objects for the simple reason that the world with its charms is perceived by the sense organs of the body, and with the body and its sense organs out of the picture, the world ceases to exist and matter. Besides this, such a person is deemed to have reached a level of enlightenment when he understands the transient and false nature of the world, and any wise man would not hanker for something that has no truth in it, that has no sense in it, that has no essence in it.]

14. This perpetual state of dispassion and detachment is akin to the state of existence known as ‘Samadhi’. [Samadhi is a trance-like state of bodily stupor at the gross leel

of existence when the person is not aware or conscious of his surroundings and what he is doing.]

In such a spiritually eclectic state of Samadhi one sees the Lord of the world, Lord Jagdishwar, everywhere and at all times. [In other words, whatever exists is nothing but the Lord of creation in that form for a highly realised and enlightened spiritual aspirant. He sees each unit of creation as a visible manifestation of his Lord.]

Such an acclaimed and highly attained holy soul is able to have a first-hand and face-to-face experience of the Lord. [That is, he can communicate with the Lord directly; he has a direct contact, a direct connect with the Supreme Being and can see the Lord first-hand; he has a divine vision of the Lord and witnesses him face-to-face.] (14).

15. [The following narrative is a bit long and it outlines what happens when a devotee of Lord Vishnu, or a self-realised and enlightened man dies. It will be noted that the initial part of the narrative corresponds to the philosophy of Yoga which elaborately describes how a practitioner of meditation collects all his vital winds called Pran and uses various techniques of Yoga to direct the Pran upwards to finally leave the body through the Brahm-Randhra which is a hair-like slit in the cranium. Yoga calls it 'Kaivalya Mukti'. The second half of the narrative describe how devotees of Vishnu obtain the divine abode of the Lord they worship. The latter sort of Mukti is called Samipya and Sayujya. Samipya means to be near the deity worshipped, and Sayujya means to merge and become one with the deity. The following paragraph nos. 16-17 would trace his path in heaven where Vishnu resides. This narrative would be followed up in Canto 6 as well.

A reading of the narrative that follows in this Canto and continues in the next two Canto nos. 6 and 7 would give a magnificent picture of the multi-layered and astoundingly mysterious Heaven. It is almost like a travelogue being narrated by a person who has undertaken an interesting journey through fascinating countries to reach his final destination. But the overriding question here is this—when the Upanishads have unequivocally and unanimously declared that the Supreme Being known as Brahm is only 'one' and not more than one, i.e. the philosophy of Advaitya or non-duality in creation, then how come we have so many heavens and so many different Gods and angels residing in them, all of them as divine and glorious as the other? How do we reconcile the fact that there are so many Vishnus and as many Vaikunths (abodes of Vishnu) with the eclectic philosophy of Advaitya? Well, this question is answered in Canto 8, paragraph nos. 1-7 of this Upanishad.

The description of what one encounters during his journey through the various layers of heaven are almost like a person's first hand account of his travels across various countries. The mountains, rivers, glittering cities and charming verdant forests are all very much the same wherever one goes on the surface of the earth, with slight variations of course. At one place the mountain may look green and at some other place it might be blue, but the word 'mountain' would imply the same thing.

Had it not been for political divisions of the earth artificially into numerous countries and states, the earth which God made would be one single habitat. The former division of earth into tiny or huge countries and states and continents would be like the concept of 'duality' or Dvaitya in terms of metaphysics, while the latter view of one single earth as the habitat of the living creature would obviously be the 'non-dual' or Advaitya view of the Upanishads. Further, history has shown that what was one single country at some given point of time in the past becomes two or more independent countries in future, and vice-versa. So, an intinerant traveller who had

travelled decades ago and undertakes the same journey through the same terrain now or in future would be describing two or more different countries, and even one country as the case may be as compared to what he had experienced long long ago.

The same analogy applies to the various heavens and their description in these three Cantos. The similarities in the different sights that the spiritual traveller sees en-route to his chosen spiritual objective of reaching the Supreme Being known as Brahm, his final destination, also proves that these divisions of heaven into different segments is also artificial and imaginary. This view of the journey through the heaven conforms to the ideas expressed in relation to the journey on the surface of the earth through different countries as outlined above. Basically they are all the same, and the divisions are artificial. It is also just like the imaginary divisions of the sky into various layers or the air being given different names just for the sake of understanding while everyone knows that neither the sky nor the air can be fractioned or mutated and then assigned independent names and identity.

There is another similarity between the journey through the different layers of heaven and that through various countries on earth. When an important person visits a country or a state, protocol is observed—he is welcomed at the boarder, escorted to the head of state, mutual respects, honours and necieties are exchanged, and then the visitor is seen off at the state's boarder as he enters the next state. The same thing would be observed as one reads through the narrative of this Upanishad wherein the spiritual traveller is welcomed in one heaven, escorted to its chief deity, mutual respects, honours and necieties are exchanged, and then the traveller is escorted to the boarder of the next layer of heaven.

Keeping this in mind, let's begin the magnificent journey through the Heavans.]

When this devotee of Lord Vishnu and a highly self-realised man wants to leave the mortal body, all the attendants of Lord Vishnu come to him (to escort him and facilitate his passage to heaven).

The devotee focuses his attention on the Lord and contemplates that his inner self, his 'true self', is nothing but the 'Atma-Tattva' (i.e. the essential element of life and existence which is pure consciousness) that is present in the subtle space of his Lotus-like heart (which is compared with a divine Lotus to indicate its purity and immaculacy).

With this eclectic and enlightened view about himself, the devotee worships and honours the Lord. He worships and honours the Lord internally by offering his 'true self' at his service. [That is, he does not offer any form of external worship or offers verbal prayers or physical oblations as is usually done during formal process of worshipping. Instead, he prays and worships the Lord internally. This is the most sincere, highly evolved, most extolled and a true form of worship because it involves one's inner being, one's 'true self', one's Atma, one's subtle body, and excludes the gross body and the fallacious notion of it being the 'self' who is worshipping the Lord. The latter is a false form of worship because the instrument used for worship—i.e. the gross body—is false!]

Then he continues to say the 'Hans Mantra'—which is 'So-a-Ham'¹ (literally meaning 'That essence and truth is me'—while he exercises full control over all his sense organs and their natural tendency to be extrovert (i.e. run towards their respective sense objects in the material world) and tames the mind. At the same time, silently pronounces the divine Mantra of Pranav (Brahm) which is OM and focuses him mind on it. While doing this he also simultaneously but gradually controls and

harnesses the vital winds in the body called Prans (by practicing Pranayam or breath control, Bandha or closure of all the subtle apertures of the body, etc.), and diverts them upwards. He (here meaning his 'true self', his Atma, his pure 'consciousness', his vital life forces) moves up with the Pran and ultimately makes his exit from the gross body through the Brahm-Randhra² present on the top of the head. [Yoga Upanishads describe in graphic detail how the Pran makes its exit thorough the Brahm-Randhra which is a hair-like slit on the top of the head on the cranium. The Atma rides piggy back on the Pran and escapes from the body along with the Pran. This form of Mukti is described as Kaivalya Mukti³ because once the Pran escapes in the outer atmosphere, it merges with the parent air element and never re-enters the body. The rest of the body disintegrates into its other components—the earth, water, fire and sky.]

[Now, the symbolic form of worship of the Lord is described by drawing a parallel from the physical form of worship that the devotee is well acquainted with and accustomed to from his earlier stages of life—]

The aspirant who is striving to attain Mukti by allowing his Pran (vital life forces) to escape through the Brahm Randhra worships the Lord (Brahm; the cosmic Consciousness) at this high point (i.e. the Brahm Randhra) by using the Mantra 'So-a-Ham' (to establish oneness between himself and the Lord known as Brahm; to establish oneness of his own consciousness with the cosmic Consciousness). This Lord occupies an exalted position at the top of the twelve units of existence. [The 'twelve units' consists of the following—(a) the gross body with its five organs of perception such as eye, ear, nose, tongue and skin, and the five organs of action such as hands, legs, mouth, excretory and genitals, as well as (b) the subtle body consisting of the mind and the intellect. By saying that the Lord sits on the top this pile it is meant that he is the Emperor who presides over this body of the creature. According to the genesis of creation, when the Supreme Being had finished creating the body of the man, he injected all its vital organs with their respective life-senses. Then the Lord decided that this creature of his own creation would need his guidance and control, so he entered and took up his exalted abode at the highest point in the body, and it was the top of the head. If the individual's body is regarded as a microcosm of the universe, the top of his head is equivalent to the highest 'heaven' where the Supreme Being resides.]

This mystical form of worship is done by offering symbolic forms of the five objects used in formal worship. [The five objects used as offerings in formal worships are flowers, scent or perfumes, water, lighted lamp and sweets. The five things offered now instead of these things are the five main vital winds called the 'Panch Prans'—viz. Pran (breath), Apaana, Vyan, Samaan and Udaan.]

This is followed by worshipping and honouring the Gyan Atma, the subtle consciousness that is at the core of the sixteen Tattvas of creation and which invests them with their inherent virtues and natural characteristics along with empowering them with the necessary vitality and strength to form the basic infrastructure of creation. The Mantra used here is also 'So-a-Ham'. [This is done to indicate that the aspirant has realised the universality of the soul and the consciousness. He has understood that the Gyan Atma that empowers the Tattvas of creation is the same consciousness that has enlivened his own body and his vital winds. It is the same consciousness that is also called his 'true self'. The sixteen Tattvas mentioned here are the following—The sixteen Tattvas are the following—the five organs of perception (ear, eye, nose, tongue and skin) + the five organs of action (hand, leg, mouth, anus and genital) + the five Prans (the five subtle forms of the vital winds

present inside the body—such as Pran, Apaana, Samaana, Vyan and Udaana) + one Mana (mind) = 16.]

In this way the spiritual aspirant discards his mortal body and assumes an ethereal form of the body which is very subtle, without any tangible form as if it was almost imaginary, a body which exists in the ethereal form similar to the Mantras (OM, Hans and So-a-Ham), a body which is most pure, holy and divine like the self-illuminated and glorious Brahm (cosmic Consciousness), a body which is eternally and supremely blissful, and a body which is like the magnificent divine form of Lord Vishnu.

He then takes a symbolic purifying bath with this ethereal body in the symbolic holy river Ganges that itself is holy and ethereal and has emerged from the large toe of the exalted Lord Anant (i.e. the Lord who has no end; the Viraat Purush or Lord Vishnu) who is established high up in the heaven like the Sun is in the solar system.

Having assumed a divine and ethereal body like that of Lord Vishnu himself, the aspirant adorns himself with magnificent clothes and bows to his Guru to pay his last respects to him and thank him.

[Ready to embark on his onward journey towards his final destination of attaining Mukti when he would be ultimately reaching the highest citadel of Param Pad, the traveller readies himself to undertake the long and magnificent journey through the many Vaikunths, the heavens where Lord Vishnu lives in his different forms—] The aspirant then invokes Vishnu's vehicle known as Garud (the legendary heron or eagle) in a symbolic manner by treating the ethereal Mantra of OM representing Pranav or Brahm as a personification of Garud. [This Mantra OM is the most enabled of the Mantras and is regarded as the nearest analogue for Brahm, the Supreme Being. It provides a direct access to Brahm. So a wise aspirant invokes this OM Mantra in order to go direct to his chosen destination—i.e. the Supreme Being. Since the principle of non-duality has taught him that Vishnu is the same as Brahm, both being the same Divine Being, he chooses OM as a symbolic form of Garud.]

When Garud is thus invoked and arrives to take the aspirant ahead, he worships the former and pays his respects to this divine vehicle by offering all the symbolic five objects that are needed for such purposes. [These are flowers, scent, water, lighted lamp and sweets. A lot of symbolism is again used here. OM is an ethereal sound formed of currents in cosmic ether. It represents the dynamism of the wind element. This wind element has assumed five dynamic forms vis-à-vis the individual aspirant—they are called his 'Pran'. So, the meaning here is clear—the aspirant offers all his vital winds to OM; he collects all of them to empower him to lift himself and find freedom from the 'gravitational pull' of the gross body. 'Gravitational' because the gross body is dominated by the 'earth' element.]

The aspirant pays his obeisance to his Guru finally by going round him in circles (i.e. circumambulating him). He takes the Guru's permission before boarding Garud in the form of Pranav or OM. [That is, he finally takes his last breath and says OM before exiting from the body.]

At this time he appears as glorious as Lord Vishnu himself. He is marked by divine signs that are unique symbols of Vishnu, and is adorned by magnificent clothes as worn by Vishnu. [This refers to the 'ethereal body' of the spiritual aspirant, and not his 'gross physical body' that lies dead on the ground.]

As the devotee aspirant embarks upon his celestial journey to heaven (i.e. to Vaikunth where Lord Vishnu resides) through the path of the sky, he is escorted (led) from the front by the Sudarshan Chakra (the discus of Vishnu) in a personified form.

Vishwaksen too protects him. [‘Vishwaksen’ is a deity who is said to protect devotees of Lord Vishnu from all evil omens and charms. He occupies the same importance as Lord Ganesh who is worshipped before all other Gods during any religious ceremony to grant it his protection and ensure its successful completion.] Other attendants of Vishnu surround him on all sides.

On both sides of the path to heaven there are many holy and auspicious places. He is welcomed, honoured and shown due respect by the holy men (divine spirits) who inhabit these places as he passes through them on his onwards journey.

He reaches and enters the ‘Satya-Loka’, the abode of Brahma the creator. There, he worships Brahma, and in return is himself honoured and shown respect to by Brahma and other holy residents of Satya-Loka.

Proceeding ahead, he reaches the abode of Lord Shiva called the ‘Ishan-Kaivalya’ (or the celestial Kailash). There, he meditates upon Lord Shiva and offers his worship to the Lord. In return, he is shown due respect and honoured by Lord Shiva and his attendants.

From there, he goes ahead and crosses the ‘Graha Mandal’⁴ (the abode of the various Stars and Planets that are said to affect the creature’s life on earth) and the ‘Sapta-Rishi Mandal’⁵ (the abode of the seven celestial Rishis or sages; astronomically the area of the constellation of seven stars called the Great Bear).

Moving ahead, he crosses thorough the boarder that marks the realm of the Sun, called the ‘Surya Mandal’, as well as the realm of the Moon, called the ‘Chandra Mandal’⁶.

Then he remembers (meditates upon) Lord Kilak-Narayan and enters the ‘Dhruv Loka’. He has an auspicious view of this ‘Dhruv Loka’ (the realm of the North Star) and worships Lord Dhruv⁷.

Then he passes through the next ring in the celestial sky by crossing through the ‘Sishu Maar Chakra’ (also called the Sishu Maar Mandal). There he worships the God known as ‘Sishu Maar Prajatpati’⁸, or the presiding deity of this Mandal which lies beyond the Dhruv Mandal.

Then the aspirant worships Lord Vishnu who resides in the center of this Sishu Maar Chakra⁹ as its core or hub. Vishnu is the eternal and almighty Lord who forms the foundation that supports everything in this creation. The Lord is so pleased by him that he reciprocates his worship by honouring the devotee himself and also praises him.

From there, the devotee moves ahead and reaches higher where he attains supreme bliss and happiness (of achieving his much sought-after destiny located in the upper echelons of heaven where his revered Lord Adi-Vishnu or the Lord Adi-Narayan resides as narrated in paragraph no. 17 herein below) (15).

[Note—¹The Mantra *So-a-Ham* has been described in a number of Upanishads—viz.

(i) Sam Veda = Yogchudamani Upanishad, verse no. 83. (ii) Krishna Yajur Veda = Brahm Vidya Upanishad, verse no. 34, 78-79; Yogshikha Upanishad, Canto 1, verse nos. 131-133; Panch Brahm Upanishad, verse no. 28; Varaaha Upanishad, Canto 2, verse no. 17, Canto 4, verse nos. 1.11-2, Canto 5, verse nos. 69-72.

Similarly, the Mantra *Hans* has also been described in a number of Upanishads—viz. (a) Krishna Yajur Veda—Shwetashwatar Upanishad, Canto 2, verse no. 6; Canto 6, verse no. 15; Tejobindu Upanishad, Canto 1, verse no. 3-4; Dhyani Bindu Upanishad, verse nos. 24, 61-65; Brahm Vidya Upanishad, verse nos. 16, 20-28, 34, 60-64, 78-79; Yogshikha Upanishad, Canto 1, verse nos. 131, Canto 2, verse nos. 5, 9-11, Canto 6, verse no. 20, 53-54; Yogtattva Upanishad, verse no. 99; Varaaha Upanishad, Canto 5, verse no. 52, 54-55. (b) Shukla Yajur Veda—Hansopanishad is exclusively dedicated to explain the concept of the pure conscious Atma by way of

using the metaphor of a Hans. (c) Sam Veda—Yogchudamani Upanishad, verse no. 31-35, 82-83, 93.

²*Brahm Randhra* is a hair-like joint or slit on the top of the skull where the two parts of it are joined. It is believed that the supreme Brahm had entered the creature's body at the time of creation through this slit. Refer Aeiteriya Upanishad of the Rig Veda, Section 1, Canto 3, verse no. 12; Paingal Upanishad of Shukla Yajur Veda, Canto 1, verse no. 11. Great ascetics aspire to access Brahm by concentrating their attention here; at the time of death their Pran or the vital wind leaves the body through this opening by splitting it.

Mukti (or liberation and deliverance) by the escape of the Pran (the vital winds) along with the Atma (the consciousness) through the Brahm Randhra has been described elsewhere also—viz. Krishna Yajur Veda = Kshuriko-panishad, verse nos. 18-20; Amrit Naad Upanishad, verse no. 27; Yog Kundali Upanishad, Canto 3, verse nos. 12-17; Dhyan Bindu Upanishad, verse nos. 103-106.

³The concept of *Kaivalya form of Mukti* has been explained in a number of Upanishads, viz.—(a) Shukla Yajur Veda tradition—Paingalo-panishad, Canto 4, verse nos. 7-8 and 15; Muktiko-panishad; Subalo-panishad, Canto 13, verse no. 1, and Mandal Brahmin Upanishad, Brahman 2, section 3, verse no. 1; Brahman 3, section 2. (b) Krishna Yajur Veda tradition—Dhyan Bindu Upanishad, verse no. 93/15, 103-106; Yogtattva Upanishad, verse nos. 12-18; Sarva-saar Upanishad; Tejobindu Upanishad, Canto 4; Skanda Upanishad, verse no. 15; Niralamba Upanishad. (c) Atharva Veda—Naradparivrajak Upanishad, Canto 3, verse no. 21; Canto 5, verse no. 22; Canto 7, verse no. 11; Canto 9, verse nos. 9-11, 19-22; Tripadvibhut Maha-Narayan Upanishad, Canto 5, paragraph no. 15, 1st half; paragraph no. 17, last stanza; Canto 6, paragraph no. 22; Canto 8, paragraph no. 6, paragraph no. 19 last stanza; Atma Upanishad, verse nos. 23-25.

⁴*Graha Mandal*—There are said to be nine 'Grahas, collectively called the 'Navgraha'. They are the following—Sun, Moon, Mars, Mercury, Jupiter, Venus, Saturn, Rahu and Ketu. However, the Atharvashir Upanishad of Atharva Veda tradition, in its Kandika 2, verse no. 9 refers to only eight Grahas, and they are the following—Sun, Moon, Mars, Mercury, Jupiter, Venus, Saturn, and the combination of Rahu and Ketu which are considered as one and not two entities as they are supposed to represent the ascending and descending phases of the Moon. This Upanishad is in honour of Lord Rudra as another name of Brahm, and says that Rudra is a personification of the eight Grahas.

The Vishnu Puran, section 2, canto 12, verse no. 1-28 describes the Grahas and their divine chariots and their horses.

⁵The *Sapta Rishi Mandal*—the phrase literally means a group of seven sages. This group is divided into two sets of sages that relate to two different Manvantars (Hindu eras measured according to the period of one Manu, the progenitor of living beings during one phase of creation on earth)—viz. (i) the sages of the 'Vaivasvata Manvantar', and (ii) sages of the 'Swayambhu Manvantar'.

The seven sages of the 'Vaivasvata Manvantar' are the following—Atri, Bharadwaj, Gautam, Jamdaagni, Kashyap, Vashistha, and Vishwamitra.

The seven sages of the 'Swayambhu Manvantar' are the following—Angiras, Atri, Kratu, Marichi, Pulaha, Pulastya, and Vaishtha.

The group of seven bright stars in the sky, popularly known as the Great Bear, is a personification of these seven great sages of yore.

⁶The *Surya Mandal* has been described in detail in the Vishnu Puran, section 2, canto 10, verse nos. 1-23, while the *Chandra Mandal* is narrated in the same Puran in its section 2, canto 12, verse nos. 1-28 along with the description of the various Grahas.

From a more practical view point it is like a cosmic journey undertaken by a modern space-craft launched to reach the deep recesses of the cosmos. It is not a small wonder that ancient sages and seers could envision such a voyage into outer

reached of the universe by the sheer power of their mind. In the present scenario narrated in this Canto, our protagonist or hero devotee appears to have just crossed the solar system!

⁷*Dhruv*—He was the elder son of king Uttanpaad from his first wife Suniti. The king was so charmed by his second wife named Suruchi that he completely neglected Suniti and Dhruv. Once it so happened that the child Dhruv was snubbed by his step-mother for attempting to draw affection of his father. The child was very upset and despondent. He approached his mother for solace. She advised him to accept Lord Vishnu as his eternal and loving Father and protector. For this, Dhruv had to do severe Tapa (austerity and penance). The overwhelmed child was so determined that he immediately proceeded to the forest to do Tapa. He met the celestial sage Narad on the way who instructed him on ways to meditate upon the Lord. The Lord was extremely pleased by Dhruv's sincerity and devotion and appeared before him. He blessed the child and gave him two boons—one was the restoration of his honour and kingdom of the kingdom, and the other was a permanent place in the heavens, a position so exalted, steady and unwavering that even the God could not match it. So, in due course of time, Dhruv assumed a personified form of a divine God and took up his heavenly abode in the Dhruv Loka. The story related to him is narrated in detail in the Vishnu Puran, section 1, cantos 11-12.

The *Dhruv Loka* or *Dhruv Mandal* is represented by the North Star and its immediate environs in the celestial map. The North Star is a personified form of Dhruv. The North Star has a great symbolic importance and value here. This star remains static and unchanging in its position in the sky—it is a metaphor for stability, uniformity, unchanging nature, steadfastness and durability. It is a vital guide for navigation purposes in the night. Hence, if a person is steady in his thoughts and single-mindedly pursues his chosen path, always keeping the aim in sight, he is sure to achieve success and obtain his objective in life. The objective of the spiritual aspirant is to attain his Lord Vishnu and find Mukti. So when he has crossed all hurdles and overcome formidable obstacles in the symbolic form of praises and honours lavished on him en-route to heaven as described above in this narration, it is only then that he can rupture through this world and reach the exalted abode where Vishnu lives. Now, if the celestial sky is imagined as a huge sphere, then this is the point from where the cosmic traveller has ruptured the solar system and entered the upper reaches of the cosmos where the upper heaven is situated. Since Lord Vishnu's abode is supposed to be unchanging and steady in its glory unlike other worlds, the metaphor of the North Star as a gateway to Vaikunth, the abode of Vishnu, appears to be very appropriate here.

The *Polar Star* is fixed in the northern horizon. So this stanza clearly means that the heaven-bound spiritual traveller or the spiritual pilgrim is heading 'north'. This term 'north' is a metaphor for the upwardly inclined spirit, the inherent and natural tendency of the soul to look up and not down. This means that the soul of all the creatures, if left to its own, would always be inclined to be virtuous, auspicious, noble and righteous, to be aspiring to move up in the hierarchy of creation and revert back to its ethereal form that is eternal, infinite and unbound, and find its final emancipation and deliverance, rather than remaining trapped in the lowly world where it has taken a dwelling in the gross body of a creature.

The 'north' is an allegory for a higher level of positive energy of the supreme Consciousness or the heaven which provides an elevated and an exalted stature to the creature as compared to the 'south' direction which stands for the nether world, the hell and the lowly forms of creation. Hence, while the 'north' is spiritually rejuvenating, uplifting and liberating, the south on the other hand is degrading, demeaning, demoting, and tantamount to fall and a downward slide of the creature. This is also why ascetics and hermits head for the mountains in order to meditate and contemplate because these mountains are located in the northern direction when one

thinks in the terms of the grand Himalyan ranges in the context of India where these Upanishads were revealed.

The word *Kilak* refers to a nail or peg used to fix the position of something. In other words, the wise and enlightened aspirant is focused on his spiritual objective; he is fixed on it. No temptations of the glittering heaven would be strong enough to either distract him or keep him trapped in its snare. He would not stop from moving ahead inspite of the most fascinating sights he encounters on the way to his final destination. He would not think, say, that instead of undertaking the journey continuously he should rather take rest and feel contented with whatever charms that are so easily made available to him in the various layers of heavens that he encounters. No, he keeps moving ahead relentless. He does not wobble, waver or dither in his determination of his spiritual pursuit. When this imagery is applied to the practical world, there is a noble message for all spiritual aspirants—and that is, they should keep their mind fixed on the objective and do not fall prey to the uncountable temptations and alluring charms of the material world. The latter acts as the stumbling block in the path of one's liberation, deliverance, emancipation and salvation. He should neglect them and move steadily ahead.

⁸The *Sishu Maar Chakra* or Sishu Maar Mandal and its presiding deity, the Sishu Maar Prajapati, is described in detail in the Vishnu Puran, section 2, canto 9, verse nos. 1-5. It is said here that the Dhruv Loka is situated at the tail end of the Sishu Maar Chakra. The Sishu Maar is one of the many esoteric forms of Lord Vishnu, and it is shaped like a chameleon, or a lizard or an alligator. It represents the 10th sign of the Zodiac and is called the Capricorn. The Zodiac is the belt or band of constellation of stars through which the Sun, the Moon and the planets move across the sky.

⁹The deity known as *Sishu Maar* is a form of Lord Vishnu as a celestial chameleon or alligator. The constellation of stars around this central Authority is represented by the Zodiac sign of the Capricorn. In other words, when this deity known as Sishu Maar Prajapati is worshipped, actually it is Lord Vishnu who is being honoured in this form. In the broader perspective of things, this fits in very well with the concept of Advaitya Vedanta or the principle of non-duality that stresses that whatever that exists in this creation is nothing but one single Divinity revealed in all these forms. Therefore, not only the deity of the Sishu Maar Chakra but all the others mentioned in this Canto or anywhere else in this Upanishad are in fact none but Vishnu in that form. It must be noted however that the term 'Vishnu' itself is a synonym for the Supreme Being known as Brahm, the divine entity which is the Absolute Truth of creation and the eternal cosmic Consciousness. The worship of Vishnu in the center of this Chakra is alluding to the fact that Brahm is central to all forms of life in this creation, whether it is the life on earth or it is the life in the heavens.]

16. Now when he has reached Vaikunth (the abode of Lord Vishnu), all the divine residents of this exalted heaven come to him. All of them welcome him and show their respects to him. On his part he too worships them and shows them his respects.

He then goes to the banks of the heavenly river known as 'Virjaa'. [This river is present in Vaikunth.] He takes a holy dip in it and bathes in its holy waters. Remembering the Lord (Vishnu) and meditating upon him, the devotee abandons his subtle body in the water of this river. This subtle body is in the form of his Panch-Prans, the five vital winds, which have brought his Atma or soul to this holy abode of the Lord. [The five vital winds referred to here are Pran, Apaana, Samaana, Vyan and Udaana. Earlier it has already been described how he had left his gross body and made his exit from it through the Brahm Randhra riding piggy-back upon these five Prans.]

Having discarded the subtle body in the water of the Virjaa river, he emerges from it in an ethereal form which is as holy and divine as a Mantra, a body which is

most divine, glorious and splendorous, a body which is an embodiment of eternal and imperishable bliss, beatitude and felicity, and which is like Lord Vishnu himself. [This form of Mukti or finding salvation is called 'Sayujya' when the devotee becomes one like the deity whom he worships.]

He worships himself on the banks of the river, goes around himself as a token of respect (performs circumambulation), and then bows to his own self. [It seems very odd to do these rituals to worship and honour his own 'self'. But it must be remembered that at this point of time the devotee exists in an ethereal form and is a personification of Lord Vishnu, the supreme Lord. His existence is neither gross nor subtle; rather he has transcended such dimensions or notions. He exists in the form of the universal Spirit. Whom would an Emperor honour if he has to do so? Whom would the supreme Lord worship if he has to worship someone? The answer is 'his own Self' because there is no one senior to him whom he can honour or worship.]

With this ethereal body that is divine and radiant, he enters the Vaikunth proper. There he duly honours and worships all the other holy residents of the place. [Obviously, all of them are like Vishnu. It is because all have accessed this divine abode of Lord Vishnu, known as Vaikunth, only after having passed through all the rigid disciplines this devotee has gone through, and then only could they assume the ethereal form as a Holy Spirit. So the new arrival is unable to distinguish between them and offers his worship to all of them as personifications of Lord Vishnu.]

Then he looks around or goes sight-seeing. He observes a magnificent city with numerous high walls, beautiful buildings, arched gateways, wondrous aerial vehicles, and charming gardens and enchanting green areas.

Then he sees a glorious mountain in the center of Vaikunth. It has dazzling summits, is most magnificent, beautiful and fascinating, is absolutely unpolluted and pristine in natural beauty, and is most wondrous, mighty and lofty in dimensions. This divine mountain is named 'Brahmaanand' because it is 'a mountain of bliss that comes with Brahm-realisation'¹. [This mountain is a personification of the ecstasy and unbound bliss, beatitude and felicity that comes with Brahm-realisation. It is the citadel where Brahm—the travellers main destination—resides. So the spiritual pilgrim would immediately leave this Vaikunth and move ahead on his journey as narrated in the next paragraph.] (16).

[Note—¹Refer Canto 6, paragraph no. 15.]

17. On the summit of this mountain there is a fount of brilliant light having a divine illumination of stupendous radiance and splendour. This represents eternal Anand or everlasting bliss of the highest degree and intensity.

At its core there is the flame of undiluted Gyan or truthful knowledge, wisdom and enlightenment. In the center of it is an altar that is spiritually empowered and mystically awakened. [That is, this holy altar has mystical powers that come with awakening of the Holy Spirit.]

This altar is full of Anand, and is also adorned by a forest of Anand. [That is, spiritual bliss and ecstasy of self and Brahm realisation have completely drenched this altar, it is soaked in this bliss, and this profound bliss is present in it in great abundance. The term 'forest' is a metaphor for abundance and density of Anand in this center of holy Vaikunth.]

On this holy altar, in its center, there is present a divine light of immense brilliance and intensity. In its center is present a most glorious and auspicious 'seat'. In the center of this seat is located the divine serpent named 'Sheshnath'. It is on the

back of this Lord Sheshnath that the supreme Lord known as Adi-Narayan (the primary form of Lord Vishnu; the Viraat Purush; the primal Lord Vishnu) reclines.

The devotee meditates upon Lord Adi-Narayan on this divine seat and offers his worship and respects to the supreme Lord of all that exists, the great Lord of all lords. The Lord is the eternal facilitator, protector, enhancer and sustainer of impeccable and imperishable Anand (spiritual bliss and ecstasy, spiritual beatitude and felicity that is of the purest form, and is infinite and perpetual by nature).

After having worshipped Lord Adi-Narayan, he performs circumambulation and bows most reverentially before the Lord. He takes leave of the Lord, and proceeds ahead onwards in his journey to his final and ultimate destination (to where Brahm resides)¹.

He leaves this lower Vaikunth and rises higher and goes still higher. Then he crosses the five other Vaikunths and finally reaches the 'Kaivalya state' of the 'Anda-Viraat'. [The five higher Vaikunths mentioned here have been described in the next Canto nos. 6 and 7. The Kaivalya state of the soul is when it finally merges with the cosmic Soul to become one with it. In other words, when the Atma of the spiritual aspirant merges with Brahm—the cosmic Soul, the supreme Consciousness—he is said to have achieved the 'Kaivalya state of Moksha', or the spiritual emancipation and salvation that has no equal or parallel. The 'Anda Viraat' is the cosmic Consciousness that lives in the cosmic Egg from which this creation has emerged. It refers to Brahm from whom even the Hiranyagarbha emerged, and from whom the Adi-Narayan was born. In this context, refer to Canto 2, paragraph nos. 9-12, and Canto 3, paragraph nos. 7-16.]

When the devotee reaches this final destination, he worships the Anda-Viraat and finds supreme Anand on having finally arrived at his destination (17).

[Note—¹Refer Canto 6, paragraph no. 15.]

-----*****-----

Uttar Kand, Canto 6

[Continuing with the description of the heaven with its vast dimensions, the present Canto outlines the shape of the 'Brahmaand', the Universe, along with the detailed description of the different Vaikunths which are like so many districts, boroughs or counties of a huge state. The term 'Vaikunth' unifies them all into one single cosmic 'country', so to say, the country of Lord Vishnu, the Supreme Being himself.

These Vaikunths are the following—Yog Laxmi Vaikunth/Maha Maya Vaikunth (Canto 6, paragraph no. 14); Paad Vibhuti Vaikunth (Canto 6, paragraph no. 15); Vishwaksen Vaikunth (Canto 6, paragraph no. 15-16); Brahm Vidya Vaikunth (Canto 6, paragraph no. 17, 19); Bodhaanand/Bodh Vaikunth (Canto 6, paragraph no. 17, 19-20); Tulsi Vaikunth/Tulsi Laxmi Vaikunth (Canto 6, paragraph no. 18); and Anand Vaikunth and Vidya Vaikunth (Canto 6, paragraph no. 19).

The next Canto 7 would describe the other two Vaikunths, viz. the Sudarshan Vaikunth (Canto 7, paragraph no. 2); and the Tripadvibhut Vaikunth (Canto 7, paragraph no. 17).

These are like different enclaves within the heavenly abode of Vishnu called by the general term 'Vaikunth'.

It will be noted that the creation, the universe, has been envisioned as an egg, the 'Anda', known as the 'Brahmaand'. This cosmic egg is divided into five

consecutive layers called the various Vaikunths. At the center is the seat of the supreme deity known as the Tripadvibhut Maha Narayan. Canto 7 will describe a worship instrument known as the 'Chakra or Yantra' which is a worship wheel. This wheel has a number of circles within the outer periphery, and around the central hub. It is a geometrical depiction of the cosmic egg being referred to here. In order to reach the deity Tripadvibhut Maha Narayan located in the hub, the spiritual pilgrim or traveller would obviously have to cross each of these circles, each representing one Vaikunth as named above.

Canto 6 and the early part of Canto 7 describes this journey, while the later half of Canto 7 would describe this Chakra.

There is another very interesting spin-off about the narration of the various Vaikunths in this Upanishad. If we read Cantos 5, 6 and 7 together we discover that it is a very vivid description of the fascinating universe which the spiritual traveller witnesses and passes through during his journey through the heaven. It seems straight out of some science fiction movie. A modern man who is intelligent and inclined to look beyond the humdrum of routine affairs of life towards what lies ahead of the horizon endeavours to unravel the profound secrets of the universe by sending scientific instruments and probes on board rockets and space ships that travel endlessly in deep space for years to reach their targeted areas. But till now this is only a one-way journey as no method has yet been discovered by which these ships and space crafts can ever hope to come back to earth. The only thing they have helped mankind to achieve is a sneak-peep into the fathomless and endless pit of the deep recesses of the universe. The miracle is that the present narrator of our Upanishad could go to the farthest end of this universe and then *come back* to describe to us and other would-be travellers as to what they can expect to encounter on their out-bound journey!]

1. When the spiritual aspirant has obtained supreme Anand (as described in the concluding stanzas of Canto 6 above) as he reaches the highest level of the present egg-shaped world in which he lives, he realises that this is not the end of the creation and the destination of his journey. He realises that the Universe is much larger and the world known to him is only a speck of dust on the vast beach of the cosmic horizon. [As has been already pointed out earlier, this is like a modern-day concept of intergalactic cosmic journey. The analogy is very obvious here.]

So he pierces the shell of the present egg-shaped world, ruptures all its various layers, and escapes out of it. He looks around in wonder and awe, and views the magnificent expanse of the fathomless fascinating Universe stretched all around him.

He then understands the astounding immensity and the vastness of the expanse of the creation by having deep insight and the ability to wisely analyse and interpret things correctly and in the proper perspective that is achieved with the highest level of wisdom and erudition that comes with Brahm realisation.

[Here the term 'Brahm realisation' would apply to the ability to see beyond the visible and the apparent. Brahm is an esoteric, enigmatic, mystical and divine Being that transcends known definitions and boundaries. So, only when a man has the level of intelligence and analytical ability that he can visualise things that are still unknown and arrive at definitive conclusions that he is able to make great discoveries and inventions. The history of modern science is pregnant with such incidents. Hence, only an enlightened man of the highest wisdom, erudition, deep insight, a brilliant and analytical mind, and a sharp intelligence can ever hope to look beyond this world and

attain the pinnacle of spiritual glory. This understanding is very important in the context of the present Upanishad also because it describes many forms of heavens and many forms of the Supreme Being. An ordinary aspirant might be confused that if there is one 'Supreme' Being then how come there happens to be so many Gods and even so many forms of Vishnu. Well, herein lies the answer. They are no one else but varied manifestation of the same and one Divinity known as Brahm, the cosmic and universal Absolute Truth and the eternal Consciousness. The next stanza would make it absolutely clear.]

Upon the dawn of this Brahm realisation and its accompanying exceptional high level of enlightenment, wisdom, sagacity and erudition, the spiritual aspirant realises that the numerous and varied descriptions of the world and the universe, i.e. of the creation, that have been given by various scriptures such as the Vedas, the Shastras, the Itihasas (ancient histories), the Purans (mythological histories), and all other body of knowledge contained in so many different texts and narratives, as well as that which has been described and explained in so many different ways by as many sages and seers, even by the Gods including Brahma the creator, are nothing but narratives of only one 'country', or a limited area of the cosmic map of the entire Universe that was created!

All these narrators (who give varying and often contradictory descriptions of the Universe and its supreme cosmic Creator) do not know the facts and the actual truth of the Universe called the Brahmaand. It is much bigger and diverse than imagined.

[The Vedas recognise a plethora of Gods which are actually personifications of the various dynamic forces of Nature or the various dynamic aspects of the Supreme Being. Then the Vedas offer a long liturgy of prayers to this litany of Gods and deities. When the truthful God is one, then any intelligent man would question the existence of so many Gods and wonder whether they are indeed in existence. Besides this, the Vedas were primarily meant for fire sacrifice rituals. When the Upanishads emphasise that the 'true God' resides in one's own self, when a number of Upanishads dealing with Sanyas (renunciation) explicitly lay out that one should not worship any external God or deity except the one who lives inside the subtle heart as the Atma, the pure and eternal 'self' known as the Consciousness, when they proclaim such great doctrines as 'So-a-Ham'—i.e. 'that is I', where then is the need for so many Gods and deities? The Upanishads even preach that the real fire sacrifice is one which is done internally in a symbolic manner with the body itself as being the fire-pit and the vital winds as the offering. This practice of having numerous Gods and deities is extended to the Purans and Itihasas. So what applies to the Vedas also applies to all of them. In short, a wise and self-realised spiritual aspirant is well advised to avoid them as they are more entangling than liberating. This fact is endorsed by many Upanishads themselves—viz. Avadhut Upanishad of the Krishna Yajur Veda, verse nos. 15 ½, 18 stresses that the scriptures are redundant for those who have already achieved self-realisation and attained the eclectic state of spiritual enlightenment. The Yogshikha Upanishad of Krishna Yajur Veda, Canto 1, verse nos. 4-5 affirms that mere pursuing of scriptures can never lead to one's liberation and deliverance and neither can one find the Lord only on the basis of relying on them. Similar ideas are also said in the Akchu Upanishad of Krishna Yajur Veda, Canto 2, verse nos. 41-41 ½. The Varaaha Upanishad of Krishna Yajur Veda, Canto 4, verse no. 33 also advises one not to indulge in the scriptures beyond a certain limit.

If the scriptures have such limitations, then one can easily understand the limitations of the preachers who teach what they were themselves taught and had

studied. If the basis of study itself is shaky, then the teaching would obviously be as shaky, if not more. It is not that all the sages and seers fall under a general category; they are uncountable exceptions to this generalisation. The indictment implied in this paragraph is not meant for them or for those who study the scriptures but don't take them too literally. Instead, they have the ability to think for themselves and peer deep inside to decipher the hidden message of the scriptures—they understand that all the various forms of godheads mentioned in these scriptures are none but only one Supreme Being in all these forms. For instance, the present Upanishad itself presents a litany of Gods, numerous levels of heavens etc., but at the same time it never tires of pointing out that Brahm is one and it is 'he' who is known by so many names. The scriptures speak the truth, and 'truth' is always one and not more than one. The trick is to understand the hidden meaning of the words of the scriptures, their intent rather than the literal meaning of the words, to unravel this 'truth'. One should not be distracted by so many interpretations of the same truth as is metaphorically depicted in this journey when the spiritual traveller meets so many Vaikunths and so many different Vaishnus that if he is not enlightened and wise he would be flummoxed. Further, the scriptures were revealed and explained by a chain of ancient sages and seers—and not by one single person. Therefore, variations in the method and the terminology are bound to creep in. The preacher or teacher has to modulate his language and methods to suit the present circumstances prevailing at the time as well as the intellectual calibre of the targeted audience. Hence, though the principles taught were universally one and simple, the texts themselves became complicated and diverse.]

It must be noted here that the word 'Brahmaand' consists of two parts—viz. Brahm and Anda. 'Brahm' refers to the Supreme Being known as the all-pervading, all-encompassing, eternal and immutable cosmic Consciousness which is the only 'vital spark of life' and the only 'Truth' in existence, while the word 'Anda' means an egg. The universe is conceptualised as an egg-shaped entity, and the mysterious and most astonishing factor that enables this egg enclosed by a hard shell to harbour and nourish life without any external assistance, to become self-sustaining and self-sufficient, is known as Brahm. The innards of the egg is just like a shapeless mass of jelly, and it is the most surprising wonder of creation as to how this mass metamorphoses itself into a wonderful creature having exceptional sizes, shapes, features and beauty along with astounding complexities of character. Therefore there must be some hidden and inexplicable authority, power and dynamic force that enables this to happen. It is known as Brahm.]

Such narrators who are unaware of even the external shape and form, or the real nature and the truth of the universe or creation in which they live are not expected to be aware of what lies beyond it.

[From the perspective of a wise and enlightened man who has become self-realised and Brahm-realised, those who talk about material world and high or low forms of life depending upon the theory of deeds and results, even about spiritual matters in terms of various forms of Mukti or liberation and deliverance, numerous heavens and as many deities, Gods and spiritual destinations, and so on and so forth, are actually ignorant of the 'truth' and the 'reality' of what is indeed the fact. No faith and reliance should be placed on them or their teachings. They cannot be trusted with the truth of Brahm and Consciousness. It ought to be noted here that these statements are not at all meant to insult or demean the scriptures or their preachers but to emphasise the point that it is more important to understand the hidden meaning in their teachings and doctrines rather than just going by their words and external form

of narratives or descriptions, no matter how vivid and explicit they might be. For instance, in the present Canto and also in the previous Canto and the one that would follow it, a vivid description is given of the many forms of Vaikunth and Lord Vishnu along with the physical path taken by a devotee through the sky to reach this Vaikunth and Vishnu side by side of explaining that there is only one Supreme Being known as Brahm, that this Brahm is a resident in one's self as one's own Atma, and there is only one highest form of Mukti known as Kaivalya in which the individual soul merges with the cosmic Soul, or when the aspirant realises the fact that his own Atma is Brahm personified, and hence now there is no need to seek Mukti outside. The dichotomy, the paradox, and the attendant confusion is evident. It is to remove this spiritual perplexity that this entire paragraph is dedicated to.]

In this situation, how can they know about more esoteric and sublime things pertaining to the Spirit such as the concept of Mukti or Moksha—i.e. of how truthful liberation and deliverance, real emancipation and salvation can be achieved? Mired by such profound degree of ignorance and delusions, how can they know the difference between what is true Gyan (knowledge) and what is Agyan (lack of knowledge)?

[This is because they talk about reaching one or the other heaven, of being near one or the other God, or of assuming the divine form of these Gods as a reward of leading an auspicious life, and they call it Moksha. Then they have a plethora of Gods and Goddesses, numerous forms of Muktis and Mokshas, uncountable worlds and as many rituals. It's all against the eclectic theory that the Supreme Being is non-dual, one, immutable and all-pervasive Consciousness that has no physical form and distinctions as it has a uniform, universal and an ethereal existence. Therefore, all the various philosophies, of which there are two main divisions, only add to confusion if they are not understood in the correct context and properly deciphered. When wisely analysed one would realise that they all talk about one 'God' having different names, and one destination of the 'Spirit' or soul which is finding what 'truly' it is and how to free one's self from evil in this world, which is called Mukti. The two main divisions of Hindu philosophy are 'Astika Darshan' which accepts the authority of the Vedas, and the 'Nastik Darshan' which does not accept them. The 'Astika Darshan' has six branches and the 'Nastik Darshan' has three branches. The six philosophies of the 'Astika Darshan' are the following—Nyaya Darshan of sage Gautam; Vaisheshik Darshan of sage Kannaada, Sankhya Darshan of sage Kapil, Yoga Darshan of sage Patanjali, and Mimamsa Darshan of sage Jaimini. The three philosophies of the 'Nastik Darshan' are the following—Charvaak Darshan of sage Charvaak, Jain Darshan of Lord Mahavir (Jainism), and Buddha Darshan of Lord Buddha (Buddhism).

This paragraph also advises a wise man to avoid numerous cults and practices of varying denominations that sprout around individuals or schools of thoughts. It also advises, by its implications, that one should use one's own intelligence and wisdom to judge things for himself, and not to blindly follow any Guru or scripture just because he has a big name and a huge following.] (1).

2. [The disciple asked—] 'What is the shape of the Brahmaand (i.e. the Universe)?' (2).

3. [The teacher answered—] 'It is shaped like the egg of a hen.

It is all-inclusive and consists of all the Maha Tattvas (great elements) of creation. It is radiant and glowing like molten gold.

Its splendour and dazzle resembles one crore Suns rising together. [1 crore = 10 millions.]

It is visibly manifested as all the four types of creatures. This is the gross form of creation. [The four types of inhabitants of this universe are the following—(i) ‘Andaj’ (those born from an egg, e.g. birds; (ii) ‘Swadej’ (those born from sweat and dampness, e.g. bacteria, fungi and lice; (iii) ‘Udbhij’ (those born from seeds, e.g. plants; and (iv) ‘Jarayuj’ (those born from an embryo inside the womb, e.g. a man). All of them have a gross body.]

It is covered by all the five Bhuts which form the various sheaths around it. these Bhuts represent the subtle aspect of the universe or creation. [The five Bhuts are the primary elements of creation. They are sky, air, fire, water and earth.]

It is surrounded or enveloped from all sides by the following four subtlest entities—Mahatattva (the Primal Essence which is Brahm), Ahankar (ego and pride), Tama (darkness that existed prior to life, or the darkness of ignorance against which the light of knowledge shines, or the darkness of the cosmos in which is embedded the numerous worlds having their own lights much like our own solar system embedded in one corner of the Milky Way), and Mool Prakriti (primary Nature).

[We observe three layers of creation here—the gross, the subtle and the subtlest. The gross level consists of the four types of living beings with the gross body; the subtle level consisting of the five Bhuts; and the subtlest level consisting of the last four entities such as Mahatattva, Ahankar, Tama and Mool Prakriti. If the individual creature is regarded as the Universe in a miniature form then these three rungs of creation would be identified in his own body. They are the following—the outer gross body consisting of the sense organs, the subtle body consisting of the mind and the intellect, and the subtlest body called the inner self consisting of the Anthakaran.] (3).

4. The cosmic egg consists of various layers symbolising different levels of creation. Each level has its own plinth upon which that layer is built. One plinth (or diameter) is said to be one and half Crore Yojans in length. [1 crore = 10 million units; 1 Yojan = approx. 8 miles, but according to some other measuring scales it is said to be either 4 or even 16 miles. Taking the median value of 8 miles as the standard, it follows that the diameter or ‘plinth’ of the cosmic egg is $1.5 \times 10 \text{ million} \times 8 \text{ miles}$.] (4).

5. The Universe or Brahmaand measures from all sides (i.e. its circumference is) approx. two Kharab Yogans. [1 Kharab = 1 billion units; 1000 millions. Hence, the circumference = $2 \times 1 \text{ billion} \times 8 \text{ miles}$.]

The Supreme Being (Brahm or Adi-Narayan or Maha Vishnu) supports this from the bottom in the form of the ‘Maha Manduk’. [The word ‘Manduk’ means a frog. Hence, the Lord supports this cosmos by becoming a cosmic frog and keeping it afloat in the cosmic sea of ether.]

It is like a playing-ball for Lord Narayan. This known universe or Brahmaand or world sticks to the side of one corner of the greater Brahmaand known as ‘Vishnu Loka’ (the Vaikunth). It possesses uncountable and most magnificent qualities that cannot be even imagined by anyone, has not been seen or observed by anyone, and neither has been heard by anyone (5).

6. Just like the Brahmaand described above, there are umpteen numbers of other Brahmaands that are illuminated (i.e. in existence). They have their own worlds and their own surroundings (6).

[Note—In modern age we can visualise each of these Brahmaands as a galaxy. The universe has counteess such galaxies. The Hubble Space Telescope has taken a deep peek into a tiny area of the vast canvas to send back pictures that astro-scientists have analysed to discover that the area has around 5500 galaxies in various stages of evolution and dissolution. This is named by them as XDF—the Hubble eXtreme Deep Field. Thus we have scientific proof that there does exist a kaleidoscope of Brahmaands (galaxies) in this creation.

As we proceed in this narration of the Brahmmands (universes) and the spiritual journey of the aspirant through them we find that he crosses numerous divine worlds, each more glorious and fascinating than the other in specific details but generally following the same pattern. This is also true for the galaxies discovered by scientists—for all of them are more or alike except in detail of size, age, composition and stage of development or dissolution. See also the introductory paragraphs of this Canto.]

7. Those other Brahmaands have four mouths, five mouths, six mouths, seven mouths, eight mouths—in this sequence they extend to thousands of Brahmaands with thousands of mouths. [The number of mouths of different worlds extending to thousands of mouths is simply a metaphor to indicate the stupendous number and variety of these worlds. It also might mean creatures ranging from the single celled organisms such as the algae and the amoeba, to the most complex living beings such as the human race.]

All of them are tiny fractions of Lord Narayan's cosmic body. [Refer Canto 2, paragraph no. 11; Canto 6, paragraph no. 8.]

Each one of them has been created by a separate Brahma (the creator) who has the Raja Guna as the dominant virtue in him and who is only a fraction of the Supreme Being. [The Raja Guna is the inherent quality that motivates Brahma to create the material world around him. Brahma stands for the creative dynamism of Brahm. The Raja Guna is the quality in one's character that motivates one to get involved in activities of the world.]

Similarly, each world has its own Lord Vishnu (the sustainer and protector) with a dominance of Sata Guna, and its own Lord Maheshwar (i.e. Lord Shiva) who is the concluder with a dominance of Tama Guna. Both of these Gods are but a fraction of the vast and all-encompassing Supreme Being called Brahm.

[The Sata Guna is the best of the three qualities and motivates the one who has it to be gracious, compassionate and merciful towards all; it kindles a tendency to give succour and solace to others. Hence, Lord Vishnu possesses this quality as a dominant virtue in him, and this is why he is a merciful Lord who is entrusted with the task of taking care of the world. Vishnu personifies the ability of the Supreme Being to sustain, nourish and protect this creation. Similarly, Lord Shiva has the Tama Guna in a dominant ratio as this quality is motivates one to be short-tempered, angry and intolerant. This is why Shiva possesses these qualities which are however necessary for him to conclude this creation without showing any regrets. Hence, Shiva personifies the ability of Brahm to conclude this creation when the Lord so decides.

The implication of this stanza is that the creation—no matter at what level it exists at a given point of time—has three basic Gunas or qualities in it in different and varying proportions. These three Gunas together form a 'triangle', a geometrical depiction of creation. This is why the creation is called 'Trigun-Mayi'—one that has three Gunas, one that is completely dependent on and characterised by presence of the three Gunas. In this symbolic triangle representing this creation, even if one of the corners representing one Guna is removed, the triangle ceases to exist—i.e. the

creation ceases to exist. That simply translates into an incontrovertible fact that if we must have an entity known as a 'creation', then we must have all the three Gunas in place.]

All these Brahmaands or Universes are like numerous fish and bubbles of water that endlessly swirl around in the cosmic ocean of infinite dimensions and depth. [The countless galaxies float in the vacant space of the universe. This 'space' is the 'ocean' referred to here.] (7).

8. Like the rounded fruit of the tree called Amvala (Indian Goose Berry; *Phyloanthus Embelica*) in the palms of children who play around with it as if they were tiny balls, all these numerous Universes of diversity that cannot be enumerated are tiny balls in the hands of Vishnu who plays around with them. [Lord Vishnu is a term that is applied to the Viraat Purush here. All the three Gods of the Trinity, i.e. Brahma, Vishnu and Shiva are born from the Viraat Purush who represents the macrocosmic gross body of Brahm, the Supreme Being.] (8).

[Note—Refer Canto 2, paragraph no. 11.]

9. Just like the chain of pitchers attached to the water-wheel that draws water from the well, countless Brahmaands along with all their accoutrements go on turning endlessly (i.e. taking birth, expanding and finally coming to an end to be re-born once again) in each of the pores of the body of the Lord Maha Vishnu. [The epithet 'Maha' clearly indicates that the Vishnu referred here and in the previous paragraph is not the one who is compatriot of Brahma and Shiva but someone who is senior and superior to them. He is 'Maha' or 'Great'. Obviously, it is the Viraat Purush.] (9).

[Note—Refer Canto 2, paragraph no. 11, and the current Canto 6, paragraph no. 7 in this context.]

10. When the spiritual aspirant has reached this stage of Brahm Gyan (i.e. when he has developed the highest degree of wisdom and erudition in spiritual matters) he has come to know all the secrets of creation along with its different universes from the inside and the outside. That is, he has now become truly Brahm-realised.

He has seen all the magnificent views and fascinating things, he has experienced and witnessed all the charms and attractions of this creation which are astonishingly awe-inspiring, most mysterious and extremely intriguing by nature. He has literally taken a dive and immersed in the symbolic ocean of joys and surging ecstasy that overwhelm him after this mesmerising experience. Then he crosses the outer boundary that marks the periphery of that section of the infinite cosmos where these Brahmaands are situated.

[That is, he has become highly wise and perfectly enlightened so much so that there is no secret of creation that is hidden from him. The phrase 'from the inside' refers to his experiencing the world first hand by being directly involved in its day-to-day activities, and in the process coming in direct contact with its material objects and charms along with the numerous joys and sorrows that are so natural and normal in this world. The phrase 'from the outside' refers to the state of renunciation and dispassion when he had completely distanced himself from this world and remains a neutral observer or mute spectator to all that is happening around him. So he is fully conversant with both. He has nothing more to desire and expect in this world. He is fully contented and fulfilled. Only such a person can ever hope to ever find true liberation and deliverance from the material pull of this world. He has seen, witnessed

and experienced everything first hand, both from the within as well as from the without.]

He then sails through a vast and uniformly dark cosmic void, observes the symbolic city of 'Mool Avidya' (primary ignorance) located in this fathomless realm of darkness, and remembers or meditates upon the great patron Goddess of this darkness as well as of 'Maha Maya' (the Great Delusion), the Goddess known as 'Avidya Laxmi' (the personified form of ignorance, a fount of ignorance, and its patron Goddess). He visualises this great Goddess as being surrounded by infinite number of Maha Mayas (i.e. uncountable delusions), as being a Goddess who herself is a sum-total of the greatest of Maha Mayas in existence (i.e. she embodies the greatest delusions that ever exist in this creation). This great Goddess is adorned by garlands of immense brilliance and dazzle, is the very foundation of all the great Maha Mayas and lends them her unflinching support and unquestioned protection, is a Goddess who frolics and roams merrily around the mountain of Anand (i.e. is always wallowing in happiness and joys of material comforts and pleasures—implying that the latter are symbols of a person being ignorant and in the dark in spiritual matters), and is the mother of 'Mool Prakriti' (primary Nature that determines a creature's basic instincts, natural temperament, urges, passions and inclinations that are an integral part of his character).

The spiritual traveller then offers his worship to her in various ways, bows before her and gives his thanks to the great Goddess of Maya who is the progenitor of all the worlds taken together. She is the Goddess who represents Lord Vishnu's dynamic powers to create great delusions.

[That is, he says a virtual 'thank you' to all the delusions of all kinds that attempt to trap him in their vice-like grip and tie him down to this delusory material world of sense objects and its fascinating allurments. This world is transient and mortal, it is not the truth and it never gives eternity. So the passage through this entrapping world of material comforts and sense gratifications is equivalent to the passage through the dark void of the cosmos en-route to one's spiritual destination of reaching heaven. This is like sailing through this world of darkness by remaining aloof from it so that the spiritual goal of finding bliss and eternal happiness as well as liberation and deliverance from the cycle of birth and death, which in turn is a result of deeds and their consequences compounded by a man's unfulfilled hopes, desires and passions, can be actually achieved. A conscientious man focused on his spiritual goal is advised to be wary of the honey-trap laid out to catch him by the Maha Maya. Incidentally, this Goddess is also known as Laxmi, who is the patron Goddess of material wealth and worldly prosperity; she is their patron deity. In other words, the spiritual aspirant is made beware of the temptations of worldly riches and their charming allurements, and to take care to not fall in their honey-trap.]

He then moves on ahead to reach the citadel of his spiritual journey which culminates with his attaining the stature of the Viraat Purush. [That is, now he has elevated himself to a level of spiritual existence when he looks at this creation from the perspective of the Viraat. His narrow-minded and short-sighted vision of creation has given way to broadness of approach and wisdom. He has not only realised that he is just a tiny fraction of the vast cosmic ocean, but also that what he had been treating as the 'creation that has an existence' till now is actually founded on the shaky ground of 'Avidya', or ignorance of the truth. It is really the 'Avidya Paad' of Brahm! That is, it is false. This is amply clear in the next paragraph no. 11. So he decides to move on in search of the 'truthful aspect of creation' or the 'creation that would truly

represent Brahm', i.e. the 'Vidya Paad' of Brahm, and ultimately 'Brahm' himself.] (10).

11. [The disciple asked—] 'What is the form and shape of the 'Adi-Viraat'?'

[The learned teacher answered—] 'The whole gamut of creation that comes within the ambit of 'Avidya Paad' (which is the fourth Paad or limb or aspect of Brahm) is Virrat.

[The 'Avidya Paad' is the entire range of creation that forms the fourth limb or Paad of the Supreme Being known as Brahm. It consists of that aspect of creation that has a birth and an end, the creation extending from the single-cell organism right up to the various Gods including the Trinity Gods consisting of Brahma the creator, Vishnu the sustainer, and Shiva the concluder. It has been described in full in Canto 1, paragraph no. 5, Canto 2, paragraph nos. 9-11, Canto 3, paragraph nos. 1-15, Canto 4, paragraph nos. 3, 6, 10-13.]

[Since Viraat is the cosmic gross body of Brahm, since the entire creation is said to be a manifestation or revelation of this Brahm who permeates each single pore of it in the form of cosmic Consciousness, and since this creation is of astonishingly stupendous variety and astounding number of forms, it follows that—] The Viraat has his eyes, mouth (head), hands and legs in all the directions. [Refer also to Krishna Yajur Veda's Shewtashwatar Upanishad, Canto 3, verse no. 11, 14, 16.]

[That is, Brahm is present everywhere and in as many forms as there are number and types of creatures. The phrase 'eyes in all the directions' refers to the fact that the Supreme Being sees everything everywhere; nothing is hidden or secret from him. He therefore is all-knowing and omniscient as well as a witness to all. Similarly, he is the one who speaks in all the tongues (languages) spoken in this mortal creation; he is the one who forms all the creatures who have a gross body with a head that sees (has eyes), hears (has ears), smells (has a nose), tastes (has a tongue) and thinks (has a mind). It is this Viraat that accepts everything and does anything with his hands; it is the same Lord who goes anywhere and takes the world where it is headed by his legs.]

He gives hands to those creatures who need it; he gives wings to those who need it to fly.

This almighty and all-competent Lord God creates the heaven and the earth alone, without any help of any kind.

His divine form is so esoteric and mysterious that it cannot be viewed in any form by the eyes, whether physical and actual, or imaginary and illusionary.

[That is, the Supreme Being is invisible to the gross organ of sight, i.e. the eye. The eye cannot see him either in actual, physical terms like it sees other things in this world, or even imagine his ethereal form in the way it sees imaginary things such as ghosts and phantoms, or other illusions such as the one seen in the mirage formed in a desert or the scene created by a magician. The mirage as well as the magical scene has no real existence, but for all practical purposes the eye sees them and cannot deny that they do exist. Brahm or the Viraat Purush or the Supreme Creator of this world is so mysterious that the same eye that has the astonishing ability to see physical forms as well as imaginary forms fails to 'see' this Lord.]

The Lord is experienced and witnessed (or, seen, visualised, his presence felt) only by meditation and contemplation using the subtle organs of the body such as the heart, mind and intellect. [That is, the Lord is beyond the reach of the gross organs of the body. He can only be known in a subtle manner through the subtle organs.]

Those wise, erudite and enlightened ones who understand this and have known this mystical fact are the ones who obtain the Amrit (ambrosia, elixir) of eternity and

bliss. They become an embodiment of Amrit themselves (i.e. they become eternal and blissful) (11).

[Note—Refer Canto 2, paragraph no. 11.]

12. The spiritual aspirant who is en-route to his final destination of reaching the Supreme Being (as is being presently narrated from Canto 5, paragraph no. 15 onwards) meditates and contemplates upon his all-inclusive cosmic divine form as the Viraat Purush, a form that is beyond the vision of the eye and incomprehensible by the mind, worships the Lord in many ways, pays his obeisance to him, and takes the Lord's (Viraat Purush's) permission to move ahead on his journey.

Rising higher, he has a panoramic view of the next world of maverism created by Avidya. He observes a most fascinating world and the magical things it contains, a world that is not only created by Avidya but is also an expansion of Avidya.

[That is, he observes the magical world created out of nowhere by the Viraat Purush—a world that has no real existence but is nevertheless so cleverly and expertly made that it creates an illusion of reality and authenticity—like a spectator of a road-side magical show, or a visitor to an art gallery. This is the world of 'Avidya' because it is hollow from the inside and has come into being because of ignorance of the truth and the reality. The observer is filled with awe and astonishment of the highest degree at this fascinating sight. He enjoys this scene while on his way to the abode of the Supreme Being, or Brahm, which is his final destination. This episode, like many others in this narrative, has a great symbolic value. It implies that a wise man knows that what he 'sees' around him in this world have no actuality in it; everything is a mirage and non-reality. So he enjoys the fascinating sight and moves on with his life; he smiles, and after some refreshment, proceeds towards his destination like a traveller who stops for a while on the road-side to refresh himself and then moves on. Like the itinerant traveller headed to his destination, the spiritual aspirant too does not waste much time entangled in the illusionary things of this world. This is the spiritual message in this narrative.] (12).

13. Then he reaches the place where he encounters the 'Maha Yog Maya' of Lord Vishnu (i.e. the great delusion-creating powers of the Lord) in a personified form.

[The concept of the *Maha-Maya* or the great delusion can be understood with a simple illustration. The air element is the same within the earth's atmosphere, but the density of air near the earth's surface is obviously more than the highest point of the atmosphere. Even the level of the various gases and other ingredients of air vary at different levels. Hence, as we move up from the surface of the earth, the ingredients of the air, their density, ratio and properties, change, but primarily they will always remain collectively a part of the air element, inalienable from it, while still retaining their unique virtues which might be different from the air as we understand it to mean. Likewise, the same Supreme Being known as Brahm exists throughout this creation in all its different levels, and this Brahm exhibits different sets of characteristics at each level. It is only the degree of grossness and subtlety that changes, and not the primary nature of Brahm. The fact that Brahm appears to change and exhibit different characteristics other than its original attributes at different planes of creation or existence is called 'Maha Maya'—or, the great delusion.

The phrase *Maha Yog Maya* combines the meaning of Maya and Yoga. Maya means delusions, and Yoga means to bring about a union between any two entities. Hence, the great delusion which is so powerful that it brings together two impossibilities together and makes them appear to be real is called Maha Yog Maya.

For instance, this world is not the 'absolute truth' because anything that is 'true' would remain constant and unchanging. Since the world is changing every moment, it cannot be the absolute truth. Therefore it is false. Truth and False are opposite things just like fire and water; they cannot co-exist. If one thing is true, it cannot be false, and vice versa. But Maha Maya is so powerful that the creature is certain that this world with all its sense objects and charms is true and real. He sees others dying but thinks that he would live forever. Since bringing together of two things is called 'Yoga', this bringing together of two impossible things together to make them appear to be true and possible, or making the truth appear as false on the one hand while making false appear to be true on the other hand is called 'Maha Yog Maya'.]

This Maha Yog Maya is so powerful that it creates an illusion of dichotomy and opposition in the various forms of the eternal supreme Brahm who is an embodiment of infinite bliss.

[Brahm is indivisible, immutable, non-dual and one. Though Brahm has assumed as many diverse forms as they are independent units in creation, each unique in its self and different from its neighbour, and is given so many that they numbers run into thousands, yet Brahm is one and non-dual. All these varied forms and shapes of Brahm are nothing but like the same colour having many hues and shades. They are like the same letter of the alphabet that is used in countless permutations and combinations to form hundreds and thousands of words. The immense diversity creates doubts in the mind of a thinking person as to the reality of Brahm, whether what is said of Brahm as being non-dual and immutable is true or whether it is false. This creates a lot of confusion, perplexity, restlessness and doubts in the mind of the aspirant about the reality and authenticity of Brahm, thereby robbing his peace of mind and its attendant bliss. A man torn between reality and falsehood can never find rest and happiness; he can never find spiritual bliss and mental peace.]

This Maha Yog Maya is like a veil surrounding the truth of Brahm. The magical world created by it is most fascinating and highly astonishing; it is full of maverick tricks, and is like an ocean of surprises which is full of unexpected events and sights. It is so mysterious that inspite of being illusionary and created out of delusions it still appears to be real and everlasting; it appears to be an image of happiness inspite of its horrifying whirlpools of miseries and pains, of turmoil and turbulence.

[That is, though the world created by Maya is illusionary and therefore all its charms are also illusionary, it appears to be so true and real that the creature falls prey to its charms and allows himself to be trapped by it. The deluded creature thinks it to be permanent and a source of happiness and pleasures. He therefore yearns for its sense objects that provide comfort, pleasure and joys, thinking that by acquiring them he would be so much comfortable, richer and happier. But he forgets that a source that itself is illusionary, that has no existence, can never provide anything that is real and has any truthful value. When he discovers that he has not got what he had expected or yearned for, or that things go on changing every other day and his earlier possessions become outdated the next day, he feels dismayed and distraught. He wants more and still more. This never-ending cycle can obviously not give peace and rest to anyone. It is like a thirsty man running behind the mirage in the desert in search of water which he never finds. Thus, the 'great delusion' that is so powerful and sweeping in its reach, import and effects that it can actually bring about a fusion of the truthful with the falsehood so as to make what appears as the 'real thing' is known as the Maha Yog Maya.]

The illusion created by this Maha Maya is so effective that the eternal and real Vaikunth (the abode of Lord Vishnu) appears to have a duplicate form as reflected in the great ocean of Avidya (ignorance) created in this illusionary world of Maha Maya.

[It is very important to understand the import of what is being said here. A deluded worshipper thinks that there is a physical Vaikunth high up in the heaven where a physical God known as Vishnu lives. For him, this Vishnu is the almighty Lord of creation. Well, both this Vaikunth and its Lord Vishnu are not the real Vaikunth and Vishnu that the Upanishads talk about as being the true destination of spiritual aspirants who seek emancipation and salvation by finding the Supreme Being known as Brahm. What they perceive as Vaikunth is not the real destination of the soul because of their ignorance of the reality, and what they think is Vishnu is not the real Lord who is the Supreme Being of creation. This is because the 'real' Vishnu who is synonymous with Brahm is eternal and imperishable, but the Vishnu who relates to the fourth Paad of Brahm has a beginning and an end. This is clearly laid out in Canto 3, paragraph no. 10-11. Thus, this Vishnu is not the eternal and immortal Vishnu who is Brahm, the Supreme Being. If this Vishnu is not the real Brahm, then how can his abode called Vaikunth be the real Vaikunth? The real emancipation and salvation is known as 'Kaivalya Mukti' when the individual's Atma, his 'pure consciousness' merges with the supreme Consciousness. This may happen even without leaving the gross body, in which it case is called 'Jivan Mukti', as well as by leaving the body when it is called 'Videha Mukti'. The gross body is made of five elements such as the sky or the subtle spaces that are present between cells and tissues, the air or the vital winds that keep the body alive, the fire or energy that keeps the body activated and energised, the water or the fluid part of the body, and the earth or the grossest part that make up the skin, bones, flesh and nerves and veins etc. When the 'consciousness' leaves the body, the latter automatically disintegrates into its components. This 'consciousness' is the cosmic Consciousness known as Brahm. Hence, the real Vaikunth is inside one's own self, and the real Vishnu is the Supreme Being residing in one's own inner self as the Atma. The body itself is a cosmos in a miniature form. If one has not become 'self-realised', he cannot become Brahm-realised, and therefore all notions of Mukti and Moksha that he might have, or the belief that there is some physical heaven in the sky where some God lives is just as illusionary as the world in which he lives! This is the great message of this paragraph. It is in strict consonant with the doctrines and philosophy expounded in and espoused by the Upanishads.] (13).

14. When the spiritual aspirant reaches this place, he meditates upon this Goddess known as 'Yog Laxmi' who is a fraction of the Maha Maya, and offers his worship and respects to her.

[The Yog Laxmi again has the same meaning as the phrase Maha Yog Maya. Laxmi is the patron goddess of material wealth and prosperity. Therefore, the word is used as a metaphor for the same and also to imply a great treasury where wealth is in abundance. Now, since the world created by the fourth Paad of Brahm is itself false as it is created by Avidya fostered by Maya, all its wealth would also be false and entrapping for the creature. Hence, Yog Laxmi is the personification of all those factors that tie a creature down to the material charms and comforts of this world, its material wealth, its sense objects etc. It is called 'Yog' Laxmi because a creature makes so many efforts or does such great Tapa (austerity) and suffers so much just in order to access this world and its material wealth. The phrase combines 'Yoga', or the immense effort made by one to reach one's target, and 'Laxmi', or the material wealth

of this world. It also implies that two incompatible things are made to cohabit—i.e. true happiness and peace are made to coexist with the world and its transient wealth which are a treasury of sorrows, miseries, pains and grief, of turmoil and turbulence.

This Yog Laxmi is a 'fraction' of the Maha Maya because material wealth is only one part of the immense variety of delusions created in this world.]

The Goddess also respects him. [The Goddess is pleased with him that he has not fallen in the trap of delusions cast by Maha Maya. She praises his wisdom, erudition and sagacity.]

Then the spiritual aspirant takes her permission to rise higher (and proceed ahead on his journey to emancipation and salvation). From a high position, he observes the numerous and magnificent ways in which the Maya has expanded itself, and feels awe-struck and astonished by the magnificent sight that he beholds before him. [It's like viewing a metropolis from high up in the sky while riding an air plane. The lights of the city spread below cover it in a thick blanket of diffused bright light of many hues which make the area of the earth and the surrounding sky appears to be self-illuminated in a charming array of light.] (14).

[Note—This would be the 'Yog Laxmi Vaikunth' or the 'Maha Maya Vaikunth'.]

15. Above it (i.e. beyond the realm of the Laxmi) is the divine eternal city known as 'Paad Vibhuti Vaikunth'. It is so striking, most astonishing, absolutely magnificent, and most majestic and grand in its form that it appears to be a treasury of such virtues as splendour, grandeur, majesty and magnificence that exist in creation.

It is irrigated with the nectar of bliss and happiness that flows through it.

It appears very auspicious as it is surrounded by a river of Amrit, or the river of ambrosia that is full of the elixir of eternity and bliss surging in it.

It is inhabited by the eternally liberated Souls who roam in it freely.

It is full of buildings that resound with happiness and joy that comes with enlightenment and wisdom.

In the center of it is a mountain called 'Chidanand'—i.e. a mountain of eternal bliss, beatitude and felicity.

On the summit of this mountain there is a fount of brilliant light having a divine illumination of stupendous radiance and splendour. It represents eternal Anand or everlasting bliss of the highest order and intensity.

In the center of it there is a 'Vimaan' representing a fount of supreme Anand.

In the center of this 'Vimaan' there is a gloriously radiant and self-illuminated glowing seat. This glowing seat is like the thallus at the end of the stalk of the lotus flower. On it is seated Lord Adi-Narayan, the primal Lord.

[The word 'Vimaan' literally means a flying machine, an aerial vehicle such as a chariot used by the Gods. The word also means a house or a palace or a dwelling of Gods which is usually seven storeys in height. In temple structures, it is the multi-storeyed tower erected over the sanctum sanctorum of the shrine where the consecrated deity is placed. It also means a seat or an altar where the worshipped deity is seated.

In the present context it refers to a center or a seat of supreme bliss and beatitude.]

The spiritual aspirant meditates and contemplates upon this divine Lord Adi-Narayan, and offers his worship and respects to the Lord. The Lord is so pleased by him that he also reciprocates by showing respects to the worshipper.

The spiritual traveller takes the Lord's permission and moves ahead on his spiritual journey to reach his goal of the ultimate heaven (i.e. find final emancipation and salvation)¹.

Rising higher, he pierces through the various layers of the shell that cover this egg-like universe that is made up of Avidya (and which represents the fourth Paad of Brahm).

He now reaches that part of the creation that is the junction point of the universe called Avidya Paad and that which is Vidya Paad².

The traveller now reaches the next Vaikunth, called the glorious 'Vishwaksen Vaikunth', which is located here.

[Vishwaksen is an important attendant of Vishnu and regarded as the chief amongst the Lord's attendants. He is given precedence over all other attendants or close associates of Vishnu and has the same importance that Lord Ganesh has amongst the Gods. Like the latter who is worshipped first in all religious ceremonies and invoked to give protection and help in successful accomplishment of all endeavours, Vishwaksen too is regarded as the protector of all devotees of Lord Vishnu and helps them in their endeavour to reach the Lord.] (15).

[Note—¹Refer Canto 5, paragraph nos. 16-17.

²Refer Canto 1, paragraph no. 5; Canto 3, paragraph nos. 3, 6, 11.

This is the point where the lower world of Avidya end and the next world of Vidya starts. In other words, it is the boundary between the fourth Paad of Brahm known as Avidya Paad which includes the entire mortal world, and the world of Vidya Paad which is the second Paad of Brahm.]

16. This divine city of Vishwaksen Vaikunth is illuminated by rows upon rows of brilliantly lit lights of immense intensity. It is full of and also surrounded from all sides by divine bodies who are personified forms of the virtues of eternal Anand (bliss, cheerfulness and happiness) as well as of Gyan (knowledge, enlightenment and wisdom). There are numerous buildings and chariots in it that also personify pure Gyan. It has countless mountains (i.e. hills and hillocks) that symbolise mounds of endless Anand. It therefore appears to be extremely astonishing and fascinating. [In short, this divine Vaikunth is full of Anand everywhere. Its happiness and bliss, its cheerfulness, merriment and joyousness are evident everywhere. There is no trace of miseries, sorrows and pains, or of any kind of turmoil and turbulence in it. It's charming and magnificent to the extreme.]

In the center of this magnificent divine city there is a hill or large mound known as 'Kalyan Parvat'—the mountain of welfare and well being. On its top there is a 'Vimaan' (a chariot, a dwelling or a palace, or a multi-layered tower, a seat or an altar where the worshipped deity is seated) which symbolises pure and unadulterated Anand.

Inside this Vimaan there is a divine and very glorious seat that is located at the center of illumination that is of extreme brilliance and is like the splendour that emanates from Brahm, the Supreme Being. This seat resembles the thallus at the top of the stalk of the divine Lotus flower.

On this seat is seated, most majestically and with great dignity, Lord Vishwaksen who is a personification of the virtues of majesty, magnificence, power and authority. He is the upholder of law (i.e. Dharma, or the righteous code of conduct for all activities undertaken by all inhabitants of this creation) and ensures that it is strictly implemented while firmly enforcing prohibitions on unlawful activity. He is the motivator or inspirer of all inclinations, temperaments, tendencies

and habits that form the nature of all the creatures. He is the primary cause of all causes that result in any kind of activity in this creation. He epitomises all the eclectic signs of Anand unbound. [That is, he possesses the signs or characteristics that are the hallmarks of someone who is extremely happy, contented, cheerful and blissful.] He is a personification of Lord Maha Vishnu (the great sustainer, nourisher, care-taker and protector of creation). He protects all kinds of Mokshas (spiritual liberation, salvation and emancipation). [That is, he is the patron God of Moksha and helps those who seek spiritual emancipation and salvation. Those who seek liberation and deliverance from this entrapping world regard Vishwaksen as their patron God or deity.] He is extremely powerful and strong, bold and brave, valiant and valorous.

The spiritual aspirant meditates on Lord Vishwaksen who has these divine attributes, worships the Lord in many ways, and pays his obeisance to him by bowing before him and doing circumambulation around him. Then he takes his leave from the Lord and moves ahead on his onward journey.

As he rises higher he attains an excellent and dignified stature of having accessed Vidya, or the higher level of knowledge and wisdom. He has a panoramic view of the divine and eternal Vaikunth that is glowing with the light emanating from the supreme Brahm spread all around him. This magnificent sight fills him with extreme Anand (cheerfulness, happiness, joys, bliss and contentedness).

[This is a metaphoric way of saying that each step forward in his spiritual progress gives him greater majesty and enlightenment; it gives him greater joys and happiness; he feels more and more bliss and contentedness overflowing him. His stature and dignity goes on enhancing as he moves up in the rung of spiritual ladder towards his final Moksha.] (16).

17. Moving ahead on his spiritual journey (to this final destination of finding Brahm and thereby attaining his Kaivalya Mukti) he crosses many oceans representing Vidya and reaches the divine river called the 'Brahm Vidya Nadi'—literally the river of knowledge and enlightenment associated with Brahm.

He takes a dip in it and bathes in its water.

[That is, he washes off any trace of ignorance that might still be sticking to him till now by taking a dip and bathing in this river of true knowledge, wisdom and enlightenment.]

He meditates upon the Lord and takes another dip (to wash off remnants of his past ignorance, shortcomings and impurities) to cleanse and sanctify himself further. He discards his previous subtle body that was in the ethereal form equivalent to Mantras, and assumes a new body which is more subtle, more spiritually evolved, more glorified and highly ethereal in form. This new body is known as 'Vidyanand'—meaning that this body is an embodiment of 'Anand', or bliss, happiness, joy and contentedness that comes when one has attained Vidya, or truthful knowledge and wisdom.

Having obtained this exalted, glorious and divine body which resembles the one possessed by Lord Narayan, he worships his own Atma (his pure consciousness that is his true self and a personification of Brahm, the cosmic and eternal Consciousness).

[This state of spiritual achievement when the aspirant is able to assume a form which is similar to his chosen deity is called 'Sarupya Mukti'. The fact that the spiritual aspirant has reached this level of spiritual enlightenment is metaphorically implied when it is said that he has taken a dip and bathed twice in the river of Vidya as stated above. Surely such an enlightened soul is expected to realise that the true

Lord whom he has been worshipping till now is no one else but his own 'self' known as the Atma. This Atma is the cosmic Consciousness known as Brahm. This realisation of the 'self' as the pure consciousness fills the aspirant with extreme Anand, or bliss and ecstasy of a high order.]

He is then adored and shown due respect by the divine residents of this Vaikunth who are themselves eternally liberated (because they do not have to assume another gross body by having to take a birth in the gross world again against their wishes).

Overwhelmed with happiness, joy and ecstasy of the highest order, the exhilarated aspirant proceeds ahead to reach and enter the next higher Vaikunth. 'Brahm Vidya' flows through this divine abode; this Vaikunth is rich and pregnant with the glories associated with Brahm Vidya.

[That is, just like a soft, pleasant and fragrant breeze is known to blow in a city free from pollutions and located at a hill station with clean and fresh air, giving it a most charming and relaxing environment, the sublime currents of Brahm realisation and knowledge that flow in this divine city in incessant currents gives it a sublime and spiritual aura. The whole atmosphere of this place is rich in the flavour and aroma of spiritual realisation and its attendant ecstasy and bliss.]

This Vaikunth is known as 'Brahm Vidya Vaikunth'. It is in it that the spiritual aspirant has entered.

It is surrounded on all sides by mountains or hills personifying endless Anand (bliss, happiness, joyousness, cheerfulness, felicity and beatitude) and the exhilaration and ecstasy associated with it.

This divine place is adorned and made glorious by the presence in it of thousands of magnificent ramparts and towers that epitomise Brahm Vidya, and countless beautiful buildings awash with Amrit-Anand (i.e. where the nectar of bliss and happiness are in great abundance, literally overflowing and submerging them). These edifices naturally emanate sweet and sublime fragrances and aromas that are divine in nature. [That is, everything in this Vaikunth epitomises and personifies all the eclectic virtues that come with acquisition of 'Brahm Vidya', or truthful knowledge of the Supreme Being, and its attendant 'Anand' of the highest degree and of a sublime nature which gives eternal bliss and ecstasy that comes with the realisation of Brahm. Any place that is auspicious and holy would naturally develop a divine aura around itself as compared to a place which is not.]

In the center of this divine city known as 'Brahm Vidya Vaikunth' there is a high citadel known as 'Bodhaanand'. Hence, this exclusive enclave would be known as 'Bodhaanand Vaikunth'. This is because it provides extreme bliss that comes with attainment of Bodh.

[The word 'Bodh' means wisdom, awareness, realisation, enlightenment and knowledge, while 'Anand' means bliss, happiness, ecstasy that comes with this realisation. Hence, the spot where the Lord who epitomises these virtues lives is indeed a fount of both Bodh and Anand. And this is why this citadel is known as 'Bodh' + 'Anand' = 'Bodhaanand'. The abode of this extreme Anand that comes with Bodh is therefore known as the 'Bodhaanand Vaikunth'.]

In its front is placed a 'Vimaan' (a chariot or seat or an altar over which there is a tower-like structure). This Vimaan is in the form of Pranav or the ethereal word OM.

[That is, it does not have a physical structure or form but is ethereal in nature and it symbolises the Mantra OM. It is upon this Mantra OM that the Atma of the aspirant had sat to reach upper levels of enlightenment that would lead to the

aspirant's Kaivalya Mukti. It's the medium by which one can reach his higher goal of emancipation and salvation. It is upon this chariot of OM that the holy God who is the presiding deity of this Vaikunth sits. It is this chariot that would take the spiritual pilgrim still higher up in the heaven till he reaches his ultimate destination of becoming one with the cosmic God, the supreme Brahm who is the ultimate 'Spirit' and the 'Father' of the entire creation.]

On this Vimaan is seated a Goddess who is the patron deity of the entire realm of Brahm Vidya. Her mere glance is enough to eliminate all forms of endless Avidya (infinite lack of knowledge; infinite sources of ignorance; the opposite of Vidya) from their roots. She is unique and one of her only kind (because of these and other grand qualities).

This Goddess is the 'Laxmi' that provides Moksha; she is the endless treasury of Moksha. [That is, she is the Goddess representing the dynamic power of Brahm-realisation and enlightenment that can provide the spiritual aspirant with liberation, deliverance, salvation and emancipation. When Avidya, or ignorance, is eliminated, it is natural that Vidya, or truthful knowledge, would sprout in its place. This sprouting of Vidya would ultimately grow into a full-fledged tree if properly taken care of by the aspirant. Then the fruit of this tree would be Moksha. It ought to be specially noted here that the word 'Laxmi' is not used here in the way it is usually referred to and employed to mean worldly assets, prosperity, majesty, opulence and grandeur. Here the word means a treasury of Vidya or knowledge that can provide the aspirant with Moksha, the great spiritual treasure he has set out to find. This is because the context in which this term is used in this paragraph is that of 'Vidya Vaikunth'. Hence, here the term 'Laxmi' means an abundance of Vidya in this part of upper heaven which leads to liberation and deliverance of the soul. From a broad perspective it also means that if one seeks Moksha, the only treasury that he needs is Vidya or wisdom, erudition, truthful knowledge and enlightenment.]

The spiritual traveller offers his due respect to her, worships her properly by doing circumambulation around her, offering flowers and oblations to her, and singing hymns in her honour.

The Goddess is very pleased with him so much so that she herself praises him and gives him due honour—i.e. she reciprocates his gestures of showing respect.

The aspirant then takes her permission to move onwards on his journey to the next higher spiritual destination, and the Goddess accompanies him. [That is, Vidya or the dynamic power of knowledge of the highest order personified as a Goddess known as Laxmi escorts the spiritual aspirant to make sure that he doesn't slip on the way, that the demons known as Avidya or lack of knowledge, and Maya or delusions do not play mischief with him and create an unnecessary road-block in his spiritual journey.]

Reaching the other bank of the river known as Brahm Vidya (i.e. having crossed this river), he observes countless Vaikunths which are full of Vidya and Anand. This divine sight fills him with immense delight and unbound joys.

[Obviously the term 'countless' is a metaphor for numerous districts and enclaves of the Greater Vaikunth that stretch for countless miles beyond this main river. A careful reading of this paragraph would show that the Brahm Vidya Vaikunth is divided into two parts by this great river which flows through it. It's like a great city flourishing on either sides of a great river.]

Further ahead he crosses many oceans full of Gyan (true knowledge, wisdom and enlightenment) and Anand (true bliss, happiness and joys). Then he travels through many 'Brahm Vans' (forests which are endowed with the glory and majesty

of Brahm), and walks continuously over many summits of auspicious mountains to reach a place where he finds many divine Vimaans lined up. These Vimaans are personified forms of Gyan and Anand.

[These Vimaans are either divine chariots or holy palaces or shrines of the supreme God lined up just like airplanes on a huge airport or the many magnificent buildings inside the royal compound of an Emperor. It might also mean that numerous other spiritual aspirants had already reached this place prior to our traveller. These vehicles seem to be abandoned by them after having reached their destination. It ought to be noted now that if this interpretation is taken into consideration, then our present traveller, who does not stay here but moves ahead on his journey, is far more wise and enlightened about the true destination of the soul than his predecessors who had taken up their abode at this place as implied by the number of parked—or should we say ‘abandoned’—chariots.]

When he reaches this place, the spiritual traveller feels immense ecstasy and happiness (because he has achieved success in reaching another milestone towards his ultimate spiritual destination of attaining Brahm and Kaivalya Mukti) (17).

[Note—As would be evident from the profuse use of the terms ‘Anand’ and ‘Vidya’ in this paragraph, the Vaikunth being described here is higher than the Vaikunth which is present in the world dominated by Avidya, and which has been left way behind by the spiritual traveller in the closing stanzas of paragraph no. 15. The Vaikunth where he is travelling now is the one present in the third and second Paad of Brahm, i.e. the Vidya Paad and Anand Paad. Refer Canto 1, paragraph no. 5, Canto 4, paragraph nos. 3 and 6. This Vaikunth is characterised by the dominance of Vidya and Anand of the highest and truthful form.

The following ‘Tulsi Vaikunth’ described in the next paragraph also has these characteristics.]

18. Next in his view comes the illuminated Vaikunth called the ‘Tulsi Vaikunth’. It is most auspicious and a provider of spiritual welfare. [The name ‘Tulsi Vaikunth’ is derived perhaps from the fact that it is rich in Tulsi or Basil plant. The atmosphere of this place is pregnant with the sweet aromatic smell of the Tulsi leaves. This plant is very dear to Lord Vishnu, as much as, if not more than, Laxmi who is his divine consort.]

It is endowed with immense glory, majesty, grandeur and magnificence. It is like an extremely brilliant fount of splendour and radiance that embodies all the glories and magnificence that are associated with Brahm. It is surrounded by many high walls symbolising eternal Anand that is robust and steady.

[In other words, this divine place is illuminated with the light of Brahm-realisation and is soaked in spiritual bliss and ecstasy that is lively and vibrant. It makes the place very attractive and a happy place to live in. Its environment is rich and pregnant with the glory and divinity of Brahm.]

It is situated on the top of a mountain called ‘Anand Parvat’ which symbolises ‘Amit Bodh’.

[The name ‘Anand Parvat’ means a mountain where one can find bliss, happiness, joyousness, cheerfulness and ecstasy in great abundance, while ‘Amit Bodh’ refers to the attainment of immeasurable, endless and infinite spiritual awareness, wisdom, realisation and enlightenment. Hence, when one has reached this Tulsi Vaikunth he is deemed to have gained extreme Anand as well as Bodh. Or, this Vaikunth is characterised by the presence of the virtues of Anand and Bodh of the highest order.]

It is made all the more auspicious and holy by the flow of the river called 'Bodhanand'—literally meaning the river that personifies the spiritual bliss and ecstasy that comes with realisation, awareness and enlightenment about the Truth.

It is adorned by numerous gardens and forests of Tulsi trees (the holy Basil plant) personifying endless Anand. [This is the reason why this part of the heaven is known as the 'Tulsi Vaikunth'.]

It is an epitome of purity and holiness, and is the most pure and holy place amongst all.

It is a personified form of 'Chit'—i.e. of subtle consciousness as well as of something that is lively, vibrant and dynamic.

It's crowning glory is that it is full of holy and divine Beings who have become 'Nitya Mukta', i.e. have attained eternity and liberation from the fetters of the gross body and the world, and their attendant negativity and grossness.

It has countless divine Vimaans (chariots, palaces, shrines and towers) that are made up of Anand. [That is, just like an ordinary Vimaan on earth is made from some material thing, these divine Vimaans are crafted from the subtle virtue of Anand—i.e. extreme spiritual bliss, happiness, ecstasy and joyousness. They appear to be images moulded out of these grand virtues. Since Anand is used to craft them into their present shape, it is natural that they would exhibit nothing but Anand in their characteristic features, their intrinsic value and their properties. These Vimaans are personified or visual or evident forms of Anand.]

It is like a personified form or fount of divine spiritual radiance that forms the center or core from which the virtues of radiance, brilliance and splendour spring out and surround it from all sides (18).

19. Having entered the Tulsi Vaikunth, the spiritual aspirant has an auspicious sight of the patron Goddess of this holy and divine place, known as 'Tulsi Laxmi'.

She is seated with dignity on a glorious Vimaan (an altar or seat), is the divine Goddess who is the consort of Lord Vishnu, the Lord who is complete and self-contained in every respect, is an image of astounding beauty and magnificence as well as the patron deity of these virtues, and is served round the clock by attendants who are full of Anand (bliss, happiness, joys and ecstasy) obtained by being Bodh (realised, aware, attained, wise, knowledgeable and enlightened).

The spiritual aspirant meditates upon this divine Goddess 'Tulsi Laxmi' and offers his respects and obeisance to her. He does circumambulation around her, bows to her, worships her and prays to her by many special hymns.

His worship is reciprocated by the Goddess who also gives him due honours. The holy residents of the place too show their respects to him in various ways.

Taking leave from them, he moves ahead and rises higher to reach the banks of a divine river called 'Parmanand'—literally meaning a river of supreme Anand, or a river in which spiritual bliss and happiness flow like water in a metaphoric sense.

He has a blissful and cheerful sight of the spread of the divine Vaikunth everywhere around him, and this exhilarating sight fills him with ecstasy and delight of the highest degree.

The residents of the place are images of truthful knowledge, wisdom and enlightenment (Gyan) and most ancient (Puran). [These holy residents appear to be old sages and seers who have attained this high stature due to their spiritual achievements and learning.] They duly respect and honour him when he reaches this place.

Beyond the river are divine forests and gardens where flowers rain down like ordinary rain-drops, and where sweet and sublime fragrances and perfumes of different varieties and intensities fill the surrounding environment. These forests are most auspicious, holy, glorious and magnificent.

Then he comes across oceans of Amrit (ambrosia; elixir) surging with heaving waves and electric-like fast flowing currents personifying the energy, the vibrancy and the dynamism that accompanies Anand (bliss, ecstasy, happiness, joy, exhilaration and cheerfulness) that is of an eternal and profound nature.

Passing through numerous chains of mountains and their lofty summits where rows upon rows of divine Vimaans are lined up, and which are like images or icons of Anand and Vidya personified, the spiritual aspirant reaches the boarder of Vidya and Anand Vaikunths.

[These Vimaans appear to be divine chariots of many Gods and divine Spirits who roam around in the higher reaches of the heaven. They can also be shrines of these exalted souls or altars for offering worship to them. They could be at the same time mausoleums or cenotaphs in the honour of exalted souls who lie at rest here.

The passage till this point was through the part of heaven that comes within the third Paad of Brahm, i.e. the Anand Paad. This would be evident when we consider the fact that all the places and things encountered till now had the dominant virtue of Anand in them. This word 'Anand' is repeated again and again to describe their virtues and specialities. Anand characterised every phase of existence till this point in heaven, though it must be remembered that Anand is a virtue that is present in anything or any circumstance where one finds happiness and comfort. Anand is available in the enjoyment of the material world, it is available in spiritual realisation, and it is equally intense in wallowing in the material world of sense objects as it is in total renunciation. All depends upon how one defines and views 'Anand'. So, Anand is present in the world of Avidya (ignorance) and Maya (delusions) as well as in the world of Vidya (knowledge, learning) and Gyan (wisdom, realisation, enlightenment). It will also be present in Turiya state of transcendental existence of consciousness where nothing matters at all. But the Anand of Avidya Paad is gross and entrapping for the soul by its inherent nature, while that of Vidya Paad is of eclectic, pure and divine nature; it is spiritually uplifting and liberating.]

Now the spiritual traveller will enter the second Paad of Brahm's vast realm, called the 'Vidya Paad'. This will be the 'Vidya Vaikunth' or the 'Bodh Vaikunth', so-called because of the pre-dominance of the virtue of Vidya (truthful knowledge) or Gyan (wisdom, erudition and enlightenment) in it.]

Here, at the junction point of the 'Anand Vaikunth' and the 'Vidya Vaikunth', the spiritual traveller reaches the river known as 'Anand'—the river of bliss, happiness, joys and ecstasy. [This river perhaps marks the natural boundary between these two Vaikunths just like rivers often make natural boundaries between two countries or states on earth.]

He takes a dip in this holy river and crosses it to reach the other side where he enters another forest known as 'Bodhanand'—the forest of Bodh (wisdom, awareness and realisation) and Anand (bliss, happiness and ecstasy), a forest where these two sublime virtues are as abundant as trees in a dense forest. This forest is full of the virtues of Anand and Bodh (which fill this place like tall trees in a dense forest). Beautiful flowers rain down as nectar from above in this divine forest. This forest is full of currents of supreme Anand that flow through it incessantly (like drafts of pleasant cool wind or gusts of comforting breeze blowing in a forest on earth). This

forest looks most auspicious and astonishingly charming and comforting to the spiritual traveller who derives immense comfort and pleasure on entering it.

This forest is so huge and vast in its dimensions that it resembles an ocean surging with Anand.

Beyond it are mountains known as ‘Krida-nand’—i.e. where divine Spirits living in Vaikunth go to play and enjoy themselves (much like the hill-stations or picnic spots on earth). [The word ‘krid’ refers to sport, play, game. Hence, the complete word Kridanand means playful activities that give immense pleasure and joy. It is on this mountain that exalted souls living in the upper heaven go to enjoy themselves like we go to hill stations for vacations.]

In the center of these mountains and surrounded by them is the divine Vaikunth called ‘Bodhanand’—i.e. the Vaikunth where Bodh and Anand are the dominant virtues. This is the Vaikunth of the ‘Brahm Vidya Paad’, called the ‘Brahm Vidya Vaikunth’.

[That is, the spiritual traveller has now reached the second Paad or realm of Brahm which is known as ‘Vidya Paad’. Refer Canto 1, paragraph no. 4, and Canto 4, paragraph nos. 3, 6. Highest degree of Vidya or truthful spiritual knowledge, wisdom, erudition, sagacity and insight are the hallmarks of this heaven.]

This Vaikunth (i.e. the Bodhanand Vaikunth of Brahm’s Vidya Paad) is well illuminated by high and well lit towers, turrets, walls, parapets and buildings (19).

[Note—It will be noted that rivers, forests, mountains and cities and other such features that a spiritual pilgrim encounters in his journey through the various Vaikunths have almost identical names, characteristic features etc. There should be no confusion about it. We must remember that he is travelling through ‘heaven’, and therefore whatever he sees or encounters or witnesses is of the best and the highest quality. They are expected to have divine quality and glorious virtues in them.]

It is easy to visualise the situation if we apply the same concept of journey that a person may undertake on earth. While going around the globe he would find mountains, rivers, oceans, forest and cities which are all basically the same, except in their finer details. They are all fundamentally the same in all the countries, but man has given them different names. Similarly, the different landmarks in the different Vaikunths are basically the same, and the names are artificially assigned to them in order to separate one group of sights from the other as he progresses from one Vaikunth to another.

It would be easy to understand this when we apply this concept to earth. The geographical features of earth such as its mountains, rivers, valleys, forests etc. have no names of their own, and neither was the earth divided into countless countries and states that exist today. So, suppose a traveller was going around the globe in today’s world, he would be describing a number of countries as well as these features of the earth as belonging to one country ‘A’ and to another country ‘B’, and so on and so forth.

This would also help us to understand the concept of Advaitya and Dvaitya easily. The undivided earth that is yet not partitioned according to political boundaries would represent the concept of Advaitya, while the same earth divided into a number of countries, each having an independent existence but depending on each other for survival, would stand for the Dvaitya concept of Vedanta.]

20. This Vaikunth is full of numerous Vimaans which appear to be as many images of the virtue of Anand.

[The Vimaans are the numerous altars, shrines, other buildings and chariots of Gods, and they are so pleasant and beautiful to behold that they appear to be images of bliss and ecstasy of the highest degree.]

It is dazzlingly illuminated by the gleaming lights radiating out from countless magnificent buildings that symbolise attainment of special spiritual knowledge, erudition and wisdom, collectively called 'Bodh'.

[The metaphor is to impress upon the spiritual traveller on the one hand and the reader of this Upanishad on the other hand that the virtue of 'Bodh', i.e. the eclectic and divine qualities of spiritual wisdom, realisation, awareness, truthful knowledge, enlightenment etc. that are compositely encapsulated in one single term 'Bodh', are the ones that provide immense source of illumination to the spiritual aspirants. The light of Bodh would remove all darkness from their path. Bodh is enlightening and empowering, and it is the opposite of Agyan or lack of knowledge and dominance of ignorance. Agyan would be the cause of darkness.]

This divine city is adorned by many playgrounds.

It is a personification of the two glorious virtues of 'Bodh' and 'Anand'; it represents the spiritual bliss and ecstasy that comes with realisation and enlightenment.

There are numerous ornamental pavilions, decorative flags, festoons and banners, whisks, big tents and canopies, doors and archways etc. that adorn it in all the directions.

It is thronged on all sides by eternally blissful divine Spirits or Souls that have found permanent liberation from the world (and permanent abode in Vaikunth).

It has uncountable mountains and hills of immense glory, majesty and splendour.

[That is, this Vaikunth is like a treasury where these virtues are concentrated.]

It is the realm of undivided, un-fractured, seamless and constant Anand that comes with Bodh.

[That is, the virtues of spiritual bliss, ecstasy, happiness and joys that come with enlightenment, wisdom, realisation and awareness of the spiritual truths are so common, and a natural and constant feature of this Vaikunth that they to resemble the continuous current of sweet life-giving water flowing in a perennial river which never goes dry even in the longest of summers. This river not only provides sweet water to its immediate surrounding areas but helps irrigate large tracts of land all along its course, thereby fostering happiness and well being throughout the land where it flows.]

It is so sublimely beautiful and divinely magnificent that words and the faculty of speech fail to visualise it or express its form and beauty in words.

It is a glorious realm of immense 'Tej' (radiance, brilliance and splendour) associated with Brahm and its accompanying Anand.

[That is, the glorious virtues of spiritual radiance, brilliance and splendour that are accompaniments of Brahm and of those who have become Brahm-realised, collectively called 'Brahm-Tej', and the unbound nectar of bliss, ecstasy, happiness, joy and contentedness that come naturally in this state of the soul, are the dominant features of this Vaikunth. They effuse and radiate out from it.]

This divine Tej is uninterrupted, steady and un-flickering.

[It is like the lighted flame of a candle that is protected against wind by a glass chimney. The flame would stand erect and remain steady, unmoving and without any flicker.]

This divine city of Vaikunth is like a pure composite structure made out of all the Anand that exists in this creation.

It is an image and visible form of immutable, imperishable and eternal Anand that comes with self-realisation and enlightenment.

The spiritual aspirant enters this glorious Vaikunth called the 'Bodhanand Vaikunth' and is honoured by all its divine residents (20).

21. There is a citadel atop a mountain here in this Vaikunth, and it is named 'Parmanand', literally the mountain of supreme Anand (bliss). This citadel is like a divinely illuminated and splendorous Vimaan (shrine, altar, seat, tower erected over a shrine or altar) symbolising a personified form of the virtues of Bodh (spiritual wisdom, awareness, erudition and realisation).

Inside this Vimaan is a seat that is mystically empowered and spiritually infused with great powers and authority, making it 'alive and activated' (instead of just being a lifeless sitting place that has no vitality in it).

[That is, it is not an ordinary seating mat or a lifeless throne made of certain material, but it is a seat where the mystical powers of the divine Holy Spirit have been invoked, thereby injecting 'life and consciousness and divine powers' into it. It can be compared to an electric gadget that is made alive and active when empowered by the flow of electric current in it.]

The spiritual aspirant meditates upon the Lord Adi-Narayan (the Primal Narayan; the Primeval Lord) who sits on this divine seat, and then offers his devotions, prayers and worship to the Lord. He does circumambulation around the Lord, worships him in various ways, offers flowers and prays to him by singing many special hymns (21).

22. [This paragraph describes the culmination of the spiritual journey of the aspirant. The Lord welcomes him, seats him next to himself, and anoints him to the kingdom of Moksha, or gives him his much-desired fruit of ultimate and final spiritual liberation, deliverance, salvation and emancipation.]

When Lord Adi-Narayan sees that the devotee is reverentially standing before him in a divine ethereal form that is like an image of the Lord himself, he (Adi-Narayan) invites him (the devotee) to come and be seated on the glorious seat in the Vimaan alongside the Lord.

[The Vimaan and its seat have been previously described in paragraph no. 21.]

The Lord then anoints him to the kingdom of Moksha, or bestows upon him eternal liberation and deliverance, blesses him with final emancipation and salvation. The Lord is accompanied by all other liberated souls of Vaikunth in this official acceptance, initiation and anointment ceremony.

The Lord sanctifies him and symbolically purifies him by chanting of Mantras.

[These Mantras are divine words or phrasal hymns which act like charms having mystical powers to clean and sanctify the subject.]

Then the devotee is washed or bathed in water contained in pitchers of Anand.

Great musical instruments, that are magnificent and divine in nature, are played cheerfully to mark this auspicious ceremony and also to honour the devotee, while the Lord and other holy attendants show their respects to the freshly anointed devotee in a number of ways.

The anointed devotee is then honoured and worshipped as a living embodiment of Lord Adi-Narayan when the Lord himself offers to him and adorns him with all the visible signs that are unique to the Lord.

Then the Lord, accompanied by all the other exalted Souls attending this auspicious occasion, goes around him ceremoniously, bows before him, and unanimously proclaims in front of the august gathering 'You are Brahm ('Twam

Brahmasmi'). I am Brahm ('Aham Brahmasmi'). There is no difference between you and me ('Aavayorantaram Na Vidyate'); You are Me (i.e. you are my form and equivalent to me—'Twamewaaham'); and I am you (i.e. I am also one with you; there is no difference between you and me; both of us are indeed one and the same—'Ahamev Twam').¹

After making this proclamation and revealing its truth in practical terms, Lord Adi-Narayan vanished from the site.

[How did the Lord reveal the truth of the Mahavakya or the 'great spiritual truth'? It was done by showing to the world that his devoted follower and one who believes in the Advaitya philosophy of the non-duality and the universality of the soul, the Atma, the pure consciousness that is known in Vedanta as the 'true self', has the same ethereal body and adorned by the same signs of divinity as borne by the Lord himself. Thus, the Supreme Being gave the devotee the same respect that is shown to him by others. He offered obeisance to the devotee himself to prove that what is said above in the Mahavakyas is indeed the truth.] (22).

[Note—¹It ought to be noted here that this proclamation is the great Mahavakya of the Vedas that establishes uniformity and divinity of the Atma or Soul. The Mahavakya is 'That Thou Art' (Tat Twam Asi), 'This Self Is Brahm' (Ayam Atma Brahm), and I Am Brahm (Aham Brahm Asmi).

The Mahavakyas appear in a number of Upanishads, such as the following—

- (i) Rig Veda—Atmabodha Upanishad.
- (ii) Sam Veda—Chandogya Upanishad, Canto 6, section 16, verse no. 3 (Tattwamasi).
- (iii) Shukla Yajur Veda—Paingalo-panishad, Canto 3, verse no. 2-3, 8; Mandal Brahmin Upanishad, Brahman 2, section 2, verse no. 5; Brahman 2, section 4, verse no. 4; Brahman 3, section 1, verse no. 6; Brahman 3, section 2, verse no. 2; Adhyatma Upanishad, verse nos. 2, 10 (So-a-Ham), 30-31 (Tattwamasi).
- (iv) Krishna Yajur Veda—Shuk Rahasayo-panishad, verse no. 22; Kaivalya Upanishad, verse no. 16; Sarwasar Upanishad, verse no. 12-14; Varaaha Upanishad, Canto 4, verse nos. 32, 37; Avadhut Upanishad, verse no. 2.
- (v) Atharva Veda—Atma Upanishad; Naradparivrajak Upanishad, Canto 7, verse no. 8. Tripadvibhuta Maha Narayan Upanishad, Canto 5, paragraph no. 15; Canto 6, paragraph no. 22; Canto 8, paragraph no. 5; Ram Rahasya Upanishad, Canto 5, verse no. 13-14 (Tat Twam Asi—That Art Thou); Ram Uttar Tapaini Upanishad, Canto 3, verse no. 9-10 (So-a-Ham); Annapurna Upanishad, Canto 5, verse no. 8 (Brahmasmi—I am Brahm personified); Mahavakya Upanishad, verse nos. 6-8 ('Hans So-a-Ham'); verse no. 11 ('So-a-Hamarka'—that essence is me); Hayagriva Upanishad, verse no. 15 ('Tattwamasi'—i.e. that supreme essence or truth is you; the second Maha Vakya is 'Ayamatma'—i.e. that essence known as Brahm, the cosmic Consciousness, is my own Atma, my own 'self'; the third Maha Vakya is 'Brahm Aham'—i.e. Brahm is me; the fourth Maha Vakya is 'Aham Brahmasmi'—i.e. I am Brahm).

According to *Paingalo-panishad*, Canto 3, verse no. 2 of the Shukla Yajur Veda, they are the following—(a) 'Tattwamasi'—that essence or Tattva is you; (b) 'Twam-Tadasi'—you are that; (c) 'Twam-Brahmasi'—thou art Brahm; and (d) 'Aham-Brahmasi'—I am Brahm.

The *Adhyatma Upanishad* of the Shukla Yajur Veda tradition, in its verse nos. 2, 10 describe the great saying 'So-a-Ham', i.e. 'that essence is me', and in verse nos. 30-31 describe the other great saying 'Tattwamasi', i.e. 'that essence is you'.

According to *Mandal Brahmin Upanishad*, of the Shukla Yajur Veda, they are the following—(a) 'That is me', or 'that is I' is mentioned in Brahman 2, section 2, verse no. 5; (b) 'I am Tej or I am energy personified', 'I am Pragya or personified knowledge', 'I am one and immutable', 'I am pure and non-dual

Brahm’—these are mentioned in Brahman 2, section 4, verse no. 4; (c) ‘I am the eternal and immaculate Parmatma’, ‘I am that essence’, ‘you are me’, ‘I am you’ are mentioned in Brahman 3, section 1, verse no. 6; (d) ‘I am Brahm’ appears in Brahman 3, section 2, verse no. 1; and finally (e) ‘You are me’ appears in Brahman 3, section 2, verse no. 2.

According to *Shuk Rahasaya Upanishad*, verse no. 22 of Krishna Yajur Veda, they are the following—(1) ‘OM Pragyana Brahman’. [OM salutations! The truthful and pristine pure knowledge which is all-inclusive, most sublime and eclectic in nature is Brahm personified.] (2) ‘OM Aham Brahmasmi’. [OM salutations! Indeed, I am Brahm.] (3) ‘OM Tattwamasi’. [OM salutations! That Brahm is you; that Principal Absolute and essence is you; it is you; or ‘that art thou’.] (4) ‘OM Ayam Atma Brahman’. [OM salutations! This Atma, the pure conscious soul or ‘self’ of the creature, is Brahm.]

The *Chandogya Upanishad* of Sam Veda tradition describes the great saying ‘Tattwamasi’ in great detail in its Canto 6, sections 1-16 with numerous examples when Uddiyak, son of Aruni, taught this great axiomatic maxim of the Vedas to his son Shwetketu. It winds up the exposition with the final declaration of ‘Tattwamasi’, ‘that art thou’, in verse no. 3, section 16 of Canto 6.

According to *Avadhut Upanishad* of Krishna Yajur Veda tradition, verse no. 2, an Avadhut Sanaysi is a living embodiment of the great saying ‘Tattwamasi’.

According to *Kaivalya Upanishad*, verse no. 16 of the Krishna Yajur Veda tradition, the Mahavakya is ‘That Brahm is you; you are it’. Verse no. 17-23 of this Upanishad also affirms that the truly realised person is one who sees ‘his own self in every aspect of this creation’ simply because the entire creation is nothing but a revelation of one single immutable and truthful entity known as Brahm.

The *Sarvasaaro-panishad*, verse no. 12-14 of Krishna Yajur Veda tradition explains the terms ‘Tat’ and ‘Twam’.

According to *Varaha Upanishad* of Krishna Yajur Veda tradition, Canto 4, verse no. 32, the great Mahavakya which is exclaimed by the self-realised ascetic as soon as he discovers the truth about himself is ‘I am Shiva’. The word ‘Shiva’ refers to the supreme transcendental and quintessential Brahm which is the cosmic Absolute, the universal Truth and the only Reality in creation. The word ‘Shiva’ itself means ‘one who is pure, auspicious, truthful, holy, divine, beautiful, renunciate, most wise and enlightened’.]

-----*****-----

Uttar Kand—Canto 7

[This Canto will describe two other Vaikunths, viz. the Sudarshan Vaikunth and the Tripadvibhuta Vaikunth. When the spiritual traveller enters this upper stratum of the heaven, he has finally entered the realm of the Supreme Being. These two Vaikunths together form the first Paada of Brahm. It is the highest pedestal of Brahm.

This Canto goes on to elaborately describe the great ‘Sudarshan Chakra’ or the Discus of Lord Vishnu, as well as the great ‘Narayan Chakra’ which is the wheel symbolising the divine esoteric powers of the Supreme Being. This Chakra is employed in the ritualistic forms of worship, prayers and offering of sacrifices to Lord Narayan or Lord Vishnu. All the Mantras used in the Narayan Chakra are listed here. Finally, it concludes by describing the divine form of Lord Adi-Narayan.]

1. The spiritual aspirant, who has now been bestowed the same divine and exalted stature as that of Lord Narayan himself, takes permission from the Lord and rides on

the back of the eternal vehicle of Lord Vishnu or Narayan known as Garud (the celestial heron or eagle) to move on towards higher reaches of Vaikunth.

As he moves ahead, he is surrounded by all the holy residents of Vaikunth, escorted from the front by Sudarshan Chakra (the discus of Vishnu), and protected by Lord Vishwakshen (the chief of Vishnu's attendants).

[Refer Canto 5, paragraph no. 15. It resembles a royal procession of Gods.]

Going higher and still higher, he reaches the realm of 'Brahmanand Vibhuti'—literally an area of the higher reaches of heaven where the majestic and magnificent virtues of spiritual bliss, ecstasy, happiness, beatitude and felicity of the best and the purest kind that come with attainment of Brahm are the only features present everywhere.

Here he observes the supreme Anand associated with Brahm and its divine realisation spread everywhere in Vaikunth which is Anant, or a Vaikunth that has no end.

He is submerged in surging waves of great Anand (spiritual bliss and ecstasy) and virtually becomes an ocean of this Anand.

He sees or meets countless holy Souls and divine Spirits who are personified forms of 'Atma Ram' (liberated and self-realised Souls), and are like treasuries of Anand (i.e. they effuse extreme happiness and ecstasy that comes with realisation). He offers his respects and worships these holy and divine Souls in many ways.

They reciprocate his gestures cheerfully and worship him in return.

Proceeding ahead, he goes higher and still higher in the realm of heaven to reach higher levels of Brahmanand Vibhuti. [Refer stanza no. 3 above.]

Then he crosses oceans of Anand which are adorned by many magnificent mountains and surging waves of supreme forms of Anand.

Further ahead he crosses more divine realms which are endowed by better and higher qualities of such glorious virtues as enumerated herein above, virtues having infinitely astonishing and magnificent magnitude that progressively go on becoming better and more refined as the aspirant moves ahead and reaches higher in Vaikunth.

This unprecedented sight overwhelms the aspirant, and he is awe-struck with amazement (1).

2. Beyond it is illuminated the Vaikunth known as 'Sudarshan Vaikunth'.

[Sudarshan is the divine Discus of Lord Vishnu, and it is present here in a personified form as the Lord of this particular area of Vaikunth.]

It is always auspicious and holy, abounds in endless and infinite divine glories and majesties, is surrounded by thousands of walls representing Anand that literally embraces in its blissful arms the entire realm of this Vaikunth, has ten thousand rooms or chambers or sections, has countless divine and radiant spokes¹, is a provider of immense and everlasting Anand (perpetual sense of care-freeness, happiness, joys and cheerfulness) to even the Gods (because it provides them with the boon of fearlessness and promises them eternal protection from all sides), is a symbol of pure and unadulterated wisdom, realisation, truthful knowledge, erudition and skills ('Shuddha-Buddha'), is illuminated and radiantly splendid like it were a fountain-head of dazzling Electric ('Vidyut') representing dynamic and intense flow of spiritual ecstasy, bliss, happiness and joy ('Anand'), is like a vast ocean of supreme and infinite Anand, and is inhabited by countless Souls who are highly enlightened and self-realised (2).

[Note—¹It must be noted that Sudarshan is a wheel-like weapon, and this is why it is said to have 'spokes' and 'sections or chambers'. These 'sections or chambers' are

the areas between two spokes. The many 'walls' surrounding this symbolic city are the multi-layered outer straps that go around the circumference of the wheel-like Sudarshan Chakra and give strength to it.

This observation that this Vaikunth is called 'Sudarshan', the divine discus of Vishnu, and that it has 'spokes' like that present in a wheel, show that this heaven is circular in pattern. It has different tiers of districts or areas that are represented by the layers of circles made in the diagrammatic representation of this Vaikunth. These are criss-crossed by broad promenades, avenues and streets that the spokes and the counter-spokes of this wheel symbolise. The Citadel of this Vaikunth is symbolised by the 'hub and axle' of the wheel; it is here that the chief diety, the Supreme Being known as Tripadvibhut Maha Narayan according to this Upanishad, lives. The 'hub' of the wheel would be the central esplanade area from which all the boulevards and streets radiate out in this Vaikunth. This 'hub' would represent the closest ring of attendants of Lord Narayan. The central pivot around which the whole edifice of creation rotates, the 'axle' of this symbolic wheel-like Vaikuntha, is the Lord himself.

This inner-most circle or the central point can be likened to the Capitol that sits atop a central plaza from which the main arteries and avenues of a great planned city radiate out in all directions.

The entire wheel that represents the whole of Vaikunth in a symbolic form also represents the whole creation—because the creation also moves in a circle and is like a giant cosmic wheel rotated by the Supreme Being.]

3. In the center of this divine city is the great Chakra (wheel) called 'Sudarshan'.

This 'Sudarshan Chakra' is always moving or revolving (i.e. it is not static and stagnant; it is dynamic and full of vigour and vitality; is energised and active).

It is huge and most ancient.

It is most holy, pure and sanctified so much so that it has the potential power to clean those who come in its contact and help them to find liberation and deliverance from all sins and their horrendous consequences. [The Sudarshan Chakra is a circular saw-like weapon of Lord Vishnu. Being a divine and powerful weapon it is able to cut-off all sins and eliminates them; it is able to destroy all negativity and evils that might linger on in the spiritual aspirant inspite of his having reached this high and spiritually elevated stature.]

[The devotees of the Lord who have been attentively hearing their Guru describe the path to find Mukti or Moksha, i.e. emancipation and salvation, or liberation and deliverance, finally proclaim in ecstasy as they exult in their newly discovered knowledge—] 'We, the devotees of Lord Vishnu, will be able to overcome and crush all our enemies in the form of grave sins and misdeeds when we are blessed and given protection by this divine and great Chakra (3)'.

4. This ever-moving great Chakra is like the majestic doorway or gateway to the divine abode of the great Lord God. [Or, this Sudarshan Chakra is the gatekeeper of Vaikunth where Lord Adi-Narayan resides.]

'Let this glorious and divine Sudarshan Chakra—which is aglow with brilliant light of intense energy and illumination, is most holy and pure, is a scintillating fount of immense brilliance and splendour, is intensely illuminated and radiant, is immensely splendid and glorious, and from which thousands of streams of Amrit (nectar, elixir or ambrosia) gush forth in endless streams—bless us with wisdom and erudition of the highest order and of the purest form in this world.

Let it provide us with an auspicious and honourable mind and intellect so that we can think rightly, correctly, judiciously, honourably, scrupulously, and with noble

principles of 'Dharma', or the principles of righteousness, auspiciousness, propriety and probity, kept in view while dealing with this world.' (4).

5. [The scriptures laud and offer their obeisance to this great Sudarshan Chakra which has an esoteric structure as follows—]

'This holy and divine Sudarshan Chakra is provided with ten thousand spokes, is self-illuminated and aglow with brilliance and splendour, it is an embodiment of immense valour, power and strength, it is a composite form of all the numerous powerful and most potent weapons and dynamic energies in existence, it is a personification of the glorious virtue of invincibility, cosmic energy and dynamism along with the divine powers and authority possessed by Lord Vishnu, it is of immense dimensions spreading to millions of Yojans (1 Yojan = roughly 8 or 16 miles), is adorned by infinite number of festoons and garlands which emit brilliant flames and dazzling light, is the primary source of origin of all virtues of auspiciousness and holiness, and is like the holy shrines that adorn holy pilgrim sites (5).

[Note—The description of this Chakra or wheel-like weapon of Lord Vishnu starts from the outer periphery or circumference, and moves in towards the central hub. It has several tiers, and the one described in this paragraph refers to the outer tier or rung. The next paragraph would describe the second tier or rung from the outside.]

6. Inside the outer ring is another ring. This ring (which is the second tier) is brilliant in illumination which is most delightful to behold. This second tier of the Chakra has a ring that has thousands of serrated edges. It is called a 'Sastraar Chakra'. [It resembles a circular saw.]

It is like a magnificent 'Mandal' (zone, circle, sphere, part of an extended area, territory or realm) having immense 'Tej' (illumination, radiance, splendour, energy and dynamism), and is as brilliantly illuminated as a fount (or source) from which dazzling stabs of Electric symbolising an intense form of Anand spring and gush forth. [As the wheel turns, the dazzle emanating from this second rung of the Sudarshan Chakra is ever-changing like the simmering light of a diamond that radiates out from the stone in brilliant rays or staff of light when it is moved in the sunlight.] (6).

7. The third tier of the Chakra has another brilliantly self-illuminated ring having six hundred spokes. It too is as glorious, magnificent and splendorous as its predecessor in its dazzle and brilliance. It is the best place to keep one's attention focused on, or to think about. It is a symbolic dense collection of all the virtues of Vigyan at one place.

[That is, all the knowledge of the best sort that can stand the test of logic, rationality, intelligent interpretation, proof and verification are represented by this Chakra's third tier. It is metaphoric way of saying that true knowledge is brilliant and splendorous by its inherent nature. It is self-illuminated and vibrant. It has numerous branches represented by the six hundred spokes here.] (7).

8. The fourth tier of this Sudarshan Chakra has another glorious self-illuminated ring having three hundred spokes. It too is like the center of supreme auspiciousness and spiritual welfare, and is as dazzling and splendorous as countless suns. [Refer paragraph no. 7.] (8).

9. The fifth tier of this Sudarshan Chakra has another glorious self-illuminated ring having a hundred spokes. It too is like a Mandal (zone, circle, sphere, part of an extended area, territory or realm) having immense 'Tej' (illumination, radiance, splendour, energy and dynamism) radiating out from it. [Refer paragraph no. 6.] (9).

10. The sixth tier of this Sudarshan Chakra has another glorious self-illuminated ring having sixty spokes. It is a symbolic manifestation of supreme Brahm-Tej, i.e. it is the illumination, radiance, splendour, energy and dynamism of the supreme Brahm that is vividly seen in the form of the divine magnificence, the 'Tej' and the blinding dazzle of this Chakra (10).

11. Inside these six tiers of gloriously illuminated rings is a hexagon. It is also self-illuminated, most brilliant and divine to behold. It is like a treasury and fount of immense Tej (illumination, radiance, splendour, energy and dynamism) of astounding magnitude (11).

12. This hexagon has a divine seat or an altar of extreme and supreme form of Anand (spiritual bliss, ecstasy, beatitude, felicity). In the center of this seat or altar is an area that is so splendorous, lustrous and brilliant in its divine illumination that it resembles a Mandal (sphere, zone, circle or ball) where the Sun, the Moon and the Fire are present simultaneously. [The Mandal here is like the thallus of the Lotus flower. The center of the seat is then the middle of this thallus and the tip of the stalk of this flower.]

One can observe a divine shine of extreme brilliance at this place. [It appears that a torch is lighted in the stalk of the Lotus flower, and its light shines in each pore of the tissue of the thallus present on its top to give it its beautiful lustre and radiant glow.] (12).

13. In the center of this divine seat or the central altar (i.e. at the absolute center of the hexagon) is seated a personified form of the presiding deity of the Chakra, i.e. Lord Sudarshan. He is as radiant and splendorous as millions of brilliant Suns.

Lord Sudarshan or 'Sudarshan Purush' is no one else but Lord Vishnu himself in this form. This is because Lord Sudarshan is endowed with all the divine and holy signs that are so unique, extraordinary and peculiar to Lord Vishnu that no other God or deity can ever have them (13).

14. The devotee and spiritual aspirant meditates upon this divine and glorious form of Lord Sudarshan who is none but Lord Vishnu himself personified, worships and honours him in various ways, does circumambulation to show his respects, and bows before the Lord.

The Lord is so pleased with him that he reciprocates his gestures by offering respects and honours to him, and praising him personally. The aspirant takes leave of the Lord, and having obtained the Lord's permission he moves ahead on his journey to higher abodes in the heaven.

He goes higher and still higher in the upper strata of heaven. He observes the higher reaches of Vaikunth which is eternal and infinite as well as an image of extreme Anand. This sight fills the spiritual aspirant with extreme bliss, elation, happiness and joy; he feels ecstatic and exhilarated (14).

15. Rising still higher he crosses various locations which are most unusual, astonishing and mystifying, are of infinite dimensions, and are full of personified forms or images symbolising numerous virtues collectively called the various 'Vibhutis' (the virtues of excellence, dignity, majesty, glory and fame; spiritual attainment).

Proceeding still ahead he encounters vast celestial oceans of infinite and fathomless Anand (i.e. oceans of bliss, beatitude, felicity and joys of extreme magnitude), and crosses them cheerfully.

Then he reaches the divine abode called 'Advaitya Sansthan'—i.e. the divine abode where the non-dual Divinity resides; an abode that has no parallel and is the ultimate destination of this spiritual aspirant; a divine establishment (Sansthan) that is specially dedicated to the principles of non-duality, and where the Principal entity that is a personification of the spiritually liberating and highly eclectic principle of non-duality (Advaitya) resides.

[It is the place where Brahm, the Supreme Being, resides. This Brahm is the Advaitya principle that blesses this aspirant with the best kind of Mukti or Moksha for his soul, or which bestows upon him spiritual emancipation and salvation which gives his soul permanent liberation and deliverance from the cycle of birth and death. This sort of Mukti or Moksha which is of the final kind and beyond which there is nothing is called 'Kaivalya'—literally, the Mukti or Moksha that is one of its own kind, which is so unique and esoteric that it has no parallel, which is the only kind of spiritual liberation that establishes oneness between the aspirant's soul and the supreme Soul of creation known as Brahm, thereby removing any distance or a notion of duality between them.]' (15).

16. [The disciple asked his Guru—] 'Of what kind is the 'Advaitya Sansthan'?'

[The word 'Advaitya' means non-dual, peerless, unique, unparalleled, without a second, and matchless. It also means an entity having the glorious virtues of immutability, indivisibility, consistency, homogeneity, universality and uniformity. The word 'Sansthan' means an institution, an organisation, a body, an association, a place, a philosophy or doctrine or school of thought which specialises in certain field or has precedence over others in terms of certain qualities or virtues which are dominant there. For instance, we talk about an institution of higher philosophical learning that teaches about non-duality of existence, or the Sansthan of Advaitya. It means that the only philosophy which is taught here is 'Advaitya', and nothing else. The Advaitya Sansthan is that body or institution that recognises only non-duality of existence as the final and only Truth. It excludes all other schools of thoughts that treat this existence as having a dual nature, such as there being a Jiva or a living being, and an Ishwar or Lord having separate existences.

In the realm of metaphysics, the only divine entity that is honoured as being 'Advaitya' is known as Brahm. It is the only ethereal, cosmic, all-inclusive, sublime and most subtle 'body' that is unique in this respect. It is a holy and eclectic 'institution' that is recognised and honoured as being the only Advaitya entity in creation. And therefore the phrase 'Advaitya Sansthan' would refer to the state of existence of consciousness when one has realised the non-duality of Brahm, that the latter is the only Absolute Truth and the cosmic Consciousness that is eternal, imperishable, unchanging, steady, immutable, universal and uniform in every respect. So when a spiritual aspirant becomes enlightened about the supreme Truth and the Consciousness of creation, i.e. when he becomes self-realised and Brahm-realised, he is deemed to have attained access to or an admission to the Advaitya Sansthan. The

following narrative would outline the characteristic eclectic qualities that makes this Advaitya Sansthan so unique and sets it apart from other Sansthans.

The ‘other Sansthans’ would refer to all the numerous experiences and philosophies that the spiritual aspirant had encountered and passed over during his long spiritual journey to reach the ultimate goal of his life—the ‘Advaitya Sansthan’. He experienced them all, showed his respect to them all, did not contradict them, but remained focussed on his ‘one’ target, and it was to reach the final destination which has no duplicates or parallels. It is this ‘one’ and ‘non-dual’ Brahm that is recognised as the Absolute Truth of creation and the cosmic Consciousness that is revealed in all the forms of creation. When the spiritual aspirant reaches a high state of realisation and becomes firmly convinced of this fact he is said to have attained the ‘Advaitya Sansthan’.

The present paragraph is a glimpse of the magnificent and most glorious virtues of this divine institution (Sansthan) that is unique and peerless (Advaitya) in every respect. It ought to be noted that words are just indicators which help one to get an idea of the immensity of the supreme divinity, the greatness and potentials of something that the scriptures themselves assert is beyond description and comprehension. Hence, the epithets used here to describe the grand attributes of this ‘Advaitya Sansthan’ or the state of Brahm-realisation are not exhaustive or exclusive—they are only indicative of the greatness, the divinity and the holiness of this institution. The sage who attempted to describe the indescribable attributes associated with Brahm was himself not confident of whether he is actually saying what he meant or whether the words he uses are sufficient to convey the right and correct message. This is the reason there are numerous repetitions—to emphasise that one word means more than one thing. A given word has fine differences in its various meanings or connotations, each having a different nuance or shade of meaning in different contexts and circumstances. A fine distinction exists between the various nuances of the same word. So the sage repeated them to drive home the point that it is not sufficient to look at Brahm from only one angle or deriving a limited view of Brahm relying on one meaning of a given word. Brahm must be treated in a holistic and an all-inclusive format or meaning. A limited or short-sighted view of Brahm would create distortions in and confusions about something that is immaculate and impeccable.]

[The Guru replied—] ‘The divine establishment called Advaitya Sansthan has the following eclectic qualities—It is an embodiment of infinite Anand (spiritual bliss, ecstasy, beatitude and felicity).

[As explained above, the Advaitya Sansthan refers to the supreme state of transcendental existence where one has realised the non-duality and the absolute truth of the cosmic Consciousness known as Brahm. He would also have realised that his own ‘truthful self’ known as the Atma or the soul is none other than this cosmic Consciousness, and therefore ‘he’ is also Brahm personified. This eclectic and supreme form of realisation and enlightenment leads to the Kaivalya Mukti that marks the culmination of his spiritual quest as described in the concluding stages of this great Upanishad.]

It cannot be described or spoken about in words.

It is an eternal ocean of infinite Bodh (enlightenment, wisdom, realisation of the Truth, erudition and truthful knowledge).

It is an ocean of infinite Anand.

It is free from all negative qualities that are spiritually demeaning and degrading, as well as those attributes that are opposing, heterogeneous or

contradictory in nature (thereby causing a lot of ambiguity, perplexities, bewilderments, confusions, doubts and consternations arising out of uncertainty). On the other hand, it is well endowed with positive qualities and spiritually enhancing virtues that are uniform and universal in nature as well as homogenous and compatible spiritually.

It is without any ‘Avayav’—i.e. it has no limits, fractions and parts having fixed shape, contours, dimensions and attributes (as it is infinite, eternal, imperishable, immutable, indivisible and endless).

It is ‘Niradhar’—i.e. it has no support or foundation for its self; it does not need any prop to support it; it is self-supporting and self-sustaining. [The Advaitya Brahm is the primal Consciousness that is the cause of the entire world coming into existence, sustained, nourished and expanded; it is the very foundation of this living creation, whether visible or invisible, and it does not need any other thing to support it. It is the axle around which the wheel of creation rotates. This is why it is called the principal ‘Adhar’ or the basic support and primary foundation of this creation.]

It is ‘Nirvikar’—i.e. it has no Vikaars in it; or it is free from all kinds of negativity, faults, shortcomings, blemishes, taints, corruptions and scars that are associated with the rest of creation.

It is ‘Niranjan’—i.e. it has no ‘Anjan’ or darkness of any kind; it has no black soot smeared over it to hide its pristine purity and glorious nature. In other words, it is faultless, flawless, untainted and without any blemishes of any kind.

It is ‘Anant’—i.e. it is endless, infinite and eternal.

It is a compact or composite form or a rich treasury of ‘Brahm-Anand’—i.e. it is a vigorous and vibrant fountainhead of the spiritual ecstasy and divine blissfulness that comes with Brahm-realisation; it is an embodiment of the highest quality of ‘Anand’ (bliss, ecstasy, happiness, joys, beatitude and felicity) that is associated with Brahm, the supreme Truth and eternal Consciousness in creation.

It is a compact or composite form that represents the sum total of this creation which is an expansion of or manifestation of or revelation of the supreme Truth and eternal Consciousness which resides here, and which has sprung forth from here in the form of this creation.

It is ‘Nirmal’—i.e. it is clean, pure, immaculate, incorrupt and pristine.

It is ‘Nishkalank’—i.e. it has no taints, blemishes, shortcomings, faults, scars or accusations on its character that can affect its immaculacy, dignity, standing or high spiritual stature; it is free from any infamy or ignominy; it has no negative attributes that can be demeaning and degrading for its exalted and highly respected stature. To be without any blemishes, aspersions, shame, slander, spot, slur, ignominy, taint, infamy, disgrace and other moral, ethical and spiritual faults of any kind; to have no scars to mar one’s immaculacy.

It is independent and free from any reliance on others.

The spotlessly clean and brilliant rays of light radiating out from thousands of Suns that are themselves most ‘Nirmal’, i.e. spotless, holy and purified, are no more than insignificant sparklers or inconsequential sparks compared to it (i.e. to the Advaitya principle, to the primal Lord and the only true Principal of creation known as Brahm, the supreme cosmic Consciousness; to the ‘Advaitya Brahm’; to the ecstasy and spiritual beatitude obtained when one becomes Brahm-realised). [The allusion to the celestial Sun is to drive home the point that Brahm is extremely splendourous and radiant as well as self-illuminated. It is around this Brahm that the wheel of life rotates just like the case of life on the planet earth being directly dependent upon the Sun and its light, as well as the fact that all the planets of the solar

system rotate around this central axle of the Sun. Like the Sun, it is Brahm that 'illuminates' or gives life to this world. Just as the entire system would collapse without the Sun, the entire edifice of creation would collapse without Brahm.]

It is like an embodiment or personification of all the eclectic tenets, the great doctrines, the irrefutable maxims and axioms of all the Upanishads. It is like the meaning of all the Upanishads revealed for the spiritual aspirant.

[That is, when the aspirant attains the spiritual goal of Brahm-realisation, when he understands the essential meaning and the basic spirit of the term 'Advaitya' in relation to Brahm and his own truthful 'self' called the Atma, it is then that he is regarded as having understood the essence of the Upanishads and their teachings.]

It is beyond the purview of all material proofs and logics.

[That is, it cannot be proved and its existence and truthfulness cannot be understood by applying traditional methods of proving anything to be true in this material world.]

It is not the subject matter of speech and mind.

[That is, it is so mysterious, esoteric and enigmatic that neither the faculty of speech nor the mind can either know about it or describe it in any way whatsoever.]

It is an entity that is 'Nitya Mukta'—i.e. it is eternally liberated, it is always unshackled, it is forever free from all bondages that act like spiritual fetters for a creature.

[This statement can be interpreted to refer to the eternal Atma, the pure consciousness that is also known as the 'self' of a living being. This Atma is an image or a microcosmic form of the supreme Consciousness known as Brahm. If the principal Brahm is eternally free and without any fetters or shackles, it follows that its counterpart known as the Atma would also be eternally free and without any bondage. In other words, a self and Brahm realised person is deemed to be spiritually liberated and free from all worldly shackles.]

It has no 'Aadhar'—i.e. it has no foundation upon which it rests, it does not need any support for its self, it needs no proof for its existence; it is self-supporting and self-sustaining.

It has no 'Aadi and Anta'—i.e. it has no beginning and no end; it is infinite, eternal and imperishable.

It is a personified form of 'Kaivalya'—i.e. it is non-dual, without a parallel, unmatched and unique in every conceivable form and meaning.

It is 'Param Shaanta'—i.e. it is supremely calm, tranquil, serene, peaceful and restful.

It is smaller than the smallest, subtler than the subtlest, and finer than the finest.

It is greater than the greatest, grander than the grandest, and more eminent than the most eminent in creation.

It is an embodiment of 'Anand' (bliss, joy, happiness, beatitude, felicity, ecstasy and exhilaration) that is endless, infinite, immeasurable and fathomless.

It is an embodiment of 'Shudha' (pure, uncorrupted and unadulterated) 'Bodh' (knowledge, enlightenment, awareness of the real truth, wisdom, erudition and sagacity), 'Anand' (bliss, joy, happiness, beatitude, felicity, ecstasy and exhilaration) and 'Aishwarya' (majesty, grandeur, fame, magnificence and accomplishments that give authority, powers, potentials and renown).

It is a composite of all the various types of extreme Anands that exist in this creation.

[The point in repeating this word 'Anand' often is to stress that since Brahm is a fountainhead that spouts constant streams of Anand, a person who is able to reach it would never thirst for Anand. After all, everyone does anything because that deed and the thing obtained by this deed gives him pleasure and comfort; no one would do anything that does the opposite. But all the deeds and their results vis-à-vis this world are transient and perishable, so why not seek Brahm which would give him a infinite source of Anand alongside providing him liberation and deliverance from all the miseries and torments that come with being associated with this world?]

It is 'Avinaashi'—i.e. it is imperishable and non decay-able.

[This is obviously because it is eternal, infinite and without an end.]

It is 'Kutastha'—i.e. it occupies a high position, is unalterable, unchanging, steady, immovable and constant, and is most secret, enigmatic, hidden and esoteric.

It is 'Achal' and 'Dhruv'—it is absolutely immovable, steady, constant, consistent and unchangeable.

It is free from the numerous limitations, restraints, constraints and inhibitions that are associated by 'Disha' (regions, quarters, directions and space) and 'Kaal' (time, era, period, circumstance and situations).

[For instance, if we say an entity is present in the 'north direction' (i.e. the north Disha) then that entity becomes limited to this area of space. It is neither in the 'north-east' nor the 'north west'. Again, if a person thinks that Brahm has a particular set of virtues, is confined to certain doctrines and governed by certain laws, then again he is wrong because Brahm is not limited or confined to them alone, and it is equally and as intensely and as certainly present in the other. Similarly, if one believes that Brahm is limited to a certain time or period, or is subject to the conditions prevailing at that time, then again he is mistaken as Kaal has no effect on Brahm. Why is it so? The answer is evident in this paragraph itself. A careful reading of the glorious and most eclectic divine virtues of Brahm would show that since it is omnipresent, all-pervading, universal and uniform it ought to be evenly distributed in all the spots of the 'Disha' as well as all the phases of 'Kaal'. Similarly, it ought to remain the same in all the points of time and space, whether of the past, the future or the present.]

It fills the entire world (creation) from the within and the without (being all-pervading and all-encompassing). It is complete and wholesome by nature.

It is the subject matter researched upon and much sought after by great Yogis (ascetics).

It is not subjected to the usual notion of existence vis-à-vis the world as consisting of things, time, space etc. constituted of various units, parts, fractions or segments.

[In other words, Brahm cannot be broken up into units, parts, fractions or segments even for the purpose of study; it is one, indivisible and immutable whole.]

It is always 'Nutan'—i.e. it is always new, fresh and pure; it is always unprecedented; it never gets stale or old. Its present is as fresh as its past, and so would be its future.

It is 'Nitya Pari-purna'—i.e. it is always and eternally complete, full, self-contained and wholesome in every respect.

It is an embodiment of 'Akhand Anand' that is like an eternal fount of 'Amrit'—i.e. it is a personified image of immense and unbound Anand (bliss, happiness, joys, beatitude, felicity, exhilaration and ecstasy) that is constant and eternal; it never diminishes, fades or comes to an end. This Anand is so magnificent, so vigorous, so exhilarating and of the highest spiritual quality that it is like the

ambrosia of life, the elixir of happiness, joys, bliss, ecstasy and beatitude, called 'Amrit', itself personified.

It is 'Shashwat'—i.e. it is eternal, everlasting, perpetual and permanent.

It is the 'Param Pad'—i.e. it is the supreme designation of the soul; it is the highest stature obtainable by a spiritual aspirant; it is the pinnacle of spiritual achievements; it is the citadel of spiritual enlightenment and realisation beyond which nothing exists and beyond which nothing remains to accomplish. It is the supreme state of existence of the consciousness, the position which is synonymous with Brahm. It is the stature that is 'supreme and transcendental' by nature, beyond which nothing exists or matters.

It is like a huge mountain (a treasury, collective, composite or fount) of Electric (extreme brilliance, illumination, radiance and splendour) that represents sparkling gush of extreme, bubbling Anand (spiritual bliss and ecstasy) that knows no bounds (is of the highest order). This mountain is one of its kind; it is self-illuminated.

[When the spiritual aspirant has reached the citadel of spiritual enlightenment, when he has become Brahm-realised, he is overcome by extreme spiritual bliss, ecstasy, beatitude and felicity. Nothing more is left to be known and achieved. The ecstasy is so overwhelming that he is unable to conceal it and it bubbles over like a frothy stream gushing out furiously from amongst the rocks of a mountain. The Anand is so extreme that it is likened here to scintillating and dazzling Electric. The holy glow acquired as a result of Brahm-realisation and self-realisation is so brilliant that the entire being of the aspirant appears self-illuminated like a glow-worm; it effuses a divine light that radiates out from it.]

A divine light symbolising seamless Anand of the highest spiritual quality that is permanent, eternal and imperishable shines over there.

[That is, when an aspirant becomes Brahm-realised, when he attains the highest level of enlightenment and spiritual wisdom, the Anand that he derives then is steady, of an eternal nature and of a consistent form. It is not transient and subject to change over time and situations.] (16).

17. Inside this glorious abode (known as 'Advaitya Sansthan' as described in paragraph no. 16) is the ultimate citadel (or the Capitol Hill) known as 'Tripadvibhut Vaikunth' (where the supreme Lord called Tripadvibhut Maha Narayan, or the supreme transcendental Brahm, resides in a personified form).

[Once one enters an institution or a 'Sansthan', he wishes to be acquainted with the main Authority or Principal there; he would like to interview him and meet him personally. The office or residence of this chief Authority or Principal would naturally be separate and distinctive from the rest of the buildings of the place; it would be his private chamber or abode. In the present context, once the spiritual aspirant has attained the 'Advaitya Sansthan', once he has gained sufficient knowledge of Brahm so much so that he has become entitled to come close to this eclectic Divinity, he now wishes to realise his dreams of having an interview and personal interaction with Brahm, the supreme Authority of creation, its Emperor, in search of whom he has come here in the first place.

The present paragraph makes a spiritual aspirant acquainted with the grand qualities that mark the sanctum sanctorum of the Advaitya Sansthan where the chief deity resides.

It would be noted now that almost all the adjectives used previously are repeated once again. This is because the august institution called 'Advaitya Sansthan' as described in paragraph no. 16 got its characteristic qualities and derived its very

name because a divine entity resides there. This divine entity is known as 'Tripadvibhut Maha Narayan' to whom this entire Upanishad is dedicated. Hence this entity must also epitomise these grand virtues. Since it resides in a citadel called 'Tripadvibhut Vaikunth' located at the center of the Advaitya Sansthan, the former would also have the same attributes, magnificence and glories as the latter.

We can draw a parallel to visualise what is meant here. Brahm is the eternal Truth and Consciousness that is realised at the culmination of one's spiritual pursuit. It is like the light burning inside the chimney of a lantern that has lent the latter its illumination and brightness. The vicinity of this lantern is more powerfully and brilliantly illuminated than the area further away from it, though the very presence of the lantern would remove darkness of a large area. A light of a lantern can be seen from a very long distance in a pitch dark night, and it was used to give signals in earlier times. This metaphor can be used to visualise the spiritual aspirant's progress from being simply an entrant, a beginner in the spiritual path who has just faintly become aware of the 'light' of Truth and Consciousness against an all-enveloping darkness of ignorance and delusions (Agyan and Maya respectively) that surround him like a thick blanket. As he moves step-by-step closer towards this distant source of 'light', he slowly moves away from darkness and comes so much closer to 'light' until the time when he has come very close to the lantern. It is then only that he sees the lighted wick inside; it is only then that he sees the source of the illumination and brilliance of the lantern. From a distance he could just see a faded or an obscure dot of light, then coming closer he thought that the chimney around the lighted wick is giving out light, and finally when he comes very close to the lantern he realises that the glass chimney has no light of its own but is simply glowing in the light of the flame inside it. He gazes at this source of light and after some time this glare blinds him. Now, if he turns back and looks around, every thing would be dark for him; he would not be able to see anything. This is a physically verifiable phenomenon—when one sees a brilliant source of light for some time, his eyes would not be able to see things that are less-brilliant. In other words, the fully enlightened and Brahm-realised man becomes 'blind to the world'. The state of enlightened existence narrated in paragraph no. 16 can be likened to entering the august compound where the lantern is illuminated on the terrace. Getting to the terrace and coming closer to this lantern is like knowing what the Tripadvibhut Vaikunth is as described in the present paragraph no. 17. The 'Tripadvibhut Maha Narayan' obviously would then be the flame or the lighted wick present inside the chimney of the lantern that lights up the surrounding area of the world for the spiritual aspirant.]

Inside is an exalted and most holy abode which has the following characteristics—

It is a personified form of the vibrant and glorious virtues of 'Bodh' (spiritual enlightenment and wisdom; realisation of the ultimate Truth) and 'Anand' (the extreme sense of bliss, ecstasy, beatitude and felicity that is experienced upon being 'Bodh').

It is radiant and splendorous; it is self-illuminated and most glorious.

It is an eternal shrine of auspiciousness, divinity and holiness that is perpetual, constant, consistent, uniform and universal.

It is like the nectar or essence known as Consciousness that is derived by churning the ocean to find the Truth that is divine, sublime, eternal and auspicious.

It is an ocean of infinite wonder and astonishments.

[That is, everything associated with it is so wonderful and astonishing that one is left wonder-struck and stunned in astonishment at its greatness, uniqueness, magnificence and grandeur.]

It is like the center of an immensely brilliant source of splendour and dazzling light.

[This can be compared to the core of the Sun or the tip of lighted wick in a lamp.]

It is adorned by endless streams of extreme Anand (the extreme sense of bliss, ecstasy, beatitude and felicity that is experienced upon Brahm-realisation) that drench it from all sides. In fact, it is like an ocean of eternal, infinite and imperishable Anand of the highest magnitude.

[It might also mean that decorative garlands, hangings and festoons symbolising endless streams of Anand adorn it from all sides. In other words, the place is made all the more fascinating, magnificent and charming by the presence of extreme bliss and great happiness in it. Anything that gives Anand is sure to attract one's attention. If this Anand is of high quality and enduring then the attention becomes riveted to it.]

It is 'Nirupam'—i.e. it is peerless, unequalled and unparalleled.

It is 'Nitya'—i.e. it is present always, is eternal, constant, unchanging, steady and perpetual.

It is 'Nirdosh'—i.e. it has no errors, flaws, faults or shortcomings.

It is 'Niratishaya'—i.e. it is the Supreme Being, the Almighty.

It is 'Nissim Tejorashi'—i.e. it is an endless, infinite, boundless and immense treasury of excessive radiance, splendour, glory and dynamism; it has an extreme degree of magnificence.

It is 'Niratishaya Anand Swaroop'—i.e. it is an embodiment of extreme Anand that is associated with the Supreme Being (known as Brahm).

It is adorned (i.e. surrounded and protected) by thousands of walls and parapets.

It is well endowed by countless buildings symbolising pure forms of 'Bodh'—i.e. the best virtues of knowledge, erudition, realisation, enlightenment and wisdom have taken the symbolic form of buildings that are present in the divine abode of Brahm.

[When a man becomes Brahm-realised, all the glorious virtues that are collectively called 'Bodh' become his defining quality. His physical body becomes an image of Brahm.]

It is decorated by numerous gardens and green places symbolising eternal bliss and spiritual ecstasy that comes with realisation of the Truth and becoming aware of the pure cosmic Consciousness.

There is a constant rain of flowers that fall in all the directions of this holy place.

Verily, this is the holy abode known as the 'Tripadvibhuth Vaikunth'.

[That is, it is the abode of the Supreme Being known as Tripadvibhuth Maha Narayan to whom this Upanishad is dedicated.]

This is known as 'Param Kaivalya'—the only destination for a wise spiritual aspirant who wishes to attain the supreme stature and find the ultimate Truth known as Brahm.

[This achievement or attainment would give him eternal Mukti or Moksha—i.e. it would bestow upon his soul eternal liberation and deliverance; it would provide his Atma with eternal emancipation and salvation.] (17).

18. It is what is known as the infinite and eternal ‘Param Tattva’—the supreme essence and the only truth of existence that is universal, uniform, immutable and imperishable.

It is the exalted and supreme state of existence of consciousness that is the subject of research by the numerous Upanishads, and which the spiritual aspirant wishes to seek by studying them.

It is the supreme stature of the soul, or the ultimate truthful destination for it that is so much sought after by Yogis (ascetics) and Mumukshas (those who seek emancipation and salvation, or liberation and deliverance of their soul from the endless cycle of birth and death in this mortal world).

It is ‘Ghanibhuta Satya’—i.e. it is solid Truth; it is unadulterated and pristine pure form of Truth; it is a fount as well as a treasury of the purest form of Truth.

It is ‘Ghanibhuta Chit’—i.e. it is the purest form of truthful Consciousness; it is unadulterated and pristine pure form of Consciousness; it is a fount as well as a treasury of the purest form of Consciousness.

It is ‘Ghanibhuta Ananda’—i.e. it is personified form of dense Ananda (spiritual bliss and ecstasy); it is unadulterated and pristine pure form of Ananda; it is a fount as well as a treasury of the purest form of Ananda.

It is ‘Ghanibhuta Shuddha Bodhi’—i.e. it is a pristine pure, unadulterated and truthful form of spiritual awareness, wisdom, enlightenment and knowledge; it is a fount as well as a treasury of the purest form of these spiritual virtues.

It is an embodiment of the divine form that the eternally blissful Brahma has. It is an embodiment of Consciousness that is known as Brahma. It is the conscious awareness of the existence of the supreme Truth known as Brahma.

It is the foundation and support of all in this creation.

It is the place where the non-dual supreme and transcendental Brahma dwells.

It is an embodiment of supreme and pristine form of Ananda.

It is a ‘Mandal of Tej’—i.e. it is a fount, a treasury or a sphere of extreme brilliance, radiance, splendour and illumination. It has a divine aura of brilliance around it.

[The word ‘Mandal’ literally means an area, a realm, a seat, a domain, a sphere. In the present context, the word would refer to the Tripadvibhuta Vaikuntha where the supreme Brahma resides. The following stanzas outline the grand qualities of this supreme seat of cosmic Authority and the Principal of creation. It is the seat of the Absolute Truth of existence. It is the cosmic Consciousness in a personified form.]

It is the chief ‘Mandal’ (the primary seat of authority and the principal abode) of the supreme transcendental Brahma who is Advaita (non-dual, unique, one of his only kind and unparalleled) and an embodiment of supreme Ananda (extreme bliss, ecstasy, beatitude and felicity).

It is the chief ‘Mandal’ (chief domain, main seat, a treasury, an abode) of personified virtues of supreme bliss and ecstasy that comes with spiritual achievements and Brahma-realisation.

It is the best ‘Mandal’ or a composite image or a symbol of all the excellent images or icons of divinity.

[This refers not only to the images worshipped in temples or other shrines but also to all the animate as well as inanimate entities that have a body. This is because the entire creation is deemed to be an image of the Supreme Being. In other words, when Brahma is realised, the entire creation with its auspicious virtues seem to be concentrated here.]

It is a living 'Mandal' or a dynamic embodiment of the best of divine and sublime qualities or virtues of the supreme transcendental Brahm, the Supreme Being, who is supremely blissful and himself an embodiment of immense beatitude and felicity.

It is the best 'Mandal' or a composite image or symbol of all the magnificent experiences and ecstasy of spiritual blissfulness that automatically comes to an aspirant when he attains Bodh (enlightenment, spiritual wisdom and attainment of self-realisation and Brahm-realisation that leads to awareness of the supreme and irrefutable 'Truth' of existence).

It is the best 'Mandal' or a composite image or symbol of all the magnificent and sublime virtues that are associated with the highest form of Gyan (truthful knowledge, wisdom, enlightenment, erudition, sagacity that are associated with the supreme state of being self-realised and Brahm-realised).

It is the best 'Mandal' or a composite image or symbol of the supreme transcendental Consciousness itself that is 'Akhand' (un-breakable, un-divided, uniform, immutable, eternal and perpetual by its inherent nature) and 'Shudha' (most pure, pristine, holy, uncorrupted, unadulterated and sublime).

It is the best 'Mandal' or a composite image or symbol of eternal spiritual Bodh that cannot be visualized or seen by the faculty of speech.

[In other words, the spiritual experiences of the higher state of self-realisation are of such great intensity and magnitude that one cannot describe them in words. The words are limited and they have a limited reach, while the divinity and sublimity of the Spirit and the ultimate Truth that one experiences and realises at the culmination of self-realisation and Brahm-realisation are too profound and enormous in dimension, depth and expanse to be encapsulated in definite words with limited reach. They transcend description and escape from being captured within the limited scope of words.]

It is a combined form or a personification of all the endless oceans of infinite dimensions symbolizing immeasurable and incalculable Anand (spiritual bliss, beatitude, felicity and ecstasy).

It is established in its glory and magnificence by the presence of countless colossus mountains symbolizing infinite Bodh, and equally infinite Anand that comes with this Bodh.

[The place is made all the more charming, awe-inspiring, extremely magnificent and grand, as well as holy, divine and sanctified by the presence of huge mountains that represent the personified forms of all the auspicious accomplishments and grand virtues that accompany spiritual enlightenment, such as its attendant spiritual ecstasy and bliss.]

It is a composite form or a personification of supreme bliss, beatitude and felicity as well as of all forms of auspiciousness, welfares and goodness that exist in creation.

It is like a splendorous and dazzling ball of fire that represents the cosmic energy, dynamism, vigour and vibrancy of the supreme transcendental Brahm who is characterized by the eclectic sublime qualities of being 'Akhand' (one that cannot be portioned, fractured or broken into parts or segments; an entity that is one unified whole; that is immutable and indivisible), 'Advaitya' (non-dual, one of its only kind, unparalleled, unequalled), and as an embodiment of 'Paramanand' (an image of blissful, happiness, joyousness, beatitude and felicity).

It is like an image of the heavenly Sun that is a symbol of Gyan (truthful knowledge, spiritual wisdom, erudition and enlightenment) of the highest order.

The thirty-two primary elements of creation, called 'Vyuha' here, are also established in it.

[The word 'Vyuha' literally means an army formation or a strategic arrangement. The Supreme Being had revealed his mysterious powers of creation by first creating these Vyuhās, and then injecting them with the powers to create life from virtually nothing. If these Vyuhās are analysed independently we will find they that they have no life of their own. They are absolutely inert and lifeless entities, but the magic is that when this creation was moulded from them, the latter became alive and active. The hidden spark of life in each of these elements that together were able to bring forth this most complex structure known as the 'creation' is what is known as 'consciousness', and obviously the creation sans the latter would be dead, inane and worthless. This vital spark of life, the 'consciousness' is the 'gene' of the Supreme Being in this creation. Without this 'consciousness' the world would be nothing but a bunch of dead entities. This consciousness is 'Brahm' residing secretly in a concealed form inside the whole creation, and it is the unifying factor that keeps the independent units of this creation from scattering about, and instead gives it its meaningful, coherent and coordinated existence. That is perhaps why all the units of creation are dependent upon each other like the beads of a rosary threaded together by one single common string, and if this string breaks, or if one bead is lost, the entire rosary comes apart, loses its value and its shape.

So we can say that it was the 'strategy' or 'mechanism' employed by the Supreme Being to fulfil his desire of creation and sustainance of this world. The Lord created it and then left it to operate on its own under the overall supervision of the Lord. He did not wish to involve himself or unnecessarily interfere in its daily affairs, but wished to exercise his overall control. This he accomplished by entering the creation as its activating and binding force called the 'Consciousness'. Without this single factor, neither would the world remain in existence nor would it be alive and working in the way it does.

The Lord thus created the primary building blocks of creation, called the Tattvas, as a strategy or mechanism to construct and give shape to the creation. In their primary form they are available with the Lord just like raw materials are available with a construction engineer or architect.

When we are dealing with something as profound as metaphysics, spiritualism and their eclectic concepts we must understand things in their correct perspective, be able to understand their finer connotations, their symbolisms and metaphors, and intelligently interpret and decipher their hidden meaning instead of blindly taking their words too literally, as that would only create confusion and generate unnecessary vexation and perplexity, and nothing else.

Hence, the meaning here is that the thirty-two primary elements of creation that were initially created by Brahm, the Supreme Being, are strategically located here in the subtle realm of the Lord just like the availability of raw construction material are available with the construction engineer as explained above. These elements are like the building materials in a modern structure. They are not visible when the structure is completed, but they nevertheless form the backbone and the vital constituent part of the entire edifice. They may also exist in a visible form which would be their gross manifestation, their more opaque, solid, denser and darker form. In the case of a contemporary building cited here, the cement, steel, wood, bricks, gravel, mortar and slabs of stones that are used in its construction would be like the thirty-two elements referred to here, while the physical structure itself, its outer shape,

size and design, its arches, balconies, pillars, external facades, floor and terrace, its windows and doors etc. would be the visible manifestation of the primary ingredients.

It is interesting to note here that some of the ingredients used would still be visible even after the building is complete—e.g. the wood used to make doors and windows, but when painted over it would not be possible to know which kind or quality of wood it was. Similarly, in some buildings bricks are left unplastered as matter of design, while in others the entire edifice is covered with cement or lime plaster so as to completely hide the bricks. Therefore, some of the elements are present in both their subtle as well as their grosser forms in this creation. An excellent example would be water and fire—both of them are visibly as well as invisibly present in this world. Taking the instance of water, that form which is in the shape of oceans, rivers etc. are visible, while the underground reservoir of water is invisible. The same water lives as one of the five constituent of the human body as is evident in the fact that the major part of body weight is water in some form, such as blood, mucous, urine, semi-solid wastes, various digestive enzymes etc. but none of them are visible to the naked eye.

In the context of the philosophy of Vedanta, the thirty-two elements are the following—the 5 Bhuts (primary elements such as sky, air, fire, water and earth in order of decreasing subtlety and increasing grossness) + the 5 Tanmatras (sense perceptions of smell, taste, touch/feeling, hearing/sound and sight/seeing) + the 10 sense organs (the 5 organs of perception such as nose, tongue, skin, ear, eye + the 5 organs of action such as hand, leg, mouth, excretory, genitals) + the 4 Anthakarans (Mana or mind, Buddhi or intellect, Chitta or sub-conscious, Ahankar or pride and ego) + 1 Pran (vital wind that sustains life) + 1 Atma (the conscious self of the individual Jiva or living being) + 1 Parmatma (the supreme cosmic Consciousness known as Iswar, the Lord) + 1 Prakriti (Nature) + 1 Maya (delusions) + 3 Gunas (basic primal qualities that determine the overall characteristics of any single unit of creation; they are Sata Guna which is the best and the most auspicious, the Raja Guna which is the second and motivates one to sustain and protect the creation, to be involved in the world but with a positive outlook, and the Tama which is the third and the lowest of the three and motivates one to be sinful and pervert) = 32 Tattvas.]

Keshav (one of the names of Lord Vishnu) and other twenty-four Vyuhās (the various incarnations or manifestations of Vishnu)¹, the various Nyas Mantras (Mantras used to invoke the divine powers of Vishnu)² of the divine Sudarshan Yantra, the prayers offered to sanctify the Sudarshan and other Yantras (worship instruments)³, and to give them rest at the end of worship, the eternal attendants of Lord Vishnu such as Garud and Vishwakṣen⁴ etc., and the Param Anand (supreme form of spiritual ecstasy, bliss, beatitude and felicity) with all its Vyuhās (forms, intensities, types, connotations)⁵ are also present here in a personified form. [That is, all the divine accoutrements that are associated with Lord Vishnu are present here.]

[¹In the context of Lord Vishnu, who is also known as *Keshav*, the word *Vyuha* refers to the Lord's various emanations or images or forms that issue forth from one primary source, which would be the Supreme Being known as Vishnu or Lord Narayan himself to whom this present Upanishad is dedicated. Primarily there were only four Vyuhās of Vishnu, and these were the Shankha (conch), the Sudarshan Chakra (discus, his circular saw-like weapon), Gada (mace) and Padma (lotus). The symbolism of these four primary Vyuhās are—(i) Shankha stands for the five primary elements such as earth, water, fire, air and sky; (ii) Chakra stands for the cosmic mind; (iii) Gada stands for the cosmic intellect; and (iv) Padma stands for the evolvment of the creation and all the good and auspicious virtues present in it.

The *twenty-four Vyuhas* of Vishnu or Keshav are the various manifestations of the Lord on different occasions to fulfil his obligations of taking care of the creation. These are called Avataars or incarnations. They are briefly the following—sages Sankaadi, Varaaha (the Boar), sage Naarad, Lord Nar-Narayan, sage Kapil, Lord Dattatreya (regarded as a manifestation of Vishnu who was made into a child by Anusuiya, the devout wife of sage Atri, when the Trinity Gods had gone to her to test her chastity), Yagya or fire sacrifice or the Fire God, Lord Rishavdeo, Prithu, Matsya (the Fish), Kurma (the Tortoise), Dhanvantri (the Medicine Man of Gods and the one who discovered the curative powers of herbs), Mohini (the charming damsel), Lord Nrisingh (half lion and half man), Lord Vaaman (the Dwarf), Lord Hayagriva (the horse-headed incarnation), Sri Hari (who blessed Prahalad, the child devotee), Parashuram (the Brahmin who subdued the haughty Kshatriya class), sage Veda Vyas (the legendary classifier of Vedas, and the composer of the Upanishads and the Purans), Hans (the divine Swan), Lord Ram (of the epic Ramayana fame who killed the demon Ravana of Lanka), Lord Krishna (of the epic Mahabharat fame who preached the famous Gita on the battle-field of the epic war), Lord Buddha (who started Buddhism) and Kalki (the final incarnation that would appear at the end of the present era known as Kali Yug).

A special note is appended to the end of this paragraph which describes all the twenty-four incarnations or Vyuhas of Lord Vishnu or Keshav in detail. It is marked with the sign ‘#’.

There are many versions of Lord Vishnu’s incarnations or Vyuhas. *Srimad Bhagwata* gives three lists having 22 names (1/3/6-22), 23 names (2/7/1 ff.), and 16 names 911/4/3 ff.). It also declares that the Avatars or incarnations are numerous (1/3/26).

From the perspective of Vedanta, the twenty-four Vyuhas of Vishnu would be the various elements that have sprung forth or emanated from the Principal Consciousness called Brahm. They are the following—

The *twenty-four elements* such as 1 Mahat or Maya + 1 Ahankar + the 10 sense organs called the Indris (five organs of perception—ear, eye, nose, tongue and skin, and five organs of action—hand, leg, mouth, anus and genital) + 1 Mana (mind) + the 5 subtle elements called the Tanmatras (the senses of perception—sight, smell, sound, taste and touch) + the 5 gross elements called Bhuts (earth, water, fire, air and sky) + 1 Shakti (cosmic dynamic energy) = 24 Tattvas.

The twenty-four Tattvas have also been described in *Vishnu Puran*, Chapter 1, Canto 2, verse nos. 33-51; *Harvansha Puran*, 14840; and the epic *Mahabharat*, xii, 11242. They have also been mentioned in *Atharva Veda*’s *Narad Parivrajak Upanishad*, Canto 6, verse no. 2, stanza no. 6; *Shukla Yajur Veda*’s *Mantriko-panishad*, verse no. 15; and *Sam Veda*’s *Mahopanishad*, 1/4 – 69.

²The *Nyas Mantras* are special charm-words or syllables which are applied to empower and energise the worship Yantra (instrument of apparatus) with special mystical powers of the concerned deity, and at the same time are used to invoke the presiding deity of a particular Yantra to grant the worshipper his desired objectives.

³The *Yantra* is an apparatus or an instrument—a ‘Yantra’—of worship of a deity, to offer prayers and oblations to it and to invoke the deity’s mystical blessings to achieve success in any endeavour for which the worship is being offered. The Yantra has a physical form such as a diagram or chart. It can be drawn on a paper or engraved on a metal or stone. It is usually used in occult forms of Tantra worship.

Two Yantras are mentioned in this Canto—one is the *Sudarshan Yantra* (paragraph no. 3, 18) and the other is the *Narayan Yantra* (paragraph no. 22-70). The

Sudarshan Yantra is like the discus of Lord Vishnu, while the Narayan Yantra is also circular in outline and pertains to Lord Vishnu himself.

⁴*Garud* is the celestial vehicle of Vishnu. It is in the form of a divine eagle or heron. An Upanishad named the ‘Garud Upanishad’ of Atharva Veda is dedicated to this deity; it is Chapter 31 of the present volume.

Vishwakshen is the chief of all the attendants of Vishnu, and occupies the same pride of place as Lord Ganesh does amongst other Gods in general. He is the protector of Lord Vishnu’s devotees.

⁵The *Param Anand* refers to the spiritual ecstasy, bliss, beatitude and felicity of the highest order that is attained upon Brahm-realisation and the culmination of one’s spiritual journey. The various degrees of Anand and how one experiences them, how one interprets them, where one finds them—these are the various virtual *Vyuhās* or forms of Anand.] (18).

[Note--#Now we shall see the legends behind the *twenty-four incarnations or Vyuhās* of Lord Vishnu or Lord Keshav.

(i) Matsya or Fish incarnation of Vishnu—In this incarnation as a Fish or Matsya, which is the first of ten divine incarnations of Vishnu, the Lord is said to have saved Manu, the progenitor of mankind, and the Saptarishis (the seven mental sons of the creator Brahma) along with their wives during the dooms-day deluge. They were made to board a boat which was pulled by this Fish and saved from being drowned. They re-populated the world later on. It is a story identical to the Biblical story of the Noah’s Arc.

(ii) Kurma or Tortoise incarnation of Vishnu—It is the second incarnation of Vishnu. The Lord had supported the legendary Mountain called Mandara which had started sinking during the churning of the ocean by the Gods and the Demons in search of Amrit, the elixir of eternal and life.

(iii) Varaaha or Boar incarnation of Vishnu—It is the third incarnation of Vishnu in which he killed the demon Hiranyaaksha and lifted the earth from the flood water where it had vanished. According to some versions, this demon had hidden the earth in the bowls of the ocean. This extrication of the earth is a symbolic way of saying that the Lord saves the creation from being submerged in the vast ocean of sins and evil. An Upanishad preached by Lord Varaaha appears in the Krishna Yajur Veda tradition as its 30th Upanishad.

(iv) Nrisingh or half man and half lion incarnation of Vishnu—Lord Vishnu had incarnated as Nrisingh, the half man and half lion incarnation, to kill the demon Hiranyakashipu who had been tormenting his own son Prahalad because the child was a devout follower of Vishnu. After having killed the demon, Nrisingh started roaming in the forests, striking terror in the hearts of all the creatures. It was then that Shiva, the universal Lord who has been honoured with the epithet of ‘Mahadev’ as he is the greatest and supreme God, had assumed the form of Sharav, the killer, and liberated Vishnu from the body of Nrisingh. [Refer Sharav Upanishad of Atharva Veda, verse no. 8.] Thus liberated, Vishnu had thanked him a lot (refer Sharav Upanishad of Atharva Veda, verse no. 19) and went to his divine abode called Vaikunth. So this ferocious form of Shiva known as Sharav was also called ‘Rudra’, the angry and ferocious form of the Lord. One can imagine the fight that might have raged between Nrisingh and Rudra, and obviously Rudra must have been more ferocious than Nrisingh in order to subdue the latter.

An entire Upanishad of the Atharva Veda tradition, called the ‘Nrisingh Tapini’, is dedicated to Lord Nrisingh. This is the 7th Upanishad of this Veda.

(v) Vamaan or Dwarf incarnation of Vishnu—This is the fifth incarnation of Vishnu. When Bali, the grandson of Prahalad for whom Vishnu had incarnated as Nrisingh, conquered the entire world and deprived Indra, the king of Gods of his heavenly kingdom, Vishnu had took the dwarfish form of a Brahmin mendicant to

retrieve the heaven for Indra when he was requested by Aditi, the mother of Gods, to do so. He approached Bali, who was famous for his charities, as a Vaaman or dwarf and begged him for ground sufficient enough to be covered by his three small steps. When the unsuspecting Bali agreed, Vaaman measured the entire earth with one step, the heaven with the second step and for the third step he measured Bali's own head or his crown. He put his third step on Bali's head and pushed the latter to the nether world. Hence, Vishnu is also called 'Trivikram'—one who conquered the three worlds in three steps. But the Lord is so kind and gracious that he not only bestowed to Bali the kingship of the nether world but agreed to be his custodian there.

(vi) Parashuram or Ram with a battle-axe—This is the sixth incarnation of Vishnu. Parashuram was the son of sage Jamdaagni and his wife Renuka. He had subdued the haughty Kshatriya race or the warrior race led by king Kaartavirya who had become tyrannical and were oppressing others. It is the Brahmin incarnation of Lord Vishnu taken to vanquish and subdue the haughty Kshatriya or warrior class.

(vii) Lord Ram—This was the seventh incarnation of Vishnu. Ram was born in the Ikshwaku dynasty belonging to the solar race that ruled the kingdom of Ayodhya as the son of Dasrath and his eldest queen Kaushalya. In this incarnation, Laxmi, the goddess of wealth and prosperity who is the divine consort of Lord Vishnu, accompanied him as Sita, the divine consort of Lord Ram. The epic story of Ramayan in which the Lord slayed the arrogant and cruel demon Ravana is woven around this incarnation. Lord Ram exemplified the grand virtues of righteousness, auspiciousness, nobility, propriety and probity, and is therefore lauded as the 'Maryada Purshottam'—the excellent male who always observed the strictest code of proper conduct. Lord Ram's divine name 'Ram' is regarded as a Tarak Mantra—i.e. a Mantra that has the spiritual power to bestow liberation and deliverance to the creature. There are three Upanishads dedicated to the Lord—viz. Ram Purvatapini Upanishad, Ram Uttartapini Upanishad and Mukti Upanishad. The former two belong to the Atharva Veda tradition, and the third to the Shukla Yajur Veda tradition.

Lord Ram manifested himself in the Treta Yug which is the second era of the four-era one cycle of creation according to Hindu philosophy.

(viii) Lord Balraam—This is the regarded as the eighth incarnation of Vishnu. Balram was the strong elder brother of Lord Krishna of the Mahabharat fame. Both Balram and Krishna, being brothers, were born in Dwapar Yug which was the third era of the four-era cycle of creation. At the time of his death, the celestial serpent Sheshnath emerged from his mouth giving credence to the theory that he was an incarnation of Sheshnath who had earlier manifested himself as Laxman, the younger brother of Lord Ram during the seventh incarnation of Vishnu.

If this is the case then according to some scholars it would not be proper to include Balraam as an incarnation of Vishnu. Therefore, Balraam is excluded from the list and Lord Krishna is regarded as the eighth incarnation.

If this is taken into account, then it is suggested that Lord Buddha who established Buddhism is to be regarded as the ninth incarnation of Vishnu instead of it being Lord Krishna.

(ix) Lord Krishna—Krishna is the ninth incarnation of Vishnu. He is a well known deity and it is he who had pronounced the famous Gita and preached it to Arjun on the eve of the epic Mahabharata war. Krishna's story is narrated in full in Srimad Bhagwat Mahapurana. But according to some accounts, Krishna is the eighth incarnation replacing Balraam. This has been explained above.

(x) Kalki—This would be Vishnu's tenth and last incarnation before one cycle of creation ends. It is predicted that he would be born during the present Kali Yug, which is the fourth and the last era. He is visualized as riding on the back of a white horse, a drawn sword in hand, eliminating evil-mongers and those who are opposed to Dharma or righteous way of life. His main aim would be to restore Dharma.

Besides the above described ten incarnations of Lord Vishnu, there are said to be fourteen more minor Avtaars or incarnations of Vishnu, thereby bringing the total number of incarnations to *twenty-four Avtaars* or incarnations of Vishnu.

They are also called the twenty-four *Vyuhas* of Vishnu, and they are the various manifestations of the Lord on different occasions to fulfil his obligations of taking care of the creation. These are called Avataars or incarnations.

Aside of the ten Avtaars described above, the rest of the fourteen other Avtaars are briefly the following—

(i) Sages Sankaadi—*Sanatkumar* and others called *Sankaadi Rishis*—Sage Sanatkumar is considered as one of the four Manas Putras or the mental-born sons of the creator Brahma. The other three are Sanak, Sanatsujaat and Sanandan. They are regarded in a perpetual state of boyhood. Together they are called ‘Sanakaadi Rishis’.

Sanatkumar had taught the greatness of Vishnu to demon Vrittaasur, the enemy of Indra, the king of Gods. He also taught spiritual wisdom to sage Narad, the celestial sage.

Sanatsujaat taught spiritual wisdom to Dhritrashtra who was the blind father of the Kauravas of the epic Mahabharat fame. Sanak is said to an eternal companion of Lord Vishnu. Sanandan is regarded as the ancient preacher of the Sankhya Shastra, even more ancient than Kapil.

Sanatkumar, along with sages Pippalaad and Angira, had approached sage Atharva to ask him about the highest form of meditation, the different aspects of OM and the culmination of spiritual journey by realising Brahm in the form of Shambhu, one of the names of Lord Shiva, in Atharva Veda’s Atharva-shikha Upanishad.

It is narrated in the Brihajjabal Upanishad of the Atharva Veda tradition, in its Brahman 7, verse no. 8, that he had gone to Lord Kalagnirudra, one of the forms of Lord Shiva and who had first revealed this Upanishad to one sage Bhusund (Brahmans 1-6) to learn about the metaphysical importance and spiritual value of the Rudraksha beads. [Rudraksha beads are the seeds of the tree *Eleocarpus ganitrus*.]

According to Kalagni Rudra Upanishad of Krishna Yajur Veda, Sanatkumar was taught how to wear the Tripundra, the three lines marked on the forehead of all Hindus, by Lord Kalagnirudra himself.

The Sharva Upanishad of Atharva Veda, in its verse no. 22 stresses the greatness of Lord Shiva known as Maheshwar by saying that even such great sages as Sankadi and Sanatsujat had praised and prayed to the Lord, implying that if these great sages had worshipped Shiva then the latter must surely be a great Lord.

(ii) Sage Naarad— The celestial sage Narad is said to be a manifestation of the Supreme Being’s Mana (mind and its thoughts, intentions, hopes, desires and wishes, as well as the heart and its emotions and sentiments). The Supreme Being implements his wishes and expresses his intentions and wishes by making Narad his spokesperson. Purans list uncountable instances when Narad has approached people—both the good and righteous as well as the demonic and unrighteous ones—to tell them the path best suited to them, and the wise ones treated this advise as the Lord’s wish while the unwise ones still benefited from it because Narad’s intention was always to turn a living being away from his sinful ways and lead him towards the good.

Since he is a personified Mana, he is as fickle, unstable and transient as the Mana—never staying at one place for more than a fleeting moment, always roaming here and there in the entire creation, having nothing to stop his path as he could go anywhere he wished. And the remarkable thing is that he was never unwelcome anywhere—even the demons welcomed him with the same respect as did the Gods. It is believed that he is born in each Kalpa to carry out the wishes of the Supreme Being. [1 Kalpa is equivalent to 4.32 billion human years.] He was a Gandharva (a semi-God who is a celestial musician) named Upbarhan in the previous Kalpa. He was physically very charming and an expert musician. Once he showed his amorous intentions towards Urvashi, a celestial dancer, in the presence of Brahma the creator

where he was supposed to show exemplary restraint, and this overt show of lust resulted in his being cursed by Brahma that he would become fallen and take birth in the mortal world as a Shudra (a low caste). So, he was born from a maid servant of low caste working as a devoted servant of a learned Brahmin. Under the constant companion of this great Brahmin, Narad developed noble and auspicious virtues in him even though he was a mere child of five years. He was very modest, devoted, pious, noble hearted and diligent.

Since he had the Lord's genes in him, his inclinations were more inclined towards the Spirit than the worldly charms of material sense objects which he detested from childhood. As luck would have it, once some wondering mendicants came to spend the four-month period of the rainy season in the hermitage of this Brahmin. Narad served them with great devotion. Impressed by his service and having some inner vision of his high spiritual stature and the spark of divinity that was lying hidden in him waiting for an opportune moment to leap up and shine through, they blessed him, taught him meditation and contemplation, besides initiating the child into the path of the Lord.

Thus, the dormant fire of renunciation and spiritual awareness was immediately ignited in Narad's little heart and he wished to take to Sanyas (a renunciate's life marks by constant wandering as a mendicant in search of the supreme bliss and Truth), but he did not wish to hurt his mother's emotions. But the Lord had other plans for him, and soon his wish was fulfilled when his loving mother died of snake bite while milking a cow. Instead of grieving at such a loss in human terms, the child Narad felt happy as if the last fetter was broken and he was liberated from worldly obligations.

He immediately headed north towards the mighty Himalaya Mountains to do severe Tapa (penance and austerity) to attain access to the Supreme Being. The little one walked on and on, and finally he was so tired and exhausted that when he saw a cool lake he drank water, ate fruits that he found there, and sat under the shadow of a tree and became lost in meditation. Lord Vishnu revealed himself in his four-arm form in his heart, but Narad was so thrilled and excited with this divine vision that he wished to see the Lord in practical terms with his physical eyes rather than the subtle eyes while he was in deep meditation. But as soon as he opened the eyes, the Lord vanished. Most sorry and overwhelmed with this loss, the child began to cry bitterly. Then a cosmic formless reverberating voice said—'Oh son! Your penance is accepted, and I do love you. Though I bless you with an eternal life and that your memory of me would never be erased, but you would not be able to see me with physical eyes in this world. So go back to the world and carry out my divine mandate for me. Become my messenger and go preach the path of my devotion and holy name to this world so that other unfortunate creatures also can get liberation and deliverance from the fetters in which they have bound themselves with no one to show them an easy and practical way out of their predicaments. Go and preach my message to such people in every corner of the earth; go and preach my devotion and let them have faith in my holy name. Your salvation would come naturally and automatically to you as an unasked reward.'

Narad turned back with this divine mandate of the Lord to be carried out just like the great Apostles of Lord Jesus Christ had went, on the Lord's instructions, to spread his message to the people on this earth. Henceforth, he wandered in the entire creation like a mendicant, with an Indian lute upon which he sang the Lord's glories and his divine name, spreading the divine message of the Lord's mercy, compassion, benevolence and love everywhere, attempting to turn everyone towards the Lord and away from this sinful and mortal world so that each individual creature could get his spiritual liberation and deliverance. Such are the ways of great and holy saints that instead of being selfish to seek his own liberation and deliverance from the Lord as the grant of a boon and letting the rest of the world go to hell, Narad chose to sacrifice his own life, liberation and deliverance at the altar of larger good of creation

and to fulfill the wish of the Lord. Of course there is another twist to this tale—the Lord does not select everyone to carry on his own divine agenda, and a soul who the Lord designates for this purpose is indeed the most favoured and lucky one—because the Emperor chooses only those upon whom he has utmost confidence to carry out his personal task. It is just like Jesus choosing his disciples and ordaining them the task of spreading his glorious Gospel of love and salvation.

Therefore, Narad, the apostle of the Supreme Being, is the most loved disciple of the Lord, and it is evidenced by the fact that he is the only saint who has unrestricted access to the abode of the Trinity Gods (Lord Vishnu the sustainer and protector of creation, Brahma the creator and Shiva the concluder of this creation) besides every nook and corner of creation without hindrance and even without seeking any previous permission and appointment from anyone, be it a God or a Demon or anybody else. Narad's visit was always for the host's long term good, so he was always welcome and revered.

When the time came and the age of the physical body ended, he left the mortal coil like a serpent leaves its cuticle and went to heaven to sing the Lord's holy and divine name in the presence of Brahma, the old patriarch of creation. At the end of the Kalpa, at the time of Doomsday, he merged and became one with Brahma, the creator.

When the new cycle of creation came into being, he was born again from the Mana (mind) of Brahma the creator after the Sankadi sages were born. That is why, in the present Kalpa, Narad is called the 'Manas Putra' of Brahma, i.e. the son born out of Brahma's mental powers or his wishes. With this heritage and gene running in his blood, it is natural that he is highly respected and regarded as one of the greatest devotees of Lord Vishnu who is the Supreme Being personified. It is from the navel of Lord Vishnu that Brahma, the creator of the visible world, was born atop a divine Lotus that emerged from it while he was reclining on the bed made of the coiled body of the legendary serpent named Seshnath who floated on the surface of the celestial ocean of milk called Kshirsagar.

Narad preached renunciation of this material world and an extreme sense of faith in and complete devotion for Lord Hari (Narayan, Vishnu, the Supreme Being). But this was against the process of creation, because if everyone followed the path preached by Narad and renounced the material world then the process of propagation of the world and its inhabitant creatures along with its development would come to a naught. So, when Narad preached renunciation and detachment from this material world of sense objects that was mortal, transient and never a giver of peace and happiness to the ten thousand mental sons who were created by Daksha Prajapati (the first male from whom the rest of the human race was born and who was assigned the task by Brahma to propagate creation) in order to propagate this human race, Narad obviously annoyed him. These sons were preached by Narad and they all became mendicants, renouncing their attachment with this life and all charms of the material world along with the desire to enjoy it, gratify their sense organs and remain entangled in affairs of this world. Daksha Prajapati was exasperated and he created another set of ten thousand sons. But when Narad again played spoil-sport, Daksha cursed him that Narad would have to remain on the move always and he would not be able to stay at one place for more than two 'Gharis'. [1 Ghari = 24 minutes. In practice the term means a very short period of time; a fleeting moment as small as batting an eyelid.] As a result of this curse, Narad became an ever-wandering mendicant. But this suited the divine mandate of the Lord—for now Narad was forced to keep on the move and reach newer corners of the worldly and celestial realm to preach the Lord's message amongst the mortal creatures on earth and the Gods and Spirits in the heaven.

It is believed that Narad is immortal and is symbolic of the stupendous powers of a man's mind. The mind is ever-wandering like Narad, and the subtle message in the entire lore is that one should tame this restless mind and train it to turn away from this

mortal engrossing material world and instead turn towards the Lord for finding permanent liberation and deliverance from this world. A wise mind would teach (preach) the aspirant about the futility of pursuing this artificial world, and instead seek ways of finding the Truth that gives eternity and brings to an end the endless litany of miseries and horrors, perplexities and confusions, restlessness and agitations that are invariably associated with un-truth, delusions and ignorance.

Narad was the most erudite and scholarly devotee of the Lord. No other sage or saint could match him in his scholarly acumen and profundity of wisdom (ref. Chandogya Upanishad, Canto 7, section 1, verse no. 2). Narad is also credited with the composition of the great Sutra (formula or key) called 'Narad Bhakti Sutra' which defines the eclectic principles and characteristics of the spiritual practice called Bhakti which is to have a profound and exemplary degree of devotion for and surrender to the Supreme Being. Narad himself epitomizes Bhakti at its most refined and developed form.

(iii) Sage Kapil— He was the celebrated sage who is regarded as the fifth incarnation of Lord Vishnu (Bhagavata, 1/3; 3/24). He is compared to Lord Krishna in Bhagavata (10/26). He was the brother-in-law of sage Vashistha, being the brother of his wife Arundhati, and the only son of sage Kardama and his wife Devahuti. He taught even his mother spiritual wisdom in Bhagavata, and hence this part of this scripture is called 'Kapil Gita' in which the sage has expounded upon the philosophies of Sankhya Shastra, Ashtanga Yoga (the eight-fold path of Yoga) and Bhakti-yoga (the path of devotion for and submission to the Lord) (3/25-33).

Sage Kapil is however renowned for one of the six schools of Indian philosophies known as Sankhya Shastra.

(iv) Sage Veda Vyas, the legendary classifier of Vedas, and the composer of the Upanishads and the Purans— Veda Vyas was the great grandson of sage Vashistha, grandson of sage Shakti, and the son of sage Paraashar and his wife Satyawati, a fisherwoman. Since he had dark complexion, he was also called Krishna, and since he was born on an island, he was called Dvaipayana. Hence his other name was Krishna Dvaipayana.

He is said to be an incarnation of Lord Vishnu himself. The Lord felt that the vast knowledge enshrined in the scriptures were so huge, jumbled up, abstract and complicated that they were beyond the reach of ordinary mortals. Further, till this time, everything was based on memory—hearing and speaking, passing from one generation of disciple to another generation in the oral form. There was a need to sort them out, to codify, systematise and classify this vast ocean of knowledge contained in the Vedas to make them more useful and handy.

So, Vishnu took the form of Veda Vyas to undertake this mammoth, daunting and formidable task. It is believed that Veda Vyas was born at the end of Dwapar Yug during the period of the Mahabharat war.

Soon after his birth, he took permission from his mother Satyawati and went to Badrinath in the Himalayas to do severe penances and austerities (Tapa), and he established his hermitage there. Hence, he was also called 'Badarayana'.

Veda Vyas gathered all the Mantras of the hitherto undivided Vedas, edited them and grouped them according to the use to which they were put during fire sacrifices. He named them according to the class or section of the priests (called Ritwij) who would use them for their ritualistic practices, such as the fire sacrifices. This added another epithet to his name—viz. 'Vyas', the one who knew the Vedas like the back of his hands and was therefore able to classify and divide them into four distinct texts as they now exist; the one who is the best preacher of the subject and made it easy for dissemination and teaching purposes. He classified the Vedas into four basic texts called the Rik, the Atharva, the Sam and the Yajur Vedas.

The four classes of such expert priests and the relevant Vedas were—(i) 'Riks'—they were also the senior most priests who presided over the ritual, and were also called Hota. They chanted the hymns of the Rig Veda. (ii) 'Yajus'—these priests

were junior to the Riks and were also called Adhwaryou, and they chanted the verse categorised as the Yajur Veda. (iii) 'Samans'—these priests were the chanters of the holy hymns in chorus, in a loud, clear and melodious voice. They can be called modern day classical singers who attend any great function or festivity. They were also called Udgata. The Sam Veda was meant for them. (iv) 'Atarvans'—these priests did the actual, physical offerings of oblations in the fire pit of the fire sacrifice. They were called Brahma because they represented the senior most God, and the hymns used by them were classified and collected under the name of the Atharva Veda. So, as we have seen, the basic function of this classification was to facilitate the performance of the fire sacrifice.

But this exercise did not give peace of mind to Veda Vyas. His soul was yearning for something higher than these futile ritualistic exercises. So, as a next step, he further classified the Vedas into various Sanhitas, the Brahamans, the Aranyakas and the Upanishads.

The result of this tireless exercise produced a much vaster tome of spiritual, philosophical and metaphysical literature so much so that Veda Vyas thought it necessary and fit to write the basic tenets and maxims of the Vedas into a single volume for quick referral. This was called 'Vedant Sutra', literally, the key to the Vedas.

The concept of the Vedas was still indigestible and daunting for the masses. So, he rendered the precepts palatable and within the grasp of the common man by resorting to the time-tested and more acceptable method of the story-telling form by writing the eighteen Purans and the eighteen sub-Prans—a stupendous literary achievement of mammoth proportions.

He had also penned the epic Mahabharat besides these eighteen Purans and eighteen sub-Purans. It is said that Ganesh, the most revered and wise son of Shiva who has the head of an elephant, was the scribe who wrote down the dictation of Mahabharat as Veda Vyas narrated it non-stop, a job which is not a child's play. It is also believed that inspite of remaining a chaste saint for life, he had begot the three legendary figures of Mahabharat, viz. Dhritraastra, Pandu and Vidur, from the wives of Vichitravirya at the behest of his mother Satyawati. He gave divine sight to Sanjay, the charioteer who narrated the on going famous battle of the Mahabharat to Dhritraastra who was blind. Being a contemporary sage of the Mahabharat period, he knew almost all the persons of this great epic.

During the reign of Kurus, he was revered by both the Kurus as well as their arch rivals, the Pandavas. Both the heroes of the epic Mahabharat war held him in high esteem. When he decided to write the story of Mahabharat—the documentary narration of the epic story of clan-fight and the devastating war that followed it—he chose Lord Ganesh as his scribe; Veda Vyas had dictated while Ganesh had written the epic. It is said that the site where the epic Mahabharat was written is called 'Vyas Gufa' (Vyas' cave) located near Bharoach while the place where he did his final Tapa is called Vyas Ashram located in the village of Mana two miles from the shrine of Badrinath in the Himalayas. His hermitage during the epic Mahabharat war was located in a village about ten miles north of the city of Ambala in Haryana state. River Saraswati flows nearby. This place is also famous as Vyas Ashram.

Time flew by, but still Veda Vyas did not get peace at heart. Once, while he sat near river Saraswati, full of remorse, unsatisfied and contrite, sage Narad came to him and advised him to write Srimad Bhagwat containing 18000 Slokas. This voluminous work gave him his final peace, so it is said.

His Guru was sage Yagyavalkya. His son was sage Shukdeo, the parrot saint. Veda Vyas chose five chief disciples who were initiated by him in the four Vedas and Purans. They were as follows—(a) He taught Rig Veda to his disciple named Paila; (b) Yajur Veda to his disciple Vaishampayana; (c) Sam Veda to his disciple Jaimini; (d) Atharva Veda to his disciple Sumanthu; and (e) the Purans to his disciple Ramharshan.

It is believed that sage Veda Vyas still lives, albeit in an invisible, intangible and subtle form in the shape of the vast repertoire of spiritual, philosophical and metaphysical literature that he has created for humankind, something which is not possible for any ordinary human being. These fortify the legend that he was an incarnation of Lord Vishnu and not an ordinary human being, a fact that is extensively covered in Vishnu Puran 3.3.

Summary of His Works :—

Veda Vyas classified the Vedas into four volumes— Rig, Yajur, Sam, Atharva.

Each of the four Vedas had various Sanhitas and Brahmanas as follows—(a) The Rig Veda—Aitareya, Kausitaki; (b) the Yajur Veda—Taiteriyā, Satpath; (c) the Sam Veda—Panchvimansa, Arseya, Vamsa, Talavakara, Daivata, Sadnimansa, Mantra, Chandogya, Samavidhana, Samhitopanishad; (d) the Atharva Veda—Gopath.

Each Veda had a sub-Veda as follows—Rig Veda had Artha-Veda, Yajur Veda had Dhanur-Veda, Sam Veda had Gandharva-Veda, and Atharva Veda had Ayurveda.

Again, the Rig and the Yajur Vedas had different Aranyakas as follows—(a) The Rig Veda—Aitareya, Kausitaki; (b) the Yajur Veda—Taiteriyā, Brhidarankya.

Each of the Vedas further had different Upanishads as follows—(a) The Rig Veda—there are 10 principal Upanishads of the Rig Veda, such as Aitareyaopanishad, Kausitaki Upanishad etc.; (b) the Yajur Veda—there are 19 principal Upanishads of the Shukla Yajur and 32 principal Upanishads of the Krishna Yajur Veda, such as Taiteriyā, Svetashvatra, Katho, Brihdaranakya, Maitri, Ishavasya Upanishads etc.; (c) the Sam Veda—there are 16 principal Upanishads of the Sam Veda, such as Keno, Chandogya Upanishads etc.; and (d) the Atharva Veda—there are 31 principal Upanishads of the Atharva Veda, such as Mundako, Mandukyo, Prasano Upanishads etc.

Veda Vyas also wrote the 18 Purans as follows—Brahma, Padma, Vishnu, Vayu, Bhagwat, Narad, Markandey, Agni, Bhavisiya, Brahmavaivarta, Linga, Varah, Skanda, Vaaman, Kurma, Matsya, Garuda, Brahamanand Purans.

His other contributions to spiritual literature include—Mahabharat, Srimad Bhagwat, Vedant Sutra, Vyas Smriti and Laghu Vyas Sanhita.

(v) Lord Nar-Narayan—As the name suggests, this incarnation of Lord Vishnu was to establish the principle of Advaitya or non-duality of Vedanta which says that the Jiva, the living being, and the Ishwar, the Supreme Being known as Brahm are not two distinct entities but the same cosmic Consciousness existing in two different planes—the former at the microcosmic level of creation and the latter at the macrocosmic level of creation.

The word 'Nar' literally means a man, and 'Narayan' refers to the supreme Lord. At the beginning of creation, the supreme Brahm had revealed himself in two forms called Nar and Narayan. From the angle of the Upanishads and the genesis of creation described in them, the Nar was the primary man, and the Narayan was the Viraat Purush known as Vishnu. The Nar was created as an image of Narayan (refer Aiteriya Upanishad of the Rig Veda).

These two images of the Supreme Being, i.e. Nar and Narayan, were assumed by Lord Vishnu, the Viraat Purush, to establish the importance of Tapa (austerity and penance) as well as Vairagya (renunciation and total detachment from the material charms of this deluding world). They had matted lock of hairs on the head, held a Swan in their hands to indicate purity and wisdom, had the mark of the Chakra (discus of Vishnu) on the sole of their feet to indicate that they have conquered the world, and the sign of the Srivatsa (the foot-print of sage Durbasa) on the chest to imply their grand virtues of extreme humility, forgiveness, fortitude, tolerance, and love for devotees.

After birth, they went to the higher reaches of the northern Himalayas to do severe Tapa in the region now known as Badrikaashram. There they did Tapa for thousands of years. The king of Gods felt jealous of them and tried his best to distract them by employing all the tricks he could—such as luring them with great boons,

sending Apsaras (celestial beauties) and Kaamdeo (the God of lust and passion) to distract them with sexually explicit overtures, singing, music and dance, and so on and so forth. But he failed in all attempts, and had to surrender. The sages neither fell in any trap nor did they become angry or cursing. This incarnation therefore was taken to establish the glorious virtues of Tapa, Vairagya, Kshamaa (forgiveness), Namrataa (humility), Titiksha (endurance, sufferance, fortitude and tolerance), not having Ahankar (ego, pride, haughtiness and arrogance) etc.

It is believed that Lord Nar and Narayan are personified forms of these grand and glorious virtues, and are still doing Tapa in the Himalayas. Perhaps this is the reason why one finds an extreme sense of spiritual fulfilment and surging exhilaration when one meditates in the Himalayas.

(vi) Lord Dattatreya—He is regarded as a manifestation of Vishnu who was made into a child by Anusuiya, the devout wife of sage Atri, when the Trinity Gods had gone to her to test her chastity.

Lord Dattatreya is a fractional incarnation of Lord Vishnu, the supreme Lord of creation in his cosmic form as the Viraat Purush from whom the rest of the creation, including the creator Brahma himself, was created.

An entire Upanishad of the Atharva Veda tradition is dedicated to him, and it is called ‘Dattatreya Upanishad’. It is Chapter 30 of our present volume. A detailed note on Lord Dattatreya is given at the end of verse no. 4 of this Upanishad.

(vii) Lord Rishavdeo—King Naabhi had no son, so he did a great fire sacrifice accompanied by his wife Merudevi. As a result, the Yagya Purush—the personified form of the Fire God who is none other than Lord Vishnu because it is also one of the Lord’s many forms—appeared before them and asked them to ask for a boon of their choice. They requested a son in the image of the Lord, i.e. a son who would possess all the divine virtues as possessed by the Lord himself. The Lord granted them their wish and said that since there was no one like him, he would himself incarnate as their son.

Thus was born a divine son whom the king named ‘Rishavdeo’—literally meaning the best one. The child had a magnificent charm around him and was endowed with auspicious virtues. When he came of age, the king handed over the reins of the kingdom to him and himself went to the forest to do Tapa.

Rishavdeo ruled the kingdom very righteously and strictly according to the tenets of Dharma (laws of correct and rightful conduct, ethics and morality, propriety and probity). He was very endeared to his subjects. Once, the king of Gods tested his abilities by stopping clouds from giving rain, so Rishavdeo created rain by his own mystical powers so that the subjects of the kingdom would not starve.

He had a hundred sons, the eldest one being Bharat. It is after him that India is called ‘Bhaarat’. Bharat was an image of his father, and similarly endowed with noble virtues and mystical powers that come with Tapa. His nine younger brothers were Kushavarta, Ielavarta, Brahmavarta, Malaye, Ketu, Bhadrasen, Indrasprik, Vidharva and Kikat established their own kingdoms.

The next ten younger brothers remained Brahmacharis from childhood, i.e. they never married and became great sages who spent their entire life as great devotees of Lord Vishnu, preaching about the Lord and spreading his gospel. They are Kavi, Hari, Antariksha, Prabuddha, Pippalaayan, Avihortra, Drumil, Chamas and Karbhaajan.

When the time came, king Rishavdeo handed over the responsibilities of the kingdom to his eldest son Bharat and went to the forest. He was so full of Vairagya (renunciation, detachment and dispassion towards this material world) and overwhelmed with Gyan (enlightenment and wisdom) that he became a top-class Sanyasi (a mendicant, a monk or a hermit) of the order of Avadhut as well as a Paramhans. These two states are the highest levels of Sanyas. He roamed around unconcerned with anything, lost in his own blissful thoughts about the Truth and the Consciousness. People regarded him as having become mad, and his behaviour was

so odd and unconventional that sometimes people even insulted him. But Rishavdeo was so engrossed in meditation and contemplation, so focussed on his 'self' known as the Atma that he paid no heed. He was a personified form of Sanyas and the extreme measure of Anand (bliss, ecstasy, joys and happiness) that comes with self-realisation. He epitomised the exemplary state of highest spiritual realisation and achievement of supreme bliss which is the aim of Yoga.

When the time came for him to discard his mortal body, he sat down in deep meditation and was burnt in a fire that lit itself in the surrounding forest of bamboo trees. In the way he led his life, Lord Rishavdeo laid down a sterling example as to how a truly wise man should live a fruitful life, and how he should end it.

(viii) King Prithu— The story of Prithu is a narration of how Lord Vishnu actively takes part in making the earth self-sustaining for its inhabitant creatures, and how the Lord did this by manifesting as a great king to ensure that the creation revealed by him would not suffer for want of daily necessities of life.

In the race of Manu (the first Man) was a Prajapati (the father of a large clan) named Anga. He was married to Sunitha, the mentally-created daughter of Mritu (the God of death). From her he begot a son named Ven who was of a sinful nature, most pervert and an atheist. Sages were so annoyed at him that they killed him by employing the mystical power of their Tapa (penance and austerity). From his dead body they created another king named 'Prithu'.

Prithu was crowned Emperor of the whole earth. He was a wise king and an able administrator who organised the working of the state and established a system of government.

Once there was a great famine and he sternly warned the earth to produce food (crop) from the seeds sown and not to swallow them up, or face action. The earth was terrified and appeared before him as a cow. She apologised and asked him and others to milk her and get what they wanted. So, Prithu and other sages and seers milked her, and thus were produced the agricultural crops, the body of knowledge called the Vedas, the Soma juice for doing fire sacrifices and providing refreshment, the virtues of strength and vigour, music, offerings fit for making oblations to Gods and Spirits of dead ancestors, etc. Prithu also made the earth plain and livable, created villages and towns, provided protection from fears and dangers of all kinds to the earth's inhabitants, and established the tradition of doing fire sacrifices in order to honour the Yagya Purush who is none but Lord Vishnu.

In other words, the barren earth became productive and habitable, and Prithu did the first ground-breaking work and laid the first foundation of a complex infrastructure that would be eventually built on this earth to sustain the needs of increasing population and expansion of civilisation that would eventually take place on the earth.

Hence, the earth came to be known as 'Prithivi'—the daughter of Emperor Prithu to commemorate his contribution to creation.

He performed a hundred Ashamedh Yagyas (Horse sacrifices). Towards the end of his life he preached his subjects and appointed his son Vijitaashwa on the throne. Then he went to the forest with his queen named Archi to do severe Tapa (austerity and penance) to attain Nirvana or final emancipation and salvation.

His story appears in Srimad Bhagvat, 4/15-23, and in Vishnu Puran, 1/13.

(ix) Dhanvantari— He was the Medicine Man of Gods and the one who discovered the curative powers of herbs. He is the incarnation of Lord Vishnu to provide the cure in the form of herbal remedies from the innumerable diseases that the creatures would suffer from in this world. In his role as the sustainer, protector and nourisher of this creation, this role of Vishnu was very vital as otherwise the creatures would suffer and die of so many natural diseases that the agenda of the Supreme Being to make the creation self-sustained and self-propagating would be defeated.

He emerged from the ocean when it was churned at the beginning of creation in the search for Amrit (or the elixir of life) along with other wealth or assets that are necessary to sustain and develop a pleasurable and comfortable life on earth. The pot of Amrit was held by him towards the end of this churning. Since he was a fractional incarnation of Lord Vishnu, he too had four arms and a glowing complexion that was dark with the bluish tinge of the sky.

The kings of Gods, Indra, appointed him as the celestial physician of Gods. Once, severe disease swept through earth. Then Indra requested Dhanvantari to manifest himself to eliminate the suffering of the creature. Dhanvantari was thus born as Divodas, the king of Kashi (Varanasi in the present day India). He was a great botanist and a naturalist, and compiled a *Materia Medica* of herbs. The science of healing with plants and shrubs is called *Aurveda*, and is given a status of a minor Veda. The etymology of the word ‘*Ayurveda*’ means ‘the knowledge (Veda) that makes life enjoyable, disease free and enhances its span and utility (Ayu)’.

There are other names of Dhanvantari—viz. Bhishak and Vaidya. While Dhanvantri is an expert in 300 medicines, Bhishak is in 200, and Vaidya in only 100 medicines.

The medical treatises attributed to Dhanvantari are the following—Chikitsa Dipika, Baal-Chikitsa (medicines of children), Dhanvantari-Nighantu, Vaidya-Bhaskarodaye, and *Ayurveda Saravali* (the key note or essential principles of the science of *Ayurveda*).

(x) Mohini—This is the most charming, bewitching, voluptuous and beautiful incarnation of Vishnu as a lustful enchantress. It so happened that the demons had snatched the pitcher of Amrit produced by the churning of the ocean, depriving the Gods of this ambrosia. So Vishnu had assumed the form of a beautiful and most voluptuous enchantress to deceive the demons and distribute the Amrit amongst the Gods.

This Avtaar or incarnation is meant to convey the spiritual message that one should not fall prey to worldly temptations of passions and lust as well as the charms of the sense organs and their objects in this material world because then Mukti (liberation and deliverance or freedom from the entanglements of the web-like world) would be impossible inspite of the fact that it was almost ready at hand. The demons had already got the pitcher of Amrit, and had they not fallen prey to the tempting overtures of this Mohini they would have drunk it.

(xi) Lord Hayagriva, the horse-headed incarnation—The word ‘Hayagriva’ has two parts—‘Haya’ means a horse, and ‘Griva’ means a neck or head.

There are two main interpretations of this incarnation of Lord Vishnu. According to one, when sage Yagyavalkya was deprived of the knowledge of the Yajur Veda due to the curse of his Guru Vaishampaayana, he went and did severe Tapa (austerity and penance) to please the Sun God. Pleased, the Sun God taught him another version of the same Veda by assuming the form of a deity with the head of a horse. Since the Sun is a visible manifestation of the Viraat Purush, one of the more subtle forms of Lord Vishnu, it was actually Lord Vishnu himself who had taught the sage this Veda. Hence, Lord Hayagriva is regarded as the Lord of knowledge and learning, and is given the same respect as shown to Goddess Saraswati, the patron goddess of learning and wisdom.

According to another story, there was a demon with the head of a horse, and he was therefore called Hayagriva—the horse-headed one. He was the son of Diti, the mother of demons. He did severe Tapa (austerity and penance) on the banks of the river Saraswati and offered his worship to Goddess Jagdambika (Parvati, the divine consort of Lord Shiva and the cosmic Mother). The Goddess was extremely pleased by his severe Tapa and asked for a boon, upon which Hayagriva requested immortality. The Goddess told him that all who are born must die, so this grant was practically not feasible. She asked him to ask something else. The demon was cunning, so he re-phrased his request and asked that he be killed by someone who

was exactly like him. He thought that since no two living beings are alike, he would indirectly get immortality. The Goddess granted him his desired boon. Thus armed, he let loose terror in the world, thinking that no one would now be able to kill him.

To get rid of him the Gods designed a strategy whereby Lord Vishnu lost his original head and was grafted with the head of a horse by the medicine men of the Gods named Ashvini Kumars. They are the twin sons of the Sun God. Thus, Vishnu also became a 'Hayagriva'. It was in this form that the Lord slayed the demon. This story appears in Devibhagwat, 1/5.

According to the third story, the Vedas had been stolen by two demons named Madhu and Kaitav who had hidden them in the eastern ocean. Lord Vishnu had assumed the form of Hayagriva to kill them and restore the Vedas.

The legend about the birth of these demon says that at the time Brahma the creator emerged atop a thousand-petal lotus that sprouted from the navel of Lord Vishnu, the Viraat Purush, two drops of water symbolising the two Gunas (qualities) of Raja and Tama (the medium and the lowest type of qualities) were present on one of the petals on which Brahma sat. Madhu was born from the drop of Raja Guna, and Kaitav from the drop of water representing Tama Guna.

Once they went up to the heaven and saw the Vedas in all their glorious form placed alongside Brahma who was engaged in the process of creation. The duo immediately stole the Vedas and hid them under the water of the eastern ocean. Brahma was confounded and requested Lord Vishnu to retrieve them as the Vedas were the former's eyes as they contained all the knowledge needed for all the aspects of creation. So Vishnu appeared as a deity with a head of a horse—i.e. as Hayagriva. The heaven was his head, the rays of the Sun were his glistening hairs, the sky and the underworld were his ears, the earth was his forehead, the river Ganges and Saraswati were the two halves of his chest, the oceans were his thighs, the Sun and the Moon were his eyes, dusk was his nostril, OM was his ornament, electric was his tongue, the Pittars (Spirits of dead ancestors) were his teeth, the Brahma Loka was his lip, and Kalratri (the night of the doomsday) was his neck.

Lord entered the ocean and went to the ocean bed, the nether world called the 'Patal Loka'. There, he began to neigh melodiously, singing the hymns of the Sam Veda. The two demons were so enchanted by this singing that they came out to hear it. Lord Hayagriva got an opportunity and he immediately took the Vedas and gave them to Brahma. After their restoration, he went back to the ocean and lived there for some time.

When the demons reached the place from where they had heard the sweet singing emanating, they found no one. So they got suspicious and rushed back to where they had concealed the Vedas to find them missing. Then they began frantically to search for the Vedas as well as the miscreant who removed the scriptures from the hiding place. They reached the surface of the ocean and found Lord Vishnu peacefully reclined on the bedstead of the celestial serpent named Sheshnath. They assumed that certainly the Lord was the one who had taken away the Vedas. They shouted and caused so much raucous that Lord Vishnu woke up from his cosmic sleep, and then there ensued a battle between the Lord and the demons which lasted for five thousand years.

Pleased by their valour and ardour, Vishnu asked them to request for a grant of a boon. The haughty demons retorted and sneered at the Lord, asking the latter to ask for a boon instead. The Lord asked that they be killed at his hands. [Markandey Puran, 81/74.] Taken aback, the demons said that they were also entitled for a boon as promised by the Lord himself. The Lord granted them permission to ask, and they requested that they be killed at a place where the earth was not submerged in water. [Markandey Puran, 81/76.] Vishnu immediately spread his thighs on the surface of the ocean, and deluded by the Lord's Maya the demons thought that dry earth has emerged from the ocean. Aside of this, they also found in this happening a chance of their own salvation and so willingly put their heads on it. Vishnu invoked his

Sudarshan Chakra (the sharp weapon of Vishnu which is like a circular saw) to chop off their heads. This episode is described in detail in the Markandey Puran, Chapter 81.

Perhaps this episode describes how the continents and islands came into being during the process of creation.

Iconographically, Lord Hayagriva is depicted as having a human body and the head of a horse. This incarnation resembles the Nrisingh incarnation when the Lord had assumed a body whose lower part was that of human, and the upper part that of a lion. An Upanishad belonging to the Atharva Veda is dedicated to Lord Hayagriva. It is the 29th Upanishad and bears the same name, i.e. Hayagriva Upanishad. It has only 20 Mantras.

(xii) Sri Hari, the form Vishnu assumed to bless Dhruv, the child devotee—The word ‘Hari’ means one who steals. In the context of Lord Vishnu it means the Lord who eliminates all the sorrows, worries and torments as well as the evil effects of sins and other misdemeanours of his devotees. It was in this form which is munificent and benevolent that he had revealed himself before his child devotee known as Dhruv.

The story of Dhruv is briefly as follows:-- He was the elder son of king Uttanpaad from his first wife Suniti. The king was so charmed by his second wife named Suruchi that he completely neglected Suniti and Dhruv. Once it so happened that the child Dhruv was snubbed by his step-mother for attempting to draw affection of his father. The child was very upset and despondent. He approached his mother for solace. She advised him to accept Lord Vishnu as his eternal and loving Father and protector. For this, Dhruv had to do severe Tapa (austerity and penance). The overwhelmed child was so determined that he immediately proceeded to the forest to do Tapa. He met the celestial sage Narad on the way who instructed him on ways to meditate upon the Lord. The Lord was extremely pleased by Dhruv’s sincerity and devotion and appeared before him. He blessed the child and gave him two boons—one was the restoration of his honour and kingdom of the kingdom, and the other was a permanent place in the heavens, a position so exalted, steady and unwavering that even the God could not match it. So, in due course of time, Dhruv assumed a personified form of a divine God and took up his heavenly abode in the Dhruv Loka. The story related to him is narrated in detail in the Vishnu Puran, section 1, cantos 11-12.

The Tripadvibhut Maha-Narayan Upanishad of the Atharva Veda, in its Canto 5, paragraph no. 15 mentions this Dhruv Loka and Dhruv, the God, when it describes the path taken by a devotee of Lord Vishnu to the latter’s abode in heaven when the former leaves his mortal body. The devotee has taken a ride on the back of the Garud, the vehicle of Lord Vishnu who is represented by the divine ethereal Mantra known as OM in this Upanishad, and has already passed through the Satya Loka where Brahma the creator lives, the Ishan Loka where Lord Shiva lives, the Graha Loka where the different Grahas live, the Saptarishi Mandal where the seven celestial sages live (and which is represented by the Great Bear constellation of stars in the sky), the Surya Mandal which is the realm of the Sun God, and the Chandra Mandal which is the realm of the Moon God. Then he reaches this Dhruv Mandal.

The Dhruv Loka or Dhruv Mandal is represented by the North Star and its immediate environs in the celestial map. The North Star is a personified form of Dhruv. The North Star has a great symbolic importance and value here. This star remains static and unchanging in its position in the sky—it is a metaphor for stability, uniformity, unchanging nature, steadfastness and durability. It is a vital guide for navigation purposes in the night. Hence, if a person is steady in his thoughts and single-mindedly pursues his chosen path, always keeping the aim in sight, he is sure to achieve success and obtain his objective in life. The objective of the spiritual aspirant is to attain his Lord Vishnu and find Mukti. So when he has crossed all hurdles and overcome formidable obstacles in the symbolic form of praises and honours lavished on him en-route to heaven as described above in this narration, it is

only then that he can rupture through this world and reach the exalted abode where Vishnu lives. Now, if the celestial sky is imagined as a huge sphere, then this is the point from where the cosmic traveller has ruptured the solar system and entered the upper reaches of the cosmos where the upper heaven is situated. Since Lord Vishnu's abode is supposed to be unchanging and steady in its glory unlike other worlds, the metaphor of the North Star as a gateway to Vaikunth, the abode of Vishnu, appears to be very appropriate here.

(xiii) Yagya as a manifestation of Lord Vishnu—The legendary story associated with this incarnation is briefly as follows. The daughter of Swayambhuva Manu and his wife Shatrupa was named Aakuti. She was married to Prajapati Ruchi. Lord Vishnu was born as her son who was named 'Yagya'. He was very holy and divine from childhood, and is regarded as the forefather who initiated and established the system of doing fire sacrifices as a means of empowerment and harnessing the dynamic energy and power of Nature. This helped to energise and empower the Gods who represented the various forces of Nature needed for the sustenance, nourishment, development and growth of this creation.

He had also fought the demons who were tormenting his father and mother while they did Tapa, and had vanquished them. His wife was named Dakshina (literally meaning the donation that is given during fire sacrifices), and he had twelve sons from her. The Gods were very obliged with Lord Yagya and anointed him to the throne of Indra, their king in heaven.

In the Purans there are numerous instances when great kings and sages had done fire sacrifices, and the personified form of the sacred fire, the Fire God, had emerged to grant them their desired requests. This glorious revelation of the sacred fire is also Lord Vishnu in his divine form as the Fire God. So we deduce that the Fire God is one of the many manifestations of Vishnu.

(xiv) Hans, the divine Swan—Lord Vishnu had once appeared as a divine Swan to preach the four celestial sages Sankaadi who were the mental sons of the creator Brahma.

Once it so happened that Sankaadi approached Brahma and wanted to know how can someone, who wished to have Moksha (final liberation and deliverance from this material world; freedom from attachment to the sense objects of this world; emancipation and salvation), effectively control his mind and sub-conscious and divert them away from the material charms of the world and its sense objects, and towards the inner self where the Atma, the pure consciousness, resides?

Brahma was confused and did not have the answer. So they meditated upon Lord Vishnu, the Supreme Being, from whom Brahma was born. Thus Vishnu appeared as a divine Swan. The sages could not recognise the Lord in that form and asked who he was. Then Vishnu, in his form as a Swan, preached the great tenets of metaphysics and Vedanta to Sankaadi. Thus, this revelation of Vishnu as a Swan was an embodiment of the greatest and the most refined form of spiritual knowledge, erudition, wisdom and enlightenment. Henceforth, Swan came to be known as a synonym for these eclectic and divine virtues. This story appears in Srimad Bhagwat, 11/13.

The Swan is depicted as a vehicle of Saraswati, the Goddess of knowledge and wisdom. In other words, those who worship Swan ride on the crest of knowledge, wisdom, erudition, sagacity and enlightenment.

The *Pashupata Brahm Upanishad* of the Atharva Veda tradition, Canto 1, verse nos. 17, 19-20 clearly say that 'Hans' is a term employed to refer both to the Atma as well as Brahm. While the Atma is the pure consciousness that is the 'true self' of the individual creature, Brahm is the cosmic Consciousness represented by the Mantra 'OM' or 'Pranav'. The Hans Mantra is the 'Sutra' or thread that links the Atma to Brahm.

An enlightened and self-realised person thinks of himself as a Swan and feels exhilarated that he is not an ordinary man bogged down by worldly fetters, but an exalted soul that is like a Swan.

The bird *Swan* or *Hans* is considered the most pure, clean, wise, erudite and clever among the birds. It is said to eat pearls, which means it picks up and accepts only the best amid the variety of things available to it in the form of an assortment of various gems and jewels representing the dazzling charms of this world. It is also reputed to drink milk leaving aside the water content in it symbolising its ability to imbibe the essence and the best, and leave the rest aside. It is also the vehicle of Goddess Saraswati, the patron Goddess of knowledge, wisdom, intelligence, speech and learning, indicating that it bears these glorious virtues. Hence, the reference to a swan while describing a creature conscious of the vital wind or *Pran* passing through him means the basic, inherent and intrinsic tendency of that wisened and intelligent creature is to be the best, most pure and divine, wise, awakened and enlightened, adroit, clever and sagacious like the swan, and pick all the goodness and forsake all that is bad in this world. Saraswati rides on a swan, symbolising the creature's inborn enlightenment and excellence of his mental caliber. Symbolically, Saraswati resides in his *Pran* because it rides on the swan, i.e. in his heart, throat and mind—that is, his heart has purity of emotions, he speaks well of all, and his wise words are sought after by all as priceless gems of wisdom, and his mind is intelligent, discerning and noble.

A wise man is expected to pick up the truth and leave aside the non-truths from the basket full of worldly charms of astounding proportions and myriad forms of temptations present in this creation.

Those wise men who have developed the level of wisdom, erudition and sagacity that they can discriminate between what is good and what is not, what is true and what is false, what is liberating and what is ensnaring for their soul are also honoured by the epithet of being a 'Hans' (Swan) because they are just like the Swan which has the legendary ability to pick up pearls from an assortment of gems, and drink milk leaving behind water and other adulterants in it. Even amongst such wise and enlightened men, those who have realised the 'truth' about their own self in the real sense, i.e. have become 'self-realised' and hence 'Brahm-realised' truthfully, and have consequentially attained the highest level of enlightenment and wisdom are called 'Param Hans'—literally meaning those who have accessed the 'supreme type of enlightenment'. The grand and auspicious virtues and characteristics of such an exalted Sanyasi who is self and Brahm realised has been described in detail in the *Param Hans Parivrajak Upanishad* of the Atharva Veda tradition.

The alphabet 'Ha' of the word 'Hans' is sounded by the vibration of the exhaled wind passing through the vocal cords present in the throat or the wind pipe which connects to the nose, while the alphabet 'Sa' is sounded by the root of the tongue which opens into the mouth when the breath is inhaled. Both the nose and the mouth open in the same cavity called the throat. Hence, the inter relationship between 'Ha' and 'Sa' is evident. The main objective of this Upanishad is to make the Yogi (a person who follows its tenets of meditation) aware that he is like the divine swan, but he was unaware of his own divinity and sublimity, his exalted and noble stature, till that was pointed out to him. So he must become one like a 'swan', remind himself constantly that he is like a swan, and he must not do anything or act in anyway which is not befitting his exalted and superior status which is equivalent to a wise swan.

During the twenty-four hour period covering a single day and night, a person inhales and exhales, or breathes, roughly twenty-one thousand times, because each cycle of inhalation and exhalation is equivalent to saying one Mantra 'Hans' consisting of the two syllables 'Ha and Sa' (refer *Dhyānbindu Upanishad*, verse no. 63).

There are many versions of Lord Vishnu's incarnations or *Vyuhās*. *Srimad Bhagwata* gives three lists having 22 names (1/3/6-22), 23 names (2/7/1 ff.), and 16

names 911/4/3 ff.). It also declares that the Avatars or incarnations are numerous (1/3/26).]

19. In the center of the 'Anand Vyuha' (referred to above) is a grand edifice called 'Chinmaya Prasaad'. It extends to thousands of Yojans (a measurement of distance).

[The word 'Chinmaya' means knowledge, enlightenment, wisdom, erudition, awareness and realisation of the Truth. The word 'Prasaad' refers to a building, a dwelling, a mansion, a fort, a citadel, or a palace which is of a grand proportion. In the present context the inference is that when one becomes perfectly self-realised and Brahm-realised, he attains such a high degree and intensity of bliss and ecstasy that is so profound, spiritually fulfilling and invigorating for him that it is like a huge mansion extending over a large area of land belonging to some very big personality such as a great Emperor. Palaces of Kings and Emperors are known to be extensive in area and colossus in dimension. This metaphor is employed here to give the spiritual aspirant an idea of the extent of his happiness and joy when he would be finally self-realised and Brahm-realised. He would be as contented and happy as an Emperor of the world is.]

This glorious 'Prasaad' has millions of Vimaans (chariots of Gods, shrines, towers and altars), and is endowed with an aura of extreme auspiciousness, divinity and holiness.

It is full of countless orchards, gardens and forests representing the meaning and the doctrines of the eternal Upanishads. [Forest, gardens and orchards represent the beauty of Nature. They stand for such glorious and invigorating virtues of Nature as greenery, life, vibrancy, colour, purity, beauty and charms of the best quality. Without the gardens, the forests and the orchards, the earth would have been a barren stretch of lifeless landscape consisting of nothing else but mountains, hills, rocks, boulders, prickly thorns and deserts. The green coverage of the forest, garden and orchard breathe life into earth. They produce flowers and fruits—which are metaphors for the best, the purest and the most beautiful things that are present on earth. The implication of this analogy of the orchards, the gardens and the forests vis-à-vis the Upanishads is that the latter are the extracts of the best of knowledge that is available to the human race. They present the refined extract of the Vedas in an easy to accept form, a format that is most beneficial for mankind. They are like the honey which is rejuvenating for the soul. They are like the beautiful flower in the garden of scriptures. They are like the fruit without which the orchard of different philosophies, scriptures and schools of thoughts would be useless. By comparing the Upanishads with the life-giving and like-fostering green and vibrant forests, gardens and orchards the teacher means to convey the idea that the Upanishads provide the spiritual aspirant all the best of knowledge that he needs. If he studies the Upanishads and follows their tenets, he would be sure of finding his spiritual goal.

It is made extremely charming and enticing by the echo of sweet melodious voices of divine Hans (Swans) representing the recitation of the Mantras (hymns) of the Sam Veda. This melodious singing of the hymns of the Sam Veda makes the habitat all the more divine and holy, all the more charming and alluring, all the more pleasant and sweet.

[The Sam Veda hymns are special in the sense that they are extremely sweet to sing and hear, are extremely melodious and soulful. The 'Hans' is the bird Swan which is regarded as the celestial vehicle of Goddess Saraswati, the patron Goddess of learning and speech. She is depicted as holding an Indian lute, symbolizing her association with singing. It is to be noted here that singing requires special skills and

mastery over the fine nuances of the language, its word and alphabets. Singing also entails a sharp memory and a fine-tuned voice because even a minor distraction would completely spoil the process of singing. The Swan itself is regarded as a wise bird which picks up the best and leaves the rest—for instance it picks up pearls and discards all other gems from an assortment of jewels. Hence, the metaphor of the Hans singing the hymns of the Sam Veda is used here to indicate there is a constant singing of sweet and melodious hymns in this heaven.

When this is applied to the self-realised person's own personal life it means that he is constantly engaged in chanting the divine Mantra that pertains to Brahm, i.e. the Mantra 'OM', and remains engrossed in contemplation and meditation so much so that the cosmic music known as the Naad the sound of OM persistently reverberates throughout his inner being. His breath is no longer merely an exhalation and inhalation of air, but it transforms into the sound of 'Ha' and 'Sa' respectively that is tantamount to his becoming a singer of the Sam Veda himself though he may not be aware of it. The constant sound of Naad and OM that echoes in his inner being provides him with spiritual bliss and ecstasy in a sustained and consistent way.]

It is adorned by endless rows of tall towers, steeples, spires and cupolas symbolizing Anand (spiritual bliss, ecstasy, beatitude and felicity) of a high order.

It is well endowed with waterfalls representing the exhilarating nectar of Anand that gushes forth when one has reached the spiritual state of highest knowledge, wisdom and enlightenment, when one has become self-realised and Brahm-realised.

It is established inside a glorious realm of dynamic Anand that is eternal, immutable, indivisible, steady and constant.

[That is, Anand—or spiritual bliss, ecstasy, beatitude and felicity that comes when one has become self-realised and Brahm-realised, when one has understood the Truth of existence and his own 'self', when one has become acquainted with the cosmic Consciousness that is all-pervading and all-inclusive, when one has tasted the nectar of spiritual bliss that brings fulfillment and contentedness in its wake—is so overwhelming and all-encompassing that it surrounds and swirls around the spiritual aspirant from all sides. This instance is cited here to illustrate that the Atma, the pure consciousness and the truthful 'self', when realised, fills the entire being of the aspirant with ecstasy and bliss of an exuberant quality. This Atma, which itself is blissful, fulfilled, and an image of the cosmic Atma known as Brahm, resides inside the gross body of the aspirant. So it can be said that in the state of existence when the aspirant has become self-realised and submerged in surging waves of Anand, when he is completely soaked and drenched in Anand, this internal resident known as the Atma would be surrounded on all sides with Anand. It will be soaked and submerged in Anand.

In the present context when the spiritual aspirant enters the realm of the upper heaven where the Adi-Narayan resides, i.e. when he has reached the climax of Brahm-realisation, he has virtually entered the portals of holiness and divinity that are surrounded on all sides by Anand. Anand lives inside as well as outside of this place.]

This divine abode is an ocean of immense astonishments that have no end.

Inside the inner courtyard of this grand palace (known as the 'Anand Vyuha') is a divine Vimaan known as 'Pranav'.

[Pranav is a synonym for the supreme transcendental Consciousness that exists in creation in the form of ethereal vibrations that give vibrancy, vigour, energy and dynamism to existence. Pranav on the one hand is regarded as a most subtle revelation

of Brahm, and on the other hand it is treated as the cosmic background sound that has been conceptualized in the form of the Mantra OM.

The word Vimaan has been variously used to mean a chariot, a holy shrine, an altar etc. So this word can mean here that the supreme Brahm resides in a place which is surrounded by extreme Anand; there is no misery and grief where there is Brahm. It also means an altar or divine seat where the supreme Brahm is established, and it implies one's inner self. Then it might also mean the Mantra OM which is regarded as the king of all Mantras and is used by all spiritual aspirants who wish to attain Brahm as it is the Mantra of Brahm.] (19).

20. This Vimaan, where Pranav (Brahm) is seated, is as splendorous and radiant as millions of Suns, and has millions of towers, steeples, spires and cupolas symbolizing Anand (spiritual bliss and ecstasy) that is effervescent, bubbling and pulsating.

Inside it is a mountain known as 'Bodhanand' (literally the mountain of bliss obtained upon spiritual realisation), and on its summit is an octagonal pavilion consisting of eight holy alphabets or syllables.

[The eight sides of this pavilion represent the eight alphabets of the Mantra of Brahm.]

In the center of this grand pavilion is an energized altar that radiates Anand in its most effervescent form. It is adorned by vibrant greenery symbolizing lively and exuberant form of Anand.

On it is lighted a flame of immense splendour and intensity. It represents the highest form of pulsating, effervescent and lively Anand (spiritual bliss, ecstasy, beatitude and felicity).

In its core is a divine lotus of eight petals representing the eight letters of the divine Mantra. This lotus is like an energized seat of the supreme Divinity (i.e. it is a center that has been empowered with special spiritual and mystical powers).

On this symbolic lotus-seat is a filament representing Pranav. It is made alive by and is energized and glorified with the radiance and splendour that effuses from the brilliant Sun, the magnificent Moon and the dynamic Fire that are located here simultaneously (one above the other in this sequence).

[Just like a consecrated idol is placed on a seat in the temple, the supreme Brahm is present as Pranav on the lotus-like seat consecrated by Mantras. Even as the idol is said to be empowered with all the mystical powers of the deity it represents and it is a visible form of the deity, the most dynamic powers and forceful cosmic energy of the supreme Brahm which are extremely effective, powerful, vibrant, vigorous, brilliant and energetic by nature, but invisible and most subtle, have revealed themselves in the form of the Sun, the Moon and the Fire. It must be noted that all these three entities have one thing in common—they have illumination and brightness that are evident even in the background of darkness. In other words, a wise man can experience the presence of the eternal light of consciousness known as Brahm even in this gross and mortal world which is engulfed in a veil of darkness representing numerous Vikars or faults, Vasanas or passions, Maya or delusions and Agyan or ignorance.]

Inside this splendorous filament representing the brilliant light of spiritual realisation, which is accompanied by Anand (bliss and ecstasy) of an effervescent and bubbly kind, is another subtle seat representing infinite auspiciousness and holiness.

On it is established the divine 'Maha-Yantra' (the great, holy, powerful and potent apparatus used in worship and seeking fulfillment of one's desires, which in the present case is spiritual liberation and deliverance as well as attainment of eternity

and blessedness). It is energized and alive with splendour and energy; it effuses brilliant illumination and radiance (20).

21. This Maha Yantra is like a complex fusion of all the grand virtues and divine qualities of the supreme Brahm, and is therefore a symbol of supreme Anand (bliss, ecstasy, joys and happiness) that is associated with Brahm.

It is an image of 'Chitta' which refers to the dynamic consciousness, the active sub-conscious, and the vibrant mind.

It is 'Nirmal'—i.e. it is pristine pure, clean, uncorrupt and unadulterated.

It is an image of the supreme transcendental Brahm (the eternal cosmic Consciousness, the Absolute Truth, the only entity that can inject life and dynamism to each individual unit of creation, the only entity that is truly eternal and imperishable, from which everything in existence has had its origin and in which it would come to rest at the end but which does not need anything itself to come into existence nor anything upon which to rest, and the one who is therefore truthfully called the Supreme Being as there is no one superior to him).

It is indeed an image of the most esoteric, mystical and enigmatic secret of Brahm which is known as 'Kaivalya'¹.

This 'Maha Yantra' is a representative form, a symbol, a codified instrument that represents in a miniature form of the supreme Vaikunth which is the abode of Lord Vishnu. Hence it is also called 'Narayan Yantra'—the instrument that can help one to reach Lord Vishnu.

[Vishnu and Narayan is the same Lord having two names. The prayer or worship instrument, the Yantra, of a particular deity is deemed to be the latter's temporal habitat, and this is the reason why this instrument has the same mystical powers and importance as the heavenly abode of that deity. Therefore, since the aspirant is a devotee of Lord Vishnu and aims to worship him, the Yantra is called 'Narayan Yantra' and is deemed to be an image of the heavenly abode of Narayan, which is Vaikunth.]

It is invincible and always victorious—i.e. it never fails to provide the spiritual aspirant his much sought after goal of Mukti and Moksha, or to obtain eternal liberation, deliverance, emancipation and salvation (21).

[Note—¹The word *Kaivalya* has been repeated often in the Upanishads—and put simply it means 'one of its only kind'. Well, if Brahm is one of its only kind then naturally anything related to Brahm would also be unique. Usually the term 'Kaivalya' is used in the context of Mukti or Moksha which is liberation and deliverance of the soul, or salvation and emancipation. When one has attained Brahm-realisation, when he has been wise enough to be enlightened about the Absolute Truth which is always one and not more than one, he is deemed to have accessed the best sort of Mukti or Moksha for himself because then his soul would have known its true parent and become free from all delusions about its destiny and its own identity. Such a wise, self-realised, awakened and enlightened man would see only Brahm, the universal Consciousness that is the only truth in creation everywhere, in each unit of creation. He has realised that all the Gods and all the other living beings are none but this one Brahm playing various roles in different garbs. He realises that the entire cycle of birth and death is only one aspect of Brahm, known as the fourth Paad of Brahm which is dominated by and driven by Avidya—extreme 'ignorance', and Maya—extreme delusions. Refer Canto 1, paragraph no. 5, Canto 4, paragraph no. 3-6, 9-13, and Canto 6, paragraph no. 13.

But the irony is that this creation is so dynamic, life-like, vigorous and vibrant that to call it 'Avidya' and 'Maya' is too difficult a proposal to be easily accepted by the mind and the intellect. Hence, the aspirant remains oscillating

between this and that, he is torn between various definitions of Mukti and Moksha. This is implied in the long narrative of this Upanishad which describes his long and most magical journey through layers after layers of heavens and their numerous Gods and Goddesses as outlined in previous Cantos. At every stop en-route he encounters a heaven and a God which is no less divine, grand, holy, sacred, magnificent and marvelous than either the predecessor or the one who would come next. A wise and enlightened spiritual aspirant understands that they are all images of Brahm, and therefore he continues to move ahead.

Since he has actually understood the Truth, he does not waste time anywhere; he is not distracted by the fascinating charms of so many heavens and the numerous types of Muktis or Mokshas. Finally he reaches the citadel; ultimately he finds the glittering gem in search of which he had launched himself on this arduous journey. He realises Brahm, the Truth and the eternal Consciousness. This is 'Kaivalya' state of realisation when there is no notion of duality and dichotomy, when there is no schism and differences, when there is no more than one type of Mukti or Moksha. It is the state of being one with Brahm.

This fructifies simply when the aspirant realises that his own Atma, his 'true self', is none other than this Brahm residing in his own bosom, in the subtle space of his heart. When this realisation dawns upon him, say where is the need to go to so many heavens or seek so many Gods and beg before them? This exalted state of the aspirant is his 'Kaivalya' state. This realisation completely fulfills him; he feels fully contented and peaceful; he is rested and tranquil. Except this 'holy and divine self', nothing matters to him. Therefore, he needs no other form of Mukti or Moksha.]

22. [The disciple asked—] 'What is the shape of this Narayan Yantra?'

When the disciple asked this question, the wise and learned teacher replied—
'It is as follows (i.e. it should be constructed as follows)—

One should first make a hexagon. Inside it is made a lotus with six petals. In the center of this lotus the divine Mantra of Pranav, i.e. OM should be written.

In the center of Pranav (OM) is written the Beej Mantra (the seed or root Mantra which is a syllable with a vowel sound) of Lord Narayan—which is 'Ang' (as in *rum* or *rung*).

This Beej Mantra should be accompanied by a request that the desires of the worshipper be fulfilled. For this purpose, a sentence is written in Sanskrit—'Mum Sarwabhist-Sidhim Kuru Kuru Swaha'. ['Fulfill my expectations and desires successfully; let me achieve success in my endeavours and let my wishes be fulfilled. I repeat it again. I offer my oblations to you.']

[This Beej Mantra is pregnant with the divine mystical powers of Lord Narayan. It can help one to attain not only the Lord himself, but, at the same time, also access his powerful cosmic energy and dynamic potentials. Hence, the request is a way of making a written petition before the Lord.

The way of writing this sentence is as follows—either the word 'Mum' (meaning my or me), or the syllable that relates to the worshipper's own name, i.e. his own Beej Mantra, is written above the Beej Mantra of Narayan. The second word 'Sarwabhist-Sidhim' (meaning let all the desired and expectations be fulfilled) is written below the Beej Mantra of Narayan. To the left of the Beej Mantra is written the twin words 'Kuru Kuru' (meaning do, do), and the last word 'Swaha' (meaning offering of oblations and respects) is written on the right.]

The six syllables or letters of the Mantras of Lord Vishnu and Lord Nrisingh should be written on the six petals of the lotus such that each petal has one syllable. The Mantra for Lord Vishnu is 'OM Vishnave Namaha', and for Lord Nrisingh is 'Aiyen(g) Klin(g) Srin(g) Hrin(g) Kshron(g) Phat'.

[The six syllables or letters of the Mantra for Vishnu are—OM + Vi + Shna + Ve + Na + Maha = 6.

The six syllables or letters of the Mantra for Nrisingh are—Aiyen(g) + Klin(g) + Srin(g) + Hrin(g) + Kshron(g) + Phat = 6.

The way to write these two six-lettered Mantras on the six petals is as follows—one letter of the first Mantra, i.e. of Vishnu, is written inside each petal towards its tip, so that all the six letters are completed when the sixth petal is reached. The six letters of the second Mantra, i.e. of Nrisingh, are written in a similar fashion, but below the letters of the first Mantra and towards the center of the petal.

Hence, each petal has a pair of syllables or letters, one from each Mantra. They are written in a clockwise manner starting from the northern petal.

It should be noted here that the sequence for writing the Mantras of Vishnu and Nrisingh as narrated here is followed at all other places where more than one Mantra dedicated to different deities are to be written. If the sequence has more than two Mantras, then also the pattern would be the same—viz. the first row would be of the letters of the first Mantra, the second row would contain the letters of the second Mantra written below the first row, the third row would contain the letters of the third Mantra which are written below those of the second row, and so on and so forth.

Thus, the sequence presently is as follows—(i) Petal no. 1 = ‘OM’ at the tip, and ‘Aiyen(g)’ in the center. (ii) Petal no. 2 = ‘Vi’ at the tip, and ‘Kling’ in the center. (iii) Petal no. 3 = ‘Shna’ at the tip, and ‘Srin(g)’ in the center. (iv) Petal no. 4 = ‘Ve’ at the tip, and ‘Hrin(g)’ in the center. (v) Petal no. 5 = ‘Na’ at the tip, and ‘Kshron(g)’ in the center. And (vi) Petal no. 6 = ‘Maha’ at the tip, and ‘Phat’ in the center.]

In the spaces between two petals, the six syllables or six letters of the Mantras of Lord Ram and Lord Krishna are written. These Mantras are as follows—(i) for Lord Ram it is—‘Rang Ramaye Namaha’, and (ii) for Lord Krishna it is—‘Kling Krishnaye Namaha’.

[The syllable ‘Ran(g)’ is the Beej Mantra of Lord Ram, and ‘Klin(g)’ is the Beej Mantra of Lord Krishna. The word ‘Namaha’ has a universal meaning—‘I bow most reverentially before you’.

When the Mantras are written outside the petals, they are written in the bowl-like concave cavity that is formed at the junction point of two adjacent petals. The Mantra is written along this bend and follows its contours. The first one-third part of the given Mantra is written in the descending side of the first petal or the left hand side of the concave cavity formed between the two adjacent petals, the second one-third part of the Mantra is written in the hollow or the trough of the cavity between the two adjacent sides of the pair of petals, and the last one-third part of the Mantra is written on the ascending limb of the second petal.

If the number of Mantras to be written is more than one then the first Mantra is written on the top, the last Mantra at the bottom, and all the rest of the Mantra in between them in the sequence they appear. For instance, if there are four Mantras to be written in the space between the petals, then Mantra no. 4 appears at the bottom and nearest to the outer surface of the concerned petals, followed by Mantra no. 3 and 2 above it, and finally Mantra no. 1 is written on the top of the pile.

In the present instance, first the six letters of the Mantra of Lord Ram are written in the space between two adjacent petals, and below this sequence is written the Mantra of Lord Krishna.

Hence obviously, the sequence in which the pairs of syllables or letters of the two sets of Mantras for Lord Ram and Lord Krishna are written in the space between the petals would be respectively as follows—Ran(g) and Klin(g); Raa and Kri; Maa

and Shnaa; Ye and Ye; Na and Na; and Maha and Maha. The first letter of the pair, the one that relates to Lord Ram, would be placed on the top, and the second that relates to Lord Krishna would be below the first in the sequence outlined above.]

Inside the six corners or cardinal points of the hexagon are written the six syllables or letters of the Mantra of Sudarshan (the divine and invincible weapon of Lord Vishnu which is in the shape of a circular saw having sharp serrated edges; the Discus). This Mantra is the following—‘Sahastraar Hum Phat’. [The word ‘Sahastraar’ means having thousands of sharp serrated edges. Hum and Phat are esoteric words used in occult worship.]

Outside these six corners, in the space between them, is written the six-lettered Mantra of Lord Shiva prefixed by the Pranav Mantra, i.e. by OM. This Mantra is—‘OM Namaha Shivaye’.

[Once again, only one syllable or letter is placed in the space between any two corners of the hexagon.] (22).

23. Outside this central hexagon, the word OM is written continuously around it in such a fashion that an arched ring is formed which encircles the hexagon from all sides.

[OM is written like the long vowel ‘U’ (as in *you*, *broom*) of the Sanskrit language. It is the sixth vowel. When written on paper it is like the English alphabet ‘M’ with all its limbs curved concavely. So, when it is written without lifting the pen the resultant sketch resembles a series of arched pillars that support an ancient building or bridge. The base of this arched structure would be the six tips of the hexagon, and from the perspective of this Yantra it would be like the petals of the lotus drawn inside the hexagon. That is, it would be a circle or ring of continuous arches that encloses the central hexagon.] (23).

24. Outside this ring is made another circle or ring of eight arches to symbolize a lotus flower having eight petals.

Inside its eight petals are written the Mantras of Lord Narayan and Lord Nrisingh having eight letters or syllables each. These two Mantras are as follows—(i) for Narayan it is ‘OM¹ Namoha Naaraayanaaye’, and (ii) for Nrisingh it is ‘Jai Jai Nrisingh’.

[The method and sequence of writing these letters of the Mantras would be the same as described in paragraph no. 22 in relation to those of Vishnu and Nrisingh. The only difference being that now the number of petals and letters is eight instead of six.]

In the spaces between the eight petals would be written the Mantras of Lords Ram, Krishna and Srikar which have eight syllables or letters each. These Mantras are as follows—(i) for Lord Ram it is ‘OM Ramaye Hum Phat Swaha’, (ii) for Lord Krishna it is ‘Klin(g) Daamodaraaye Namaha’, and (iii) for Lord Srikar it is ‘Uttishtha Srikar Swaha’.

[Once again, the method that was used to write the six letters of Lord Ram’s and Krishna’s Mantras in the space between the six petals of the hexagon as described in paragraph no. 22 is also followed here, the only difference being that now the number of letters or syllables of the Mantras as well as the number of petals of the lotus is eight instead of six in that case.

The eight letters of the Mantra for Lord Ram are—OM + Ra + Ma + Ye + Hum + Phat + Swa + Ha = 8.

The eight letters of the Mantra for Lord Krishna are—Klin(g) + Daa + Mo + Da + Raa + Ye + Na + Maha = 8.] (24).

[Note—¹The monosyllable OM refers to the supreme transcendental Brahm, the Supreme Being, and the cosmic Consciousness of creation that is the primary and principal source, and cause, of everything that exists in this creation. When any Mantra is uttered, this principal Lord, Brahm, is first saluted before one pays one's respects to the deity to whom that particular Mantra is dedicated. All the Gods and Goddesses, along with all their manifestations are nothing but the same Brahm playing various roles and displaying his profoundly majestic abilities, his numerous virtues and uncountable characteristics through them. One must first recognise the Principal, pay his respects to him and recognises his superiority before he can hope to please his juniors who are dependent upon this Principal because the latter is also the Lord of these individual Gods and Goddesses. In fact, all the Gods and the Goddesses are primarily the supreme Brahm in these forms who is simply playing out his divine cosmic roles in their forms.

So, Brahm represented by his specific word 'OM' is first saluted before the deity to whom the Mantra is dedicated is showed honours.

For instance, in the Mantra 'OM Namō Narayanaaye', first the supreme Brahm is remembered before one bows to Lord Narayan (Vishnu) who is none but Brahm with this name.

It ought to be remembered that this principle is applicable to all the Mantras in this or any other Upanishad. This is a universal principle applicable to all the Mantras.]

25. Outside this ring or circle of eight petals or arches, another ring or circle is made by continuously writing the OM Mantra as previously described. [This would be the second ring.] (25).

26. Outside this arched circle or ring is made another lotus having nine petals.

Inside its nine petals are written the Mantras of Lords Ram, Krishna and Hayagriva, each Mantra having nine letters or syllables. These Mantras are the following—(i) for Lord Ram it is 'OM Ramchandraaye Namaha OM', (ii) for Lord Krishna it is 'Klin(g) Krishnaaye Govindaaye Namaha', and (iii) for Lord Hayagriva it is 'Hrishon(g) Hayagrivaaye Namaha Hrishon(g)'.

[The nine letters or syllables of the Mantra for Ram are—OM + Ra + Ma + Cha + Ndra + Na + Maha + OM = 9.

The nine letters or syllables of the Mantra for Krishna are—Klin(g) + Kri + Shna + Go + Vi + Ndaa + Ye + Na + Maha = 9.

The nine letters or syllables of the Mantra for Hayagriva are—Hrishon(g) + Ha + Ya + Gri + Vaa + Ye + Na + Maha + Hrishon(g) = 9.

Once again, the same procedure as narrated in the previous paragraphs is followed. Hence, one letter or syllable of each Mantra is written inside one petal. The first one is of Lord Ram, below it is that of Lord Krishna, and below it is that of Lord Hayagriva. For instance, the three letters that would be written in the first petal are as follows—towards the tip or apex of the petal would be 'OM' for Ram, below it would be 'Kling' for Krishna, and then below it, towards the center of the petal, would be 'Hrishong' for Lord Hayagriva.

This sequence would be followed for all the nine petals and the nine letters or syllables of these three Mantras.]

Between these nine petals, i.e. in the space between them on the outside is written the nine letters or syllables of the Mantra for Lord Dakshin Murti (i.e. the south facing Lord; Lord Shiva). This Mantra is 'OM Dakshinaa-murti-rii-shwar-om'.

This is also called the 'Mala Mantra' of Lord Dakshina Murti, i.e. it is a Mantra that is used to turn the beads of the prayer rosary when one meditates upon Lord Shiva in his form as the south-facing Lord.

[The nine letters are written towards the upper side of the space between the petals. The nine letters are OM + Da + Kshi + Naa + Mu + Rti + Rii + Sswar + OM = 9.

There is an entire Upanishad bearing the same name and dedicated to the Lord Dakshina Murti in the Krishna Yajur Veda. It has been included in the fourth volume in this series that deals with the Upanishads of this particular Veda.] (26).

27. Outside it is made another circle or ring using the Beej Mantra of Lord Narayan.

[This Beej Mantra is 'Ang' as in *among*. To make a circle, this Mantra is written continuously without break. This is the third ring.] (27).

28. Outside this ring is made another lotus having ten petals.

[As in the previous cases, this ten-petal lotus would surround the ring formed by writing the Beej Mantra 'An(g)', and its shape would be a circle or ring of continuous arches.]

Inside the petals, the ten letters or syllables of the Mantra of Lords Ram and Krishna are written. These ten-lettered Mantras are as follows—(i) for Lord Ram it is 'Hun(g) Jaanki-vallabhaaye Swaha', and (ii) for Lord Krishna it is 'Gopijan-vallabhaaye Swaha'.

[The ten letters of Ram's Mantra are—Hun(g) + Jaa + Na + Ki + Va + Lla + Bhaa + Ye + Swa + Ha = 10.

The ten letters of Krishna's Mantra are—Go + Pi + Ja + Na + Va + Lla + Bhaa + Ye + Swa + Ha = 10.

As outlined earlier, one petal contains one letter of each Mantra, with the one related to Lord Ram written towards the tip, and that of Lord Krishna below it. Therefore, the first petal would have the following combination of letters or syllables—'Hun(g)' for Ram, and below it 'Go' for Krishna; the second would have 'Ja' for Ram, and 'Go' for Krishna, and so on and so forth. This order is followed for the rest of the petals of the entire ring.]

In the space between the ten petals is written the Mantra of Lord Nrisingh having ten letters. This Mantra is 'OM Namo Bhagwate Sri-maha-nrisinghaaye Kaal-danstra-vadanaaye Mum Vighnaan Pach Pach Swaha'.

[This Mantra basically requests Lord Nrisingh, the half lion and half man incarnation of Lord Vishnu to crush and eliminate all the obstacles and hurdles in the path of the worshipper and give him protection. This Lord has teeth which are as sharp as swords and a body which is as strong as the strongest thing ever created. An entire Upanishad is dedicated to Lord Nrisingh in the Atharva Veda, and it is included in our present volume as Chapter no. 7.

It should be noted that in the present case, the ten letters would be as follows—OM + Namo + Bhagwate + Sri-maha-nrisinghaaye + Kaal-danstra-vadanaaye + Mum + Vighnaan + Pach + Pach + Swaha = 10.] (28).

29. Outside the lotus with ten petals is made another circle or ring using the Beej Mantra of Lord Narsingh. This Beej Mantra is 'Kshron(g)'. To make a circle, this Mantra is written continuously without break. This is the fourth ring.] (29).

30. Outside this ring is made another lotus having twelve petals.

[As in the previous cases, this twelve-petal lotus would surround the ring formed by writing the Beej Mantra 'Kshron(g)', and its shape would be a circle or ring of continuous arches.]

Inside the petals, the twelve letters or syllables of the Mantra of Lords Narayan and Vasudeo are written. [Both the names are of Lord Vishnu.]

These twelve-lettered Mantras are as follows—(i) for Lord Narayan it is 'OM Namō Bhagwate Naaraayanaaye', and (ii) for Lord Vasudeo it is 'OM Namō Bhagwate Vaasudevaaye'.

[The twelve letters of the Mantra for Narayan are—OM + Na + Mo + Bha + Ga + Wa + Te + Naa + Raa + Ya + Naa + Ye = 12.

The twelve letters of the Mantra for Vasudeo are—OM + Na + Mo + Bha + Ga + Wa + Te + Va + Su + De + Vaa + Ye = 12.

As outlined earlier, one petal contains one letter of each Mantra, with the one related to Lord Narayan written towards the tip, and that of Lord Vasudeo below it. Therefore, the first petal would have the following combination—'OM' for Narayan written towards the tip, and below it 'OM' for Vasudeo; the second would have 'Na' for Narayan, and 'Na' for Vasudeo, and so on and so forth. This order is followed for the rest of the petals of the entire ring.]

In the space between the twelve petals are written the twelve-lettered Mantras of Lords Maha Vishnu, Ram and Krishna. These Mantras are as follows—(i) for Lord Maha Vishnu it is 'OM Namō Bhagwate Maha Vishnawe'; (ii) for Lord Ram it is 'OM Hrin(g) Bharataagraj Ram Klin(g) Swaha'; and (iii) for Lord Krishna it is 'Srin(g) Hrin(g) Klin(g) Krishnaaye Govindaaye Namaha'.

[The twelve letters or syllables are written in a sequential manner in such a way that the ones for Lord Maha Vishnu appear in the space between the two petals towards their tip, below it would be the Mantras for Lord Ram, and below this would be the Mantras for Lord Krishna. One letter or syllable of each Mantra would be placed between two petals in a clockwise manner, starting with the first letter of each Mantra. Hence, the ones written between the first and the second petals would be 'OM', 'OM' and 'Sring' for Maha Vishnu, Ram and Krishna respectively, followed by other letters between other petals, and finally concluding with 'We' (of Vishnawe), 'Ha' (of Swaha) and 'Ha' (of Namaha) which are the last letters for the Mantras of Maha Vishnu, Ram and Krishna respectively.]

31. Outside the lotus with twelve petals is made another circle or ring using the Beej Mantra of Lord Jaganmohan. This Beej Mantra is 'Klin(g)'. To make a circle, this Mantra is written continuously without break. This is the fifth ring.] (31).

32. Outside this ring is made another lotus having fourteen petals.

[As in the previous cases, this fourteen-petal lotus would surround the ring formed by writing the Beej Mantra 'Klin(g)', and its shape would be a circle or ring of continuous arches.]

Inside the petals, the fourteen letters or syllables of the Mantra of Lords Laxmi-Narayan, Hayagriva, Gopal and Dadhi-Vaaman are written.

These fourteen-lettered Mantras are as follows—(i) for Lord Laxmi-Narayan it is 'OM Hrin(g) Hrin(g) Srin(g) Srin(g) Laxmi-vasudevaaye Namaha'; (ii) for Lord Hayagriva it is 'OM Namaha Sarvakoti-sarvavidya-raajaaye'; (iii) for Lord Gopal it is 'Klin(g) Krishnaaye Gopal-chudaamanaye Swaha'; and (iv) for Lord Dadhi-Vaaman it is 'OM Namō Bhagwate Dadhi-vaamanaaye OM'.

[As outlined earlier, one petal contains one letter of each Mantra, with the one related to Lord Laxmi-Narayan written towards the tip, followed below by that of Lord Hayagriva, Lord Gopal and Lord Dadhi-Vaaman, with the last ones being at the base of the petals.

Therefore, the first petal would have the following combination—‘OM’ of the Mantra for Laxmi-Narayan written towards the tip, below it is written ‘OM’ for Hayagriva, below it would be written ‘Klin(g)’ for Gopal, and finally at the base would be placed ‘OM’ for Dadhi-Vaaman. This order is followed for the rest of the petals of the entire ring.

The fourteen letters or syllables are as follows—(i) for Lord Laxmi-Narayan = OM + Hrin(g) + Hrin(g) + Srin(g) + Srin(g) + La + Xmi + Va + Su + De + Vaa + Ye + Na + Maha = 14; (ii) for Lord Hayagriva = OM + Na + Maha + Sa + Rva + Ko + Ti + Sa + Rva + Vi + Dya + Raa + Jaa + Ye = 14; (iii) for Lord Gopal = Kling + Kri + Sh + Naa + Ye + Go + Pal + Chu + Daa + Ma + Na + Ye + Swa + Ha = 14; and (iv) for Lord Dadhi-Vaaman = OM + Na + Mo + Bha + Ga + Wa + Te + Da + Dhi + Vaa + Ma + Naa + Ye + OM = 14.]

In the space between the fourteen petals, towards their tip, are written the fourteen-lettered Mantra of Goddess Anna-Purneshwari (literally meaning the goddess who gives sufficient food to all; who replinshes all stocks of food). The Mantra is the following—‘Hring Padmaa-vatyanna-purne Maaheshwari Swaha’. [Hrin(g) + Pa + Dmaa + Va + Tya + Nna + Pu + Rne + Maa + He + Shwa + Ri + Swa + Ha = 14.] (32).

33. Outside the lotus with fourteen petals is made another circle or ring using the Pranav Mantra, which is OM. To make a circle, this Mantra is written continuously without break. This is the sixth ring.] (33).

34. Outside this ring is made another lotus having sixteen petals.

[As in the previous cases, this sixteen-petal lotus would surround the ring formed by writing the OM Mantra, and its shape would be a circle or ring of continuous arches.]

Inside the petals, the sixteen letters or syllables of the Mantra of Lord Krishna and that of the Sudarshan Chakra (the divine discus of Vishnu) are written.

The Mantras are as follows—(i) for Lord Krishna it is ‘OM Namō Bhagwate Rukmini-vallabhaahye Swaha’; and (ii) for the Sudarshan Chakra it is ‘OM Namō Bhagwate Maha-sudarshanaaye Hum Phat’.

[As outlined earlier, one petal contains one letter of each Mantra, with the one related to Lord Krishna written towards the tip, followed below by that of Sudarshan Chakra. The fourteen letters would be as follows—(i) for Lord Krishna = OM + Na + Mo + Bha + Ga + Wa + Te + Ru + Kmi + Ni + Va + Lla + Vha + Ye + Swa + Ha = 16; and (ii) for the Sudarshan Chakra = OM + Na + Mo + Bha + Ga + Wa + Te + Ma + Ha + Su + Da + Rsh + Naa + Ye + Hum + Phat = 16.]

In the space between the sixteen petals are written the sixteen vowels of the Sanskrit alphabet followed by the thirty-two lettered Mala Mantra of the Sudarshan Chakra. This Mantra is the following—‘Sudarshan-maha-chakraaye Dipta-rupaaye Sarwato Maam Raksha Raksha Sastraar Hum Phat Swaha’. {It briefly means that the great discus of Lord Vishnu is glittering and splendid, has thousands of sharp, pointed edges, is equivalent to thousands of weapons, and it is requested to give its protection to the worshipper.}

[The vowels are written in the first row in the space between two petals, and the second row would contain a pair of letters of the Mala Mantra of Sudarshan written below the row of vowels. Where and how to write the Mantras in the space is narrated in detail in paragraph no. 22 above.

The thirty-two letters of the Mala Mantra are as follows—Su + Da + Arsh + Na + Ma + Ha + Cha + Ka + Raa + Ye + Di + Pta + Ru + Paa + Ye + Sa + Rva + To + Maam + Ra + Ksha + Ra + Ksha + Sa + Ha + Sa + Traa + Ra + Hum + Phat + Swa + Ha = 32.

Therefore, the first pair would be ‘Su + Da’, the second would be ‘Arsh + Na’, and so on and so forth.] (34).

35. Outside the lotus with sixteen petals is made another circle or ring using the Beej Mantra of Lord Varaaha. It is ‘Hum’ or ‘Hun(g)’. [To make a circle, this Mantra is written continuously without break. This is the seventh ring.] (35).

36. Outside this ring is made another lotus having eighteen petals.

[As in the previous cases, this eighteen-petal lotus would surround the ring formed by writing the Beej Mantra ‘Hun(g)’ or ‘Hum’, and its shape would be a circle or ring of continuous arches.]

Inside the petals, the eighteen letters or syllables of the Mantras of Lord Krishna and Lord Vaaman are written. The two Mantras are follows—(i) for Lord Krishna it is ‘Klin(g) Krishnaaye Govindaaye Gopijan-valaavhaaye Swaha’; and (ii) for Lord Vaaman it is ‘OM Namō Vishnave Surpataye Mahaabalaaye Swaha’. {Briefly, the first Mantra related to Krishna means ‘I offer my oblations to Govind who is very dear to the milkmaids (of Vrindaavan).’ The second Mantra related to Vaaman means ‘OM salutations! I bow and offer my oblations to Vishnu who is the Lord of Gods, and is most strong and powerful.’}

[The witing is done in a clockwise manner wih the Mantra of Lord Krishna being written towards the tip or apex of the petals, and those of Lord Vaaman below them. One petal has one letter or syllable of each Mantra.

The eighteen letters or syllables of the two Mantras would be as follows—(i) for Lord Krishna = Klin(g) + Kri + Shnaa + Ye + Go + Vi + Ndaa + Ye + Go + Pi + Ja + Na + Va + Lla + Vha + Ye + Swa + Ha = 18; and (ii) for Lord Vaaman = OM + Na + Mo + Vi + Shna + Ve + Su + Ra + Pa + Ta + Ye + Ma + Haa + Ba + Laa + Ye + Swa + Ha = 18.

Hence, the first petal would have the pair ‘Klin(g)’ + ‘OM’ for Krishna and Vaaman respectively, and the process would be followed in a sequential manner till the last petal which would have the pair ‘Ha’ + ‘Ha’ for the last word ‘Swaha’ which appears in both the Mantras.]

In the space between the eighteen petals are written in sequence the following two Mantras—first is written the five-letter Mantra of Garud (the divine vehicle of Vishnu) followed by the Garud Mala Mantra (that is used to turn the beads of the prayer rosary).

The five-letter Mantra of Garud is ‘Kship OM Swaha’, and the thirteen-letter Mala Mantra is ‘OM Namaha Pakshi-raajaaye Sarva-visha-bhut-rakshaha-krityaardi-bhedanaaye Sarweshta-saadhakaaye Swaha’. The five letters of Garud Mantra are as follows—Khi + Pa + OM + Swa + Ha = 5.

Two letters are written in the space between a pair of petals. The writing of the Mantras in the space between the eighteen petals would be as follows—between the first two petals would be written ‘Khip’, between the next two would be written

‘OM’, between the third pair of petals would be written ‘Swaha’, between the fourth pair of petals would be written ‘OM Namaha’, between the fifth pair of petals would be written ‘Pakshi’, between the sixth pair of petals would be written ‘Raajaaye’, between the seventh pair of petals would be written ‘Sarva’, between the eighth pair of petals would be written ‘Visha’, between the ninth pair of petals would be written ‘Bhut’, between the tenth pair of petals would be written ‘Rakshaha’, between the eleventh pair of petals would be written ‘Krityaa’, between the twelfth pair of petals would be written ‘Dhi-bhe’, between the thirteenth pair of petals would be written ‘Danaa’, between the fourteenth pair of petals would be written ‘Ye Sa’, between the fifteenth pair of petals would be written ‘Rweshta’, between the sixteenth pair of petals would be written ‘Saadha’, between the seventeenth pair of petals would be written ‘Kaaye’, and finally between the eighteenth pair of petals would be written ‘Swaha’.] (36).

37. Outside the lotus with eighteen petals is made another circle or ring using the Beej Mantra of Maya. It is ‘Hring’. [To make a circle, this Mantra is written continuously without break. This is the eighth ring.] (37).

38. Outside this ring is made another lotus having eight petals.

[As in the previous cases, this eight-petal lotus would surround the ring formed by writing the Beej Mantra ‘Hrin(g)’, and its shape would be a circle or ring of continuous arches. Since by this time the diameter of the circle would have enlarged to a considerable extent than it was when the first ring of eight petals was made as described in paragraph no. 24, the petals would be much larger in size and the span of each petal would be longer.]

Inside these eight petals the eight-letter Mantra of Lord Krishna and Lord Vaaman are written. The Mantras are the following—(i) for Krishna it is ‘OM Namodaamodaraaye’, and (ii) for Vaaman it is ‘OM Vaamanaaye Namaha OM’.

[The eight letters for Krishna’s Mantra are—OM + Na + Mo + Daa + Mo + Da + Raa + Ye = 8.

The eight letters for Vaaman’s Mantra are—OM + Vaa + Ma + Naa + Ye + Na + Maha + OM = 8.

The writing is done in a clockwise manner with the Mantra of Lord Krishna being written towards the tip or apex of the petals, and those of Lord Vaaman below them. One petal has one letter or syllable of each Mantra.

Hence, the first petal would have the pair ‘OM’ + ‘OM’ for Krishna and Vaaman respectively, and the process would be followed in a sequential manner till the last petal which would have the pair ‘Ye’ + ‘OM’ for Krishna and Vaaman respectively.]

In the space between the eight petals are written in sequence the following two Mantras—the three syllables of the Mantra for Lord Neelkanth (the blue-tinged form of Lord Shiva), and the five-letters of the Mantra of Garud (the vehicle of Vishnu), bringing the total to eight letters.

The three-syllable Mantra of Neelkanth is ‘Pren(g) Rin(g) Thaha. The five-lettered Mantra of Gurud is ‘Namo-andajaaye’.

[The three syllables of the Neelkanth Mantra are—Pren(g) + Rin(g) + Thaha = 3.

The five letters of the Garud Mantra are—Na + Mo + Anda + Jaa + Ye = 5.

Each letter or syllable is written in the space between two adjacent petals in the concave cavity formed between them at their junction points, and are written in a clockwise manner.] (38).

39. Outside the lotus with eight large petals is made another circle or ring using the Beej Mantra of Kaamdeo (the God of passions). It is 'Klin(g)'. [To make a circle, this Mantra is written continuously without break. This is the ninth ring.] (39).

40. Outside this ring is made another lotus having twenty-four petals.

[As in the previous cases, this twenty-four petal lotus would surround the ring formed by writing the Beej Mantra 'Klin(g)', and its shape would be a circle or ring of continuous arches.]

Inside these petals the following Mantras are written in the way described now. First are written the 'Sharnaagat Mantra' and the 'Narayan Mantra' in a sequential manner. This would form the first row of Mantras and are written towards the tip or apex of the petals, inside them. [The word 'Sharnaagat' means to take refuge in the holy feet of the Lord and seek his all-round protection. The Lord in this case is Narayan.]

Below this row are written the Mantras of Lord Narayan which would form the second row, followed below by the Mantra of Lord Hayagriva which would be the third row.

The two Mantras of the first row are as follows—(i) the Sharnaagat Mantra is 'Sriman-naaraayan Charnou Sharnam Prapadaye', and (ii) the Narayan Mantra is 'Srimate Naaraayanaaye Namaha'. {The meaning briefly is 'I bow most reverentially and submit myself to the holy feet of Lord Narayan.'}

The second row consists of the Narayan Mantra which is 'Naaraayanaaye Vidmahe Vaasudevaaye Dhimahi Tanno Vishnuha Prachodayaat'. {Briefly, this Mantra means 'Lord Narayan is as splendourous and glorious as the electric, he is also known as Vasudeo who is an embodiment of the highest virtues of wisdom, intelligence and erudition, and he has assumed the form of Vishnu. Let me move towards this Lord to seek his blessings.'}

The third row consists of the Hayagriva Mantra which is 'Vaagi-shwaraaye Vidmahe Hayagrivaaye Dhimahi Tanno Hansaha Prachodayat'. {Briefly, this Mantra means 'He is the Lord of speech and wisdom; he is as splendourous and glorious as the Sun; he has revealed himself as Lord Hayagriva, the most wise and intelligent one (who had rescued the Vedas and preached sage Yagyavalkya the Yajur Veda), and who has taken the form of a divine Swan known as Hans. Let me move towards this Lord to seek his blessings.' The story of Hayagriva and Hans, which are amongst the twenty-four incarnations of Lord Vishnu, have been described above in note of paragraph no. 18.}

[Now, let us see how their letters are counted and placed in their respective places inside the twenty-four petals.

As said above, the first row consists of the following series of letters belonging to the first two Mantras—(1) for Sharanaagati = Sri + Ma + Nnaa + Raa + Ya + Na + Cha + Ra + Nou + Sha + Ra + Num/Nam + Pra + Padaye = 14; and (ii) for Narayan = Sri + Ma + Te + Naa + Raa + Ya + Naa + Ye + Na + Maha = 10. This brings the total to 24 letters.

The second row would be the letters of the Narayan Mantra as follows—Naa + Raa + Ya + Naa + Ye + Vidma + He + Vaa + Su + De + Vaa + Ye + Dhi + Ma + Hi +

Ta + Nno + Vi + Shnuha + Pra + Cho + Da + Yaa + Ta = 24. These letters would be placed below the letters of the first row.

The third row would be the letters of the Hayagriva Mantra as follows—Vaa + Gi + Shwa + Raa + Ye + Vidma + He + Ha + Ya + Gri + Vaa + Ye + Dhi + Ma + Hi + Ta + Nno + Han + Saha + Pra + Cho + Da + Yaa + Ta = 24. These letters would be placed below the letters of the second row.]

In the space between these twenty-four petals are written the following three Gayatri Mantras—(i) the first row would consist of the letters of the Nrisingh Gayatri which is ‘Vajra-nakhaaye Vidmahe Tikshna-danstraaye Dhimahi Tannaha Singaha Prachodayat’. {Briefly it means ‘The Lord has nails as strong as Vajra (the sturdy weapon of Indra); he is splendid as the electric; his teeth are very sharp; he is an embodiment of knowledge and intelligent; and he is in the form of a lion. Let me move towards this Lord to seek his blessings.’}

[The 24 letters of this Mantra are Va + jra + Na + Khaa + Ye + Vi + Dmahe + Ti + Kshna + Dan + Straa + Ye + Dhi + Ma + Hi + Ta + Nnaha + Sing + Ha + Pra + Cho + Da + Yaa + Ta = 24.]

(ii) The second row would consist of the letters of the Sudarshan Gayatri Mantra which is ‘Sudarshanaaye Vidmahe Hetirajaaya Dhimahi Tanna-schakraha Prachodayat’. {Briefly it means ‘The divine Sudarshan Chakra of the Lord is dazzling and blindingly splendid like the electric; it is most dear to the supreme Lord of creation (Vishnu) and enables him to rule over the entire creation; this Lord is an embodiment of wisdom and skills; and this Sudarshan Chakra is indeed a manifestation of the Lord himself. Let me move towards this Chakra to seek its blessings.’}

[The 24 letters of this Mantra are Su + Da + Rsha + Naa + Ye + Vi + Dmahe + He + Ti + Raa + Jaa + Ya + Dhi + Ma + Hi + Ta + Nna + Scha + Kraha + Pra + Cho + Da + Yaa + Ta = 24.]

(iii) The third row would consist of the letters of the Brahma Gayatri Mantra which is ‘Tatsaviturvarenyam Bhargo Devasya Dhimahi Dhiyo Yo Naha Prachodayaat’. {Briefly it means ‘That truthful and divine supreme Lord is luminous and splendid as the self-illuminated Sun. He is excellent, the best, the most exalted, a destroyer of sins, and a divine entity. I offer my oblations to him. May he imbibe, infuse and inspire my intellect with wisdom and enlightenment so that I am purified and move on the righteous and noble path.’}

[The 24 letters of this Mantra are Ta + Tsa + Vi + Tu + Rva + Re + Nyam + Bha + Rgo + De + Va + Sya + Dhi + Ma + Hi + Dhi + Yo + Yo + Naha + Pra + Cho + Da + Yaa + Ta = 24.] (40).

41. Outside the lotus with twenty-four petals is made another circle or ring using the Beej Mantra of Lord Hayagriva. It is ‘Hri-soun(g)’. [To make a circle, this Mantra is written continuously without break. This is the tenth ring.] (41).

42. Outside this ring is made another lotus having thirty-two petals.

[As in the previous cases, this thirty-two petal lotus would surround the ring formed by writing the Beej Mantra ‘Klin(g)’, and its shape would be a circle or ring of continuous arches.]

Inside these petals the following Mantras are written in the way described now.

[As in the previous cases, this twenty-four petal lotus would surround the ring formed by writing the Beej Mantra ‘Hri-soun(g)’.]

Inside these thirty-two petals are written the Anushtup Mantras of Lords Nrisingh and Hayagriva in a sequential manner. [One letter of the Mantra of Nrisingh is placed in each petal towards its apex or tip, and below them are placed the letters of the Mantra of Hayagriva. This forms two rows of Mantras, the upper ones are those of Nrisingh, and lower deck are of those of Hayagriva.]

These Anushtup Mantras are the following—

(i) The Mantra of Lord Nrisingh is ‘Ugram Viram Maha-Vishnum Jwalantam Sarvatomukha, Nrisingha Bhishanam Bhadram Mritu-mritum Namaamya-ham.’ {Briefly, this Mantra means ‘I bow before Lord Nrisingh who is very dynamic, terrible, strong and vigorous, who is very brave, valiant and courageous, who is none else but the great Lord Vishnu, who is splendorous and brilliant like blazing fire, who has his mouth everywhere (i.e. who is present everywhere; who knows everything), who is the death of even the Death God, and paradoxically who is also most polite, civil, sobre, soft-spoken and compassionate by nature.’}

[The thirty-two letters of this Mantra would form the first row in this ring of petals. These letters are the following—U + Gram + Vi + Ram/Rum + Ma + Ha + Vi + Shnum + Jwa + La + Ntam + Sa + Rva + To + Mu + Kham + Nri + Sin(g) + Ha + Bhi + Sha + Nam + Bha + Dram + Mri + Tu + Mri + Tum + Na + Maa + Mya + Ham = 32.]

(ii) The Mantra for Lord Hayagriva is ‘Rim-mya-juha Sam-rupaaye Vedaa-haran-karmane, Pranavo-dgith-vapushe Mahaashwa-shirse Namaha’. {Briefly, this Mantra means ‘When the Rig, the Yajur and the Sam Veda were stolen, the Lord who is known as Pranav (Brahm) had recited the hymns of the Sam Veda with a great head of a horse and a melodious voice that reverated in the entire creation. I bow before this Lord (Hayagriva).’}

[The thirty-two letters of this Mantra of Hayagriva would form the second row. These letters are placed below the first row of Mantras pertaining to Nrisingh. One letter would be placed in each of the thirty-two petals. The letters are the following—Rim + Mya + Juha + Saa + Ma + Ru + Paa + Ye + Ve + Daa + Ha + Ra + Na + Ka + Rma + Ne + Pra + Na + Vo + Dgi + Tha + Va + Pu + She + Ma + Haa + Ashwa + Shi + Ra + Se + Na + Maha = 32.]

It ought to be noted here that both these incarnations of Lord Vishnu had the body of a man and the head of an animal. While Nrisingh was in the form of a half-man and half-lion, Hayagriva was a half-man and a half-horse. Perhaps this is indicative of that state of evolution of creation when a transition was taking place when the higher species in the animal kingdom as represented by the lion and the horse were evolving into the species which would eventually become the human race.] (42).

43. In the space between the thirty-two petals are written the Anushtup Mantras of Lords Ram and Krishna in such a way that one letter appears between a pair of given two petals. The letters of the Mantra for Lord Ram are placed above the ones for Lord Krishna. The method for writing the Mantras in the space between two given petals has been outlined in paragraph no. 22 of this Canto no. 7 above.

These two Mantras are as follows—

(i) The Anushtup Mantra of Lord Ram is ‘Ram-bhadra Maheshwaas Raghubir Nripottam, Bho Dashaa-syaanta-kaasmaakum Rakshaam Dehi Sriyam Cha Te.’ {Briefly, this Mantra means ‘Gentleman Ram is the great Lord of even the Gods, is the breath of Lord Maheshwar (Shiva), is the great warrior amongst the kings of the Raghu’s race, is an excellent and the best amongst kings, and is the one who brought

about the end of the ten-headed one (the demon Ravana). Let the Lord bestow upon me fearlessness and grant his protection to me; let him give me all 'Sri', i.e. all glories and majesties.' }

[The letters of this Mantra are the following—Raa + Ma + Bha + Dra + Ma + He + Shwaa + Sa + Ra + Ghu + Bi + Ra + Nri + Po + Tta + Ma + Bho + Da + Shaa + Syaa + Nta + Kaa + Smaa + Kum + Ra + Kshaam + De + Hi + Sri + Yam + Cha + Te = 32.]

(ii) The Anushtup Mantra of Lord Krishna is 'Devi-sut Govinda Vaasudeo Jagatpate, Dehi Me Tanayam Krishna Twaamahum Sharanam Gataha.' {Briefly, this Mantra means 'Krishna was born as the son of Devki, is known as Govinda and Vasudeo (which are the divine names of Vishnu as well), and is the Lord of the entire world. Let the Lord give me refuge in his holy feet.' }

[The letters of this Mantra are the following—De + Va + Ki + Su + Ta + Go + Vi + Nda + Vaa + Su + De + Va + Ja + Ga + Ta + Pate + De + Hi + Me + Ta + Na + Yam + Kri + Shna + Twaa + Ma + Hum + Sha + Ra + Nam + Ga + Taha = 32.] (43).

44. Outside the lotus with thirty-two petals is made another circle or ring using the Beej Mantra of Agni (Fire) prefixed with the Pranav Mantra (OM). Since the Beej Mantra of Agni is 'Ramom', the combined Mantra would be 'OM Ramom'. [To make a circle, this Mantra is written continuously without break. This is the eleventh ring.] (44).

45. Outside this ring is made another lotus having thirty-six petals.

[As in the previous cases, this thirty-six petal lotus would surround the ring formed by writing the Mantra 'OM Ramom', and its shape would be a circle or ring of continuous arches.]

On its petals are written two Mantras of Lord Hayagriva, the first one has thirty-six letters and the second one has thirty-eight letters. The Mantra with thirty-six letters would form the first row in the petals and its letters would be placed towards their tip or apex, while the second Mantra of thirty-eight letters would be placed below it and form the second row. The writing is done clockwise.

The two Mantras are the following—

(i) The Mantra with thirty-six letters is 'Hansaha Vishwo-ttirna-swarupaaye Chinmayaanand-rupine, Tubhyam Namoh Hayagriva Vidyaaraajaaye Vishnave So-aham.' {Briefly, the meaning of this Mantra is 'Hans (i.e. the Principal of creation; the primal essence of creation that is like a divine Swan which is a symbol of purity, divinity and holiness, and which refers to the Supreme Being known as Brahm, the cosmic Consciousness) has manifested itself in the form of the extensively vast and measureless world, and it is an image of supreme eternal bliss that comes with true knowledge which leads to realisation and enlightenment. I bow before Lord Hayagriva who is the patron Lord of this truthful knowledge, and is the Lord of the world who is also known as Vishnu. I am that Hans—i.e. that cosmic Being is none else but my 'true self'.' }

[The thirty-six letters of this Mantra are—Han + Saha + Vi + Shwo + Tti + Rna + Swa + Ru + Paa + Ye + Chi + Nma + Yaa + Na + Nda + Ru + Pi + Ne + Tu + Bhyam + Na + Mo + Ha + Ya + Gri + Va + Vi + Dyaa + Raa + Jaa + Ye + Vi + Shna + Ve + So + A-Ham = 36.]

(ii) The Mantra with thirty-eight letters is 'Hrison(g) OM Namoh Bhagwate Hayagrivaaye Sarwa-vaagishwaraeshwaraaye Sarwa-vedamayaaye Sarwa-vidyaam Me Dehi Swaha.' {Briefly, the meaning of this Mantra is 'OM salutations to the divine

Swan (the Supreme Being, Brahm)! I bow before Lord Hayagriva who is the supreme Lord of speech, and who is an embodiment of all the Vedas (i.e. of all knowledge that exists in creation). I beg him to give me all knowledge. For this purpose I offer this oblation to him.’ }

[Since the number of petals is only thirty-six while the second Mantra has two letters in addition to the needed thirty-six letters, the placement of the letters in the petals is done in the following manner—the first petal would have the monosyllables ‘Hrison(g) + OM’, the second petal has the next word ‘Namo’, and then the rest of the remaining thirty-four petals would have one letter of the remaining Mantra as follows—Bh + Ga + Wa + Te + Ha + Ya + Gri + Vaa + Ye + Sa + Rva + Vaa + Gi + Shwa + Re + Shwa + Raa + Ye + Sa + Rva + Ve + Da + Ma + Yaa + Ye + Sa + Rva + Vi + Dyaam + Me + De + Hi + Swa + Ha = 34.

These 34 letters with the previous 4 letters (Hrison(g) + OM + Na + Mo = 4) would complete the thirty-eight lettered second Mantra.

Thus, the first petal would have the pair ‘Han’ + ‘Hrison(g) OM’ pertaining to the first and second Mantras respectively. The second petal would have ‘Saha’ + ‘Namo’ pertaining to the first and second Mantras respectively. The third petal would have ‘Vi’ + ‘Bha’ pertaining to the first and second Mantras respectively. And this process would be followed till we reach the thirty-sixth petal which would have the last letters of each Mantra, viz. ‘A-ham’ + ‘Ha’ pertaining to the first and second Mantras respectively.

The letters of the first Mantra are written towards the tip or apex of the petals, while those of the second Mantra are written below them.] (45).

46. In the space between the thirty-six petals (described in paragraph no. 45) are written the following Mantras in the way described below—

(i) In the space between the first twenty-four pairs of the petals are written the twenty-four divine names of Lord Keshav (Vishnu) with the word ‘OM’ as a prefix and ‘Namaha’ as a suffix. The writing, as usual, is done in a clockwise manner, with one complete Mantra written in the space between two petals. [‘OM’ is a salutary address to imply that the entity to whose name it is prefixed is none but the supreme Brahm himself, while ‘Namaha’ means to bow respectfully.]

These twenty-four Mantras are the following—(1) OM Keshavaaye Namaha. [Briefly, the meaning would be ‘OM salutations to Lord Keshav! I bow before you.’ This meaning would be applicable to all the remaining twenty-three Mantras that follow, the only change would be the name of the Lord that is placed between OM and Namaha.] (2) OM Naranaaye Namaha. (3) OM Madhavaaye Namaha. (4) OM Govindaaye Namaha. (5) OM Vishnave Namaha. (6) OM Madhusudanaaye Namaha. (7) OM Trivakramaaye Namaha. (8) OM Vamanaaye Namaha. (9) OM Sridharaaye Namaha. (10) OM Hrishikshaaye Namaha. (11) OM Padmanaavaaye Namaha. (12) OM Daamodaraaye Namaha. (13) OM Sankarshanaaye Namaha. (14) OM Vasudevaaye Namaha. (15) OM Pradumnaaye Namaha. (16) OM Anirudhaaye Namaha. (17) OM Purushottamaaye Namaha. (18) OM Adhokshajaaye Namaha. (19) OM Naarsinghaaye Namaha. (20) OM Achuttaaye Namaha. (21) OM Janaardanaaye Namaha. (22) OM Upendraaye Namaha. (23) OM Haraye Namaha. (24) OM Sri-krishnaaye Namaha.

Hence, the Mantra that is written between the first and the second petal is ‘OM Keshavaaye Namaha’, between the second and the third petal is ‘OM Naranaaye Namaha’, between the third and the fourth petal is ‘OM Madhavaaye Namaha’, and so on.

(ii) In the space between the remaining twelve pairs of the petals are written the Gayatri Mantras of Lords Ram and Krishna in such a way that two letters of each Mantra occupy the space between any given pair of petals. The ones of Lord Ram are written above the ones for Lord Krishna. The exact pattern to be followed in writing the Mantra between the petals is explained in paragraph no. 22 above.

These two Mantras are the following—

(a) The Gayatri Mantra of Lord Ram is ‘Daash-rathaaye Vidmahe Sitaavallabhaaye Dhimahi Tanno Raamaha Prachodayaat.’ {Briefly, this Mantra means ‘Lord Ram had assumed a body to become a son of king Dashrath (of Ayodhya). He is as glorious, splendourous and radiant as the Fire. He is very dear to Sita (his divine consort). He is most wise, erudite, intelligent and enlightened. Let me attain this divine Lord.’}

[The letters of this Mantra are Daa + Sha + Ra + Thaa + Ye + (Vi + Dmahe) + Si + Taa + Va + Lla + Bhaa + Ye + Dhi + Ma + Hi + Ta + Nno + Raa + Maha + Pra + Cho + Da + Yaa + Ta = 24.]

(b) The Gayatri Mantra of Lord Krishna is ‘Daamodaraaye Vidmahe Vaasudevaaye Dhimahi Tannha Krishnaha Prachodayaat.’ {Briefly, this Mantra means ‘Lord Krishna is also known by the name of Daamodar. He is as glorious, splendourous and radiant as the Fire. He has assumed a body as the son of Vasudeo (of Vrindavan). He is most wise, erudite, intelligent and enlightened. Let me attain this divine Lord.’}

[The letters of this Mantra are Daa + Mo + Da + Raa + Ye + Vi + Dmahe + Vaa + Su + De + Vaa + Ye + Dhi + Ma + Hi + Ta + Nnha + Kri + Shnaha + Pra + Cho + Da + Yaa + Ta = 24.]

As noted above, the letters that are written in the space between the twenty-fifth pair of petals would be ‘Daa + Sha’ for Ram, and ‘Daa + Mo’ for Krishna. The letters that are written between the twenty-sixth pair of petals would be ‘Ra + Thaa’ for Ram, and ‘Da + Raa’ for Krishna. The letters that are written between the twenty-seventh pair of petals would be ‘Ye + (Vi + Dmahe)’ for Ram, and ‘Ye + Vi’ for Krishna.

This process is continued till the last pair of petals, i.e. the thirty-sixth pair, which would have the letters ‘Yaa + Ta’ for Ram, and again ‘Yaa + Ta’ for Krishna (46).

47. Outside the lotus with thirty-six petals is made another circle or ring using the Beej Mantra of Ankush (goat) prefixed and suffixed by the Pranav Mantra (OM). Since the Beej Mantra of Ankush is ‘Kron(g)’, the combined Mantra would be ‘OM Kron(g) OM’. [To make a circle, this Mantra is written continuously without break. This is the twelfth ring.] (47).

48. Outside this ring some space is left and another ring is made (which would be the thirteenth) using the same Mantra ‘OM Klon(g) OM’. [That is, now we have two consecutive rings of this Mantra.]

In the space between these two rings or circles made by writing the Mantra ‘OM Kron(g) OM’, twelve semi-circular arches resembling petals are made in such a way that each is separate from the other and there is some space between two arches or petals. The spacing between these twelve arches or petals, and the size of the individual arches or petals should be equal in dimension.

Inside these twelve petals are written the Mantras of Kaustav (a gem worn by Vishnu), Vanmaala (a garland of flowers), Srivatsa (the sign of Bhṛigu’s foot-print on

Vishnu's chest), Sudarshan (Vishnu's divine Discus, his weapon), Garud (Vishnu's vehicle, the legendary heron or eagle), Padma (the lotus), Dwaj (the flag/standard), Aanant (the serpent on whose back Vishnu reclines on the celestial ocean), Sharnaga (a bow held by Vishnu), Gadaa (mace), Sankha (conch of Vishnu), and Nandak (the sacred Bull). Each of these Mantras is prefixed by 'OM' and suffixed by 'Namaha'.

These Mantras are the following—(1) OM Kaustuvaaye Namaha. (2) OM Vanmaalaaye Namaha. (3) OM Srivatsaaye Namaha. (4) OM Sudarshanaaye Namaha. (5) OM Garudaaye Namaha. (6) OM Padmaaye Namaha. (7) OM Dwajaaye Namaha. (8) OM Anantaaye Namaha. (9) OM Shaarangaaye Namaha. (10) OM Gadaaye Namaha. (11) OM Shankhyaaye Namaha. (12) OM Nandakaaye Namaha.

The meanings of all the Mantras are basically the same, and they honour these entities which are special signs of Lord Vishnu. For instance, the meaning of the first Mantra 'OM Kaustav Namaha' is 'OM salutations! I reverentially bow before the Kaustav gem worn by Vishnu'. The same general meaning is also applicable to the other signs of Vishnu with the name of the concerned sign replacing the word 'Kaustav gem' of this sample Mantra. For instance, the second Mantra would mean 'OM salutations! I reverentially bow before the garland known as Vanmaala worn by Vishnu', the third Mantra would mean 'OM salutations! I reverentially bow before the Srivatsa worn by Vishnu', and so on. [These Mantras are written to honour these individual entities that have close association with Vishnu, and hence have acquired a divine status that is no less important than the Lord himself. This has a message for the worshipper—and it is that once he becomes a devotee of the Lord he would acquire the same exalted stature as these entities, and he would become as revered and honourable as them.]

These Mantras are written in such a way that one petal has one full Mantra instead of a part of it as was done earlier. Hence, the first petal has 'OM Kaustuvaaye Namaha', the second has 'OM Vanmaalaaye Namaha', the third has 'OM Srivatsaaye Namaha', and so on and so forth (48).

49. In the space between the twelve arches or petals (drawn as per the guideline in paragraph no. 48) are written the following twelve Mantras. [As in the case of the Mantras written inside the arches which were dedicated to the entities that are specially identified with Lord Vishnu, the following pertain to the chief attendants of Vishnu who are closely identified with the Lord. While the Mantras of the entities mentioned in paragraph no. 48 are placed inside the arched enclosures or petals to indicate their being in direct contact with the Lord, the ones mentioned in this paragraph are being placed outside to indicate that these attendants of Vishnu surround him from the outside and provide the Lord escort like the escorts that surround a King or an Emperor. The first attendant is named Vishwaksen, and he is the chief amongst the attendants. The rest of the twelve attendants are named after the Sudarshan Chakra which is the invincible weapon of Vishnu. On close examination we would observe that each of them stands as a personification of one special quality of this Chakra.]

(1) OM Vishwaksenaaye Namaha. [The meaning briefly is 'OM salutations! I bow reverentially to Vishwaksen'. The same meaning would apply to all the other Mantras except for the change of the name of the attendant.]

(2) OM Aa-chakraaye Swaha. [The meaning briefly is 'OM salutations! I offer my oblations to Aachakra'. The Aachakra is a personification of the special quality of the Sudarshan Chakra that it is most astonishing.]

(3) OM Vi-chakraaye Swaha. [The meaning briefly is ‘OM salutations! I offer my oblations to Vichakra’. The Vichakra is a personification of the special quality of the Sudarshan Chakra that it is most strange.]

(4) OM Su-chakraaye Swaha. [The meaning briefly is ‘OM salutations! I offer my oblations to Suchakra’. The Suchakra is a personification of the special quality of the Sudarshan Chakra that it is most auspicious and holy.]

(5) OM Dhi-chakraaye Swaha. [The meaning briefly is ‘OM salutations! I offer my oblations to Dhichakra’. The Dhichakra is a personification of the special quality of the Sudarshan Chakra that it is most wise, intelligent and skilful.]

(6) OM San-chakraaye Swaha. [The meaning briefly is ‘OM salutations! I offer my oblations to Sanchakra’. The Sanchakra is a personification of the special quality of the Sudarshan Chakra that it is most auspicious.]

(7) OM Jwaalaa-chakraaye Swaha. [The meaning briefly is ‘OM salutations! I offer my oblations to Jwaalaachakra’. The Jwaalaachakra is a personification of the special quality of the Sudarshan Chakra that it is like a leaping flame of fire.]

(8) OM Krudholkaaye Swaha. [The meaning briefly is ‘OM salutations! I offer my oblations to Krudha-chakra’. The Krudha-chakra is a personification of the special quality of the Sudarshan Chakra that it is angry and wrathful when it comes to punishing of the guilty.]

(9) OM Maholkaaye Swaha. [The meaning briefly is ‘OM salutations! I offer my oblations to Maholka’. The word Maholka consists of two parts—‘Maho’ meaning ‘great’, and ‘Ulka’ meaning a ‘comet’. Hence, Maholka represents the Sudarshan Chakra which is like the comet in the dark sky. It shoots towards its target like a flying comet.]

(10) OM Viryolkaaye Swaha. [The meaning briefly is ‘OM salutations! I offer my oblations to Viryolka’. The Viryolka is a personification of the special quality of the Sudarshan Chakra that it is most powerful, virile, potent, sturdy, effective and strong. The word ‘Vir’ stands for strength, courage, vitality, virility, power and potent.]

(11) OM Vidyolkaaye Swaha. [The meaning briefly is ‘OM salutations! I offer my oblations to Vidyolka’. The Vidyolka is a personification of the special quality of the Sudarshan Chakra that it is a treasury of Vidya or knowledge.]

(12) OM Sahastrolkaaye Swaha. [The meaning briefly is ‘OM salutations! I offer my oblations to Sahastrolka’. The Sahastrolka is a personification of the special quality of the Sudarshan Chakra that it is like a thousand burning comets as well as the fact that it is like thousand sharp weapons.] (49).

50. Outside this (thirteenth ring made as per instructions given in paragraph no. 48) is drawn another ring by writing the five-lettered Mantra of Garud embellished by the Pranav Mantra. [This would be the fourteenth ring. It is drawn by continuously writing this Mantra without break.]

The Mantra is ‘OM Kship OM Swaha OM’. {It briefly means OM salutations to the divine Bird (Garud). OM salutations! Oblations are being offered to him. OM salutations!}

In the intervening space between these two outer rings (i.e. between the thirteenth ring made as per instructions given in paragraph no. 48, and the fourteenth ring made as per instructions given in the present paragraph no. 50) are drawn/marked twelve Vajras. [The Vajra is the sturdy weapon of Indra, the king of Gods, and is like a bolt of lightening. In iconography, Vajra is depicted as a goad or a spear.]

On the tip of these twelve Vajras are written the following twelve Mantras—

(1) OM Padma-nidhaye Namaha. [This Mantra means ‘OM salutations! I bow respectfully to the Lord who holds a lotus in his divine hands.’ The word Padma also signifies one of the heavenly assets that are stored in the treasury of Gods protected by Kuber, their treasurer. Lotus is also a flower that has special importance in the scriptures because it is never dirtied by the surrounding filth in the water where it grows. In other words, Lord Vishnu is the Lord who possesses the best of virtues in this creation, and inspite of him being involved in taking care of this world he is never corrupted or tainted by its negative qualities. An additional interpretation would be that this lotus represents the creation of which Vishnu is the Lord.]

(2) OM Maha-padma-nidhaye Namaha. [This Mantra means ‘OM salutations! I bow respectfully to the Great Lord who holds Great Lotus in his divine hands.’ What applies to the ‘lotus’ as described in hymn no. 1 above also applies to this hymn no. 2, only the degree and intensity is magnified by the prefix ‘Maha’ or ‘Great’.]

(3) OM Garud-nidhaye Namaha. [This Mantra means ‘OM salutations! I bow respectfully to the Lord who has Garud, the legendary Bird that is the divine vehicle of Vishnu, as one of his assets.’ It refers to the fact that the Lord is the Master of all the creatures that are sky-borne.]

(4) OM Shankha-nidhaye Namaha. [This Mantra means ‘OM salutations! I bow respectfully to the Lord who has the Shankha, the divine Conch, as one of his assets.’ It refers to the fact that the Lord has manifested himself as the ethereal cosmic ‘sound’ that reverberates in the background of creation, and which is represented by monosyllable Mantra ‘OM’. This is because the conch produces sound which is reverberating in nature and is caused by the vibrations in the static air when breath is blown inside it forcefully. It is a metaphor for life and knowledge because, one, only a living entity can blow the conch, and second, the faculty of speech symbolised by the sound produced by air as it passes through the vocal cords in the throat is very much like the sound produced by the conch when air is blown into it. The spoken word is the vehicle through which knowledge is disseminated and spread, through which ideas are expressed and explained. The sound made in the throat that is interpreted as the spoken word that spreads far and wide is just like the sound made by the conch that is also heard for long distances. There is another interpretation—viz. the conch is the shell of the snail; hence it symbolises that Lord Vishnu is the Lord of all the assets that are found in water bodies such as the ocean and the sea, and that he gives such humble and lazy creatures as the snail their due importance in the hierarchy of creation.]

(5) OM Makar-nidhaye Namaha. [This Mantra means ‘OM salutations! I bow respectfully to the Lord who has the Makar, the celestial alligator represented by the Zodiac sign of Capricorn, as one of his vehicles.’ This refers to the Lord’s control of all the creatures that live in water as well as to establish him as the Lord of all life that is dependent upon water. It also refers to the ‘Makar Sankranti’ when the Sun enters the mansion of the Capricorn marking the onset of the winter solstice. Another connotation is the Lord is as steady and unmoving as the Sun when it is in the region of the Zodiac sign of Makar or Capricorn because the word ‘solstice’ in Latin means ‘the Sun standing still’. Still another is that the Lord is as distanced from the humdrum of life and as detached from it as the Sun when it is in the solstice because the word ‘solstice’ means ‘either of the times in the year when the Sun is furthest away from the equator.’ This hymn also might mean that Vishnu possesses heavenly assets measured in the celestial term represented by the word ‘Makar’.]

(6) OM Kashap-nidhaye Namaha. [This Mantra means ‘OM salutations! I bow respectfully to the Lord who has the legendary Tortoise as one of his forms.’ This

refers to the incarnations of Vishnu in the form of the tortoise which supported the Mountain, which was used to churn the ocean by the Gods and the Demons at the beginning of creation in the search for the elusive Amrit, the elixir of life, from sinking. From a wider angle it means that Lord Vishnu supports the entire creation from its bottom, forming the base or foundation upon which it rests. This hymn also might mean that Vishnu possesses heavenly assets measured in the celestial term represented by the word 'Kashap'.]

(7) OM Vidya-nidhaye Namaha. [This Mantra means 'OM salutations! I bow respectfully to the Lord who is a treasury of Vidya—knowledge.']

(8) OM Parmaanand-nidhaye Namaha. [This Mantra means 'OM salutations! I bow respectfully to the Lord who is a treasury of supreme bliss, happiness, beatitude and felicity.']

(9) OM Mokshaa-nidhaye Namaha. [This Mantra means 'OM salutations! I bow respectfully to the Lord who is a treasury or an eternal fount of Moksha—i.e. he is the one who can provide the spiritual seeker his final goal of salvation and emancipation.]

(10) OM Laxmi-nidhaye Namaha. [This Mantra means 'OM salutations! I bow respectfully to the Lord of Laxmi.' Laxmi is the Goddess who presides over worldly prosperity, wealth and material wellbeing as well as more noble assets such as fame, good name, honours, majesty, magnificence, and the like. Therefore, Vishnu is the Lord of all known material wealth and assets in this world.]

(11) OM Brahm-nidhaye Namaha. [This Mantra means 'OM salutations! I bow respectfully to the Lord who is none else but the supreme transcendental Brahm himself.' The Lord possesses all the divine and glorious virtues possessed by the supreme and transcendental Brahm.]

(12) OM Mukund-nidhaye Namaha. [This Mantra means 'OM salutations! I bow respectfully to the Lord who has assumed the form of a child.' The word 'Mukund' refers to Vishnu in his role as the innocent child who is untainted and pure at heart. This child would grow up to accomplish great tasks in this world. The future of this world is in the hands of a child just like it is in the hands of Lord Vishnu. This hymn also might mean that Vishnu possesses heavenly assets measured in the celestial term represented by the word 'Mukund'.] (50).

51. In the space between the twelve signs of the Vajra (marked as described in paragraph no. 50) are written the following twelve Mantras—

(1) OM Vidya-kalpakatarave Namaha. [This Mantra means 'OM salutations! I bow reverentially before the grand virtue of 'Vidya' which is like the all wish-fulfilling evergreen tree of the Gods known as the Kalpa Tree.' The term 'Vidya' means all forms of knowledge, and obviously knowledge is universally empowering and enlightening. It enables one to fulfil one's wishes and aspirations.]

(2) OM Anand-kalpakatarave Namaha. [This Mantra means 'OM salutations! I bow reverentially before the great virtue of 'Anand' which is like the all wish-fulfilling evergreen tree of the Gods known as the Kalpa Tree.' The term 'Anand' means bliss, happiness, joys, beatitude and felicity. All efforts of a man are directed towards attaining them. Once one reaches the state when he experiences Anand of the highest order, there is nothing more that he wants. Hence, Anand is like the Kalpa Tree that satisfies all his desires and aspirations; it marks the culmination of all his efforts and endeavours.]

(3) OM Brahm-kalpakatarave Namaha. [This Mantra means 'OM salutations! I bow reverentially before the great Lord known as 'Brahm' who is like the all wish-

fulling evergreen tree of the Gods known as the Kalpa Tree.’ The term ‘Brahm’ in this context refers to the attainment of the spiritual stature of Brahm-realisation, and once an aspirant reaches this exalted state of spiritual achievement, nothing more is left for him to achieve. It provides him complete and full satisfaction and contentedness. Hence, it is like the all wish-fulfilling tree called the Kalpa Tree.]

(4) OM Mukti-kalpakatarave Namaha. [This Mantra means ‘OM salutations! I bow reverentially before the great virtue of ‘Mukti’ which is like the all wish-fulfilling evergreen tree of the Gods known as the Kalpa Tree.’ The term ‘Mukti’ means spiritual liberation and deliverance. Once a man finds freedom from his bondages and torments, he is indeed very happy and exhilarated. Hence, once he has attained Mukti, which however was the target of all his spiritual efforts, he has found all that he had set out to find.]

(5) OM Amrit-kalpakatarave Namaha. [This Mantra means ‘OM salutations! I bow reverentially before the grand virtue of ‘Amrit’ which is like the all wish-fulfilling evergreen tree of the Gods known as the Kalpa Tree.’ The term ‘Amrit’ means a nectar, ambrosia or elixir of eternity, life, happiness, joys, contentedness, bliss, beatitude and felicity. Once a man finds this source that would help him free himself from all worldly worries and problems, he has found the magical lamp that would fulfil all his desires, wishes, aspirations, hopes and expectations. Nothing more is wanted by him. Hence, attainment of Amrit is like the Kalpa Tree that would satisfy all his wishes. This Amrit was the reason why the Gods and the Demons had churned the legendary ocean in search for it, and then fought bitterly over it once it was found and was usurped by the Gods, making them eternal enemies.]

(6) OM Bodh-kalpakatarave Namaha. [This Mantra means ‘OM salutations! I bow reverentially before the grand virtue of ‘Bodh’ which is like the all wish-fulfilling evergreen tree of the Gods known as the Kalpa Tree.’ The term ‘Bodh’ means to become enlightened, wisened, knowledgeable, erudite and aware of something. In the present context, this Bodh refers to the enlightenment or awareness about one’s true ‘self’, the pure conscious Atma, the soul, and the fact that this Atma is none but the supreme transcendental Brahm, the cosmic Consciousness, its self personified. This Brahm is an eclectic non-dual entity that pervades uniformly and universally in this creation. There is nothing here that is not Brahm. This is the ‘Bodh’ of the Absolute Truth of creation.]

(7) OM Vibhuti-kalpakatarave Namaha. [This Mantra means ‘OM salutations! I bow reverentially before the grand virtues that are collectively known as ‘Vibhuti’ which is like the all wish-fulfilling evergreen tree of the Gods known as the Kalpa Tree.’ The term ‘Vibhuti’ means such eclectic virtues as majesty, glory, pomp, favourable circumstance, magnificence, fame, powers, prosperity, fortunes, grandeur and other noble, praise worthy and divine faculties. Obviously, when one has obtained them, nothing remains to be attained. All things and all honours are easily available to a person who is crowned with Vibhuti. He is remembered with great respect even after his demise, and even by his arch enemies.]

(8) OM Vaikunth-kalpakatarave Namaha. [This Mantra means ‘OM salutations! I bow reverentially before the grand abode of Lord Vishnu known as ‘Vaikunth’ which is like the all wish-fulfilling evergreen tree of the Gods known as the Kalpa Tree.’ Obviously, when one has reached heaven, all his wishes are deemed to be fulfilled. He attains such great mystical powers that nothing remains beyond his reach.]

(9) OM Veda-kalpakatarave Namaha. [This Mantra means ‘OM salutations! I bow reverentially before the great ‘Vedas’ which are like the all wish-fulfilling

evergreen tree of the Gods known as the Kalpa Tree.’ The ‘Vedas’ are the great repositories of knowledge. When one possesses knowledge, wisdom, skills and expertise, all things become easily accessible by him. The knowledge of the Vedas makes a man wise and erudite about the truth and the reality of the Supreme Being. He gains first hand knowledge of the esoteric and the mystical, though it depends upon him how he utilises this knowledge. An expert of the Vedas can either use his knowledge to acquire worldly prosperity and fame, or achieve the spiritual goal of Mukti. But the Vedas themselves are nevertheless like the all wish-fulfilling tree known as the Kalpa Tree that provides the faithful whatever he wishes or aspires for.]

(10) OM Yog-kalpakatarave Namaha. [This Mantra means ‘OM salutations! I bow reverentially before the grand philosophy and practice of ‘Yoga’ which is like the all wish-fulfilling evergreen tree of the Gods known as the Kalpa Tree.’ The term ‘Yoga’ has a wide meaning, but briefly it means meditation and contemplation. Yoga helps to bring about a union of the individual soul with the cosmic Soul. Yoga bestows immense mystical powers, called the Siddhis, to its practitioner, which he is free to use to fulfil all that he wishes. There is nothing that cannot be achieved by the astounding powers of Yoga. In fact, entire Upanishads are devoted to this philosophy and practice. Hence, Yoga is like the Kalpa Tree because it fulfils all the desires and aspirations of its practitioner.]

(11) OM Yagya-kalpakatarave Namaha. [This Mantra means ‘OM salutations! I bow reverentially before the auspicious institution or system of ‘Yagya’ which is like the all wish-fulfilling evergreen tree of the Gods known as the Kalpa Tree.’ The term ‘Yagya’ usually means a fire sacrifice, as well as doing anything diligently and selflessly, or with a purpose in mind. In ancient times, the fire sacrifice was deemed to be an embodiment of the Lord, and were said to so powerful in their effects that anything could be achieved through them. Hence, the Yagya is regarded as the Kalpa Tree because it could fulfil any desire, wish or aspiration that a man had. This Mantra has many other connotations as well, such as (a) the fire sacrifice is one of the many forms or aspects of the Lord, and therefore as divine, holy and revered as the Lord; (b) the doing of deeds auspiciously and righteously is also one of the many means of attaining the Lord; (c) like the fire sacrifice, the deeds that are done auspiciously and righteously, and with some noble aim are also as holy, divine and spiritually uplifting as the fire sacrifice itself; (d) the fire sacrifice and other auspicious deeds done righteously are personified forms of the Lord himself, and hence as pure, holy and divine as the Lord; (e) if one cannot have access to the Kalpa Tree because it is in the custody of the Gods, then he can have the same benefits as those provided by this tree by doing Yagya, because the Yagya is also as much wish-fulfilling as the Kalpa Tree.]

(12) OM Padma-kalpakatarave Namaha. [This Mantra means ‘OM salutations! I bow reverentially before the grand ‘Padma’ (held in the hands of Vishnu) which is like the all wish-fulfilling evergreen tree of the Gods known as the Kalpa Tree.’ The term ‘Padma’ means the Lotus flower. This hymn pays tribute to the Lotus by comparing it with the Kalpa Tree. In other words, the Lotus in the hands of Vishnu is as divine and wish-fulfilling as the Kalpa Tree. Further, the Lotus stands for such grand virtues as purity, cleanness and immaculacy. This is because though this flower grows in the static water of a pond its petals are untouched by the filth around it. Hence, anyone who has developed such immense degree of dispassion and neutrality towards this world as shown by the Lotus is bound to develop auspicious virtues that are untouched by the corruptions and perversions of this material world, and such a man would find great respect in society because of his neutrality and broadness of vision. Nothing would be impossible for him; all glories and majesties would come

knocking at his door, though of course he would have nothing to do with them. Just like the Lotus flower that is given so much respect even by Lord Vishnu that he deemed it fit to hold it in his hands, such an immaculate and pure devotee is also given the same respect and honour by the Lord. Hence, the Lotus flower symbolically stands for the all wish-fulfilling Kalpa Tree as far as the spiritual aspirant is concerned.] (51).

52. Outside this ring (made according to the instructions of paragraph no. 50) is made another ring or circle using two Mantras, one called the 'Shiv Gayatri Mantra' and the other called the 'Param Brahm Mantra'. [This would be the fifteenth ring or circle. One half of it is drawn by writing the Shiv Gayatri Mantra in a semi-circular manner, followed by the Param Brahm Mantra also written in a semi-circular manner to complete the full circle.]

The Shiv Gayatri Mantra is the following—'Tattpurushaaye Vidmahe Mahadevaaye Dhimahi Tanno Rudra Prachodayat.' [Briefly this Mantra means 'The supreme Purush, the primal Being, is splendorous and radiant like the electric. He is known as Mahadev, being the Lord of all Gods and the greatest amongst them. He is most wise, intelligent and enlightened. That Lord has taken the form of Rudra. Let me receive the blessings of this Lord.']

The Param Brahm Mantra is the following—'Sriman-naaraayano Jyotiraatma Naaraayanaaha Paraha, Naaraayan-param Brahm Naaraayaan Namoastu Te.' [This Mantra means 'Lord Narayan is the enlightened and splendorous cosmic Atma or soul of creation. Narayan is the transcendental Supreme Being. Narayan is the supreme transcendental Brahm. I reverentially bow before Narayan.'] (52).

53. Outside it is made another ring or circle by writing the Beej Mantra for Sri. [This would be the sixteenth ring.]

The Sri Beej Mantra is 'OM Sri-mom.' (53).

54. Outside this ring is made another lotus having forty petals. Inside these petals are written the letters of the following Mantras—(a) the seven Vyharitis (the primary utterances of the creator Brahma), each prefixed with OM, (b) this is followed by the Veda-Gayatri Mantra having four steps or lines with the word OM prefixed to each line, and finally (c) the eight-lettered Mantra of Surya (the Sun God).

The sequence of the Mantras would be as follows—

(a) First would come the seven Vyharitis 'OM Bhuha', 'OM Bhuvaha', 'OM Suvaha', 'OM Maha', 'OM Janaha', 'OM Tapaha', and 'OM Satyam'.

(b) This is followed by the four steps of the Veda Gayatri Mantra which is 'OM Tatsavituvarenyam, OM Bhargo Devasya Dhimahi, OM Dhiyo Yo Naha Prachodayaat, OM Paro Rajase Saavadam Omaapo Jyoti Rajoamritam Brahm Bhu Bhurvaha Suvoram.' Briefly it means 'OM salutations! That truthful and divine supreme Lord is luminous and splendorous as the self-illuminated Sun. OM salutations! He is excellent, the best, and the most exalted divine Lord who is a destroyer of sins. OM salutations! I offer my oblations to him. May he imbibe, infuse and inspire my intellect with wisdom and enlightenment so that I am purified and move on the righteous and noble path. OM salutations! The Lord is the Supreme Creator of creation. He has created the sky, the Vedas, the water, the light and the ambrosia of life called Amrit. He is the Brahm who has created the terrestrial world (Bhu), the world of the sky or lower heavens (Bhurva) and the upper heaven or the

higher reaches of the cosmos.’ [Refer also paragraph no. 40 of this present Canto no. 7.]

(c) The eight lettered Mantra for the Sun God is ‘OM Grihinihi Surya Adityaha.’ [This Mantra means ‘OM salutations to the Sun God who is a treasury of light and radiates it as rays in all the directions. He is known as Surya and Aditya.’] (54).

55. In the space outside the junction points of the forty petals of the lotus (drawn in accordance with the instructions given in paragraph no. 54) are written the Beej Mantras for Sri (Laxmi) and Narayan prefixed by the Mantra for Pranav. This Mantra is ‘OM Srimam Srimoom.’ [The meaning is ‘OM salutations to Lord Narayan. OM salutations to the Goddess known as ‘Sri’.’ This Mantra is written in such a way that it fits in the bowl-like concave curvature formed between two adjacent petals. For instance, the first word ‘OM’ is written in a descending manner along the lower outer surface on the right-hand side of a given petal, the second word ‘Srimam’ on the trough formed between two adjacent petals, and the third word ‘Srimom’ is written in an ascending manner on the left-hand side of the second petal opposite the first. This process is repeated for all the forty petals. In other words, there would be twenty pairs of petals and equal number of Mantras.] (55).

56. Outside the lotus of forty petals is drawn another line called the ‘Bhu-Chakra’. Its circumference is intercepted or cut or punctuated at eight places with the sign of the ‘Shul’ which is either a spike or a spear, or an arrow. [The word ‘Bhu’ means earth, and ‘Chakra’ means a circle. Hence, this ‘Bhu Chakra’ is a circle which is cut or punctuated at eight places by the mark of a spear or an arrow. These eight spots are north, north-east, east, south-east, south, south-west, west and north-west.]

Inside the four cardinal points of this ‘Bhu-Chakra’ are written two Mantras. One is for Hans, which is prefixed and suffixed by the Pranav Mantra (OM), and the other is for Narayan, which is only prefixed by the Pranav Mantra. [The four points where these two Mantras are written alongside each other are north, east, south and west.]

The two Mantras are—(1) for Hans it is ‘OM Hansaha So-a-hamom’, and (2) for Narayan it is ‘OM Namō Naaraayanaaye Hum/Hung Phat’.

[Briefly, the first Mantra means ‘OM salutations! The divinity that is known as Hans because of its purity and holiness is none but me. OM salutations to Me who is that Hans (the Supreme Being). In other words, my true self, my Atma which is pure and immaculate consciousness is the same as the one that is known as Parmatma, the Supreme Being.’]

The second Mantra means ‘OM salutations! I bow before Lord Narayan. I destroy or tear away (‘Phat’—to crack, to tear) all my egos and the false sense of individuality instantly.’] (56).

57. Outside this Bhu-Chakra is made a ring with the Pranav Mantra (OM) written continuously in a circle. [This will be the seventeenth ring or circle.]

Outside this ring is made another lotus with fifty petals. Inside these fifty petals, towards their tips, are written the fifty letters of the Maatrikaa—i.e. all the alphabets of the Sanskrit language with the exception of the letter ‘La’.

In the space between the petals are written the Mala Mantras of Lords Ram and Krishna, both prefixed by the Pranav Mantra (OM) and the Sri Beej (Srimam).

The two Mantras are the following—

(1) The Mala Mantra of Lord Ram with the prefix of 'OM' and 'Sri' is as follows 'OM Srimom Namō Bhagwate Raghunandanaaye Rakshoghnāvisṭhaaye Madhur-prasanna-vadanaayā-mit-tejase Valāaye Rāmaaye Viṣṇave Namaha Srimom.' {Briefly this Mantra means 'OM salutations to the Lord of Sri (Goddess Laxmi). I bow reverentially before Lord Ram who is also known as Raghunandan (because he had manifested in the clan of king Raghu of Ayodhya). He is the protector from all troubles and remover of all hurdles. He is of a sweet temperament; is of a cheerful disposition; and is an embodiment of extreme Tej (splendour, radiance, glory and magnificence). He is strong, powerful and valiant. He is Vishnu, the Lord of Sri (Laxmi as well as all material prosperity, wealth, wellbeing, majesty, honours, glories and magnificence that exist in this world). It is to Lord Vishnu as Lord Ram, and vice versa, that I bow reverentially.' }

(2) The Mala Mantra of Lord Krishna with the prefix of 'OM' and 'Sri' is as follows 'OM Srimom Namaha Krishnaaye Devki-putraaye Vaasudevaaye Nigallachhedanaath Sarwa-lokaadhipataye Sarwa-jagannmohanaaye Viṣṇave Kaamitaarthadaaye Swaha Srimom.' {Briefly this Mantra means 'OM salutations to the Lord of Sri (Goddess Laxmi). I bow reverentially before Lord Krishna who is also known as Devki-putra as well as Vaasudeo (because he had manifested as the son of Vasudev, the chief of the milkmen community of Vrindavan, and his wife Devki). He had pierced the poisonous hood of the vicious serpent that lived in the river Yamuna. He is the Lord of everything and everyone. He is able to charm and keep the entire world enthralled. Lord Vishnu (in his form of Krishna) is the fulfiller of all desires. I offer my oblations to him. OM salutations to Vishnu who is the Lord of Sri (Laxmi as well as all material prosperity, wealth, wellbeing, majesty, honours, glories and magnificence that exist in this world).' } (57).

58. Outside this fifty-petal lotus, another Bhu-Chakra (ring or circle) is made which has the sign of eight 'Shuls', or spears, spikes or arrows, at eight corners. [Refer paragraph no. 56. The eight spots where the circumference of the Bhu-Chakra is punctuated or marked by the pointed mark of an arrow or spear are north, north-east, east, south-east, south, south-west, west and north-west.]

On each of these eight Shuls are written the Mantra for Lord Neelkanth (i.e. Lord Shiva, so-called because of the bluish tinge of his throat) that has been prefixed by the Pranav Mantra (OM). [That is, the Mantra is written longitudinally along the side of the Shul.] This Mantra is 'OM OM Namō Neelkanthaaye OM.' {Briefly it means 'OM salutations! I bow reverentially before Lord Neelkanth who is a manifestation of OM (Pranav; Brahm). OM salutations!'} }

In the points of these eight Shuls are written the names of eight Lokpals¹ which are prefixed with OM as a salutatory address, and suffixed with Namaha as a mark of respect for them. [The eight Lokpals are the custodians of the world.]

The Mantras are the following—

(1) OM Indraaye Namaha (OM salutations! I bow before Indra, the King of Gods who is the presiding Lokpal of the east direction).

(2) OM Agneye Namaha (OM salutations! I bow before Agni, the Fire God who presides over the south-east direction).

(3) OM Yamaaye Namaha (OM salutations! I bow before Yam, the Lord of death who presides over the south direction).

(4) OM Niritiaye Namaha (OM salutations! I bow before Nairiti, one of the eight Lokpals who presides over the south-west direction).

(5) OM Varunaaye Namaha (OM salutations! I bow before Varun, the God of water, who presides over the west direction).

(6) OM Vaayaveya Namaha (OM salutations! I bow before Vayavya, the God of wind, who presides over the north-west direction).

(7) OM Somaaye Namaha (OM salutations! I bow before Soma, the Moon God, who presides over the north direction). [According to some versions, the Lord of the north is Kuber, the treasurer of Gods.]

(8) OM Ishanaaye Namaha (OM salutations! I bow before Ish, Lord Shiva, who presides over the north-east direction). (58).

[Note—¹Refer Brihad Aranyaka Upanishad of the Shukla Yajur Veda tradition, Canto 3, Brahman 9, verse nos. 20-24.]

59. Outside the Bhu-Chakra (described in paragraph no. 57) are made three consecutive rings or circles by continuously writing the Pranav Mantra, i.e. OM, in a circular fashion. [These would be the eighteenth, nineteenth and twentieth rings.]

Outside these three rings are drawn four 'Bhupurs' having four majestic doorways or gates each. [The 'Bhupur' is a square drawn in the manner of an outer boundary of the Yantra, and resembles the outer walls of a fort or city. The earlier rings were circular in nature.]

The four corners of this Bhupur are adorned by the signs of the Maha-Vajra. [The four corners are north-east, south-east, south-west and north-west. The Maha-Vajra is the great weapon of the Gods and is shaped like a bolt of electric, or sometimes depicted even like a huge mace or a spear.]

The Amrit Beej Mantra is written longitudinally along the side of the Maha-Vajra. This Mantra is 'OM Srin(g) Vam Vam Srin(g) OM.' (59).

60. Along the path that forms the outermost passage of the Bhupur is written the following Mantras—(1) 'Omaadhaar-shaktye Namaha; (2) OM Mool-prakriteya Namaha; (3) Omaadi-kurmaaye Namaha; (4) Omnantaaye Namaha; (5) OM Prithivye Namaha.' {Briefly, these Mantras are meant to pay respect to the Supreme Being as the great support and the primary foundation of this creation. The Lord is the basic foundation of creation (1); he is the primary Nature (2); he supports this world on his back in his incarnation as the primal Tortoise (3), and on his hood in his incarnation as the legendary serpent called Anant (4); and it is he who has also revealed himself as the Earth (5) to sustain and support all the creatures born in this creation.}

[The outermost path is the passage formed between the fourth and the third Bhupurs.] (60).

61. Along the path that forms the middle passage along the Bhupurs is written the following Mantras—

(1) OM Kshir-samudraaye Namaha. {OM salutations! I bow to pay my obeisance to the celestial ocean of milk known as the Kshir Sagar.}

(2) OM Ratna-dwipaaye Namaha. {OM salutations! I bow to pay my obeisance to the continent of gems and precious metals.}

(3) OM Ratna-mandapaaye Namaha. {OM salutations! I bow to pay my obeisance to the altar of gems and precious metals.}

(4) OM Swet-Chatraaye Namaha. {OM salutations! I bow to pay my obeisance to the white ceremonial umbrella or canopy that covers this altar.}

(5) OM Kalpak-vrikshaaye Namaha. {OM salutations! I bow to pay my obeisance to the Kalpa tree, the evergreen tree in the heaven.}

(6) OM Ratna-singhaasanaaye Namaha. {OM salutations! I bow to pay my obeisance to the divine throne made of gems and precious metals.}

[The middle path is the passage formed between the third and the second Bhupurs.] (61).

62. Along the path that forms the inner passage along the Bhupurs is written the following Mantras—

(1) OM Dharmaaye Namaha. {OM salutations! I bow to pay my obeisance to Dharma, or the virtues of righteousness, nobility, probity and propriety.}

(2) OM Gyanaaye Namaha. {OM salutations! I bow to pay my obeisance to Gyan, or the virtues of knowledge, wisdom, erudition, sagacity and enlightenment.}

(3) OM Vairagyaaye Namaha. {OM salutations! I bow to pay my obeisance to Vairagya, or the virtues of renunciation, detachment, dispassion and non-involvement.}

(4) OM Aishwaraaye Namaha. {OM salutations! I bow to pay my obeisance to Aishwarya, or the virtues that gives one fame, majesty, honour, respect and magnificence in this world.}

(5) Omadharmaaye Namaha. {OM salutations! I bow to pay my obeisance to Adharma, or the virtues that are the opposite of Dharma. Though it appears incredulous to laud Adharma instead of Dharma but it must be noted that Dharma is highlighted only when there is Adharma just like the importance of light can only be understood in the background of darkness. Hence, Adharma also deserves its honour as it highlights the importance of the virtues that are collectively called Dharma, such as the virtues of righteousness, nobility, ethics, probity and propriety.}

(6) Omagyaanaaye Namaha. {OM salutations! I bow to pay my obeisance to Agyan (ignorance; lack of knowledge), or the virtues that are opposite to Gyan. The logic behind this praise of Agyan instead of Gyan is the same as the one applied in Mantra no. 5 dealing with Adharma. It is in the background of ignorance or lack of knowledge that the virtues of knowledge and wisdom gain their importance and significance.}

(7) Omavairagyaaye Namaha. {OM salutations! I bow to pay my obeisance to A-vairagya, or the virtues that are opposite to Vairagya as described in Mantra no. 3. Once again, the logic behind this praise is the same as applied to Agyan and Adharma. It is in the absence of the eclectic virtues of renunciation and dispassion that these noble virtues are highlighted.}

(8) Omanaishwaraaye Namaha. {OM salutations! I bow to pay my obeisance to An-aishwarya, or the virtues that are opposite to those that come within the definition of Aishwarya. In other words, all the things that leads to one's infamy, ignominy, degradation, degeneration, demotion etc. The virtues of Aishwarya will be all the more prominent in the face of opposite factors. Hence the importance of An-aishwarya, and its praise in this Mantra.}

(9) OM Sattwaaye Namaha. {OM salutations! I bow to pay my obeisance to the virtue of Sata. This is the first of the three basic qualities in creation and is marked by truthfulness, knowledge, auspiciousness and righteousness.}

(10) OM Rajase Namaha. {OM salutations! I bow to pay my obeisance to the virtue of Raja. This is the second of the three basic qualities in creation and is marked by desire to create and sustain, to develop and grow.}

(11) OM Tamase Namaha. {OM salutations! I bow to pay my obeisance to the virtue of Tama. This is the third of the three basic qualities in creation and is marked

by the desire to be engrossed in enjoying the material comforts of the world and pleasures of the sense organs.}

(12) OM Maayaaye Namaha. {OM salutations! I bow to pay my obeisance to the Maya. The Maya is the delusion-creating cosmic power of the Supreme Being. Respects are paid to this dynamic power of Brahm to honour its magical ability of creating everything virtually from nothing.}

(13) Omavidyaaye Namaha. {OM salutations! I bow to pay my obeisance to the Avidya (lack of knowledge). This is because Avidya helps to establish and highlight the importance and significance of Vidya or knowledge.}

(14) OM Anantaaye Namaha. {OM salutations! I bow to pay my obeisance to Anant. The word 'Anant' means 'endless and infinite'. Hence, it refers to the eternal Brahm.}

(15) OM Padmaaye Namaha. {OM salutations! I bow to pay my obeisance to the divine Lotus. The Lotus is a divine flower and is paid respects because it stands for holiness, cleanliness and purity. The Lotus is held by Lord Vishnu as well as by his divine consort, Goddess Laxmi. The Lotus lives in a pond of dirty water, but the surrounding filth never sticks to its petals. Besides this, it is from the Lotus that the creator Brahma was born, hence its symbolism as the bud from which the creation emerged.}

[The inner path where these Mantras are written is the passage formed between the second and the first Bhupurs.] (62).

63. Moving inwards from the four Bhupurs, we now reach the area of the three rings or circles made by writing OM (as described in paragraph no. 59 above).

In the passage or space that lies between the third ring of OM (which is the twentieth ring as drawn in accordance to the instructions in paragraph no. 59 above) and the second ring of OM (which is the nineteenth ring) are written the following Mantras in a sequential manner—

(1) OM Vimalaaye Namaha. {OM salutations! I bow to pay my respects to the Goddess Vimlaa, one of the many names of Goddess Laxmi, the divine consort of Lord Vishnu.}

(2) OM Mutkarshinye Namaha. {OM salutations! I bow to pay my respects to the Goddess Utkirshni. The word 'Utkirshni' refers to all the excellent virtues and qualities of the Goddess.}

(3) OM Gyaanaaye Namaha. {OM salutations! I bow to pay my respects to the Goddess Gyaanaa. She personifies the virtues of Gyan or truthful knowledge, wisdom, erudition and enlightenment.}

(4) OM Kriyaaye Namaha. {OM salutations! I bow to pay my respects to the Goddess who controls all Kriyaa or actions and deeds in this creation.}

(5) OM Yogaaye Namaha. {OM salutations! I bow to pay my respects to the patron Goddess of Yoga or meditation.}

(6) OM Pravahaye Namaha. {OM salutations! I bow to pay my respects to the Goddess who brings about movement and activity in this creation. She represents the dynamism and energy of the supreme transcendental Brahm.}

(7) OM Satyaaye Namaha. {OM salutations! I bow to pay my respects to the patron Goddess of Truth; of the Goddess who personifies the eclectic virtues of Truth and Reality.}

(8) OM Ishaanaaye Namaha. {OM salutations! I bow to pay my respects to the divine consort of Lord Ishan (i.e. Shiva). Hence, it is a reference to Goddess Uma or Parvati who is regarded as the universal Mother Goddess.} (63).

64. Along the inner passage (i.e. in the circular path between the nineteenth and the eighteenth rings drawn in accordance with the instructions of paragraph no. 59) is written the following Mantras—

(1) Omanugraahye Namaha. {OM salutations! I bow with great respect and submit my self before you (i.e. before Brahm represented by OM).}

(2) OM Namō Bhagwate Vishnawe Sarwa-bhutaatmane Vasudevaaye Sarwaatma-sanyog-yog-pithaamane Namaha. {OM salutations! I bow most reverentially before Lord Vishnu who is the Atma (soul; pure consciousness) of all living beings, is the Lord of Vasus (the primary assets of creation of which there are eight in number), is the Atma or the essence of everything in existence as well as the universal binding force in creation that establishes uniformity in it, is the patron deity of meditation, is established on the altar of mediation and is the subject of all contemplation, and he brings about a union between two erroneously separated units of creation.} (64).

65. [This paragraph is meant to summarise the points to be remembered while constructing the worship Yantra.]

As a general rule of thumb it is a normal tradition that the following entities are placed at the designated places in the spaces between the various rings or circles of the worship Yantra (i.e. the worship apparatus or instrument) to properly empower it and make it active and effective.

These are called the ten Angas or limbs (essential parts, units or aspects) of the Yantra. They are—the Beej (seed or root) of any given Mantra, along with its Pran (life), Shakti (dynamism, energy, vitality, potentials), Drishti (the power to foresee and the ability to decide the course of action), and Vashya (the ability to gain control of a given situation) etc.

The other entities that are to be added are—the name of the Yantra and Mantras, and the Gaayatri (i.e. the various Mantras composed in accordance to the specific style of composition called Gaayatri—e.g. the Gaayatri Mantra as mentioned in paragraph no. 40 of this Canto 7).

Then, proper ‘Pran Prathisthaa’ is to be done, along with ‘Bhut Shuddhi’ and writing the Mantras of the Digpals (Lokpals). [‘Pran Prathisthaa’ is the proper sanctifying and consecrating process of the worship Yantra, and ‘Bhut Shuddhi’ is the purification of the primary elements that make up the body of the worshipper as well as the various units of the Yantra. The various ‘Lokpals’ are the custodians of creation, and they are remembered to provide their protection to the whole exercise. The names of the ‘Digpals’ or ‘Lokpals’ are given in paragraph no. 58 above.]

The above ten units are called the ten Angas or limbs (essential parts or aspects) of the Yantra. [Even as a body which lacks one of its limbs feels handicapped to deliver its best, a Yantra which is devoid of even one single unit as narrated above, or when even one of them is not properly done in the prescribed manner, the effectiveness and potentials of the Yantra as a whole is correspondingly reduced.]

Besides the above mentioned ten units, four additional units are equally essential. They are the following—

(i) The Mool-Mantra (i.e. the primary Mantra of the chief deity worshipped—e.g. the Mantra of Lord Narayan is ‘OM Namō Naaraayanaaye’ as given in paragraph no. 24).

(ii) The Mala-Mantra (i.e. the Mantra used to turn the beads of the rosary, e.g. the one of Sudarshan Chakra given in paragraph no. 34).

(iii) The Mantras for the Kavach (literally meaning an armour, a protective shield, a cover).

(iv) The Mantras for the Dig-bandhan or the great bridle that keeps the Yantra and its various units in place and prevents them from dismantling and scattering about.

A proper and effective Yantra must have all these units in place (65).

66. In this way, the Yantra described in this Upanishad is called the Maha-Yantra, the Great Yantra. It has been adorned and empowered by powerful and most eclectic Mantras by those attained and accomplished ascetics whose Antahakaran (inner self) has become enlightened and empowered enough to have a deep insight into the secret realm of the mystical, the esoteric, the unknown and the enigmatic.

When this Yantra is worshipped properly by following all the sixteen steps needed for ritualistic worship¹, and when it is duly empowered by doing Japa (repetition of Mantras) and Havan or Yagya (fire sacrifices and offering of oblations to the chief deity and all other Gods to please them), it becomes radiant and splendorous like the glorious illumination that emanates from Brahm. It acquires the ability to provide freedom all fears, it becomes the destroyer or eliminator of all sins and their evil effects, it becomes the bestower of all desired things and the fulfiller of all wishes, and it provides Sayujya Mukti (i.e. it enables the worshipper to obtain oneness with the deity worshipped, which in this particular case is Lord Maha-Narayan to whom this Upanishad is dedicated and on whom it is named).

This Maha-Narayan Yantra is, for all practical purposes, a habitat of Lord Maha Narayan or Lord Maha Vishnu, and hence it is like his supreme abode called 'Param Vaikunth'—the supreme heaven called Vaikunth. [That is, one must regard this Narayan Yantra as an easy-to-access abode of Lord Maha Narayan. When one worships the Lord in it, the Lord becomes easily accessible to the worshipper.] (66).

[Note—¹The sixteen steps in formal forms of worship are the following—(1) Aavaahan (invoking or inviting the deity to be worshipped), (2) Aasan (giving of seat to the invited deity), (3) Paadya (offering water to wash the feet), (4) Arghya (offering water to wash the hands), (5) Aachaman (offering water to rinse or clean the mouth; a sip of water to clear the throat), (6) Snaan (giving a ritualistic bath), (7) Vastra (offering of new or freshly cleaned clothes to the deity) and Upavita (offering of the sacred thread), (8) Gandha (literally meaning a fragrance, and implying the offering of fresh sandal paste), (9) Pushpa (offering of flowers), (10) Dhupa (offering of lighted incense sticks), (11) Dipa (offering of lighted lamps), (12) Naivedya (offering of sweets and fruits along with water), (13) Tambul (offering of betel leaves as mouth-freshener), (14) reciting hymns in the deity's honour—called Mantra Pushpa (offering of flowers in the form of Mantras), (15) Pradakshina (circumambulation), and (16) Namaskaar (offering obeisance by bowing in front).]

67. The worshipper should meditate upon Lord Adi-Narayan (the primal Narayan) as being established on this Yantra. He should meditate as follows—

'The Lord is well established in the center of an immense illumination that is soaked in bliss and happiness, or that personifies the virtues of bliss and happiness.

He is beyond the reach of words (i.e. he cannot be described).

He is an embodiment of immense bliss and happiness that shines through him and radiates out from him in the form of brilliant illumination.

He has emerged from the essence known as 'Chaitanya' or pure Consciousness.

He is an image of Anand—i.e. blissfulness and happiness.

He is an image of Bodh—i.e. knowledge, enlightenment, wisdom and realisation of the Truth of the highest order.

He is an ocean of immense beauty, charm, glory, majesty and magnificence of the highest order.

He personifies the grand spiritual states of Turiya as well as Turiyateet (i.e. he represents the two transcendental states of existence of consciousness that goes beyond the mundane world and represents the true nature of the Atma because they bestow blissfulness and peacefulness).

The Lord is Advaitya or non-dual, unique, unmatched and one of his only kind.

He is supremely blissful and happy; he is a personification of the virtues of beatitude and felicity.

He is perpetually in an exalted state of Turiyateet (the higher transcendental state of consciousness), is astoundingly beautiful, charming, glorious, majestic and magnificent, and is an infinite source of high bliss, happiness, joys, beatitude and felicity.

His beauty, charm, elegance, magnificence and majesty resemble the surging waves of a river of these virtues.

His divine form is illuminated with the brilliance of electric.

Indeed, his form (body) is divine, auspicious and holy to the extreme.

He is being served by personified forms of all the auspicious, glorious and holy virtues in creation.

He is adorned by ornaments that are as glittering and splendid as the dazzle and radiance of thousands of Suns shining simultaneously.

He looks glorious with his many weapons which always accompany him. They are the Sudarshan Chakra¹ (the discus), the Panchjanya Shankh² (the conch with five stripes), the Padma³ (the lotus), the Kaumodki Gadaa⁴ (the mace), the Nandak Khang⁵ (the sword), the Shaarnag Dhanush⁶ (the bow), the Musal or the Gadaa (i.e. the mace, the pestle, the hammer, the rammer, the dumbbell), the Parigha (the spear or spike or lancet), and other such divine weapons (67).

[Note—¹The *Sudarshan Chakra*— The ‘Chakra’ (discus) is a weapon of Vishnu that is designed like a serrated wheel and is depicted as being brilliantly illuminated and glowing hot like the fire. It is also ruthless like the fire and destroys everything falling in its path. Hence, it stands for the fire element as well as the power of the Lord to destroy all obstacles. It also signifies that Vishnu is able to reduce to ashes all the corruptions and evil forces of creation. The Chakra also stands for the cosmic mind, because like the restlessness and the tendency of the mind to continuously fly from one subject to another without pause, the Chakra too keeps on revolving and flying off to pursue its targets relentlessly on the instructions of Vishnu. Further, the Chakra also is used as a metaphor for this creation which has been visualized in the form of a cosmic wheel.

This Chakra is called *Sudarshan Chakra*. The word ‘Sudarshan’ means ‘one that is auspicious, pleasing and comforting in appearance or to behold’. The ‘Chakra’ means ‘a circle or ring’ and it refers to a circular weapon which is like a round iron saw with hardened and sharp teeth. It is this invincible weapon that Vishnu uses more often than the rest to overcome the evil forces of creation.

According to legend, it was gifted to Vishnu by Lord Shiva when the latter was pleased by the former’s offering of worship to him at Kashi (Varanasi).

A great chunk of the first half of this Canto 7 is dedicated to this discus—refer paragraph nos. 3-14.

²The *Shankha* (conch) stands for the sky as well as the wind element because the conch is hollow and it makes a resounding sound when air is blown into it. This

sound represents the cosmic Naad, the background sound in ether from which, it is visualized by ancient sages and seers, that the entire creation emerged and derived its primary energy and dynamism. It is this Naad from which all forms of the languages are created, and the sound of the conch is so loud that it is heard for long distances. Hence, the sound of the conch stands for the generation and the propagation of life as well as of knowledge.

It is known as the *Panchjanya Shankha*. There is a legend associated with this *Panchjanya Shankha* (conch). There was a demon named Panchajanya. He lived in a miniscule form inside a conch at the bottom of the ocean. Once he ate the son of sage Saandipani. Lord Krishna had killed this demon, and retrieved the sage's son from the Yamloka, the abode of the God of death known as Yama. Krishna had taken this Shankha then, and it is called 'Panchanjanya' after the demon who lived in it.

The Shankha has a great symbolism when used by Lord Vishnu. It proclaims the presence of the Lord when he blows it. The sound of the conch is heard far and wide. According to some accounts, the conch alone stands for all the five elements of creation—viz. the sky, the air, the water, the fire and the earth. Now, let us analyse how the Shankha or conch stands for the five elements as observed here. The conch is hollow from the inside, indicating the sky or space element. It produces sound when air is blown into it, indicating the presence of the air element. The snail had this as its dwelling, and this snail lives in water. Thus, the conch indicates the fire element because it is this fire that helps a creature to survive even in water. The conch is formed in water and not on dry land like trees and terrestrial animals—indicating its origin in the water element. The body of the conch is hard calcium like the rocks and solid surface of the earth, indicating the presence of earth element as its integral part.

³The *Padma*—The 'Padma' (the Lotus flower) stands for the water element as this flower grows in water and cannot survive without it.

The Padma or Lotus is a symbol of purity and cleanliness amongst the surrounding filth because the dirty water of the pond where the lotus grows does not stick to the petals of the lotus flower. It also signifies the fact that the Lord accepts only the best and the auspicious from amongst all in this creation because the lotus flower grows in dirty water of the pond but is untouched by its filth. So these divine virtues of purity and cleanliness are one of the many glorious virtues of Lord Vishnu.

The word 'Padma' also refers to the origin of creation because the creator Brahma was born atop the lotus that emerged from the navel of the Viraat Purush at the time of creation, as well as the fact that the opening of the bud of the flower is an imaginative way of depicting the unfolding or the emergence of creation from the primeval water. It symbolizes the continuously evolving world because lotus springs forth from water, and this world also springs forth from the causal waters of the cosmos and then grows in the vast ethereal space of the sky.

It also regarded as being closely related to the Sun and that is why it opens up when the Sun rises, and closes at sunset. Since the light of the Sun is a metaphor for wisdom, knowledge, enlightenment and purity of thoughts and actions, the Lotus in the hands of Vishnu indicates the presence of these eclectic virtues in the Lord, or that the Lord symbolises these auspicious and divine virtues and qualities of creation.

The Padma is also a symbol of Goddess Laxmi, the patron deity of good fortunes and wealth. Laxmi is depicted in iconography as being seated on a divine lotus in full bloom.

⁴The bow called *Saarang*—This symbolizes the cosmic senses of the Viraat Purush. This bow of Lord Vishnu is also known as the *Shaankhya Dhanush* (bow). It was made from the bones of demon named Shaankhya-chuda after he was killed by Lord Shiva.

⁵The *Kaumodki Gadaa* (mace)—The Lord's 'Musal' or 'Gadaa' (mace, rammer, hammer, battle-ram, dumbbell) stands for the earth element because it is as heavy and gross as the latter. This Gadaa also stands for the cosmic intellect because the intellect is used to keep a strict control over one's wayward mind and its inherent fickleness,

over one's sense organs and their inherent restlessness etc. This signifies the ability of the Lord to be able to exercise infallible control over all aspects of creation. Being a metaphor for the intellect, the Gadaa also symbolizes the Lord's ability to separate the auspicious and the righteous from the evil and the pervert, or to forcefully subdue the evil, pervert and corrupting forces of creation symbolized by the wayward and restless mind as well as the indulgent organs of the body.

The Gadaa is known as the *Kaumodki Gadaa*. It has the following connotation. The word 'Kaumodki' consists of two parts—viz. 'Ku' meaning 'earth', and 'moda' meaning 'happiness. Hence, the mace of Lord Vishnu gives happiness to all the righteous creatures on earth by protecting them against the evil forces represented by demons.

It is called a 'Gadaa' because it was moulded from the strong bones of a demon named 'Gadaa', and hence bears his name. The demon gave up his bones to respect the wishes of the creator Brahma, who then got a mace crafted out of it at the hand of Vishwakarma, the God's engineer, and kept it with Varun, the Water God. It was given to Lord Krishna at the request of Agni, the Fire God, when the former had got the Khaandava forest consumed by fire.

⁶The *Nandak Khanga* (sword)—The word 'Nandak' means 'one which gives joy and happiness to the Gods'. The Agnipuran, Chapter 245, describes an interesting episode regarding this Nandak sword. Once, the creator Brahma was performing a fire sacrifice on the banks of river Ganges. A demon named Lohaasur (the demon with a body of iron) came to disturb it. Suddenly, a male warrior-like figure emerged from Brahma's body. He got transformed into a sword which was given by the assembled Gods to Lord Maha Vishnu who used it to kill the demon and chop his body into pieces. The Lord then accepted the sword as one of his permanent companions, and named it 'Nandak'—the one that gave happiness and joys to the Gods because it helped to kill the demon who was the cause of their troubles.]

68. The Lord's chest is adorned by the Srivatsa¹, the Kaustav² and the Vanmaalaa³.

He is perpetually in a state of extreme spiritual bliss and profound ecstasy because of the continuous falling of the symbolic flowers of blissfulness and ecstasy that occurs in the forest of Kalpa Trees that stand for the divine realm of Brahm-hood. [That is, Lord Vishnu remains perpetually in a meditative and contemplative state which provides ecstasy and bliss to him. The Kalpa Tree is the ever-green tree of Gods which is all wish-fulfilling.]

In this most beautiful and enchanting forest of Brahm-hood there are countless water-falls of sweet nectar. [This refers to the numerous instances when the spiritual aspirant has an opportunity to quench his thirst for the sense of blessedness, blissfulness, ecstasy, exhilaration, felicity and beatitude that are found upon spiritual realisation when he walks on the path leading to Brahm-hood.]

The Lord is shaded by the ten thousand hoods of the Sheshnaath, the legendary serpent. The Lord's divine form is aglow with the reflection of the glitter that emanates from the numerous self-shining Manis (gems) that adorn these hoods, as also from the glistening body of the Sheshnaath.

He is an embodiment of eternal and extreme Anand (bliss, ecstasy, beatitude, felicity) that comes with Brahm-hood, or that is the characteristic virtue of Brahm. This Anand effuses from his divine form; it drips from him in a natural way because he is saturated with it so much so that it overflows.

He is a composite image of all the auspicious, holy and divine virtues that are collectively characteristic of the supreme Brahm, or which define the exalted state of Brahm-hood.

He wears a new garland of the Tulsi leaves (leaves of the Basil plant) plucked afresh daily. This garland cheers him up and fills him with joy while making him appear fresh everyday.

He is adorned by numerous other garlands of countless varieties of flowers which are symbols of eternal bliss and happiness.

He is illuminated by continues and never-ending waves of dynamic Tej (energy, vibrancy, vitality, vigour, fire and light) that pulsate, flow or swirl around him. He is splendorous and radiant with eternal sources of immense brilliance that revolve or swirl all around him. [He appears to be surrounded by pulsating waves of energy and light that swirl around him in a ceaseless cycle. These waves of energy rotate and counter-rotate, move up and down, move out and retract, and always keep changing in intensity and depth. The Lord appears to simmer in this light, to glow in its illumination.]

He looks extremely charming and magnificent, being surrounded as he is by countless perfume sticks and lighted lamps that symbolise ‘Bodhaanand’—i.e. the bliss that comes with truthful knowledge, self-realisation, wisdom and enlightenment.

He is being served by swaying whisks that symbolise supreme and eternal forms of Anand that pulsate and swirl around the Lord continuously in waves.

All around him are countless heaps of sweet fruits that symbolise the best sort of spiritual Anand (bliss and ecstasy) that is attained upon obtaining the best form of Gyan (wisdom and enlightenment that leads to self-realisation).

He looks divine, majestic and powerful while seated in a beautiful divine Vimaan (chariot, throne, altar, shrine) having ceremonial umbrellas and flags (royal insignia, standard) to indicate his exalted stature (as the Supreme Being and Emperor of creation).

He is self-illuminated with a divine halo of immense intensity that eternally surrounds him and radiates out of his divine self.

He is established or seated in the midst of immense ‘Tej’ (i.e. the Lord is surrounded by a brilliant source of illumination and energy that is dynamic, dazzling, exuberant, vibrant and pulsating).

He symbolises the ‘Ardha Matra⁴’—i.e. the half syllable that follows the Mantra OM which is itself a representative of the supreme Brahm.

He symbolises the ‘Turiya’ (transcendental) state of existence of consciousness.

He is in the sublime form of ‘Ahahat Naad’⁵.

In fact, the Lord symbolises the Turiyateet state of existence. [The Turiyateet refers to the state of transcendental existence that is higher in its spiritual importance. It marks the higher state of Turiya, and represents the stature of extreme beatitude and felicity that comes with attainment of spiritual enlightenment of the highest order.]

He is so enigmatic, esoteric and mysterious that he is beyond description, and nothing can be said about him.

He has many subtle and sublime forms—such as Naad, Bindu and Kalaa⁶.

He is personified Atma (the pure consciousness) and embodies the spirit of the grand virtues of spiritualism with all its divine glories.

He is ‘Nirguna’—i.e. he has no specific attributes and forms; he is without any Gunas or qualities and features.

He is ‘Niskriya’—i.e. he remains aloof from the humdrum activities of this material world and does not get involved in them. [This refers to the state of Turiya as well as Turiyateet when the spiritual aspirant remains oblivious of the surrounding world around him because all the sense organs and the mind-intellect have become

defunct and irrelevant for him. It is the mind and sub-conscious that makes a man aware of any activity that is done by the body, and when the mind stops paying any attention at the inputs of the organs of perception and action of the gross body, it does not matter whether or not the body does anything. This is achieved in the higher states of spiritual progress when the aspirant has reached the Turiya as well as the Turiyateet state of existence which is also known as the transcendental state of existence of consciousness. It is the super consciousness that prevails in this state.]

He is 'Nirmal'—i.e. he is immaculate, clean, pure, holy, untainted and uncorrupted.

He is 'Nirdosh'—i.e. he has no faults, shortcomings or imperfections of any kind. He is guiltless, immaculate and pure.

He is 'Nirajan'—i.e. he is an entity that has no 'Anjan' or darkness or soot of any kind smeared over it to hide its pristine purity and glorious nature. In other words, it is faultless, flawless, uncorrupted, untainted and without any blemishes of any kind.

He is 'Nirakar'—i.e. he has no gross forms and shapes.

He has no support to prop him up; he needs no support or foundation for himself as he is self-supporting and self-founded. In fact, he is the supreme Authority that supports the rest of creation; he is the one who forms the eternal foundation of this creation; he is the base upon which the entire edifice of creation rests.

He is an image of eternal and extreme form of Anand (bliss, ecstasy, beatitude, felicity) that comes with Brahm and self realisation.

He is the supreme non-dual Absolute Truth and the holy Divinity that is known as the Advaitya principle or Brahm.

The spiritual aspirant is advised to meditate and contemplate upon this Adi-Narayan, the primal Narayan or the Maha Vishnu.' (68).

[Note—¹The *Srivatsa*—This is the mark of the foot of sage Bhṛigu which he had caste on the chest of Vishnu ones when he got annoyed upon the Lord. The Lord is so enamoured of his devotees that instead of taking umbrage at this disrespect shown by the sage and punishing him for his misdemeanour, he had blessed the sage that his footprint would always remain on his chest as one of the jewels worn by Lord Vishnu. However, Laxmi was so angry at the temerity of sage Brighu that she cursed that henceforth she, in the form of wealth and material abundance, would always shun a Brahmin; it is believed that this is the reason why Brahmins, who are otherwise of a high birth, are always serving others in the society who are junior to them by birth for their monetary needs.

²The *Kaustav Mani*—This is a glittering gem worn by Lord Vishnu, and it covers the sign of the Srivatsa. It was obtained at the time of the legendary churning of the ocean and automatically got lodged on the Lord's chest. {Mahabharat, Adiparva, 18.}

³The *Vanmaalaa*—This is a garland (mala) worn by Vishnu and is made of flowers of the forest/wild (Van). The flowers are of a wide variety with those of the Kadamba tree (*Nauclea cadamba*) being in the center or the dominant ones. Sometimes, marigold, daisy or xanthium flowers are shown as being used in this garland.

⁴The *Ardha Matras* are the half-syllables used in Sanskrit above, below, before and after an alphabet to give it a proper sound, thereby giving the alphabet a proper form and giving a meaning to the word of which the alphabet with its Ardha Matras is a constituent part. According to the Ram Uttar-Tapininiyopanishad, canto 5, verse no.40, Lord Ram has been viewed as a personification of this 'Ardha Matras'. It symbolises the fact that without him the creation loses its meaning, glory and existence even as a word loses its meaning and impact without the alphabets having proper Ardha Matras.

In the context of OM, the Ardha Matra refers to a half-syllable placed at the end of the third letter 'M' of OM in the form of a 'Halant' or a mark of an oblique line placed below M. In the symbol of OM, it is represented by a horizontal 'S' mark placed to the right groove of the symbol which represents the long vowel sound of 'Ooo' in Sanskrit (like in *boot*). Normally, the letter 'M' of the word OM is to be hummed in a prolonged sound stretching into infinity. But since it is not done and the worshipper becomes silent, it is called 'half Matra' or half syllable. It is tantamount to conclusion of the word OM, and since OM is envisioned as representing the whole gamut of creation, this Ardha Matra is symbolic of conclusion of creation. That is why it is accompanied by the universal fire of destruction called the Samvartak Agni. The Atharva-shikha Upanishad of the Atharva Veda tradition, in its Kandika 1 says that the Ardha Matra of OM represents the Moon God, the Mantras of the Atharva Veda, the Maruts (the Wind God), the Viraat Chanda and the Samvartak Agni. It is the fourth leg or Paad of Brahm and follows the third letter 'M' of OM.

⁵The *Anahat Naad* refers to the un-struck sound that is self-generated in the cosmic ether and is the one that is represented by the Mantra OM. It is from the energy generated by the waves of this sound in the cosmic ether that the dynamo of creation is powered. This cosmic sound fills up the entire space of the sky, and its presence can be verified during meditation when this cosmic sound is actually heard by the practitioner of Yoga. In the present context of Lord Vishnu it means that the Lord has no physical form with a gross body, but is in the form a subtle element, like the sound element, that is only heard of but cannot be physically seen. Like this sound, the Lord's divine existence is experienced but not seen. And like this sound, the divine form of the Lord is all-pervading, and it subtly fills up the entire space of the creation.

Refer (i) Krishna Yajur Veda's following Upanishads—Tejobindu Upanishad, Canto 1, verse no. 6; Canto 5, verse no. 2; Dhyani Bindu Upanishad, verse no. 2-3, 37 and 102; Brahm Vidya Upanishad, verse no. 20. (ii) Shukla Yajur Veda's following Upanishads—Hansopanishad, verse nos. 16-20; Mandal Brahmin Upanishad, Brahman 2, section 2, verse no. 2. (iii) Sam Veda's following Upanishads—Yogchudamani Upanishad, verse no. 80; Jabal Darshan Upanishad, Canto 6, verse nos. 3-10. (iv) Rig Veda's Naad Bindu Upanishad, verse nos. 33-36.

⁶Naad, Bindu and Kalaa—The concept of *Naad* has been explained briefly above. The word *Bindu* literally means a drop of some liquid, for instance a drop of nectar. At an advanced stage of Yoga when the practitioner is able to activate the Kundalini, control his vital winds and successfully implement other aids of Yoga such as correctly and persistently doing various Asanas, Mudras and Bandhas for a prolonged period, he would automatically experience rewards inherent to the practice of Yoga. Therefore, he would experience extreme bliss and ecstasy that would appear to drip upon his inner self and overwhelm him. His mind and heart would be submerged in enjoying this nectar that would drip drop by drop like honey effusing from a ripe and full honeycomb. This concept of Bindu in association with Naad has been used to name a special Upanishad called the 'Naad Bindu' Upanishad. Other Upanishads also deal with this subject, e.g. Dhyani Bindu, Amrit Bindu and Amrit Naad Upanishads etc.

The Varaha Upanishad of Krishna Yajur Veda tradition, in its Canto 5, verse no. 52 mentions how this Naad is heard and the dripping of Bindu experienced by the practitioner of Yoga when his Kundalini is activated.

The concept of Naad and Bindu has been explained at length in Yogshikha Upanishad of Krishna Yajur Veda tradition, Canto 1, verse nos. 105, 167, 178; Canto 2, verse no. 6; Canto 3, verse nos. 2-3, 11; Canto 4, verse no. 47; Canto 5, verse no. 28; and Canto 6, verse nos. 48-49, 71-73.

The relationship between Naad and Bindu has been elucidated in great detail in Yogshikha Upanishad of Krishna Yajur Veda tradition, Canto 1, verse no. 178, Canto 3, verse nos. 3, 11, and Canto 4, verse no. 47.

The relationship between the Bindu, Naad and the Mana has been described in Yogshikha Upanishad of Krishna Yajur Veda, Canto 1, verse no. 178, Canto 6, verse nos. 71-73.

Naad Shakti or the majestic, dynamic and profound mystical and spiritual energy, powers and potentials of Naad have been expounded in Yogshikha Upanishad of Krishna Yajur Veda tradition, Canto 1, verse nos. 105, 178, Canto 6, verse nos. 21, 48, 72.

The Bindu Shakti or the majestic mystical energy and spiritual potentials of the point-source from where the cosmic Naad is envisioned to have had its origin has been described in Yogshikha Upanishad, Canto 6, verse nos. 49, 71, 73.

In the context of the divine Mantra OM, these terms Naad, Bindu and Kalaa mean the following—(i) Naad refers to the crescent moon-like sign marked on top of the geometrical depiction of OM as the long vowel sound of ‘Ooo’ (as in the English word *moon*) in the Sanskrit language. (ii) Bindu refers to the dot placed above this Naad, and represents the focal point of the concave surface of the Naad. (iii) Kalaa refers to the changing nature of the sound that is produced by saying OM. It symbolises the fact that the entire creation, which is visualised as being completely represented by the word OM, is ever changing. Since OM is a Mantra for Brahm, the cosmic Consciousness that is also known by another name of Pranav, it follows that the composite structure of creation that is completely represented by the completed form of OM, with its Naad, Bindu and Kalaa, is nothing but the Lord’s cosmic gross body.

The word *Kalaa* means an aspect of anything. The Kalaa in the context of OM—In the geometrical symbol of Brahm which is pronounced as ‘OM’, these three Naad, Bindu and Kalaa appear as a crescent moon or a shallow bowl with a dot at the center placed on the top of the symbol for OM. This Naad is like a big trough and represents the cosmic bowl or crucible in which the primary cosmic gel was placed to initiate the process of creation. The Bindu appears to indicate the pin-point source of heat, radiation or any other activating source placed just above this crucible to inject sufficient energy in to the primary fluid and activate it. It acts like a source of energy directed at the crucible (Naad) set off the chain reaction that would ultimately culminate in the creation. The Kalaa which refers to the various phases of the moon would indicate the different stages through which the entire process passed from the initial stages of creation to its complete closure. But even as the parents of a child do not undergo any apparent change while the embryo develops in the mother’s womb, the Supreme Being remained the same all the while the creation developed and unfolded in the cosmic womb represented by Mother Nature. Another example to explain is the moon’s disc which appears to change every single day but all know that it remains the same, and the apparent change in its shape is only due to the angle with which its lighted or dark surface is viewed from the earth.

The Dhyani Bindu Upanishad of Krishna Yajur Veda tradition, in its verse no. 13 proclaims that OM has eight Kalaas or facets or parts. They are the letters A, U, M, Naad, Bindu, Kalaa, Kalaa-teet and Param.]

69. The ‘Maha Narayan Yantra’ that has been described above in this Canto is a provider of Moksha or final liberation and deliverance. It is a living embodiment of the Supreme Being known as Tripadvibhuta Maha Narayan (69).

-----*****-----

Uttar Kand—Canto 8

[This Canto essentially describes the following topics as a sort of summary of the preaching of this Upanishad—(i) the non-dual or Advaitya nature of Brahm (paragraph nos. 1-3), (ii) the four Paads of Brahm (paragraph no. 4), (iii) the proclamation, called the Mahavakyas, of a Brahm-realised person (paragraph nos. 5-6), (iv) the attainment of Mukti (spiritual liberation and deliverance), (v) the two great forms of Yoga, viz. Saalamba and Niraalamba (paragraph nos. 8-9), (vi) the importance of Bhakti or devotion (paragraph no. 12), (vii) how to have the knowledge of the Param Tattva (paragraph nos. 13-14), and (viii) who a true Guru (teacher) is, and his importance.

This Upanishad concludes by emphasising the profound spiritual benefits or rewards one gets by studying and understanding the great teaching of this Upanishad, and implementing them in practice.]

1. The great grandfather of creation, Brahma, asked Lord Maha Vishnu—‘Oh Lord! How do we reconcile between the two opposite forms of yours—one that says that you are the Advaitya Brahm (the non-dual philosophy of Vedanta that basically states that the cosmic Consciousness and the Absolute Truth of creation are unequivocally one and not two, and that Brahm, a term used to encompass both, is therefore also one and not two; this Brahm is indivisible, immutable, all-pervading, invisible, most sublime and subtle, has no forms, characteristic features and attributes, etc., and since everything in this creation is nothing but Brahm in its form, it follows that each unit of creation is fundamentally the same as the other), and the other that describes many Vaikunths (the numerous abodes of Lord Vishnu), Bhavans (buildings; various Lokas or worlds), their surrounding walls, Vimaans (chariots, altars, shrines, spires or steeples etc.) and other such things which have different gross forms, varied shapes and sizes, and a physical existence (as described in the concluding paragraph nos. 15-17 of Canto 5, and the whole Cantos 6 and 7 of this Upanishad)?’ (1).

[Note—In this context, refer to Canto 1, paragraph nos. 4, 6, and Canto 2, paragraph nos. 1-8, 11 which also deal with the same question.]

2. Lord Vishnu dispelled his doubts by replying—‘What you have said is correct. I’ll explain it to you by citing examples.

Just like ‘pure gold’ can have many forms such as a wrist-band, a crown, an arm-band etc. without disturbing the inherent nature and intrinsic quality of the metal known as ‘gold’ (in other words, none of these forms affect the fundamental nature and quality of the metal known as ‘gold’ with the atomic number 79 just because gold has changed its shape and cast into various designs by the goldsmith), just like the ‘water’ present in the ocean assumes so many varied forms such as small and large waves, froth, bubbles, hail that falls from the sky, salty water, ice etc. without changing its own basic nature and characteristic quality (in other words, none of these forms would in any way alter or affect the basic molecular structure of water which essentially consists of two atoms of Hydrogen and one atom of Oxygen—H₂O), just like ‘earth’ retains its basic characteristics, its fundamental qualities and its intrinsic value inspite of having so many varied external features as marked by the presence of innumerable mountains and hills of all imaginable contours and dimensions, countless varieties of plants such as large and sturdy trees or the humble grass, shrubs and creepers (in other words, though the earth is punctuated by so many varied external features, though it displays such diversity in its external form, its basic structure of being a round globe made of the element known as ‘earth’ is not at all compromised)—in the same way, all the forms that I take in this creation are basically

the various revelations of my one fundamental universal form which is the non-dual form, the one that is called 'Advaitya Brahm'.

All the myriad forms that are seen in this creation, all the variety that is observed in this creation, all the numerous contours, shapes, sizes, colours and forms that this creation takes are nothing but my own form, simply because the entire creation is nothing but 'me' revealed in its form.

Not a single atom exists that is not 'me'. Or, if it had not been for me, there would have been no creation in existence now. [In other words, even the minutest of things as well as the most colossus of things are nothing but 'me' revealed in these forms. Nothing exists without 'me'. The pronoun 'me' stands for the Supreme Being known as Brahm, the cosmic Consciousness and the Atma or true 'Self' of creation.] (2).

3. The great grandfather Brahma asked again—'Oh Lord! It is said that 'Param Vaikunth' (the supreme heaven or the abode of Maha Vishnu) is the 'Param Moksha' (the ultimate goal that the spiritual aspirant strives to reach in order to find final liberation and deliverance for his soul)¹.

Everywhere, in all the scriptures, it is universally said that 'Param Moksha' is only of *one* kind, and hence its Anand (bliss) should also be of one kind. Then how come there are so many Vaikunths and so many oceans of Anand etc. (as described by you in earlier Cantos while you were describing the journey of the aspirant through many heavens as he rose higher and higher to reach the Param Vaikunth)? (3).

[Note—¹The same question has been answered in a different way in Canto 1, paragraph nos. 4-6; Canto 3, paragraph nos. 2-7; Canto 4, paragraph nos. 1-13; Canto 5, paragraph nos. 1-14.

The *Vaikunth* is the abode of Lord Vishnu, and therefore the *Param Vaikunth* is the supreme abode of the Maha Vishnu, Supreme Being. It refers to the divine abode where Maha Vishnu or the Adi Narayan resides. If the Supreme Being is one, and if Vishnu is to be regarded as the Supreme Being, then the question arises why are there so many Vaikunths as narrated in Canto 5, paragraph nos. 15-16, Canto 6, paragraph nos. 1-20, and Canto 7, paragraph nos. 1-14 which describe a number of Vaikunths that the spiritual aspirant crosses before he reaches the ultimate destination of the Param Vaikunth described in Canto 5, paragraph no. 17, Canto 6, paragraph nos. 21-22, and Canto 7, paragraph nos. 16-21.

The reason why there is so much confusion about the truthfulness of Brahm is given in Canto 4, paragraph no. 8-13; and Canto 6, paragraph no. 12-14. Essentially it states that it is the Maha Maya (the great delusion creating powers of Brahm) and Avidya (ignorance or lack of knowledge of the ultimate Truth) that is the root cause of all confusions and perplexities.

The *Param Moksha* is the final liberation and deliverance of the Jiva or the living being, the ultimate salvation and emancipation of the soul. When this spiritual destination is reached, there is no re-birth and its consequential horrors. The Param Moksha has been described in the context of the Param Vaikunth mentioned above in Canto 5, paragraph no. 17, Canto 6, paragraph nos. 21-22, Canto 7, paragraph nos. 16-21, and the Canto 8, paragraph nos. 1-7.

The Param Moksha in the simple terms of Vedanta is that stage in the spiritual journey or search of a man for his final resting place when his individual 'self', his Atma which is pure consciousness, recognises who it is, and then merges with the parent, the cosmic 'Self', the Supreme Atma of creation, the cosmic Consciousness from it had somehow separated out of ignorance and delusions. This removes any distinction between them, and with this merger the individual Atma loses its independent identity to become the universal Atma. The individual Atma becomes one with and inseparable as well as indistinguishable from the universal Atma known

as Brahm. This achievement is Brahm-hood. It is self-realisation that leads to Brahm-realisation.]

4. 'It is alright', said Lord Vishnu, and continued with his explanation. 'Thousands of Brahmaands (universes or worlds) are said to exist in only one Paad of Brahm known as the Avidya Paad. [Refer Canto 1, paragraph no. 5; Canto 4, paragraph nos. 2-6; Canto 6, paragraph nos. 2-14. The Avidya Paad is the lowest aspect or limb of Brahm, and as the name suggests, it has a preponderance of Avidya or lack of truthful knowledge. Anything that is based on falsehood is obviously bound to be false itself. This is why this world is characterised by the presence of delusions, confusions, doubts, perplexities, schisms and dichotomies.]

Even as the presence of countless worlds do not affect the basic characteristic of the fourth Paad of Brahm as being dominated by Maya (delusions) and Avidya (ignorance and lack of knowledge of the Truth), the presence of countless Lokas (worlds), numerous Vaikunths (heavens) and as many countless Vibhutis (glorious virtues and magnificent aspects of this creation) in the 'Anda' (the cosmic egg; the greater Universe) do not affect its basic nature and virtue (which is that it harbours the magical spark of life called 'consciousness' that cannot be defined or replicated).

All the Brahmaands have countless Lokas and Vaikunths, and all of them are accepted by the scriptures. [And this is why this present Upanishad has enumerated many Vaikunths and other Lokas in earlier Cantos while it narrates the journey of the spiritual aspirant to the supreme Vaikunth where he would finally find his Param Moksha. The Upanishad unequivocally stresses that Brahm is 'Advaitya' or non-dual, and that there is therefore only one type of 'Mukti' or liberation and deliverance, and it is known as the Kaivalya Mukti. Getting rid of falsehood is tantamount to attaining this Kaivalya Mukti, because then the spiritual aspirant would realise that Brahm is to be found no where in the sky but inside his own 'self' as the pure consciousness known as the Atma. This knowledge is enlightening and 'Bodh' of the highest order. It culminates in self and Brahm realisation. It is true form of Mukti, because then Brahm is attained most easily as this cosmic Consciousness is very close to the seeker as it resides in his own bosom. True Mukti would be the merger of the individual's own soul with the cosmic Soul so as to become one with it. This fact is endorsed and stressed in the present paragraph.]

When this is the state of affairs of only one Paad of Brahm known as Avidya Paad, then one can well imagine the situation of other Paads as well—they would also be the same. [The other three Paads are known as (i) Vidya Paad or Gyan Paad, (ii) Anand Paad, and (iii) Turiya Paad—refer Canto 1, paragraph no. 5; Canto 4, paragraph no. 3, 6.]

The emergence of an extreme sense of vibrant Anand (surging and uninhibited spiritual bliss, ecstasy, beatitude and felicity) is the hallmark of Moksha (spiritual liberation and deliverance; salvation and emancipation). [When one reaches one's avowed destination after an arduous journey and great efforts, overcoming numerous temptations, troubles, distractions, hurdles and handicaps en-route, it is natural and obvious that unbound exhilaration and profound ecstasy would overwhelm him when success is finally achieved. So, the spontaneous sprouting of extreme Anand is a sign of the spiritual aspirant having attained Moksha.]

Since extreme Anand is obtained in all the three Paads of Brahm, they are all equivalent to the 'Param Moksha Dhaam'—i.e. to the supreme destination of the soul where it finds freedom from the horrors and torments of this world.

All the three Paads are equivalent in nature to the Kaivalya state of existence. [The word Kaivalya refers to non-dual existence because literally it means ‘one of its kind; the only one’. Since only the Absolute Truth can be ‘Kaivalya’, it follows that these three states of Brahm are the ‘truthful’ form of Divinity. Again, since Brahm is synonymous with ‘consciousness’, it also follows that Anand is the only true state of existence or the natural state of consciousness. Any other state that is not Anand is therefore not the truthful and natural state of existence of consciousness. Since ‘consciousness’ is the ‘true self’ of the spiritual aspirant, when the latter finds Anand he is deemed to have found out who or what his ‘real and truthful self’ is, and then he discovers the universal Atma or soul which is his ‘true self’. This Atma is eternal, imperishable, blissful, enlightened and always liberated. It is a sublime and subtle entity, and not the gross body with which the aspirant had identified himself all along till the time he had made this discovery. It is the body that suffers, that does deeds, gets entangled in the world because it relates to its gross aspects and sense objects, and not the Atma which is distinct from the gross body and separate from it. When the spiritual aspirant thus becomes ‘self-realised’, he is filled with Anand. This ‘self-realisation’ is a metaphoric way of saying that the aspirant has reached the ‘Vidya Paad or Gyan Paad’ of Brahm. Since he is filled with ecstasy and feels exhilarated, he has also reached the ‘Anand Paad’. When he has become firmly established in these two Paads and there is no scope of his ever reverting back to the first Paad of Avidya, it is said that he has reached the Turiya Paad of transcendental existence. Spiritually speaking, he has obtained ‘Moksha’, or he has obtained liberation and deliverance from the troubles that are caused to him due to horrible delusions and ignorance that had swirled around him while he was still in the world and confused about the Truth—i.e. till he was living in the ‘Avidya Paad’ of Brahm.]

In this eclectic higher state of existence of consciousness, everything becomes full of Anand, i.e. the aspirant is so detached from the world in higher states of spiritual realisation that he is oblivious of anything that may be the cause of any kind of misery, pain, grief, agony, distress, tribulation or trouble for him. As a result, he is always submerged in an endless ocean of Anand—or bliss, ecstasy, beatitude and felicity unbound. With this attainment, he is unconcerned with anything else; he becomes oblivious of anything else.

Hence, he always experiences the vast expanse of the eternal and truthful Brahm’s equally eternal and truthful Anand, with its countless shades of ecstasy and bliss that this realisation brings in its wake, spread all around him. In other words, he observes Anant Vaikunths (i.e. Vaikunths that have no end, and are therefore eternal) and Anant oceans of Param Anand (i.e. endless oceans of supreme bliss) flowing endlessly through this Vaikunth. [This stanza basically repeats what has been said above to stress the point in a metaphoric way.] (4).

5. When the spiritual aspirant reaches that divine abode (i.e. the Param Vaikunth as described in paragraph nos. 1-20 of Canto 7) and meditates upon the divine form of the Lord (i.e. of Adi-Narayan as described in paragraph nos. 67-69 of Canto 7), he bows before the Lord, performs circumambulation, worships the Lord in various other ways, and obtains or experiences an extreme sense of bliss, happiness and contentedness.

He sits down calmly and focuses his attention on the primarily Advaitya (non-dual) aspect or nature of the Lord (Adi-Narayan). [That is, he gathers himself to concentrate his attention and mind on one single aim of his life, which is to obtain the Absolute Truth that is always ‘one’ and not more than one. So he tells himself to

forget about all the different types of charming scenes and worlds that he had encountered on his way to this ultimate goal of life. These scenes and worlds were caused by Maya and Avidya, and are equivalent to the different temptations proffered by the Devil to divert the man from his chosen spiritual path]

While specially meditating and contemplating upon this universal and uniform Truth (i.e. Brahm or the Supreme Being; here referring to the cosmic Consciousness also known as the Atma) that is Advitya by nature, he is filled with an immense sense of spiritual fulfilment and bliss. This divine experience that comes with being realised and enlightened is very dynamic and vibrant, and it drowns the aspirant in nectar of 'Bodhaanand'—i.e. fills him with extreme Anand (bliss, ecstasy, beatitude, felicity and joys) that come with Bodh (enlightenment, wisdom and awareness of the Truth). [This is because the spiritual aspirant has finally attained his much cherished dream and objective in life.]

Being thus self-realised, Brahm-realised and enlightened about the Truth, he repeatedly remembers the Maha Vakyas (the great sayings of the Vedas and the Upanishads) and exclaims or proclaims—

'Brahmaasmi' or I am Brahm; 'Ahamasmi' or Indeed it is I/me; 'Brahmahamasmi' or I am indeed Brahm; 'Yoahamasmi' or That is I/me; 'Brahmaamashmi' or Brahm is I/me; 'Ahamevaaham' or I am indeed I/me. [These statements obviously establish the fact that the spiritual aspirant has become steeped in the eclectic philosophy of Advaitya Vedanta which stresses on the non-duality and uniformity between the individual 'self' or the Atma and the cosmic 'Self' or the Brahm. This is because both are 'consciousness' existing in different planes of existence, one is known as the Jiva and the other is called Brahm. Fundamentally there is no difference between the two. Refer Canto 6, paragraph no. 22.]

'I am burning 'Ahantaa' (the false notion of duality and distinction between two aspects of the same thing) by offering it to the sacred fire. Swaha!' [The word 'Swaha' is uttered when one makes offerings to the fire during formal fire sacrifices. Here, the aspirant is eliminating all his doubts and confusions about Brahm by symbolically burning doubts and confusions in the fire.] (5).

6. When the spiritual aspirant is firmly established in the belief that 'I am Brahm', it is then that he is filled with immense Anand, is spiritually cleansed, and is fully contented and fulfilled. In that event, he is naturally attracted towards 'me' and finally merges in 'me' who am the supreme Brahm in the form of Narayan.

Just like the swirling and rapidly flowing water of great rivers gush into the ocean to become one with it, and just like huge dynamic waves that rise from the surface of the ocean with immense force fall back into the same ocean to vanish forever, the self-and-Brahm-realised aspirant enthusiastically exclaims 'I am a personification of Sachiddanand' (i.e. I am the truth, consciousness and bliss personified), 'I am Ajanmaa' (i.e. I do not have a birth as I am eternal and imperishable), and 'I am Paripurna' (i.e. I am fulfilled and fully contented, I have no desires whatsoever left) and sheds his individuality to become one with and indistinguishable from 'me', the supreme Brahm known as Adi-Narayan.

When this comes about, the spiritual aspirant turns into an ocean that is calm and quiet, having no surging waves. He becomes an ocean of peace and tranquillity himself.

He becomes a symbolic base and an endless ocean of Advaitya. [That is, he is firmly established in the eclectic notion of non-duality, and no matter how many surging rivers representing different schools of thoughts and philosophies come

thundering towards him, they cannot disturb his state of spiritual bliss, peace, tranquillity, quietude and serenity. On the contrary, they themselves undergo a change and lose their various independent identities as distinct philosophies to become 'Advaitya' or uniformly 'one' themselves. This can be explained by a simple instance—so many rivers come thundering towards the ocean, but when they fall into it they all become one like the ocean. The ocean does not lose its identity, but the rivers do.]

He becomes an ocean of truth, consciousness and bliss—collectively called 'Sat-Chit-Anand (6).

7. Any person who follows this path as described above and implements its principles in life is certain to become one with Narayan¹. [That is, he would obtain the form of Mukti, or liberation and deliverance from this body and world, by dissolving his own identity and becoming one with the Lord known as Narayan. In terms of Vedanta, he would merge his soul with the cosmic Soul known as Brahm, never to take a new birth again, and thereby getting rid from all the horrors and miseries that are associated with the soul having to reside in a gross body that suffers and dies, as well as the having to deal with the countless delusions and temptations presented by this artificial world of material sense objects.]

All great hermits, ascetics, sages and seers have obtained Mukti (final liberation, deliverance, salvation and emancipation) by diligently following this hallowed path. Indeed, countless realised ascetics have obtained mystical powers (i.e. have reached higher levels of spiritualism and accessed great mystical authority and potentials which helped them to reach their destination of finding Mukti without hindrance) by following this acclaimed spiritual path.' (7).

[Note—¹Refer Canto 1, paragraph no. 6; Canto 2, paragraph no. 12; Canto 5, paragraph no. 17; and Canto 6, paragraph no. 22.]

8. [Lord Vishnu cites an instance of some other disciple asking his Guru some pertinent question, and uses this discourse to explain further to Brahma the doctrines about Brahm that have been elucidated upon in this Upanishad.]

After hearing the above discourse, the disciple asked the teacher—'Oh Lord! What are 'Saalamba' and 'Niraalamba' Yogas?' (8).

[Note—The word *Aalamba* means to take support of, to rely on, a prop, a stay, a reason, a dependence upon something, an object which helps to support some other object.

The word *Yoga* means to bring about a union or to establish uniformity between two separate entities. In the context of the spiritual aspirant's desire to find Mukti by worshipping his chosen deity, Yoga would mean an instrument or exercise that helps him to obtain his cherished aim or goal of obtaining access to or obtaining nearness with the deity he adores and worships. Since the deity worshipped in this Upanishad is Adi-Narayan or Maha Vishnu representing the supreme Brahm, the particular effort or path followed to reach this deity would be by the aspirant's Yoga.

Hence, Saalamba Yoga is defined in paragraph no. 9, and Niraalamba Yoga in paragraph no. 10-12.]

9. [The teacher replied—] 'The 'Saalamba Yoga' is that in which the spiritual aspirant focuses his attention or meditates upon (i.e. takes the help of) an image of the worshipped deity to reach his spiritual destination while remaining aloof from all humdrum activities of the gross world which might be a cause of any kind of

distraction or diversion for him. [The word 'Saalamba' means 'with a help; with an aid'.]

This image of the chosen deity has a certain form, such as the one which has a holy feet and a certain countenance.

So, an aspirant who chooses this path towards his spiritual destination meditates upon an image of the deity he worships and focuses his attention on its holy figure, especially the feet, or even on its divine halo and general countenance. [That is, he takes the help of an image to reach his destination of being close to the Lord he worships. This image is just an 'image' of the principal Lord, and not the Lord himself. It just helps the aspirant to concentrate his faculties on the Divinity he worships; it is like a prop that helps him to stand up and walk up to his desired goal in life, but not the goal itself! This method has been devised by the scriptures to make something that is very enigmatic, mysterious and esoteric to come within reach of and become accessible to an ordinary aspirant.] (9).

10. The 'Niraalmaba Yoga' is that when the spiritual aspirant becomes completely neutral and disassociates himself from all things physical and gross by their nature. Hence, he discards with a large barge-pole all such formal processes of reaching his spiritual destination such as worshipping a deity or its image having a name and form by adopting certain formal forms of activities that are ritualistic, obligatory and mechanical in nature. [The word 'Niraalamba' means the opposite of Saalamba. Therefore, it means 'without a help; without an aid'.]

He even pays no attention to the natural inclinations of his Anthakaran (i.e. his mind, intellect, sub-conscious and ego) that may advise him to the contrary. [For instance, his mind may suggest to him to worship this and that, to go here and there on a pilgrimage, to do this or that deed that can be spiritually beneficial for him, and so on simply because so many people are doing it from immemorial times and therefore logically there must be some benefit in doing so or there must be some truth in it. Then his ego might compel him to do some specified deeds such as holding large religious ceremonies to establish himself as a religious man in society. But a truly wise and enlightened man is he who just smiles and looks the other way from such superficial and hollow activity. He neglects all such prodding of his Antahakran, his inner voice that has unfortunately been influenced by misconceptions and wrong advice, and instead steadfastly follows the path he has fixed for himself after due diligent research and as advised by the scriptures. The point to note here is that the importance of doing proper research in order to choose the correct path is not to be underestimated or undermined by wrongly interpreting this edict of the Upanishad. What is intended here is that once the path is selected after due diligence, once one has devoted sufficient time and energy to select the path to be followed by him that would be most beneficial for his spiritual welfare and provide him with Mukti and Anand, one must then stick to it without dithering, without being uncertain of it or its benefits or where it would lead him. He should not pay attention to so many distractions that come in his way, because if he does he would make himself a breeding ground of utter confusions and bewilderments of immense dimensions. It is this single-minded pursuit of the desired goal that can help the spiritual aspirant to find Mukti or liberation and deliverance from this ocean-like world in the limited time of one life-span he has to his disposal.]

This is called 'Niraalamba Yoga'—or the effort made to reach the spiritual destination without taking any help from any external medium.' (10).

11. [The disciple wondered—] ‘If the Niraalamba Yoga is so difficult or abstract (because it circumvents the need or avoids the use of any physical means to worship the chosen deity), say how can one implement this Yoga with success? Who is eligible or competent to follow this path? What are his special qualities?’ (11).

12. [The Guru removed his doubts by replying—] ‘A person who possesses the noble virtue of not having any trace of Ahankar or false pride and ego in him (i.e. who is humble and simple-hearted), a person who has realised that the Tattva (the essence, the truth) he is pursuing is eternal and imperishable, that this Tattva is the pure consciousness that resides in his own self as the Atma rather than anywhere outside, that this Atma is of a very subtle and sublime nature, that it cannot be physically verified or grasped like the material sense objects of this world but can only be experienced and witnessed at the subtle level of existence, that this Atma is a microcosmic image of the cosmic Atma known as the Parmatma, the Supreme Being, whom he wishes to attain, that junking of the delusions created by the numerous misconceptions in this world is the only way to successfully reach this goal, a person who has inculcated other such noble and wise thoughts—such persons are eligible to follow the path of Niraalmaba Yoga. In other words, only a person who has acquired truthful Gyan is eligible and competent to follow and attain success in the path of Niraalamba Yoga. But it is extremely rare to find such a person.

Hence, it is said that the spiritual path of ‘Bhakti Yoga¹’ to obtain Mukti is an excellent and the easiest path to follow irrespective of the fact whether the candidate is eligible or ineligible for following the path of Niraalamba Yoga.

Bhakti Yoga is without any discernible hurdles or big obstacles that may be too difficult to overcome. Bhakti Yoga bestows Mukti—i.e. it helps the spiritual aspirant to obtain liberation and deliverance, emancipation and salvation.

Devotees or the followers of Bhakti Yoga are able to obtain ‘Tattva-Gyan’ or knowledge of the essential Truth, without much effort or delay.’ [In other words, they can experience the Anand, or the spiritual bliss that comes with awareness of the essential principle of creation, the ‘Tattva’, that becomes known upon self-realisation and Brahm-realisation much easily even without having to unduly exert themselves or follow stern doctrines. When a person reaches the spiritual goal of Brahm-realisation, he enthusiastically proclaims the statements called the Mahavakyas as narrated in paragraph nos. 5-6 of this Canto 8. It marks the culmination of his spiritual journey.] (12).

[Note—¹It is easy to follow the path of Bhakti Yoga, or having devotion for and submission to the chosen deity as a means to attain Mukti, or liberation and deliverance from this world, from the gross body, from the cycle of birth and death, and from the accompanying endless cycle of miseries, pains, sorrows, troubles and torments.

Hence, it is usually prescribed as the general and easy method for obtaining Mukti as it would be effective whether or not the concerned person is sufficiently fine-tuned mentally, intellectually and emotionally to follow the more evolved and powerful, but rather complex and arduous path of Niraalamba Yoga, thinking it to be too abstract and difficult to be followed by them.

On careful examination we see that there is a subtle difference between all the three types of Yogas prescribed in this Upanishad for attaining Mukti. In Bhakti Yoga complete devotion, faith and submission is expected for a single diety of choice of the spiritual aspirant. In this, it is similar to the Saalamba Yoga because it takes the help of some form of deity to whom the seeker of Mukti surrenders himself and has devotion for.

Pure form of Saalamba Yoga involves many sorts of ritualistic practices such as doing fire sacrifices, observing sacraments and chanting of Mantras, undertaking formal forms of worship using Yantras and Chakras described earlier in this Upanishad, honouring a plethora of Gods and Goddesses, doing charities and other noble deeds, and so on and so forth. These follow a set pattern, whereas in Bhakti Yoga the devotee can worship his deity the way he wants—he can treat his God as his son, his friend, his beloved, his life-partner, his Lord, his Guru, etc., and go about devoting himself to the chose deity accordingly. This freedom of approach is denied in the rigourous form of Saalamba Yoga which relies on formalities and strict observance of rules and tenets. Therefore, Bhakti is informal while Saalamba is formal.

The Niraalamba Yoga, on the other hand, does away with all externals completely. It needs no external forms of deities to whom worship is offered, nor does it need formal excercises such as the fire sacrifices. It has the dominant role of Gyan—pursuance of truthful knowledge and the path shown by it. It is mind-centric because it revolves around knowledge, erudition, wisdom and enlightenment. Here the intellect and the mind play the dominant role instead of the gross body that played the main role in Bhakti Yoga and the Saalamba Yoga. The Niraalmaba Yoga uses Gyan as a tool to achieve Mukti. This is of course the path of meditation and contemplation that leads to self and Brahm realisation.

In practice, a wise man is one who employs a judicious mix of all the three forms of Yoga to reach his spiritual goal. It's like a man employing many modes to reach his chosen destination—he treks, hitch-hikes, rides a horse, takes a boat, at times swims, and may adopt any convenient method that is handy for him. His main objective is to reach the destination.]

13. [The disciple wished to know more about this Tattva Gyan, so he enquired]—
‘How can one have this Tattva Gyan?’ (13).

14. [The learned teacher replied in order to enlighten him—] ‘The Lord who loves all his devotees very much himself ensures that all their spiritual hurdles are effectively removed. He protects them from all the troubles or nuisance created by the numerous obstacles that the devotee might face, and which may cause harm to him or hinder his spiritual progress.

The Lord gives them all that they want; he provides the devotee with Moksha or final and ultimate liberation, deliverance, salvation and emancipation.

[On close examination, these three statements that the Lord removes all hurdles faced by the devotee, fulfils all his desires, and provides him with Moksha has another meaning. It is that the Lord takes upon him the responsibility of ensuring that the path of the devotee becomes smooth and easy, that he is not subjected to undue harshness and inconvenience, that all his basic needs are taken care of, and that he graduates to reach the spiritual destination of Mukti or Moksha even if he is not up to the expected mark or standard. It is like the doting father taking care of his dear son and ensuring his comfort along with taking care of his future needs in life by giving him proper education and training. If the son is mentally not so smart, the loving father would take a little bit extra care of him as compared to another son who is of first-rate mental capabilities and able to fend for himself. Likewise, if the devotee is less than competent, the Lord holds him by the arm and helps him on along the path leading to Mukti. This is the benefit of following the path of Bhakti Yoga. When the devotee has surrendered himself to the Lord, when he is totally dependent upon the Lord for his well-being, it becomes the moral obligation of the Lord to take care of

him. The devotee henceforth becomes carefree just like a child is in the care of its doting parents.]

As compared to this situation there is the other optional path that leads to Mukti, and it is the path of Niraalamba Yoga wherein the aspirant is left to fend for himself much like the case of an intelligent son who is left to fend for himself by the father who diverts all his attention to the less privileged son.

This is the simple reason why Bhakti Yoga is preferable to the other path of Niraalamba Yoga.]

In the absence of Bhakti for Lord Vishnu, even the exalted and learned Gods such as Brahma (the creator who had produced the Vedas which are repositories of knowledge) can not expect to find Mukti in millions of years or countless births.

Since there can be no 'Kaarya' (affect, development, action leading to some situation, some proceeding or transaction) without a corresponding 'Kaaran' (an inspiration, a cause, reason or motive), it follows that without Bhakti (devotion for the Lord, the Supreme Being; or steady desire to obtain Mukti and Truth) there can be no Brahm-Gyan (knowledge or awareness of Brahm; Brahm-realisation) which is a synonym for 'Tattva Gyan' (knowledge of the essence, the Truth), along with its attendant Anand (or bliss) and Mukti (or spiritual liberation).

[In other words, Bhakti motivates the aspirant to move closer to his chosen and beloved deity to whom he is fully devoted and committed, which in this case is Adi-Narayan or Brahm. When he single-mindedly pursues his spiritual objective, he would discover all about this Brahm because he is determined to do so. He would be able to discover that the Lord whom the world has been searching elsewhere is secretly enshrined in his own subtle heart as the Atma, and that there is no need to make strenuous efforts and exert one self to meet this Lord. The Lord is available at all times even without observing any formalities and time limitations by simply turning inwards and meditating. Why would the man, who has discovered the priceless gem hidden in his own pocket, not exult in joy, exclaiming 'Eureka'. This is exactly what happens with the follower of Bhakti Yoga. He discovers Brahm, and this leads to his Mukti or Moksha much more easily and conveniently. It is Bhakti which is the cause of his attaining Mukti and Brahm-Gyan.

Hence, Bhakti is the 'Kaaran', or the inspiring factor or the cause that leads to the spiritual aspirant attaining Mukti/Moksh. The attainment of Mukti or Moksha would be the effect or the result of having Bhakti. Similarly, Bhakti is also the motivating factor that inspires the aspirant to obtain Brahm-Gyan or knowledge of the truth and the reality of everything that is associated with the term 'Brahm' (the Supreme Being, the cosmic Consciousness, the supreme Atma known as the Parmatma) because he would like to know more about the Lord whom he worships and adores so lovingly. This attainment of Brahm-Gyan would be the spontaneous effect, result, or the 'Kaarya' of Bhakti.]

Therefore, you (the disciple) should abandon all other methods and take the shelter of (i.e. adopt) Bhakti as the chosen path. Be diligent and steady in Bhakti. I (the teacher) repeat—adopt Bhakti as your chosen path, and be steady in it. All the 'Siddhis' (mystical powers and spiritual achievements) are easily and conveniently available by following the path of Bhakti. There is nothing that cannot be achieved or attained by Bhakti.' (14).

15. Hearing this profound discourse from his Guru, being acquainted with the glorious aspects and all the secrets of the Param Tattva (i.e. the supreme Truth about Brahm along with its many esoteric aspects, secrets and doctrines), removing all his doubts

and setting to rest all causes of perplexities and confusions, and fully convinced and determined that he would now easily and very soon find Moksha (final liberation, deliverance, emancipation and salvation), the disciple got up, fully contented and fulfilled.

He performed circumambulation around the Guru, bowed before him with utmost respect and reverence, worshipped him properly, took the Guru's permission and achieved a matured state of existence with self and Brahm realisation. In other words, he obtained matured Vigyan or full fledged knowledge of the Truth and Brahm; he became highly enlightened and awakened.

The disciple soon transformed and became one like Lord Narayan himself when he gained this profound knowledge and enlightenment even without making much effort on his part (15).

16. Lord Maha Vishnu turned towards Brahma and said—‘Oh Brahma! I have told you everything about the Param Tattva. One can find Moksha even by remembering it, by pondering over its profoundness and greatness. By pursuing it, everything that is unknown and secret becomes known and de-mystified.

That by knowing which even the most esoteric and mysterious becomes easily known and accessed, I have disclosed all about this ‘Param Tattva’ to you.’ (16).

17. Brahma asked—‘Who is a Guru¹?’

Maha Vishnu replied—‘The Guru is a personified form of Lord Adi-Narayan. That Adi-Narayan is none but ‘me’. [In this context, refer Canto 5, paragraph no. 11-12.]

Hence, you should take refuge in my holy feet only (instead of exploring so many other avenues for finding your spiritual destination). Be devoted to ‘me’, and be steady and firm in it. Worship me and meditate upon ‘me’. In this way, you would attain ‘me’ (i.e. the Supreme Being; you would attain the holy stature of being truly Brahm-realised or reaching Brahm-hood).

Indeed, anything other than ‘me²’ is to be abandoned; it is a hindrance and an impediment in one's spiritual success, and attainment of glory and divinity. There is nothing except ‘me’ that is truthful and having any essence. [This is because anything except ‘me’ or ‘I’ is un-truth and therefore worth not paying any attention to by a wise man.]

It is ‘me’ who is a personification of eternal and extreme Anand (spiritual bliss, ecstasy, beatitude and felicity) that is unique and unmatched in this world.

It is ‘me’ who is complete in all respects.

It is ‘me’ who is the basis of everything in this creation; ‘I’ am the foundation that supports everything in this creation.

It is ‘me’ who am the ‘Nirakar Param Brahm’ (the formless and attribute-less supreme transcendental Brahm) that is beyond the reach and purview of the faculty of speech. [That is, words cannot describe ‘me’.]

Not even an atom exists that is separate, different or distinct from ‘me’. Or in other words, not a single atom or unit of creation can be said to have an existence that is not one of my countless forms.’ (17).

[Note—¹Refer also to Canto 5, paragraph no. 11-12 of the present Upanishad. A detailed note on the concept of the Guru has been appended to paragraph no. 11 of Canto 5.

²The use of the pronoun ‘me’ in the light of what has already been said and explained in this Upanishad earlier, especially in paragraph no. 15, and about the Mahavakyas of paragraph nos. 5-6 of this Canto 8, it obviously follows that it applies

to the ‘true self’ or the pure consciousness known as the Atma. This ‘me’ and ‘I’ become synonyms because they both mean the same Atma. In fact, it is only when the disciple has become self and Brahm realised and enlightened enough that his own Atma, and Brahm, the Parmatma, are the same entities, that he is eligible to declare that I have become one with the Parmatma—which is another way of saying that he has indeed obtained Moksha or Mukti. He has indeed obtained freedom from ignorance and delusions which have been the cause of all his spiritual problems till now.]

18. In this way, the creator and grandfather of creation, Lord Brahma, attained extreme Anand by becoming enlightened with this profound knowledge taught to him by Lord Maha Vishnu.

The Lord touched Brahma, and this touch had a magical effect upon the latter—Brahma instantly attained ‘Dibya Gyan’, i.e. he instantly became enlightened and realised, he obtained the sublime knowledge of the Divine (‘Dibya Gyan’), and whatever doubts and confusions that had still lingered in his mind were instantaneously eliminated. [It is usually experienced in the realm of mysticism that enlightened souls sometimes do wonders by their mere touch and presence than attempting to teach through lectures and lengthy discourses. Herein lie the difference between a scholar and a mystic. While the former relies on the power of words and the dynamic strength inherent in knowledge and learning to transform the other man, the mystic achieves this quietly by transferring a part of his high-voltage spiritual powers, so to say, to the disciple by merely touching him or looking him into the eye, or even by smiling at him. To cite an example, while man-made electricity needs wires to be transmitted from one point to another, the heavenly electric current strikes the earth from the clouds high above in the form of a bolt of lightening which needs no wires, transformers, circuits and poles!]

Being thus enlightened and spiritually empowered, the great grandfather Brahma rose and performed circumambulation of Lord Maha Vishnu, his Guru, bowed before the Lord most reverentially, and offered his respects and worship in various ways. Then Brahma brought his palms together as a gesture of submission and went closer to Vishnu.

Brahma submitted most politely and prayerfully before Lord Maha Vishnu, ‘Oh Lord! Bless me with steady and sturdy Bhakti; bless me that I become firm in Bhakti, and nothing can ever sway me away from it. Oh the merciful Lord! I am inseparable from you (because I and you are ‘one’). Please be kind to protect me, and give your succour to me in every way possible.’ (18).

19. [Lord Maha Vishnu blessed Brahma, exclaiming—] ‘Let it be so, oh holy soul! Let it be as you wish, oh blessed soul!’

Being extremely pleased with Brahma, and blessing and lauding him in the above manner, Lord Maha Vishnu said—‘My devotee and worshipper becomes excellent and most exalted. All things, all situations and all living beings are made holy and auspicious by my ‘Upaasanaa’—i.e. by offering me worship with due devotion, by offering service to me and seeking my intercession, by paying homage to me, by praying to me. My devotee is able to conquer all by his ‘Upaasanaa’ for me.

A person who is my devotee and worships me, who offers prayers to me and serves me, who adores me and honours me, is shown due respect by all in society; he is honoured by all.

All his (spiritual) bondages are completely broken; he is freed from all fetters that had been shackling him (to this material world, and its attendant torments and

delusions) till the time he had not taken my shelter and sought my blessing and intercession, till the time he has not prayed to me and worshipped me.

A righteous, noble and holy man is willingly served by all other men in this world. Similarly, all the Gods also feel privileged to serve (help, oblige) him and be benevolent towards him.

Even personified form of all the grand virtues and qualities, such as all forms of glories, magnificence, fame and majesty, too serve him.

My ardent devotee and sincere worshipper is transformed into the 'Advaitya Paramanand Brahm'. [That is, he is overwhelmed with supreme Anand (spiritual bliss, ecstasy, beatitude and felicity) that is undiluted, purest in form, and one of its only kind, an Anand which comes with realisation of the supreme Brahm, or which comes automatically when one becomes self-realised and Brahm-realised. Such an enlightened man is equivalent to the supreme Brahm himself, and this establishment of uniformity and non-duality between his 'self' and the cosmic 'Self' makes him a living image of Brahm.]

Any spiritual aspirant who follows this path in a comprehensive manner is able to become an image of 'Paramanand Brahm'—i.e. he becomes an image of supremely blissful Brahm (19).

20. Anyone who diligently studies this Maha-Narayan Upanishad belonging to the Atharva Veda tradition that reveals the secrets of the 'Param Tattva'—i.e. that teaches the most esoteric secrets of spiritualism and metaphysics, is able to free himself from great sins and their evil and negative consequences.

He is absolved from all the sins and their horrible effects, whether they were done willingly or done inadvertently. Verily, he is freed from even the greatest of sins and their evil effects.

He is freed from all sins—whether they were done secretly, or done openly, or done in great intensity over a long period of time.

He is able to vanquish or obtain victory over all the Lokas (worlds).

He is able to develop devotion and dedication for all the Mantras, and inculcate faith in their great powers and potentials. [This happens because he realises that all the Mantras are essentially meant to honour Brahm who is a non-dual and divine Supreme Being who has assumed so many forms simply to carry out varying functions in this creation. He realises that the Mantras are nothing but the different ways of addressing the same Divinity, the same Brahm revealed as so many Gods and Goddesses to whom these individual Mantras are dedicated.]

He becomes well versed in and is deemed to have developed a deep insight into all the esoteric doctrines, profound tenets and mystical philosophies of the Vedas and the Upanishads, thereby becoming a knowledgeable and wise person in the field of spiritualism and metaphysics.

He is deemed to have become a fulfilled or fully contented consumer or enjoyer of all things worth consuming and enjoying. [A man wishes to enjoy this and that object in this world because he is unsatisfied with his current situation. He seems to think, so to say, that the drink in the other person's cup is sweeter and fresher than his own, and this notion perpetuates constant hunger or thirst for more and more of this world. But when he becomes self-realised, he has tasted that unique nectar of bliss and happiness which has no match anywhere in this world. After this experience he would not like to taste anything else. Thus, when an aspirant becomes Brahm-realised he feels satisfied and fully contented so much so that no temptations of the world would be strong enough to ever make him feel distracted, falter or dither from

his chosen path. He remains submerged in an eternal ocean of spiritual blissfulness and ecstasy, and never bothers to think of any other kind of material enjoyments and comforts.]

He is deemed to have acquired the knowledge of all types of Yogas. [Yoga provides Anand or bliss to its practitioner, and its main aim is spiritual liberation and deliverance. When a wise person, who has properly understood the teaching of this Upanishad, is able to experience this Anand first hand, when he has become self-and-Brahm-realised, and has thereby obtained spiritual liberation and deliverance, he is deemed to have attained the same knowledge and enlightenment, called 'Gyan', that comes by doing Yoga and Dhyana, or meditation, contemplation and deep research.]

Since he has become one like Lord Maha Vishnu himself, he is deemed to have acquired special mystical powers that empower him to help others in their spiritual endeavours by showing them the correct path and giving them wise advice.

Indeed, he becomes a personification of 'Advaita Paramanand Brahm'. [Refer paragraph no. 19.] (20).

21. This secret about the 'Param Tattva' (the supreme essence and the great truth about spiritualism) must not be told or divulged or taught to anyone who is not devoted to his Guru, who does not wish to hear it, who is a non-believer (an atheist or an agnostic) and is devoid of Tapa (i.e. who has no control over his sense organs, who is indulgent and lacks the virtue of self-restraint), who is boastful, arrogant and ostentatious, who has no devotion and respect for me, who has the negative quality of being malicious, jealous, and keeping ill-will against others, and who is so ungrateful and thankless that he finds fault with even 'me' (Lord Vishnu) who am so merciful and benevolent towards all (21).

22. On the contrary, anyone who tells, teaches or reveals this profound knowledge to my devotees (so that they can become enlightened about) will be rewarded by greater devotion for me, and become more steadfast in my service, being specially empowered blessed by me. Ultimately, he will attain me. [In other words, I will treat him as my apostle and ensure that he is never far from me, and I am always with him.]

Anyone who attentively hears and studies the secret implications of this conversation between the two of us, i.e. between Brahma and Maha Vishnu as revealed in this Upanishad, would become firmly established in the knowledge and glory of Brahm.

Anyone who hears and studies this conversation between us with firm belief and faith, without harbouring doubts and scepticism, would be able to find Sayujya Mukti—i.e. would be able to attain a divine stature whereby he becomes one like me by merging his self into my divine and cosmic form as the Supreme Being known as Brahm.' (22).

23. Then Lord Maha Vishnu vanished from sight. After that, Brahma went to his own abode (in the Brahma-loka) (23).

24. In the above manner, the esoteric and eclectic form of Mukti known as 'Sayujya' has been outlined in the Maha-Narayan Upanishad. Amen! (24).

Thus ends the Uttar Kand of this great Upanishad.

-----Shanti Paath-----

-----*****-----*****-----

Chapter 12

Ram Rahasya Upanishad

This Upanishad is dedicated to the theme of holiness and divinity of Lord Ram, and unfolds the great detail the metaphysical and spiritual secrets pertaining to the Lord who has been established here as being a visible manifestation of the supreme transcendental divinity known as Brahm. It has a parallel in Ram's other Upanishad, the Ram Tapini Upanishad, with the only difference that this present Upanishad has been preached by Hanuman, who is considered as the greatest devotee of the Lord and the most erudite expert on this theme. The Upanishad has five Cantos.

Canto 1 introduces the subject when different seers and sages approached Hanuman and requested him to preach them the great metaphysical and spiritual truths about Lord Ram and how to worship him to invoke his blessings. This Canto emphasises that the hymns composed by all the great devotees of the Lord have equal importance and effect, and they are equally valuable as the ones appearing in the scriptures. It is stressed that the various Mantras of Lord Ram have the same metaphysical import and divine mystical powers as the Mantras of the Vedas devoted to Brahm for the simple reason that Lord Ram is none but the Supreme Being himself personified.

The different hymns mentioned in verse no. 6 of this Canto are included as Addendum no. 1 at the end of this Chapter. They are the following—(i) Sanat Kumar Sanhita's Ramstavaraj by sage Narad, (ii) Ramashtak by sage Veda Vyas, (iii) Raghunathashtak, (iv) Sita-ram-ashtak, (v) Ram Stotra, and (vi) Ram Stuti.

Canto 2 is a unique section because it elaborately describes all the Mantras of Lord Ram, starting from the one-letter Mantra to the longest ones having forty seven letters, along with how they have been conceptualized and how to worship and meditate upon the Lord with them.

Canto 3 is another fascinating one in which the mystical charm instrument/apparatus called a 'Pooja Yantra', which is like a Talisman, is used for invoking divine intercession to help the worshipper to accomplish astounding feats and acquire stupendous supernatural powers which would have been impossible otherwise. This Yantra is much like any modern-day electronic instrument having an electronic circuit which is used by a man to enable him to acquire tremendous powers and potentials, and achieve successes in numerous exercises which would have been virtually impossible for him to achieve with his mere physical body and mind. This Canto describes how this Yantra is constructed, and how to worship or use it.

Interestingly, two versions of the instrument or apparatus are described, and they are to be compared with the one described in Ram Purva Tapiniopanishad, Canto 4 where another version of the Yantra is described in detail. It is to be noted here that all these instruments/apparatuses are equally effective and powerful just like, for example, the computer made by different companies which have slightly tweaked the main configuration but the technology behind the computer is the same. All these machines would function equally effectively though the company which has made

them, the use to which they are put, and the benefits derived from their usage may vary widely.

Canto 4 elaborately narrates the sanctified process for accepting the different Mantras of Lord Ram along with the strict codes of conduct and rules that are to be followed for their application by the devotee worshipper. These Mantras are used for dual purpose—viz. for doing formal religious rituals during sacrifices as well as for the purpose of doing Japa (repetition of the holy Mantras) for achieving specific aims.

Finally, Canto 5 describes the metaphysical and spiritual importance and significance of Lord Ram's Mantras, especially the six letter Mantra (OM Raamaaye Namaha), and what benefits the worshipper can expect by using this Mantra with due faith and reverence. It establishes the supremacy of Lord Ram's Mantra over all other Mantras and espouses the fact that the well known, universal, ethereal, divine and sacred Mantra OM is also the Mantra for Lord Ram. This final declaration by Hanuman winds up this very fascinating Upanishad.

A very unique and interesting aspect of this Upanishad is that it lists the Mantras of Lord Ram, the Tarak Brahm, the manifested form of the Supreme Being, starting from a one-letter Mantra and going upto a long Mantra with forty-seven letters in a step-by-step manner by showing how one letter is added either as a prefix or a suffix to a particular Mantra so as to increase the number of letters from one to forty-seven (Canto 2, verse no. 6-92). To complement this, the basic Mantras dedicated to other divinities associated with the principal deity (Lord Ram) are also given (Canto 2, verse nos. 93-106). In order to present an easy to read reference list of all these Mantras, they are collected and listed in Addendum no. 2 at the end of this Chapter.

Sketches depicting the construction of the worship instrument, called a 'Yantra' as described in Canto 3, have been included at the end of this Chapter as Addendum no. 3.

There are two other relevant Upanishads which deal with the profound metaphysical and spiritual aspects of Lord Ram—viz. the Ram Purva Tapini and Ram Uttar Tapini Upanishads. They appear as sections 1 and 2 of Chapter 13 titled 'Ram Tapini Upanishad' of the present volume. Then there is another Upanishad dedicated to Sita, the divine consort of Lord Ram, and a manifestation of Shakti (the dynamism of the supreme Brahm) and Prakriti (Mother Nature). It is called 'Sita Upanishad', and it is included as Chapter 9 of our volume of the Atharva Veda Upanishads.

-----Shanti Paath-----

Please see appendix no. 1 for the meaning of this Shanti Paath.

Canto 1

1. OM salutations! Amongst the great sages and seers, who are experts and skilled in the esoteric art, the mystical science and the eclectic philosophy of doing Tapa (doing severe penances, observing of austerities, enduring hardships and undergoing sufferance for a noble cause) in order to attain access to the supreme Lord known as

‘Ram’, are ascetics Mudgal¹, Shandilya², Paingal³ etc. They had attained the pinnacle of this spiritual knowledge and are like the celebrated ‘Shikha’ on the head of a Brahmin⁴. [In other words, these sages and seers were the doyens in their class and formed an exclusive group of enlightened persons who had the highest state of spiritual achievement so much so that they could establish direct communion with the manifested form of the supreme Brahm in the form of Lord Ram.] (1).

[Note—¹Sage *Mudgal*—He is the sage who had pronounced the Rig Veda Sukta 10/102. His wife was known as Mudgalaani. He was a great devotee sage of Lord Vishnu and his incarnation Lord Ram. He had practiced severe Tapa (austerity and penance) at the holy cite known as Kurukshetra. He was the father of Ahilya, the wife of sage Gautam, and of King Divodas. He was a great host and served his guests well. He understood the importance of Moksha, the final emancipation and salvation of the soul, so much so that he had once spurned an offer of the Gods to go to heaven. This is because those who went to heaven had to return to this world once the good affects of their good deeds wore off; it was not complete deliverance.

He had performed a great sacrifice near the bridge built across the ocean by Lord Ram in order to reach Lanka where the Lord had slayed the demon king Ravana and liberated Sita from his captivity. The epic war fought there is narrated in the ancient classic known as Ramayana. Lord Vishnu was so pleased at this performance of the sacrifice by the sage that he created a huge pond of pure milk secreted by the cow of Gods, known as the Kamdhenu cow, for the purpose of offering oblations in this sacrifice. This pond is known as Kshir-tirtha or a pilgrim site which has the celestial milk in its pond in a symbolic manner.

One of the sub-Purans or Up-purans, known as ‘Mudgal-puran’, is named after him. It is dedicated chiefly to the narration of the nine main incarnations of Lord Ganapati, or Lord Ganesh who is the son of Lord Shiva and Parvati, and is the chief deity who is worshipped first during any religious ceremony or auspicious activity. This Up-puran was probably written between 900-1100 A.D. The nine incarnations of Ganapati mentioned in this sub-Puran are the following—Vakradanta, Ekdanta, Mahodara, Gajanan, Lambodara, Vikata, Vighna-raja, Dhumra-varna, and Yoga. Besides these nine incarnations, it also lists 23 more forms of Lord Ganesh.

The Mudgal Upanishad belonging to the Rig Veda tradition is also ascribed to this great sage. It is like a brief commentary on the ‘Purush Sukta’ of the Rig Veda, 10/7/90/1-16.

²Sage *Shandilya*— The word ‘Shandilya/Shandilya’ means the son of sage Shandila. In ancient scriptures the name of sage Shandilya appears at various places, the earliest reference being in the Shatapatha Brahman (9/4/4/17; 10/1/4/10) which belongs to the Shukla Yajur Veda. It is believed that it was compiled around 3000 B.C.

Shandilya was a great authority of the fire ritual, and in fact the fire which he worshipped has been named after him as Shaandila. He was a pupil of sage Atharvan from whom he learned this present Shandilya Upanishad, and his main disciple was named Kushri. According to other lists of lineage, his teachers included Vaatsayana, Kaishorya, Kashyapa, Vaishtapureya, Gautama etc.

The Chandogya Upanishad also refers to sage Shandilya in its Canto 3, section 14 wherein the sage taught the knowledge of the divine Being known as Brahm which have a clear resonance in Cantos 2 and 3 of our present Shandilya Upanishad.

The great epic Mahabharata mentions sage Shandilya many times as being a sage who attended the court of king Yudhishtira (Sabhapurva, 4/17). He had propounded the laws governing giving of donations (Mahabharata, Anushasanapurva, 65/19).

Sage Shandilya is credited with the composition of the treatise on Bhakti or devotion, called the Bhakti-sutras—the essential principles that govern the attainment of Bhakti. Besides it, the Shandilya Sanhita and the Shandilya Upanishad are also attributed to him. The Shandilya Upanishad, which is the 14th Upanishad of the

Atharva Veda, is dedicated to the philosophy of Yoga. This Upanishad was preached to sage Shandilya by sage Atharva. Since this Upanishad was taught to him by sage Atharva, it obviously follows that the two sages were contemporaries of each other.

³Sage *Paingal*—He was also known as ‘Pingal Kaanva’. The sage was called Paingal probably because he was of a dark brown or tawny complexion as the word ‘Pingal’ refers to these shades of colour.

The Paingal Upanishad, which is the 16th Upanishad of the Shukla Yajur tradition, is ascribed to this sage, and it describes the esoteric secrets of the Kaivalya form of Mukti—i.e. the sort of spiritual liberation and deliverance whereby the soul does not have to take a birth again. Sage Paingal is also mentioned in the Rig Veda tradition’s Kaushitaki Brahman Upanishad, Canto 2, verse no. 2 wherein it is affirmed that the ‘Pran’, the vital winds present in the creature’s body that infuses life in it, is nothing but Brahm, the Supreme Being, in its form. In other words, Brahm gives life to the body of the creature by transforming himself as the Pran that makes the body, which is otherwise gross, inactive and dead, alive and active.

⁴The *Shikha* is the tuft of hair on the head of a Brahmin symbolising his exalted stature in society. It is a mark of seniority in the social hierarchy as well as a symbol of his erudition and learning. The Shikha is like the crown on the head of a king; it is the crown that empowers the king with his authority and sway, the kingdom’s strength and authority lies not in the person of the king but is vested in the crown. Anyone who wears the crown has this authority vested in him. Hence, once the king abdicates the crown he loses all his powers and authority. Similarly, these sages were deemed to be senior amongst their peers as far as the metaphysical knowledge pertaining to Lord Ram was concerned. Lord Ram is not an ordinary God as such, but a manifestation of the supreme transcendental Brahm. In fact, the ‘Beej Mantra’ of Ram, which is actually a monosyllable, that forms the basis of this name of the Supreme Being as ‘Ram’ is regarded as the ‘Tarak Mantra’, or a divine word, letter or syllable that has the powerful potential to provide the final emancipation and salvation to the soul of the creature.]

2. They were accompanied by other ascetics and sages such as Sankaadi¹, as well as devotees of Lord Vishnu (whose incarnation Lord Ram was) such as Prahalad² etc. when they approached Hanuman³ (the greatest devotee of Lord Ram and considered as the wisest and most erudite and scholarly amongst the learned ones in the field of metaphysics, theology and spiritualism who ever took birth on this earth). They said to him—(2).

[Note—¹Sage *Sankaadi*—A note appended to the Atharva Shikha Upanishad, Kandika 1 outlines a pen sketch of sage Sankaadi. This Upanishad is Chapter 5 of the current volume.

²*Prahalad*—Prahalaad/Prahalad—He was an ardent devotee of Lord Vishnu. He was the eldest son of the king of demons, named Hiranyakashipu. His mother was Kayaadhu, the daughter of the demon king named Jambhaasur. Both the mother and the son were initiated by sage Narad who had inspired them to become devotees of Lord Vishnu.

The story of Prahalad is narrated in detail in (i) Vishnu Puran, 1/17, and (ii) Bhagvata Puran, 7/4-8.

The father, being a demon, was an inveterate opponent of Lord Vishnu, and so naturally he couldn’t tolerate his own son worshipping his enemy Lord Vishnu. He tried his best to dissuade Prahalad from being devoted to the Lord, but the son had immense faith in the Lord and would not be deterred by his father’s threats and scolding. Hiranyakashipu tried even cruel means to change Prahalad, including an attempt to burn in a raging fire, but the child devotee escaped unscathed. So, finally the demon father decided to kill him personally. Prahalad was tied to a pillar and asked ‘Where is your Lord Vishnu? Is he in this pillar also?’ The child replied in the

affirmative. Then his father swung the sword to kill him, and it was at this instant that Lord Vishnu revealed himself as the famous incarnation known as 'Nrisingh'—the upper half of his body was like a lion and the lower half was like a man. An Upanishad titled 'Nrisingh Tapini Upanishad' of the Atharva Veda is dedicated to this Lord.

Lord Nrisingh snatched the sword and laid the demon father across his laps. He then tore through his abdomen, and yanked out his intestines, thereby killing the demon. He then picked up the child Prahalad on to his laps and lovingly licked and caressed him like a lion does to its cub. But Prahalad prayed to the Lord to provide deliverance to the soul of his father, at which the Lord liberated the demon from all his sins.

Prahalad is credited with enumerating the nine-fold path of Bhakti, the path of devotion for the Lord, in the epic Bhaagvata, 7/5/23.

Lord Dattatreya, one of the manifestations of Lord Vishnu, had preached Prahalad about the eclectic state of Avadhut Sanyasi in the form of a huge python, known as Ajgara. Prahalad had spiritual discussions also with other sages such as Hansa (the divine Swan, an incarnation of Vishnu), and with Indra (the king of Gods).

Prahalad had four brothers, three sons and a daughter. The king of demons known as Bali, who was famous for his charities and donations, was a grandson of Prahalad. The incarnations of Vishnu as Vaaman, the dwarf mendicant, is related to this legendary king.

³*Hanuman*— Lord Hanuman was one of the greatest devotees of Lord Ram. His devotion for Lord Ram had no match. He is regarded as the wisest, the most enlightened and a highly self-realised soul. He is an incarnation of the eleventh form of Lord Shiva that is known as Rudra. When Lord Vishnu decided to manifest himself as Lord Ram in this world, all the different Gods has assumed various forms to serve the Lord. Shiva had taken the form of Hanuman to serve Lord Ram.

According to the Purans (mythological histories), the name of his mother was Anjana who was the wife of the monkey king Kesari. He was born as a grace of the Wind God, also known as Marut. Hence, Hanuman was also known as 'Anjaneya' or 'Maruti'. However, his most common name 'Hanuman' is derived from the fact that once he had been hit by the 'Vajra', the hard weapon of Indra, the king of Gods. The story goes that once, a little time after his birth, the infant Hanuman had felt extremely hungry, and seeing the rising sun he thought it to be some ripe red fruit dangling from the sky. So he leapt to the sky to eat the rising sun. Incidentally, it was the time of the solar eclipse, when, according to mythology, the head of the demon known as Rahu was proceeding to devour the sun. When he saw Hanuman rushing towards the sun, Rahu ran away scared, thinking that Hanuman was some competitor who was out there to grab his food. Rahu complained to Indra, the king of Gods, that he is being denied his regular meal. At this, Indra intervened. When Hanuman saw Indra approaching astride his white majestic elephant known as Eraavat, he thought that it was some other white fruit. So he left sun alone and instead leapt at Eraavat. Indra was shocked, confounded and perplexed, and in order to stop Hanuman he threw his formidable weapon known as Vajra. The Vajra hit him on the chin, thereby causing a dent. The jaw swelled as result. This incident gave 'Hanuman' his famous name.

The word 'Hanu' means the lower jaw, the chin, while 'Maan' means to hit to subdue or defeat. Another interpretation is that 'Hanu' means to crush, to trounce, to take away, to eliminate, and 'Maan' means one's pride, arrogance, haughtiness and ego. So the composite word 'Hanuman' refers to this incident when Indra had subdued the son of the Wind God by breaking his chin-bone as a token punishment for him being extremely arrogant and unnecessarily mischievous.

But when the Wind God saw Hanuman hurt, he became extremely angry as Hanuman was born as his grace, so he stopped the movement of air. This caused suffocation in this creation and all the Gods were on the verge of asphyxiation. So

they appeased the Wind God by blessing Hanuman with invincibility and formidable powers. This made Hanuman immortal and immune to the dangers of fire, water and wind.

Once as a child he was even cursed by sages because of his mischievous nature as he used to play havoc with the trees and plants around the hermitages and forests where they lived, uprooting them, breaking their branches, eating their fruits and littering the place all around. So they cursed him that he would forget his powers till the time someone reminded him about them. As it happened, when the monkeys and bears set out in search of Sita, who had been abducted by the demon king of Lanka known as Ravana, and had reached the shores of the vast ocean, they faced the formidable challenge of having to cross it, face this formidable enemy, and come back alive. It was then that Jamvant, the old patriarch of the bears, had reminded Hanuman about his lost strength. Hanuman regained his old stupendous powers and abilities, and he was the one who not only crossed the ocean but also burnt Lanka before coming back with the news of Sita. These events are narrated in the epic Ramayana in great detail.

Hanuman can be likened to a diamond amongst all the characters in the epic story of Ramayan which deals with Lord Vishnu's incarnation as Lord Ram. In fact, the story of Lord Ram and his conquest of Lanka would not have been what it was without Hanuman. Even Lord Ram had openly accepted his indebtedness to Hanuman.

It is believed that when Lord Ram left this world for his heavenly abode during the final episodes of Ramayana, all those who were close to him as well as the rest of his subjects had also left this world with the Lord. But Hanuman remained behind with the express mandate from the Lord to ensure that the Lord's glory as well as the glory of his divine name can be perpetuated, and to ensure that the devotees of the Lord can be afforded protection.

Hanuman had immense mental and physical agility, strength and prowess. His character was immaculate and his intellect was of high refinement. He had complete, unchallenged and unparalleled knowledge of the scriptures. One of the reasons is that his teacher was the Sun God himself who had taught him all the Vedas and other scriptures. His speech was elegant and scholarly. He is regarded as a treasury of the eight Siddhis (mystical powers) and the nine Nidhis (spiritual assets). He was a renunciate and a celibate since birth.

The eight Siddhis which Hanuman possessed were the following—(i) 'Anima'—means the power to become microscopic or so minute that one becomes invisible to the naked eye; to become small like an atom; (ii) 'Mahima'—is to have majesty, glory and fame; to be honoured and acknowledged for one's achievements, wisdom, erudition, knowledge and skills; to become huge like a mountain, thereby standing out and being unique or special in a crowd; (iii) 'Garima'—is to be heavy-weight in any field, to have special qualities that give one's ideas and words a great amount of importance and weight; to have stature, dignity, decorum, gravity and significance; (iv) 'Laghima'—is the grand virtue of being simple and humble inspite of being great, powerful and authoritative; it is to have simplicity and humility despite possessing grandeur, majesty, power, authority and magnificence; (v) 'Praapti'—is to be able to attain, gain or obtain anything wished or desired for; (vi) 'Praakramya'—is to have valour, ardour, strength, powers, prowess, potential and punch leading to triumph, glory and majesty; (vii) 'Ishwatwa'—is to be able to have lordship or sway over everything else; to be able to rule over others; (viii) 'Vashitwa'—is to be able to control and subdue others, and exert influence on them so much so that they become obedient and subservient.

The nine Nidhis that Hanuman possessed were the following—

Spiritual assets—according to saint Tulsidas' epic Ram Charit Manas, Aranya Kand, Doha 35-36, they are—(i) communion with saints and pious people where the Lord's glories are being sung, (ii) serving one's teacher and elders, (ii) praising the

Lord's glories and doing Kirtan and Bhajan which are community singing of the Lord's glories, (iv) repeating the divine Mantras or holy words of the Lord, i.e. doing Japa, (v) having such virtues as 'Dam' or tolerance, patience, fortitude and resilience, 'Sheel' or good and righteous demeanors, 'Virati' or being renunciate and detached from deeds and to be dispassionate towards the world, 'Sam' or equanimity, looking everything as Brahm, having a non-dual approach of or view of the world, 'Santosh' or contentedness, and 'SaraI' or simplicity and humility, (vi) having no deceit, conceit and falsehoods, (vii) not finding faults with others and criticising them unnecessarily, (viii) to have firm reliance and faith in the Lord, and (ix) not to feel dejected, depressed, despaired, inferior, lowly and condemned under any adverse circumstances, because the great and merciful Lord is always with them.

According to another version, the nine Nidhis are the various special virtues or qualities or attributes that one possesses, and which make him special amongst others. They are the following—(i) Buddhi—intelligence and the power to discriminate, to think sharply, quickly, logically, rationally, deeply and analytically. (ii) Bal—strength, vigour and power of the body and of the mind as well as of the spirit. (iii) Yasha—fame, good reputation and name; majesty and renown. (iv) Dhairya—to have courage, fortitude, resilience, ability to hold on in the face of greatest adversity, misfortune and opposition. (v) Nirbhayataa—fearlessness, courage, bravery and an indomitable spirit. (vi) Aarogyataa—to be freed from diseases and illnesses, both mental as well as bodily. (vii) Ajaadyataa—the opposite of Jadataa; to be free from the negative trait of inertia, lethargy, depression, stagnation, lack of drive, initiative and will power. (viii) Vaakya-patutaa—to be an expert orator; speaking skills, eloquence, diplomacy, and wise and intelligent choice of the spoken word. (ix) Bhakti—to have steady and robust devotion, loyalty, dedication and conviction for one's chosen deity and faith. This quality, of course, comes under the category of spiritual assets also.

Other variations include the following qualities in this list of Nidhis because they are like an asset for a man which stand him in good stead in his life— (i) Sham—having self restraint and control; having peace, tranquility, serenity and quietness; being able to suppress desires, yearnings and natural instincts and impulses. (ii) Dam—tolerance, forbearance, fortitude. (iii) Upriti—renunciation, detachment, dispassion, indifference and non-involvement. (iv) Titksha—endurance, patience, fortitude, sufferance, equanimity. (v) Samadhan—the ability to find a solution, an answer to even the most vexing problem; lack of confusion or doubts; clarity of thoughts and conception. (vi) Shraddha—having faith, belief, conviction, reverence and devotion. (vii) Sakhya—friendship and the ability to co-exist with even one's adversary. (viii) Daya—kindness, compassion, graciousness. (ix) Atma Bodh—self-realisation and being enlightened about the Atma, the pure consciousness, that resides inside one's inner self as his soul, as his spirit.

Sometimes, the last Nidhi of Atma Bodh is replaced with 'Seva' or the natural habit of serving others selflessly.]

3. They said, 'Oh the strong and brave son of the Wind God! What is that essence which is known to those who are said to be experts in the knowledge pertaining to Brahm? What is the basis tenet, the fundamental teaching and the essential edict of the eighteen Purans (mythological ancient histories of the Hindus) and eighteen sub-Purans as well as the Smritis (Hindu traditional jurisprudence)? (3).

4. The four Vedas, all the scriptures etc. are well known to you because you have been diligently studying them yourself, and they have been taught to you by your teacher who is none other than the Sun God. That is, your knowledge is more complete and comprehensive than that of others. Oh the valiant and brave one! Do tell

us what is the essence of this teaching; what is the fundamental knowledge propounded, expounded and enunciated by them?’ (4).

5. Hanuman replied, ‘Oh the exalted ascetics, sages, seers and devotees of Lord Vishnu! Listen to what I have to say. It has the potential of destroying all sins and cutting through the fetters of this deluding and fearsome world (5).

6. It incorporates the essence of all the scriptural and metaphysical essences, their tenets, their axioms and maxims. Besides this, it is about the ‘Tarak Brahm¹’, i.e. it is about the Brahm who delivers one from the torments associated with this seemingly endless cycle of birth and death, and provides liberation and deliverance to its followers.

Certainly, Ram is the supreme transcendental Brahm personified. Lord Ram is an embodiment of the supreme form of Tapa (doing severe penances, observing of austerities, enduring hardships and undergoing sufferance for a noble cause). Indeed, Lord Ram is that ultimate ‘Tattwa’ (literally the essence, the fundamental or basic element or aspect) you talk about, and indeed Lord Ram is also that ‘Tarak Brahm’ referred to herein above (who provides one’s soul with the ultimate liberation and deliverance from the miseries and torments associated with this deluding and artificial world of entrapments, from the shackles that this gross body represents, as well as from the fetters created by being engrossed in ignorance and delusions pertaining to them both)’ (6).

[Note—¹The *Tarak Brahm* is that divine entity which can provide spiritual emancipation and salvation to the aspirant. It can liberate and deliver the creature from the endless cycle of birth and death and its accompanying torments and miseries. The word *Tarak* means to cause or enable to pass or cross over, to carry over, one that rescues, provides relief and succour, one that can provide liberation and deliverance to the creature from any bondage. Further, the word *Tarak* also refers to the ‘eye of wisdom that liberates one from the darkness of ignorance and delusions’, and it has relevance here because meditation leads to the opening of the inner ‘eye’ of insight that leads to self realisation and enlightenment. ‘Tarak’ also means a meter of 4 x 13 syllables; hence it refers also to the various Mantras used for the purpose of meditation, Mantras that have the power and the potentials to provide liberation and deliverance the soul from the cycle of birth and death.

References: (i) Shukla Yajur Veda = Advai Tarak Upanishad, especially verse nos. 7 and 9; Tarak Upanishad. (ii) Atharva Veda = Ram Rahasya Upanishad, Canto 1, verse no. 6.]

7. Hearing these reassuring words from the son of the Wind God, the different Yogis (ascetics) as well as the great devotees of Lord Vishnu who had assembled there requested him once again that they wished to hear (learn) about the different branches, the different aspects, and the different parts of the divine and holy form of Lord Ram, as well as about the different systems adopted to know them comprehensively so that proper worship to the Lord can be offered by them, so that they can duly honour and adore the Lord with the utmost reverence, humility, faith and conviction, and also to ensure that firmness of faith, conviction and belief in the supremacy, holiness, sublimity and divinity of Lord Ram can sprout and take firm root in their minds and hearts. [These great sages and seers wished to learn about the different versions of the divine aspect of Lord Ram as envisioned in the different scriptures, as well as about the various methodologies or systems adopted for his worship.]

Hanuman replied, ‘The son of the Wind God (i.e. myself), Lord Ganesh who eliminates all hurdles and misfortunes, Saraswati (the Goddess of knowledge, learning and wisdom), Durga (the great Goddess who rides a lion and who slayed the demon Mahisasur), the different Kshetrapals (the guardians of various divisions or areas, called the ‘Kshetras’, of the world; they are supposed to look after the interests of farmers), the Sun, the Moon, Lord Narayan (another name of Vishnu), Lord Nrisingh (the half lion and half man incarnation of Lord Vishnu to protect his devotee Prahalad from the tyranny of his demon father), the Wind God (Vayu), Lord Varaaha (Vishnu’s incarnation as the legendary Boar to salvage the earth), along with all other companions, compatriots and attendants of the Lord during his sojourn upon this earth—such as his divine consort Sita, his three brothers Laxman, Bharat and Shatrughan, the demon king-devotee of the Lord named Vibhishan (who was anointed as the king of Lanka after he sought the Lord’s refuge upon being insulted and kicked out by his elder brother, the demon king Ravana who was later slayed by the Lord in the epic battle at Lanka, when he advised the latter to stop being pervert and give Sita back to Lord Ram), the monkey king Sugriv (who was anointed on the throne of Kishkindha after the slaying of his tormentor, his elder brother Vaali, and who had helped the Lord to conquer Lanka with his monkey army), Angad (who was Vaali’s son and was put by Vaali under the protection of the Lord at the time of his death; he was anointed as the prince regent of Kishkindha by the Lord), Jamvant (the old bear king of Kishkindha; one of the senior ministers of Sugriv), and all other wise and self-realised souls who are devoted to Pranav (another name of Brahm in his transcendental and cosmic form, but here implying that they were devoted to Lord Ram because they knew that he was none other but the cosmic transcendental Brahm personified).

Verily, they (the Gods and their manifestations mentioned above) are the ones who have an in-depth and intimate knowledge of the different sublime and divine facets of Lord Ram. This most eclectic, esoteric, mystical and enigmatic knowledge pertaining to Lord Ram is a dispeller of all misfortunes and miseries.’

The assembled sages, seers, ascetics and devotees persisted, and they asked once again, ‘Oh the son of Anjani! Oh the most valiant and strong Hanuman! Let us know how the most esoteric and divine knowledge pertaining to Pranav (Brahm in his cosmic manifestation as the Naad or the divine sound OM) is made accessible to exalted and learned Brahmins, saints, householders and other eligible persons who are sincerely devoted to and submissive towards the supreme Lord.’

Hanuman answered, ‘Listen, I shall tell you about it. Once I had asked Lord Ram the same question, and he had answered me. I shall repeat it for you all. Listen carefully. At that time, the Lord had said to me—‘Those fortunate ones who are authorized and eligible to have access to my Mantra consisting of six letters or syllables are also the ones who are authorized and eligible to repeat this Mantra which is dedicated to Pranav, i.e. the divine, sublime, ethereal and holy word ‘OM’ which is a monosyllable.

Those who do Japa (constant repetition of a single or group of word(s) or syllable(s) having divine and mystical significance, importance, value and power) with the Mantra of Pranav, i.e. with the three-lettered monosyllable word ‘OM’ complete with its ‘Ardha Matra’ (i.e. the complete Mantra ‘OM’ with its four primary sounds consisting of the letters ‘A’, ‘O’, ‘U’ and ‘M’, followed by the sound of the half-syllable represented by the prolonged sound of ‘M’ after the mouth is closed, and, which in Sanskrit grammar, is represented by the ‘crescent and dot’ that is placed on the top of a letter or monosyllable; the complete Mantra of ‘OM’ is written as the

symbol ॐ), and then add it to my own Mantra consisting of three letters R, A and M—I bless these devotees with an all-round auspiciousness, complete welfare and immense good fortunes.

[So we have the complete Mantra as follows—‘OM RAM’. It will be noted here that if this Mantra is repeated constantly without break, the word OM would automatically prefix and suffix RAM. Hence, when used to do Japa, the above Mantra would become ‘OM RAM OM’.]

That is why, the proper way to do Japa of my divine Mantra in order to attain the highest citadel of spiritualism, or being able to realise or attain access to the supreme transcendental divinity known as Brahm, is this—the aspirant should first properly empower the letters of OM, i.e. A, O, U, M along with the Ardha Matra by honouring them and bestowing upon them the great super-natural, mystical and spiritual powers that comes by showing respect and paying homage to the ancient Rishi (patron sage or seer who had first discovered it) who had first conceptualized or visualized it and established the Mantra’s authenticity and stupendous powers by actually experiencing them and then implementing them in his own spiritual efforts.

In the same manner, the Devta (patron deity) of the Mantra is invoked, and the latter is fully empowered and vested with this deity’s supernatural mystical and spiritual powers. [Since OM is the Mantra for Brahm, the supreme transcendental cosmic Consciousness, when duly consecrated and empowered, OM becomes as majestic, potent and powerful as Brahm itself.]

When this consecration and empowerment is done, OM acquires the same mystical powers and spiritual value, the same importance and significance, the same authority and status as that possessed by the Chandas¹ in which the holy verses of the Vedas are composed. [In other words, OM encompasses in itself all the essence and authority of the four Vedas when duly consecrated and empowered. It acts like the ‘Master Key’ to all Vedic hymns.]

Then the four ‘Varnas’ of the Mantra ‘OM’ representing Pranav (i.e. the letters A, O, U and M that constitute the Mantra) and their basic vowel sounds should be entrusted with divine powers symbolizing different powerful forces of Nature that control all aspects of creation².

They should be assigned the powers, the authority and the potentials of the glorious ‘fire element’ (representing energy, vitality, dynamism and purity), the holiness and sanctity of the ‘Vedas’ (the primary scriptures and a repository of all eclectic and sublime knowledge pertaining to existence, life, spiritualism and divinity that exist in creation), and the various unique and characteristic virtues in creation that determine the nature and character of everything in creation that are collectively called the different ‘Gunās’³.

[That is, each syllable or letter or word of any Mantra should be given equal importance and value as being the ‘seed or root’ of the entire Mantra; the composite Mantra would fall apart and lose its significance and mystical powers if even one constituent part is rendered less effective, or even ineffective, or given less importance and attention. So, each letter is complete in its self; each is a wholesome unit in its own right. And therefore, each individual letter or syllable deserves full honour, respect and attention by the spiritual aspirant.]

Now, this Mantra for Pranav, i.e. OM, should be prefixed and suffixed to the Mantra for Lord Ram. A person who does Japa with this complete Mantra, i.e. the Mantra for Ram with OM attached as a prefix and a suffix to it, becomes one like the Lord himself. [That is, he becomes as pure and holy as the supreme Lord himself. He acquires divine and mystical powers and prowess as an especially privileged,

enlightened and empowered soul.] The Mantra for Pranav (i.e. OM) forms an integral part of the complete Mantra for Lord Ram’.

Once, Vibhishan (the demon devotee of Lord Ram and the king of Lanka) said to the Lord, ‘I most reverentially prostrate myself before Lord Ram who is seated upon a throne, and who is the slayer of the evil son of the Pulastya clan (a reference to the evil demon king of Lanka, Ravana).

Oh Lord Ram! I wish to say something; do I have your permission?’ (7).

[Note--¹The *Chanda* is a poetical style of composition in which a particular verse of a Veda is composed. There are many types of Chandas, and their importance as the protector of Gods symbolising all the life-giving and life-sustaining forces of creation have been elaborately described in Chandogya Upanishad of the Sam Veda tradition in its Cantos 1 and 2.

In the present context, each of the letters or syllables of the Mantra, i.e. A, O, U and M, is assigned the same ethereal, divine and spiritual importance, significance and value as that given to a complete verse of the Veda. In other words, each syllable of a Mantra is as important as the whole verse of a Veda.

²The *Varnas* are the letters or syllables of a word. In the case of the divine and holy word OM representing Pranav or the supreme transcendental Brahman, they are A, O, U and M representing the four ethereal sounds which this composite Mantra ‘OM’, also known as Pranav, consists of. They are like an algebraic coefficient in mathematics, establishing a link between the various holy and divine facets of the individual units of the composite Mantra OM as represented by each of these four letters, and the cosmic sound called Naad or Pranav that they represent.

At the same time, they act as a constant that enhances and multiplies the value and magnitude of the whole composite Mantra. Each of these letters or syllables is assigned the same ethereal, divine and spiritual importance, significance and value as that given to a complete Mantra. They form an integral part of the whole Mantra, and the Mantra cannot have any value if even one of its parts is de-linked from it. It is like a complex organic chemical formula where each component is an integral part of the whole structure, and has equal value and importance as its next companion to maintain the integrity of the entire structure.

The four components of this spiritual ‘formula’ are represented by the four letters that constitute OM. The first letter ‘A’ represents the conception of the creation; the second letter ‘O’ represents the development of the cosmos; the third letter ‘U’ represents the expansion; and the last letter ‘M’, the fourth, represents the conclusion of the creation. The vowel sound of each of these letters represents the basis foundation upon which that particular aspect rests. This is because whereas the actual pronunciation of the letter symbolizes the external features of that particular aspect of creation as mentioned above, the vowel sound would represent the hidden ingredient that has gone to make this external feature feasible and meaningful.

The concept of OM : Some of the other Upanishads that deal with this esoteric concept are the following—

(a) Rig Veda—Naad Bindu Upanishad.

(b) Krishna Yajur Veda—Taittiriya Upanishad, Valli (Canto) 1, Anuvak (sub-canto) 8; Amrit Naad Upanishad, verse no. 2, 4, 24-25, 31-32; Dhyan Bindu Upanishad, verse no. 2, 9-18 (which narrates how each letter of OM stands for different aspects of creation), 37, 102; Tejobindu Upanishad, Canto 1, verse nos. 1, 6; Yogtattva Upanishad, verse nos. 136-139; Brahm Vidya Upanishad, verse nos. 2-12, 69-71 ½ which narrates how each letter of OM stands for different aspects of creation; Varaaha Upanishad, Canto 4, verse nos. 1.11—1.34, and Canto 5, verse no. 70; Shuk Rahasya Upanishad, verse no. 20 describes how OM is used for the purpose of ritualistic worship according to the Tantra philosophy involving Anga Nyas, Shandanga Nyas etc.; Akchu Upanishad, Canto 2, verse nos. 42-43 ½ describe how the three states of existence (waking, dreaming and deep sleep) and the three

types of bodies (gross, subtle and causal) came into existence as manifestations of the three letters A, U and M of the word OM; Rudra Hridaya Upanishad, verse no. 38.

(b) Shukla Yajur Veda—Taarsar Upanishad, Canto 2, and Canto 3, verse nos. 1-7; Hans Upanishad, verse nos. 6-17.

(c) Sam Veda—Yogchudamani Upanishad verse no. 74-81, 85-88; Pranavo Panishad which has only 13 verses dedicated to OM.

(d) Atharva Veda—Sita Upanishad, verse no. 9; Ram Tapiniopanishad, canto 3, verse no.5-9; Prashna Upanishad, full Canto 5; Mundak Upanishad, Canto 2, section 2, verse no. 4,6; Mandukya Upanishad, verse no. 1, 8-12; Atharvashikha Upanishad; Nrisingh Purvatapini Upanishad, Canto 1, verse no. 8; Canto 2, verse nos. 2, 5; Canto 4, verse no. 3; Naradparivrajak Upanishad, Canto 8, verse nos. 1-7; Shandilya Upanishad, Canto 1, section 6, verse nos. 3-4; Pashupata Brahm Upanishad, Canto 1, verse no. 4 (which equates OM with the 'Hans' Mantra).

The significance and the relevance of OM vis-à-vis Lord Ram and his divine Mantras have also been stressed in Ram Uttar-Tapini Upanishad, Canto 3, verse nos. 5-9. This Upanishad is Chapter 13 of our current volume.

³There are three basic qualities or *Gunas* which are inherent in all the living beings that determine their nature, habits, temperaments and inclinations which in turn decide the personality and outlook of each individual in this world. These Gunas are—(a) Sata meaning the best quality marked by a predominance of auspiciousness, righteousness and virtuousness; (b) Raja meaning the medium quality marked by a greater percentage of worldly passions, and a desire to create, sustain and remain involved in the affairs of the world; and (c) Tama which the meanest and basest of quality in a creature marked by evilness, perversions and sinfulness. These Gunas, in varying ratios and mixtures, decide the character and personality of any given unit of creation. In modern world we recognize them as the 'gene' special to that individual, the 'gene' which makes each individual so unique in this creation. These Gunas can also be compared to the various shades and hues of colours that a painter uses to paint a picture or a portrait and inject life and uniqueness to it. Even the same painter cannot duplicate exactly a picture again—there is bound to be a difference between any two pictures or portraits no matter how invisible, imperceptible, microscopic and subtle it might be.]

8. 'Oh the strong-armed valiant Lord of the Raghu's race (i.e. Lord Ram)! It is said about you that you accept your humble devotee without much fuss and formalities. How do they get this privilege? Please do tell me' (8).

9. Lord Ram replied to Vibhishan, 'The five types of most horrendous sins, such as the killing of one's (i) mother and (ii) father, (iii) a Brahmin (an elderly, learned and wise person who is the senior member of the society), (iv) a Guru (one's teacher and moral preceptor), (v) or any great sage, seer, ascetic, monk or a friar, and other such horrible and most despicable sins that are normally unpardonable, are remitted or forgiven or pardoned if the sinner who has committed any one or more of these sins or misdeeds repeats my holy divine Mantra thousands of times¹ with sincerity, devotion, faith and conviction.

Not are they only able to overcome the ill effects of such grave and heinous sins and misdeeds, but they also become an image of truthfulness and honesty. They achieve peace and internal bliss that comes with associating oneself with the pure conscious self².

I (Vibhishan) asked once again, 'If one is unable to do this (i.e. repeat the Mantra thousands of time), then say what should he do? Please tell me about it.'

Then the Lord had replied to me (Vibhishan), 'In that case, in order to invoke my divine blessings, one should repeat the various hymns composed in my honour by

my different ardent devotees—such as the son of Kaikasi (i.e. Vibhishan), or the hymns contained in the great Upanishads dedicated to me (viz. the Ram Tapini Upanishad, and the Tarsar Upanishad), or the hymns of the Gita proclaimed by me (which is called ‘Ram Gita’ and is a part of Adhyatma Ramayan by sage Veda Vyas; this Gita was preached by the Lord to his brother Laxman in this epic’s Uttar Kand, Canto 5), or repeat the litany of my thousand names (called the ‘Sahastra Naam’ because these names are all divine, holy and spiritually uplifting and liberating by nature, and are indicative of the same essence and holiness that exists in various forms much like the same basic elements of Nature combined in numerous permutations and combinations to form the myriad versions of this creation, or the same universal ‘consciousness’ that has taken the form of thousands upon thousands of forms as countless creatures of all denominations in this world), or the one that has my one hundred names (instead of the thousand names; a sort of abridged version of these one thousand names), or the different ‘Ram Ashtaks’ (verses of eight stanzas; or hymns having eight verses of twin lines each), or ‘Ram Stavaraj’ (a special hymn) composed by the celestial sage Narad, or the great ‘Stotras’ (hymns)³ composed by Hanuman which have astounding mystical powers equivalent to those possessed by divine Mantras of the Vedas, or the hymns composed in the honour of Sita (Lord Ram’s divine consort; an incarnation of Goddess Laxmi), or the famous six-letter divine Mantra ‘Raam(g) Raamaaya Namaha’ (meaning ‘I bow most reverentially to Lord Ram whose Beej Mantra ‘Ram/Raam(g)’ is also the Beej Mantra for the fire element, and therefore the Lord personifies all the glorious, magnificent, powerful and eclectic virtues and qualities of the fire element’.

A person who devotedly, with full conviction and faith, repeats any of these hymns, all of which have equal potentials and powers⁴, is able to overcome the ill effects of his sins and misdeeds, and becomes holy and purified as if he represented these virtues unique to me. There is no doubt about it’ (9).

[Note—¹The repetition of Mantras ‘thousands of times’ is a figure of speech that implies concentration of mind and attention. When one repeats anything so many times he is bound to be focused on it; his sub-conscious would be full of it. When a man sleeps he would be unconsciously repeating these Mantras if he had been repeating them consciously while awake. A time would come when his whole being would be transformed from what he used to be to what these Mantras stand for—i.e. he would be a transformed man who would be personifying the glory and the holiness associated with Lord Ram and his great devotees. While his mind was filled with worldly thoughts and negativity prior to his practicing the Mantras, it would be now full of holy thoughts and positive vibrations after practicing repetition of Mantras.

The various Mantras of Lord that are referred to here have been enumerated in Canto 2 of this Upanishad. Besides them, the other Mantras of the Lord are given in the following Upanishads—(i) Ram Purva Tapini Upanishad, Cantos 3-4; and (ii) Ram Uttar Tapini Upanishad, Canto 5. These two Upanishads appear as sections 1 and 2 of Chapter no. 13 of the present volume.

Similarly, the Tripadvibhuti Maha Narayan Upanishad, Canto 7, paragraph nos. 22, 24, 26, 28, 30, 43, 46, and 57 also list some other Mantras dedicated to Lord Ram. This Upanishad is Chapter 11 of the current volume.

²There is clear message here which should be interpreted in the correct perspective. Merely repeating the Mantra would be ineffective if there is no sincerity, and the sin is repeated again and again. In other words, the offender should be sincerely regretful of what he has done and make sincere efforts to atone for his sins, even undergo severe punishment as part of the process of repentance for his misdeeds, for willingness to suffer punishment is a sign of sincerity. This punishment is like doing Tapa or severe penance which has an element of ‘fire’ in it; this ‘fire’ of

regret, of repentance and of grief at the unfortunate event that has tainted the otherwise immaculate purity of the 'self' which is the pure conscious Atma or the soul representing divinity and holiness inherent in a man, acts as a cleansing agent and clears his conscious 'self' of any scars associated with the sins and misdeeds that he might have committed in his ignorance, and for which he is really and honestly regretful and sorry.

There is an old adage that to err is human, so it is not as bad to err as it is to repeat the error. Sincere regret would then inspire the man to find ways to clean his tarnished 'self', and the Lord Ram's divine Mantra would act as a spiritual medicine for him, healing his spiritual wound and helping him recover from its ill effects.

³The different hymns mentioned in this verse are the following—(i) Sanat Kumar Sanhita's Ramstavaraj by sage Narad, (ii) Ramashtak by sage Veda Vyas, (iii) Raghunathashtak, (iv) Sita-ram-ashtak, (v) Ram Stotra, and (vi) Ram Stuti. All these beautiful hymns have been included as Addendum no. 1 at the end of this Chapter.

⁴This shows that it is not necessary to stick to any one school of spiritual philosophy to attain emancipation and salvation even as the same medicine might not be suitable for two different patients. Each individual has his unique problems and therefore what is suitable to one individual may not be appropriate for another. The trick is to select what is most appealing to and proper for one's own self, which path is the most easy to follow, and which Mantra or hymns has a greater mental and emotional healing affect on an individual's psyche. Another point to note here is that the Lord emphasized that any hymn composed by a devotee has the same importance as the traditional sacred verses of the scriptures as long as these are sincere outpourings of the heart and done with utmost humility and devotion.]

Canto 2

1-2. Sage Sankadi and others asked Hanuman, 'Oh the strong and valiant son of Anjani! Lord Ram is famous as Tarak and as Brahm (i.e. he is renowned as the one who provides liberation and deliverance to the soul of a creature, as well as is a manifestation of the supreme transcendental Brahm, the Supreme Being himself). We request you to preach his divine and holy Mantras for the benefit of all of us.'

Hanuman replied, 'The root or seed Mantra of Lord Ram consists of the Sanskrit consonant 'Ra' (as in 'run') with the vowel sound 'Aa' attached to it (as in 'round') and a 'dot' on the top (to make the entire letter sound as 'Raan(g) or Ram'). This is a monosyllable word 'Raan(g)'¹ which is a holistic and mystical representation of the entire holiness, sublimity and divinity of Lord Ram. The monosyllable 'Raan(g)' is the Beej Mantra of Lord Ram; it is the seed from which all other divine Mantras of Lord Ram sprout and develop into full-fledged Mantras.

It has the same mystical potentials and divine powers, the same importance, significance and value as the Kalpa tree is for the Gods. [This is the evergreen tree in heaven which is considered as all wish-fulfilling. It gives the Gods whatever they desire from it. Similarly, the Mantra of Lord Ram also grants the devotees with everything they want.]

The Rishi² of this Mantra is Brahma, the creator, himself. [That is, the patron sage or seer who had first visualised it, and is therefore given reverence as the father of this Mantra, is Brahma, the creator of the entire creation, himself. So, what can be more sanctified and divine than this Mantra?]

The Chanda of this Mantra is Gayatri. [A Chanda is a poetic style of composition in which the hymns of the Vedas were composed by Brahma. A Gayatri

Chanda is considered as the best type of Chanda and it has three lines of eight letters each, totaling twenty four letters in all.]

Lord Ram is the Devta of this Mantra. [The Devta is the patron deity to whom the particular hymn or Mantra is dedicated.]

The basic alphabet 'Ra' of this Beej Mantra, or the seed or root Mantra of the Lord, is also the esoteric Beej Mantra for the 'fire element'. In other words, the Mantra of Lord Ram has the magnificent and astounding power and potential of the 'fire element' inherently built into it; it is as glorious and powerful, as effective and dynamic as the fire element.

The long vowel sound represented by the second Sanskrit vowel 'Aa' (as in *master*) that is used as a suffix to this consonant 'Ra' implies the infinite and profound metaphysical and spiritual influence, importance and significance that this Mantra has in terms of its energy and potentials, which are multifarious times more than what the fire element would have had if left to own self. The 'Aa' has a multiplying effect on the fire element's dynamic and astounding powers.

Meanwhile, the 'dot' on the top is like the crown jewel, giving the Mantra its divine authority, holiness and sanctity. The dot represents the undefined and compact atom-like beginning of creation from Brahm whose vivid manifestation Lord Ram is. It was from this 'dot' that the entire creation has 'stretched out as a line to infinity', and it is in this dot that this 'line of creation' would withdraw at the time of conclusion.

The invocation of this mystical, all-powerful, holy and divine Mantra has the power to bestow upon the devotee all the benefits and blessings that he seeks; it fulfills all the desires, aspirations, ambitions, hopes and expectations that arise in the Mana (mind) of the seeker (1-2).

[Note—¹The one-letter Mantra of Lord Ram is thus 'Raan(g)'].

²The *Rishi* is the sage or seer who had first visualised a particular Mantra as a divine formula having stupendous spiritual and mystical powers and potentials. He tested it and verified its potentials and powers before prescribing it as a Mantra that could be used for doing Japa (repetition of some spiritual formula that can give the seeker the benefits that he seeks) or during formal sacrificial rituals. Thus, they rendered the otherwise mere neutral letter or group of letters into something divine and sublime, and infused it with supernatural powers, bestowing them with their renowned importance, significance and value. Therefore, the name of this particular sage or seer was invoked along with the invocation of the Mantra to honour his contribution as is the practice even in modern times when chemicals and formulae and various other scientific discoveries such as stars, comets, galaxies, distant black holes etc., or new concepts in physics, chemistry, mathematics, astronomy and other sciences are named after the scientist who first discovered them.

The difference between a *Rishi* and a *Muni* is that the latter did not divulge their realisation but preferred to keep their spiritual discoveries to themselves as the word 'Muni' is derived from the root Mana means the subtle mind and heart. On the other hand, the 'Rishis' used to preach and teach others about their astounding spiritual realisation and discoveries.]

3-4. The Beej Mantra of the Lord (i.e. 'Raan(g)') has the same mysterious abilities and astounding dynamism, the magnificent esoteric powers and the divine energy of infinite proportions that enables any seed to bring forth a new life and give rise to a complete new generation; it is like the symbolic cosmic seed known as 'Brahm' or the cosmic Consciousness from which this entire creation has unfolded, has been generated, or has come into being.

An aspirant who wishes to receive the divine blessings of Lord Ram, and consequentially attain liberation and deliverance of the soul, should visualise the divine and holy form of the Lord as follows—‘There is a magnificent platform or dais under the Mandar tree (the coral tree) near the banks of the holy river Saryu (on the north of the city of Ayodhya). Upon it is a seat designed as a lotus flower [3].

On this holy seat is seated Lord Ram, whose complexion is dark, in a seating posture known as ‘Viraasan¹’. The upper part of the Lord’s body is held in a posture known as ‘Gyan Mudra²’, while his left hand rests upon his left knee. Sita (his divine consort) and Laxman (his brother and comrade-in-arm) accompany him [4]. (3-4).

[Note—¹The *Viraasan* is a seating posture in which the right leg is bent at the knees and tucked under the buttock, while the body is supported by the toes of this right foot which are pointed inwards for leverage. Meanwhile, the left leg is bent at a right angle at the knee with the sole of the foot placed flat on the ground. The body is thus balanced on the toes of the right leg and the flat sole of the left leg.

²The *Gyan Mudra* is literally the posture adopted when a teacher preaches his disciples. It basically requires that the head is held in a straight alignment with the spine, the right hand is bent inwards at the elbow, with its palm open and facing outwards, the thumb touches the tip of the first finger to form a ring, and the rest of the three fingers stand erect, touching each other. The left hand is placed upon the left thigh so that the palms rest upon the knee joint.]

5. The Lord is immaculate, incorrupt, divine, holy, radiant and self-illuminated like pure crystal, glowing with a self-generated divine hue of immense intensity effusing from his body. The Lord is looking at me with a benevolent and benign smile’—an aspirant desirous of ‘Moksha’, i.e. of liberation and deliverance of the soul, of emancipation and salvation, should meditate upon this view while doing Japa (repetition) of the holy and divine Mantra of the Lord described above for one lakh times. [1 lakh = 1,00,000.] (5).

6. The devotee aspirant should meditate upon the divine name or Mantra of Lord Ram, i.e. the Mantra ‘Ram’, as being a personification of the Parmatma, the supreme Atma or the cosmic Consciousness that is as glorious and splendid as the celestial Sun. this divine Mantra is used for the purposes of doing Japa, or constant repetition of the holy name.

This Mantra of Lord Ram is also regarded as the Mantra of Lord Narayan (because Lord Ram is an incarnation of Lord Vishnu who is also known as Narayan, the Supreme Being), and it is as dynamic, powerful and potential as the living fire element. The sound of this Mantra is equivalent to the cosmic ‘Naad’ that is heard during meditation. [The ‘Naad’ is the background ethereal sound of the universe that reverberates throughout the creation, and whose vibrations are heard as the Mantra OM when a person is submerged in deep meditation.]

Success in reaching this exalted state of existence when the spiritual aspirant can hear the Naad is also equivalent to attaining the Kaivalya form of Moksha—i.e. the spiritual liberation that is only one of its kind. [This is because this Naad is heard only in the higher stages of Yoga, and it is attended with experiencing of immense bliss and ecstasy. This is brought about by the tingling of the sensory nerves that is caused by the massaging effect of the high-intensity vibrations of Naad that is heard when the practitioner of Yoga does Japa with the Mantra ‘OM’. Since the Mantra of Lord Ram is treated as being equivalent to OM, the same effect is created when the Lord’s devotee does Japa with it. The calming effect on the nerves gives at once an

immense feeling of bliss, tranquility, ecstasy and joys. This experience is very unique and cannot be matched by any other thing in this world.] (6).

7-8. 'Ram'—this Mantra consists of two Sanskrit letters 'Raa' and 'Ma'¹. It is like a king or emperor amongst the Mantras, and has the potential to bless the aspirant and the spiritual seeker with the boon of fulfillment of all his wishes, desires and aspirations. This divine name of the Lord is the same as the one letter monosyllable Mantra 'Raan(g) or Ram' described earlier, and has the same Rishi and Devta.

To use the name of the Lord, i.e. the word 'Ram' as a Mantra, one should prefix it with the following six letters or monosyllables which represent the mystical and esoteric Beej Mantras (or the root or seed Mantras) of other glorious elements of creation. They act as different genres of glittering gems and jewels placed on the crown represented by this holy and divine Mantra of the Lord, and not only enhance the beauty and charm of the Lord's fame and glory as represented by the individual Mantra but also render the concerned Mantra with a multiplier effect. These six letters or monosyllables are the following—'OM', 'Hring/Hrim', 'Srim/Sring', 'Kling/Klim', 'Aiyang/Aim' and 'Raan(g)/Raam'².

Thus, when each of these monosyllables is added to the word 'Ram', the total number of letters becomes three (e.g. the monosyllable OM + Raa + Ma = 3 letters, making the complete Mantra as 'OM Ram'). Since there are six monosyllable Mantras that can be used as a prefix to Ram, the total number of Mantras that can be formed are also six in number³.

All these Mantras have the same divine potentials and mystical powers, but the use depends upon the system of worship adopted by the aspirant (7-8).

[Note—¹The two-letter Mantra of Lord Ram is thus 'Ram'. (Raa + Ma)

²These six are called seed or root, or the 'Beej' Mantras. They are monosyllables, and are much like the alphabets used in science and mathematical equations to denote other elements or factors. They encrypt great secret powers of creation in themselves, and must be pronounced and used properly even as the different alphabets standing for different atoms in organic chemistry must be properly placed at their designated places to make any sense out of them; otherwise the entire complex chemical compound represented by these single alphabets or a group of alphabets having a monosyllabic sound would be meaningless. Example of a single alphabet standing for an element is say for instance 'O' standing for Oxygen, 'H' standing for Hydrogen. Example of more than one letter standing for a single element is 'Au' for gold, 'Hg' for mercury, and 'Ag' for silver. Since Au, Hg or Ag stand for a single metal, they are like the monosyllable Beej Mantras in metaphysics which might have more than one alphabet but nevertheless stand for only one single element. For instance, OM has four alphabets, viz. A, U, O and M, but the Mantra itself is regarded as a monosyllabic sound because it refers to only one divine entity Brahm.

Even in algebra, we use alphabets to denote certain things, and then go on calculating on the basis of these hypothetical assumptions to arrive at conclusive results. This system is used in all spheres of science. Therefore we conclude that the use of these 'Beej' Mantras during occult practices and ritualistic forms of formal worship to invoke divine powers and seek results is like the time tested scientific method that is now applied in the sphere of metaphysics.

The seed/root monosyllable Mantra *OM* stands for the attributeless and infinite transcendental supreme entity known as Brahm from which everything that has an existence has its origin. According to Canto 5, verse no. 16-17 of this Upanishad, OM is another name of Lord Ram because the Lord is a personification of Brahm.

The seed/root monosyllable Mantra *Hring/Hrim* stands for the 'Maya Shakti' element of creation. This represents the cosmic energy and divine powers of creation

that create delusions. It is therefore used to enable the worshipper to overcome the delusions and its attendant problems that cause numerous hurdles in the spiritual seeker's efforts to find liberation and deliverance as well as the ultimate Truth of creation which would give him peace of mind and soul.

The seed/root monosyllable Mantra *Sring/Sri* stands for the divine qualities which are like valuable assets for the aspirant. The word 'Sri' means all types of fortunes, wealth, prosperity, property, fame, splendour, magnificence, glory, well beings etc. Hence, this Beej is for Goddess Laxmi or Ramaa, the divine consort of Lord Vishnu, as well as for Sita, the consort of Lord Ram, as she is an incarnation of Laxmi.

The seed/root monosyllable Mantra *Kling/Klim* stands for 'Kaamdeo' who is a manifestation of the cosmic force of Nature that creates natural desires, passions and yearnings. Hence, this Beej Mantra is regarded as the one for 'Kaam' or the natural tendency of a creature to have various desires, passions, yearnings, wishes, hopes and expectations.

The seed/root monosyllable Mantra *Aiyang/Aim* stands for the 'Vaak Shakti' or the power of speech and its patron Goddess Saraswati, the goddess of learning and wisdom. This is because the faculty of speech and acquisition and dispensing of knowledge and skills are integrated with each other.

Finally, the seed/root monosyllable Mantra *Raan(g)/Raam* stands for Lord Ram as well as for the fire element. Hence, it has all the dynamic potentials of 'fire', and is as radiant, energetic and glorious as this element. It is also called the 'Tarak Beej' or 'Tarak Mantra', i.e. the monosyllable mystical formula that can provide to the aspirant the passage by which he obtains final and ultimate liberation and deliverance from this world of delusions and falsehood, and ensures that his soul gets emancipation, salvation and final rest.

Refer also to Ram Uttar Tapini Upanishad, Canto 2. This Upanishad appears as Section no. 2 of Chapter 13 of the current volume.

These root or seed Beej Mantras are used as a prefix or suffix to the main Mantra to have a multiplier effect and enhance the powers of the Mantra.

³The three lettered Mantras for Lord Ram, therefore, are the following—OM Ram; Hring/Hrim Ram; Sring/Srim Ram; Kling/Klim Ram; Aiyang/Aim Ram; and Raan(g)/Raam Ram.]

9. There are two words that are used as a suffix to the divine name of the Lord, and they are a sort of honorable title or honour that is assigned to the concerned Mantra. These two words go to further enhance the dignity, authority, power and honour that the Mantra already possesses. [They are like the various titles and honours that are bestowed in the modern world on people of repute and those who have made some sort of extraordinary contribution to society, literature, sciences etc.—such as the honorary title of 'Doctor' or 'Knighthood' given to some eminent personalities.]

These two words are—'Chandra'¹ and 'Bhadra'².

Thus, now the Mantra 'Ram' has two forms, each having four letters. These two Mantras are the following—'Ram Chandra' (Raa + Ma + Chan + Dra = 4 letters), and 'Ram Bhadra (Raa + Ma + Bha + Dra = 4 letters)',³.

The Rishis and Devtas of these two Mantras are also like the ones as described earlier (9).

[Note--¹The *Chandra* means the moon; it is an epithet indicating that the entity honoured with this title is as beautiful, pleasing, spiritually soothing and enchanting as the celestial moon. The moon is said to be the celestial pitcher of the God's ambrosia which is an elixir that bestows eternity, happiness and bliss. Thus, by suffixing the Mantra of the Lord with this epithet of 'Chandra', it is vested with the special qualities that the Moon God possesses.

²The word *Bhadra* means a gentleman, a courteous and polite person, one who possesses all the noble and auspicious virtues that are expected in someone who is wise, scholarly and learned as well as well cultured and well versed in all the niceties of this world. A person who is exalted, learned, gentle, pious, virtuous, worthy, auspicious and majestic in all his demeanors and thought processes is honoured by this epithet. So this appendage to the glorious name of the Lord adds more shine and sheen to it as if it has been honoured by an additional title. It is not that the Mantra would be of any less value if these epithets were not affixed or suffixed to it—for it has been already emphasized that the very foundation of the Lord's name, called the 'Beej Mantra' which is the consonant 'Ra', is the seed/root Mantra for the fire element also, and nothing in this entire creation is more effective, more potent, more powerful, more purifying, and more dynamic than the fire element. But it has been a convention of honouring great souls with additional titles or epithets just to show one's respect to them.

³The four letter Mantras for Lord Ram are thus—Ram Chandra and Ram Bhadra.]

10-11. The five lettered Mantra of Lord Ram is the following—Raa + Maa + Ya + Na + Maha = 5 letters, making the full Mantra as 'Raamaaye Namaha'*. The patron sage or seer of this Mantra, called its Rishi (the patron sage or seer who had first discovered it as a holy mystical formula) is Vishwamitra; the composition style of this Mantra, called its Chanda, is 'Pankti'¹ [10]; the patron deity to whom it is dedicated is obviously Ram Bhadra (the exalted, learned, gentle, pious, virtuous, worthy, auspicious and majestic Lord known as 'Ram'); and its divine and stupendous powers, potentials, strength and vitality is represented by the fire element encrypted in its Beej Mantra 'Raan(g)'. [In other words, the powers and potent of this Mantra is equivalent to that possessed by the fire element; it is as glorious, as radiant and as splendid as the fire element.]

This divine, esoteric, sublime, mystical and spiritually empowered ethereal Mantra is invoked and trust pledged in its astounding supernatural potentials and powers by reposing it on various important locations of the body and its vital parts, such as the centre of the top of the head or skull (Brahm-randhra), the center of the eyebrows, the heart, the navel, and both the thighs of the two legs². (10-11).

[Note—¹The *Pankti Chanda* is a style of poetic composition having five lines or stanzas, each having eight letters, bringing the total to forty letters. Here the emphasis is on symmetry, because the word 'Pankti' also means symmetry, or a symmetrical line. In other words, all the five letters or syllables of this Mantra—Raamaaye Namahe—have equal metaphysical and spiritual value; none is more or less important or potential or powerful than the other.

²This process is called *Anga-Nyas*. The word 'Anga' means the body and its various parts, and 'Nayas' means to invoke, deposit, repose, trust, pledge, entrust, to keep a thing in mind, etc. This is a ritualistic process in which certain parts of the body are touched and certain Mantras are said. 'Anga-Nyas' also means the purification of the individual parts of the body and the installation of the individual letter of the Mantra, complete with its full potentials, at those points.

The various locations on the body where Anga-Nyas is done have great metaphysical significance. According to verse no. 43 below, these locations are the following—Brahm-randhra (which is the hair-like slit on the top of the skull), the forehead, the central point of the eyebrows (where the symbolic third eye of wisdom is said to be located), the upper palate, the two earlobes, the heart, the navel and the two thighs = 10 sites.

Verse no. 23 of this Canto 2 specifies the points of the body where Anga-Nyas is to be done. They are Brahm-randhra, the center of the eyebrows, the heart, the navel, the knees, and the feet.

The human body is a microcosm of the cosmos, because according to the genesis of creation the Viraat Purush, the macrocosmic, all-encompassing and all-inclusive manifestation of the supreme transcendental Brahm, had metamorphosed in the shape of the human body, and therefore this body is a manifestation of the entire creation including all its Gods and all its astounding potentials. {Refer Aiteriya Upanishad of Rig Veda tradition, Canto 1, sections 1-3; Brihad Aranyaka Upanishad of Shukla Yajur Veda tradition, Canto 1, Brahman 2, verse no. 7; Canto 1, Brahman 4, verse no. 7, 11-13.}

The creation has been visualised as having three divisions which form the so-called three worlds—viz. the heavens represented by the head of the human body where the Brahm-randhra, forehead and the eyebrows are located; the terrestrial world or the earth symbolised by the heart and the navel; and the nether world by the legs and the two thighs. It must be noted that the two earlobes stand for the two extreme directions of the cosmic globe. So, when the aspirant does Anga Nyas with any Mantra on these specific points, he symbolically purifies these points on his body and empowers them with the mystical and ethereal powers of the powerful forces of Nature which these Mantras embody as mystical formulas encrypting astounding energy and forces of creation. This is a perception which implies that the ethereal and mystical powers and potentials of the Mantras representing the stupendous forces of Nature that control creation, right from its conception to its development, growth, expansion, sustenance and conclusion, are invoked and established throughout the breadth and length of this visible creation manifested in the body of the aspirant. In other words, the aspirant hopes that he would be empowered with all the glorious virtues and auspicious powers and stupendous potentials and majestic authority vested in the Viraat Purush at the cosmic level.

*The five-letter Mantra of Lord Ram is 'Raamaaye Namaha']

12-15. The aspirant devotee should invoke the blessings of Lord Ram with the aforesaid Mantras and their especially empowered letters. He should meditate upon the divine and glorious vision of Lord Ram as follows—There is a Kalpa tree (the evergreen all wish-fulfilling tree of the Gods) in the center of the Nandan Van (the heavenly garden). Underneath it is a seat made of flowering creepers. [12].

Laxman, Lord Ram's younger brother, is glancing obliquely, from the corner of his eyes, at the Lord's glorious and magnificent bow.

Janki (Sita, his divine consort) is waving the hand held fan for the Lord. [13].

There is a crown of matted hairs on the Lord's head; his complexion is dark, and he is surrounded by sages and seers. Laxman is standing beside him holding the ceremonial umbrella which is adorned by flowers of all kinds. [14].

The Lord, who is the slayer of the demon Ravana, is seated gracefully, with dignity, calmness and contentedly, showing benevolence and cheerful demeanour. He is attended to by his two companions, Sugriv (the monkey king of Kishkindha) and Vibhishan (the demon king of Lanka).

A person who desires victory over any hurdle in this world should meditate upon this glorious and magnificent view of the Lord, and repeat his divine ethereal Mantras for one lakh times. [1 lakh = 1,00,000.] [15]. (12-15).

16. When the Mantra 'Ramye Namaha' is prefixed by any of the following five mystically empowered Beej Mantras (or seed Mantras) of the primary forces of Nature, it becomes a six-lettered Mantra, and of five types¹. These five Beej Mantras are 'Raam(g)' for Lord Ram, 'Kling/Klim' for Kaam Shakti (the power of desires), 'Hring/Hrim' (Maya-Shakti or energy and dynamism of delusions), 'Aiyang/Aim'

(for Vaak or faculty of speech), 'Sring/Srim' (for Laxmi or prosperity and well being).

This cluster of divinely charged and eclectic ethereal Mantras can bestow the aspirant with the four legendary rewards of Artha (financial well being and prosperity), Kaam (fulfillment of all wishes), Dharma (auspiciousness, righteousness, probity and propriety), and Moksha (liberation and deliverance; emancipation and salvation) (16).

[Note—¹The cluster of six Mantras of six letters or syllables each is the following—
(1) Raan(g)/Raam Raamaaye Namaha (Raan(g)/Raam + Raa + Maa + Ye + Na + Maha = 6). (2) Kling/Klim Raamaaye Namaha (Kling/Klim + Raa + Maa + Ye + Na + Maha = 6). (3) Hring/Hrim Raamaaye Namaha (Hring/Hrim + Raa + Maa + Ye + Na + Maha = 6). (4) Aiyang/Aim Raamaaye Namaha (Aiyang/Aim + Raa + Maa + Ye + Na + Maha = 6). (5) Srim/Sring Raamaaye Namaha (Srim/Sring + Raa + Maa + Ye + Na + Maha = 6).]

17. When each of the fifty Beej Mantras for the fifty Matrikas¹, such as the Beej Mantras of Laxmi (prosperity; welfare—which is 'Sring/Srim'), Vaak (speech—which is 'Aiyang/Aim'), Manmath or Kaam (natural desires—which is 'Kling/Klim'), etc. are added to the five letters of the Mantra for Lord Ram, viz. 'Raamaaya Namaha', we get a six-letter Mantra.

[For instance, if we use the first Beej Mantra 'Sri', we get the following Mantra—'Sri Raamaaya Namaha'. The six letters are Sri + Raa + Maa + Ye + Na + Maha = 6.

Since there are fifty Matrikas, each having a Beej Mantra, we will have a total of fifty such Mantras.] (17).

[Note—¹The Beejnighantu text (Beej = seed Mantra; Nighantu = dictionary) written by Bharirava lists 50 such Beej Mantras and describes what they stand for. Another text known as Beej-vidhaan has 75 lines in the poetical style called the Anushtup Chanda describing the Beej Mantras like Hrim, Strim, Aim, Krim etc. representing different deities such as Aindri, Vaamekshana, Saraswati, Kali etc. respectively. Similarly, the Ekakchar-kosha of Purshottamadeva lists the Beej Mantras of various Gods and Goddesses, such as 'A' for Vasudeo, 'Aa' for Pitaamaha (Brahma the creator of the visible world), 'Pa' for the Wind God called Pawan, 'Saa' for Laxmi the goddess of wealth as well as for Shiva the third God of the Trinity. Another text called Mantraartha-bidhan by Varadaatantra also lists the Beej Mantra such as 'Haum' for Shiva, 'Dum' for Goddess Durga, 'Krim' for Goddess Kalikaa, 'Hrim' for Goddess Bhuvaneshwari, 'Klim' for Kaamdeo-cupid, the patron god of love and passion, 'Gam' for Ganesh, 'Kshraum' for Narshingh, the half-lion and half-man incarnation of Vishnu, etc. According to Maatrikaanighantu by Mahidasa, the Beej Mantras and even the word Mantras of certain chief deities are as follows—'A' stands for Shrikantha (Shiva, the one with a blue-tinged throat), 'Keshava' for Krishna, 'Vaata' for the Wind God of Pawan, 'Ka' for Maya, 'Ma' stands both for Vaikuntha, the abode for Lord Vishnu who is the second of the Trinity Gods and is responsible for sustenance of creation, as well as for Mahaakaal, one of the names of Shiva, 'Ya' stands for Yamuna etc.

The *Maatrikaa* of a Mantra are the various Sanskrit letters or alphabets that collectively form the text of the Mantra. The word *Maatrikaa* literally means 'a little mother'. Since the Mantra represents the cosmic divinity known as the supreme transcendental Brahm in its numerous manifestations known as various Gods, the letters are called the *Maatrikaas* because they empower this Mantra with the stupendous mystical powers that this Mantra possesses much like Brahm employing his cosmic dynamic energy to enable him to initiate and then sustain and develop this creation, and even bring about its conclusion.

Brahm initiated this creation with the help of his cosmic dynamic powers and energy represented and encrypted in the Beej Mantra. But as it happened, the unfolded creation had numerous Gods and Goddesses. These Gods actually symbolise the various aspects of Brahm's cosmic powers and authority, and the Goddesses represent their empowerment and strength to give effect to their mandate. This is a classic case of delegation of authority.

References Krishna Yajur Veda = Brahm Vidya Upanishad, verse no. 62-63; Yogtattva Upanishad, verse nos. 21-22.]

18. When the Beej Mantra (for Laxmi, which is) 'Srim/Sri/Sring', for Maya (i.e. delusions—which is 'Hring/Hrim'), and for Kaam or Manmath (i.e. desires—which is 'Kling/Klim') are added as a prefix as well as a suffix to the four letter Mantra for Lord Ram, viz. 'Ram Bhadra' and 'Ram Chandra' (as given earlier in verse no. 9 above), we have two sets of six-letter Mantras, one with 'Ram Bhadra' and the other with 'Ram Chandra' in the center¹.

These Mantras are divinely empowered to bless the aspirant devotee with all that he desires. They are all wish-fulfilling (18).

[Note—¹The two sets of Mantra would be as follows—

(a) (i) Sri Ram Bhadra Sri (Sri + Raa + Ma + Bha + Dra + Sri = 6 letters). (ii) Hring/Hrim Ram Bhadra Hring/Hrim (Hring/Hrim + Raa + Ma + Bha + Dra + Hring/Hrim = 6 letters). (iii) Kling/Klim Ram Bhadra Kling/Klim (Kling/Klim + Raa + Ma + Bha + Dra + Kling/Klim = 6 letters).

(b) (i) Sri Ram Chandra Sri (Sri + Raa + Ma + Cha + Ndra + Sri = 6 letters). (ii) Hring/Hrim Ram Chandra Hring/Hrim (Hring/Hrim + Raa + Ma + Cha + Ndra + Hring/Hrim = 6 letters). (iii) Kling/Klim Ram Chandra Kling/Klim (Kling/Klim + Raa + Ma + Cha + Ndra + Kling/Klim = 6 letters).]

19. If any of the six letter Mantras of Lord Ram (as described in this Upanishad)¹ is suffixed by the words 'Swaha', or 'Hoong/Hoom-phat', or 'Namaha', then the total number of these six letter Mantras become one hundred and twenty eight (19).

20. The Rishis of these Mantras (i.e. the patron sages or seers who had first used them in their spiritual practices) are Brahma (the creator), Sammohan Shakti¹ (personification of the magical powers to hypnotize and create an illusion of reality; the delusion creating powers of the creator), Dakshinmurti (the south-facing Lord Shiva), sage Agastya², and Lord Shiva (20).

[Note—¹Refer verse no. 88 of this Canto 2.

²Sage Agastya— Sage Agastya—Sage Agastya is a renowned sage who had composed several of the hymns of the Rig Veda, e.g. Rig Veda Sanhita, 1/166-191. He is known as a 'Brahm-rishi' or a celestial sage tracing his origin to the creator Brahma.

He was born to sage Pulastya and his wife Havirbhuk. During this birth, his other brother was sage Visrawaa. It is also believed that in the Swayambhu Manvantar (age of Manu named Swambhu), he was born as the son of sage Pulastya, but in that birth he was named Dattoli.

According to another version, he was the son of Mitra and Varuna. In this version, he was born in a jar or pitcher known as 'Kumbha'. Hence, he is also known as Kumbhaja (born out of a Kumbha), Kumbhodbhava (rising out of a Kumbha), Kalasi-suta (son born from a Kalas or a pitcher or jar). During this birth, his twin brother was sage Vashistha, the great sage who was the court priest of the kingdom of Ayodhya where Lord Ram was the king.

His wife was a princess of the kingdom of Vidharva, and her name was Lopaamudraa, also known as Kaaveri. The sage had a son whose name was Drudhaasya, also known as Idhmavaaha. His chief disciple was Agniveshya.

Sage Agastya did severe Tapa and had vast knowledge. He is said to have destroyed the two demons named Ilvala and Vaataapi. The sage had stunted the growth of Mt. Vindhya which was growing and expanding endlessly so much so as to obstruct the light of the sun.

Once, when Indra had killed the demon Vrittaasur, other demons named 'Kaaleya' managed to escape and hid themselves under the water of the ocean. From there they began terrorizing the sages and seers. They stayed under water during daytime and came out at night to torment and devour these sages. These demons had not spared even such renowned sages of the time as Vashistha, Chyavan and Bharadwaj, because the demons attacked their hermitages and killed the sages and seers who lived there. It was then that the Gods requested sage Agastya to somehow expose the demons. At this, the sage had drunk the water of the ocean in one gulp so as to expose the demons. The Gods were then able to destroy them.

There is a legendary story how once sage Agastya has converted king Nahush as a serpent. The story goes that once Indra, the king of Gods, was demoted from his exalted stature due to the curse of killing some Brahmins, and king Nahush had taken his place. Nahush lustfully eyed the consort of Indra, named Indrani. To punish him, Brihaspati, the moral preceptor of Gods, devised a stratagem by which Indrani requested Nahush to come to her riding a palanquin that was never used by anyone earlier. Overcome and blinded by passions, Nahush forgot everything about propriety and probity, and he summoned all the great sages and seers of the time to act as carriers or bearers of his palanquin. Humble sages and seers did not mind because Nahush was now elevated to the stature of Indra, the king of Gods. Nahush was so eager to reach heaven as quickly as possible that he kept prodding these sages to walk faster. Enraged, astonished and peeved at this nonsense being perpetrated by the haughty king, sage Agastya had then cursed him to become a great and poisonous snake.

He lived in the Dandakaaranya forest when Lord Ram met him. The sage had then given some invincible divine weapons to the Lord which stood him in good stead during the epic war of Lanka as well as to overcome the demons whom the Lord encountered and destroyed during his sojourn in the formidable forest.

The sage is said to have brought about reconciliation between Indra, the king of Gods, and Maruts, the Wind Gods.

A whole class of people came to be known after him, and in due course the term 'Agastya' became a title and sort of honour given to learned sages and seers who were experts in the philosophy and knowledge that sage Agastya was an expert in and had preached during his lifetime. The sage has been made immortal by finding a place amongst the brightest stars in the sky. He is identified with Canopus, which is the brightest star in the sky of south India. The Canopus has been named after this sage as 'Agastya', and seeing this star in the sky when the sun is in the middle of Virgo (Kanyaa) sign of the zodiac and worshipping him at night is regarded as an auspicious deed. This is a symbolic way of honouring the sage by elevating him to an exalted stature of a 'bright star' and recognizing his stellar qualities.

He is regarded as the one who had created the Tamil language of South India. He is accredited as being the author of several treatises on medicine, mysticism and magic. One of his books is the 'Agastya Sanhita' which elaborately deals with ritualistic forms of worship.

It is said that once sage Agastya and the noble king named Shankha had a divine vision of Lord Vishnu at the banks of river Swami-pushkarni.]

21. The Chanda, i.e. the style in which these Mantras have been conceptualized and propagated, is called Gayatri. [This composition style has three-lined verses having eight letters in each, bringing the total number of letters to twenty four. The implied meaning here is that these Mantras have the same metaphysical and spiritual value as the hymns of the Vedas composed in this particular style.]

The patron deity of these Mantras is Lord Ram.

If the Beej Mantra for Kaam (desires) is added to the six letter Mantras (instead of the suffixes used in verse no. 19), then the resultant Mantra would have sage Vishwamitra as its patron Rishi. [In other words, the six-letter Mantra of Lord Ram with the suffix of 'Kling/Klim', which is the Beej Mantra for Kaam, was first conceptualized and practiced by sage Vishwamitra.] (21).

22. The Chanda of this Mantra (described in verse no. 21) is Gayatri in its primary form. Its patron deity is again Lord Ram. [This is obvious because all the Mantras in this Upanishad are dedicated to Lord Ram and no one else.]

Its Beej and Shakti (the root and the dynamic powers and energy) of this particular Mantra is the same as for those of other six letter Mantras with suffixes.

All the six letter Mantras (as described in verse nos. 16-18) are used to do 'Anga-Nyas'. [The process and concept of 'Anga-Nyas' has been described in verse nos. 10-11 above in this Canto 2.] (22).

23. The six cardinal points of the body which are considered as important as far as mystical form of worship using Mantras are concerned are the Brahm-randhra (the top of the skull), Bhru-madhya (the central point of the two eyebrows), the heart, the navel, the knees and the legs (below the knees).

'Anga-Nyas' is done by these Mantras on these six points. That is, these parts are touched by the fingers and the Mantras are said so as to invoke their mystical powers and make the body purified, holy and empowered. The Mantras and their patron deity, i.e. Lord Ram in this case, are made to take their seat on the body so as to sanctify it and make it a de-facto shrine of the Lord. It's like baptism of the body by using holy Mantras.

Another alternative is to do Anga-Nyas by taking the Beej Mantra of Lord Ram, which is 'Raam(g)/Raam', and adding it as a prefix to the six letter Mantras of the Lord (as described in verse no. 16-18 above).

[For instance, one of the six letter Mantras is 'Raam(g)/Raam Raamaaye Namaha' (Raam(g)/Raam + Raa + Maa + Ye + Na + Maha = 6) as mentioned in verse no. 16. Now, while doing Anga-Nyas, the Beej Mantra 'Raam(g)/Raam(g)' is prefixed to each of this Mantra's syllables. Hence, the resultant six Mantras with which Anga-Nyas is to be done are the following—'Raam(g)/Raam + Raam(g)/Raam'; 'Raa + Raam(g)/Raam'; 'Maa + Raam(g)/Raam'; 'Ye + Raam(g)/Raam'; 'Na + Raam(g)/Raam'; 'Maha + Raam(g)/Raam'.] (23).

24. The aspirant devotee should meditate as follows—'I am worshipping Lord Ram who looks eternally enchanting and magnificent with his radiant dark-blue complexion that resemble the hue of the dark rain-bearing clouds. The Lord is seated in the sitting posture which combines two Aasans (meditative sitting postures) known as Viraasan and Gyan Mudra (described in verse no. 3-4). The palm of his left hand rests on his left knee.

The Lord looks most glorious and adorable with numerous beautiful ornaments such as armbands and crown etc. decorating his divine body. It is radiant with a divine halo which effuses from and spreads all around him.

Sita, his divine consort, is seated near him. She holds a lotus in her hands, is as radiant and dynamic in appearance as electric, and is being lovingly looked at by the Lord.

I offer my reverential worship and pay my obeisance to the Lord.' (24).

25. When the two letter word 'Namaha' (Na + Maha)—which stands for showing the greatest of honour and reverence for the deity by bowing before it and literally indicates that the devotee is surrendering before the deity with the greatest of humility and submission—is added as a suffix to the two five-letter Mantras 'Ram Chandraaye' and 'Ram Bhadraaye'¹, the resultant two seven letter Mantras become 'Ram Chandraaye Namaha' and 'Ram Bhadraaye Namaha'².

These two seven letter Mantras of Lord Ram are the fulfillers of all the wishes and desires of the devotee (25).

[Note—¹The five lettered Mantras are as follows—(1) Ram Chandraaye = Raa + Ma + Cha + Ndraa + Ye = 5 letters. (2) Ram Bhadraaye = Raa + Ma + Bha + Draa + Ye = 5 letters.

²The final seven lettered Mantras are as follows—(1) Ram Chandraaye Namaha = Raa + Ma + Cha + Ndraa + Ye + Na + Maha = 7 letters. (2) Ram Bhadraaye Namaha = Raa + Ma + Bha + Draa + Ye + Na + Maha = 7 letters.]

26. If the ethereal universal monosyllable Mantra 'OM' (representing the supreme transcendental Brahm or Pranav) is added as a prefix to these twin seven-letter Mantras (mentioned in verse no. 25), they become eight lettered Mantras. [That is, they become—(1) 'OM Ram Chandraaye Namaha', and (2) 'OM Ram Bhadraaye Namaha'.]¹

Another eight lettered Mantra is 'OM Raamaaye Hung/Hum Phat Swaha'^{2*}. This Mantra uses the Beej Mantra of the fire element as a suffix, and the word 'Swaha' is a universal Mantra pronounced when anything is offered to the sacred fire (26).

[Note—¹The two eight-lettered Mantras of Lord Ram are the following—(i) OM Ram Chandraaye Namaha = OM + Raa + Ma + Cha + Ndraa + Ye + Na + Maha = 8 letters. (2) OM Ram Bhadraaye Namaha = OM + Raa + Ma + Bha + Draa + Ye + Na + Maha = 8 letters.

²The third eight-lettered Mantras of Lord Ram is the following—OM Raamaaye Hung/Hum Phat Swaha = OM + Raa + Ma + Ye + Hung/Hum + Phat + Swa + Ha = 8 letters.]

27-28. The first two eight-lettered Mantras (as mentioned in verse no. 26; note no. 1) have the same patron sage or seer called the Rishi, the same composition style called the Chanda, and the same patron deity called the Mantra's Devta as the other six-letter Mantras (mentioned in verse nos. 16-18).

The third eight-lettered Mantra (as mentioned in verse no. 26; note no. 2) has Lord Ram as its Rishi [27], Gayatri as the composition style called the Chanda, Lord Ram as the patron deity called the Devta, OM as its Beej (basis, foundation, origin), and Sri as its Shakti (dynamic energy) [28]. (27-28).

29. A wise aspirant should do 'Anga-Nyas' on six cardinal points of the body by devoutly pronouncing the divinely empowered Mantra 'OM Sring Raamaaye Namaha' (29).

[Note—The importance and the process of doing Anga Nyas have been described earlier in this Canto.]

30. The next Mantra is also of eight letters, and it is 'Glong Hring/Hrim Namaha Raamaaye Glong',¹

This Mantra includes the root or seed Mantra encrypting the divine energy of Lords Ram and Shiva as well as Uma, the divine consort of Shiva and regarded as the great cosmic Mother. This Mantra is especially empowered to bestow wealth and prosperity to the devotee who uses it for his ritualistic worship (30).

[Note--¹Glong + Hring/Hrim + Na + Maha + Raa + Maa + Ye + Glong = 8 letters.]

31. The patron Rishi of this Mantra is Sada-Shiva (the eternal, truthful Lord Shiva); its composition style, called its Chanda, is Gayatri; its patron deities are Lord Shiva (the third of the Trinity Gods; the concluder of creation), Uma (the divine consort of Shiva, and the cosmic Mother), and Lord Ram himself (31).

32. The monosyllable 'Glong' in this Mantra stands for the worship of Lord Sada-Shiva (the eternal, truthful Lord Shiva); the monosyllable 'Hring/Hrim' stands for the cosmic Maya Shakti or the dynamic powers and energy of the Supreme Being manifested as goddess Uma (or Parvati, the divine female aspect of Sada Shiva; the cosmic Mother); and 'Namaha Raamaaye' is indicative of Lord Ram before whom the devotee has submitted himself, before whom he bows, and to whom he pays his greatest of obeisance, reverence and homage.

While using this Mantra for worship purpose, the aspirant devotee should meditate as follows—'I worship and contemplate upon Lord Ram in the form of Lord Sada-Shiva who has three eyes, and hence called 'Tri-Netra' (two conventional eyes and one eye of wisdom located in the middle-point of the eyebrows), who wears a crescent moon on his forehead, and hence called 'Ardha Chandra Dhaari', who holds a trident in his hands, and hence called 'Trishul Dhaari', and who has his entire body smeared with ash of the sacrificial fire (32).

33. Lord Ram in his divine form as Lord Sada-Shiva is most charming and bewitching in appearance. In fact, he epitomizes the ultimate dimension of magnificence, glory, majesty, beauty and charms. He wears the crescent moon on his forehead, has the sacred ash of the fire sacrifice smeared on his divine body, holds a majestic snare or loop, a goad or a trident or a spear, a bow and an arrow in his (four) hands, and has three eyes. I meditate upon this divine form of the Lord with the greatest of humility and reverence.' (33).

[Note—It is important to note here that the great philosophy of 'non-duality' or 'Advaitya' is being invoked here to establish oneness between Lords Ram, Shiva and Vishnu in this verse. The fact is that only Lord Vishnu has four hands and holds the weapons as mentioned here, and Lord Shiva is well known to have the moon on his forehead, ash smeared on his body, and sport three eyes. The devotee meditates on the cosmic form of Lord Ram here, as he visualizes Lord Ram as being Vishnu and Shiva at once.]

34. Meditating in this way, the aspirant should repeat the letters or syllables of the Mantra (i.e. do Japa) for one hundred thousand times. Then one should offer oblations

of water in a ritual called 'Tarpan', followed by a ritualistic fire sacrifice using fruits of the Vilva tree (wood apple tree), flowers of the lotus plant, sesame seeds, clarified butter (Ghee), etc. (34).

35-36. By doing so, all types of divine and auspicious achievements as well as mystical powers and energy that are much sought after by even the Gods are easily available to the aspirant.

The next eight-letter divine Mantra of Lord Ram is 'Sri Raamaha Sharnam Mam'¹. [The Mantra means 'I seek refuge and take shelter in the divine and august feet of Lord Ram.']

The patron Rishi (sage or seer who had first visualised it and given it the status of a divine mystical formula) of this Mantra is Brahma the creator; its composition style called Chanda is Gayatri; its patron deity known as the Devta is Raghav (another name of Lord Ram because he manifested himself as an incarnation in the race of Raghu kings of Ayodhya); its Beej (seed or root) Mantra is 'Sri' (literally meaning all the auspicious qualities and eclectic virtues that anyone can ever hope to possess, such as having majesty, renown, dignity, glory, honour, authority, fame and splendour that exist in this creation); and its Shakti (i.e. its dynamic energy, powerful force, empowerment and divine authority) is represented by the word 'Mam' (literally meaning 'me', and pronounced as in *come*).

This Mantra is invoked to please Lord Ram (as it involves complete surrender of the devotee at the holy divine feet of the Lord).

The process of 'Vinigyog', i.e. invoking the blessings of Lord Ram and reposing utmost faith in him, should be done by this Mantra (35-36).

[Note—¹This Mantra has the following eight letters—Sri + Raa + Maha + Sha + Ra + Nam + Ma + Um = 8 letters.]

37. The aspirant devotee should meditate and contemplate upon the divine vision of Lord Ram as follows—'I worship and meditate upon Lord Ram whose complexion is glowing with the light that emanates from the wonderful ornaments worn by him. These ornaments, such as a Karnphool (ear ring), Angad (a bracelet worn on the upper arm) and Kankan (a bracelet or ornamental thread worn on the wrists), are studded with priceless gems.

He has a ceremonial umbrella, which is as magnificent and glorious as millions of full moons in its beauty and splendour, over his head.

He is seated in a majestic pavilion having sixteen thousand golden pillars. He is surrounded or attended to by his ardent followers and attendants such as his own brothers Bharat amongst others. And he looks most charming, wonderful and majestic in his dark-complexioned body' (37).

38. This eight-lettered Mantra 'Sri Raamaha Sharnam Mam' is complete and all sufficient in every respect. It can bestow all the benefits that one can ever hope to get by any kind of divine intervention of any God by using any Mantra dedicated to any of the Gods.

This single Mantra has the divine power and glorious potentials to bless the devotee with all the imaginable boons that he can ever hope to have. It gives eternal and everlasting rewards (i.e. the boons that this Mantra grants the aspirant devotee are of a permanent nature) in the form of permanently eliminating all his worldly faults, such as his having greed, yearnings and rapacity for perishable things of the material

and impermanent world (instead of having spiritual leanings and having divine expectations such as the wish for obtaining emancipation and salvation).

What is the use of invoking other Mantras (of any other deity) which require a lot of efforts to be successful, which give rewards or fruits that are not permanent, and which entail a lot of worldly hardships and unnecessary toil, when the same, rather better and more permanent rewards, can be had by invoking this single Mantra of Lord Ram (38).

39. If the six Beej (seed or root) Mantras (which are—OM, Sring/Srim, Hring/Hrim, Kling/Klim, Aiyang/Aim and Raan(g)/Raam—see verse no. 8) are used as a prefix of this eight-lettered Mantra ‘Sri Raamaha Sharnam Mam’, then it acquires seven forms, each of nine letters¹.

If the ethereal universal Mantra OM standing for the supreme transcendental Being (Brahm) is added as a prefix and a suffix to the basic Mantra ‘Raamaha Sharnam Mam’, then the resultant Mantra becomes a nine-lettered Mantra as follows—‘OM Raamaha Sharnam Mam OM’². [The brief meaning of this universal Mantra of submission to the Lord is—‘OM salutations! I seek and take refuge in the holy august feet of Lord Ram who is none other but the supreme Brahm himself.’]

It is invoked in the same way as the eight-lettered Mantra, and its ‘Anga-Nyas’ is also done in the same manner as is done for all other divine Mantras (39).

[Note—¹The seven forms of this Mantra are the following—(1) ‘Sri Raamaha Sharnam Mam’; (2) ‘OM Raamaha Sharnam Mam’; (3) ‘Sring/Srim Raamaha Sharnam Mam’; (4) ‘Hring/Hrim Raamaha Sharnam Mam’; (5) ‘Kling/Klim Raamaha Sharnam Mam’; (6) ‘Aiyang/Aim Raamaha Sharnam Mam’; and (7) ‘Raan(g)/Raam Raamaha Sharnam Mam’.

²The nine letter Mantra is ‘OM Raamaha Sharnam Mam Om’ = OM + Raa + Maha + Sha + Ra + Nam + Ma + Um + OM = 9 letters.]

40. The nine-lettered Mantra (as described in verse no. 39) is called ‘Mantra Raaj’ or the king amongst the Mantras of Lord Ram. It gives the aspirant all that he desires, besides bestowing upon him greatness and majesty.

The ten-letter Mantra of Lord Ram is ‘Janki Vallabhaaye Swaha Hum’¹. [This Mantra means ‘I offer my oblations to the dear Lord of Janki (Sita) who is as powerful as the fire element and its personification.’] (40).

[Note—¹The ten letters of this Mantra are the following—Jaa + Na + Ki + Va + Lla + Bhaa + Ye + Swa + Ha + Hum = 10 letters.]

41-42. This ten letter divine Mantra of Lord Ram (described in verse no. 40) is a bestower of all auspiciousness to the worshipper, and is a fulfiller of all his wishes, desires and aspirations.

The patron Rishi (sage or seer) of this ten lettered Mantra is Vashistha [41]; its style of composition, called a Chanda, is Viraat¹; its patron deity is Lord Ram himself; its Beej (seed or root) Mantra upon which it is based or which forms its foundation is ‘Janki Vallabhaaye’; and its Shakti, or its intrinsic mystical powers, dynamic energy and divine potentials which render this Mantra with its divine glory, authority and powers, is ‘Swaha’ (because this word is pronounced when offerings are made to the sacrificial fire, and therefore the use of this word with the Mantra implies that the stupendous powers of the Fire God are being invoked by the aspirant).

Its ‘Anga-Nyas’, i.e. its invocation and installation on the various parts of the body of the worshipper, is done by employing the Beej Mantra (i.e. the seed/root monosyllable word) for Kaam (meaning fulfillment of desires and wishes), which is

‘Kling/Klim’. [That is, this Mantra has the mystical powers to fulfill all the wishes of the aspirant devotee. With ‘Kling/Klim’, the Mantra becomes—‘Kling/Klim Janki Vallabhaaye Swaha’.] [42]. (41-42).

[Note—¹The *Viraat Chanda* is one in which the verse has four lines, each having ten letters, bringing the number of letters to forty.]

43. Each of the ten letters of this Mantra are used to do ‘Anga-Nyas’, or the purification of the individual parts of the body and the installation of the individual letter of the Mantra, complete with its full potentials, at those points.

The ten points of the body where this Anga-Nyas is done are the following—the head, the forehead, the middle of the eyebrows, the palate in the mouth, the two ears, the heart, the navel, and the two knees (i.e. upon the two legs) (43).

[Note—The Anga-Nyas with the ten letter Mantra prefixed by the Kaam Beej ‘Kling’ as described in verse no. 42 is done as follows—(1) The letter ‘Kling’ on the head = first place; (2) The letter ‘Jaa’ on the forehead = second place; (3) The letter ‘Na’ on the center of the eyebrows = third place; (4) The letter ‘Ki’ on the palate = fourth place; (5) The letter ‘Va’ on one ear = fifth place; (6) The letter ‘Lla’ on the other ear = sixth place; (7) The letter ‘Bhaa’ on the heart = seventh place; (8) The letter ‘Ye’ on the navel = eighth place; (9) The letter ‘Swa’ on one knee = ninth place; and (10) The letter ‘Ha’ on the other knee = tenth place.]

44. The aspirant devotee should meditate and contemplate upon the divine vision of Lord Ram as follows—‘In the divine city of Ayodhya there is a golden pavilion studded with uncountable precious gems. In it, a special platform has been decked up with the flowers of the Mandaar tree (the coral tree), and it has a magnificent archway decorated with beautiful buntings, hangings and festoons of various kinds (44).

45. Lord Ram is seated on a throne made of (i.e. decorated with) flowers.

Sitting in celestial chariots or magnificent aerial vehicles, the divine attendants of Lord Vishnu as well as other Gods and holy Spirits are in attendance (45).

46. All of them are praising the Lord by singing or chanting his glories by way of sacred hymns.

Great sages, accompanied by the Lord’s ardent devotees such as Prahalad as well as other followers and attendants, are busy serving the Lord.

To the left of the Lord is Sita (his divine consort). His younger brother Laxman is too engaged in serving the Lord along with Sita and others (46).

47. Lord Ram is dark complexioned (like the deep blue sky, or like the dark rain-bearing clouds of the rainy season) with a cheerful face, and is adorned with all possible ornaments and decorations befitting his exalted stature.’

Holding this glorious and divine vision of the Lord in sight, the aspirant devotee should concentrate his mind exclusively upon the magnificent, holy and divine vision of the Lord, and eliminate all sorts of other visions that might be cluttering his imaginative mind. Depending upon the number of letters in the Mantra used to worship the Lord, the aspirant devotee should repeat that Mantra for one lakh times (i.e. for 1,00,000 times) (47).

48-49. The next ten-lettered Mantra of Lord Ram is the following—‘Raamaaye Dhanushpaanaye Swaha’¹. [This Mantra briefly means ‘I offer my oblations to Lord Ram who holds a bow in his hand’.]

The patron Rishi (sage or seer) of this Mantra is Brahma, the creator of the world [48]; its composition style, called the Chanda, is Viraat²; and its patron deity is Lord Ram who is the slayer of demons (representing all the evil, sinful, corrupt, pervert and negative forces of creation).

This Mantra is invoked and used for meditation purposes when Lord Ram is to be worshipped in his divine form holding a bow and an arrow. [The 'Anga-Nyas' with it is done in the same way as for other Mantras of ten letters as mentioned in verse nos. 40-43.] [49]. (48-49).

[Note—¹The ten letters of this Mantra are the following—Raa + Maa + Ye + Dha + Nu + Shpaa + Na + Ye + Swa + Ha = 10 letters. The word 'Dhanush' means a bow; hence this Mantra honours the Lord who holds a bow to eliminate the evil ones and the enemies of his devotees.

²The *Viraat Chanda* is one in which the verse has four lines each having ten letters, bringing the number of letters to 40.]

50. This ten-letter Mantra becomes an eleven-lettered one when it is prefixed with any one of the Beej Mantras such as OM, Hring/Hrim, Sring/Srim, Kling/Klim, Aiyang/Aim, and Raan(g)/Raam (as described earlier in verse no. 8). These Mantras are called 'Mantra Raaj' or the king amongst the Mantras because they have immense spiritual powers and divine potentials.

Hence, with these six Beej Mantras added to the ten-lettered Mantra, the resultant eleven-lettered Mantras are of six types¹. The process of meditation and doing Anga-Nyas with them are similar to the ones done for a six-lettered Mantra (50).

[Note—¹The six eleven-lettered Mantras are the following—(1) 'OM Raamaaye Dhanushpaanaye Swaha' = OM + Raa + Maa + Ye + Dha + Nu + Shpaa + Na + Ye + Swa + Ha = 10 letters.

(2) 'Hring/Hrim Raamaaye Dhanushpaanaye Swaha' = Hring/Hrim + Raa + Maa + Ye + Dha + Nu + Shpaa + Na + Ye + Swa + Ha = 10 letters.

(3) 'Sring/Srim Raamaaye Dhanushpaanaye Swaha' = Sring/Srim + Raa + Maa + Ye + Dha + Nu + Shpaa + Na + Ye + Swa + Ha = 10 letters.

(4) 'Kling/Klim Raamaaye Dhanushpaanaye Swaha' = Kling/Klim + Raa + Maa + Ye + Dha + Nu + Shpaa + Na + Ye + Swa + Ha = 10 letters.

(5) 'Aiyang/Aim Raamaaye Dhanushpaanaye Swaha' = Aiyang/Aim + Raa + Maa + Ye + Dha + Nu + Shpaa + Na + Ye + Swa + Ha = 10 letters.

(6) 'Raan(g)/Raam Raamaaye Dhanushpaanaye Swaha' = Raan(g)/Raam + Raa + Maa + Ye + Dha + Nu + Shpaa + Na + Ye + Swa + Ha = 10 letters.]

51. Anga-Nyas (invoking these above Mantras and reposing them on specific parts of the body) and Dhyan (meditation and contemplation using these Mantras) are done in the same way as is normally done for six letter Mantras (as described in verse nos. 16-18).

The next Mantra is a twelve letter one. The patron Rishi (sage or seer) of this Mantra is Lord Ram himself (i.e. it was envisioned by the Lord himself and infused with supernatural divine powers in order to honour his younger brother and ardent devotee Bharat) (51).

52. The style of composition of this Mantra, called the Mantra's Chanda, is Jagati¹. Its patron deity or Devta (to whom this Mantra is dedicated) is Lord Ram.

The Beej Mantra (i.e. the seed or root monosyllable Mantra) for Pranav (OM) is used as the primary Beej Mantra (i.e. as a prefix) for this Mantra for Lord Ram (because the Lord is none else but the supreme Brahm himself).

The Shakti of the Mantra (i.e. the word which represents its empowerment, its dynamic powers and potentials) as well as its 'Kilak' (i.e. the mystical post or peg to which a Mantra used in occult forms of worship is hitched or pegged to, or which helps it to derive its mystical powers) is the monosyllable word 'Kling' (52).

[Note—¹The *Jagati Chanda* is a verse of four lines with twelve letters in each line, bringing the total number of letters to forty eight.]

53. This Mantra is used for doing the ritual of Anga-Nyas (described in verse nos. 10-11) and Viniyog¹ is done in the same manner as for six letter Mantras.

The Mantra with which Anga-Nyas and Viniyog are done has the Tarak Mantra 'OM' along with the Beej Mantra for Maya (which is 'Hring/Hrim') and the word 'Bharataagraj' (meaning 'the elder brother of Bharat) for Lord Ram incorporated in it (53).

[Note—¹Viniyog is the process by which a particular Mantra is invoked during a formal form of worship in a ritualistic manner so that desired results are obtained by invoking the blessing of the patron deity or God to whom this Mantra is dedicated. The word 'Viniyog' literally means a humble and prayerful invocation of the patron God and establishing a union between the individual aspirant and this Divinity, thereby investing the aspirant or his body with the stupendous powers, the dynamism, the energy and the potentials of the relevant God, and enabling the worshipper to obtain success in his endeavours and attain his desired objective.]

54. Therefore, this twelve letter Mantra of Lord Ram (constructed according to the principle laid out in verse nos. 52-53) is the following—'OM Hring/Hrim Bharataagraj Ram Kling/Klim Swaha'¹. [The meaning of this Mantra is 'I offer my oblations to Lord Ram who is the revered elder brother of Bharat'.]

Another set of two twelve-letter Mantras of Lord Ram is the following—(i) 'OM Namō Bhagwate Ram Chandraaye'². [The meaning of this Mantra is 'OM salutations! I most reverentially bow before Lord Ram who is as magnificent and divine as the Moon'.] (ii) 'OM Namō Bhagwate Ram Bhadraaye'³. [The meaning of this Mantra is 'OM salutations! I most reverentially bow before Lord Ram who is a thorough gentleman'.] (54).

[Note—¹The twelve letters of this Mantra are the following—OM + Hring + Bha + Ra + Taa + Gra + Ja + Raa + Ma + Kling + Swa + Ha = 12 letters.

²The twelve letters of this Mantra are the following—OM + Na + Moha + Bha + Ga + Wa + Te + Raa + Ma + Cha + Ndraa + Ye = 12 letters.

³The twelve letters of this Mantra are the following—OM + Na + Moha + Bha + Ga + Wa + Te + Raa + Ma + Bha + Draa + Ye = 12 letters.]

55. These two twelve-lettered Mantras have their Rishis (the sages or seers who had first devised them and put them into practice) etc. the same as the first twelve-lettered Mantra. [All the three twelve-lettered Mantras of Lord Ram have been described in verse no. 54.]

Their Chanda (composition style) is also Jagati, and Anga-Nyas and Viniyog etc. with all these three twelve-lettered Mantras are done in the same manner (55).

56. The next Mantra has thirteen letters. It is 'Sri Ram Jaya Ram Jaya Jaya Ram'¹. [This Mantra means—'Hail Lord Ram; Glory be to him; Cheers for Lord Ram'.]

This Mantra is like the king of all Mantras, and is used by wise ones (56).

[Note—¹The thirteen letters of this Mantra are the following—Sri + Raa + Ma + Ja + Ya + Raa + Ma + Ja + Ya + Ja + Ya + Raa + Ma = 13 letters.]

57. This thirteen letter Mantra is a fulfiller of all the wishes, desires and aspirations of a wise aspirant devotee. The process of meditating upon the Lord using this Mantra is the same as described previously.

The method of doing Anga-Nyas (purification of the body; invoking the powers of the Mantra and reposing them on the specific points of the body) and Dhyān (doing meditation and contemplation) with this Mantra is the same way as the method employed for ten-lettered Mantra (as described in verse nos. 40-43) (57).

58. When the ethereal universal Mantra for Pranav (the supreme Brahm), i.e. the Mantra 'OM', is added as a prefix to the above Mantra (as described in verse no. 56), it becomes a fourteen-lettered Mantra.

This Mantra is now 'OM Sri Ram Jaya Ram Jaya Jaya Ram'¹. [The meaning modifies a bit to mean 'OM salutations! Hail Lord Ram; Glory be to him; Cheers for Lord Ram'. It also means this—'Glory be to Lord Ram who is a manifestation of the supreme Brahm represented by the word OM; Glory be to him; Cheers for Lord Ram as a manifestation of OM'.]

If the thirteen-lettered Mantra (as described in verse no. 56) is suffixed with the two-lettered word 'Ram' (Raa + Ma), the resultant Mantra would have fifteen letters. This Mantra would then become 'Sri Ram Jaya Ram Jaya Jaya Ram Ram'² (58).

[Note—¹The fourteen letters are as follows—OM + the 13 letters of the Mantra as described in verse no. 56 above = 14 letters.

²The fifteen lettered Mantra has the following letters—the 13 letters of the earlier Mantra as described in verse no. 56 above + Raa + Ma = 15 letters.]

59. The above Mantras (as described in verse no. 58) are like the legendary all wish-fulfilling tree of Gods, called the Kalpa tree. [That is, these Mantras fulfill all the wishes that the devotee of Lord Ram might have.]

The next Mantra has sixteen letters. It is 'Namaha Sitaapataye Raamaaye Han Han Hoong/Hoom Phat'¹. [This Mantra briefly means—I bow to Lord Ram who is the Lord of Sita. Let the Lord protect me from all sides like an impregnable shield.] (59).

[Note—¹The sixteen letters of this Mantra are the following—Na + Maha + Si + Ta + Pa + Tye + Ra + Ma + Ye + Ha + N + Ha + N + Hoong/Hoom + Pha + Ta = 16 letters.]

60-61. This Mantra is used as a shield that gives mystical protection to the worshipper of the Lord who uses this Mantra.

The patron Rishi of this Mantra (i.e. the sage or seer who had first conceptualized this Mantra and put it into practice) is Agastya; its style of composition, called the Chanda, is Brihati¹; its patron deity, called the Devta, is Lord Ram himself [60]; its Beej Mantra (i.e. the seed or root) is 'Raa(n)g'; its Shakti (or its dynamic powers) is encrypted in the Beej Mantra 'Phat'; and its Kilak (i.e. the Beej Mantra which helps the main Mantra to retain its stupendous powers and energy to give protection to the worshipper) is 'Hoong or Hoom'.

The ritual process of doing Anga-Nyas all over the worshipper's body² with this sixteen-lettered Mantra is the same as that employed for doing Anga-Nyas for Mantras with two letters (verse no. 7), with five letters (verse no. 10), with three letters (verse no. 8), and with four letters (verse no. 9). [61]. (60-61).

[Note—¹The *Brihati Chanda* is a style of composition in which the verse has four lines. The first, second and fourth lines have eight letters, while the third line has twelve letters. Thus the total number of letters is 8 + 8 + 12 + 8 = 36 letters in all.

²Thus, the Mantras invoked for the purpose of *Anga-Nyas* are the following—(1) for doing Anga Nyas on the head, the Mantra is ‘Namaha’; (2) for doing Anga Nyas on the forehead/central point of the eyebrows, the Mantra is ‘Sitapataye’; (3) for doing Anga Nyas on the heart, the Mantra is ‘Raamaaye’; (4) for doing Anga Nyas on the navel, the Mantra is ‘Han Han’; (5) for doing Anga Nyas on the one of the legs/thighs, the Mantra is ‘Hoong/Hoom’; and (6) for doing Anga Nyas on the other leg/thigh, the Mantra is ‘Phat’.

There is another version of doing Anga Nyas. According to verse no. 83-85 below, the six points where this ceremonial Anga Nyas can be done are the following—the heart, the forehead, the top of the head where the tuft of hair is located and which is the site of the Brahm-randhra, the body armour, the eyes, and the arms and armaments of the aspirant devotee if he happens to belong to the warrior race. In this case, the Anga Nyas would be respectively as follows—(1) ‘Namaha Hridayaye Namaha’; (2) ‘Sitapataye Shirse Swaha’; (3) ‘Raamaaye Shikhaaye Vashat’; (4) ‘Han Han Kavachaaye Hoong/Hoom’; (5) ‘Hanum Netrabhyam Vaushat’; and (6) ‘Han Hoong/Hoom Phat Astraye Phat’.]

62-63. When OM is added as a prefix to the sixteen-lettered Mantra (as described in verse no. 59), it becomes a seventeen-lettered Mantra of Lord Ram as follows—‘OM Namaha Sitaapataye Raamaaye Han Han Hoong/Hoom Phat’¹. [This Mantra briefly means ‘OM salutations! I bow most reverentially before, pay my obeisance to, and honour the mystical powers and divinity of Lord Ram who is the husband of Sita’.]

The next Mantra having eighteen letters is the following—‘OM Namoh Bhagwate Raamaaye Mahaapurushaaye Namaha’². [This Mantra briefly means ‘OM salutations! I repeatedly bow most reverentially before, pay my obeisance to, and honour the mystical powers and divinity of Lord Ram who is the supreme Lord God and an exalted noble Purush (literally a great, a highly acclaimed and a noble gentleman)’.]

The patron Rishi (sage or seer) of this eighteen-letter Mantra is Vishwamitra. Its style of composition, called Chanda, is Gayatri. Its patron deity is Lord Ram (62-63).

[Note—¹The seventeen letters of the Mantra are as follows—OM + 16 letters of the main Mantra as described in verse no. 59-61 above.

²The eighteen letters of this Mantra are as follows—OM + Na + Mo + Bha + Ga + Wa + Te + Ra + Ma + Ye + Ma + Ha + Pu + Ru + Sha + Ye + Na + Maha = 18 letters.]

64-65. When the Beej Mantra ‘Kling/Klim’ (for ‘Kaam’) is added as a prefix to it, this Mantra becomes a nineteen-lettered one as follows—‘Kling/Klim OM Namoh Bhagwate Raamaaye Mahaapurushaaye Namaha’¹.

The next Mantra has twenty letters, and it is the following—‘OM Namoh Bhagwate Raamaaye Sarwa Saubhaagyam Dehi Me Swaha’². [This Mantra means ‘Oh Lord God Ram! I reverentially bow before you and pay my obeisance to you. Be kind to bless me with all welfares and good fortunes (‘Saubhaagya’). I offer my oblations to you’.] (64-65).

[Note—¹The nineteen letters are as follows—Kling/Klim + 18 letters of the rest of the Mantra as described in verse no. 62-64 above = 19 letters.

²The twenty letters of this Mantra are the following—OM + Na + Mo + Bha + Ga + Wa + Te + Ra + Ma + Ye + Sa + Ra + Wa + Sau + Bha + Gya + Ma + De + Hi + Me = 20 letters.]

66. The next Mantra which bestows all desired benefits to the aspirant devotee is of twenty one letters. It is the following—‘OM Namoh Bhagwate Raamaaye

Sakalaapannivaaranaaye Swaha'¹. [This Mantra briefly means 'OM salutations! I reverentially bow before and pay my obeisance to Lord Ram who is the exalted God and a bestower of all desired fruits or rewards. I offer my oblations to you'.] (66).

[Note—¹The twenty one letters of this Mantra are the following-- OM +Na + Mo + Bha + Ga + Wa + Te + Raa + Maa + Ye + Sa + Ka + Laa + Pa + Nni + Vaa +Ra + Naa + Ye + Swa + Ha = 21 letters.]

67-68. The next Mantra has twenty two letters. It is as follows—'OM Sring/Srim Raan(g)/Raam Daasrathaaye Sitaavallabhaaye Sarwavhistidaaye Namaha'¹. [The brief meaning of this Mantra is 'OM salutations to Goddess Laxmi ('Sring') and Lord Ram ('Raan(g)') in their cosmic form as Brahm! I reverentially bow before and pay my homage to Lord Ram who is the exalted son of king Dasarath and the dear husband of Sita, who is a fulfiller of all desires and wishes, and who grants the boon which bestows everything to his devotee.'](67-68).

[Note—¹The twenty two letters are the following—OM + Sring/Srim + Raan(g)/Raam + Da + Sa + Ra + Thaa + Ye + Si + Ta + Va + Lla + Bhaa + Ye + Sar + Wa + Bhi + Shti + Daa + Ye + Na + Maha = 22 letters.]

69. The next Mantra has twenty-three letters, and has the potential of destroying the enemy of the aspirant devotee. This Mantra is the following—'OM Namō Bhagwate Viram Raamaaye Sakalshatrun Han Han Swaha'¹. [The brief meaning of this Mantra is 'OM salutations! I reverentially bow before and pay my obeisance ('Namō') to Lord Ram ('Raamaaye') who is brave and valiant ('Viram'). Oh Lord! Destroy and crush ('Hun') all my enemies ('Shatru'). I offer my oblations ('Swaha') to you'.] (69).

[Note—¹The twenty three letters of this Mantra are the following-- OM +Na + Mo + Bha + Ga + Wa + Te + Vi + Ra + Ma + Ra + Ma + Ye + Sa + Ka + La + Sha + Tru + Na + Han + Han + Swa + Ha = 23 letters.]

70-71. The patron Rishi (sage or seer) of this twenty-three lettered Mantra is Vishwamitra. The style of composition, called Chanda, is Gayatri. [70].

Its patron deity is the brave, courageous, valiant and strong Lord Ram. Its Beej Mantra (i.e. the seed or root monosyllable Mantra) etc. are as of the previous Mantras.

For the purpose of doing Anga Nyas, the individual letters of the Mantra should be used independently as single units having full divine potentials as that of the entire Mantra [71]. (70-71).

72. This twenty-three letter Mantra should be worshipped and used to do Japa (repetition of the Mantra) by focusing the mind on Lord Ram in his form as a great, brave and valiant warrior—i.e. as holding a bow with the arrow ready to shoot (at the enemy), and mounted on a chariot in front of the demon king Ravana of Lanka (whom Lord Ram had slayed in the epic war as described in all the versions of the epic story known as the 'Ramayana') (72).

73-74. The next Mantra has twenty-four letters, and it is the following—'OM Namō Bhagwate Sri Raamaaye Taarak Brahmane Mam Taaraye Namaha OM'¹. [Briefly, this Mantra requests the Lord to bless the aspirant devotee with liberation and deliverance from this world and give his soul final emancipation and salvation. It means—'OM salutations! I bow before Lord Ram. You are the liberating Brahm personified. So be kind upon me and grant me the boon of liberation and deliverance, of emancipation and salvation'.]

The six Beej Mantras that are applicable for the six-lettered Mantra of Lord Ram (as described in verse no. 8 of this Canto above) are also applicable here as well.

In other words, the root or seed Mantra OM can be replaced with other monosyllable Mantras as described in verse no. 8 above.

Thus, we have six Mantras of twenty-four letters each, with OM being replaced by the other Beej Mantras² (73-74).

[Note—¹The twenty four letters of this Mantra are the following—OM + Na + Mo + Bha + Ga + Wa + Te + Sri + Raa + Maa + Ye + Taa + Ra + Ka + Brah + Ma + Ne + Mam + Taa + Ra + Ye + Na + Maha + OM = 24 letters.

²Therefore, the other five Mantras of twenty-four letters using the Beej Mantras referred to here, besides the one mentioned in these verses, would be the following—

(i) ‘Hring/Hrim Namō Bhagwate Sri Raamaaye Taarak Brahmane Mam Taaraye Namaha OM’.

(ii) ‘Sring/Srim Namō Bhagwate Sri Raamaaye Taarak Brahmane Mam Taaraye Namaha OM’.

(iii) ‘Kling/Klim Namō Bhagwate Sri Raamaaye Taarak Brahmane Mam Taaraye Namaha OM’.

(iv) ‘Aiyang/Aim Namō Bhagwate Sri Raamaaye Taarak Brahmane Mam Taaraye Namaha OM’.

And (v) ‘Raan(g)/Raam Namō Bhagwate Sri Raamaaye Taarak Brahmane Mam Taaraye Namaha OM’.]

75-76. The next Mantra has twenty five letters. It is called a ‘Vashikaran Mantra’ or the one that can cast a magical charm upon another person so much so that he comes under the command and control of the first person who uses this Mantra upon him. It is like hypnotizing spells which influence the other person and makes him obey the first person’s command obediently even though he might not like to follow them. The submission is absolute, and person to whom the orders are issued does the commander’s bidding without raising any questions or giving second thoughts to it.

This Mantra is the following—‘Kling/Klim OM Namō Bhagwate Raam Chandraaye Sakal-Jan-Vashya-Karaaye Swaha’¹. [Briefly, this Mantra means ‘OM salutations! I reverentially bow and pay my obeisance to (‘Namō’) Lord God Ram Chandra who is the fulfiller of all wishes (as implied by the Kaam Beej Mantra ‘Kling/Klim’). Empower me with mystical powers and charms so that I can exercise influence over and control all those with whom I come in contact, or whom I wish to bring under my command and control (‘Sakal-Jan-Vashya-Karaaye’). I offer my oblations to you (‘Swaha’)’.] (75-76).

[Note—¹The twenty five letters of this Mantra are the following—Kling/Klim + OM + Na + Mo + Bha + Ga + Wa + Te + Raa + Ma + Cha + Ndra + Sa + Ka + La + Ja + Na + Va + Sha + Ya + Ka + Raa + Ye + Swa + Ha = 25 letters.]

77. When the monosyllabic Mantra OM (which is the Beej Mantra for the supreme Brahm) is added as a prefix to this twenty-five lettered Mantra, it becomes a twenty-six lettered one. This twenty-six letter Mantra is ‘OM Kling/Klim OM Namō Bhagwate Ram Chandraaye Sakal-Jan-Vashya-Karaaye Swaha’¹. [The first word ‘OM’ prefixed to the Kaam Beej ‘Kling/Klim’ pays homage to the desire of the Supreme Being known Brahm to manifest himself as Lord Ram. The rest of the meaning would be the same as the Mantra of twenty-five letters.]

If OM is added as a suffix as well, then it becomes a twenty-seven lettered Mantra. This twenty-seven lettered Mantra is ‘OM Kling/Klim OM Namō Bhagwate Ram Chandraaye Sakal-Jan-Vashya-Karaaye Swaha OM’². [The last ‘OM’ added as a

suffix to the Mantra implies that when oblations are being made to Lord Ram, it is the supreme Brahm who is being worshipped in the form of Lord Ram.] (77).

[Note—¹The twenty six letters of the Mantra are the following—OM + 25 letters of the rest of the Mantra as described in verse no. 75-76 above = 26 letters.

²The twenty seven letters of the Mantra are the following—OM as a prefix + 25 letters of the rest of the Mantra as described in verse no. 75-76 above + OM as a suffix = 27 letters.]

78-79. The next Mantra has twenty-eight letters as follows—‘OM Namō Bhagwate Raksho-ghna-vish-daaye Sarwa-vignaantsamutsaarye Niwaaraye Swaha’¹. [Briefly this Mantra means ‘OM salutations! I reverentially bow and pay my homage to the Lord God (Ram). Be kind to protect me against all sorts of problems and hurdles in my endeavours. Eliminate all my miseries and causes of my misfortunes and torments. I offer this oblation to you for this purpose’.]

When the monosyllable OM is appended at the end of this Mantra, it becomes a twenty-nine lettered Mantra. This Mantra becomes—‘OM Namō Bhagwate Raksho-ghna-vish-daaye Sarwa-vignaantsamutsaarye Niwaaraye Swaha OM’². [The last ‘OM’ implies that the worshipper salutes the Lord as a manifestation of the supreme Brahm because ‘OM’ is a Beej Mantra for Brahm.] (78-79).

[Note—¹The twenty eight letters of this Mantra are the following—OM + Na + Mo + Bha + Wa + Te + Ra + Ksho + Gha + Na + Vi + Sha + Daa + Ye + Sar + Wa + Vi + Gha + Naa + Ntsa + Mu + Tsa + Rya + Ni + Wer + Ye + Swa + Ha = 28 letters.

²The twenty nine letters of this Mantra are the following—28 letters of the Mantra as mentioned above + OM at the end = 29 letters.]

80. When the Beej Mantra ‘Raam(g)/Raam’ is added as a prefix to the twenty-nine lettered Mantra (as described above in the second half of verse no. 79), it becomes a thirty lettered Mantra. This Mantra is—‘Raam(g)/Raam OM Namō Bhagwate Raksho-ghna-vish-daaye Sarwa-vignaantsamutsaarye Niwaaraye Swaha OM’¹. [Here, the Beej Mantra ‘Raam(g)/Raam’ put before OM implies that the very primary form of the Supreme Being known as Brahm is being addressed and honoured in this verse. Since the Beej Mantra ‘Raam(g)/Raam’ pertains to the fire element and Lord Ram, and it is followed by the Mantra for the supreme Brahm, which is ‘OM’, it obviously means that in this verse Lord Ram is being honoured not only as a manifestation of the supreme Brahm but also as the primary energy, the dynamism, the stupendous glory and the immaculate purity of Brahm personified in his divine form. The rest of the meaning would be the same as for the twenty-nine lettered Mantra described in verse nos. 78-79.]

If this monosyllable ‘Raam(g)/Raam’ is added as a suffix as well to the above Mantra of thirty letters, it becomes a thirty-one lettered Mantra. This thirty-one lettered Mantra would be ‘Raam(g)/Raam OM Namō Bhagwate Raksho-ghna-vish-daye Sarwa-vignaantsamutsaarye Niwaaraye Swaha OM Raam(g)/Raam’². [When ‘Raam(g)/Raam’ is added as a suffix it implies that once again the oblations and homage are being paid to Lord Ram as a personification of the supreme Brahm represented by the Beej Mantra ‘OM’, as well as of the eternal cosmic Fire represented by the Beej Mantra ‘Rang/Ram’ as pronounced in the English word Rung or Run respectively.] (80).

[Note—¹The thirty letters are as follows—monosyllable Raam(g)/Raam + 29 letters of the Mantra described in verse no. 79 above = 30 letters.

²The thirty one letters would be as follows—30 letters of the Mantra as described above + monosyllable ‘Raam(g)/Raam’ at the end = 31 letters.]

81-82. 'Raambhadra Maheshwaas Raghuvir Nripottam; Bho Dashasyaant Kasmaakam Sriyam-daapam Dehi Me' [81]—this is the thirty-two lettered Mantra¹. [The brief meaning of this Mantra is 'The gentleman Ram is present in the breath of Lord Mahesh (i.e. Shiva constantly repeats his divine name Ram). He is the brave and valiant warrior of the clan of king Raghu, and is the most exalted and the best king of that clan. He had brought about the end of the ten-headed one (Ravana, the demon king of Lanka). He is endowed with all the magnificent, divine and sublime virtues and glories. Be kind to give me all kinds of 'Sri' (i.e. bless me so that I can acquire all the majestic glories, fame, wealth and prosperity that are available in this world) as well as 'Yam' (exemplary self-control over the senses)'.]

The patron Rishi (sage/seer) of this Mantra is Anushtuv. Its composition style, called the Chanda, is Anushtup² (named after the sage who first conceived this literary style of composing hymns). Its patron deity, called the Devta, is Lord Ram himself. Its Beej Mantra (or the seed or root monosyllable) is 'Raam(g)' (standing for the fire element as well as Ram). Its stupendous Shakti (dynamism, energy, potentials and powers) are encrypted in the monosyllable word 'Yam'. [The word 'Yam' means exemplary self-control over the senses. Hence, when used in conjunction with the word 'Sri' it implies that Lord Ram has acquired greatness, an exalted stature, all the divine virtues and glories, all sorts of majesty and fame etc. that are obtainable in this creation, collectively called 'Sri', because he practices the virtue of 'Yam'. And therefore he is requested to bless the worshipper with these two virtues of 'Sri' and 'Yam'.]

This mystically empowered Mantra is employed to accomplish one's desires and aspirations, to fulfill one's wishes and hopes [82]. (81-82).

[Note—¹The thirty two letters of this Mantra are the following—Raa + Ma + Bha + Dra + Ma + He + Shwa + Sa + Ra + Ghu + Vi + Ra + Nri + Po + Tta + Ma + Bho + Da + Sha + Syaa + Nta + Ka + Sma + Kam + Sri + Yam + Daa + Pa + Um + De + Hi + Me = 32 letters.

²The *Anushtup Chanda* is a poetical composition style first envisioned by an ancient sage named Anuystuv, and hence it bears his name. It consists of four lines with eight letters to each line, bringing the total number of letters in the verse to 8 x 4 = 32 letters.]

83-85. The process of invoking this Mantra for the purpose of doing 'Viniyog' and 'Nyas' (i.e. humbly invoking the divine powers and dynamic energy that is inherent in the Mantra by worshipping the concerned God or deity of the Mantra, and then establishing the Mantra's glorious potentials upon specific points of the body as well as on other designated objects so that these are duly empowered and sanctified by the astounding powers, the energy and vitality as well as the dynamism of the concerned Mantra) is as follows—

(i) The first stanza or step, called the 'Charan' of the hymn, literally meaning a step or foot of the Mantra, is invoked for the purpose of doing Anga-Nyas on the heart. [This part is the following—'Raambhadra Maheshwaas'.]

(ii) The second Charan is used to do Anga-Nyas on the head (i.e. the forehead). [This part is the following—'Raghuvir Nripottam'.]

(iii) The next five letters, known as 'Varanas', should be invoked to do Anga-Nyas on the tuft of hair on the top of the head, called the 'Shikha', marking the location of the Brahm-randhra. [These five letters or Varanas pertain to the next phrase of the Mantra, i.e. 'Bho Dashasyaant' = Bho + Da + Sha + Syaa + Nta = 5.]

(iv) The next three letters or Varanas should be invoked to do Nyas on the 'Kavach' of the warrior devotee. [The word 'Kavach' literally means a body armour or shield worn or used by warriors. Hence, this part of the Mantra is used to both empower and sanctify the 'Kavach' of the warrior devotee so that it becomes impenetrable and can give him a full-proof protection. These three letters or Varanas pertain to the next phrase of the Mantra, i.e. 'Ka-smaakam' = Ka + Smaa + Kam = 3.]

(v) The next five letters should be invoked to do Nyas on the various 'Astra' of the warrior devotee. [The word 'Astra' means arms and armaments of the warrior devotee. Hence, these five letters of the Mantra are used to empower and energise the different weapons used by him. These five letters or Varanas pertain to the next phrase of the Mantra, i.e. 'Sriyam-daapam' = Sri + Yam + Daa + Pa + Um.]

For this purpose, the aspirant and a warrior devotee should meditate upon the following divine form of Lord Ram—'Lord Ram is holding a divine bow and an arrow. He is accompanied by Sugriv (the monkey king of Kishkindha) and Vibhishan (the demon king of Lanka). The Lord is the protector and sustainer of the three legendary worlds—viz, the nether, the terrestrial, and the heavenly worlds.'

With this divine vision of the Lord, the aspirant should repeat the above Mantra (i.e. the one with thirty two letters as described in verse no. 81) for one lakh times (83-85).

86-87. The next Mantra is renowned as the famous 'Ram Gayatri Mantra'¹. This is the Mantra which provides 'Mukti' or final liberation and deliverance to the worshipper from the cycle of birth and death, or ensures emancipation and salvation for his soul.

This Mantra is the following—'OM Daasrathaaye Vidmahe Sita-vallabhaaye Dhimahi Tanno Raamaha Prachodayaat'². [Briefly this Mantra means 'OM salutations! The supreme Lord Ram is the son of Dasrath, and the beloved husband of Sita. He is excellent, the best, the most exalted, a destroyer of sins, and a divine Being. May he infuse and inspire our intellect with wisdom and enlightenment so that we are purified and move forward on the righteous and noble path'.] (86-87).

[Note—¹Refer also Tripadvibhut Maha Narayan Upanishad, Canto 7, paragraph no.

46.

²Refer verse no. 89 below of this Canto 2.]

88. When the two Beej Mantras 'Hring/Hrim' and 'Kling/Klim' standing jointly for 'Maya Shakti' (or the mystical powers that, when acquired, enables the person who has mastered this Mantra to be able to control other persons and make them absolutely obedient to him) are added as a prefix to the 'Ram Gayatri Mantra', and the Beej Mantra 'Sring/Srim' (for 'Sri' or Goddess Laxmi) is added before the word 'Raamaha' (which is the second last word of the Mantra, and stands for Lord Ram), then the resultant Mantra acquires 'magical-charm' properties that act as a hypnotizing instrument or a charm that can subdue one's opponent, make him submissive, and make him obey one's commands. It is therefore called a 'Sammohan Mantra'¹.

This Mantra thus becomes as follows—'Hring/Hrim Kling/Klim OM Daasrathaaye Vidmahe Sita-vallabhaaye Dhimahi Tanno Sring Raamaha Prachodayaat.' (88).

[Note—¹Refer also to verse nos. 18-20 above of this Canto 2.]

89. The process of doing 'Anga-Nyas' using the primary 'Ram Gayatri Mantra' (as described in verse no. 86-87) is being described now.

The six groups of letters should be used for purifying and empowering the various parts of the body with the mystical and divine powers and potentials of the Mantra.

The first group consists of five letters (Daasrathaaye = Daa + Sa + Ra + Thaa + Ye = 5 letters), the second consists of three letters (Vidmahe = Vi = Dma + He = 3 letters), the third consists of six letters (Sitaa-vallabhaaye = Si + Taa + Va + Lla + Bhaa + Ye = 6 letters), the fourth consists of three (Dhimahi = Dhi + Ma + Hi = 3 letters), the fifth consists of four letters (Tanno Raamaha = Ta + Nno + Raa + Maha = 4 letters), and the sixth set consists of four letters (Prachodayaat = Pra + Cho + Da + Yaa { 'Ta' is not regarded as a full letter as it is a silent consonant in this word } = 4 letters) respectively of the main Mantra (89).

90-92. Since this 'Ram Gayatri Mantra' has been visualised as having six components or units (as mentioned in verse no. 89 above), it is regarded as being equivalent to the six-lettered Mantra, and therefore its Beej Mantra (i.e. its seed/root Mantra) and the process of meditating upon it also follows the same pattern as applicable for the six-lettered Mantra (as described in verse no. 16-18 above of this Canto 2).

The next Mantra of Lord Ram has forty-seven letters. It is the following—'OM Namō Bhagwate Raghunandanaaye Rakshoghna-vishadaaye Madhuraraye Prasanna-vadnaaye Amit-tejase Bal-raamaaye Vishnave Namaha'¹. [Briefly, this Mantra means 'OM salutations to Lord Raghunandan (Ram). He is a protector from all miseries and torments that afflict his devotees, and removes all their hurdles. He is of a sweet and pleasant demeanors and temperament. He appears cheerful and contented. He is immensely radiant with a divine splendour effusing as a glowing halo from his holy body. Lord Ram is strong, valiant, valorous, robust and brave. He is Lord Vishnu incarnate. I bow to him in great reverence'.] (90-92).

[Note—¹The forty-seven letters of this Mantra are the following—OM + Na + Mo + Bha + Ga + Wa + Te + Ra + Ghu + Na + Nda + Naa + Ye + Ra + Ksho + Gna + Vi + Sha + Daa + Ye + Ma + Dhu + Raa + Ye + Pra + Sa + Nna + Va + Da + Naa + Ye + A + Mi + T + Te + Ja + Se + Ba + La + Raa + Maa + Ye + Vi + Shna + Ve + Na + Maha = 47 letters.]

93. The patron Rishi (sage or seer who had first conceptualized this group of letters as a Mantra, and preached it) is Brahma the creator. Its style of composition, called the Chanda, is Anushtup¹. Its patron deity or Devta is Raghav (another name of Lord Ram as he was born in the clan of king Raghu of Ayodhya).

For the purpose of doing Anga-Nyas, it is split into six components as follows—the first group consists of seven letters (OM Namō Bhagwate = OM + Na + Mo + Bha + Ga + Wa + Te = 7 letters), the second group consists of six letters (Raghunandanaaye = Ra + Ghu + Na + Nda + Naa + Ye = 6 letters), the third group consists of seven letters (Rakshoghna-vishadaaye = Ra + Ksho + Ghna + Vi + Sha + Daa + Ye = 7 letters), the fourth group consists of ten letters (Madhuraraye Prasanna-vadnaaye = Ma + Dhu + Ra + Ye + Pra + Sa + Nna + Va + Da + Ne = 10 letters), the fifth group consists of six letters (Amit-tejase = A + Mi + Ta + Te + Ja + Se = 6 letters), and the sixth group consists of eleven letters (Bal-raamaaye Vishnave Namaha = Ba + La + Raa + Maa + Ye + Vi + Sha + Na + Ve + Na + Maha = 11 letters) (93).

[Note—¹The *Anushtup Chanda* is a poetical composition style first envisioned by an ancient sage named Anuystuv, and hence it bears his name. It consists of four lines with eight letters to each line, bringing the total number of letters in the verse to 8 x 4 = 32 letters. Refer verse no. 82 above of this Canto 2 also.]

94. The system followed for doing meditation by the ten-letter Mantra (as described in verse no. 44-48) is also followed for this Mantra. It is to be repeated for one lakh times to be effective. [1 lakh = 1,00,000.]

The six-lettered Mantra for Sita (the divine consort of Lord Ram and an incarnation of Goddess Laxmi, the goddess of wealth and prosperity and the divine consort of Vishnu, the sustainer and protector of the world at the macro level) is the following—‘Sring Sitaaye Swaha’¹. [The meaning of this divine Mantra is ‘I offer my oblations to Sita, the divine Goddess who is the controller and bestower of all virtues known as ‘Sri’, i.e. all forms of worldly and spiritual glories, virtues, fame and majesties’.] (94).

[Note—¹The six letters of this Mantra are the following—Sring + Si + Taa + Ye + Swa + Ha = 6 letters.]

95-96. The patron Rishi (sage or seer who had first conceptualized it as having mystical powers) is Janak (her enlightened father). Its style of composition, called the Chanda, is Gayatri¹. Its patron deity is Goddess Sita Bhagwati, the cosmic Mother. Its Beej or root or seed monosyllabic Mantra is ‘Sring’. Its authority and empowerment is represented by the word ‘Namaha’ meaning bowing before her with the greatest of humility and reverence. [This is because a person bows only before one who is senior, authoritative and powerful.]

Its ‘Kilak’, or the group of letters or a word to which the main Mantra is pegged or hooked for its steadiness and everlasting effect, is ‘Sitaaye’. In other words, this Mantra derives its inherent energy, dynamism and powers from the cosmic Shakti revealed in the form of Sita. It is Sita who gives the whole Mantra its authority and power.

This divine and holy Mantra, possessed of mystical powers, dynamic energy and magnificent potentials, is used for fulfillment of wishes of the worshipper.

For the purpose of doing Anga-Nyas, the Beej Mantra for ‘Shakti’ (the cosmic dynamic energy), which is the monosyllable ‘Sring/Srim’, is used (95-96).

[Note—¹The *Gayatri Chanda* is one in which there are three lines of eight letters each, totaling twenty-four letters in all. Sometimes these hymns have four lines, with six letters to each line, and still the total number of letters would be twenty-four.]

97. The aspirant devotee should concentrate upon and meditate on the divine form of Goddess Sita while using the above Mantra for worship purposes as follows—‘I meditate upon the divine and holy form of Sita who is of a golden complexion, holds a lotus in her hands, is ever eager to have a divine sight of Lord Ram, is present at the core or central point of the hexagon present in the central area of the mystical charm instrument used during occult forms of worship of Lord Ram using Beej Mantras, and who is seated by the Lord’s side’ (97).

98-99. Now the Mantra for honouring Laxman (who was the younger brother of Lord Ram in his incarnation as the king of Ayodhya, and who was a manifestation of the legendary Seshnath, the hooded python who forms the bed upon which Lord Vishnu, the sustainer and protector of the visible creation and the grosser form of the supreme Viraat Purush, reclines in the celestial ocean of milk called the Kshirsagar).

This Mantra is the following—‘Lam/Lang Laxmanaaye Namaha’. [The meaning of this divine Mantra is ‘I bow reverentially before Laxman to pay my respects to the divine Being whose Beej Mantra is ‘Lam/Lang’’.]

The patron Rishi (sage or seer who had first visualised this Mantra as having divine powers) is Agastya. Its style of composition, called the Chanda, is Gayatri. Its patron deity is Laxman himself. Its Beej Mantra is 'Lam/Lang'. Its powers and authority is represented by the word 'Namaha' (because one bows before one who has authority, who is senior, powerful, holy and divine).

This Mantra is invoked and its blessings sought to acquire the four types of manly achievements or successes¹ (89-99).

[Note—¹The four types of manly achievements are the following—(1) Artha—achieving success in obtaining prosperity, wealth, material well being; (2) Dharma—achieving success in being auspicious, righteous, proper and virtuous; (3) Kaam—achieving success in fulfillment of desires, hopes, expectations, aspirations and wishes; and (4) Moksha—achieving success in obtaining liberation and deliverance from the cycle of birth and death, leading to the emancipation and salvation of the soul.]

100-101. To do Anga-Nyas with this Mantra, the long vowel sound 'Aa' is added to the seed or root monosyllable Mantra, called the Beej, of this Mantra (which is placed at the beginning of the Mantra)—i.e. the word used for Anga-Nyas is Lung + Aa = Laang/Laam¹.

During Anga-Nyas (i.e. during the process of worship by using this Mantra), or using it for doing Japa (repetition), the following divine and holy vision of Laxman should be meditated upon—'I concentrate my attention upon and worship Laxman who has two arms, whose body, which is most handsome and charming, has a complexion which resembles the glow of molten gold, whose eyes are like lotus flowers, and who is ever engaged in the service of Lord Ram' (100-101).

[Note—¹The Mantras used for Anga-Nyas are the following—(1) Laam/Laang Shirse Namaha (for doing Anga-Nyas on the head); (2) Laam/Laang Netrabhyaam Namaha (for doing Anga-Nyas on the eyebrows); (3) Laam/Laang Hirdayaaye Namaha (for doing Anga-Nyas on the heart); (4) Laam/Laang Naabhi Namaha (for doing Anga-Nyas on the navel); and (5) Laam/Laang Uru Namaha (for doing Anga-Nyas on the two thighs).]

102. The Mantra to honour Bharat, the second brother of Lord Ram, is the following—'Bham/Bhang Bharataaye Namaha'. [The meaning of this Mantra is 'I bow most reverentially before Bharat to pay my respects to the divine Being whose Beej Mantra is 'Bham/Bhang''.]

Its patron Rishi, Chanda, Devta and form of Anga-Nyas are the same as that for Laxman¹. (in verse no. 100-101)¹.

During Anga-Nyas or during the process of worship of the Mantra or using it for doing Japa (repetition), the following divine and holy vision of Bharat should be meditated upon—'I concentrate my attention upon and worship Bharat whose body is dark complexioned (like that of the Lord himself), who is handsome and attractive, who is ever engaged in the service of Lord Ram, and who holds a bow and an arrow. I bow most reverentially before Bharat' (102).

[Note--¹That is, the Rishi is Agastya, the Chanda is Gayatri, the patron deity is Bharat, and the seed/root Mantra used for Anga-Nyas is the word 'Bhaam/Bhaang'. The Mantras used for Anga Nyas are the following--(1) Bhaam/Bhaang Shirse Namaha (for doing Anga-Nyas on the head); (2) Bhaam/Bhaang Netrabhyaam Namaha (for doing Anga-Nyas on the eyebrows); (3) Bhaam/Bhaang Hirdayaaye Namaha (for doing Anga-Nyas on the heart); (4) Bhaam/Bhaang Naabhi Namaha (for doing Anga-Nyas on the navel); and (5) Bhaam/Bhaang Uru Namaha (for doing Anga-Nyas on the two thighs).]

103. Now the worship and the Mantra of Shatrughan, the third brother of Lord Ram, is being described. The Mantra is the following—‘Sham/Shang Shatrughanaaye Namaha’. [This Mantra means ‘I bow most reverentially before Shatrughan to pay my respects to the divine Being whose Beej Mantra is ‘Sham/Shang’’.]

Its patron Rishi, Chanda, Devta and form of Anga Nyas are the same as that for Laxman or Bharat¹.

This Mantra is invoked to obtain victory over one’s enemy or opponent (103).

[Note—¹The Rishi is Agastya; the Chanda is Gayatri; the Devta is Bharat; and Beej Mantra used for Anga Nyas is ‘Shaam/Shang’. The Anga-Nyas is done using this seed or root monosyllable Mantra as follows--(1) Shaam/Shang Shirse Namaha (for doing Anga-Nyas on the head); (2) Shaam/Shang Netrabhyaam Namaha (for doing Anga-Nyas on the eyebrows); (3) Shaam/Shang Hridayaaye Namaha (for doing Anga-Nyas on the heart); (4) Shaam/Shang Naabhi Namaha (for doing Anga-Nyas on the navel); and (5) Shaam/Shang Uru Namaha (for doing Anga-Nyas on the two thighs).]

104. For the purpose of worship and doing Anga-Nyas, the following divine and holy vision of Shatrughan should be meditated upon—‘I concentrate my attention upon and worship Shatrughan who has two arms, whose body is of a golden hue, (like that of the Laxman), who is engrossed in the service of Lord Ram, who is the slayer of the demon named Lavanaasur, and who is the dear son of mother Sumitra (the step-mother of Lord Ram)’ (104).

105-106. Now the Mantra for worshipping Hanuman is being described. The Mantra is the following—‘H-ring/H-rim Hanumate Namaha’. [The meaning of this Mantra is ‘I bow most reverentially before Hanuman to pay my respects to the divine Being whose Beej Mantra is ‘H-ring/H-rim’’.]

The Rishi (sage or seer who had first visualised this Mantra as having divine powers) is Lord Ram himself. Rest of the elements of the Mantra are as those for Laxman etc.¹

For the purpose of worship and doing Anga-Nyas, the following divine and holy vision of Hanuman should be meditated upon—‘I concentrate my attention upon and worship Hanuman who has two arms, whose body is of a golden hue, (like that of the Laxman and Shatrughan), who is ever engaged in the service of Lord Ram, who wears only a loin cloth and a sacred thread, and who remains silent and ever contemplative. Lord Hanuman should always be worshipped, honoured and admired as an ardent devotee, a faithful follower and a devoted and obedient attendant of Lord Ram’ (105-106).

[Note—¹The Chanda is Gayatri; the patron deity or Devta is Hanuman; the Beej Mantra, or the root/seed monosyllable word used to represent the divinity and holiness of this Mantra is ‘H-ring/H-rim’. When the long vowel sound ‘Aa’ is added to this Beej Mantra, it would sound as ‘H-Raan(g)/H-raam’. The Anga-Nyas is done using this seed or root monosyllable Mantra as follows—(1) H-Raan(g)/H-raam Shirse Namaha (for doing Anga-Nyas on the head); (2) H-Raan(g)/H-raam Netrabhyaam Namaha (for doing Anga-Nyas on the eyebrows); (3) H-Raan(g)/H-raam Hridayaaye Namaha (for doing Anga-Nyas on the heart); (4) H-Raan(g)/H-raam Naabhi Namaha (for doing Anga-Nyas on the navel); and (5) H-Raan(g)/H-raam Uru Namaha (for doing Anga-Nyas on the two thighs).]

Canto 3

[This Canto describes how to construct and worship the worship instrument or apparatus, called the 'Pooja Yantras' or 'Pooja Peeth', which is used as a Talisman or charm to worship and invoke the divine blessings of Lord Ram and seek his intercession to accomplish the desired results, and also to get protection from the Lord. The supernatural powers represented by the astounding forces of Nature are encrypted in the different Beej (or seed/root) Mantras which are incorporated in this Yantra. The Beej Mantra are syllables, individual letters or even monosyllabic words much like we have single alphabets or more than one alphabets representing different elements in the Periodic Table—e.g. the single alphabets such as O for Oxygen, H for Hydrogen, N for Nitrogen, P for Phosphorous etc., and more than one alphabets such as Hg for mercury, Ag for silver, Au for gold, Fe for iron etc. In mathematics and physics, the different alphabets are used as symbols for other entities and factors that are either basic component of the entire setup or like force multipliers or enhancers.

The worship instrument or apparatus can also be likened to an integrated circuit of an electronic instrument or electric gadget which has empowered man with astounding powers and potentials. But the powers of these electronic/electric apparatuses or instruments depend on the correct positioning of the respective components; otherwise they would be ineffective and even be disastrous. In other branches of science, for example chemistry and physics, different chemicals, physical elements, constants, equations and other factors are represented by alphabets and signs of the language. If even one alphabet or sign is wrongly placed, the entire apparatus or instrument becomes worthless. This fact is very evident in organic chemistry and mathematics.

Therefore, the 'Pooja Yantra' or worship instrument or apparatus, when properly made and used, can prove to be the greatest boon that anyone can ever hope for. It has astounding mystical powers and potentials, and if used judiciously and correctly can empower the devotee with supernatural powers, enabling him to achieve astounding successes, both in the terms of material gain as well as in spiritual achievements.

This Canto describes such an instrument, called 'Ram Pooja Yantra'. It is chiefly used during formal forms of worship in which magical charms are used to invoke divine intercession for accomplishing stupendous tasks which are normally not possible for a human being. Besides describing the geometric pattern for constructing it, the Canto also simultaneously described how to worship it.

It must be pointed out here that the original Sanskrit text of this Canto has a continuous narration, with neither verses nor paragraphs. But to facilitate understanding, I have sub-divided the entire Canto into smaller units, numbered according to the English alphabets A to J.

Another interesting thing is that a similar instrument/apparatus has been described in Ram Purva Taponishad, also included in this volume, in its Canto 4. The instrument/apparatus described in this Canto by Hanuman is almost exactly the same as the one described in Ram Purva Taponishad, with some minor alterations or modifications which do not affect the overall structure of the instrument/apparatus even as different companies come out with different models and configurations of the basic instrument known as a computer, and all these computers work on same scientific principles and basic technology.

In the present Canto 3 of this Upanishad, we find that Hanuman has described two versions of the worship instrument/apparatus. Both are equally effective. The first one described from sections A to G is a little bit more complicated as compared to its counterpart described in sections H to J.]

[A.] Sages Sankaadi and others asked Hanuman, ‘Oh the brave son of Anjani! Be kind to tell us how the above Mantras are used to construct the ‘Pooja Peeth’, or the seat or altar where these Mantras are formally installed and then rituals performed so as to invoke their divine and mystical powers that empowers the aspirant to accomplish his desires’.

Hanuman replied, ‘First draw a hexagon. At the centre of it (i.e. at the core of the hexagonal sketch), one should write the two Beej (seed/root monosyllable) Mantras ‘Sring/Srim’ and ‘Raan(g)/Raam’ standing for Shakti (the universal cosmic energy) and Lord Ram (personification of Brahm, the supreme transcendental Being) respectively.

Below these two Beej Mantras, one should write the work that has to be accomplished (or the specific purpose for which the entire exercise is being undertaken) in the second case or inflexion of the Sanskrit grammar, called ‘Dwitiya Vibhakti’¹.

[¹This is the objective case in English. For example, in the sentence ‘I eat a mango’, the word ‘mango’ is in the objective case.]

The name of the aspirant should be written in the sixth case or inflexion of the Sanskrit grammar, called ‘Shasthi Vibhakti’² on the top of the Beej Mantras ‘Sring Raan(g)’.

[²This is the possessive case in English. For example, in the sentence ‘It is Ram’s work’, the word ‘Ram’s’ is the possessive case.]

On the four sides of the central Beej Mantra, one should write the Beej Mantras for Jiva (living being, creature), Pran (vital winds, the vital forces that sustain life in a living being, breath), Shakti (energy, potent, powers and strength), and Vashya (the power to control and command).

The ethereal universal Beej Mantra ‘OM’ (which stands for the supreme Brahm) should be written on the top and the bottom.

The six Beej Mantras that are used for doing Anga-Nyas (defined in Canto 2, verse nos. 10-11) on the heart and the various weapons of the warrior who is worshipping this Yantra are written clockwise in the following sequence at the six inside corners of the hexagon—‘Raan(g)’, ‘Ring’, ‘Rung’, ‘Raing’, ‘Raung’, and ‘Raha’.

The two Beej Mantras for Ramaa (Goddess Laxmi, the divine consort of Lord Vishnu) and Maya (the cosmic power of creating delusions), which are respectively ‘Sri/Sring’ and ‘Hring’, are written near the hexagon, outside each of its six faces.

[That is, these two Beej Mantras are placed in pairs outside the enclosure of the hexagon, facing the lines of each side.]

The Beej Mantra for the Varaaha God (i.e. the boar incarnation of Lord Vishnu), i.e. ‘Hoong/Hoom’, is written opposite the six points of the hexagon. [Therefore, there would be six ‘Hoong/Hoom’ words.]

The Beej Mantra for Kaam (fulfillment of desires), i.e. ‘Kling/Klim’, is written in the space between all the six points of the hexagon and the Beej for Varaaha (‘Hoong/Hoom’) written opposite these points as described above.

[That is, ‘Kling/Klim’ is placed mid-way between each of the six points of the hexagon and the point where ‘Hoong/Hoom’ has been written. Therefore, there would be six ‘Kling/Klim’ words.]

Around this ‘Kling/Klim’, the Beej Mantra for Goddess Saraswati (the goddess of knowledge and learning; the Beej for the faculty of speech), i.e. ‘Aiyang/Aim’, is written. (A).

[B.] After this, three concentric circles should be drawn, and eight petals (representing the lotus flower) should be drawn on each of these circles on their outer surface/side.

In the first ring of petals, the letters of the vowels are to be written in a clockwise manner at the bottom end of each petal (i.e. at the base of the petals resting on the surface of the circles) such that one petal has one pair of the vowels of the Sanskrit alphabet.

[That is, each petal would have two *vowel* alphabets. The pairs would be ‘A’ (अ) and ‘Aa’ (आ) // ‘E’ (इ) and ‘Ee’ (ई) // ‘U’ or ‘Oo’ (उ) and ‘Uu’ or ‘Ooo’ (ऊ) // ‘Ri’ (ऋ) and ‘Rii’ (ॠ) // ‘Lri’ (ऌ) and ‘Lrii’ (ॡ) // ‘Ae’ (ए) and ‘Aye’ (ऐ) // ‘O’ (ओ) and ‘Ou’ or ‘Aou’ (औ) // ‘Ang’ (अं) and ‘Aha’ (अः).]

Next, above these vowels, the letters of the consonant of the Sanskrit language are to be written in such a way that each petal has one category of the consonant in it.

[There are eight categories or sets or groups of *consonants* in the language, and each category is placed in one petal. The placement is done clockwise just above the vowels. Thus, the petals would have the following group of consonants—(1) The first group has the following consonants—‘Ka’ (क); ‘Kha’ (ख); ‘Ga’ (ग); ‘Gha’ (घ); ‘Ang’ (ङ); (2) The second group has the following consonants—‘Cha’ (च); ‘Chha’ (छ); ‘Ja’ (ज); ‘Jha’ (झ); ‘Ieyan’ (ञ); (3) The third group has the following consonants—‘Ta’ (त); ‘Tha’ (थ); ‘The’ (द); ‘Dha’ (ध); ‘Na’ (न); (4) The fourth group has the following consonants—‘Tta’ (ट); ‘Tha’ (ठ); ‘Da’ (ड); ‘Dha’ (ढ); ‘Ana’ (ण); (5) The fifth group has the following consonants—‘Pa’ (प); ‘Pha’ or ‘Fa’ (फ); ‘Ba’ (ब); ‘Bha’ (भ); ‘Ma’ (म); (6) The sixth group has the following consonants—‘Ya’ (य); ‘Ra’ (र); ‘La’ (ल); ‘Va’ (व); (7) The seventh group has the following consonants—‘Sha’ (श); ‘Sha’ (ष); ‘Sa’ (स); and (8) The eighth group has the following consonants—‘Ha’ (ह); the mixed sound ‘Hla’ (ह्ल); ‘Ksha’ (क्ष); ‘Tra’ (त्र) and ‘Gya’ (ज्ञ).]

Now, at the top end of the first ring (circle) of the petals, inside each of the petals but above the consonant alphabets, the six lettered ‘Tarak Mantra’ (Raana(g) Raamaaye Namaha; or OM Raamaaye Namaha) is written.

In each of the eight petals of the central ring (i.e. the second circle), the Mantra ‘Sri Raamaha Sharanam Mam’ is written.

[This Mantra appears in verse no. 35-36 of Canto 2 of this Upanishad.]

At the top (i.e. the third) layer of petals, the Mantra ‘OM Namō Naaraayanaaye’ is written in each of the eight petals at their lower end. At their upper end, the Beej Mantra for Shakti and Sita, i.e. ‘Srīng/Srīm’, is written. (B)

[C.] Another circle (i.e. the fourth) is made above (i.e. outside) this layer of lotus petals. This circle has twelve petals on its outer surface. The alphabets of the twelve-lettered Mantra ‘OM Namō Bhagwate Vaasudevaaye¹’ should be written clockwise, starting from the top (northern) petal in such a way that one alphabet of this Mantra is in one petal. These alphabets are written at the base of the petals.

[Since there are twelve petals and twelve alphabets in the Mantra, each petal would have one alphabet.]

Now, the twelve representative letters of the different categories of the alphabets of the Sanskrit language are placed inside the tip of each of these twelve petals, so

that one petal has one alphabet². The alphabets are the following—A (the first vowel pronounced as in *son*, *along*, *bird*; *a* man), E (the third vowel pronounced as in *if*, *nip*), Oo (the fifth vowel pronounced as in *full*, *bull*, *wool*), Ka (the first consonant pronounced as in *kerb*, *kernel*), Cha (the sixth consonant pronounced as in *chain*, *champion*), Tta (the eleventh consonant pronounced as in *ten*, *too*), Ta (the sixteenth consonant pronounced as t-t in French), Pa (the twentieth-first consonant pronounced as in *purse*, *pulp*), Ya (the twenty-sixth consonant pronounced as in *yearn*, *year*), Sha (the twenty-ninth consonant pronounced as in *shawl*), Ha (the thirty-second consonant pronounced as in *hut*, *hung*), and Ksha (the thirty-third consonant which is a combination of ‘Ka’ and ‘Sha’), are placed at the top inside end of each of these ring of twelve petals².

[¹The Mantra has twelve letters or syllables as follows—OM + Na + Mo + Bha + Ga + Wa + Te + Vaa + Su + De + Vaa + Ye = 12 letters.

²The alphabets have a symbolic meaning. Since they cover the entire spectrum of sound, they represent the entire creation from its beginning to its conclusion. Even as we select one sample to depict an entire class of a particular thing, e.g. we take a flowering tree to represent an entire class of the plant kingdom which bears flowers as opposed to those plants which do not bear flowers, these alphabets also act as symbols for all types of creatures in this creation. Further, since every force in Nature has been personified as a particular God, these alphabets also represent the authority, powers and potentials of all these Gods because these Gods do not exist outside the creation.] (C).

[D.] Another circle is to be drawn outside this. This is the fifth ring. On the outer surface/side of this circle, sixteen petals (of the lotus flower) should be drawn. The sixteen-lettered Mantra ‘OM Namō Bhagwate Ram Chandraaye Namaha Hoong/Hoom Phat’¹ is written in these petals in such a way that one petal has only one alphabet.

[Since there are sixteen petals and sixteen letters or syllables in the Mantra, each petal would have one alphabet.

¹The sixteen letters are the following—OM + Na + Mo + Bha + Ga + Wa + Te + Raa + Ma + Chan + Draa + Ye + Na + Maha + Hoong/Hoom + Phat = 16 letters.]

Above each of these alphabets, the Beej Mantra for Maya, i.e. ‘Hring/Hrim’, should be written.

By the side of this Maya Beej Mantra, the following monosyllable Mantras are to be written such that one petal has only one letter. These Mantras are—‘Hrim/Hring’, ‘Strang/Stram’, ‘Bhrang/Bhrum’, ‘Brang/Bram’, ‘Bhra-mang/mam’, ‘Shroong/Shrum’, and ‘Jram/Jrum’ (D).

[It is to be noted that these Beej Mantras are only eight in number while the number of petals are sixteen. Hence, these Mantras are repeated, a system called ‘Aavriti’. That is, after the eighth letter, i.e. Jram/Jrum, the process is repeated and the first letter Hrim is written in the ninth petal while the eighth letter Jram/Jrum is written in the sixteenth petal.]

[E.] The circle of the sixth layer is drawn outside the fifth ring, and thirty-two petals are made on its outer surface (i.e. on its circumference/periphery).

In each of these thirty-two petals, one Mantra of the thirty-two Mantra hymn dedicated to Lord Narsingh (who was Lord Vishnu’s incarnation as the God who is half-lion and half-man) is to be written.

[This hymn of Lord Narsingh has been elaborately described in ‘Narsingh Purva Tapiniopanishad, Canto 4, verse no. 14 belonging to the Atharva Veda tradition. The hymn of Lord Narsingh has thirty-two stanzas symbolising the Chanda called

‘Anushtup’ which has thirty-two letters, each symbolising one aspect of the cosmic energy, or one grand divine virtue for which Nrisingh God is famous.

It is pertinent here to note that in ‘Ram Purva Tapiniopanishad’, Canto 4, verse no. 54, it has been stated that the Beej Mantra of Lord Nrisingh, which is ‘Kshroung/Kshraum’, is used instead of the thirty-two hymns.]

Above these individual Mantras of the thirty-two Mantras of the Nrisingh God placed in each petal, one alphabet symbolising the Beej Mantra of the following Gods, and representing their divine names, powers and potentials, is written. The Gods whose Beej Mantras are to be written here are the following—the eight Vasus¹, the eleven Rudras², and twelve Adityas³.

[The total number of Beej Mantras would be—8 + 11 + 12 = 31. Since there are thirty-two petals, the divine Beej Mantra OM is added either to the first or the last petal.

¹The *eight Vasus* according to Purans are the following—Dhruv, Dhar, Som, Aapha, Anil, Anal, Pratush, and Prabhas.

²The *eleven Rudras* are the various manifestations of Lord Shiva. They are the following--(i) Mannu, (ii) Manu, (iii) Mahinas, (iv) Mahaan, (v) Shiva, (vi) Ritdwaj, (vii) Ugrareta, (viii) Bhav, (ix) Kaal, (x) Vamdeo, and (xi) Dhritvrat. The eleven Rudras appear in Rig Veda 1/43/1, and Taiteriya Brahmin 3/4/9/7. They are regarded as the father of the Wind God or the Maruts (Rig Veda, 2/33/1). The word Rudra means one who is angry, terrible and wrathful. Amongst the Rudras, Lord Shiva is regarded as the most senior and enlightened.

The eleven Rudras according to Vishnu Puran (1/1/15) are the following—Har, Bahuroop, Trayambak, Aparajeet, Shambhu, Vrishakapi, Kapardi, Raivat, Mrigvyadh, Sharva, and Kapaali.

³The *twelve Adityas* are the various manifestations of the Sun God. According to Vishnu Puran, the twelve Adityas are the following—Dhata, Arayma, Mitra, Varun, Ansha, Bhug, Indra, Vivaswan, Pusha, Parjanya, Twashta, and Vishnu.]

The sequence to be followed for writing these Beej Mantras of the above thirty-two Gods is as follows—Om + Beej Mantra of one of these thirty-two Gods + Namaha’.

[For example, OM + Beej Mantra for one of the Vasus + Namaha. The meaning would be

‘OM salutations! I reverentially bow and pay my respects to ‘X’ Vasu.]

On the four cardinal directions, i.e. North, East, South and West, of this instrument/apparatus, the Beej Mantra ‘Vashat’ is written. (E).

[F.] Outside the above structure, a boundary wall of three parallel lines is drawn. This is called a ‘Bhupur Yantra’^{1*}.

[¹The word ‘Bhu’ means land or earth, while ‘Pur’ means a city. Hence, this boundary acts like the outer ramparts of the fort in which the Emperor is seated. The Emperor is ‘Raam(g)/Raam’, i.e. Lord Ram, and his Empress is ‘Sring/Srim’, or Sita.

*The *Bhupur Yantra* has been elaborately described in Ram Purva Tapiniopanishad, Canto 4, verse no. 53-54.]

The twelve signs of the Zodiac are placed in such a way that three of them appear at each inside corner of the Bhupur Yantra. [4 corners x 3 signs = 12 Zodiac signs.]

[The twelve signs of the Zodiac are the following—Aries, Taurus, Gemini, Cancer, Leo, Virgo, Libra, Scorpio, Sagittarius, Capricorn, Aquarius and Pisces. The zodiac is the belt or band of constellation of stars through which the Sun, the Moon and the planets move across the sky. The twelve signs of the zodiac represent the twelve constellations considered important by astrologers who were ancient astronomers as well as

mathematicians. The twelve cycles of the moon coinciding with the twelve months of the year consisting of one solar cycle was the reason why the figure 'twelve' was chosen because the Sun and the Moon were central to astrological calculations.]

This Bhupur Yantra has four doorways or gateways. There are eight legendary snakes to protect them. Each gateway has one Beej Mantra of one of the legendary snakes called the 'Naagas' on either side of it. [4 gateways x 2 Beej Mantras for the legendary snakes = 8 Beej Mantras.]

[The *eight Legendary serpents* are the following—Anant, Vasuki, Takshak, Karkotak, Padma, Mahapadma, Shankha, and Kulik.]

The Beej Mantra for Nrisingh God, i.e. 'Kshroung/Kshraum', is to be written in the four directions (i.e. north, east, south and west), while the Beej Mantra for Varaaha God, i.e. 'Hoong/Hoom', is to be written in the four corners (i.e. north-east, south-east, south-west and north-west). This last Mantra (i.e. the Beej Mantra for Varaaha) fulfills all the desires of the aspirant along with providing him with Mukti (liberation and deliverance, emancipation and salvation) (F).

[G.] This Pooja Yantra and its seat or altar, called the 'Peeth', is used to worship Lord Ram and his other manifestations as well as his ardent followers and devotees who had helped the Lord during his incarnation as a human to slay the evil demon king of Lanka, Ravana, who epitomized all the evil, sinful and pervert forces of Nature which had almost eclipsed those that were auspicious, righteous, noble and virtuous. Various Mantras are used for this purpose, such as the Mantra of one letter, i.e. 'Ra(g)/Raam' (mentioned in verse no. 1 of Canto 2 of this Upanishad) till the Mantras having nine letters (mentioned in verse no. 64-65 of Canto 2).

When the aspirant properly activates this worship Talisman, all the different Gods, devotees and followers of Lord Ram make it their responsibility to ensure that the worshipper is given due protection.

The protective shield or covering that they provide him is called the 'Aavaran'. [The word 'Aavaran' literally means a covering or veil that covers anything from all sides.] The different circles or rings where the different Beej Mantras are placed are like the various protective rings around the worshipper, and that is why the worship of these rings and their Mantras is called the 'Aavaran Pooja'.

This worship is actually invoking of the various stupendous dynamic forces of Nature personified as different Gods, and as the different devotees and followers of Lord Ram who are no less powerful than the Gods, to help the worshipper, who himself is a great devotee of Lord Ram, to accomplish all his wishes and to give him due protection.

From the physical perspective, the instrument/apparatus resembles a fort where Lord Ram, the Emperor, is seated in his palace in the central citadel represented by the centrally-placed hexagon. Each ring or circle of petals having the Beej Mantras represents the various protective rings of walls and ramparts of this symbolic fort, with guards and attendants of the Lord who are represented by the different Beej Mantras. They not only guard the fort for the Lord but also ensure that all devotees who have sought the refuge of the Lord are given shelter and protection in this fort. This is the symbolism of this fort-like Pooja Yantra.

When the worshipper uses this instrument/apparatus, he is not only sincerely and devotedly requesting Lord Ram to be pleased with him but also extending the same request to the Lord's other devotees to include him in their ranks and give him their protection and blessing. He beseeches them to let him have access not only to this symbolic mystical fort of the Lord but also to the inner chambers of the palace of

the Lord so that he can come directly in contact with his Lord and have access to the Lord's bountiful treasury of munificence and benevolence.

It ought to be noted here that it is not that the worshipper hasn't had any access to Lord Ram previously—for when he had started worshipping the Lord through this Pooja Yantra where the Beej Mantra for Ram and Sita, i.e. 'Raam(g)/Raam' and 'Sring/Srim' are located at the core of the hexagon, he had already gained direct access to the Lord because for two reasons—one, the very construction of the Pooja Yantra starts from the center by placing this Beej Mantra of the Lord, and second, the process of worship itself is started from the central hexagon and then proceeded outwards. Therefore, it is established that the worshipper has already had a direct access to Lord Ram and has already received the Lord's blessings. But it is expected of him to follow custom and observe curtesy and decency by showing his respects to other Gods and devotees of the Lord who are in attendance. It is essential to keep the Emperor's courtiers and attendants in good humour; so it becomes prudent and absolutely essential for him to worship the various Gods and attendants of the Lord who are represented by the different Beej Mantras in the various circles of the worship instrument/apparatus.

For the purpose of worship, Mantras having one letter to those having nine letters are used. First, the main Pooja Yantra is worshipped. The process of worshipping starts at the center of the hexagon and then progresses outwards, worshipping each layer of petals in succession.

So, to start with, at the central point, i.e. at the center of the hexagon, Lord Raghav (Ram) is to be worshipped. This is the first 'Aavaran'¹ or protective ring or shield.

[¹The word *Aavaran* means a protective ring, a covering, a screen, a shield, an encircling wall or ring, an obstruction. As we have seen in the above discussion, here in ritualistic forms of worship this term applies to the worship of different Gods whose Beej Mantras are used to construct the instrument, and whose divine intercession is sought by the aspirant for his protection and successful completion of his desires.]

At the base of the first ring of eight petals, the forces of Nature which are worshipped as the second 'Aavaran' to give the worshipper their protection, are the Atma (the universal Soul which is pure consciousness) and Vasudeo (one of the thousand names of Lord Vishnu, the cosmic sustainer and protector, and so-called as he is the Lord of all the eight Vasus which are the essential assets provided by Nature for sustenance of life in this creation).

At the base of the second ring of eight petals, Ghristi and others are worshipped as the third 'Aavaran'.

Hanuman and other devotees are worshipped as the fourth 'Aavaran' at the base of the third ring having eight petals.

In the twelve petals, sage Vashistha and others are worshipped as the fifth 'Aavaran'.

Similarly, in the sixteen petals, Neel (one of the chief monkey warriors and one of the two architects of the bridge that Lord Ram had built to cross over the ocean to Lanka) and others are worshipped as the sixth 'Aavaran'.

In the thirty-two petals, Dhruv (one of the greatest devotees of the Lord and who is eternally present in the sky as the polar star, called the 'Dhruv' star), and others are worshipped as the seventh 'Aavaran'.

[Till now, the main instrument/apparatus was worshipped. Now the outer boundary, called the 'Bhupur', is worshipped.] The king of Gods, i.e. Indra, is

worshipped inside the boundary of the Bhupur, the peripheral three-lined wall representing the outer walls of the fort, while his weapon, the Vajra, is worshipped outside the boundary wall.

The above process described in this section is called 'Aavaran Pooja'. Once this is finished, the aspirant devotee should do Japa (repetition of holy Mantras) of the Lord's Mantra having one to nine letters (G).

[The above section describes the worship of Lord Ram's Mantras having one to nine letters, and the magical charm instrument/apparatus, the Talisman, used for this purpose.]

[H.] [Now, the method of worship of the Lord's Mantras having ten right up to thirty-two letters is being described, along with the magical charm instrument/apparatus, the Talisman, needed for this purpose.]

First the hexagon is made. At its center, the two Beej Mantras 'Sring' and 'Raan(g)' are written in such a way that the work to be accomplished or the objective to be achieved is written in between them.

Surrounding them, the Beej Mantra for Kaam (invocation of divine intercession for accomplishment of desired results and fulfillment of wishes), i.e. 'Kling', is written. After this, the nine letters of the nine-letter Mantra are written within the hexagon in order to encircle the above configuration of Beej Mantras.

The six Beej Mantras used to do Anga-Nyas as described in section D above are placed at the six inside corners of the hexagon.

[These Beej Mantras are 'Hring/Hrim', 'Strang/Stram', 'Bhrang/Bhram', 'Brang/Bram', 'Bhra-mang/mam' 'Sroong/Sroom', and 'Jram/Jrum'.]

On the outer side of each surface of the hexagon, the Beej Mantras 'Sring' and 'Hring' are written. The Beej Mantra for 'Krodh' (anger and symbolising Rudra, one of the manifestations of Lord Shiva), i.e. 'Kang', is written outside the hexagon opposite its six corners (H).

[I.] Now one circle is drawn around the hexagon. Eight petals are made on this circle. At the base of these eight petals, the forty-seven lettered 'Mala Mantra' of Lord Ram¹ is written in such a way that one petal has only six letters. [This means that the Mantra would be evenly spread across the eight petals, with each petal having six letters².]

[¹This forty-seven letter Mantra is mentioned in Canto 2, verse no. 90-92. It is 'OM Namō Bhagwate Raghunandanaaye Rakshoghna-vishadaaye Madhuaraye Prasanna-vadnaye Amit-tejase Bal-raamaaye Vishnave Namaha.' This is also called the 'Mala Mantra'.

²Since this Mantra has only forty-seven letters, therefore when six letters are written on each petal, the last would have only five letters. The deficiency is made good by adding OM to this last petal. 8 petals x 6 letters = 48 (47 + 1) letters. These letters have been described distinctly in note to verse no. 90-92 of canto 2 of this Upanishad.]

At the upper end of the eight petals, the sixteen letters of the Sanskrit vowels are written in such a way that each of the eight petals has two alphabets.

[The sixteen letters of the vowels are the following—'A' (अ); 'Aa' (आ); 'E' (इ); 'Ee' (ई); 'U' or 'Oo' (उ); 'Uu' or 'Ooo' (ऊ); 'Ri' (ऋ); 'Rii' (ॠ); 'Lri' (ऌ); 'Lrii' (ॡ); 'Ae' (ए); 'Aye' (ऐ); 'O' (ओ); 'Ou' or 'Aou' (औ); 'Ang' (अं); 'Aha' (अः).]

Outside the ring of petals, the alphabets of the Sanskrit language are written in a circle around it so that they form a girdle.

The 'Bhupur', i.e. the outer periphery wall of the instrument/apparatus, has four symbolic doorways or gateways. On each side of these gate/doorways, the Beej Mantras for the eight Vasus, including Shiva, are written as a holy Talisman. [Refer section F.]

The Beej Mantra for Nrisingh God, i.e. 'Kshroung/Kshroum', is to be written in the four directions (i.e. north, east, south and west), while the Beej Mantra for Varaaha God, i.e. 'Hoong/Hoom', is to be written in the four corners (i.e. north-east, south-east, south-west and north-west).

This completes the construction of the Yantra (worship instrument/apparatus) (I).

[Note—A diagrammatic representation of the Yantra, called the Ram Yantra, is added at the end of this Chapter.]

[J.] Now the process of worshipping the various 'Aavarans' is being described. [Refer section G above.] The first Aavaran consists of Lord Ram at the centre, Sita to his left, his weapons, the bow and the arrow, in the front, and the different manifestations of the divine Goddess represented by the Beej Mantras placed at the six inside corners of the hexagon, as well as on the outer side of the six surfaces and at the six angles of the hexagon as described in section H above.

The second Aavaran consist of Hanuman and others.

The third Aavaran consists of Ghristi and others.

The fourth Aavaran consists of Indra, the king of Gods, and other Dikpals (custodians of the world).

The fifth Aavaran consists of the weapon of Indra, the Vajra, and other weapons.

When one worships each of these elements of the worship instrument/apparatus, it is deemed to have been properly worshipped.

Finally, the worshipper or aspirant who has started this worship for fulfillment of certain desire or wish should do Japa (repetition of holy Mantras) using all the Mantras that start with ten letters and go up to the Mantra having thirty-two letters (J).

Canto 4

1. Great sages and seers, such as Sankadi etc., enquired from Hanuman, 'Please tell us the proper way to accept these different Mantras of Lord Ram for the purpose of doing formal religious rituals during sacrifices as well as for the purpose of doing Japa (repetition of the holy Mantras) for achieving success in specific objectives'.

Hanuman replied, 'One should take the purifying bath three times a day. One should eat only fruits and edible roots, and drink milk (1).

2-3. One should strictly follow the codes of conduct sanctified for the 'Ashram' (the phase of life), such as the Brahmacharya Ashram, to which the aspirant worshipper belongs¹. During this period, he should abstain from such allurements of the senses as the desire to eat tasty things.

The aspirant worshipper should observe strictest codes of self-discipline, and remain steadfast in them. He should remain aloof from and indifferent towards all

worldly attachments and involvements involving any kind of indulgence on the part of his faculty of speech, his organs of action and perceptions, and his mind and intellect. That is, he should strive to remain pure and free from all sorts of corrupting worldly influences which might affect him, that might tarnish his mind and spirit, and generally act as a severe drag on his spiritual progress.

He should have firm faith in his Guru (moral teacher and preceptor). He should sleep on the ground and be without any worldly longings, yearnings, aspirations, hopes, expectations and desires whatsoever.

He should be diligent towards his spiritual aim by strictly following the principles of Brahmacharya, and observing its strict codes of conduct. He should be particular in observing such religious norms as taking purification baths, doing formal worship and spending his time in Dhyana (meditation, contemplation), doing of Japa (repetition of holy Mantras), performing Hom (fire sacrifices) and offering Tarpan (oblations and libations to the Gods and spirits of dead ancestors to invoke their blessings) (2-3).

[Note—¹The life of a Hindu has been divided into four sections called *Ashrams*. The first is called Brahmacharya Ashram when he is a student and observes strict norms of self discipline, spending his time in studying under the guidance of a wise teacher. The second phase is called Grihasta Ashram when he marries and enters the householder's life. After fulfilling his obligations towards his family, he takes to the Vanprastha Ashram when he leaves direct involvement in worldly affairs and instead moves out of the house to go on long pilgrimages. In early times, he used to head for the forest, but it might not be practical in modern times. The last phase is called Sanyas Ashram when he totally renounces the world and its attachments, and prepares for his exit from this world. He is ordained to spend this phase doing meditation, contemplation and studying of the scriptures in order to inculcate a sense of realisation of the falsehood of this material world which is perishable, and the truth about the immortality of the Atma which is the pure self.]

4-5. The aspirant worshipper should follow the instructions of his Guru (moral preceptor and teacher) and divert his mind away from the world, from remaining engrossed in the sense objects of this material world, and instead concentrate it on doing meditation upon Lord Ram.

He should remain in the company of his Guru and a lighted lamp (both symbolising his eagerness to remain close to a source of light representing knowledge that can dispel the darkness of his ignorance) as well as of a cow and a Brahmin (both of whom are regarded as sacred and holy entities, thereby signifying his sincere wish to remain in the company of holy fellow beings, instead of sinful and pervert people).

He should sit with a composed mind, silently and calmly, before Lord Ram (i.e. mentally remain focused on the Lord's image, and be free from all sorts of distractions), contemplating upon the Lord's sublime form as well as deeply pondering upon the meaning of his powerful divine Mantras.

He should sit in the 'Swastik Aasan'¹ posture on a lion's skin for the purpose of doing meditation and repetition of the Mantras (4-5).

[Note—¹The sitting posture called Swastik Aasan is one in which a person sits cheerfully in an erect position, with the sole of one foot lying against the center of the thigh of the opposite leg. Refer Trishikhi Brahmin Upanishad of Shukla Yajur Veda tradition, in its Canto 2, verse no. 35.]

6-7. The aspirant worshipper should sit under or near a Tulsi tree (the Basil plant), or a Parijaat tree (the night jasmine plant) or a Bel tree (the wood apple plant).

For the purpose of doing Japa (repetition of holy Mantras), one should use a rosary made up of beads using the seeds of the Kamal (lotus) plant, the wood of the Tulsi (basil) plant, or the seeds of the Rudraksha plant (the tree called *elcocarpus ganitrus*).

While doing Japa or repeating the holy Mantras of Lord Ram, one should include the Beej names (i.e. the seed or root words) of the different divine Mothers¹.

The best way to do Japa is mental (i.e. silently and without any verbal fuss). The number of times the selected Mantra is to be repeated depends upon the number of letters in it. For each letter, the number of prescribed times is one lakh. Therefore, the repetition is to be done for as many lakhs of times as they are number of letters in the Mantra. [That is, suppose the Mantra selected for doing Japa has two letters then the Mantra is to be repeated for two lakh times.] (6-7).

[Note—¹The Beej Mantras for the cosmic Mothers who represent different forces of Nature, and how to use them with Mantras for Lord Ram have been explained in Canto 2, verse nos. 17-18. For example, the seed/root Mantra for cosmic Shakti or energy behind the creation, sustenance, protection and annihilation of creation is 'Sring', for Maya (the cosmic deluding powers of Brahm) it is 'Hring', for Saraswati (the Goddess of knowledge and learning as well as of speech and wisdom) is 'Aiyang', for Kaam (worldly desires and passions) it is 'Kling', and so on and so forth.]

8. After the completion of repetition of the Mantra, the aspirant worshipper should do the fire sacrifice. The number of offerings of milk or clarified butter that are to be made to the sacred fire using the same Mantra would be one tenth of the number of times the Mantra was repeated during the process called Japa. [That is, if the Mantra was repeated for two lakh times, then one tenth of it is twenty thousand. Hence, the number of offerings should be twenty thousand. 1 lakh = 1,00,000.]

One tenth of the number of offerings is counted for making oblations and libations to the Gods while repeating the same Mantra. One tenth of this number is used for cleaning and purification by offering water to the chosen deity while repeating the same Mantra.

Finally, one tenth of this number is counted for feeding a particular number of Brahmins (8).

[Note—Suppose the Mantra has two letters. For example, if the two letter Mantra 'Ram' (Ra + Ma = 2) is selected for worship, then it has to be repeated for $2 \times 1,00,000 = 2,00,000$ times. The number of offerings to be made to the sacred fire pit is $1/10$ of it, i.e. 20,000 times. The number of oblations and libations made to Gods would be $1/10$ of 20,000 = 2000 times. The number of times washing and sprinkling of water would be $1/10$ of 2000 = 200 times. Finally, the number of Brahmins to be fed would be $1/10$ of 200 = 20.]

9. Then flowers should be duly offered with the greatest of reverence to the worshipped deity (here Lord Ram) with the aid of the basic Mantra used for such worshipping. [That is, the Mantra should be recited while offering flowers to the deity.]

By strictly observing the above steps during the process of repeating the Mantra and worshipping the chosen deity, i.e. Lord Ram in this case, the Mantra, possessing inherent supernatural powers which were hitherto dormant in it, now becomes effective. As a consequence, the worshipper becomes 'Jivan Mukta', i.e. he is liberated from the limiting fetters of this body and achieves dynamic strength and

supernatural powers which enable him to accomplish those feats which he couldn't imagine with his physical gross body (9).

10-11. Even as an excellent bride-to-be wishes to have an excellent groom for herself, all the different 'Siddhis' such as Anima¹ etc. are easily made accessible to the worshipper who follows the rules of worship as outlined in this Upanishad. But it is not advisable to employ the stupendous potentials and powers of the great 'Ram Mantra' to achieve worldly gains and fulfill worldly ambitions, and neither is it desirable to use it to deflect or dispel worldly miseries and troubles. It should be invoked only for the purpose of attaining 'Moksha' (i.e. for achieving success in breaking free from the shackles that tie the man to this entrapping mortal world of falsehoods and delusions, thereby helping him to be delivered from their eternal torments and miseries, and consequentially obtain emancipation and salvation for his soul)².

Nevertheless, if one wishes to accomplish success in attaining some worldly goals and other such humdrum worldly gains, then it is enough for a devotee of Lord Ram to request me (i.e. Hanuman), instead of troubling Lord Ram by invoking the Lord's glorious, all-powerful, most majestic and divine Mantra for such humdrum and ordinary activities (because that would be tantamount to exchanging a precious and priceless piece of diamond for garbage) (10-11).

[Note—¹There are eight *Siddhis* which are divine mystical powers which enables the person to accomplishment astounding feats. They are the following— (i) 'Anima' means the power to become microscopic or so minute that one becomes invisible to the naked eye; (ii) 'Mahima' is to have majesty, glory and fame; to be honoured and acknowledged for one's achievements, knowledge and skills; (iii) 'Garima' is to have weight, stature, dignity, decorum, gravity and significance, (iv) 'Laghima' is to have simplicity and humility; (v) 'Praapti' is to be able to attain or obtain anything wished or desired; (vi) 'Prakramya' is to have valour, ardour, strength, powers, prowess, potential and punch leading to triumph, glory and majesty; (vii) 'Ishwatwa' is to be able to have lordship or sway over others; and (viii) 'Vashitwa' is to be able to control and subdue others.

²That is, these Mantras are so holy and special that they should be employed only for some noble and auspicious causes such as one's spiritual welfare, accomplishment of some most important task that has no trace of selfishness in it, as well as attainment of eternal goals that give permanent peace and bliss to the aspirant rather than to satisfy his desires for sense gratification or obtaining pleasure and comfort from this material world which is, however, perishable, impermanent and transient by nature.]

12. Oh sages and seers! He who reverentially remembers and faithfully meditates upon Lord Ram, daily and diligently, who repeats his holy divine Mantras with the greatest of veneration and conviction, I am always eager and ready to fulfill all his desires and wishes¹ (12).

[Note—¹With reference to what has been said in verse no. 10-11 above, this verse acquires special significance. Hanuman effectively says that such a devotee should not worry about his own welfare or for the fulfillment of his desires. He need not approach the supreme Emperor, i.e. Lord Ram, for his mundane requirements, because I am there to take care of all that. Rather, he should concentrate his energy towards matters that are more important for him, matters only his personal efforts and diligence can provide results with, such as spiritual matters pertaining to his emancipation and salvation as these depend upon his own sincerity and diligence, and not that of others. The fetters that shackle his

soul to the body are due to his own ignorance about the truth of his Atma or his soul which is pure consciousness, and this ignorance can be removed only by him and no one else much like the case when a disease afflicting a patient can only be removed by his taking the necessary medicines and observing strict control over diet and life-style himself, and not by someone else taking the medicine or eating with restraint on his behalf, though his other routine works that are not directly connected with the disease can be taken care of by his attendants.]

13. It's my word of honour (i.e. I promise) that I would be constantly providing fulfillment of desires of all the ardent devotees of Raghav (Lord Ram) and give them whatever rewards they wish to have. This is because I am ever eager and diligent for doing any work that is deemed to be the Lord's work (13).

[Note—If the devotee had requested Lord Ram to fulfill certain desires, the Lord would have definitely done it for him. Now Hanuman says that he does not wish to trouble his Lord with such mundane matters as worrying about simple worldly things that his devotee seeks from him. Hanuman is very competent and efficient enough to do things on the Lord's behalf, so why unnecessarily worry or trouble the Lord? He does not wish that the Emperor (Lord Ram) has to worry for such routine matters, and they be best left to his junior servants and attendants to be attended by them. Hanuman regards even routine job, such as fulfillment of wishes of the devotees of the Lord, as the Lord's own work, and therefore most willingly does them for the Lord. He feels privileged in helping the Lord's devotee and treats it as a great service to the Lord himself. That is why he is so dear to Lord Ram's devotees and is their favourite God.]

Canto 5

1-2. Sages Sankadi and others once again asked Hanuman, 'Please be kind to enlighten us about the meaning and metaphysical as well as spiritual importance and significance of the Mantras of Lord Ram'.

Hanuman replied, 'The best Mantra of Lord Ram is the one having six letters or syllables¹. It is of eight principal types, and even of other types depending upon which word or letter or phrase is added as prefix or suffix to it².

Its real spiritual importance and metaphysical significance, its astounding potentials and supernatural powers, its magnificent spiritual value, holiness and divinity are best known to Lord Shiva (1-2).

[Note—¹The basic six-lettered Mantra of Lord Ram is 'Raam(g)/Raam Raamaaye Namaha'. Refer Canto 2, verse no. 16.

²All other types of Mantra are described in Canto 2, and have been listed at the end of that Canto.]

3. Now I shall tell you the truthful meaning of this great Mantra of Lord Ram which is like an emperor amongst the pantheon of Mantras—hence it is honoured by the epithet 'Mantra Raaj', the King of Mantras.

In the eight letter Mantra (dedicated to Lord Vishnu, i.e. 'OM Namo Naranyanaaye'—meaning 'I reverentially bow before Lord Narayan who is a manifestation of OM or Brahm'; or 'OM salutations! I reverentially bow before Lord Narayan') and in the five letter Mantra (dedicated to Lord Shiva, i.e. 'Namaha Shivaye'—meaning 'I reverentially bow before Lord Shiva), the only two letters that

are effective and powerful are 'Ra' and 'Ma'. ['Ra' from the first Mantra, and 'Ma' from the second Mantra¹.]

'Ram' is the divine Being and the holy Lord in whom acclaimed and realised Yogis (ascetics) have focused their mind and entire being; it is 'Ram' in whose thoughts they remain submerged; it is 'Ram' upon whom they constantly meditate and contemplate.

The Sanskrit alphabet 'Ra' (as in *run*) is the Beej (seed/root) Mantra of the 'fire element'. Fire has light inherent in it; light effuses from fire as its fundamental characteristic feature. There cannot be fire without attendant light. Illumination and light symbolise knowledge and learning that dispels darkness of ignorance, and they are representatives of the pure consciousness called the Atma. At the cosmic level, this 'light' represents the supreme transcendental Consciousness called the supreme Atma or the 'Parmatma'. The 'illumination' represents self-realisation leading to the knowledge of the ultimate and irrefutable Truth in creation. The entity that is truthful and illuminated would have nothing to do with darkness symbolising ignorance which is the cause of all miseries and torments in this world (3).

[Note—¹This observation has great metaphysical import. Lord Narayan or Vishnu is the Viraat Purush personified. He is the Lord from whom the entire creation has emerged and evolved. He not only created it but also sustains it, protects it and takes care of its development. On the other hand, Lord Shiva represents the other balancing force of Nature which ensures that everything that has come into existence does come to an end to maintain the ecological balance. Otherwise it would be like an uncontrolled nuclear reaction which has gone out of control, creating havoc and horrendous consequences. Now, when the Sanskrit letter 'Ra' is pronounced as in the word 'Right', the mouth has to be opened wide indicating the unfolding of the creation. On the other hand, when 'Ma' is said as in the word 'rumble' or 'mum', the mouth is shut closed, indicating the conclusion or closing of the file of the present creation. Since the unfolding of creation and its closing completes one full cycle of creation and its destruction, the letters symbolically represent the entire cosmos from its beginning right up to its conclusion.

Since creation was initiated by Brahm, the letter 'Ra' stands for Brahm, while the letter 'Ma' stands for Shiva because this God is responsible for its conclusion.

It is a well established principle of metaphysics that the only entity which has this unique distinction of standing for all that exists in this visible creation, from its very origin till its final conclusion and even beyond that, is what is known as the supreme transcendental universal 'Brahm', it follows that the two letters 'Ra' and 'Ma' represents this supreme transcendental universal entity Brahm. Naturally therefore these two letters representing Brahm and which are the two syllables of Lord Ram's divine and holy name are the best of all that is 'there or here or anywhere else' in this existence.]

4. Therefore, the letter 'Ra' symbolises the self-illuminated, unequivocally truthful and eternally blissful supreme transcendental Soul of creation which is also the Lord of creation called the 'Parmatma'. This divine entity is an image of 'Sat-Chit-Anand'—i.e. it is truthful (Sat), it is consciousness (Chit), and it is blissful (Anand).

This Parmatma is Brahm, the divine cosmic entity which is honoured by the epithet 'Niranjan', i.e. one who is absolutely faultless, immaculate and pristine pure.

When the long vowel sound 'Aa' (pronounced as in *rather*, *father*, *barber*) is added to this basic alphabet 'Ra' (as described in verse no. 3 and standing for the Fire), the resultant letter is 'Raa' (pronounced as in *rather*). It then stands for Pran¹ and Maya²—the magnificent virtues of the Parmatma which enabled the latter to infuse life into the otherwise lifeless world, and create necessary delusions so that the

inhabitants of this creation would remain perpetually involved in its sustenance, development and growth, and also to ensure that the wheel of creation set in motion by the Parmatma (the Supreme Being, the supreme Brahm) would continue to go round and round on its own till the time the Lord decides to stop its rotation.

Brahm, the Parmatma, is the one who injected 'Pran' (life) into this creation, and this is symbolized by the long vowel sound of 'Aa' because when we pronounce any word with this sound, the mouth has to be open wide which is an indication of vibrant, dynamic and energetic forms of life.

Similarly, Brahm is the one who created Maya or the numerous delusions that are the hallmarks of this artificial world. In fact, without the interference of delusion-creating powers of Brahm, the creature would not remain involved in this world inspite of being aware of its impermanent and miserable quotient.

It ought to be noted here, and this is a very important observation, that no consonant has any sound of its own without the interjection or infusion of the vowel sound in it. Therefore, this world represented by the pure consonant 'Ra' (pronounced as in *goiter*, *guitar*) would be lifeless and meaningless like the conclusion of creation (as indicated when these two English words are pronounced, and no sound lingers after that and the mouth closes), and not representing a vibrant, energetic, dynamic and chirpy world as it is known today had it not been injected with the long vowel sound 'Aa' (as in *rather*, *father*, *barber*) when the mouth is wide open to indicate signs of active and vibrant life (4).

[Note—¹*Pran* refers to the life infusing vital winds, especially the breath that enables the otherwise inane and lifeless gross body of the creature to get up and move, thereby creating an illusion of life and truthfulness. The easiest example to understand this phenomenon is to observe how an air filled balloon moves on the ground and even lifts above it on its own when it is most subtly pushed by the air around it. Everyone knows that the balloon does not have any life of its own but it is the air/wind element that makes it exhibit the visible sign of life in the form of movement.

²*Maya* is the deluding element of creation that surrounds the creature like a veil and induces it to believe as true what isn't. Under its influence, the creature thinks that what it sees as the visible world is for real. It forgets that all this is perishable and not worth pursuing.

Brahm does not do anything on its own but employs the deluding creating element called Maya to create the gross body of the cosmos represented by the body of the creature. Then Brahm found that this body did not show any sign of life and this made Brahm think of some way that could infuse life into this lifeless body lying in his front. So, Brahm 'breathed' life into this body in the form of the vital wind called Pran, and the body began to show signs of life. Therefore, for the visible world to have any substance two elements are necessary—one is the Pran (synonymous with life giving winds), and the other is Maya (delusions that all this is true and real). It follows obviously that if these two things are removed from the visible world, it would vanish like a figure made of smoke.]

5. It is the conjunction of the consonant 'Ra' with the long vowel sound of 'Aa' that has created Pran or the vital factors of life in all their vibrant forms and dynamism in this world. [In other words, the dormant fire element represented by the alphabet 'Ra' is made to leap up and become active when it is injected with life represented by the vowel 'Aa'.]

This transformation of the simple letter 'Ra' into a symbol of life, dynamism, vibrancy and vitality is achieved by using the basic or fundamental sound of this consonant 'Ra', which is the half-syllable called 'Refa' in the Sanskrit language and it

is depicted as a coma placed on the top of the following alphabet, making it sound as in ‘whirr’ or ‘purr’, followed by the long vowel sound of ‘Aa’ which is added to the resultant letter (as in *rather*).

Since the ‘Refa’ symbolizes the fire element because it is a half-syllable representing the consonant ‘Ra’ which in turn is the Beej Mantra of the fire element, it is deemed to be as brilliant and glowing as the fire element and its patron deity the Fire God. In other words, the ‘Refa’ stands for the supreme Brahman or pure cosmic Consciousness which is secretly present in the entire creation as its vital forces of life and energy as represented by the latent fire element as well as the vital winds called the Pran present universally in all forms of life in this world. Nothing is imaginable without Brahman—i.e. nothing can survive without the presence of the ‘fire element’, the ‘life forces called the Pran’ and the ‘Atma or pure consciousness’ which represents the Parmatma.

[Each consonant of the language symbolizes one or the other aspect of creation, this statement means that it is Brahman in the form of the universal essential spark of life represented by the ‘fire element’ as well as the Pran and Maya Shakti that are also universal symbols of life and creation which is at the core of all that exists in this world. Without Brahman and its dynamism, nothing would exist and have a meaning. Since meaningful words are formed from these basic alphabets of the language, it also implies that anything worthwhile must have Brahman present in it. That is why Brahman is called the universal Truth and one factor that unites the entire creation and threads it into one single garland. Again, since letters would have no meaning if no words are formed from them, it also follows that the mere presence of Brahman or consciousness would not be sufficient to create and infuse colourful life in this creation. Towards this end, Brahman needs to have the support of ‘Maya’—the maverick power of creating delusions that Brahman possesses, besides taking the assistance of the vital winds called ‘Pran’ which inject life, strength, vigour and vitality into the gross world.] (5).

6. The consonant ‘Ma’ (as in *mother*) symbolises development, progress, rising, increment, evolution and enhancement. [This is because when we pronounce this alphabet, the mouth has to be opened, symbolizing awakening after sleep, or the rising of a new dawn in the cosmic horizon in the context of Brahman.]

It also symbolizes ‘Maya’¹ because it was Maya or the delusion creating power of the supreme Brahman that enabled him to expand this creation and ensure that it became self-perpetuating. Hence, it is said that this letter ‘Ma’ is the Beej Mantra for Maya; it is the basis of Maya. Therefore, ‘Ma’ also represents Brahman in the latter’s aspect of creating Maya or delusions. In other words, the letter ‘Ma’ represents Brahman’s stupendous cosmic power to create delusions on the one hand, and to expand, develop and enhance the creation created by him on the other hand (6).

[Note—¹This is because the inhabitant living beings of this creation think that this world is the real thing, that all the comforts and pleasures of this world are meant to be enjoyed and indulged into, that there is nothing beyond this material world and its sense objects, and therefore such creatures do not bother about the welfare of their spirit or soul. They continue to remain engrossed and fully involved in the affairs of the world. They have numerous desires and take birth after birth to satisfy their unending desires. They continue to take birth and die in a never ending cycle to fulfil their aspirations and expectations from this world which continue to evade them like the water of the desert mirage. They do numerous deeds in order to fulfill their wishes, and expect rewards from these deeds, and this in turn sets in motion the endless cycle of deeds and their consequences that trap the creature in its vice-like

grip. All this serves the Lord's purpose because it helps the world to perpetuate its self on its own.]

7. The Beej Mantra 'Raan(g)/Raam' is for Lord Ram. [Refer Canto 2, verse no. 1-2.]

This Beej Mantra is formed by placing a dot '·' on the letter 'Raa' (i.e. by placing a dot on the basic consonant 'Ra' with an added vowel sound of 'Aa'.]

This 'dot' is a symbol of 'Maya Shakti' (refer verse no. 6 of this Canto 5 above) because it is pronounced like the alphabet 'Ma' in its basic, silent form (as in the English alphabet 'M'—because the mouth is closed after one has finished pronouncing this alphabet). Therefore, when this 'dot' is placed on the letter 'Raa' symbolizing Lord Ram, the resultant pronunciation would be something like 'Raam' (which would combine the two letters Raa as in *rather*, and Ma as in the English alphabet *m*).

This is why the supreme Brahm, when associated with Maya Shakti in its incarnation of Sita, is called Lord 'Ram' ('Raa + Ma').

Lord Ram is therefore the 'Purush', or the Male form of Brahm, when the latter is associated with Maya in its incarnation as Sita, the divine consort of Lord Ram. [This also refers to the fact that Lord Ram is an incarnation of Lord Vishnu, the Viraat Purush who is the all-pervading and all-encompassing macrocosmic form of Brahm. The divine consort of Vishnu is Laxmi, the goddess of wealth and worldly pomp and prosperity that is a symbol of Maya.]

The 'Purush' is a manifestation of the combined majesty of the three divine aspects of creation—viz. 'Shiva' representing the beauty of eternal truth, auspiciousness and holiness, 'Surya' or the celestial Sun representing eternal source of light, illumination, energy, dynamism and the eternal fire element, and 'Indu' or the celestial Moon representing calmness and the soothing elixir of life called Amrit, the ambrosia of eternity and bliss that is supposed to be stored in it.

In the Beej Mantra 'Raan(g)/Raam' pertaining to Lord Ram, the basic consonant 'Ra' stands for the brilliant flame of the fire element, the 'dot' on top stands for 'Naad' (the cosmic ethereal sound that fills the sky, and which is heard as the Mantra 'OM'), and the vowel sound of 'Aa' symbolizing the Maya Shakti or the power of the supreme Brahm to create illusions of reality (7).

[Note—The concept of *Naad* and *dot or Bindu* : In brief, Naad is the background sound of creation which is supposed to be the first step in the process of creation of cosmic energy because the sound waves of this Naad collided with each other to generate stupendous epicenters of bursts of energy of astounding dimensions and intensity that set rolling the process of creation.

In the visible creation, the *Sun* and the *Moon* are the only two lighted entities in the sky which directly effect life on earth and whose presence is visibly verifiable. They are not hypothetical conceptions or figment of imagination.

That is why in the Purans, Lord *Shiva* has been depicted as wearing the moon on his lock of hairs, while the Sun has been depicted as the body of the Viraat Purush. The Sun and the Moon are like the two eyes of Brahm.

8. The complete word 'Raam' (or 'Ram) stands for the two aspects of the supreme Brahm at once. These two aspects of Brahm are the Purush and the Prakriti.

[The 'Purush' is the primordial Male aspect of creation, the provider of the vital spark of life in the form of the cosmic 'sperm' represented by the 'consciousness', 'the fire element' and 'the Pran or the vital winds' that infused life into this creation. The 'Prakriti' is the cosmic female aspect of creation and it represents Brahm's dynamism and creative energy. In other words, the first part of the

Mantra 'Raam', i.e. the letter 'Raa' (pronounced as in *rather*), stands for the Viraat Purush who is a macrocosmic manifestation of the supreme Brahm, and whose incarnation is Lord Ram. The second part, i.e. the letter 'Ma' (pronounced as the in *mum*, *rum*, *come* etc.) stands for Prakriti which is Brahm's creative dynamism revealed in the form of cosmic Nature. Hence, the word 'Ram' combines the grand and magnificent virtues of both these two cosmic entities—the Viraat Purush and Prakriti. Therefore, the combined word 'Raam or Ram' stands for the union between Brahm representing the primordial Male aspect of creation and revealed in the form of the Viraat Purush, and the Maya Shakti of Brahm revealed in the form of the Prakriti or Nature. This union results in the creation of the visible world even as a union of a man and a woman creates a child. It is the child that carries the name and genes of the parent to the next generation, otherwise the cycle snaps then and there.]

Since the male provides the sperm which acts as the 'nucleus' of life, the Purush is represented by the 'dot' or the Bindu (because the dot is a symbolic representation of the sperm). The fertilized egg is implanted in the womb of the mother, the female aspect of creation. The latter is represented by the 'Naad' or the crescent-shaped crucible placed below the Bindu. That is why 'Prakriti' or Nature is honoured with the title of 'cosmic Mother' as it is the one that nourishes and sustains the creation initiated by the Purush or the supreme Brahm. [It also refers to the practical aspect of creation wherein the male sperm is planted in the womb of the female which acts as the cup or a crucible that first receives this sperm, and then nourishes the fertilized egg that lodges there after the sperm has finished its job.]

The Beej Mantra of Lord Ram is adorned by a 'Chandra-Bindu' on its top. This 'Chandra-Bindu' consists of a Bindu (a dot) placed strategically above a concave crucible shaped like a crescent Moon at its focal point. The concave surface below the Bindu or the 'dot' is also called a 'Naad'. [The word 'Naad' literally means a big vessel shaped like a shallow plate or saucer. In the field of metaphysics, the 'Naad' is the cosmic vibration produced in ether which create the sound encapsulated in the ethereal Mantra OM. It is a sound and subtlest manifestation of the cosmic Consciousness known as Brahm or Pranav.]

The Bindu (dot) and the Naad (the crescent-shaped sign placed below the dot) are collectively called the 'Chandra-Bindu'¹. It is placed on the letter 'Raa' to form the Beej Mantra of Lord Ram—viz. 'Raam or Raan(g)'.

The letter 'Raa' with the Bindu or dot on top represents the Beej Mantra for the Fire, while the crescent-shaped sign of the moon placed below the Bindu or dot represents the virtues of the Moon. This latter sign represents the various Kalaas of the Moon, and it symbolizes the different aspects of creation that constantly change but do not affect the primary nature of things². [Refer verse no. 9 also.](8).

[Note—¹According to Sharda Tilak, 1/809, the dot represents the Purush, and the Beej Mantra 'Raan(g)' is the Shakti aspect of creation. It is their union that produces the Naad, the cosmic vibrations of sound.

²The word *Kalaa* means aspect or form of anything. The changing face of the moon is indicative of the ever-changing nature of the world. But in spite of these apparent changes in the visible shape of the moon—which are actually visual illusions created because the moon is observed from different angles from the surface of the earth as it moves around it, and therefore its illuminated surface appears to increase or decrease in size and shape over a period of one month during which it completes one full circle of the earth—the actual structure of the moon does not change at all. Similarly, the Viraat Purush had displayed so many varying qualities

and attributes, most of them quite mundane and worldly in nature, even contradictory to each other and at odds to the generally held grand perception of the Supreme Being, in his incarnation as Lord Ram, but all these variations and diversities in his role as a human being do not change the fundamental fact that Lord Ram is the supreme and divine Brahm who is Advaitya or non-dual by nature on the one hand, and that he represents the fundamental elements of creation that are eternal and universal.

Another interesting fact is that the moon is said to have ‘sixteen Kalaas’ which represent the sixteen faces of the moon as observed on different nights of its dark and bright fortnights. These sixteen Kalaas are the basic grand virtues that make a man noble and great. In other words, by placing the crescent moon on the Beej Mantra of Lord Ram it is meant to signify that the Lord is crowned by or anointed with all these sixteen grand virtues and noble character traits that are expected from a highly exalted and honorable man.

The sixteen Kalaas or aspects or facets of creation have been expressly listed in the Prashna Upanishad of the Atharva Veda tradition, in its Canto 6, verse no. 4. These sixteen Kalaas are the following—(i) Pran (life; life consciousness; the very essence of creation; the vibrations of life manifested in the form of the vital winds; the rhythm and essential functions pertaining to life), (ii) Shraddha (the eclectic virtues of faith, believe, conviction, reverence, respect, devotion), (iii) Akash (the all-pervading, all-encompassing sky or space element), (iv) Vayu (wind, air element), (v) Tej (energy, splendour, radiance, glory, might, majesty and fire element), (vi) Apaha (water element which is the all-important ingredient for life), (vii) ‘Prithivi’ (earth element which is the base or foundation for all mortal creation), (viii) Indriya (the organs of the body, both the organs of perception as well as of action), (ix) Mana (the mind and heart complex and their stupendous potentials), (x) Anna (food, the element without which life is simply not imaginable because it provides it with the basic nourishment and energy), (xi) Virya (semen, sperms, standing for courage, valour, potency, vitality and prowess), (xii) Tapa (austerity and penance, tolerance of hardship as a means of penitence, forbearance as well as carrying out strict religious vows in order to purify one’s self; the sufferance for some auspicious and noble cause) (xiii) Mantra (the key or formula to achieve success in any enterprise; it also refers to the ability to give good advise; the power to contemplate and think, concentrate and focus, and then logically arrive at a conclusion; the different mystical formulas consisting of letters or words or phrases which encapsulated various dynamic forces of Nature which could be invoked and harnessed by the creature and help him to utilise the latent cosmic energy, strength and other magnificent powers incorporated in these Mantras for the benefit of creation at large), (xiv) Karma (the ability to do deeds and take action; the strength, energy and stamina to perform even difficult tasks), (xv) Loka (the various worlds, such as the mortal world where the creature lived on the earth, the lower heaven called the Antariksha where the junior Gods and the Spirits of dead creatures would live, and the upper heaven or Brahm Loka where the Supreme Being lives; the different worlds as experienced during the waking state, the dreaming state and the deep sleep states of existence of the consciousness), and (xvi) Naam (the name assigned to each independent creature; the good name, fame, reputation, honour and glory that a creature has in this world).

When we refer to the man, the Sanskrit word for him is Purush. Now, this word Purush refers to someone who resides in a ‘Pur’—a city. [Refer—(a) Krishna Yajur Veda’s Yogshikha Upanishad, Canto 1, verse nos. 72, 165; Canto 5, verse no. 2. (b) Atharva Veda’s Prashna Upanishad, Canto 4, verse no. 3.] In the Upanishads, this city is the human body, and the resident is the ‘Atma’ which is the all-pervading and cosmic Consciousness called the supreme Brahm residing inside the individual body of the creature as his ‘true self’, as his true identity. [Refer—Brihad Aranyaka Upanishad, Canto 2, Brahman 5, verse no. 18.]

Now, this man who is being addressed as the 'Purush' is no ordinary human. In order to be rightly called a Purush he must have become pure and cleansed of all sins and evils. [Refer—Brihad Aranyaka Upanishad, Canto 1, Brahman 4, verse no. 1.] Therefore, the 'Purush' is the Supreme Being (Brahm) residing in the body of the individual creature as his pure conscious Atma, the entity that is free from all contaminations, corruptions and blemishes. So, in the enlightened view of the Upanishads, the Purush when referred to the 'man' is not his physical body but the Atma.

These sixteen elements or units created by the Supreme Being are the sixteen Kalaas or aspects or fractions of creation. In other words, this visible creation is made up of these sixteen units in different ratios just like a colourful picture in mosaic prepared by an expert artisan from bits and pieces of glass or stone which are independent units in their own right but when incorporated in the mosaic that forms the colourful picture they become an inseparable and an integral part of the latter. Even if one piece is removed, the picture is disturbed.

In simple terms it means that a person's total composite personality, his characteristic attributes and individuality, his vitality and stamina, his prowess, powers and strength, his drive and vigour et al can be divided into sixteen parts.

The Kalisantarna Upanishad of Krishna Yajur Veda, in its verse no. 2 says that these sixteen Kalaas are like sheaths or veils covering the Atma or 'self' of the man, and he can realise this glorious divinity residing in his bosom only when these Kalaas which are like impediments or hurdles in self and Brahm realisation are removed. When this Upanishad describes them as 'hurdles or impediments' in realising the glory of the 'self' it implies that although all these sixteen qualities are related to achieving glory and majesty in the world, they have nothing to do with 'self-realisation' and 'Brahm-realisation' which is possible only by abandoning everything related to this world as well as the body both in its gross part and its subtle part.

The Prashna Upanishad of Atharva Veda, Canto 6, verse no. 2 says that the divine entity that exhibits sixteen divine attributes lives in the body itself.

The Brihad Aranyaka Upanishad, Canto 1, Brahman 5, verse nos. 14-15 describes the sixteen Kalaas of Prajapati (the Lord of creation/world) in a symbolic manner by alluding to the phases of the moon. The fifteen nights of the dark or the bright phases of the moon when the disc of the moon continuously changes + one fundamental truth of the moon which is its disc that never changes inspite of its view from the earth that constantly changes.]

9. The Beej Mantra of Lord Ram, which is 'Raam(g)/Raam' (i.e. the alphabet 'Ra' with a long vowel sound of 'Aa' added to it and having a 'dot' or a Chandra Bindu on top as described in the previous verses) is a representative of a combined form of the Fire and the Moon. [The fire in all its splendour and majestic form is represented by the letter 'Raa', while the Moon is represented by the Chandra Bindu on the top.]

In other words, the combined virtues of the fire element called the 'Agni', as well as the essence of bliss and life in the creation represented by the moon called the 'Chandra', are simultanously present in a subtle form in the Beej Mantra of Lord Ram, i.e. in 'Raam(g)/Raam', much like the case of the presence of the huge banyan tree in its seed which conceals this tree inside its self in a most secret, subtle and imperceptible form (9).

[Note—This Beej Mantra 'Raam(g)/Raam' having both the signs of the Fire and the Moon at one place symbolizes that Lord Ram represents in his divine form the combined glories and magnicence of both the Fire and the Moon. The fire element stands for dynamism, energy, vitality, vigour, strength and powers, the virtues of purity and the ability to purify any other thing which comes in contact with it, its natural illumination which is a metaphor for knowledge and wisdom, and warmth that is a symbol of life and vitality. The moon is regarded as the heavenly pitcher of

Amrit, the ambrosia of eternity and bliss. As compared to the scorch of the raging fire, the rays of the moon are soothing and balm-like. On the face it appears that the Fire and the Moon cannot co-exist because one is very hot and scorching, while the other is cool and soothing. But the fact that a synergy is established between them proves that the supreme Brahm, in his visible manifestation as Lord Ram, can achieve impossible things if he so wishes.

This is why he is the ‘supreme and all-powerful authority’ in creation that can do un-imaginable wonders by employing his powers to create magical delusions, a power called ‘Maya Shakti’. Since the entire creation is a visible and most apparent manifestation of the stupendous maverick powers of this one single Supreme Being acting in various roles, it follows that Lord Ram, for all practical purposes, combines in himself these two apparently opposite virtues of creation—he represents both the fire element as well as the moon.

It means that while on the one hand he is like the Fire, ferocious and unrelenting for the wicked and evil creatures in this world, burning them or punishing them in his fire of wrath, and on the other hand he is most compassionate, comforting and benevolent for his devotees, ameliorating their pains and agonies, destroying their sins and their bad consequences, and giving them eternal bliss and happiness that comes with accessing the elixir stored in the moon, the elixir called Amrit.]

10. The entire movable as well as the immovable world is inherently established in a subtle and imperceptible form, in the Beej Mantra ‘Raam(g)/Raam’ of Lord Ram.

All the virtues and dynamism that are present in the Beej Mantra are also present in the full name of Lord, i.e. in the word ‘Ram’ (10).

11. The first letter ‘Raa’ of the Lord’s name ‘Ram’ represents the supreme transcendental Brahm free from the influences of Maya, while the second letter ‘Ma’ of this name symbolises Mukti or liberation and deliverance of the creature from this mundane world as well as the emancipation and salvation of his soul. This letter ‘Ma’ is the provider of Mukti to the sincere worshipper who adores and understands the spiritual and metaphysical importance of the name ‘Ram’ assigned to the supreme Brahm (11).

12. The second letter ‘Ma’ of Lord Ram’s name ‘Ram’ stands for ‘Maa’ or the universal mother of creation. It provides the same benefits to the worshipper that the mother does to her child. Being appended to Brahm represented by the first letter ‘Raa’, this letter ‘Ma’ enables the worshipper of Lord Ram to enjoy a dual benefit—he has the benefit of enjoying the world as well as of obtaining emancipation and salvation at the same time. In other words, Lord Ram bestows his devotee two benefits—he gets to enjoy the best in this world, and at the same time he ensures his salvation upon death (12).

[Note—The universal mother in this case is Goddess Laxmi as she is the divine consort of Lord Vishnu whose incarnation Lord Ram is. Since the letter ‘Raa’ of the Lord’s name ‘Ram’ stands for the supreme Brahm, this ‘mother’ would be Maya, the ‘other half’ of Brahm. Both Laxmi and Maya are the female aspects of creation, and represent the ‘other half’ of the Supreme Being, called Brahm as well as Lord Vishnu. The fact that Vishnu, or the Viraat Purush, and Brahm are the same Supreme Being with two names has been expounded upon in the Tripadvibhūt Maha-Naryan Upanishad of the Atharva Veda tradition, Canto 2, paragraph no. 12; Canto 8, paragraph nos. 17.

Now therefore this verse means that a wise spiritual aspirant who realises the metaphysical import of the divine name of Lord Ram and understands that he is no one else but the Supreme Being himself in this form is able to reap the benefits of this

awareness or realisation. Blessed by the Lord and his divine Shakti, he is able to enjoy great fame and honours in this world as well as all the comforts and pleasures that this world has to offer to its inhabitants while he lives in it, and upon his death he finds ultimate liberation and deliverance for himself because the Lord's Maya Shakti would not be able to create any hurdles in his path. The latter is made possible because even when he was alive and enjoying the world, he was wise enough to realise the illusionary nature of everything material, and so had just been enjoying them without getting emotionally or mentally attached or involved in anything worldly just like a spectator enjoys a magic or theatre show. This ensures that his 'true self', i.e. his soul, is free from the fetters that shackle an ordinary and non-realised man to this world and its material charms. Consequentially, no worldly attachments dog his soul or his Atma after death, and like an untethered balloon he rises and rises in his spiritual quest to ultimately find the citadel of spiritual bliss and happiness, called attainment of Moksha. This results in his being freed from all the fetters that tie an ordinary creature to this artificial and transitory world of material sense objects, a world that is full of miseries and pain—and this achievement is called his obtaining Mukti.]

13-14. The first letter 'Raa' of the Lord's name 'Ram' stands for the Sanskrit word 'Tat' meaning 'that entity' which refers to the ultimate Truth of creation, which in turn is the pure conscious Atma or soul of creation called the 'Parmatma'.

On the other hand, the second letter 'Ma' of the name 'Ram' stands for the Sanskrit word 'Twam' meaning 'you' which refers to the living creature or the Jiva.

The union between these two fundamentally inseparable units of creation is indicated by the word 'Asi', meaning 'it is'. These three words, i.e. 'Tat', 'Twam' and 'Asi' form the basic tenet of the scriptures, called the 'Maha Vakya'. Hence, the completed Maha Vakya is 'Tat Twam Asi'—that essence is you; or 'that art thou'¹.

That is why those who are experts in this philosophy assert that Brahm represented by the word 'Tat', and the Jiva represented by the word 'Twam' are basically the same universal and uniform non-dual consciousness existing in two different planes, the former at the cosmic level and the latter at the individual level. The bridge between them is established by the third word 'Asi', implying 'it is certainly so'. In other words, the erudite and wise ones unequivocally declare that the individual Jiva (the living being) is no one else but the supreme Brahm, the Supreme Being, in a microcosmic form.

The word 'Namo', literally meaning 'to bow before', of the six-letter Mantra (Raam(g)/Raam Raamaaye Namaha—Raam(g)/Raam + Raa + Maa + Ye + Na + Maha = 6 letters; refer Canto 2, verse no. 16)² refers to the fact that the wise, erudite, learned, enlightened and self-realised spiritual aspirant offers his obeisance and respects to Lord Ram with this firm conviction that the Lord is none but the supreme Brahm personified, and that he is actually honouring this Brahm when he honours Lord Ram. Further, such a wise man also realises that the divinity he is offering his worship to is none but his own truthful 'self' known as the Atma which is pure consciousness and Brahm personified.

The following points are to be specially noted in this verse—(i) The first letter is the monosyllable 'Raam(g)/Raam' which is the Beej Mantra for Lord Ram, and it is a substitute for the ethereal Mantra 'OM' that is universally regarded as the Beej Mantra for Brahm which is always placed as a prefix of all hymns and Mantras to honour the supreme Brahm first before honouring the deity to whom that particular Mantra is dedicated. Refer verse no. 16 of this Canto 5 below. (ii) The second word 'Raamaaye' consists of three letters—viz. 'Raa', 'Maa' and 'Ye'. The first letter

‘Raa’ refers directly to Lord Ram, the supreme Brahm revealed in his divine form, and therefore it is equivalent to the word ‘Tat’ of the Maha Vakya ‘Tat Twam Asi’ cited above. The second letter ‘Maa’ is equivalent to the English words ‘me’ or ‘I’. In other words, it refers to the fact that Brahm is ‘me’ or ‘I’. It refers to the fact that the spiritual aspirant has realised the eclectic spiritual truth that Brahm is his own ‘self’, his Atma. Hence, ‘Maa’ is equivalent to the phrase ‘Twam Asi’ of the Maha Vakya ‘Tat Twam Asi’, meaning ‘I am’ (that Brahm), or (that Brahm) ‘is me’.

By extension it means that the spiritual aspirant has become self-realised and discovered that Lord Ram resides in his own bosom as his Atma, and it would mean that the concerned person is a personified form of Lord Ram, possessing all the auspicious and divine virtues that Lord Ram is famous for. This eclectic realisation, this wisdom and awareness is true realisation, and this leads to his truthful Mukti—freedom from all fetters that ignorance of the truth represent, and which tie down a creature to this world of delusions and deceit. A man who is free from the shackle of delusions and who has realised the ‘truth’ about his ‘self’ is indeed a spiritually freed man.

The realisation of the truthfulness and personal relevance of the Maha Vakya ‘Tat Twam Asi’ fills him with extreme ecstasy and bliss of the highest order that comes with self-realisation and a discovery of a great secret. It removes his fear of death and its accompanying horrors. This happens because the ‘self’, the Atma, is eternal and imperishable; the Atma never dies like the gross body; the Atma is eternally blissful and happy. This awareness instills in him confidence about his eternal and exalted nature and stature, and enlightens him about the great truth about his real and truthful identity as being the conscious Atma that is a cosmic entity and enlightened. The ‘self’ is not that would die and suffer its horrors.

Therefore, this realisation is deemed to have given him eternal Mukti—i.e. it provides him liberation from all bondages created by ignorance of the Truth and its accompanying delusions; it provides him deliverance from all miseries and torments that are consequential to such ignorance and delusions (13-14).

[Note—¹The great Maha Vakya ‘Tat Twam Asi’ has been expounded in other Upanisads as well—refer (i) Shukla Yajur Veda’s Paingalo-panishad, Canto 3, verse no. 3 and 8; Adhyatma Upanishad, verse nos. 30-31. (ii) Krishna Yajur Veda’s Shuk Rahasaya Upanishad, verse no. 22; Avadhut Upanishad, verse no. 2; Kaivalya Upanishad, verse no. 16; Sarwasaaro-panishad, verse no. 12-14. (iii) Sam Veda’s Chandogya Upanishad, Canto 6, sections 1-16.

²This Mantra has been elaborated upon in Canto 2, verse no. 16 along with other six letter Mantras of the Lord enumerated in verse nos. 16 and 18.]

15. Therefore, this divine, holy, sacred and eclectic Mantra of Lord Ram, i.e. the ‘Raan(g)/Raam Raamaaye Namaha’, has unique metaphysical values, and it possesses the magnificent potentials to provide the worshipper and devotee of the Lord with the dual benefits of being able to enjoy the pleasures of this world (called ‘Bhog’) as well as the attainment of liberation and deliverance from its fetters and obtaining emancipation and salvation for the soul (called ‘Mukti’).

This Mantra has a greater spiritual significance and metaphysical importance than the great saying ‘Tat Twam Asi’ of the Vedas (as referred to in verse nos. 13-14 above). This is because it is easy to relate to the Mantra for Lord Ram as the Lord’s divine story and all his auspicious deeds are well known in the world. [This refers to the well-known epic ‘Ramayana’.]

[Doing Japa (repetition) with the Lord’s Mantra requires no special metaphysical knowledge, no special skills as that required to do Yoga and Dhyan

(meditation and contemplation), no great efforts such as that required to focus one's attention on Brahm as the latter is an abstract and invisible entity which requires a high level of erudition and mental faculties to make it accessible, and about which even the scriptures have asserted that it is beyond the reach of the mind and words. On the other hand, doing Japa with Lord Ram's Mantra is an easy proposition; it requires no special mental abilities such as high levels of intelligence and erudition or exemplary spiritual wisdom that is required to become 'self-realised' and 'Brahm-realised'. The only requirement is to have a firm faith and complete devotion for Lord Ram.]

All living beings have equal right over this Mantra, i.e. people belonging to all classes of society, people of all denominations, of all social and spiritual stature, people of different mental abilities and varying levels of wisdom, people belonging to all the phases of life, people pursuing all sorts of vocations—in short, all living beings have a right to do Japa (repetition) with this Mantra because all have a right to ensure Mukti or liberation and deliverance of their souls. This Mantra is sufficient to provide this spiritual reward to all the living beings single-handedly without the need for them to seek the help of any other kind of Mantra of any other deity.

[In other words, any person who is wise, erudite and sagacious enough to realise the subtle meaning, the magnificent metaphysical value, the stupendous potentials and powers, and the holiness, divinity and supremacy of this sacred Mantra of Lord Ram with all its varied connotations is deemed to be 'Jivan Mukta'. A Jivan Mukta person is one who has become enlightened enough to realise the truth about his own self as well as the falsehood of the world surrounding him. He therefore does his worldly duties but remains detached from them. He realises that all that he sees is an illusion and perishable, and it makes no sense in pursuing a mirage. On the contrary, he is deemed to have tasted the nectar of eternal bliss and happiness which gives ecstasy and thrill which no material pleasure and comfort of the world can match. Such a man is deemed to have obtained liberation from the fetters that shackle an ordinary creature to the delusions created by this entrapping world of materialistic pleasures which are illusive and temporary as well as the miseries and torments which are equally false and transient. Such a person remains engrossed in contemplation and meditation of the supreme Brahm in the form of Lord Ram, and derives immense eternal pleasure and bliss by remaining submerged in this ocean of bliss and happiness while he is still alive in this world and goes about his daily routine in a normal way. In other words, though he appears to behave normally externally, from the inside he remains detached from and indifferent to his materialistic surroundings and their inherent plethora of miseries and pains as well as pleasures and joys. On the contrary, he remains perpetually submerged in an ocean of bliss that is obtained by meditating upon Lord Ram's divine form using the medium of this Mantra (as well as other Mantras of the Lord). Once he has tested the nectar of ultimate eternal bliss and happiness that fills his heart and being with ecstasy and thrill of self-realisation, he gives a damn to the superficial, temporary and pith-less happiness derived from the sense objects of the materialistic world, as well as is unmoved by its pains and miseries because these only affect his body and not his Atma, which is pure consciousness and his actual and truthful identity.] (15).

16. This six-letter Mantra of Lord Ram ('Raam(g)/Raam Raamaaye Namaha') is deemed to be equivalent to the Pranav Mantra, i.e. the ethereal monosyllabic Mantra 'OM'. Pranav and Brahm are synonyms.

Hence, this six-letter Mantra of Lord Ram is worthy to be honoured and employed as a tool for obtaining Moksha (spiritual liberation, deliverance, salvation and emancipation) by all those who are sincerely eager to obtain it ('Mumuksha').

All such spiritual aspirants should ensure that they do not fall prey to the alluring entrapments of this deluding artificial world and its temptations; they should renounce this world and its material attractions. Instead, they must follow the path of *Sanyas*¹ (total detachment from the world, complete renunciation, and concentrating on spiritual emancipation and salvation). This tenet is applicable to all the four classes of society and all the four phases in the life of an individual².

This supreme Mantra of Lord Ram which is equivalent to the Mantra for Pranav, i.e. the Mantra 'OM', is the most suitable and potent one for doing Japa (repetition) and Dhyān (contemplation and meditation).

A wise, erudite and sagacious person who understands the eclectic and holistic meaning of this divine, holy and sacred Mantra of Lord Ram with all its various connotations and shades of metaphysical meaning as well as its importance and significance in one's spiritual upliftment along with its astounding ability to help the aspirant to enjoy the dual benefit of enjoying the world while he is alive and in obtaining the ultimate emancipation and salvation of the soul at the time of death, is able to become Jivan Mukta (as defined in verse no. 15 above) (16).

[Note—¹The concept of *Sanyas* has been elaborately described in a number of Upanishads which are especially dedicated to it. Some of them are (a) Rig Veda Upanishad—(i) Nirvano-panishad (Chapter 5). (b) Sam Veda Upanishads—(i) Arunu-panishad (Chapter 3), (ii) Maitreyunu-panishad (Chapter 5), (iii) Sanyaso-panishad (Chapter 10), and (iv) Kundiko-panishad (Chapter 12). (c) Shukla Yajur Veda Upanishads—(i) Jabalo-panishad (Canto 4-6, Chapter 3), (ii) Paramhanso-panishad (Chapter 5), (iii) Subalo-panishad (Canto 12-13, Chapter 6), (iv) Niralambo-panishad (Chapter 8), (v) Bhikshuko-panishad (Chapter 13), (vi) Turiyato-panishad (Chapter 14), (vii) Yagyavalkya Upanishad (Chapter 17), (viii) Shatyani-panishad (Chapter 18). (d) Krishna Yajur Veda Upanishads—(i) Avadhuto-panishad (Chapter 22), (ii) Kathrudro-panishad, verse nos. 1-11 (Chapter 25), (iii) Varaaha Upanishad, Canto 2, verse nos. 4 and 37 (Chapter 30). (e) Atharva Veda Upanishads—(i) Narad Parivrajako-panishad (Chapter 8), Paramhans-Parivrajako-panishad (Chapter 15), and (iii) Parbrahmo-panishad (Chapter 20).

²The *four classes* in Hindu society are called the Varnas. The Hindu society has been divided into four sections or classes by ancient sages to regulate its functioning by delegation of authority and clearly specifying the jobs each section is supposed to do to maintain order and system in the world, to prevent overlapping of functions and avoid anarchy and chaos. These four sections are— (a) Brahmins*—the learned and teaching class; a wise one well-versed in the knowledge of the ultimate Truth about the supernatural Being called Brahm. They also presided over religious functions as priests, because these functions were central to life in the Vedic period; (b) Kshatriyas—they were the warrior, fighting, kingly class. They were assigned the job of giving protection to the society, dispensing justice and maintaining general law and order. (c) Vaishyas—they were the trading and farming class responsible for commerce and wealth generation. They provided for the necessities for a comfortable life. And finally (d) the Shudras—the service class of people whose main function was to free the other three classes from the humdrums of daily chores and concentrate their energies to the particular jobs assigned to those classes to which they belonged.

The *four phases* in the life of an individual are called Ashrams. They are the following—(a) Brahmacharya—this is the 1st phase of life in which a person studies the scriptures under the tutelage of a wise teacher. This phase of life is marked by austerities, keeping of vows, observing celibacy, abstinence and continence as well as leading a regimental life style of a boarding school. (b) Grihasta—when a person has

studied and prepared himself to face the world, he comes back to his house and enters the 2nd phase called Grihasta Ashram which is a householder's life. He marries, raises a family, produces wealth and helps to carry forward the cycle of creation. This is the most important and enjoyable phase as well as the most tough one because on the one hand there are the comforts and pleasure of the world to be enjoyed, and on the other hand there are the various tribulations and miseries of a family life alongside the dealings with this deceptive world with all its accompanying horrifying problems. (c) Vanprastha—this is the 3rd phase when a man hands over the responsibilities of the world to his heirs and renounces his attachments to the house as well as the world, and heads for the forest, leaving the home for his next generation. It is now that he goes on pilgrimage and prepares for the final stage of his life, and (d) Sanyas—this is the 4th and last stage of life when there is complete cutting-off of all the ties with the world, spending time in contemplation and meditation, living a life of total renunciation, and begging for food for survival while single mindedly endeavouring for emancipation and salvation. This phase of Sanyas also has many stages depending upon the spiritual elevation and accomplishments of the aspirant, viz. Kutichak, Bahudak, Hansa, Paramhans, Turiyatit and Avadhut.]

17. [This verse essentially enumerates the benefits of studying and implementing the teachings of this great Upanishad.]

A person who studies this Upanishad achieves the holiness and purity which is equivalent to that of the fire and the air/wind elements¹.

Even such great sins as drinking wine (getting intoxicated and indulging in it), stealing gold (or any kind of theft, cheating or deceit), and killing of a Brahmin (or committing any such act that harms a living creature in any manner) are pardoned if a man sincerely reads and studies this Upanishad².

A person who worships and honours Lord Ram Chandra with his Mantras, and meditates using them, is able to attain oneness with his Lord in a form of the ultimate Mukti (emancipation and salvation) known as 'Sayujya' wherein the soul of the individual merges with the supreme Soul of the creation, becoming one with it, and this ensures that the person does not have to take birth again.

As it is proclaimed and asserted in this verse, those wise, realised and erudite persons who say or declare 'I am the supreme transcendental Brahm; I am an image of Ram' with truthful conviction and firm faith in what they are saying, and only after having become enlightened about the deep and far reaching import of the fundamental truth of the statement that they make, do not have to come back to this world (i.e. they do not have to take birth again). They are themselves a personification of Lord Ram who is himself Brahm personified. There is no doubt in it.

A wise person should always remain mentally focused upon this great metaphysical truth that his 'true self' (i.e. his Atma, his soul) is a personification of Lord Ram as the latter is none else but the supreme Brahm, and the latter has revealed itself as the 'self' or the Atma of the individual. This is because both the 'self' and 'Brahm' are the same 'Consciousness' existing at two planes of creation—one being as the Jiva or the individual creature at the microcosmic level of creation, and the other being the Brahm at the macrocosmic level of creation.

Such self-realised and truth-realised spiritual aspirants become one with and inseparable from Lord Ram (i.e. with the Supreme Being known as the supreme and transcendental Brahm). There is no doubt in it.

'OM is the Truth', i.e. Lord Ram, a manifestation or revelation of Brahm represented by the ethereal divine word OM.

The Lord is indeed the ultimate, unequivocal, irrevocable and irrefutable Truth. This is what this Upanishad says. Amen! (17).

[Note—¹Anything put in *fire* gets purified because the fire would burn all impurities and make the main ingredient pure. That is why it is said that ‘gold is purified by putting it in fire’, and that is also why the colour of gold, the costliest of metals used for making donations and for use during religious ceremonies, and the colour of fire are both alike. Similarly, the *air* or *wind* keep the environment clean and fresh as is evident when we sit in a close room; the entire place starts to feel suffocative and after sometime it even begins to stink. No matter how stinking and offensive smelling might a place be, if a breeze blows for a short time, the place becomes fresh. So metaphorically, the fire and wind are purifying agents in Nature.

²The pardoning comes if the sinner is sincere about atoning for his misdeeds and regrets his actions and deeds. He should not be an imposter, because that would be tantamount to cheating and deceit. How can one expect forgiveness for one crime while committing another?]

Thus ends this Upanishad called ‘Ram Rahasya Upanishad’.

-----Shanti Paath-----

-----THE END---

-----*****-----*****-----*****-----

Addendum no. 1

Hymns of Lord Ram

This addendum to Chapter no. 12 contains the hymns that are mentioned in Ram Rahasya Upanishad, Canto 1, verse no. 9.

These hymns are the following—(i) Ramashtak by sage Veda Vyas, (ii) Raghunath-ashtak, (iii) Sita-ram-ashtak, (iv) Sanat Kumar Sanhita’s Ramstavaraj by sage Narad, (v) Ram Stotra by Lord Mahadev (Shiva), (vi) Ram Stotra by Jatayu (the Bird), (vii) Ram Stotra by Indra (the king of Gods), (viii) Ram Stotra by Vibhishan (the noble demon king of Lanka), and (ix) Ram Stuti (prayer) by Brahma (the creator).

We shall take them up one by one. Hence, this addendum is divided into nine sections, each containing one such hymn.

Section 1—Ram-Ashtak (by sage Veda Vyas)

These devotional hymns are called ‘Ashtaks’ because they have eight verses in all. These were composed by the great legendary sage Veda Vyas who had classified the Vedas into their present four volumes, had penned the eighteen Purans as well as authored the epic Mahabharat. His greatest contribution to the theme of devotion and worship of Lord Ram as the visible manifestation of the supreme transcendental Brahman is his magnum opus called ‘Adhyatma Ramayan’ (published separately by this humble author) which narrates the epic story of Lord Ram with special stress on the metaphysical and spiritual value of the story, which is of course expected from a prodigiously enlightened man who has worked on the Vedas and the Purans.

भजे विशेष—सुन्दरं समस्त—पाप—खण्डनम् । स्वभक्त—चित्त—रञ्जनं सदैव राममद्वयम् ॥१॥

1. I constantly, consistently and persistently worship, praise, honour and adore Lord Ram who is especially and most attractive and charming, enchanting and captivating (not only for his physical charms but for the eclectic, holy and divine virtues and qualities that he possesses), who is able to smash all the sins and misdeeds of his devotees (as well as the horrendous consequences of such sins and misdeeds), who is the one who gives immense joy and exhilaration to the mind and heart of his devotees, and who is unique, unparalleled and second to none (1).

—
जटा—कलाप—शोभितं समस्त—पाप—नाशकम् । स्वभक्त—भीति—भञ्जनं भजे ह राममद्वयम् ॥२॥

2. I remember and concentrate my thoughts on Lord Ram, and worship, revere and praise him who is adorned by a matted lock of hairs on his head, who is the destroyer of all the sins, who provides fearlessness to his devotees, and who is unique, unparalleled and without a second (2).

—
निज—स्वरूप—बोधकं कृपाकरं भवापहम् । समं शिवं निरञ्जनं भजे ह राममद्वयम् ॥३॥

3. I remember and concentrate my thoughts on Lord Ram, and worship, revere and praise him who enlightens the creature about his true and essential form, who is the one who shows benevolence, mercy, kindness and compassion towards all, who is the one who helps to take one across the ocean-like world (of delusions and ignorance which leads the creature to fall in a muddle of miseries, torments and horrors of all kinds), who has equanimity as his natural temperament and is equitable and even towards all, who is known as 'Shiva' because he is the personification of truthfulness, welfare and auspiciousness, of renunciation and detachment, of wisdom and enlightenment, of peace, tranquility, happiness and bliss, and is the supreme Lord of the entire creation¹, who is known as 'Niranjan' (because he is the one having no defects, faults, taints, blemishes, shortcomings and scars of any kind; one who is absolutely immaculate and pristine pure; one whose sublime, subtle, esoteric and mystical form is so microscopic and diffused that it cannot be seen by the naked eyes of the physical gross body, but which can only be perceived by the eye of wisdom, erudition and enlightenment)².

He is matchless, unique and unparalleled. I worship, honour and adore such a Lord Ram (3).

[Note--¹*Shiva* has these qualities, and as such is also known as 'Maha Dev', or the great God. Since 'truth' symbolises all that is beautiful, the word Shiva also stands for things that are beautiful, as opposed to falsehood which is ugly and despicable to say the least. Another interesting name of Lord Shiva is 'Rameshwar'. This word has two connotation—when read forwards, it means the one who is the 'Lord of Ram' or the God whom Ram worships, while when read in the reverse order it would mean the one whose 'Lord is Ram' meaning that Ram worships this particular God. Both are true when applied to Lord Shiva, because he is the only God who is said to be an expert on all the metaphysical and spiritual values of Lord Ram's Mantras as well as it the one who constantly repeats the holy Mantra of Lord Ram himself and preaches it to those dying at Varanasi to ensure their unquestioned emancipation and salvation.

²This is an epithet applied to Lord Vishnu, the sustainer and protector of creation. Lord Ram is an incarnation of Lord Vishnu who is also known as Viraat Purush, the macrocosmic gross revelation of the supreme and ultimate Lord of creation, i.e. Brahm.]

—

स—प्रपञ्च—कल्पितं ह्यनाम—रूप—वास्तवम् । निराकृतिं निरामयं भजे ह राममद्वयम् ॥४॥

4. He had assumed a human form, which is illusionary and not his true form, out of his own free will because he is without a name or form as he is attributeless and without any specific qualities that can be quantified and qualified. He is the essential reality and the absolute truth in creation. He is without a physical shape, specific form or delineable contour. He is healthy in the sense that he does not have any shortcomings, blemishes, taints and faults and is above reproach. The Lord is unique, unparalleled and without a second in every respect. I worship, honour and adore such a Lord Ram who possesses these eclectic qualities and virtues (4).

—
निष्प्रपञ्च—निर्विकल्प—निर्मलं निरामयम् । चिदेकरूप—सन्ततं भजे ह राममद्वयम् ॥५॥

5. He is without any 'Prapanch' (worldly deceptions, delusions, tricks, mischief, maverism, cunning, deceit, conceit, fraud, artificiality, illusions, imposterings, falsehoods and concealments).

He is 'Nirvikalp' (without an alternative and options). He is 'Nirmal' (pure, holy, immaculate, divine, uncorrupt and pristine). He is 'Niramaye' (one who is disease free in the sense that he is without the faults, shortcomings, flaws or blemishes associated with this body or the world). He is 'Chid' personified (i.e. he is the personification of the pure consciousness in the form of the Atma or soul of the individual creature at the microcosmic level of creation as well as the supreme transcendental Brahm, the Supreme Being at the macrocosmic level).

Along with other sages and seers, I worship, honour and adore such a Lord Ram who possesses these eclectic qualities and virtues (5).

भवाऽब्धि—पोत—रूपकं ह्यशेष—देह—कल्पितम् । गुणाकरं कृपाकरं भजे ह राममद्वयम् ॥६॥

6. He is like a ship to help one to cross over this ocean-like world. He has assumed this special body (of a human) which is an illusionary form of the Lord's true form (which is without any attributes and features)¹. He is a treasury of all noble, auspicious and righteous virtues and qualities. He is most graceful, merciful, kind and compassionate.

I worship, honour and adore such a Lord Ram who possesses these eclectic qualities and virtues (6).

[Note—¹There is no confusions and contradictions in this statement. We must remember that we are talking about an ordinary man but about the greatest power and force in creation which is mysterious and beyond our comprehension. Have we not seen a magician working at his tricks, and have we ever questioned the authenticity of the mirage that he creates though we all know for certain that it is so when we are watching a magic show? The magician can even vanish himself and even though he is very much present on the stage. If an ordinary man can perform such astounding feats that defy all logics, then can't it be expected from the supreme grandmaster of all magic?]

—
महा—सुवाक्य—बोधकैर्विराजमान—वाक्यदैः । परब्रह्म—व्यापकं भजे ह राममद्वयम् ॥७॥

7. He is known and understood in the form of the four great sayings of the scriptures (Vedas and Upanishads) called the 'Maha-vakyas' (i.e. whose true nature, form and essence is proclaimed, expounded, enunciated, elucidated, clarified and encapsulated in the form of the four great axioms and maxims of the scriptures). In fact, these sayings as well as all the other hymns and verses of the scriptures are personification

of the Lord in as much as they showcase one or the other glorious and divine virtues of the Supreme Being.

He is the one who is all-pervading, all-incorporating, all-encompassing and omnipresent supreme, transcendental and most exalted Brahm who is unique, unmatched, unparalleled and without a second.

I worship, honour and adore such a Lord Ram who possesses these eclectic qualities and virtues (7).

शिवप्रदं सुखप्रदं भवच्छिदं भ्रमापहम् । विराजमानदैशिकं भजे ह राममद्वयम् ॥८॥

8. He is the bestower of well-being and auspiciousness as well as peace, tranquility, happiness and bliss to the creature. He is the one who can dismantle the net cast by ignorance and delusions in this ocean-like world which traps the creature in its never ending cycle of torments and miseries associated with death and birth. He is the one who dispels and eliminates all sorts of delusions, artificiality, doubts, confusions, misconceptions and vexations. He resides in an exalted abode which is holy and divine. He is unique, unmatched, unparalleled and without a second.

I worship, honour and adore such a Lord Ram who possesses these eclectic qualities and virtues (8).

फलश्रुति: -

रामाष्टकं पठति यः सुकरं सुपुण्यं व्यासेन भाषितमिदं शृणुते मनुष्यः ।

विद्यां श्रियं विपुल-सौख्यमनन्तकीर्तिं सम्प्राप्य देहविलये लभते च मोक्षम् ॥९॥

-----महर्षि-व्यासविरचितं रामाष्टकं सम्पूर्णम् ।

9. Benefits :- Those who read, recite or hear these auspicious eight-verse Stotra called 'Ramashtak' composed by Sage Veda Vyas, are blessed ones who are granted the boon of immense knowledge, expertise and skills, the boon of immense good fortune, wealth, prosperity and all round welfare, the boon of immense and eternal happiness, majesty, fame and glory as well as of successes and accomplishments in all their endeavours. Not only this, but these blessings go on increasing day by day for him. At the time of death, such persons attain the highest stature of attaining emancipation and salvation, called 'Moksha' of the Atma or soul, for themselves (9).

Thus ends 'Ramashtak' Stotra composed by Sage Veda Vyas.

*__*__*__*

Section 2-Raghunath-Ashtak

This devotional hymn narrates the divine story of Ramayan in eight verses.

—
शुनासीराधीशैरवनितलज्जप्तीडितगुणं प्रकृत्याऽज्जातं तपनकुलचण्डांशुमपरम् ।

सिते वृद्धिं ताराधिपतिमिव यन्तं निजगृहे स-सीतं सानन्दं प्रणतं रघुनाथं सुरनुतम् ॥१॥

1. He who is unborn is reality but had taken a birth on the earth to honour the prayers of the Wind God, the Sun God, Indra and the other Gods, who is bestowed with prominent noble and virtuous qualities such as having immense amount of mercy, compassion, kindness, charity and magnanimity, who is essentially invisible and imperceptible but has revealed himself in a visible form having exceedingly brilliant light and splendorous radiance in the form of the Sun in the sky as well as an exalted

member of the solar race, who grew up and regularly developed in the palace of his father at Ayodhya much like the moon during the bright lunar fortnight (when the shining disc of the moon increases with each passing day), and who is worshipped, honoured and revered by all the Gods—I bow most reverentially, devotionally and with joyous abandon before Raghunath (i.e. the Lord of the Raghu race; Lord Ram) along with his divine consort Sita. He is the best amongst the Gods and is worshipped by them also (1).

—
निहन्तारं शैवं धनुर्वि इवेक्षुं नृपगणे पथि ज्याकृष्टेन प्रबलभृगुवर्यस्य शमनम् ।

विहारं गार्हस्थ्यं तदनु भजमानं सुविमलं स—सीतं सानन्दं प्रणतं रघुनाथं सुरनुतम् ॥२॥

2. He (Lord Ram) is the one who had broken the formidable bow of Lord Shiva into three parts in front of all the assembled kings as if he was effortlessly breaking the 'Ikshu-dand' (the sugarcane stem), he had calmed down the furious anger of sage Parashuram who had intercepted him (i.e. the marriage party of Lord Ram while it was on its way back to Ayodhya after his marriage with Sita at Janakpur) with a bow stringed and ready (to avenge the breaking of Shiva's bow), and he had lived like a dutiful and righteous householder—I bow most reverentially, devotionally and cheerfully before such a Lord Ram along with Sita. He is the best amid the Gods and is worshipped by them as well (2).

—
गुरोराज्ञा नीत्वा वनमनुगतं दारसहितं ससौमित्रिं त्यक्त्वेप्सितमपि सुराणां नृपसुखम् ।

विरूपाद् राक्षस्याः प्रियविरहसन्तापमनसं ससीतं सानन्दं प्रणतं रघुनाथं सुरनुतम् ॥३॥

3. He had gone to the forest along with his wife (Sita) and the son of Sumitra (Laxman) after obtaining permission from his Guru (moral preceptor, sage Vashistha), thereby forsaking his right to the throne for the benefit of the Gods¹ even though he had to abandon the comforts and pleasures of kingship of a prosperous kingdom in the process.

There in the forest, he had deformed the demoness (named Supernakha by chopping-off her nose and ears), and had to suffer from the agony of separation from Sita (because she had been abducted by Ravana, the ten headed demon). I bow most reverentially, devotionally and cheerfully to Raghunath (Lord Ram) along with Sita. He is the best amongst all the Gods and is worshipped by them also (3).

[Note—¹The Gods were being tormented by the demon Ravana, and the Lord had taken birth as a human to slay him. This was the work of the Gods for which the Lord had forsaken all kingly comforts.]

—
विराधं स्वर्नीत्वा तदनु च कबन्धं सुररिपुं गतं पम्पातीरे पवनसुत—सम्मेलन—सुखम् ।

गतं किष्किन्धायां विदित—गुण—सुग्रीव—सचिवं स—सीतं सानन्दं प्रणतं रघुनाथं सुरनुतम् ॥४॥

4. He had granted the unique privilege of having a residence in his supreme and divine abode to the demons Viradh and Kabandh who were enemies of the Gods. After that, he had gone to Lake Pampa and eventually met Hanuman. That meeting gave him immense pleasure. Then he went on to the kingdom of Kishkindha where his fame was established because he had installed Sugriv on its throne after killing (his elder brother) Vali. I most cheerfully, reverentially and devotionally bow before Lord Ram and Sita. He is the best amongst the Gods and worshipped by them as well (4).

—
प्रियाप्रेक्षोत्कण्ठं जलनिधिगतं वानरयुतं जले सेतुं बद्ध्वा—ऽसुरकुल—निहन्तारमनघम् ।

विशुद्धामर्धाङ्गीं हुतभुजि समीक्षन्तमचलं स—सीतं सानन्दं प्रणत रघुनाथं सुरनुतम् ॥५॥

5. He was eager to search out his beloved (Sita) and so went to the shore of the ocean. Helped by the monkey army, he had constructed the stone bridge across it and had eventually killed Ravana and others like him in the demon race (during the epic war at Lanka).

Thereafter, he had retrieved Sita who had been held captive by the demon, and after having established her purity by the purifying fire, he had accepted her.

I most cheerfully, devotionally and reverentially bow before Lord Ram and Sita. He is the best amongst the Gods and worshipped by them as well (5).

—
विमानं चारुह्याऽनुज—जनकजा—सेवितपद—मयोध्यायां गत्वा नृपपदमवाप्तारमजरम् ।

सुयज्ञैस्तृप्तारं निजमुखसुरान् शान्तमनसं स—सीतं सानन्दं प्रणत रघुनाथं सुरनुतम् ॥६॥

6. After that he had boarded the magnificent plane called 'Pushpak' along with his younger brother (Laxman), Janki (Sita) and others who had served him (i.e. the monkeys, bears and demons such as Sugriv, Jamvant and Vibhishan respectively). He went back to Ayodhya from Lanka.

There he was crowned a king. He performed many elaborate fire sacrifices to please and honour the Gods. He is of a calm, tranquil and peaceful temperament.

I most cheerfully, devotionally and reverentially bow before Lord Ram and Sita. He is the best amongst the Gods and worshipped by them as well (6).

—
प्रजां संस्थातारं विहित—निजधर्मे श्रुतिपथं सदाचारं वेदोदितमपि च कर्तारमखिलम् ।

नृषु प्रेमोद्रेकं निखिलमनुजानां हितकरं स—सीतं सानन्दं प्रणत रघुनाथं सुरनुतम् ॥७॥

7. He was the sustainer, protector and guardian of his subjects as well as was a steadfast follower of Dharma (righteousness) and the path sanctified and prescribed by the Vedas and other scriptures. He inspired all his subjects and followers to follow that path also. He infused love and compassion in all the creatures by his sterling example, and was a magnanimous, benevolent and benign benefactor of all human kind.

I most cheerfully, devotionally and reverentially bow before Lord Ram and Sita. He is the best amongst the Gods and worshipped by them as well (7).

—
तमःकीर्त्याशेषाः श्रवणगदनाभ्यां द्विजमुखास्तारिष्यन्ति ज्ञात्वा जगति खलु गन्तारमजनम् ।

अतस्तां संस्थाप्य स्वपुरमनुनेतारमखिलं स—सीतं सानन्दं प्रणत रघुनाथं सुरनुतम् ॥८॥

8. During the reign of Lord Ram, 'Paap' (i.e. evils, vices, sins, misdemeanors, perversions and misdeeds of all kinds) were not present at all— they were neither heard of or observed anywhere. The Brahmins preached truthful knowledge and wisdom as enshrined in the scriptures, hearing of which the whole world became enlightened and eligible to get liberation and deliverance from the cycle of birth and death. All the subjects of Lord Ram achieved his divine abode (or, all the subjects had become so noble, virtuous, auspicious and righteous because of their constant interaction with Lord Ram, constant teachings of learned Brahmins, and constant diligence on their own part in following the tenets prescribed by the scriptures that Lord Ram sent all of them to his divine abode).

I most cheerfully, devotionally and reverentially bow before Lord Ram and Sita. He is the best amongst the Gods and worshipped by them as well (8).

फलश्रुतिः

रघुनाथाष्टकं हृद्यं रघुनाथेन निर्मितम् । पठता पापराशिघ्नं भुक्ति—मुक्ति—प्रदायकम् ॥९॥

रघुनाथाष्टकम् समाप्तं ॥

9. Benefits:- This Stotra called ‘Raghunathashtak’ has the potential to destroy— by the mere reading and recitation of it regularly—all the treasury of accumulated sins and evil deeds that the devotees of Lord Ram might have ever committed or indulged in, inadvertently or otherwise, as well as their horrible consequences. They enjoy the fruits of this world, and in the end (i.e. at the time of death) they attain the supreme state of emancipation and salvation of their souls (9).

Thus ends ‘Raghunathashtak’ Stotra.

* __* __* __*

Section 3-Sita-Ram-Ashtak

This hymn praises the venerable Lord Ram along with his divine consort Sita as the one who extends all protection to his devotee. The person offering this prayer lauds the Lord’s reputation of accepting even the most downtrodden ones and giving them solace and succour. Marked by great devotion and submission for the Lord, this eight-verse hymn has four lines to each stanza.

—
ब्रह्म—महेन्द्र—सुरेन्द्र—मरुद्गण—रुद्र—मुनीन्द्रगणैरति सेव्यं

क्षीर—सरित्पति—तीरमुपेत्य नुतं हि सतामवितारमुदारम् ।

भूमिभर—प्रशमार्थ—मथ प्रथित—प्रकटीकृत—चिद्धन—मूर्ति

त्वां भजतो रघुनन्दन! देहि दयाघन! मे स्वपदाम्बुजदास्यम् ॥१॥

1. Oh Lord Ram! You are most magnanimous, graceful, benign and benevolent as well as a protector of good people. That is why Brahma the creator, Vishnu the sustainer, Indra the king of Gods, Maruts who are the different forms of the Wind God, Rudra who is one of the forms of Lord Shiva, and sages and seers etc. honour, revere, adore, praise, worship and pay their obeisance to you on the shores of the legendary ocean of milk called the Kshir-sagar¹.

You had taken birth (i.e. had manifested) on the earth in the form of Lord Ram who followed the righteous and noble path called Dharma and was eternal bliss and enlightenment personified. You had manifested yourself to remove the burden of the earth (which it faced in the form of the demons that symbolised evil, vices, sins, wickedness, tyranny and cruelty).

Oh the treasury and fount of mercy, kindness and compassion! Grant me a boon so that I can have sincere and steadfast devotion in your august and holy lotus-feet, and be able to worship and serve you diligently (1).

[Note—¹According to Puranic lore, Lord Vishnu reclines on the surface of the celestial ocean of milk on a floating bed made up of the coiled Seshnath, the great hooded serpent. It was Lord Vishnu who had revealed himself as Lord Ram.]

—
पद्म—दलायत—लोचन हे रघुवंश—विभूषण देवदयालो!

निर्मल—नीरद—नीलतनोऽखिल—लोकहृदम्बुज—भासक भानो ।

कोमलगात्र—पवित्र—पदाब्ज—रजःकण—पावित—गीतमकान्तं

त्वां भजतो रघुनन्दन! देहि दयाघन! मे स्वपदाम्बुजदास्यम् ॥२॥

2. Oh Lord Ram! You are like a jewel (or an ornamentation) of the Raghu's race (of Ayodhya). Oh the merciful and compassionate Lord! Your eyes are large like the petals of the lotus flower, and your divine and holy body has a complexion resembling the dark hue of rain-bearing dark clouds. You are like the Sun for the development (or enhancement of the pleasure of) the lotus-like heart of the creatures of this world (i.e. your devotees in this world feel exhilarated and fulfilled when they remember you and have an opportunity to witness your love for them).

You have a tender body. You have purified and sanctified the river Saryu and have blessed it with divine powers by the virtue of the few specks of dust particles of your feet which you had washed in its waters as it passes by the city of Ayodhya during its course.

Oh venerable Raghunandan (literally, the son of the Raghu's race)! Grant me a boon so that I can have sincere and steadfast devotion in your august and holy lotus-feet, and be able to worship and serve you diligently (2).

—
पूर्ण परात्पर पालय मामति—दीनमनाथ—मनन्त—सुखाब्धे!

प्रावृडदध्र—तडित्—सुमनोहर—पीतवराम्बर राम! नमस्ते ।

काम—विभञ्जन—कान्ततरानन—काञ्चन—भूषण—रत्नकिरीटं

त्वां भजतो रघुनन्दन! देहि दयाघन! मे स्वपदाम्बुजदास्यम् ॥३॥

3. You are the complete, absolute, supreme and eternal Being; you are a measureless and fathomless ocean of bliss and happiness. Protect me who am most humble, miserable, distressed, wretched and lowly.

Oh venerable Lord Ram who wears a 'Pitambar' (a silk, seamless body wrapping garment worn by Lord Vishnu) which resembles the dazzle of lightening in dark clouds. I reverentially bow before you. You are a destroyer of Kamdeo-cupid (i.e. you vanquish and eliminate lust, passions, greed, amorous tendencies, licentiousness, promiscuity), have a most charming and attractive face/countenance, and you wear a golden crown studded with gems and jewels.

Oh a treasury of mercy, grace and compassion! Grant me a boon so that I can have sincere and steadfast devotion in your august and holy lotus-feet, and be able to worship and serve you diligently (3).

—
दिव्य—शरच्छशिकान्ति—हरोज्ज्वल—मौक्तिक—माल—विशालसुमौले!

कोटि—रविप्रभ! चारुचरित्र—पवित्र—विचित्र—धनुःशरपाणे

चण्ड—महाभुज—दण्ड—विखण्डित—राक्षसराज—महागजदण्डं

त्वां भजतो रघुनन्दन! देहि दयाघन! मे स्वपदाम्बुजदास्यम् ॥४॥

4. You wear a crown and a necklace made up of a string of gems and pearls which are so magnificent that they put the radiance, majesty, splendour and glow of the beautiful moon-light during the nights of winter to shame. Your character and virtues are as glorious, majestic and splendourous as millions of suns. You hold a magnificent and strange bow and arrow in your hands which resemble a massive baton held in your robust arms by which you had trounced and trampled the false pride, haughtiness and arrogance of the demon king (Ravana) even as a strong goad is able to pierce the head (temple) of a great and wild elephant and thereby subdue it.

Oh venerable Raghunandan (literally, the great son of the Raghu's race, i.e. Lord Ram)! Oh a treasury of mercy, grace and compassion! Grant me a boon so that I can have sincere and steadfast devotion in your august and holy lotus-feet, and be able to worship and serve you diligently (4).

—
दोष—विहिंस्र—भुजङ्ग—सहस्र—सुरोष—महानल—कालकलापे

जन्म—जरा—मरणोर्मि—मनोमद—मन्मथ—नक्र—विचक्र—भवाब्धौ ।

दुःखनिधौ च चिरं पतितं कृपयाऽद्य समुद्धर राम ततो मां

त्वां भजतो रघुनन्दन! देहि दयाघन! मे स्वपदाम्बुजदास्यम् ॥५॥

5. In this fearsome and horrifying ocean-like world full of sorrows, miseries, troubles and tribulations, there are numerous wild and cruel creatures, thousands of poisonous dragons spewing venom in the form of wrathful fire of vengeance, there are swirling and ever changing swift currents representing birth, old age and death, there are terrible and horrifying alligators/crocodiles symbolising 'Kaam' (lust, passions, yearnings, greed, desires, licentiousness, promiscuity etc.), and then there is the hallucinating and intoxicated 'Mana' or the mind-heart complex that creates such circumstances that the man begins to bloat and get puffed up due to such negative trait as 'Mada' (haughtiness, arrogance, pride, ego, hypocrisy etc.).

Oh Lord! I have fallen in such an awesome horrifying ocean of sorrows and miseries, fears and torments. I earnestly request you to liberate and deliver me from it.

Oh venerable Raghunandan (i.e. Lord Ram)! Oh a treasury of mercy, grace and compassion! Grant me a boon so that I can have sincere and steadfast devotion in your august and holy lotus-feet, and be able to worship and serve you diligently (5).

—
संसृति—घोर—मदोत्कट—कुञ्जर—तृट्—क्षुद—नीरद—पिण्डित—तुण्डं

दण्डकरोन्मथितं च रजस्तम उन्मद—मोह—मदोज्झितमार्तम् ।

दीनमनन्यगतिं कृपणं शरणागतमाशु विमोचय मूढं

त्वां भजतो रघुनन्दन! देहि दयाघन! मे स्वपदाम्बुजदास्यम् ॥६॥

6. Even as a thirsty and hungry elephant, who has become wild, agitated and angry due to thirst and hunger, is forcefully brought under control by a goad, you must deliver me, who has sought shelter in your august, holy and divine feet, from the various torments that are constantly tormenting me and causing of much misery for me.

Some of the negative traits and worldly delusions that are causing immense amount of misery for me are the following--'Mada' (arrogance, haughtiness, hypocrisy, pride and ego), 'Moha' (attachments, infatuations, delusions), 'Matsarya' (envy, jealousy, malice, ill-will), and other faults such as 'Raja' (passions, desires, yearnings, greed, selfishness, ambitions, stormy temperament etc. which are collectively called the 2nd quality of a creature) and 'Tama' (the most lowly behaviour producing inertia, sins, evils, vices, perversions etc.) which are associated with this world.

I am most ignorant, foolish, lowly and wretched (and not worthy for you), but I have come to seek refuge and shelter in your holy feet nevertheless (because I have heard of your promise to accept anyone who comes to you with sincere humility and submission). So, oh Raghunandan, have mercy on me.

Oh venerable Raghunandan (i.e. Lord Ram)! Oh a treasury of mercy, grace and compassion! Give me a boon so that I can have sincere and steadfast devotion in your august and holy lotus-feet, and be able to worship and serve you diligently (6).

—
जन्मशतार्जित—पाप—समन्वित—हृत्कमले पतिते पशुकल्पे

हे रघुवीर! महारणधीर! दयां कुरु मय्यतिमन्दमनीषे ।

त्वं जननी भगिनी च पिता मम तावदसि त्ववितापि कृपालो!

त्वां भजतो रघुनन्दन! देहि दयाघन! मे स्वपदाम्बुजदास्यम् ॥७॥

7. Due to the sins, evils and misdeeds and their integrated effects accumulated over hundreds of births, my heart has become depraved and degraded to the low level of an animal (i.e. it has become pervert and low like an animal with animal-like instincts, devoid of wisdom and discrimination faculty to distinguish between what is good and what is bad), and I am really very foolish and stupid.

Oh Raghunandan, oh the valiant and steadfast one in the battle-field! Have mercy on me who am of a very low intellect and utterly stupid. You are my mother, my father, my sister and my protector. So, oh Raghunandan, have mercy on me.

Oh venerable Raghunandan (Lord Ram)! Oh a treasury of mercy, grace and compassion! Grant me a boon so that I can have sincere and steadfast devotion in your august and holy lotus-feet, and be able to worship and serve you diligently (7).

—
त्वां तु दयालुमकिञ्चन—वत्सल—मुत्पल हारमपारमुदारं

राम विहाय कमन्यमनामयमीश! जनं शरणं ननु यायाम् ।

त्वत्पदपद्ममतः श्रितमेव मुदा खलु देव! सदाऽव ससीतम् ॥

त्वां भजतो रघुनन्दन! देहि दयाघन! मे स्वपदाम्बुजदास्यम् ॥८॥

8. You are most merciful, kind, gracious, compassionate, benevolent, benign and magnanimous towards the downtrodden underdogs and have-nots.

You wear a garland of lotus flowers, are most gracious and benign. Where shall I go except you who are unique in so many ways? [That is, where will I find someone who is so great, compassionate, merciful, kind, benevolent and magnanimous so as to take care of me who am so wretched, lowly, humble, ignorant and stupid.] Oh Lord! That is why I have taken refuge and shelter in your holy, divine and august feet. Oh Lord! I beseech you, along with Sita, to give me your protection. So, oh Raghunandan, have mercy on me.

Oh venerable Raghunandan (Lord Ram)! Oh a treasury of mercy, grace and compassion! Grant me a boon so that I can have sincere and steadfast devotion in your august and holy lotus-feet, and be able to worship and serve you diligently (8).

फलश्रुतिः—

यः करुणामृत—सिन्धुरनाथ—जनोत्तमबन्धुरजोत्तमकारी

भक्तभयोर्मि—भवाऽब्धितरी—सरयू—तटिनीतट—चारु बिहारी ।

यस्तु पठेदमरः स नरो लभतेऽच्युतरामपदाऽम्बुजदास्यम् ॥९॥

सीतारामाष्टकं सम्पूर्णम् ।

9. Benefits :- You are like an ocean of nectar consisting of mercy, kindness, graciousness and compassion. You are a protector, helper and supporter of those who are lowly, distressed, humble and deprived. You are righteous and virtuous, are the remover of the fears and torments of your devotees which engulf them like currents and whirlpools in river Saryu that suck anyone who they manage to trap. You roam on the banks of the river (watchfully looking for an opportunity to save someone who might be drowning in the river of sorrows and miseries represented by the swirling waters of the river), and are the senior most member of the race of kings belonging to the Raghu dynasty.

You are a destroyer and eliminator of the all the misfortunes and adverse circumstances faced by your devotees.

Anyone who reads and recites this ‘Sita Ramashtak’ Stotra with unwavering and unflinching devotion, humility, conviction and faith is able to attain immortality and become eligible to serve your holy, divine and august lotus-like feet forever (9).

Thus ends ‘Sita Ramashtak’ Stotra.

* __ * __ * __ *

Section 4-Sanat Kumar Sanhita’s

Ram-Stavaraj (by sage Narad)

The devotional hymns known as ‘Ram Stavaraj’ dedicated to Lord Ram to pay glowing tributes to him have got their name from the fact that they are considered as the best hymn in praise of the Lord. The name has three parts—(a) ‘Ram’ referring to the patron deity for whom this particular hymn was composed, ‘Stava’ originating from the word ‘Stavan’ meaning to praise, to honour, to laud, to sing the glories of, an eulogy in honour of someone, to pray reverentially to a deity with the object of pleasing it and invoking its blessings, and (c) ‘Raj’ meaning the king or something that is the best and grandest amongst its likes. Therefore, these hymns composed by the celestial sage Narad in praise of Lord Ram are deemed to be the best and the most excellent of prayers offered by him to his Lord, Sri Ram.

Another pertinent point to note is that, as is usual in such compositions, there are a number of words which are generally used as adjectives and epithets to describe various qualities and virtues of the chosen subject, are repeated too often. This is the practice in vogue in compositions which are of the genre of prayers, perhaps to reaffirm one’s statement that what is being said is indeed the truth, and at the same time to emphasize and reassert the gravity, the import, the truth, the importance and the significance of such statements. It is done to ensure that if the worshipper misses them at the first instance, repetition would ensure that these grand virtues of the Lord get firmly and indelibly ingrained in his mind so as to mould his notions, his thinking and approach towards that particular deity. They help to remove any iota of doubts or ambiguity in his mind about the potentials and powers, the divinity and holiness of the chosen deity, resulting in his being steady in the path of worship and faith. Repetition has a psychological effect too, and over time the person begins to believe in the authenticity, veracity and truthfulness of what is being said.

विनियोगः ॐ अस्य श्रीरामचन्द्रस्तवराजस्तोत्रमन्त्रस्य सनत्कुमार—ऋषिः, श्रीरामो देवता, अनुष्टुप्छन्दः, सीता बीजम्, हनुमान् शक्तिः, श्रीरामप्रीत्यर्थं जपे विनियोगः ।

This is the introductory verse called ‘Viniyog’ or invocation of the deity to be worshipped by using Mantras especially dedicated to it. This prayer describes the glory of Lord Ram Chandra, and finally asks the Lord to provide deliverance to the soul and free it from the worldly snare in which it finds itself trapped.

‘OM Salutations! This is the ‘Ramstavaraj Mantra’ dedicated to Lord Ram Chandra which has been culled from the ‘Sanatkumar Sanghita’ (a compendium of devotional hymns composed by the ancient sage Sanatkumar).

This Mantra was first visualized/conceptualized and given divine sanctity and proved to have esoteric and mystical powers and potentials by sage/seer Sanatkumar. Hence he is deemed to be its progenitor Rishi (i.e. the first person who has conceived this Mantra and realised that it had spiritual potentials).

Lord Lord Ram is the patron God who is worshipped by this Mantra; hence he is the 'Devta'. The style of composition adopted for its composition is called 'Anushtup Chanda'¹.

The Beej Mantra for Sita, the divine consort of Lord Ram, is used as to worship the Lord and invoke his divine intercession with this hymn².

The enforcing authority who lends his astounding strength and powers to help those who say this Stotra (devotional hymn) and help them attain their goals is none other than Hanuman, the greatest devotee and follower of Lord Ram and who has taken upon himself the duty to fulfill all the desires of those who worship the Lord and protect them against all dangers.

This hymn is most dear to Lord Ram in the sense that it pleases him the most and he becomes extremely obliged and grateful to the person who recites this Stotra. Therefore, anyone who wishes to please Lord Ram should say prayers to him using this hymn known as Ramstavaraj. This hymn should be used to do Japa (constant repetition of the Lord's holy and divine name) in order to invoke Lord Ram's divine intercession³ and to seek his all-wish-fulfilling blessings.

[Note—¹The Gods and the Goddesses have their independent *Beej Mantras* which are like their independent identity tags. These Beej Mantras are the seed or root Mantras, which are monosyllable letters or words infused with mystical supernatural powers used for the invocation and worship purposes of a specific deity during formal worship and sacrifices. These Beej Mantras replace long winding Mantras and are more like coded keys that unlock the vast treasury of spiritual and mystical authority, potentials and powers which can be gotten by worshipping that particular entity to which that Beej Mantra pertains. These Beej Mantras represent all the divine and majestic strength and powers that that particular deity possesses. Hence, their use is a well established practice in the process of invoking intervention of supernatural forces of Nature which have been personified as various Gods by ancient sages and seers.

²An *Anushtup Chanda* is a composition of verses in the poetic style called 'Anushtup' in which there are four 'Charans' or steps or stanzas, and each Charan has eight letters. Therefore, the total number of letters in each verse is 4 x 8 = 32 letters in all.

³The devotee who recites this 'Ramstavaraj' Stotra should purify himself by bath and other sanctified procedures. Then he should sit down calmly with water in his right hand. He should start the recitation of this Stotra by first reciting the words of this verse called 'Viniyog'. Then the water should be poured into some receptacle or left on the ground. Then the recitation should be done from the very first word of verse no. 1 and finished off at the last word of verse no. 98 without any interruption.]

सूत उवाच

सर्वशास्त्रार्थतत्त्वज्ञं व्यासं सत्यवती—सुतम् । धर्मपुत्रः प्रहृष्टात्मा प्रत्युवाच मुनीश्वरम् ॥१॥

1. Sage Sut said, 'Yudhisthir, the son of Dharma and an exalted soul, said cheerfully to sage Veda Vyas, the son of Satyawati, who was well versed in the meaning and truthful essence of all the scriptures, was very enlightened, erudite and scholarly as well as the most exalted amongst the sages (1).

युधिष्ठिर उवाच-

भगवन्! योगिनां श्रेष्ठ! सर्वशास्त्रविशारद! । किं तत्त्वं किं परं जाप्यं किं ध्यानं मुक्तिसाधनम् ॥२॥

2. Yudhisthir said to Veda Vyas, 'Oh Lord! You are the most exalted amongst Yogis (ascetics) and a scholar par-excellence of all the scriptures. What is that which is called the essential principle, the irrefutable truth and the absolute reality? Which is the best and the most excellent Mantra to do Japa with? What is the method to do meditation and to concentrate upon the supreme Brahm and upon the pure-self? And what is the path to liberation, deliverance, emancipation and salvation in this world? (2).

वेदव्यास उवाच-

श्रोतुमिच्छामि तत्सर्वं ब्रूहि मे मुनिसत्तम! धर्मराज महाभाग! शृणु वक्ष्यामि तत्त्वतः ॥३॥

3. Please be kind enough to answer these questions'.

Sage Veda Vyas replied, 'Oh Dhramaraj! Oh the most fortunate and great one! I am answering your question; listen to it carefully (3).

यत्परं सद्गुणातीतं यज्ज्योतिरमलं शिवम् । तदेव परमं तत्त्वं कैवल्यं पदकारणम् ॥४॥

4. That which is beyond the three characteristic qualities that mark all the creatures of this creation—such as the qualities called Sata, Raja and Tama¹; that which is an embodiment of divine light of wisdom, eruditions and enlightenment, that which is pure, immaculate and free from all sorts of corruptions, taints and blemishes, that which is the all-welfare bestowing supreme entity which is the absolute Truth and Reality of this existence— such an eclectic, sublime, holy and divine entity is the only one that can bestow the ultimate form of 'Kaivalya Mukti'², or that form of liberation and deliverance for the soul of the creature which has no alternatives and which is unique in the sense that the soul is given final emancipation and salvation so that it does not have to enter the cycle of birth and death again (4).

[Note--¹The three qualities mentioned above are the following— (i) *Sata*— the foremost and the best amongst the three characteristic qualities of a creature, such as possessing good and positive virtuous, righteousness, creativity, propensity for doing noble deeds and having noble thoughts etc.; (ii) *Raja*—the medium characteristic quality marked by worldly ambitions, desires, passions, having expansionist tendencies, etc.; (iii) *Tama*—the base and most lowly of the three characteristic qualities leading to predominance of sin, evil, perversions, vices, misdemeanors, anger, inertia et al.

²The *Kaivalya Mukti* is the salvation of the soul whereby it merges with the supreme soul called Brahm and becomes one with it.]

श्रीरामेति परं जाप्यं तारकं ब्रह्मसंज्ञकम् । ब्रह्महत्यादि पापघ्नमिति वेदविदो विदुः ॥५॥

5. Lord Ram's divine and holy name is the most potent, supreme and excellent Mantra amongst all the Mantras; it is equivalent to and synonymous with the supreme Brahm (the absolute and supreme entity). It has the potential to take the creature across the ocean represented by this mundane, delusory and entrapping world. That is why it is called the 'Tarak Mantra', and that is also why it is the best Mantra that should be used for doing Japa (repetition of the divine name of the Lord by a spiritual aspirant).

Those who are expert in the knowledge propounded by the Vedas positively assert that it has the power and strength to destroy (purge, purify, cleanse, annihilate and exhaust) the horrifying effects of great sins such as, inter alia, the killing of a Brahmin (5).

— श्रीराम रामेति जना ये जपन्ति च सर्वदा । तेषां भुक्तिश्च मुक्तिश्च भविष्यति न संशयः ॥६॥

6. Those spiritual seekers/aspirants who repeat the holy name of Lord Ram constantly and consistently, with due devotion, faith, diligence and sincerity, are sure to get dual benefits of enjoyment of this materialistic world, called 'Bhog', on the one hand, as well as the deliverance from its entrapments and emancipation and salvation of their souls, called 'Mukti', on the other hand (6).

— स्तवराजं पुरा प्रोक्तं नारदेन च धीमता । तत्सर्वं सम्प्रवक्ष्यामि हरिध्यानपुरःसरम् ॥७॥

7. The most erudite and foremost devotee of the Lord, sage Narad was the first sage who had enunciated these Stotras (hymns) called 'Stavaraj' on some previous occasion. I shall repeat it verbatim for the purpose of remembering and honouring my Lord through them (7).

— तापत्रयाऽग्निशमनं सर्वाधौध—निकृन्तनम् । दारिद्र्यदुःख—शमनं सर्वसम्पत्करं शिवम् ॥८॥

8. This holy hymn called 'Ram Stavaraj' is potent enough to destroy the disastrous effects caused by the three types of torments that burn all living beings in their scorching fires—'Adhi-Daihik', 'Adhi-Daivik' and 'Adhi-Bhautik'¹. That is, this hymn acts like a soothing balm to provide solace and succour to the creature who has been literally scorched by the ferocious fire of miseries that engulf all living creatures in this creation.

It is able to also destroy the treasury of all sins and their evil effects. It can calm down or eliminate the troubles and tribulations, miseries and distresses arising out of poverty and various other existential sorrows. It is the provider of all round wellbeing and auspiciousness to the creature. This is an absolute truth (8).

[Note—¹(i) *Adhi Daihik*— torments that the creature suffers due to his body, such as old age and illness; (ii) *Adhi Daivik*— torments that the creature suffers due to the opposed Gods and malignant stars; and (iii) *Adhi Bhautik*— torments that the creature suffers due to other terrestrial creatures such as enemies, thieves, competitors, kings etc. reptiles such as snakes, animals such as lions etc.]

— विज्ञानफलदं दिव्यं मोक्षैकफलसाधनम् । नमस्कृत्य प्रवक्ष्यामि रामं कृष्णं जगन्मयम् ॥९॥

9. After bowing reverentially before Lords Ram and Krishna who uniformly pervade in the entire animate as well as the inanimate worlds, I shall describe this 'Ram Stavaraj Stotras'(hymns) which provide the divine fruit of true knowledge and enlightenment as well as represent the only easy path to emancipation and salvation (Mukti) of the soul (9).

— अयोध्यानगरे रम्ये रत्नमण्डपमध्यगे । स्मरेत् कल्पतरोर्मूले रत्नसिंहासनं शुभम् ॥१०॥

10. The seeker/aspirant should visualise a gem-studded throne in Ayodhya. This throne is under the shadow of the 'Kalpa Tree' (the evergreen, wish-fulfilling tree of Gods) in a gem-studded pavilion (10).

तन्मध्येऽष्टदलं पद्मं नानारत्नैश्च वेष्टितम् । स्मरेन्मध्ये दाशरथिं सहस्रादित्यतेजसम् ॥११॥

11. On that gleaming and magnificent throne, in the center of it, the spiritual seeker/aspirant should visualise that there is 8-petal lotus fully embellished with glittering gems. On it is seated the son of Dasrath, Lord Ram, who is as splendid and radiant as thousands of suns (11).

पितुरङ्गतं राममिन्द्रनील—मणिप्रभम् । कोमलाङ्गं विशालाक्षं विद्युद्वर्णाम्बरावृतम् ॥१२॥

12. He (Lord Ram) is seated on the lap of his father. He is dark complexioned like the Indra's gem called 'Indraneel Mani'. He has a tender (soft, delicate) body and large eyes, and he is wearing clothes which resemble the dazzle and glitter of lightening (12).

भानुकोटिप्रतीकाशं किरीटेन विराजितम् । रत्नग्रैवेयकेयूर—रत्नकुण्डल मण्डितम् ॥१३॥

13. He has a divine radiance equivalent to millions of suns effusing from his holy body. He is adorned by a magnificent crown with a tiara, and is wearing a gem-studded necklace as well as ear-rings which are also studded with gems (13).

रत्नकङ्कणमञ्जीर—कटिसूत्रैरलङ्कृतम् । श्रीवत्सकौस्तुभोरस्कं मुक्ताहारोपशोभितम् ॥१४॥

14. He is adorned with gem-studded bracelets, anklets and a waist-band. He wears a necklace of pearls, has the mark of 'Sri Vatsa' and also wears the 'Kaustav jewel' on his chest (14).

[Note--The *Kaustav gem* is worn by Vishnu; *Sri Vatsa* is the mark of sage Brighu's footprints on the chest of Vishnu.]

दिव्यरत्नसमायुक्तं मुद्रिकाभिरलङ्कृतम् । राघवं द्विभुजं बालं राममीषत्—स्मिताननम् ॥१५॥

15. This form of Lord Ram is as pleasant and charming as that of a child. He is also adorned with finger-rings studded with beautiful gems. He has a pleasant, bewitching and sweet smile on his face. He has two arms (15).

[Note--Lord Vishnu is depicted by legend as having four arms. His incarnation Lord Ram has only two arms because Vishnu has assumed the form of a human being. A man has two arms and not four.]

तुलसी—कुन्द—मन्दार—पुष्पमाल्यैरलङ्कृतम् । कर्पूरा—ऽगुरु—कस्तूरी—दिव्यगन्धानुलेपनम् ॥१६॥

16. He is adorned by garlands made up of Tulsi (basil), Kund (jasmine/lotus flower), Mandar (flowers of the coral tree) and similar flowers. His body is smeared by (or rubbed by) a scented paste consisting of camphor, aloe-wood and powdered musk which emanates a pleasant fragrance (16).

योगशास्त्रेष्वभिरतं योगीशं योगदायकम् । सदा भरत—सौमित्रि—शत्रुघ्नैरुपशोभितम् ॥१७॥

17. He is involved in the study and practice of the science of Yoga (meditation). Lord Ram is the lord of Yogis (ascetics). He is able to bestow the knowledge and benefits of Yoga to others (i.e. he is well-versed in the knowledge of the science of Yoga and is able to teach others about it). He is attended by (literally, adorned by) Bharat, Laxman and Shatrughan. [That is, the presence of these three brothers adds majesty and glory to the Lord because their presence makes Vishnu in the form of Lord Ram complete with all his parts.] (17).

विद्याधर—सुराधीश—सिद्धगन्धर्व—किन्नरैः । योगीन्द्रैर्नारदाद्यैश्च स्तूयमानमहर्निशम् ॥१८॥

18. He is always praised, honoured and adored by Vidyadhar (a category of semi-Gods who are more exalted than Gandharvas and Kinnars but are not full-fledged Gods), Indra (the king of Gods), Siddhas (mystics; the attained ones), Gandharvas (semi-Gods; celestial musicians), Kinnars (celestial dancers and singers; legendary semi-Gods with the head of a horse), as well as by Narad and other exalted sages and seers (18).

— विश्वामित्र—वसिष्ठादि—मुनिभिःपरिसेवितम् । सनकादि—मुनिश्रेष्ठैर्योगिवृन्दैश्च सेवितम् ॥१९॥

19. He is being served by the exalted sages and seers such as Vishwamitra, Vashistha etc., as well as by Yogis and celestial sages such as Sankadi etc. (19).

— रामं रघुवरं वीरं धनुर्वेद—विशारदम् । मङ्गलयतनं देवं रामं राजीवलोचनम् ॥२०॥

20. Lord Ram is the best and the most exalted king in the race of kings belonging to the line of Raghu. He is brave, valiant and courageous. He is an expert archer and proficient in the use of the bow. He is an image/embodyment of auspiciousness, and has lotus-like (beautiful and enchanting) eyes (20).

— सर्वशास्त्रार्थ—तत्त्वज्ञमानन्दकर—सुन्दरम् । कौसल्यानन्दनं रामं धनुर्बाणधरं हरिम् ॥२१॥

21. He knows the essential and sublime truth as expounded by all the scriptures, and has a deep insight into their true meaning. He also knows all of them by heart. He is charming and beautiful to look at, and is the bestower of bliss, happiness and joy to all. He provides delight to Kaushalya (his mother), and he is famous as the one who holds a bow and an arrow (21).

— एवं सञ्चिन्तयन् विष्णुं यज्ज्योतिरमलं विभुम् । प्रहृष्टमानसो भूत्वा मुनिवर्यः स नारदः ॥२२॥

22. Remembering Lord Vishnu who has revealed himself as Lord Ram possessing all the above peerless, eclectic and divine holistic qualities which are sublime and unique, the Lord who is uncorrupt and immaculate, having no taints and blemishes of any kind whatsoever, who is omnipresent, all-pervading, all-incorporating and all-encompassing, and who embodies the splendour and radiance of light¹ that is divine and sublime, sage Narad felt extremely cheerful and exhilarated (22).

[Note--¹Light here represents the eclectic virtues of divinity, holiness, sublimity, enlightenment, wisdom and erudition; it is a metaphor for that which is the ultimate Truth and absolute Reality.]

— सर्वलोक—हितार्थाय तुष्टाव रघुनन्दनम् । कृताञ्जलिपुटो भूत्वा चिन्तयन्नद्भुतं हरिम् ॥२३॥

23. Narad folded his hands in reverence and prayed to Lord Ram who enhances the bliss, joy and happiness of the world. He prayed for the welfare and auspiciousness of the entire world (23).

— यदेकं यत्परं नित्यं तदनन्तं चिदात्मकम् । यदेकं व्यापकं लोके तद्रूपं चिन्तयाम्यहम् ॥२४॥

24. Narad prayed, 'I remember that form of Lord Ram which is unique, unparalleled and without a second; which is eclectic, holy, divine, supreme and transcendental; which is perpetual, constant, consistent, eternal, truthful, permanent, ceaseless, immutable, invariable, steady and unchanging; which is without an end, eternal, everlasting, infinite, measureless and fathomless; which is pure consciousness, wisdom, erudition, sagacity and enlightenment personified; which is the best and the most exalted of all the forms in which Lord Vishnu (or the Viraat Purush representing

Brahm) has ever manifested; and which is omnipresent, all-pervading, all-incorporating and all-encompassing (24).

विज्ञानहेतुं विमलायताक्षं प्रज्ञानरूपं स्वसुखैकहेतुम् । श्रीरामचन्द्रं हरिमादिदेवं परात्परं राममहं भजामि ॥२५॥

25. I worship, honour and adore that Lord Ram who is the essence of all sciences, i.e. he represents the factor that is at the base of all knowledge; he is the essence which is the root from which all forms of wisdom, erudition, sagacity, enlightenment and truthful knowledge about the ultimate reality sprout; he is the object and aim of all metaphysical and spiritual research and study.

He possesses a divine sight which is blessed with the sublime and glorious virtues of having long foresight and deep insight. He is an embodiment personification of Pragyan (enlightenment, wisdom, erudition, sagacity).

He is the cause of supreme bliss arising out of self-realisation (because he is the pure consciousness called the Atma of the creature personified, and this Atma is characterised by inherently possessing the grand virtue of blissfulness).

He is the most ancient Lord (or is the first amongst all the Gods), and is the most exalted and most superior amongst them all' (25).

—
कविं पुराणं पुरुषं पुरस्तात् सनातनं योगिनमीशितारम् ।

अणोरणीयां समनन्तवीर्यं प्राणेश्वरं राममसौ ददर्श ॥२६॥

26. When sage Narad had prayed as above, he had a divine vision of Lord Ram who is an honoured, well-lettered and a learned One.

The Lord has been lauded by the ancient Purans as the Viraat Purush (the macrocosmic gross body of creation and another name of the all-pervading supreme Lord of creation known as Vishnu)¹.

He represents all the primeval essential elements of creation (i.e. Lord Ram personifies all the five basic elements earth, water, fire, air and space from which the whole creation has evolved).

He is eternal, perpetual, everlasting, primeval, ancient, traditional and absolutely truthful (a reference to Brahma and Vishnu).

He is the most exalted amongst the Yogis (realised ascetics and hermits) on the one hand, and provides emancipation and salvation to them on the other².

He pervades uniformly and universally in the entire creation—right from the minutest forms of creatures to the most colossus ones, and in both the two types of worlds—the animate and the inanimate.

He is the almighty, omnipotent and most powerful force of creation. He is majestic, stupendous, magnificent and glorious in his microcosmic as well as macrocosmic forms. He is of an immeasurable strength, force, prowess, potent and valour.

He is indeed the 'Lord of Pran' which is the vital wind that is at the core of all forms of life in this creation. [That is, Lord Ram, as the Supreme Being, controls all the factors of life including the vital winds such as Pran or breath and is the Lord of the creature's soul.] (26).

[Note—¹The phrase 'Puran Purush' can be interpreted differently to mean the Lord who is most ancient, traditional and primeval. He is the ancient Lord who has been honoured by ancient traditional histories of Hindus as the most virtuous and powerful Lord of all creatures as well as the cause and essence of the entire creation. Thus, Lord Ram personifies this macrocosmic Viraat Purush in a microcosmic form.

²Lord Ram, as a human being, is like an enlightened ascetic or hermit who remains detached from all worldly involvements, is a renunciate par-excellence, and ever engrossed in meditation and contemplation. On the other hand, as the supreme transcendental Brahm personified, he is the liberator and deliverer of the creature's soul, he is the Supreme Being who bestows the boon of emancipation and salvation to the creature.]

नारद उवाच

नारायणं जगन्नाथमभिरामं जगत्पतिम् । कविं पुराणं वागीशं रामं दशरथात्मजम् ॥२७॥

27. Sage Narad paid his humble obeisance to Lord Ram, saying, 'Oh Narayan (Vishnu), Oh Jagganath (Lord of the world)! You are the one who is the enhancer of happiness, joy, delight and bliss of all; you are the master and Lord of the entire world; you are an expert in languages and a wise, erudite, sagacious and learned One; you are an embodiment of the Purans (i.e. you personify all the divine and eclectic values and virtues propounded, expounded, enunciated and espoused by ancient religious mythological histories); you are the most exalted amongst wise and realised ascetics and hermits called Yogis (i.e. you are like an emperor amongst them); and you have taken birth, or revealed yourself as the son of king Dasrath of Ayodhya—I most reverentially bow before and pay my respectful obeisance to such an exalted and divine Lord known as 'Ram' (27).

राजराजं रघुवरं कौसल्यानन्दवर्धनम् । भर्गं वरेण्यं विश्वेशं रघुनाथं जगद्गुरुम् ॥२८॥

28. Oh King Lord Ram, the emperor amongst kings, the most exalted one amongst the kings of the Raghu dynasty, the enhancer of the joys and pleasures of mother Kaushalya, the personification of Lord Shiva (standing for such virtues as auspiciousness, truthfulness, purity, wisdom, enlightenment and renunciation) and Lord Brahma (standing for such virtues as knowledge, erudition, sagacity, scholarship and wisdom because Brahma had created the Vedas which are metaphors for these qualities, as well as for the authority to create the world), the most revered, the most senior, the most exalted and the chief amongst all the manifestations of Brahm in this creation as well as its Lord, the Lord of the Raghu's race, and the Guru (moral preceptor, teacher and guide) to the entire creation. I bow before you most humbly and reverentially (28).

सत्यं सत्यप्रियं श्रेष्ठं जानकीवल्लभं विभुम् । सौमित्रिपूर्वजं शान्तं कामदं कमलेक्षणम् ॥२९॥

29. You are an embodiment/image/personification of the grand virtue of truthfulness; you are the lover of truth and honesty; you are the most excellent and exalted being; you are the beloved of Janki (Sita); you are honoured by the epithet of 'Vibho'¹; you are the elder brother of Laxman; you are tranquil, serene, calm and peaceful by temperament; you are the fulfiller of all the desires and wishes of the creature; you are lotus-eyed—I bow before Lord Ram most reverentially and devotionally (29).

[Note—¹The word *Vibho* means 'one who is omnipresent, all-pervading, magnanimous, eternal, almighty, majestic and powerful Lord of all'. It is an epithet usually used to describe the virtues of Lord Vishnu who is regarded as being synonymous with both Brahm, the attributeless and infinite Supreme Being who had manifested as Narayan, as well as the Viraat Purush, the macrocosmic gross body of this creation. He is also called the 'Chief Purush'.

Another interpretation of this verse is that 'Vibho' refers to Brahm while the word 'Chief Purush' refers to Lord Vishnu in the form of

Viraat Purush. It is due to the joint efforts of Brahm and the Viraat Purush that this creation has come into being.]

—
आदित्यं रविमीशानं घृणिं सूर्यमनामयम् । आनन्दरूपिणं सौम्यं राघवं करुणामयम् ॥३०॥

30. You are ‘Aditya’ (the sons of Aditi— the Gods, the Sun, Indra, Vaman the dwarf incarnation of Vishnu, the 8 Vasus), ‘Ravi’ (the Sun, the Fire, the leader), ‘Ishan’ (Lord Shiva; the flag bearer of Dharma or righteousness, probity, propriety and auspiciousness), ‘Grihini’ (the one who accepts everything, or the one to whom all oblations, libations, worships and sacrifices are offered), ‘Surya’ (the Sun God; as splendid as the celestial Sun), ‘Anamaya’ (healthy, without any faults or blemishes, without any reproach), ‘Anand Roop’ (an embodiment/personification/image of bliss, joy and happiness), ‘Saumya’ (sober, dignified, graceful and modest), as well as ‘Karunamayam’ (full of mercy, kindness and compassion). I bow before such a Lord Ram, most humbly and reverentially (30).

—
यामदग्निं तपोमूर्तिं रामं परशुधारिणम् । वाक्पतिं वरदं वाच्यं श्रीपतिं पक्षिवाहनम् ॥३१॥

31. For all practical purposes, you are like the son of sage Jamdagni, i.e. sage Parashuram, who is a living image or an icon of Tapa (one who observes severe austerities and penances; one who undergoes hardships and sufferance for some noble cause and spiritual upliftment). In that manifestation (as Parashuram), you hold an axe.

You are the Lord of speech, the thing or subject that is spoken about in words, as well as the object of speech or the words spoken. You are a granter of boons. You are the Lord of Laxmi (i.e. you are Lord Vishnu) who rides the legendary bird known as Garud (the legendary eagle/heron)—I bow before such a Lord Ram, most reverentially and devotionally (31).

—
श्रीशार्ङ्गधारिणं रामं चिन्मयानन्दविग्रहम् । हलधृग्—विष्णुमीशानं बलरामं कृपानिधिम् ॥३२॥

32. Oh Lord Ram! You hold a bow called ‘Shaarang’ (a bow held by Lord Vishnu). You are an image or personification of profound wisdom and enlightenment as well as eternal and truthful beatitude and felicity.

You hold a plough i.e. you are Balraam, the elder brother of Lord Krishna. You are Vishnu (the sustainer and protector of creation) and Ishan (Shiva the concluder of creation and considered an exalted ascetic, most wise, auspicious, truthful and an image of bliss).

You are a treasury of mercy, kindness and compassion. I bow before such a Lord Ram, most reverentially and with utmost humility (32).

—
श्रीवल्लभं कृपानाथं जगन्मोहनमच्युतम् । मत्स्य—कूर्म—वाराहादि—रूपधारिणमव्ययम् ॥३३॥

33. You are the beloved Lord of Goddess Laxmi, also known as ‘Sri’. You are the Lord who has such noble virtues as compassion, mercy and kindness. You are the one who keeps the entire world enthralled. You are imperishable and indestructible; you never fall from your exalted stature or get demoted and tarnished in anyway.

You have assumed various forms, such as the legendary fish, the tortoise and the boar etc. on different occasions—I bow before such a Lord Ram with the greatest of reverence and devotion (33).

—
वासुदेवं जगद्योनिमनादिनिधनं हरिम् । गोविन्दं गोपतिं विष्णुं गोपीजनमनोहरम् ॥३४॥

34. You are also called the son of Vasudeo (i.e. Lord Krishna). You are the creator of the world, are without a beginning or an end, and are the Lord of the cows as well as the one who has enchanted the heart of the cowherd maids (of Vrindavan). Your name is Govind as well as Vishnu—I bow before such a Lord Ram, most reverentially and with humility (34).

[Note--By calling Lord Ram as Krishna, the composer of these hymns tries to establish that there is no difference between Lord Ram and Krishna.]

—
गो—गोपालपरीवारं गोपकन्या—समावृतम् । विद्युत्पुञ्जप्रतीकाशं रामं कृष्णं जगन्मयम् ॥३५॥

35. Surrounded by cows, cowherd boys, girls and their families in your manifestation as Lord Krishna, you effuse a divine radiance and are as splendid and glorious as the dazzle of electric. You pervade uniformly and universally throughout the whole world (because you are omnipresent, all-pervading and all-encompassing). Conversely, the entire creation is nothing but your image. I bow before such a Lord Ram with utmost reverence and devotion (35).

—
गो—गोपिका—समाकीर्णं वेणुवादन—तत्परम् । कामरूपं कलावन्तं कामिनी—कामदं विभुम् ॥३६॥

36. Oh Vibho (omnipotent, almighty, omnipresent Lord; an epithet for Lord Vishnu)! Being surrounded by cows and cowherd maids (during your manifestation as Lord Krishna), you expertly play the enchanting music of the flute.

You are as beautiful and enchanting as Kamdeo-cupid. You embody all the different 'Kalaas' that form the texture of a man's character and personality (i.e. the various auspicious and noble qualities and virtues that a man possesses are all personified in your divine form). You fulfill the desires of charming women (36).

—
मन्मथं मथुरानाथं माधवं मकरध्वजम् । श्रीधरं श्रीकरं श्रीशं श्रीनिवासं परात्परम् ॥३७॥

37. You are the personification of 'Manmath' (Kamdeo-cupid) and are the Lord of Mathura (i.e. Lord Krishna). You are known by the names of Maadhav, Makardwaj, Sridhar, Srikar, Srisham and Srinivaas.

You are the supreme and the most exalted transcendental Lord of the entire creation— I bow before such a Lord Ram, most reverentially and with utmost devotion (37).

—
भूतेशं भूपतिं भद्रं विभूतिं भूतिभूषणम् । सर्वदुःखहरं वीरं दुष्टदानववैरिणम् ॥३८॥

38. You are the Lord of the five basic elements (earth, water, fire, wind and space which are the building blocks of creation). You the Lord of the earth (i.e. you are the emperor of all living beings on the earth). You are a righteous, noble, civilized, dignified, learned and properly groomed gentleman.

You are one who is dignified, majestic, glorious, magnificent, stupendous and almighty, being a fountainhead of all such virtues which are collectively described as 'excellent', and one who possesses supernatural powers¹. Being graced with these holistic and glorious virtues, you are like an 'ornament' of the world (i.e. your noble virtues are like an ornament which adorns the world).

You are the vanquisher of all the sorrows, distresses, miseries, troubles and tribulations (that afflict your devotees in this world). You are brave, courageous, valiant, valorous and strong. You are the slayer of evil demons representing evil forces in the world—I bow before such a Lord Ram, most reverentially and devotionally (38).

[Note--¹The word *Vibhuti* also means richness and prosperity. Hence, a person who is rich with these virtues and qualities is a 'Vibhuti'.]

श्रीनृसिंहं महाबाहुं महान्तं दीप्ततेजसम् । चिदानन्दमयं नित्यं प्रणवं ज्योतिरूपिणम् ॥३९॥

39. You had assumed the form of 'Narsingh' (half lion, half man incarnation of Vishnu to protect his child-devotee Prahalad from the torments of the latter's demon father).

You have long arms (a metaphor for being able to extend all help to your devotees, no matter what happens). You are most exalted and revered, and the ultimate refuge and shelter for all (your devotees)¹.

You are aglow with a radiant splendour that is divine and holy as well as brilliant and dazzling as the light of a burning fire.

You remain perpetually in a state of utmost bliss and tranquility, of peace and happiness. You are characterized by being perpetual, constant, consistent, eternal, permanent, ceaseless, immutable, invariable, steady and unchanging.

You personify 'Pranav'² at the macro level of existence. You are an embodiment of light (symbolizing the energy of fire and the enlightenment that comes with truthful knowledge). I reverentially bow before Lord Ram to pay my deepest respect and homage (39).

[Note—¹The word *Mahaant* has the following connotations—(a) An abbot of a monastery, implying that Lord Ram is the chief-in-command who takes care of all those who reside in the monastery of righteousness, auspiciousness, nobility of thoughts and deeds, religiosity, truthfulness and uprightness. (b) The word also means the 'great end', implying the final emancipation and salvation of the soul of the creature from where it does not have to come back again to enter the cycle of birth and death.

²The word *Pranav* refers to the supreme transcendental Brahm recognised by the ethereal primary monosyllable word OM.]

आदित्यमण्डलगतं निश्चितार्थ—स्वरूपिणम् । भक्तप्रियं पद्मनेत्रं भक्तानामीप्सितप्रदम् ॥४०॥

40. You are present in the subtle sky like the Sun is in the physical sky¹. Or, you shine in this world like the Sun shines in the sky; the Sun shining brilliantly is your representative in the sky.

You have no ambiguity and confusions surrounding yourself, as you are an embodiment of the absolute, unequivocal, irrefutable and irrevocable Truth and Reality in creation.

You are very endearing to your devotees and are the fulfiller of their wishes, desires, aspirations, hopes and expectations. You have eyes that resemble the beautiful flowers of the lotus plant. I bow before such a Lord Ram with most reverence and devotion (40).

[Note--¹That is, your divine and ethereal form is as glorious, magnificent, majestic, splendorous and radiant as the Sun in the sky. This Sun lights the entire length and breadth of the visible world even as Lord Ram lights up the inner-self of the creature as its pure consciousness and the eclectic virtues of wisdom, erudition, sagacity, self-realisation and enlightenment which help the creature to overcome the darkness of ignorance.

Further, according to various Upanishads, the Viraat Purush, or Lord Vishnu whose manifestation Lord Ram is, is visualised as being present in the Sun, the latter being the Viraat's visible form.]

कौशल्येयं कलामूर्तिं काकुत्स्थं कमलाप्रियम् । सिंहासने समासीनं नित्यव्रतमकल्मषम् ॥४१॥

41. You (Lord Ram) are the son of Kaushalaya and born in the clan of king Kukustha. You are the maverick Lord who does mysterious deeds sportingly, and at the same time you are an image of (i.e. you personify) all the different virtues in creation which are collectively called 'Kalaas' that characterize the personality and bearing of a living being. You are dear to Kamlaa (another name of Goddess Laxmi because she holds a lotus in her hands).

You are seated on a throne in a meditative posture of Samadhi (accompanied by Kamlaa/Laxmi who has manifested herself in the form of Sita).

You are constantly, consistently and persistently steadfast in following the chosen path of righteousness, auspiciousness, nobility, religiosity and uprightness; you uphold your righteous words, vows and promises.

You are sinless and without any reproach; you are without any blemishes and taints. I reverentially bow before Lord Ram to pay my deepest respect and homage (41).

—
विश्वामित्रप्रियं दान्तं स्वदारनियतव्रतम् । यज्ञेशं यज्ञपुरुषं यज्ञपालनतत्परम् ॥४२॥

42. You are very dear to sage Vishwamitra, are self-restrained, and are faithful and committed to your wife (Sita).

You are the Lord for whom the offerings are made in the fire sacrifice, and you a personification of the fire sacrifice itself. [That is, you are both the Lord to honour whom the fire sacrifice is done as well as the Fire God himself who is worshipped in the form of the sacred fire of the sacrifice.] You are very eager to protect and uphold the sanctity of such fire sacrifices; at the same time, you do them diligently yourself. I reverentially bow before Lord Ram to pay my deepest respect and homage (42).

—
सत्यसत्त्वं जितक्रोधं शरणागत—वत्सलम् । सर्वक्लेशापहरणं विभीषणवरप्रदम् ॥४३॥

43. You are committed to truthfulness, are without a trace of anger and vengeance (or are the conqueror of this negative trait), are the protector of those who have come to take refuge/shelter in your feet, are the eliminator and destroyer of all sorrows, miseries, troubles and tribulations, and are the one who had blessed Vibhishan (even though he was a demon and a betrayer of his own brother Ravana). I bow before such a Lord Ram with great humility and respect (43).

—
दशग्रीवहरं रौद्रं केशवं केशिमर्दनम् । बालिप्रमथनं वीरं सुग्रीवेप्सितराज्यदम् ॥४४॥

44. You are the slayer of the 10-headed Ravana. You are Rudra personified. [That is, you represent the angry form of Shiva for the express purpose of killing sinful monsters who represent all the evil forces and negativity in creation. You have to eliminate them in order to restore the balance in favour of goodness and righteousness.]

You are known as Keshav because you had slayed a most terrible ogre known as Keshi.

You had also killed the brave Vaali (the monkey king of Kishkindha) and had bestowed the kingdom to Sugriv (the younger brother of Vali who had taken refuge with Lord Ram and sought the Lord's help to retrieve his wife and kingdom usurped by his elder brother). I reverentially bow before Lord Ram to pay my deepest respect and homage (44).

—
नर—वानर—देवैश्च सेवितं हनुमत्प्रियम् । शुद्धं सूक्ष्मं परं शान्तं तारकं ब्रह्मरूपिणम् ॥४५॥

45. You are served by men, monkeys as well as by the Gods. You are very dear to Hanuman.

You are pure, immaculate and without any blemishes and taints of any kind whatsoever. Your real form is subtle and sublime like the microcosmic Atma as well as the microscopic, all powerful Atom.

Your form is an image of tranquility, serenity, peace, calmness and placidity. You are the 'Tarak Brahm' personified. [Refer Ram Rahasya Upanishad, Canto 1, verse nos. 5-6. That is, you provide liberation and deliverance to those who seek shelter with you, and ensure emancipation and salvation of their souls.]

I bow before such a Lord Ram, most reverentially and humbly (45).

—
सर्वभूतात्म—भूतस्थं सर्वाधारं सनातनम् । सर्वकारणकर्तारं निदानं प्रकृतेः परम् ॥४६॥

46. You are present in all the creatures as their Atma (the pure consciousness soul), are the very foundation on which everything rests, and are the truthful, infinite, eternal and absolute reality of creation.

You are the root of all causes and reasons, their results and effects, as well as their answers and remedies¹. You are beyond the realm or reach of Maya (delusions) and are the Supreme Being personified—I bow to such a Lord Ram, most reverentially and devotionally (46).

[Note—¹For example, if there is a certain problem, there must be a cause for it, and a remedy for it. This verse implies that the Lord is not only the cause of everything that exists, being the primary creator of creation, but the very conception of anything existing itself, as well as the means to understand what that particular thing is all about, to unravel its secrets, and also to find remedies for any problems created by that thing. In fact, the entire circle—from the conception of anything right up to its conclusion is overseen by the Lord of creation.]

—
निरामयं निराभासं निरवद्यं निरञ्जनम् । नित्यानन्दं निराकारमद्वैतं तमसः परम् ॥४७॥

47. You are Niramaye (one who is free from any kind of diseases—spiritual, mental, physical, psychological, moral, etc. that may taint one's character and personality). You are Niravhas (un-manifest, invisible, imperceptible, and without any physical attributes and qualities that can be quantified). You are Nirvadyam (one who is so divine, holy, graceful, exalted, sublime, great and majestic that his virtues and glories simply cannot be narrated in words). You are Niranjan (one having no defects, faults, taints, blemishes and scars of any kind; one who is immaculate and pure).

You are eternally blissful and remain perpetually in a state of joyous abandon. You are without any attributes, forms and specifics. You are non-dual and a unique entity that has no parallel, no match or comparison. You have no darkness of ignorance, called 'Tamas', ever affecting your holy, pure and divine self; you are indeed the supreme transcendental Being who is beyond the reach of the dark long shadow cast by delusions and ignorance. I pay my deepest of respects, and bow myself most reverentially before such a Lord Ram who has these unique eclectic qualities and virtues (47).

—
परात्परतरं तत्त्वं सत्यानन्दं चिदात्मकम् । मनसा शिरसा नित्यं प्रणमामि स्मृतम् ॥४८॥

48. You are the first among equals and the best amongst the exalted ones; you are an embodiment of the essence of truth knowledge; you are the absolute, irrefutable and universal Truth as well as the bliss obtained with this realisation (or you are a true

image of beatitude and felicity); and you are the pure conscious enlightenment Atma or soul of the creature.

I bow my head most reverentially and on a daily basis, with my mind and heart fully devoted to his Lordship who is the most exalted and the best king in the race of kings belonging to the Raghu dynasty (of Ayodhya). [That is, I give my heartfelt respects and pay my sincere obeisance to Lord Ram with my mind, intellect and heart committed to what I say; my whole being is devoted to the worship of and honouring the Lord who is the best Lord in the line of kings of the Raghu dynasty of Ayodhya.] (48).

—
सूर्यमण्डलमध्यस्थं रामं सीतासमन्वितम् । नमामि पुण्डरीकाक्षममेयं गुरुतत्परम् ॥४९॥

49. Lord Ram along with Sita is symbolically established in the centre of the world just like the Sun is established as the focal point of the visible world¹.

I bow most reverentially, devotionally and faithfully to the Lord who has (beautiful and enchanting) eyes resembling the lotus flower, and who is the most learned, wise and enlightened Guru (moral preceptor, teacher and spiritual guide), well-versed in the essence of all the scriptures, of all the living beings in this creation (49).

[Note--¹That is, even as the world revolves around the Sun and no life is expected to survive in this world without the existence of the celestial Sun in the sky as its focal point, you too are at the core of all life forms in this myriad, multifarious and varied creation as its Atma or soul which is present in the bosom of all living beings as their pure consciousness, as well as the Pran which is the vital wind that infuses life into them. The Lord has a magnificently divine splendour radiating out in all the directions from his holy body much like the Sun which gives out light to illuminate the entire visible world. In this verse, the Sun has been treated as a metaphor for Lord Ram, and the light of the Sun is the divine halo surrounding the Lord's holy body which illuminates the entire creation by injecting life and consciousness into it.]

नमोऽस्तु वासुदेवाय ज्योतिषां पतये नमः । नमोऽस्तु रामदेवाय जगदानन्दरूपिणे ॥५०॥

50. I bow most reverentially and with greatest of humility to Vasudeo who is the Lord of light. [Here, 'light' refers to the glow of pure consciousness as well as enlightenment, wisdom, knowledge, erudition and sagacity that effuses from the Lord like divine effulgence and illuminates the entire creation.]

I bow again before Lord Ram who bestows happiness and joy to the world and is an image of happiness and bliss himself (50).

—
नमो वेदान्तनिष्ठाय योगिने ब्रह्मवादिने । मायामयनिरासाय प्रसन्नजनसेविने ॥५१॥

51. I bow most reverentially before the Lord who is an expert in and a strict follower of the tenets, axioms and maxims enunciated in Vedant (Upanishads); who is a Yogi (ascetic and hermit) par excellence; and who is an expert in the truthful knowledge about the supreme transcendental Brahm (i.e. he is well-versed about the ultimate, supreme, absolute, irrefutable, incontrovertible Reality and the universal unequivocal Truth in this creation) and an erudite exponent of that knowledge.

The Lord is an embodiment of Maya (the powerful forces of worldly delusions and ignorance that are at the core of creation of this imaginary, artificial and hallucinating world of allurements that traps the creature in its mirage-like charm) as well as beyond its purview (because Maya is generated by the Lord himself in order

to carry on with the process of creation and destruction in an endless cycle, and therefore Maya cannot neither deceive him nor supersede him; the Lord is free from the deluding effects of Maya).

The Lord protects his devotees, or those who have taken refuge and shelter with him, most cheerfully and gladly (51).

वन्दामहे महेशानं चण्ड—कोदण्ड—खण्डनम् । जानकीहृदयानन्द—वर्द्धनं रघुनन्दनम् ॥५२॥

52. I praise and honour Raghunandan (literally a son belonging to the race of Raghu kings of Ayodhya) who had broken the strong and sturdy bow of Lord Shiva (at Janakpur in order to marry Sita), and had thereby enhanced the pleasure and happiness of Sita's heart by doing so¹ (52).

[Note—¹This is because Sita had wished to marry Lord Ram but was bound by her father's vows that stipulated that anyone who lifted and stringed the bow of Shiva would have her hands in marriage, even if that meant that it was against her wishes. It was a very damning situation for Sita, and she had prayed frantically to Lord Shiva and Goddess Parvati to make it so happen that the vow was fulfilled by none but Lord Ram. So when the Lord broke the bow, it was natural that Sita's heart was filled with unbound exhilaration.]

उत्फुल्लामल—कोमलास्वतकलदल—श्यामाय रामाय ते कामाय प्रमदामनोहरगुणग्रामाय रामात्मने ।

योगारूढ—मुनीन्द्र—मानससरो हंसाय संसारविध्वंसाय स्फुरदोजसे रघुकुलोत्तंसाय पुंसे नमः ॥५३॥

53. I reverentially and most respectfully bow before Lord Ram who has a dark complexion and looks as enchanting and attractive as a fully blooming lotus flower, who is as attractive, enthralling and enamouring as the alluring God of love known as Kamdeo-cupid who enchants and captivates the heart and mind of beautiful women, who is a treasury and fount of all noble and righteous virtues and qualities, and who is the pure conscious Atma/soul of all the living creatures.

I reverentially and most respectfully bow before him who is ever engrossed/involved in doing/practicing Yoga (mediation and contemplation upon the Truth), who is like a swan floating in the lake-like heart of sages and seers, who has revealed himself as the brave, courageous, valiant, gallant and strong Lord Ram—who is the most exalted one in the race of kings of the Raghu dynasty—for the destruction of evil forces in this world (53).

भवोद्भवं वेदविदां वरिष्ठमादित्यं—चन्द्रानलसुप्रभावम् ।

सर्वात्मकं सर्वजगत्स्वरूपं नमामि रामं तमसः परस्तात् ॥५४॥

54. I most reverentially and with the greatest of respect bow before Lord Ram who is the source or fount from which the entire creation has come into being; who is the best amongst those who are experts in the knowledge of the Vedas, who is as majestic, stupendous, splendid, radiant, potent and powerful as the Sun, the Moon and the Fire; who is present in the form of the pure conscious Atma/soul of all the individual creatures as well as of the world at large (i.e. he is the soul of the entire creation, both at the micro as well as the macro levels), who embodies the entire world or whose image the entire visible world is.

I do so with proper awareness of the truth and reality, devoid of any darkness cast by ignorance or delusions; I honour him with full realisation of his most divine, sublime, holy, eclectic and ethereal form (54).

निरञ्जनं निष्प्रतिमं निरीहं निराश्रयं निष्कलमप्रपञ्चम् ।

नित्यं ध्रुवं निर्विषयं स्वरूपं निरन्तरं राममहं भजामि ॥५५॥

55. Lord Ram is 'Niranjan' (one having no defects, faults, taints, blemishes and scars of any kind; one who is absolutely immaculate and pristine pure; an epithet applied to Lord Vishnu, the sustainer and protector of creation). He is without any specific image or form (because the supreme Lord has no specific and delineating attributes). He is without any worldly aspirations, expectations, desires or wants (as he is fully contented and fulfilled). He is without any need for taking refuge, shelter or help from anyone else (because he is the one who provides these to others instead of requiring them for himself). He is without any fraction or part (because he is wholesome, indivisible and immutable) as well as free from all worldly deceptions, tricks, cunning, conceit, fraud, artificiality, illusions, falsehoods and concealments.

I constantly, consistently, persistently and steadfastly worship and most reverentially adore and honour Lord Ram in the image of his divine 'self' which is Nitya (one who is perpetual, constant, consistent, eternal, absolute, permanent, ceaseless, immutable, invariable, steady and unchanging); which is Dhruv (steady, unchanging, unmoving, consistent, constant, eternal, everlasting and imperishable like the Polar Star); and which has no 'Vishaye', i.e. has no attachments towards and attractions for any of the worldly allurements and material comforts and pleasures pertaining to the sense organs and their gratifications in this materialistic, artificial, entrapping and deluding mundane world (that generally enthrall all living beings and keep them trapped, except the self-realised and enlightened souls) (55).

भवाब्धिपोतं भरताग्रजं तं भक्तप्रियं भानुकुलप्रदीपम् ।

भूतत्रिनार्थं भुवनाधिपत्यं भजामि रामं भवरोगवैद्यम् ॥५६॥

56. He who resembles a ship or boat to help the creature (i.e. his devotees) to cross over this world which is like a vast and fathomless ocean, who is the elder brother of Bharat and most dear to his devotees, who is like a brilliant lighted lamp in the Solar race; who is the Lord of the three categories of creatures classified on the basis of the three class of characteristics possessed by them (called Sata, Raja and Tama Gunas respectively), who is the master and Lord of all the Bhuvans (all inhabitable worlds of which there are said to be fourteen in number), and who is like a doctor for the treatment of the diseases represented by all the insurmountable problems and miseries, spiritual and bodily, associated with this world of artificiality, delusions, illusions, ignorance, hallucinations and their ilk.

I worship and most reverentially adore Lord Ram who has these magnificent qualities (56).

सर्वाधिपत्यं समराङ्गधीरं सत्यं चिदानन्दमयं स्वरूपम् ।

सत्यं शिवं शान्तमयं शरण्यं सनातनं राममहं भजामि ॥५७॥

57. He is the Lord of the entire creation—both the animate as well as the inanimate worlds. He is bold, unrelenting, serious and steadfast during war and never turns his back in the face of adversities (i.e. who never shirks from his responsibilities and obligations). He is an embodiment of the ultimate Truth and absolute Reality. He is a personification of eternal and supreme bliss, joy and happiness. He is the truthful Lord Shiva (representing such glorious virtues as truth and auspiciousness, peace and tranquility, wisdom and enlightenment, renunciation of and detachment from all worldly attachments, etc.) personified. He accepts anyone who comes to seek his (Lord Ram's) refuge and protection, as he is renowned as the benevolent,

magnanimous and benign benefactor of all those who have taken his refuge (irrespective of who that person is and what are his misdeed and sins). He is called 'Sanatan' (because he is eternal, perpetual, everlasting, primeval, ancient, traditional and absolutely truthful—a reference to Brahma the creator and to Vishnu the sustainer, nourisher and protector of creation).

I reverentially worship and most respectfully adore Lord Ram who is endowed with these eclectic virtues and qualities (57).

कार्यं क्रियाकारणमप्रमेयं कविं पुराणं कमलायताक्षम् ।

कुमारवेद्यं करुणामयं तं कल्पद्रुमं राममहं भजामि ॥५८॥

58. He personifies the cause of all actions and deeds, as well as the reward of such actions or deeds undertaken by a creature. He is boundless, limitless, measureless and without any parameters, as well as is the one who cannot be proved by worldly logics and rationales. He is a 'Kavi' (a poet) par excellence¹. He is the most ancient and primary Lord mentioned in the Purans (the legendary ancient mythological histories of Hindus). He is the one with enchanting broad lotus-like eyes.

I devotedly worship and most reverentially adore Lord Ram who is worthy to be honoured, adored and revered as well as contemplated and meditated upon by exalted sages and seers such as Sanat Kumar and others, who is like an image or personification of the grand virtue of mercy, grace, kindness and compassion, and who is like the Kalpa-tree (the ever-green, all wish-fulfilling tree of Gods) for the purpose of fulfillment of all my wishes as well as the wishes of other devotees (58).

[Note—¹The word *Kavi* literally means a poet, but it implies anyone who is well-lettered, scholarly and erudite; one who is well spoken and an expert with words; one who is learned in the scriptures because the latter have been composed in poetry form comprising of verses called Chandas. These Chandas are poetical forms of composition, having a fixed pattern of lines and the number of letters or words to each line. The Vedas and other scriptures have all been composed in this form.]

त्रैलोक्यनाथं सरसीरुहाक्षं दयानिधिं द्वन्द्वविनाशहेतुम् ।

महाबलं वेदनिधिं सुरेशं सनातनं राममहं भजामि ॥५९॥

59. He is the Lord of the three worlds (i.e. the terrestrial, the celestial and the subterranean worlds; or the entire creation). He is lotus-eyed. He is an ocean of mercy, grace, kindness and compassion. He is the destroyer of all confusions, perplexities, doubts and confoundedness pertaining to the artificial and deluding world.

I devotedly worship and most reverentially adore Lord Ram who is the most gallant, valiant, strong and powerful Lord in creation, who is like a treasury of the knowledge contained in the Vedas (i.e. he is an expert in the tenets, axioms, maxims and precepts of the scriptures), who is the Lord of Gods, and who is the Sanaatan Being (i.e. one who is eternal, perpetual, everlasting, primeval, ancient, traditional and absolutely truthful in this creation marked by delusions and falsehoods) (59).

वेदान्तवेद्यं कविमीशितारमनादिमध्यान्तमचिन्त्यमाद्यम् ।

अगोचरं निर्मलमेकरूपं नमामि रामं तमसः परस्तात् ॥६०॥

60. He can be realised, known and understood only through the knowledge given by Vedanta (Upanishads). He is a poet par excellence (i.e. he is most erudite, scholarly, wise and well-lettered). He is endowed with grand virtues and qualities that bestow him with a matchless fame, majesty, power and glory. He is without a beginning,

middle or an end (being eternal, infinite and imperishable). He is beyond the scope of comprehension (i.e. he is beyond the imagination, reach and grasp of the mind and intellect). He is the most ancient, first and primary Purush (i.e. the first male aspect of creation known as the Viraat Purush). He is not the object that can be visualized, understood, grasped or perceived by the creature through any of its sense organs. He is pure, immaculate, uncorrupt and without any blemishes and taints of any kind. He is one, non-dual and without a parallel or comparison. He is the one who is without any hint of darkness caused by ignorance and delusions (i.e. he is most wise, sagacious, erudite, knowledgeable and enlightened).

I most devotedly bow and reverentially honour Lord Ram who has these eclectic and noble virtues and qualities in him (60).

अशेष—वेदात्मकमादिसंज्ञमजं हरिं विष्णुमनन्तमाद्यम् ।

अपासंवितासुखमेकरूपं परात्परं राममहं भजामि ॥६१॥

61. He has no remainders or fractions (because he is unfractionable, immutable and indivisible whole). He is an image or a personification of all the Vedas and other holy scriptures. He has the unique attribute of not having any beginning or a birth (because he is eternal, imperishable, infinite, everlasting, and present even before and after everything that exists came into being or would end). He is known by different names such as Hari and Vishnu and numerous other names; (in fact, all names of all the creatures in this world are but the different names of the same Lord). He is the primary Purush (who was there even at the beginning of creation, and in fact was the creator of this creation as the Viraat Purush, the macrocosmic gross body of the supreme creator known as Brahm). He is fathomless, measureless and infinite, having no end (i.e. it is not possible to see his 'other end'). He is an image of truthful knowledge, erudition and wisdom, as well as of beatitude and felicity. He is the best amongst those who are exalted ones, and is the Supreme Being in the creation.

I devotedly worship and most reverentially adore Lord Ram who is endowed with these eclectic virtues and divine qualities (61).

तत्त्वस्वरूपं पुरुषं पुराणं स्वतेजसा पूरितविश्वमेकम् ।

राजाधिराजं रविमण्डलस्थं विश्वेश्वरं राममहं भजामि ॥६२॥

62. He is the essence of metaphysics and spiritualism, and personifies these virtues. He is the first and most ancient male, called the Purush (or the Viraat Purush), mentioned in the Purans (mythological histories). He is the one who illuminates the whole world by his astounding glory and the splendour of the divine light radiating out from him much like the celestial Sun lighting up the entire world with its brilliant light. [Here, 'light' represents consciousness, knowledge, intelligence and wisdom as well as the various noble, righteous and auspicious virtues that the Lord stands for.] He is the supreme Lord and Emperor of all the creatures (i.e. of the entire creation). He is irrefutably and unambiguously present in the entire world, forming its core and around whom all life forms revolve, much like the Sun in the sky which forms the axis around which all the planets revolve and on which the life in this visible world depends. He is the Lord of the world as well as of its patron Gods.

I devotedly worship and most reverentially adore Lord Ram who is endowed with these eclectic virtues and divine qualities (62).

लोकाभिरामं रघुवंशनाथं हरिं चिदानन्दमयं मुकुन्दम् ।

अशेषविद्याधिपतिं कवीन्द्रं नमामि रामं तमसः परस्तात् ॥६३॥

63. He grants happiness and joys to the world, enchants it and keeps it enthralled by his stupendous and magnificent beauty and charm (i.e. not the physical one so much as his uncountable glories, auspicious virtues and noble qualities which are matchless and most astounding). He is the Lord of king Raghu's race. He is known as Hari (one of the numerous names of Lord Vishnu) who is an image of eternal and perpetual bliss and happiness as well as pure and holy as the lotus flower. He does not leave behind any remainders or fractions, as he is whole, complete and indivisible. He is an exalted 'Kavi', literally a poet but implying that the Lord is well-lettered, scholarly and erudite; one who is well spoken, an expert orator and an expert with words; one who is learned in the scriptures (because the latter have been composed in poetry form comprising of verses called Chandas which are poetical forms of composition, having a fixed pattern of lines and the number of letters or words to each line; the Vedas and other scriptures have all been composed in this form). He is free from the darkness induced by ignorance and delusions.

I devotedly worship and most reverentially adore Lord Ram who is endowed with these eclectic virtues and divine qualities (63).

योगीन्द्रसङ्घैश्च सुसेव्यमानं नारायणं निर्मलमादिदेवम् ।

नतोऽस्मि नित्यं जगदेकनाथमादित्यवर्णं तमसः परस्तात् ॥६४॥

64. He is the best amongst Yogis (ascetics and hermits). He is served (i.e. worshipped and honoured) by great and noble souls (such as sages, seers, hermits, ascetics, friars and monks). He is known as Narayan, the ancient and primeval Lord of creation. [Narayan is one of the numerous names of Vishnu]. He is immaculate, pure and uncorrupt. He is the ancient and traditional Lord of creation who was present in the very beginning of it. He is the one who is perpetual, constant, consistent, eternal, absolute, permanent, ceaseless, immutable, invariable, steady and unchanging. He is the only Lord of the world and has a radiant countenance and splendorous glory which resembles the splendour and radiance of the Sun. He is beyond the reach of the shadow of darkness represented by ignorance and delusions.

I devotedly worship and most reverentially adore Lord Ram who is endowed with these eclectic virtues and divine qualities (64).

विभूतिदं विश्वसृजं विराजं राजेन्द्रमीशं रघुवंशनाथम् ।

अचिन्त्यमव्यक्तमनन्तमूर्तिं ज्योतिर्मयं राममहं भजामि ॥६५॥

65. He bestows 'Vibhuti' (majesty, glory, pomp, favourable circumstance, magnificence, fame, powers, prosperity, fortunes, grandeur and other noble, praise worthy and divine faculties) to his devotees. He is the creator and progenitor of the whole cosmos. He is the final resting place for the creature and its soul. He is the Emperor of kings, and is the Lord of Raghu's clan. He is beyond the imagination and thought processes of the mind and intellect; the latter cannot fathom and understand him. He is an entity that is beyond description or narration (i.e. the faculty of speech is too incompetent to describe or tell anything about him), and this entity has no end (being infinite and eternal). He is self-illuminated and self-radiant (i.e. he is a holy image from which effuses an ethereal light of divinity, holiness, sublimity and piety)

I devotedly worship and most reverentially adore Lord Ram who is endowed with these eclectic virtues and divine qualities (65).

अशेष—संसार—विकारहीनमादित्यगं पूर्णसुखाभिरामम् ।

समस्तसाक्षिं तमसः परस्तान्नारायणं विष्णुमहं भजामि ॥६६॥

66. Nothing remains in this world if he is removed from it. [That is, if the Lord is removed from this world, it becomes lifeless and useless, because the Lord is the soul and life of this world.] He is free from all the faults, shortcomings, blemishes, vices and evils associated with this world. He is like the glorious and splendorous Sun. He is the one who bestows all kinds of happiness, joy and bliss to the creature (or his devotees) in this world. He is the eternal and truthful witness for all and for all that is happening. [That is, it is impossible to hide anything from him; no one can deceive the Lord.] He has no stain of darkness symbolizing ignorance and delusions or any other faults associated with this artificial and deluding world. He is an incarnation of Lord Narayan Vishnu.

I devotedly worship and most reverentially adore Lord Ram who is endowed with these eclectic virtues and divine qualities (66).

—
मुनीन्द्रगुह्यं परिपूर्णकामं कलानिधिं कल्मषनाशहेतुम् ।
परात्परं यत्परमं पवित्रं नमामि रामं महतो महान्तम् ॥६७॥

67. He is so mysterious, subtle and enigmatic that only senior and scholarly sages and seers, who are sufficiently wise, erudite and enlightened, are able to know him, are able to realise him and experience his presence, as well as witness his truthful metaphysical essence, divine nature and ethereal sublime form. He is fully contented and fulfilled himself as well as the fulfiller of all the wishes, desires, expectations and aspirations of his devotees. He is a treasure of all arts, crafts, skills and expertise that exist in this creation. He is the destroyer or causes the destruction of all sins and their integrated accumulated effects. He is the best amongst the most exalted ones, and the one who is supreme and transcendental. He is most pure, immaculate, uncorrupt and holy. He is the greatest amongst the great, noblest amongst the noble, the best amongst the good, and first amongst equals. He is a great, most exalted, supreme, transcendental, ethereal, holy, eclectic and divine being who is a Supreme Being in this creation and greater than the greatest of Lords

I devotedly worship and most reverentially adore Lord Ram who is endowed with these eclectic virtues and divine qualities (67).

—
ब्रह्मा विष्णुश्च रुद्रश्च देवेन्द्रो देवतास्तथा । आदित्यादि—ग्रहाश्चैव त्वमेव रघुनन्दन! ॥६८॥

68. Oh Raghunandan (Lord Ram)! It is you who are present in myriad forms such as that of Brahma (the creator), Vishnu (the sustainer and protector), Shiva (the annihilator and concluder), Indra (the king of Gods), all other Gods, the Sun and other planets of the solar system, and etc. (68).

[Note—This verse implies that all the Gods are none other but Lord Ram who has assumed as many in order to carry on with the myriad functions of creation.]

—
तापसा ऋषयः सिद्धाः साध्याश्च मरुतस्तथा । विप्रा वेदास्तथा यज्ञाः पुराण—धर्मसंहिताः ॥६९॥

69. You are a personification of those who do severe Tapa (austerities and penances) as well as of the ancient Rishis (sages and seers) and Siddhas (mystics, the expert ones, the attained ones). You are the object of worship and contemplation. You personify the various Maruts (i.e. the vital life giving wind forces), the Brahmins (the learned and wise class of people), the Vedas (representing the scriptures), the Yagyas (religious sacrifices), the Purans (the ancient mythological histories), the various other treatises called 'Sanghitas of Dharma' (i.e. the explanatory volumes which elaborate

upon the numerous doctrines of righteousness, probity, propriety and noble conduct as enshrined in the different scriptures) (69).

[Note—There is nothing astonishing in it because Lord Ram is Brahm personified, and everything in this creation is governed by Brahm; everything in this creation has Brahm as its integral part; everything in this creation is one or the other manifestation or revelation of Brahm and his astounding powers and potentials.]

—
वर्णाश्रमास्तथा धर्मा वर्णधर्मास्तथैव च । यक्ष—राक्षस—गन्धर्वा दिक्पाला दिग्गजादयः ॥७०॥

70. You have revealed yourself in myriad of forms in this creation, such as in the form of the four ‘Varnas’¹ (i.e. the four segments in which the society has been classified by the scriptures; these classes are Brahmins, Kshatriyas, Vaishyas and Shudras), the four ‘Ashrams’² (i.e. the four periods of life in which a person’s age is divided into; Brahmacharaya, Grishastha, Vaanprastha and Sanyas) as well as in the form of ‘Dharma’ (i.e. the eclectic virtues of righteousness, auspiciousness, probity, propriety, noble and virtuous conduct and thoughts), in the form of the ‘Yaksha’ (a form of semi-God who is the guard of the celestial treasury of Gods), in the form of ‘Raakshas’ or demons, in the form of ‘Gandharva’ (a semi-God who is the celestial musician of the Gods and considered to be great at playing tricks), in the form of ‘Digga’ (the eight mythological elephants who hold the earth aloft at eight strategic points; the word refers to one who is matchless in his stupendous valour, strength, courage, steadfastness and prowess), and in the form of the ‘Digpaals’ (the custodians of the corners of the world) etc.

All of them are but various manifestations of your one, indivisible, single self, i.e. they are none other but you in all these myriad forms that you have chosen to assume (70).

[Note—¹The four *Varnas*—The Hindu society has been divided into four sections or classes by ancient sages to regulate its functioning by delegation of authority and clearly specifying the jobs each section is supposed to do to maintain order and system in the world, to prevent overlapping of functions and avoid anarchy and chaos. These four sections are— (a) Brahmins—the learned and teaching class; a wise one well-versed in the knowledge of the ultimate Truth about the supernatural Being called Brahm. They also presided over religious functions as priests, because these functions were central to life in the Vedic period; (b) Kshatriyas—they were the warrior, fighting, kingly class. They were assigned the job of giving protection to the society, dispensing justice and maintaining general law and order. (c) Vaishyas—they were the trading and farming class responsible for commerce and wealth generation. They provided for the necessities for a comfortable life. And finally (d) the Shudras —the service class of people whose main function was to free the other three classes from the humdrums of daily chores and concentrate their energies to the particular jobs assigned to those classes to which they belonged.

These four classes of the human race were created from the single father, the Viraat or Brahma. Their origins are indicative of the different jobs that they were assigned so as to enable the creator perform the task of governance just like a king assigns separate jobs to his different ministers. But it must be clearly understood here that each class of the human race was like a part of the body of the Supreme Being, and even as a man feels disfigured and handicapped as well as feels the pain equally if his leg is cut off from the rest of his body as he feels when his

arm or head is severed, the Lord feels betrayed and hurt when even one of his sons is subjected to humiliation and pain. The four classes had specific jobs cut for them so that the society could function smoothly.

The Brahmins have their origin from the mouth of Brahma the creator. Since the mouth is used to give advice and teach others, the primary job of the Brahmins was to act as moral guide to their brethrens. The four Vedas, which are repository of all knowledge that exist, were also created from the mouth of Brahma; hence these Brahmins were considered most wise and learned. The arms are metaphors for strength and powers; they are used to protect and help others. Hence, the Kshatriyas, who were created from the arms of Brahma, were those sons of his who would give the needed protection and security to their other brethrens. In order to feed his creation, Brahma had to toil and labour to provide for the maintenance and financial and material well being of the society for merely teaching and protecting would not suffice without some one to take care of the other necessities of life. So he created the Vaishyas from his thighs, symbolising labour, to pick up the mantle of mundane affairs of life. But there must be someone who would do the daily chores, such as tilling the fields, doing the harvesting, washing and cleaning, and all other such odd jobs. This was assigned to the Shudras created from Brahma's feet symbolising service.

None of these classes were meant to be inferior or superior to one another; they were all parts of the body of the same Brahma. In fact, the leg bears the burden of the body; just imagine what would have happened if Brahma had not created anyone from his legs? How would the Brahmin walk, how would the Kshatriya fight, and how would the Vaishya do his commercial activities if he could not walk? Similar arguments can be applied to other classes. See also Brihad Aranyak Upanishad, 1/4/11-15, and Aitereyo-panishad, 1/1/4.

²The four *Ashrams*—The life of a Hindu man is divided into four segments or Ashrams—(a) Brahmacharya —this is the 1st phase of life in which a person studies the scriptures under the tutelage of a wise teacher. This phase of life is marked by austerities, keeping of vows, observing celibacy, abstinence and continence as well as leading a regimental life style, (b) Grihastha —when a person has studied and prepared himself to face the world, he comes back to his house and enters the 2nd phase called Grihastha Ashram which is a householder life. He marries, raises a family, produces wealth and helps to carry forward the cycle of creation. This is the most important and enjoyable phase as well as the most tough one because on the one hand there are the comforts and pleasure of the world to be enjoyed, and on the other hand there are the various tribulations and miseries of a family life and dealings with this deceptive world with all their accompanying horrifying problems, (c) Vanprastha —this is the 3rd phase when a man hands over the responsibilities of the world to his heirs and renounces his attachments to the house as well as the world, and heads for the forest, leaving the home for his next generation. It is now that he goes on pilgrimage and prepares for the final stage of his life, and (d) Sanyas —this is the 4th and last stage of life when there is complete cutting off of all the ties with the world, spending time in contemplation and meditation, living a life of total renunciation and begging for food, and single mindedly aiming for emancipation and salvation. This phase of Sanyas also has many stages depending upon the spiritual elevation and accomplishments of the

aspirant, viz. Kutichak, Bahudak, Hansa, Paramhans, Turiyatit and Avadhut.

These four Ashrams, their characteristic features and virtues are described in detail in an Upanishad called 'Ashramo-panishad' belonging to the Atharva Veda tradition.]

सनकादि—मुनिश्रेष्ठास्त्वमेव स्युपुङ्गव! । वसवोऽष्टौ त्रयः काला रुद्रा एकादश स्मृताः ॥७१॥

71. Sages Sankadi and others who are the best amongst the sages, the eight Vasu¹, the three Kaals² and the eleven Rudras³ are none other but you in those forms (71).

[Note--¹The eight *Vasus* are the semi-Gods who symbolise the various types of assets needed to sustain this world. They therefore represent such assets as jewels, precious stones and gems, gold and other forms of wealth and property. Vasus also refers to the fire and water elements as well as their grosser forms as the terrestrial fire and water bodies such as ponds and lakes; to the virtue of radiance, splendour and glory; to the ray of light; to Kuber (the treasurer of Gods), Shiva, Sun, Vishnu, and a simple and pious gentleman.

These eight Vasus are the patron Gods who provide succour and a dwelling place for the whole creation. They symbolise those primary necessities of life without which existence is not possible. They are— (i) Kuber (the God of wealth and prosperity), (ii) the Sun God (who provides energy and food) and his rays and radiance (i.e. sunlight and the energy that it provides), (iii) Shiva (the concluder or annihilator of the creation), (iv) Vishnu (the sustainer), (v) the Water God (called Varun), (vi) the Fire God (called Agni), (vii) any body of water such as a pond, a river etc., and (viii) holy and pious people (who give advice and guidance to the creatures of the creation). According to Brihad Aranyak Upanishad 3/9/3, the Vasus are the following-. Fire, Earth, Air, Antariksha (the space of the solar system), Aditya (Sun), Duloka (heavens), the Moon, and the Nakshatras (the stars and the planets).

According to Purans, the eight Vasus are the following—Dhruv, Dhar, Som, Aap, Anil, Anal, Pratush, and Prabhaas.

See also Chapter 2, Canto 5, verse no. 31.

²The three *Kaals* are the three periods of time—the past, the present and the future.

³The eleven *Rudras* are the various manifestations of Lord Shiva; the literal meaning of the word Rudra is 'anger, wrath, vengefulness, vehemence, furious, rage'. These eleven Rudras are the following—(i) Mannu, (ii) Manu, (iii) Mahinas, (iv) Mahaan, (v) Shiva, (vi) Ritdwaj, (vii) Ugraretaa, (viii) Bhav, (ix) Kaal, (x) Vamdeo, and (xi) Dhritvrat. The eleven Rudras appear in Rig Veda 1/43/1, and Taittiriya Brahmin 3/4/9/7. They are regarded as the father of the Wind God or the Maruts (Rig Veda, 2/33/1). The word Rudra means one who is angry, terrible and wrathful. Amongst the Rudras, Lord Shiva is regarded as the most senior and enlightened.

The eleven Rudras according to Vishnu Puran (1/1/15) are the following—Har, Bahuroop, Trayambak, Aparajeet, Shambhu, Vrishakapi, Kapardi, Raivat, Mrigvyaadh, Sharva, and Kapaali.]

तारका दशदिक् चैव त्वमेव स्युनन्दन! । सप्तद्वीपाः समुद्राश्च नागा नद्यस्तथा द्रुमाः ॥७२॥

72. Oh Raghunandan (Lord Ram)! The stars, the ten directions, the seven continents, the oceans, the mountains, the rivers, the trees, the snakes and other reptiles—all of

them are your varied forms (or you have revealed yourself in all these myriad forms) (72).

—
स्थावरा जङ्गमाश्चैव त्वमेव रघुनायक ! । देव—तिर्यङ्—मनुष्याणां दानवानां तथैव च ॥७३॥

73. Oh Raghunayak (literally, the leader of the king Raghu's race)! The animate as well as the inanimate world, the Gods, the animal and the birds, the demons, the humans—all of them are nothing else but your various forms (73).

माता पिता तथा भ्राता त्वमेव रघुवल्लभ ! । सर्वेषां त्वं परं ब्रह्म त्वन्मयं सर्वमेव हि ॥७४॥

74. Oh the dear Lord of the Raghu's race (i.e. Lord Ram)! You are the father, the mother, and the brother of all. You are the supreme transcendental Brahm personified. The whole world is pervaded by you and you encompass it from all the sides (i.e. you are omnipresent and you uniformly pervade in this world, being present both inside it as well as outside it) (74).

[Note--To understand this latter concept, we can visualise a sponge or a ball of fluffy cotton in water. The water is present both inside as well as outside the sponge or the ball of cotton.]

—
त्वमक्षरं परं ज्योतिस्त्वमेव पुरुषोत्तम ! । त्वमेव तारकं ब्रह्म त्वतोऽन्यत्रैव किञ्चन ॥७५॥

75. You are the imperishable One who does not decay, disintegrate, crumble or come to an end at any point of time. You are the supreme transcendental Being who is self-illuminated and self-radiant. You are indeed the best and most exalted Male (Purushottam) in creation. [This is a reference to the Viraat Purush, or the macrocosmic gross body of the supreme Brahm from whom the rest of the visible creation was revealed.]

You are the 'Tarak Brahm' (i.e. the supreme transcendental Being who provides liberation and deliverance to the soul of the creature from this humdrum, artificial, deluding and ignorant ridden world of miseries and torments associated with an endless cycle of birth and death, and provide it with emancipation and salvation). There is nothing in this creation that is not you; you pervade throughout the length and breadth of this creation (75).

—
शान्तं सर्वगतं सूक्ष्मं परं ब्रह्म सनातनम् । राजीवलोचनं रामं प्रणमामि जगत्पतिम् ॥७६॥

76. He who is calm, peaceful, serene and tranquil by temperament, is all-pervading, all-incorporating and omnipresent, is minute, subtle, esoteric, enigmatic and mystical in nature and form, is the traditionally and universally truthful, eternal, perpetual, primeval, and most ancient supreme transcendental Brahm, is lotus-eyed, and is the Lord of the whole world—I most reverentially and respectfully bow and pay my obeisance to Lord Ram who has these eclectic virtues and qualities' (76).

व्यास उवाच—

ततः प्रसन्नः श्रीरामः प्रोवाच मुनिपुङ्गवम् । तुष्टोऽस्मि मुनिशार्दूल ! वृणीष्व वरमुत्तमम् ॥७७॥

77. Sage Veda Vyas said, 'When Narad had prayed to Lord Ram as above, the latter was very pleased with him and said—'Oh the most exalted sage (Narad), oh the lion amongst sages (i.e. one who is like a king amongst his peers)! I am very pleased with you. Ask for the boon that you desire' (77).

नारद उवाच—

यदि तुष्टोऽसि सर्वज्ञ! श्रीराम करुणानिधे! । त्वन्मूर्तिं दर्शनेनैव कृतार्थोऽहं च सर्वदा ॥७८॥

78. Sage Narad replied, 'Oh Lord Ram! You are all-knowing, omniscient, merciful, kind, graceful and compassionate. If you are indeed pleased with me then I am grateful and privileged in having your 'Darshan' (i.e. having a divine, holy, august and auspicious view or sight) (78).

—
धन्योऽहं कृतकृत्योऽहं पुण्योऽहं पुरुषोत्तम! । अद्य मे सफलं जन्म जीवितं सफलं च मे ॥७९॥

79. Oh Purushottam (the best and the most exalted amongst men—i.e. Lord Ram)! By having your 'Darshan' today, I feel extremely thankful, honoured, privileged, grateful and fortunate. I feel that my birth has been fully rewarded, and my life has been successful (79).

—
अद्य मे सफलं ज्ञानमद्य मे सफलं तपः । अद्य मे सफलं कर्म त्वत्पादाम्भोज—दर्शनात् ॥८०॥

80. By having you're the 'Darshan' of your august and holy feet today, all the virtuous deeds that I have done, all the knowledge and education that I have acquired, all the severe sufferance, austerities and penances etc. that I have done, are duly rewarded and deemed to be fully successful. [That is, the best reward that one can ever expect by doing anything auspicious and holy is to have a communion with the supreme Lord Ram, which has been made available to Narad. No reward can match this privilege. There is nothing more that he expects.] (80).

—
अद्य मे सफलं सर्वं त्वन्नामस्मरणान्नता । त्वत्पादाम्भोरुहद्वन्द्वं सद्भक्तिं देहि राघव! ॥८१॥

81. Oh Raghav (Lord Ram)! Everything is successful for me and I am amply rewarded today for having remembered your holy name. I do not want anything more except having steady and true devotion and submission for your holy and august feet. Hence oh Lord, if you are indeed pleased with me, then grant this boon to me' (81).

—
ततः परमसम्प्रीतः स रामः प्राह नारदम् ।

श्रीराम उवाच

मुनिवर्य्य! महाभाग! मुने! त्विष्टं ददामि ते । यत्त्वया चेप्सितं सर्वं मनसा तद् भविष्यति ॥८२॥

82. Thence, Lord Ram was extremely pleased with Narad and said to him, 'Oh the most exalted sage, oh the most fortunate one! I grant you your desired boon—whatever you wish now, or will ever wish in future, shall be made available to you (i.e. all your desires will be fulfilled)' (82).

नारद उवाच

वरं न याचे रघुनाथ युष्मत्पादाब्जभक्तिः सततं ममाऽस्तु ।

इदं प्रियं नाथ! वरं प्रयाचे पुनः पुनस्त्वामिदमेव याचे ॥८३॥

83. Sage Narad replied, 'Oh Raghunath (Lord Ram)! I do not ask you for any boon except that I must have sincere, unfaltering and steady devotion in your lotus-like holy feet. Oh Lord! This is the only boon that I repeatedly seek from you' (83).

व्यास उवाच

इत्येवमीडितो रामः प्रादात्तस्मै वरोत्तमम् । वीरो राम महातेजाः सच्चिदानन्दविग्रहः ॥८४॥

84. Sage Veda Vyas said, 'In the above way, when Narad had prayed to Lord Ram who is most valiant and brave, most glorious, majestic, radiant and splendorous with his divine holiness, and who is an image of truthful and eternal bliss and felicity,

granted Narad with the excellent boon that the latter desired to have granted (which was to have steady and unfaltering devotion for the Lord and submission in his holy and august feet) (84).

—
अद्वैतममलं ज्ञानं त्वन्नामस्मरणं तथा । अन्तर्दधे जगन्नाथः पुरतस्तस्य राघवः ॥८५॥

85. After blessing Narad with the divine awareness of the ethereal supreme and transcendental entity called Brahm, and granting him the boon of having eternal devotion for his holy and divine name, Lord Ram vanished from sight of Narad (85).

—
इति श्रीरघुनाथस्य स्तवराजमनुत्तमम् । सर्वसौभाग्य—सम्पत्तिदायकं मुक्तिदं शुभम् ॥८६॥

86. This excellent hymn dedicated to the Lord who is the most exalted One in the race of king Raghu (of Ayodhya), a hymn known as ‘Stavaraj’, has the stupendous and mystical potential of bestowing all sorts of imaginable good fortunes and prosperity, all round welfare and auspiciousness, as well as emancipation and salvation to the devotee (86).

—
कथितं ब्रह्मपुत्रेण वेदानां सारमुत्तमम् । गुह्याद् गुह्यतमं दिव्यं तव स्नेहात्प्रकीर्तितम् ॥८७॥

87. This divine and holy Stotra (Ram-Stavaraj) was pronounced by none other than the son of Brahma (i.e. sage Narad). It contains the essence of all the Vedas and their secret knowledge. I have brought it to light out of affection for you (87).

—
यः पठेच्छृणुयाद्वाऽपित्रिसन्ध्यं श्रद्धयाऽन्वितः । ब्रह्महत्यादि—पापानि तत्समानि बहूनि च ॥८८॥

स्वर्णस्तयं सुरापानं गुरुतल्पगतिस्तथा । गोवधाद्युपपापानि अनृतात् सम्भवानि च ॥८९॥

88-89. Benefits—Those faithful devotees who will read, recite or hear this Stotra (i.e. Ram-Stavaraj) three times in the day (i.e. in the morning, during the noon and in the evening hours), shall be freed from the evil effects of all small or big sins and misdeeds committed by them, such as the killing of a Brahmin, theft of gold, drinking wine, sitting on the seat of the teacher, killing of a cow, and telling a lie. All such sins, misdeeds and misdemeanors and their incumbent punishments shall be remitted or pardoned or literally destroyed or eliminated by the good affects of this Stotra (88-89).

[Note—It is a standard practice in ancient literature that such blanket pardoning is prescribed for all sinners who have devotion for a particular chosen deity to whom a specific hymn is dedicated. This does not give them the license to commit murder and slaughter of innocents, felony and larceny, indulgence and debauchery, and sins of all other imaginable kinds, with the assurance that forgiveness is easy, automatic and round the corner. No, never. The idea is that if one had committed these sins and sincerely regrets for them, then some avenue must be open for their redemption, for to err is human. If a man sincerely wishes to repent and mend himself, then he should be given a chance, otherwise he would go on committing the same horrific act over and over again because there is no way to undo his mistakes.]

—
सर्वैः प्रमुच्यते पापैः कलायुत—शतोद्भवैः । मानसं वाचिकं पापं कर्मणा समुपार्जितम् ॥९०॥

90. In a similar way, a person is able to get rid of all his sins committed over numerous ‘Kalpas’ (eras; a long period of time) by his body, mind or speech along with their accumulated punishments (if he follows the directions given above and has devotion for Lord Ram) (90).

[Note—1 *Kalpa* is equivalent to 1 day in the creator Brahma's total life span of 100 years. Each *Kalpa* consists of 1000 four-Yug cycles, called the 'Chatur Yugs'. The visible creation's one life-span consisting of this four-Yug cycle called the 'Chatur Yugs' is this one day of Brahma. At the end of this Chatur Yug, there would be dissolution or the so-called 'dooms-day' when everything would be submerged in water. Then the next phase of life consisting of the next four-Yug cycle would start.

Each *Kalpa* (i.e. 1 day of Brahma's life) is also divided into 14 *Manvantars*, and each such *Manvantars* is ruled by one Manu, the first male. Therefore, 1 Manu rules over 71.42 (1000/4) four-Yug cycles.

We are now passing through the 51st year of Brahma's life, and our present Kaliyug belongs to the 7th *Manvantar* out of the 14 *Manvantars*, and its Manu is called Vaivasvata, and it is 28th Kaliyug of the four-Yug cycle.

In human years, 1 *Kalpa* is equivalent to 4.32 billion (4.32×10^9) years.]

— श्रीरामस्मरणेनैव तत्क्षणान् नश्यति ध्रुवम् । इदं सत्यमिदं सत्यं सत्यमेतदिहोच्यते ॥९१॥

रामं सत्यं परं ब्रह्म रामात् किञ्चिन्न विद्यते । तस्माद्रामस्वरूपं हि सत्यं सत्यमिदं जगत् ॥९२॥

91-92. All the sins and their accumulated bad effects will be immediately destroyed by the mere remembrance of Lord Ram's holy and divine name (with sincerity, earnestness and devotion). This is undoubtedly an absolute, truthful and irrefutable certainty.

Besides this, it is also an absolute truth that Lord Ram is the eternal, truthful, supreme, transcendental and the ultimate Brahm. There is nothing that is not Lord Ram (or there is nothing in this creation that is besides Lord Ram, or which is not pervaded by Lord Ram, or which is not an image of Lord Ram, or which is different from and independent of Lord Ram). Hence, this world appears to be true because of the fact that Lord Ram is the ultimate Truth, and this world is a manifestation of this Lord known as Brahm¹ (91-92).

[Note--¹That is, we can see the world as a reality because Lord Ram, who is none else but the Tarak Brahm himself, is real, and this world is only a manifestation of that reality. For example, we see the tree because it is there, it is real. And it is real because it is another manifested form of Brahm who is real and true. Had it not been so, we wouldn't have seen the tree because it wouldn't have been there in existence in the first place. In short, the very existence of the visible world is because of Brahm whose manifestation is Lord Ram. This world is a visible proof of the existence of Brahm represented by his personified form as Lord Ram.]

सूत उवाच _

श्रीरामचन्द्र रघुपुङ्गव राजवर्य! राजेन्द्र राम रघुनायक राघवेश! ।

राजाधिराजरघुनन्दन! रामचन्द्र! दासोऽहमद्य भवतः शरणागतोऽस्मि ॥९३॥

93. Sage Sut said, 'Oh Lord Ramchandra, oh the most exalted in the race of king Raghu, oh the most exalted king, oh the Emperor amongst kings, oh Lord Ram the leader of Raghu's race, oh the King of kings, oh an exalted son of the Raghu's race Lord Ram! I am your humble servant (i.e. your devotee) and have taken refuge/shelter in your holy feet (93).

— वैदेही—सहितं सुरद्रुमतले हेमैर्महामण्डपे मध्ये पुष्पकृतासने मणिमये वीरासने संस्थितम् ।

अग्रे वाचयति प्रभञ्जनसुते तत् त्वं मुनीन्द्रैः परं व्याख्यातं भरतादिभिः परिवृतं रामं भजे श्यामलम् ॥९४॥

94. Accompanied by Vaidehi (Sita), Lord Ram is seated on a throne covered with flowers under the Kalpa tree (the evergreen celestial tree of Gods) in a golden pavilion. Hanuman is standing in front of him singing the sacred hymns which have been composed by erudite sages and seers and highlights the knowledge of the supreme Brahm. Lord Ram is surrounded by Bharat and other brothers. He is dark complexioned. I adore and worship Lord Ram in this form (94).

रामं रत्न—किरीट—कुण्डलयुतं केयूर—हारान्वितं सीताऽलङ्कृत—वामभागममलं सिंहासनस्थं विभुम् ।

सुग्रीवादि—हरीश्वरैः सुरगणैः संसेव्यमानं सदा विश्वामित्र—पराशरादि—मुनिभिः संस्तूयमानं प्रभुम् ॥९५॥

95. I praise and honour Lord Ram who has a crown and a tiara made of precious stones/gems on his head, wears ear-rings, and has arm-bands on his arms and a necklace around his neck. Sita adorns (i.e. is seated on) his left side. He is seated on a magnificent and gleaming throne, is known by the name of Vibho (an epithet of Vishnu meaning omnipresent, magnanimous, eternal, almighty and majestic Lord), is served by Sugriv and other monkeys, and is praised and honoured by sages such as Vishwamitra and Parashar (95).

सकल—गुण—निधानं योगिभिः स्तूयमानं भुज—विजित—समानं राक्षसेन्द्रादिमानम् ।

महितनृपभयानं सीतया शोभमानं स्मर हृदय विमानं ब्रह्म रामाभिधानम् ॥९६॥

96. Lord Ram is a treasury of all auspicious virtues and noble characters, is revered, honoured and praised by the Yogis (ascetics/hermits), was able to vanquish and crush the pride, haughtiness and arrogance of the demons by the dint of his matchless valour, stupendous strength and astounding powers, is privileged to have Sita by his side, is the one who trounces the pride of kings, is the one who humbles the heart of Kamdeo-cupid (i.e. he makes Kamdeo feel shy and humiliated when the latter compares himself with Lord Ram's enchanting spell), and who is the supreme Brahm himself with the divine name of 'Ram'. I bow before such a Lord Ram most reverentially and devotedly (96).

रघुवर! तव मूर्तिर्मांसे मानसाऽब्जे नरकगतिहरं ते नामधेयं मुखे मे ।

अनिशमतुलभक्त्या मस्तकं त्वत्पदाब्जं भवजलनिधिमनं रक्ष मामार्तबन्धो! ॥९७॥

97. Oh Raghuvar (Lord Ram)! Let your enchanting and bewitching image be permanently enshrined in my heart, let your holy and divine name which has the potential to destroy the chances of going to hell be ever present in my mouth (i.e. let me constantly, persistently and consistently chant or repeat your august name), and let my head always remain bowed at your holy lotus-like feet with devotion and humility. Oh Lord and friend of the distressed, wretched and miserable ones! By fulfilling my above mentioned wishes, be kind and gracious enough to deliver me from this entrapping, artificial and deluding world in which I find my self trapped and engrossed (97).

रामरत्नमहं वन्दे चित्रकूटपतिं हरिम् । कौशल्याभक्तिसम्भूतं जानकीकण्ठभूषणम् ॥९८॥

इति श्रीराम—रहस्ये सनत्कुमार—संहितायां नारदोक्तश्रीरामस्तवराजं सम्पूर्णम् ।

98. I honour, revere, worship and praise the jewel called Ram who is the Lord Hari, the king of Chitrakoot¹. He is born because of the devotion of Kaushalaya (his mother), and is like a symbolic ornamentation for the neck of Janki² (98).

[Note—¹*Chitrakoot* is the place where Lord Ram had spent considerable time during his time in forest exile, and it was here that Bharat, his younger brother, had gone to try to persuade him to come back to Ayodhya. It is said that the Lord always stays in the forests surrounding this holy place.

²He is like an invaluable and precious necklace which adorns the bosom of Sita. The allusion to a necklace signifies that even as a woman's beauty and charm is enhanced by her jewelry, chiefly her necklace because it is the central piece of all her ornaments, lying prominently around her neck and placed on her bosom to show off her beauty and charm, and this piece of ornamentation has a pride of place on her body because it symbolically lies close to her heart as it is placed right above it on the chest, Lord Ram too is the greatest and most valuable possession that Sita has. Without him, she would be bare of any honour and decoration.]

Thus ends Ram Stavaraj Stotra sung by Narad in Sanatkumar Sanhita.

*__*__*__*

Section 5-Ram Stotra (by Mahadev or Lord Shiva)

This Stotra of Lord Ram pronounced by Lord Shiva or Mahadev appears in the Adhyatma Ramayan, Uddha (Lanka) Kand, Canto 15, verse nos. 51-63.

51. 'I bow in honour of Sri Ram together with his 'Shakti' (literally, Lord's cosmic energy; but here referring to Sita). He is dark complexioned and tender like a blue lotus, is decorated with a crown, a tiara, a garland or necklace, arm band etc., is seated on a throne, and is full of divine and brilliant radiance (51).

52. Oh Lord! You are without a beginning, middle and an end, and are the only one of your kind. You create, sustain and annihilate the entire creation using your Maya (delusory power as well as the cosmic infinite creative energy), but are not involved in, attached to, affected or influenced by it because you are always established in a blissful, contented, happy and tranquil state of consciousness, and are absolutely faultless, without any blemishes and shortcomings, beyond reproach, and are uncorrupt and pristine pure (52).

53. Surrounding (or investing/infusing) yourself willfully with the deluding characteristics of your Maya (i.e. you voluntarily allow yourself to be veiled in your Maya, you willingly invest yourself with its characteristics), you use it to carry out your wishes to take/assume various forms such as that of different Gods, humans and others. Then in those forms or incarnations, you do different types of deeds in order to show the righteous path of Dharma (i.e. path of righteousness, probity, propriety, ethics, morality, noble conduct etc.) to your devotees and followers who have taken shelter and refuge with you. At that time (i.e. during those incarnation or manifestation periods), only the wise and enlightened ones are able to recognize you (53).

[Note—In other words, you reveal yourself in different forms and lead a stellar life of righteousness and auspiciousness amongst your devotees to show them in practical terms how to behave and live in the world in the scripture-sanctioned way and consequentially attain emancipation and

salvation. These devotees or followers are those who have submitted themselves to you and look forward to you for protection, guidance, example and precedence, who treat you as their moral preceptor and guide, as their Lord whom to look up to for succour and solace, as well as for their emancipation and salvation or deliverance from this mundane and entrapping world. When you reveal yourself as an incarnation or as a manifestation, your devotees do not have to look anywhere else for their guidance and example, for your own life acts as a beacon for them. They might not be scholarly enough to benefit from the study of scriptures, but they sing your glories and see your example in their day to day lives and easily attain that rare stature that is available by hard study of scriptures and doing severe penances and keeping austerities. The path of Bhakti is easier to follow for ordinary creatures as compared to the arduous path of knowledge that has its own pitfalls.]

54. You create the entire creation out of your own fraction and then take good care of it by bearing it or holding it aloft from below by becoming (assuming the form of) Sheshnath (the legendary, many-hooded serpent who holds the earth on its hood), and sustaining it from above by becoming the sun, the wind or air, the moon, the various herbs (medicinal products), and the rain. (54).

[Note—In other words, you not only create anything but also ensure that it is well taken care of. This is expected of a wise creator who is benevolent, munificent and magnanimous towards his creation. This verse implies that when one creates anything, he should provide for its maintenance and sustenance. One should not leave his responsibilities to others.]

55. You assume the form of digestive powers of the creature, and with the help of the five vital airs, you digest and assimilate the food taken in by the creatures, thereby sustaining and nourishing the whole world (55).

[Note—The five vital wind forces that regulate life are the following—Pran, Appan, Vyan, Udaan and Samaan.]

56. Oh Lord! The splendour, radiance, dazzle, brilliance, majesty, magnificence and the potential powers that the moon, the sun and the fire possess, the pure, truthful and eternal consciousness that is the characteristic feature of all living creatures, and the virtues of tolerance/patience/fortitude/forbearance, of valour/valiance/bravery/courage, and the glory and fame that one acquires during a long life that seem evident in those who possess a gross physical body—all of them are nothing else but your majestic and stupendously versatile powers and potent on display (56).

57. It is you who appears in different forms such as Brahma (the creator), Shiva (the annihilator) and Vishnu (the sustainer) etc. as well as Kaal (the God of death, time and circumstance), Karma (the theory of deeds and rewards), the Moon and the Sun (the celestial bodies) etc. depending upon the beliefs and faiths of followers of different schools of thought and philosophy. But there is no doubt in the fact that you are one and the same supreme Brahm reflected, as it were, in all those separate and distinct forms or entities in which people of different denominations worship and recognize you (57).

58. Even as you are described by the Vedas, Purans, time honoured traditions and folklore as having existed in myriad forms such as the huge legendary fish etc. whatever true or false that appears in this world—in other words, all the twin appearances in which the world is divided or separated into, viz. those things or perceptions that appear to be true and those that appear to be false—is nothing else but only your manifestation or image; there is nothing separate, different or distinct from you (58).

59. Whatever that has been produced, shall be produced in future and is being produced (or happening) in the present in this vast, measureless and endless creation which consists of both the inanimate, immovable, inert and dead as well as the movable, active, alive and animate (i.e. dual) aspects of the artificial, delusory and deceptive mundane world, are all myriad images of you, and there is nothing that exists and is visible which is separate from you. Hence, you are beyond all comprehension, measures, yardsticks and definitions (59).

60. All people do not understand your essential and true nature or your fundamental form as the one who is ‘Parmatma’ (the transcendental, supreme, macrocosmic, all-pervading, omniscient Soul which is beyond definitions and attributes), because they are under the influence and spell of your deluding powers called Maya. Only those whose internal being (or their mind-intellect discriminating apparatus) have been purified due to the good influences of the services done by them toward your devotees and followers, are the ones who are able to perceive, experience or realise your true form, nature or essence as being the Parmatma (60).

61. Those who regard the external, illusionary world of material comforts and artificial sense objects as being real or truthful do not know or realise your true and real form and essence as being the pure, eternal and truthful consciousness, even though they may be as exalted and superior as the creator Brahma himself¹. Hence, in order to avoid consternations, perplexities, confusions, dilemmas and doubts of all kinds, wise and sagacious persons worship you in this manifest and visible dark-complexioned form (as Sri Ram) with due and sincere devotion and dedication. As a result, they easily overcome sorrows, distresses, agonies and torments associated with this mundane, deluding and entangling world, and attain deliverance, emancipation and salvation (61).

[Note--¹That is, even Lord Brahma from whom the four Vedas have emerged, cannot know your true form if he is not realistic enough to realise or recognise the fact that the creation which he calls his own product is, in fact, not what he thinks it to be—that is, a creation created by him (Brahma). It is an illusion/deception created by you which Brahma takes erroneously to be for real, and as his own product, forgetting in the process that the powers to create that he possesses have been delegated to him by you. In fact, even Brahma the creator has been created by you. So if such exalted and attained souls can be under the magical and misleading spell of your delusions creating powers, then what can one say of lesser souls.]

62. Being extremely thankful and grateful, feeling highly contented and fulfilled by constantly chanting your name, I live in Kashi (Varanasi) day and night. There I pronounce your divine and holy name ‘Ram’ which is called the ‘Tarak Mantra’ for

the benefit of all those who die there and wish to achieve emancipation and salvation, to help them in fulfillment of their wishes (62).

[Note-- The 'Tarak Mantra' of Lord Ram is elaborately described in Uttar-Tapini Upanishad of the Atharva Veda tradition which is exclusively dedicated to Lord Ram, as well as in Tarak Upanishad of the Shukla Yajur Veda tradition which is dedicated to the subject of emancipation and salvation.

The Tarak Mantra preached by Lord Shiva is that group of esoteric, ethereal and holy words, syllables or phrases that have stupendous magical and divine powers that can achieve miracles, and one of them is the ability to give liberation and deliverance to even sinful creatures who can never expect to find emancipation themselves. It gives freedom from miseries, fears, torments and other misfortunes that devour a creature. It liberates a creature from the cycle of birth and death, the miseries and fears associated with this world, with old age, death and their accompanying horrors etc. (Atharva-shikha Upanishad, 2/1,49; Advaitarak Upanishad, verse no. 3; and Jabal Upanishad, canto 1. The ascetic/Yogi achieves liberation and deliverance by concentrating his internal thoughts at a point between the eyebrows where he realises the supreme, transcendental existence of Brahm, and he mentally one with Brahm after this realisation (Advaitarak-2,3).

According to Ram Uttar-Tapini Upanishad, the Tarak Mantra of Lord Ram is 'OM RAN(G) RAAMAAYE NAMAHA' (Ramottartaponishad, 2/3). However, the Atharva-shikha Upanishad, verse no. 44 says that 'OM' is that Tarak Mantra.]

63. (Now I pray to you that—) Those who regularly listen, recite, preach or write this Stotra (i.e. these prayerful verses or hymns) enunciated by me, with the greatest of devotion and sincerity, should, by your grace, be rewarded with complete blissfulness, happiness, peace, contentedness as well as with the privilege of attaining your supreme, holy, divine and august feet. That is, they should find oneness with you (63).

-----*****-----

Section 6-Ram Stotra (by Jatau, the Bird)

This Stotra (hymn) by Jatau appears in Adhyatma Ramayan by sage Veda Vyas, Aranya Kand, Canto 8, verse nos. 44-53.

44. Jatau said (prayed), 'I remain perpetually bowed in great reverence before Sri Ramchandra who has (possesses, is endowed with) immeasurable auspicious virtues and good characteristics, who is boundless, measureless, limitless and without any parameters, who is the original cause of creation, its sustenance and its ultimate annihilation, who is an embodiment of supreme peace, tranquility and serenity, and is the most exalted and supreme Soul in the creation, called the Parmatma (44).

45. I bow most reverentially day and night before Sri Ram who is an embodiment (or treasury, an abode) of and remains submerged in measureless bliss, happiness and joys, who is the object of affectionate side ways (oblique, askance) glances of Laxmi, who is the remover of the miseries, grief, troubles and tribulations of the Lord of Gods (Indra) as well as of the four-headed Lord (Brahma) and other Gods, who is the

best among humans and bestows boons, and who holds a bow and arrows in his hands (45).

46. I bow most reverentially to and take shelter in the holy feet of Raghunandan (Sri Ram) who is the most beautiful, astoundingly attractive, enchantingly captivating and stupendously charming in the whole of the three worlds (subterranean, terrestrial and celestial), who is worthy of being praised, revered and honoured by all, who is as splendid, radiant and glorious as hundreds of Suns taken together, who bestows (gives, grants) all the desired or deserved fruits or rewards (to his devotees), who constantly, day and night, gives shelter and refuge in his holy feet to those who seek it, and who resides in their affectionate and loveable hearts (46).

47. I bow most reverentially to and take shelter in the holy feet of Hari (Sri Ram) whose potent holy name resembles a powerful wild fire for the purpose of destroying this world which is like a dense and impenetrable forest, who is the supreme God who is revered, honoured and worshipped even by Lord Shiva and other Gods, who is the crusher and vanquisher of crores (millions) of demons and their kings, who is dark complexioned like the waters of the holy river Yamuna, and who is most gracious, kind, benevolent, merciful and compassionate (47).

48. I bow most reverentially to and take shelter in the holy feet of Raghunandan (Sri Ram) who is perpetually far away from the reach of and sight of (i.e. inaccessible to) those who are regularly, as a matter of habit, natural inclination and temperament, passionately involved with, are infatuated with, are emotionally attached with, are insatiably attracted to, have an unsatisfied yearning for, are madly running behind and seeking wistfully this material world of artificiality and its illusive comforts. On the other hand, he is always easily visible (accessible, attainable) to those exalted sages, seers, hermits, ascetics and other exalted, realised and holy ones who are detached, uninterested, indifferent and dispassionate towards this world (i.e. who have renounced their link with this artificial and elusive ensnaring world. The holy and divine feet of the Lord are like a ship (or boat) to take one across the ocean of this mundane, deluding, artificial and ensnaring world (48).

49. I bow most reverentially to and take shelter in the holy feet of Sri Raghunayak (literally, the exalted leader of Raghu's clan; Sri Ram) who resides in the temple-like heart of Lord Shiva and Parvati and is their well-wisher. His character, nature, conduct, behaviour, general demeanours, habits and temperaments, both the worldly as well as the heavenly, are extremely enchanting and pleasant (besides being stellar examples of divinity, holiness, piety, righteousness, auspiciousness, probity, propriety, ethics and morality of the highest order). His holy feet are served (worshipped, adored, honoured) both by the most exalted Gods as well as the king of demons. He is that supreme authority that grants boons even to the Gods (49).

50. I bow most reverentially to and take shelter in the holy feet of the lotus-eyed Raghubar (Sri Ram) who is being constantly served by those great noble souls who keep far away from (abhor, detest, never think of, or eye) the wealth, property and women of others. On the contrary, they feel very glad, happy and contented at the virtues, excellence, goodness, glory, prosperity, well-being and success of others, and are always eager for their welfare and well-being (50).

51. I bow most reverentially to and take shelter in the holy feet of Sri Raghupati (Sri Ram) who is the great Guru (moral preceptor) of Lord Shiva! His charming and attractive face is like a fully blossomed lotus flower and is adorned with a bewitching smile that is most attractive, endearing, genteel and charming for the heart, who is most easily accessible to his devotees, the radiant glow of whose body (i.e. his complexion) is beautifully tinged with a bluish hue like that of the 'Indra Neel Mani' (sapphire worn by Indra), and whose enchanting eyes are as adorable, fascinating, magnificent and charming as a white lotus (51).

52. It is you who appear in the three forms of Hari (Vishnu, the sustainer), the one who was born atop a divine lotus (Brahma, the creator), and Shambhu (Shiva, the concluder of creation) due to the predominance of any one of the three 'Gunas' over the others, even as the same sun appears to be different and numerous when it is reflected in a number of pans filled with water.

I sing a hymn in your honour who are worthy of being praised, revered and honoured even by Indra (the king of Gods), and are a personification of the supreme transcendental Lord (52).

53. Your divine body is more stunningly and magnificently charming, attractive, handsome, magnificent, radiant and endowed with a divine glow than that of crores (millions) of Kamdeo-cupids (literally the husband of Rati) taken collectively. You are very far away from or inaccessible to those who are confused and perplexed by, or remain entangled in, the web representing pursuit of hundreds of paths or means leading to attainment of emancipation and salvation, instead of concentrating on the righteous and correct path leading to the awareness of your truthful and real form (as described in the Shathpath Brahman of the Shukla Yajur Veda and expounded and elucidated in the Brihad Aranykya Upanishad of that Veda). [That is, you are attainable by realising your true form by following the righteous path of self realisation and devotion as affirmed in the Upanishads.] You are always present and experienced by exalted ascetics in their hearts. I bow most reverentially at the holy and venerated feet of great Lord Raghupati (Sri Ram) who is such a benevolent and unparalleled eliminator of miseries, grief, distress, agonies, troubles and tribulations of all kinds' (53).

-----*****-----

Section 7-Ram Stotra (by Indra, the king of Gods)

This Stotra (hymn) by Indra appears in Adhyatma Ramayan by sage Veda Vyas, Uddhya (Lanka) Kand, Canto 13, verse nos. 24-32.

24. Indra said—'I always worship, honour and adore Sri Ram who looks most elegant, dignified, majestic and beautiful with a blue countenance like that of a blue-lotus, whose name is like a wild forest fire for the purpose of burning or destroying this materialistic, delusory, artificial and ensnaring mundane world which is like wild and dense forest (i.e. his holy and powerful name can burn the allurements and entrapments that this world presents to the soul diverting, it from its real goal of emancipation and salvation), whose blissful, most cheerful, enchanting and tranquil image/form is meditated upon by Bhavani in her heart (in other words, the blissful and pleasant image/form of Sri Ram resides in the heart of Parvati, the consort of

Lord Shiva), and who is the liberator from the fetters that shackle a creature to this world (consisting of a vicious, never ending cycle of birth and death; he is a medium by which one can free oneself from this world and its shackles). I bow reverentially before Sri Ram who is the refuge or shelter for Lord Shiva and other Gods (24).

25. He is the only medium by which all the miseries, distresses, sorrows and torments of the Gods etc. are destroyed or eliminated. He is presently in the form of a human, though he is primarily without a form and is worthy of being praised and honoured through the medium of prayers. I worship, revere and adore that Lord Sri Ram who is the supreme Lord and the one who removes the burden of the earth, who is an image of supreme, eternal and immutable bliss, happiness, joy, peace and tranquility, who is worthy of being praised, honoured, revered and worshipped, and is Lord Hari (Vishnu) himself personified (25).

26. He who is the shelter and provider of eternal happiness and succour of all kinds to those who seek refuge with him; he whose name removes or destroys all types of miseries, sorrows, torments, tribulations, anguish and their likes of those humble devotees who have sought his shelter; who is the object of severe penances and austerities (Tapa), of deep meditation, concentration and contemplation (Yoga), and of thought and search by great and attained Yogis (ascetics); and who is a friend of the king of monkeys etc. (i.e. Sugriva and his ministers)—I adore, worship, honour and revere that Sri Ram who is a true and loyal friend personified (i.e. he is a sincere friend of all, or I worship him as my true and sincere friend because he has given me succour from the horrible torments that I was being subjected to by Ravana as a true and loyal friend) (26).

27. He keeps far away from people who are always indulgent and engrossed in pleasures of the sense organs and the objects of the materialistic world, while residing in the proximity and easy reach of those who are always firm in Yoga and self-restraint. He is an eternal and everlasting treasury or a root of eternal beatitude and felicity. He is an image and source of happiness, joy and delight for the daughter of Vaideha (i.e. Sita). I always worship, revere, honour and adore Sri Ram who has been born in the clan of king Raghu (27).

28. You appear like a human being (or are in the form of an ordinary man) out of your own wish and just for the sake of fun or playful activity. While assuming this form, you have also assumed the characteristics and attributes of a human that you seem to possess by virtue of your own great deluding powers called Maya. That is, you have joined hands with your Maya, and this company has created an illusion that you are a human being and have all the attributes of a human being.

Those people whose ears get constantly filled by hearing your divine stories which bestow them with happiness and joy as well as bliss and peace, are the ones who become images or stellar examples of constant, persistent and consistent contentedness, joy, bliss, peace, tranquility and happiness (28).

29. Oh Lord! I had become intoxicated, haughty, proud, boastful and arrogant due to honours, respect, stature and privileges that I had as the king of Gods as well as by indulgence in drinking Soma (which is the elixir like drink offered to Gods during fire sacrifices). I cared for none due to my arrogance, pride and haughtiness of being all in all (or the Lord) of the entire world. Now, with the grace and kindness of your lotus-

like divine and holy feet, my haughtiness, arrogance and vanity of being the master and Lord of the three worlds has been eliminated and destroyed. [The three worlds are— the celestial, the terrestrial and the subterranean worlds.] (29).

30. He who is adorned with glittering gem-studded arm bands and necklaces and looks most magnificent, handsome, elegant, enchanting and beautiful in them, who is like a wild fire for the destructions of demons who are a burden for this earth, whose auspicious face and countenance resembles a full Moon of a winter night, and whose eyes are as beautiful, enchanting, enamouring and attractive as a beautiful lotus flower, and whose beginning or end is most difficult to ascertain—I adore, worship, honour and revere such a Raghav (Sri Ram) (30).

31. He whose body has the ethereal radiance and divine glow resembling that of the 'Indra Neel Mani' (a blue sapphire worn by Lord of Gods, Indra, as a crown jewel) and is as dark as the (rain bearing) cloud, who had protected all the creatures by slaying the demon Viradh etc. to establish peace, tranquility and order in this world, who is adorned by a crown and a tiara etc., and who is the valuable asset and a valued treasure of Lord Shiva—I adore, worship, honour, praise and revere such a Sri Ramchandra who is the Lord of the clan of Raghu (31).

32. He is sitting on a magnificent throne which is as glorious, splendourous, radiant and marvelous as millions of moons shining together with Sita by his side. She has a complexion as glowing and radiant as pure gold, and as splendourous, brilliant and dazzling as lightening. I adore, worship, honour, praise and revere such a Sri Ramchandra who is beyond the purview of any sorrows, anguish and distress as well as is without any sluggishness, inertia, indolence, lethargy, careless and apathetic attitude (i.e. he is most vigilant, alert, active and agile)' (32).

-----*****-----

Section 8-Ram Stotra (by Vibhishan, the noble demon king of Lanka)

This Stotra (hymn) by Vibhishan appears in Adhyatma Ramayan by sage Veda Vyas, Uddha (Lanka) Kand, Canto 3, verse nos. 17-32.

17. Vibhishan said, 'Oh the King of kings, Sri Ram! I bow before you (to pay my respects and honour). Oh the one who resides in the heart of Sita! I bow reverentially before you. Oh the invincible and formidable archer holding an invincible and formidable bow! I bow reverentially before you. Oh the one who is compassionate, benevolent, munificent, benignant and endearing towards his devotees! I bow reverentially before you (17).

18. I bow before Sri Ram who has no end, is tranquil, peaceful and serene, is unique and matchless in divine splendour, radiance, brilliance, glow of divine energy and majestic powers, is a friend of Sugriv, and is the leader of king Raghu's clan (18).

19. I repeatedly bow reverentially before you who are a great and exalted soul, are the cause (source) of the creation as well as annihilation of the world, are the Guru (a wise and enlightened teacher, a moral preceptor, an erudite and learned guide, and the one who is the most wise and enlightened) of the Triloki (the three worlds consisting

of the subterranean, terrestrial and celestial worlds), and are a householder since time immemorial (19).

20. Oh Sri Ram! You are the cause of creation and existence of this world, and at the end of it you are the place where it goes back (i.e. merges into or coalesces into) at the time of annihilation (the doomsday). You move around as per your own wish (20).

21. Oh Raghav (Sri Ram)! You pervade both inside and outside the whole creation consisting of the five elements (space, air, fire, water, earth). [That is, you encompass as well as are encompassed by all the animate as well as the inanimate world which is made up of the above elements.]

As a result, the whole universe appears to be a manifestation of your own self, or it is an image which reflects you (21).

22. Those foolish, lowly, stupid and ignorant persons, whose wisdom, intelligence and discrimination powers have been eclipsed by your deluding and illusive force called Maya, are constantly and repeatedly arriving and departing, i.e. take birth and die repeatedly in this mundane, artificial, deluding and entrapping world depending upon their righteous or unrighteous deeds, thoughts and demeanors (22).

23. As long as (i.e. till the time) a person does not concentrate his mental faculties and realises and understands your true form representing pure enlightenment, wisdom and knowledge as well as the pure consciousness, he continues to regard this world as being true just like one mistakenly thinks that there is silver that glistens inside an oyster shell. [The moon or sun light reflects from the oyster shell's inner layer and it appears to simmer with a silvery light, but it is only an optical illusion.] (23).

24. Oh Vibho (omnipresent, almighty, all-pervading, magnanimous, eternal Lord)! It is because the people are ignorant of you and your true form that they are engrossed in and infatuated and attached with their worldly ties such as their sons, wives and homestead etc., and try to find happiness and peace in the objects of this materialistic but perishable world which ultimately give them sorrows and anguish in return (24).

25. Oh the most exalted and the best among males ('Purshottam', an epithet for Vishnu)! You are Indra (the king of Gods), the Fire, Yam (the patron God of death), Raksho (literally, the one who protects; also means God, 'good luck' personified), Varun (the patron God of water), the Wind God, Kuber (the treasurer of Gods) and Rudra (one of the eleven forms of Shiva; synonymous with annihilation of the creation) (25).

26. Oh Lord! You are minute than an atom and larger than the greatest of creation. You are the father, the mother and the nourisher as well as the bearer of the entire creation (26).

27. You are without a beginning, middle or an end. You are always uniformly complete, eternal and imperishable, and infinite and limitless. You have no physical organs such as hands and legs or eyes and nose (because you are formless and without attributes) (27).

28. But still, oh the slayer of the demon Khar, you are the one who hears all, sees all, accepts all and are very swift, rapid moving, diligent and agile. You are free from the encumbrances pertaining to the '5-Koshas'.

You are Nirgun (formless, invisible, without any defining characteristics or attributes called 'Gunas' which is so typifies this world). And you have no abode as such (i.e. you are not fixed or localised to any specific location or habitat, because the whole universe is your abode by the virtue of the fact that you are present in all the five elements that constitute the world) (28).

29. You have no parallel, no match and no alternatives. You are without any faults, blemishes, shortcomings and taints. You have no form, no attributes, no names and no qualifying qualities defining you. You are inspired by none and are self driven; you have no Lord above you who can order you to do anything. You are free from the so-called six faults, shortcomings, blemishes or taints associated with this creation and its creatures¹. You are beyond Nature, called Prakriti. You are the eternal Purush who has no beginning or end. [Here 'Purush' means the male aspect of nature or the Viraat Purush that existed even prior to the whole creation coming into being) (29).

[Note :- ¹The six Faults mentioned in verse no. 29 are the problems associated with this gross world that has a physical origin, takes a birth and ultimately ends or dies. Naturally they are not applicable to the supreme Lord who does not take birth and does not die. These so-called 'Vikars' are the following—(1) problems associated with birth, (2) problems associated with growth, (3) problems associated with consequences of deeds done and actions taken by a creature in this world, (4) problems associated with gradual decay and decline of the body and its functions, (5) problems associated with old age and its attendant horrors, and (6) problems associated with the ultimate destruction and end of everything that relates to the creature. One will observe that the life of a creature is a continuous graph of sorrows and pains of one or the other kind. It is only when the creature realises the truth of existence and who he really is that he begins to disassociate himself from the body and the world, and thus is able to break free from this seemingly interminable cycle of horrors.]

30. You appear to be like an ordinary human being because of the illusion created by your Maya (the delusion creating powers of the Lord). The Vaishnavs (those who worship Lord Vishnu and treat him as the supreme Lord who manifests in the form of various incarnations to rid the world of evil and vices) attain emancipation and salvation by realizing that, in reality, you as are that supreme Lord who is called 'Nirgun', i.e. one who has no Gunas (no attributes and qualifying virtues, either good or bad) and 'Ajanma', i.e. one who has no birth (because he is eternal and imperishable) (30).

31. Oh Raghav! I wish to climb up the stairs (or steps of the ladder) representing sincere, steady, everlasting and pure 'Bhakti' (i.e. firm devotion, faith, conviction and belief, having reverence and adoration, worshipping and honouring) in your lotus-like holy feet, in order to reach the pinnacle of the royal palace called 'Gyan Yog' (enlightenment and wisdom acquired through truthful knowledge of the supreme reality) (31).

32. Oh Sita's dear Lord Sri Ram who is the best among those who are merciful, munificent, benevolent and compassionate! I bow reverentially before you. Oh the slayer or vanquisher of Ravana! I repeatedly bow reverentially before you. You should save me from being submerged and getting drowned in the ocean-like mundane world' (32).

-----*****-----

Section 9-Ram Stuti (prayer) by Brahma (the creator)

This Stuti (prayer) by Brahma appears in Adhyatma Ramayan by sage Veda Vyas, Uddha (Lanka) Kand, Canto 13, verse nos. 10-18.

10. Lord Brahma, the creator said, 'Oh Lord! I pray to you who are Lord Vishnu personified; you are the cause of the very existence of all the creatures; you are enthroned in the heart of self-enlightened or self-realised persons; you are free from the confusions, uncertainties, dilemmas and consternations arising from whether to leave and abandon anything or accept it; you are beyond everything and are without a parallel and match, i.e. you are unique and one like yourself alone; you are the only supreme authority and majesty in the whole world; you reside in the heart of all (in the form of the microcosmic soul); and you are the witness to all that exists (10).

11. Sages and hermits who are without any worldly attachments, who exert/exercise control over their two vital wind (life) forces—'Pran and Apaana'—and restrain or check them in their hearts with a firm determination, a concentrated mind and a focused intellect, and who, at the same time, are able to cut through (puncture, destroy, smash, overcome, vanquish, conquer, spike, break or crush) all the shackles representing uncertainties, doubts, confusions and perplexities, as well as overcome the numerous tugs and pulls exerted by various types of infatuations, yearnings and desires for self gratifications and obtaining pleasures of the sense objects pertaining to this materialistic world, which are, however, nothing but harmful poisons—only such sages and hermits can have a divine view of the Lord in their hearts. I bow and pray most reverentially to such a Lord Sri Ram who is adorned by a jewel studded glittering crown with a tiara, and is as majestic, splendorous, radiant and glorious as the Sun (11).

12. He who is beyond the influence, spell and reach of Maya (delusions, ignorance, hallucinations and illusions), who is the divine consort of Laxmi (i.e. who is Lord Vishnu himself), who is the original cause of the creation of the world, who is beyond the requirement of visible proof of existence (i.e. who cannot be measured by or compared to any known worldly yardsticks, standards or benchmarks to establish his authenticity and truthfulness), who destroys all Moha (attachments, infatuations, attractions, yearnings and desires) that exist in the world, who is praised by sages, seers and hermits, who is worthy of being meditated upon by the Yogis (ascetics), who is the founder, teacher, author and judge for the path of Yoga (meditation and concentration on the Lord), and who is complete in all respects—I bow most reverentially and humbly pray to that Lord known as Sri Ram who gives happiness, bliss, joy and delight to the whole world, and is most charming, pleasing, enthralling, beguiling and beautiful in every way (12).

13. He who has no emotions of any kind whatsoever, i.e. who is perpetually neutral and equitable, being unmoved and unwavering, constantly remaining indifferent and dispassionate under all circumstances, whether favourable or unfavourable; whose lotus-like twin holy feet are worshipped, revered and honoured by the Lord who is the chief amongst the Yogis (i.e. Lord Shiva) and others as well, who is eternal, perpetual, permanent, immutable and everlasting, who is pristine pure, absolutely uncorrupt, without any shortcomings, blemishes or faults, who is most wise, realised, knowledgeable, erudite, sagacious and enlightened, who is without an end and conclusion, and who is like a wild fire for the multitudes of demons (representing evil and vile forces in this world)—I bow most reverentially and humbly pray to such a valiant and valorous Lord known as Sri Ram who represents the divine, ethereal cosmic sound called ‘OM’! (13).

14. You are my Lord; you are the one who completes and implements all the proposals and prayers made by me (i.e. I propose but you are the one who puts them into practice; or in other words, the success of all my endeavours are dependent upon you). You are beyond any established standards or benchmarks, any dimensions and measurements, any generalities and scales that are usually applicable to all other entities in this world. You are a personification of Madhav (another name of Narayan, Vishnu, the sustainer of creation and the consort of goddess Laxmi). You are the bearer, sustainer and nourisher of the whole world. You are attainable or accessible only by firm faith, sincerity, devotion, dedication, belief and conviction. You can remove the fears arising out of this mundane, entrapping, deluding and artificial world by remembering your form which is divine, ethereal, sublime, subtle and eclectic but esoteric and mysterious. You reside in, literally move about and remain ensconced in, the mind-intellect complex which has been purified by the practice of Yoga (meditation and contemplation) (14).

15. You are the beginning and an end of this traditional world; you are the supreme Lord of all the worlds. You cannot be understood, measured, comprehended, proved, derived at or deduced by any standard, yardstick, measurement, scale, method or experiment known to this world. You are the Lord who is worthy to be adored, worshipped, honoured, revered and praised by those who have sincere devotion, dedication, faith, conviction, belief and reverence for you and have spiritually inclined emotions and outlooks—I bow humbly in reverence to Sri Ram who is as beautiful and enchanting as a blue-lotus (15).

16. You are beyond the need of any visible proof or evidence to establish your existence, majesty, divinity and authority (i.e. no proof or evidence is required to establish your existence or authority). You are without any pride, ego, haughtiness, vanity and arrogance. Which creature, who is surrounded by, under the influence of and engrossed in Maya (i.e. shrouded by delusions arising out of ignorance and misconceptions about the actual reality about this materialistic world), is capable or proficient and adept enough to know who you really and truthfully are?

Oh Madhav (literally meaning the divine consort of Laxmi; another name of Vishnu)! You are the revered and venerable one for the great sages, seers and hermits. Though you had praised, honoured and adored all the Gods in Vrindavan (during your manifestation as Lord Krishna), you are yourself praised, honoured and adored by all of the Gods themselves as well as by Lord Shiva in the form of Sri Ram. I bow and

pay my obeisance to Sri Ram who is a root (treasury, fount) of bliss, happiness, peace and tranquility (16).

17. You are proved beyond doubt, confusion or uncertainties, and are the one who is being invoked, expounded upon and enunciated by the various scriptures along with by the Vedas (i.e. you are ascertained, proclaimed, demonstrated and established without any confusion by them) which unequivocally proclaim you as being eternal, immutable, truthful, unchanging and perpetual, as being an image of beatitude and felicity, as being without any alternatives and one of your only kind, as being an embodiment or an image of Gyan (truthful knowledge, wisdom, enlightenment, erudition, sagacity and realisation), and as being without a beginning and an end.

You have assumed a human form just in order to accomplish my pending work (that is, to protect the creation from the tyranny of cruel demons and other evil mongers). I bow in honour and reverence to Sri Ram who is blue-complexioned like the Markat Mani (blue sapphire), and are the Lord of Mathura (the city where Lord Krishna had slayed the demon Kansha) (17).

[Note :- The reference to Lord Krishna as being the Lord of Mathura while praying to Sri Ram indicates that Brahma, the creator, sees no difference between Sri Ram and Sri Krishna, which indeed is the fact.]

18. Those wise and thoughtful persons in this mortal world who would read and recite this prime and eternal Stotra (prayerful hymns)—which were first conceived and enunciated by Lord Brahma, the creator, and which are imbued and infused with the essential tenets pertaining to the supreme transcendental Brahm—with full devotion, faith, conviction, respect and honour, are sure to be liberated/freed from all the shackles and entanglements representing the evil effects pertaining to their sins, misdeeds and misdemeanors of all kinds. Such recitation or reading should be done by invoking Sri Ram who is of a dark complexion and is the fulfiller of all the wishes and desires of his devotees. This Stotra proclaims and establishes the reality and essence about the supreme Brahm (18).

Addendum no. 2

Mantras of Lord Ram

This section lists all the Mantras of Lord Ram as they appear in Ram Rahasya Upanishad, Canto 2.

Verse nos. 1-2 = The *one-lettered Mantra* of Lord Ram is 'Raang/Raam'.

Verse no. 7 = The *two-lettered Mantra* of Lord Ram is 'Ram' = Raa + Ma = 2 letters.

Verse no. 8 = The six *three-lettered Mantra* of Lord Ram are the following—OM Ram; Hring/Hrim Ram; Sring/Srim Ram; Kling/Klim Ram; Aiyang/Aim Ram; and Raang/Raam Ram.

Verse no. 9 = The *four-lettered Mantra* of Lord Ram is Ram Chandra.

Verse no. 10 = The *five-lettered Mantra* of Lord Ram is Raamaaye Namaha.

Verse no. 16 = The *six-lettered Mantras* of Lord Ram are the following—(1) Raang/Raam Raamaaye Namaha. (2) Kling/Klim Raamaaye Namaha. (3) Hring/Hrim Raamaaye Namaha. (4) Aiyang/Aim Raamaaye Namaha. (5) Sri/Sring Raamaaye Namaha.

Verse no. 18 = Another set of *six-lettered Mantras* of Lord Ram are the following—

(a) (i) Sri Ram Bhadra Sri. (ii) Hring/Hrim Ram Bhadra Hring/Hrim. (iii) Kling/Klim Ram Bhadra Kling/Klim.

(b) (i) Sri Ram Chandra Sri. (ii) Hring/Hrim Ram Chandra Hring/Hrim. (iii) Kling/Kling Ram Chandra Kling/Kling.

Verse no. 25 = The *seven-lettered Mantras* of Lord Ram are as follows—Ram Chandraaye Namaha; Ram Bhadraaye Namaha.

Verse no. 26 = The *eight-lettered Mantras* of Lord Ram are the following—

(i) OM Ram Chandraaye Namaha. (ii) OM Ram Bhadraaye Namaha. (iii) OM Raamaaye Hung Phat Swaha.

Verse no. 30 = Another *eight-lettered Mantra* of Lord Ram is—Glong Hring Namaha Raamaaye Glong.

Verse no. 35 = Another *eight-lettered Mantras* of Lord Ram is—Sri Raamaha Sharnam Mam.

Verse no. 39 = There are two versions of the *nine letter Mantra* as follows—

(a) One is adding as a prefix the seven Beej Mantras to the base Mantra of Lord Ram—viz. (i) ‘Sri Raamaha Sharnam Mam’; (ii) ‘OM Raamaha Sharnam Mam’; (iii) ‘Sring/Sri Raamaha Sharnam Mam’; (iv) ‘Hring/Hrim Raamaha Sharnam Mam’; (v) ‘Kling/Klim Raamaha Sharnam Mam’; (vi) ‘Aiyang/Aim Raamaha Sharnam Mam’; and (vii) ‘Raang/Raam Raamaha Sharnam Mam’.

(b) By adding OM as a prefix and a suffix to the base Mantra as follows—‘OM Raamaha Sharnam Mam OM’.

Verse no. 40 = The *ten letter Mantra* of Lord Ram is—Janki Vallabhaaye Swaha Hum.

Verse no. 48 = The next *ten-lettered Mantra* of Lord Ram is—Raamaaye Dhanushpaanaye Swaha.

Verse no. 48 = The six *eleven-lettered Mantras* are the following—

(1) OM Raamaaye Dhanushpaanaye Swaha. (2) Hring/Hrim Raamaaye Dhanushpaanaye Swaha. (3) Sring/Sri Raamaaye Dhanushpaanaye Swaha. (4) Kling/Klim Raamaaye Dhanushpaanaye Swaha. (5) Aiyang/Aim Raamaaye Dhanushpaanaye Swaha. (6) Raang/Raam Raamaaye Dhanushpaanaye Swaha.

Verse no. 54 = The *twelve letter Mantras* of Lord Ram are the following—

(i) OM Hring/Hrim Bharataagraj Ram Kling/Klim Swaha. (ii) OM Namoha Bhagwate Ram Chandraaye. (iii) OM Namoha Bhagwate Ram Bhadraaye.

Verse no. 56 = The *thirteen-lettered Mantra* of Lord Ram is—Sri Ram Jaya Ram Jaya Jaya Ram.

Verse no. 58 = The *fourteen-lettered Mantra* of Lord Ram is—OM Sri Ram Jaya Ram Jaya Jaya Ram.

The *fifteen-lettered Mantra* of Lord Ram is—Sri Ram Jaya Ram Jaya Jaya Ram Ram.

Verse no. 59 = The *sixteen-lettered Mantra* of Lord Ram is—Namaha Sitaapataye Raamaaye Han Han Hum/Hung Pha.

Verse no. 62 = The *seventeen-lettered Mantra* of Lord Ram is—OM Namaha Sitaapataye Raamaaye Han Han Hum/Hung Phat.

The next Mantra having *eighteen letters* is—OM Namoh Bhagwate Raamaaye Mahaapurushaaye Namaha.

Verse no. 64-65 = The *nineteen-lettered Mantra* of Lord Ram is—Kling/Klim OM Namō Bhagwate Raamaaye Mahaapurushaaye Namaha.

The *twenty-lettered Mantra* of Lord Ram is—OM Namō Bhagwate Raamaaye Sarwa Saubhaagyam Dehi Me Swaha.

Verse no. 66 = The *twenty-one lettered Mantra* of Lord Ram is—OM Namō Bhagwate Raamaaye Sakalaapannivaaranaaye Swaha.

Verse no. 67-68 = The *twenty-two lettered Mantra* of Lord Ram is—OM Sring/Srim Raang/Raam Daasrathaaye Sitavallabhaaye Sarwavhistidaaye Namaha.

Verse no. 69 = The next Mantra *twenty-three lettered Mantra* of Lord Ram is—OM Namō Bhagwate Viram Raamaaye Sakalshatrun Han Han Swaha.

Verse no. 73-74 = The *twenty-four lettered Mantras* of Ram are six in number, and they are the following—

(i) OM Namō Bhagwate Sri Raamaaye Taarak Brahmane Mam Taaraye Namaha OM.

(ii) Hring/Hrim Namō Bhagwate Sri Raamaaye Taarak Brahmane Mam Taaraye Namaha OM.

(iii) Sring/Srim Namō Bhagwate Sri Raamaaye Taarak Brahmane Mam Taaraye Namaha OM.

(iv) Kling/Klim Namō Bhagwate Sri Raamaaye Taarak Brahmane Mam Taaraye Namaha OM.

(v) Aiyang/Aim Namō Bhagwate Sri Raamaaye Taarak Brahmane Mam Taaraye Namaha OM.

And (vi) Raang Namō Bhagwate Sri Raamaaye Taarak Brahmane Mam Taaraye Namaha OM.

Verse no. 75-76 = The ‘Vashikaran Mantra’ is—Kling/Klim OM Namō Bhagwate Raam Chandraaye Sakal-Jan-Vashya-Karaaye Swaha.

Verse no. 77 = The *twenty-six lettered Mantra* of Lord Ram is—OM Kling/Klim OM Namō Bhagwate Ram Chandraaye Sakal-Jan-Vashya-Karaaye Swaha.

The *twenty-seven lettered Mantra* of Lord Ram is—OM Kling/Klim OM Namō Bhagwate Ram Chandraaye Sakal-Jan-Vashya-Karaaye Swaha OM.

Verse no. 78-79 = The *twenty-eight lettered Mantra* of Lord Ram is—OM Namō Bhagwate Raksho-ghna-vish-daaye Sarwa-vignaantsamutsaarye Niwaaraye Swaha.

When the monosyllable OM is appended at the end of this Mantra, it becomes a *twenty-nine lettered Mantra*. This Mantra becomes—OM Namō Bhagwate Raksho-ghna-vish-daaye Sarwa-vignaantsamutsaarye Niwaaraye Swaha OM.

Verse no. 80 = The *thirty lettered Mantra* of Lord Ram is—Raang/Raam OM Namō Bhagwate Raksho-ghna-vish-daaye Sarwa-vignaantsamutsaarye Niwaaraye Swaha OM.

The *thirty-one lettered Mantra* of Lord Ram is—Raang/Raam OM Namō Bhagwate Raksho-ghna-vish-daye Sarwa-vignaantsamutsaarye Niwaaraye Swaha OM Raang/Raam.

Verse no. 81 = The *thirty-two lettered Mantra* of Lord Ram is—Raambhadra Maheshwaas Raghuvir Nripottam; Bho Dashasyaant Ka-smaakam Sriyam-daapam Dehi Me.

Verse no. 86-87 = The next Mantra is renowned as the famous ‘Ram Gayatri Mantra’. This Mantra is the following—‘OM Daasrathaaye Vidmahe Sita-vallabhaaye Dhimahi Tanno Raamaha Prachodayaat.’

Verse no. 88 = The ‘Sammohan Mantra’ of Lord Ram is—Hring/Hrim Kling/Klim OM Daasrathaaye Vidmahe Sita-vallabhaaye Dhimahi Tanno Sring Raamaha Prachodayaat.’

Verse nos. 90-92 = The next *forty-seven lettered Mantra* of Lord Ram is the following—OM Namo Bhagwate Raghunandanaaye Rakshoghna-vishadaaye Madhuaraaye Prasanna-vadnaaye Amit-tejase Bal-raamaaye Vishnave Namaha.

Verse no. 94 = The *six-lettered Mantra for Sita* is—Sring/Srim Sitaaye Swaha.

Verse no. 98 = The *Mantra for honouring Laxman* is—Lung/Lum Laxmanaaye Namaha.

Verse no. 102 = The *Mantra to honour Bharat* is—Bhung/Bhum Bharataaye Namaha.

Verse no. 103 = The worship and the *Mantra of Shatrughan* is—Shung/Shum Shatrughanaaye Namaha.

Verse no. 105 = The *Mantra for worshipping Hanuman* is—H-ring/H-rim Hanumate Namaha.

-----*****-----

There are two other Upanishads of the Atharva Veda tradition where we find Lord Ram’s divine Mantras. These are (i) the Tripadvibhut Maha Narayan Upanishad, and (ii) the Ram Uttar Tapini Upanishad.

(i) Now, first let us see what the Mantras are according to the Tripadvibhut Maha Narayan Upanishad—

The six lettered Mantra of Lord Ram is ‘Raam(g) Raamaaye Namaha’. [Tripadvibhut Maha Narayan Upanishad, Canto 7, paragraph no. 22.]

The eight lettered Mantra of Lord Ram is ‘OM Raamaaye Hum Phat Swaha’. [Tripadvibhut Maha Narayan Upanishad, Canto 7, paragraph no. 24.]

The nine lettered Mantra of Lord Ram is ‘OM Ramchandraaye Namaha OM’. [Tripadvibhut Maha Narayan Upanishad, Canto 7, paragraph no. 26.]

The ten lettered Mantra of Lord Ram is ‘Hung/Hum Janki-vallabhaaye Swaha’.
[Tripadvibhut Maha Narayan Upanishad, Canto 7, paragraph no. 28.]

The twelve lettered Mantra of Lord Ram is ‘OM Hring/Hrim Bharataagraj Ram Kling Swaha’.
[Tripadvibhut Maha Narayan Upanishad, Canto 7, paragraph no. 30.]

The Anushtup Mantra of Lord Ram is ‘Ram-bhadra Maheshwaas Raghubir Nripottam, Bho Dashaa-syaanta-kaasmaakam Rakshaam Dehi Sriyam Cha Te.’
[Tripadvibhut Maha Narayan Upanishad, Canto 7, paragraph no. 43.]

The Gayatri Mantra of Lord Ram is ‘Daash-rathaaye Vidmahe Sitaavallabhaaye Dhimahi Tanno Raamaha Prachodayaat.’
[Tripadvibhut Maha Narayan Upanishad, Canto 7, paragraph no. 46.]

The Mala Mantra of Lord Ram with the prefix of ‘OM’ and ‘Sri’ is as follows ‘OM Srimom Namō Bhagwate Raghunandanaaye Rakshoghnavishdaaye Madhur-prasanna-vadanaayaa-mit-tejase Valaaye Raamaaye Vishnave Namaha Srimom.’
[Tripadvibhut Maha Narayan Upanishad, Canto 7, paragraph no. 57.]

(ii) The next set of Mantras appear in the Ram Uttar-Tapini Upanishad, in its Canto 5, verse nos. 4/1-4/46. This Upanishad is Section 2 of Chapter 13 of the present volume.

-----Shanti Paath-----

-----*****-----*****-----

Chapter 13

Ram Tapini Upanishad

The Ram Tapini Upanishad supplements and compliments the Ram Rahasya Upanishad. It consists actually of two Upanishads—viz. *Ram Purva Tapini* which is the preceding Upanishad and makes up the first half, and *Ram Uttar Tapini* which is the subsequent Upanishad and makes up the second half. Both are included in this Chapter as Sections 1 and 2.

There is no basic difference between the ‘Purva’ and the ‘Uttar’ Ram Tapini Upanishads except the fact that they are like the fore and hind parts of the same scripture. Besides this, the Ram Purva Tapini Upanishad lays stress on ritualistic forms of worship as it describes elaborately the worship instrument known as the Ram Yantra which is used in mystical and ritualistic forms of worship. This instrument is like a geometrical diagram and it contains all the esoteric Mantras of Ram and other Gods incorporated in it, thereby standing for the creation and all forms of divinity in a miniature form. On the other hand, the Ram Uttar Tapini Upanishad is based on the principles of Vedanta and lays stress on meditation upon Lord Ram using his divine and all powerful Mantras.

Both these Upanishads however emphasise that Lord Ram is known as the ‘Tarak Brahm’, i.e. he is a personification of the Supreme Being whose blessing provides the creature Mukti and Moksha (spiritual liberation, deliverance, emancipation and salvation to the soul), and that the Lord’s Mantra is therefore known as the ‘Tarak Mantra’ as it enables the creature to attain this spiritual goal.

Section 1—The ‘Ram Purva Tapini Upanishad’ is composed in the ‘Anushtup Chanda’ style of verses, and there are in all five elaborate Cantos in it.

Briefly, Canto 1, Canto 2 and Canto 3 till verse no. 15 describe the esoteric secret meanings and different connotations of the various names and Mantras, including the Beej Mantras, of Lord Ram, along with their spiritual significance and the relevant prayers that are employed to honour and worship the Lord. To highlight the great importance and significance of the Beej Mantra of Lord Ram, Canto 2, verse no. 2 asserts that it is the seed from which the whole universe has emerged like a huge banyan tree that is born from its seed. The Beej Mantra is the root or seed from which the rest of the Mantra is constructed, and it is like a formula in any field of science that helps one not only to understand and unravel the secrets of that particular field but also to implement these unique principles of science in practice—the only difference being that the field of study and practice here is spiritual and metaphysical.

The story of Ramayan, which is a sort of biography of Lord Ram, from the Lord’s forest sojourn till his victory over the demons at Lanka and his return to his capital at Ayodhya to be crowned its King-Emperor, is outlined in Canto 4, verse nos. 16-31.

The next phase of this great Upanishad begins from Canto 4, verse no. 32 and lasts till Canto 5, verse no. 6 wherein the worship Yantra of Lord Ram, called also as the ‘Bhupur Yantra’, is described in graphic detail in a step-by-step method as how to construct it, the placement of various Mantras in it, and the steps involved in formal forms of worship using this Yantra.

The worship ‘Yantra’ of Lord Ram is in the shape of a geometrical diagram that is made to accommodate various divine Mantras that are charged with cosmic energy and dynamism that helps this creation to survive on its own steam. The Yantra is a sort of magical Charm or Talisman used to harness the dynamic cosmic powers that remain beyond the reach of ordinary men, and which, once tapped, can empower the person with supernatural powers and authority. Like any other modern-day gadget or machinery, it has a complex structure with numerous components, and to make it effective it is of paramount importance that the art and skill of its construction and usage be thoroughly mastered. Otherwise it is as useless as any other electric, electronic or mechanical gadget or machine that is either not properly made or is not properly operated. But once correctly made and used, the Ram Yantra, also called the Bhupur Yantra, can prove to be a panacea for all problems faced by the Lord’s devotee and spiritual aspirant. It is an instrument or apparatus in the pattern of a geometrical diagram used for formal forms of worship of the Lord, and is regarded as the whole universe in a miniature form.

The Upanishad concludes by outlining the immense pecuniary and spiritual rewards obtainable by having sincere devotion for and diligent worshipping of Lord Ram in Canto 5, verse nos. 7-10.

Section 2—The ‘Ram Uttar Tapini Upanishad’ is in the form of a dialogue between sage Yagyavalkya and some sages led by Brishapati, Bharadwaj and Atri. It has six Cantos. Its major part is in the form of prose as it is a dialogue. The subjects covered in this Upanishad are the following—

Cantos 1 and 4 describe the spiritual and metaphysical importance of the ‘Avimukta Kshetra’—the site that provides spiritual Mukti (liberation and deliverance) to the soul of a creature. Two sites have been given this honour—one is in the terrestrial world in the city of Kashi or Varanasi located on the banks of river Ganges, and the other is in the body of the spiritual aspirant itself. The latter location is in the forehead, between the two eyebrows and situated at the root of the nose. These facts are narrated in Canto 4 in detail. While Canto no. 1 is revealed as a dialogue between Yagyawalkya and sage Bharadwaj, Canto no. 4 is in the form of a dialogue between Yagyawalkya and sage Atri.

Canto 2 narrates the metaphysical importance of the ethereal Mantra ‘OM’ and its similarity to the Tarak Mantra of Lord Ram. The eclectic and spiritually empowered ‘Tarak Mantra’ of Lord Ram is compared with and treated as being a synonym of the Pranav mantra OM that relates to the supreme transcendental Brahm. This Tarak Mantra is powerful and potent enough to give the creature his final Moksha (emancipation and salvation) by ensuring that he crosses this vast ocean-like world of a continuous cycle of birth and death and their attendant miseries and torments in which he had been trapped for generations. This Canto is revealed as an answer that sage Yagyawalkya gave to sage Bharadwaj when the latter wished to know about the Tarak Mantra.

Canto 3 is an exposition on the four divine Paads or aspects of the supreme transcendental Brahm, the cosmic Consciousness, by way of description of the four states in which the consciousness exists in this world—viz. the Jagrat or waking state, Swapna or dreaming state, Sushupta or deep sleep state, and Turiya or the state that transcends the the Sushupta state. Another interesting aspect of this Canto is that it asserts that Lord Ram and his brothers Laxman, Bharat and Shatrughan are none but the four letters or aspects of the ethereal Mantra OM manifested in their forms. Then it goes on to assert that Sita, the consort of Lord Ram, is a manifestation of Mother Nature known as the primordial Prakriti. This Canto is an extension of the discourse Yagyawalkya was giving to Bharadwaj.

Canto 5 lists the forty-seven great Mantras of Lord Ram which have the potentials of ensuring a man’s all-round spiritual welfare. They were taught by Lord Ram to the creator Brahma, and were revealed for the benefit of sage Bharadwaj by sage Yagyawalkya.

Finally, Canto 6 winds up this Upanishad by highlighting the immense spiritual benefits of pursuing it diligently and honestly. Once again, this Canto is an extension of the question-answer session between sages Yagyawalkya and Bharadwaj. This Canto lauds the stupendous spiritual powers and greatness of the Mantras of Lord Ram which are described as being superior to and far more powerful than any other Mantra dedicated to any other deity.

-----Shanti Paath-----

Please refer to appendix no. 1 for the English of this Shanti Paath.

Section 1—Ram Purva Tapini Upanishad

Canto 1

[This Canto describes the meaning, the spiritual significance and metaphysical importance of the name of the Lord as 'Ram'. It establishes the divinity of Lord Ram as the supreme transcendental Brahm, the Supreme Being, and the cosmic super Consciousness itself personified.]

1. Om salutations! When the great Lord Vishnu, also known as Hari—who is an embodiment of the divine virtues of 'Sat-Chit-Anand' or pure truth, pure consciousness and pure bliss—took birth as an incarnation in the household of king Dasarath (the king of Ayodhya) in the clan of king Raghu, he was known by the name of Ram.

The Lord's name 'Ram' is derived by taking the first letter of the two words 'Raati' and 'Mahisthita'. The word 'Raati' means one who is deeply submerged, engrossed or involved in something. Here it refers to Lord Vishnu who is perpetually involved in taking care of this creation. The other word 'Mahisthita' has two parts—'Mahi' meaning earth, and 'Sthita' meaning to be established or be present in. Hence, the word 'Ram' refers to Lord Vishnu who is present on earth to take care of it and its inhabitants, and is formed by taking the first letter of each of these two words—i.e. 'Raa' (pronounced as in *rather*) from Raati, and 'Ma' (pronounced as in *mother*) from Mahisthita.

Hence, the etymological significance of the word 'Ram' is as follows—Ram is the great Lord Vishnu who stays on this earth, or the Supreme Being who has revealed himself on this earth as an incarnation, and lives here to fulfill all the desires of his devotees as well as to take good care of them. To live up to his role and carry out his obligations as a benevolent care-taker and munificent benefactor of this world, he lives here as a king-emperor (because a 'king-emperor' is naturally responsible for the all round welfare of the subjects under him, and is also the 'Lord' of the realm, thereby possessing and wielding sufficient power, authority, strength and ability to first plan for the welfare of his subjects and then actually implement it in practice). [Lord Vishnu is the sustainer and protector of this creation. He is actually the Supreme Being known as Brahm playing this role, amongst his various other roles, as the cosmic care-taker, sustainer, nourisher and protector of this creation. In this particular role, Brahm is called Vishnu at the macrocosmic level of creation, and as Lord Ram at the microcosmic plane of existence.] (1).

[Note—It ought to be noted here that as a noble, righteous and conscientious king-emperor, it is obligatory for Lord Ram to take care of all the subjects of his extended vast kingdom, which implies the entire earth and all its creatures, with equal love and affection, and not limiting his benevolent grace and kindness only to those who are close to him such as his devotees, or the subjects of his terrestrial kingdom of Ayodhya where Lord Ram had manifested himself as its king, his close attendants etc., because that would be too selfish for him and absolutely un-behooving of a great King and Emperor of the whole world who is morally bound and traditionally obliged to treat all the inhabitants of his entire extended kingdom and empire equally, and with the same love and affection as that extended to his favourite attendants. The fact that Lord Ram has been remembered and revered as one such great King-Emperor who was ever born on this earth proves that he did indeed live up to his role as the care-taker and protector of the entire earth and its inhabitants.

While the Supreme Being bestowed bliss, happiness and joys to all around him when he lived and roamed on this earth in his incarnation as Lord Ram, the Lord's divine name keeps on providing solace and succour to all the devotees from time immemorial and would continue to do so till the end of creation.

For spiritual purposes, however, the word 'devotee' is used to motivate the general populace to imagine the immense rewards that they can reap if they become

devoted to such a kind and benevolent Lord who takes care of even those who are not devoted to him. This is because it is not necessary that each and every single individual subject of his vast empire was devoted to him and faithful to him, for surely there must have been some black sheep in the flock somewhere, but the Lord never discriminated against them or showed disrespect to them. He loved his detractors as much as he loved his faithfuls.

Besides this, since Ram is an incarnation of the Supreme Being, he is not an ordinary King or Emperor. And every single creature born in this creation is expected to honour and show his respects to the great Father from whom he has been born and who takes care of all his needs and welfare in life. To serve the supreme Lord selflessly, to be obliged to him, and to thank him for all that he has done for the creature, to honour him and pay tribute to him for his magnanimity, benevolence, munificence, mercy, grace and kindness, is tantamount to having devotion for the Lord. It is the basic courtesy and civility expected from all living beings to honour their benefactor and protector.

When a creature suffers some misfortune he blames the Lord for his sufferings, that the Lord is not taking good care of him and neglecting him, but he does not realise that these miseries are the result of the evil deeds done by him because a man reaps what he sows, and that instead of blaming the Lord he should take remedial steps so that the future is bettered.]

2. This is how experts have highlighted the importance of the Lord's name as 'Ram'.

Other connotation of the name 'Ram' is that it refers to the Lord who causes the extinction or elimination of demons representing sinful, evil and pervert forces in creation that cause immeasurable miseries and unnecessary pain to the rest of the creatures of the Lord's creation. [In other words, Lord Vishnu reveals himself as an incarnation of Lord Ram whenever evil, negative and demonic forces become ascendant on earth.] (2).

[Note—The first letter of the Lord's name 'Ram', i.e. the letter 'Raa', is taken from the first letter of the word 'Raakshash' meaning the demons, and the second letter 'Ma' comes from the word 'Maranam' meaning death. Hence, the word 'Ram' means the one who causes the death of the demons, or the one who was the slayer of demons. These demons were symbols of evil, pervert, negative and sinful qualities in the world. These qualities, which are called 'Tam', are present in smaller or greater quantities in all the creatures because they are an integral part of creation, but when they become dominant and go beyond control, almost eclipsing the good and virtuous qualities, they become a problem for the rest of the creatures. It is then that the Lord has to come and restore the balance in the favour of good qualities, and redeem his solemn vow that he would protect his subjects and look after them well.]

3. Since Lord Ram enchants and captivates the Mana (mind and heart) of all the living beings in this world (by his kindness, grace, benevolence and mercy, by his giving of protection and succour and solace to all creatures), since the Lord is so endeared to all the living beings that he finds a permanent and respectful place in their Mana, he is called 'Ram'. [The word 'Ram' means in this context 'one who enchants and captivates the Mana of all the creatures, finding a permanent place in their hearts and inspiring respect and devotion in their minds'.]

Another interpretation is that he is called 'Ram' because he stuns the demons, vanquishes them, and virtually nullifies or overcomes their astounding power and strength just like the 'Rahu' who effortlessly eclipses the Moon during the lunar eclipse¹ (3).

[Note—¹The legend of *Rahu* is that he was the eldest son of the demon Viprachitti and his wife Shinghikaa. His younger brothers were Ilvala, Vaataapi, Narak amongst

others. When Lord Vishnu, disguised as the beautiful Mohini, was distributing the ambrosia of eternity called Amrit to the Gods during the episode of the churning of the ocean as told in the Purans, Rahu assumed the form of a God and surreptitiously entered the lines of the Gods to take this Amrit. When his cheating was discovered, Vishnu cut off his head with his weapon called the Chakra Sudarshan (a circular saw-like discus). But it so happened that before the head was severed Rahu had already drunk some Amrit, and so did not die. His head and torso became two independent entities. The former was called 'Rahu' and the latter 'Ketu'.

Since the Moon God and the Sun God had betrayed him, Rahu takes revenge by devouring them periodically to satisfy his hunger. He devours them when they are in their full glory—viz. he devours the Moon God during the full moon night, and the Sun God only during the day time, either when the sun rises or during its journey across the sky, but never at sunset when the sun is already losing its radiance and is on the decline.

Again, since the head of Rahu was severed from the neck, hence both the Moon God and the Sun God re-emerge from the lower end of the head after they have been devoured by the mouth of Rahu. This is why the moon and the sun appear to be getting gradually cut-off from view from one end of their discs, symbolizing their gradually entering the mouth of Rahu as the latter begins to devour them. Then for some time they remain dark or obstructed from view symbolizing the period when they remain inside the mouth of Rahu. Finally, they gradually regain their original shape symbolizing their ejection from the lower end of Rahu's neck where it was severed from the trunk.

Actually however, the phenomenon of the lunar eclipse is due to the earth's shadow falling on the moon's surface when it comes in the path of this shadow during its revolution around the earth. This scientific fact was known to the great Rishis (sages and seers) who had preached the Upanishads, and it is clearly mentioned in Varaaha Upanishad, Canto 2, verse no. 74 of the Krishna Yajur Veda tradition which says "When the moon is said to be devoured by the demon Rahu (the severed head of a demon) during the lunar eclipse, people start offering worship, making sacrifices, doing penances, taking purifying baths, giving alms and making charities, observing austerities etc. so that the Moon God is freed from the demon's curse, but all their deeds are a waste of effort and done in utter ignorance because there is no such event, and the darkness on the moon's disc is actually a shadow of the earth falling upon it. This shadow would go away on its own when the time comes even if no such hue and cry is raised by worried worshippers. So it is a height of stupidity and profound ignorance to even think that the Moon God has been cursed or is being devoured, and by doing so many religious deeds it can be freed from its torments."

Similarly, the solar eclipse is caused when the moon comes in between the shiny surface of the sun and its view from the surface of the earth, thereby blocking the former's view from the latter's surface.

The elongated torso of Rahu came to known as 'Ketu' and it is recognized as the comet in modern science. That is why sighting of the comet is regarded as a bad omen.

Both Rahu and Ketu are placed amongst the nine planets. They represent the two nodal points where the celestial equator cuts the ecliptic.

In iconography, Rahu is depicted as just a head or even as a snake's hood.]

4. Lord Ram sets an example of high ethics, morality, probity, propriety, righteousness and auspiciousness for other kings and emperors who might have gone astray from their designated noble path marked by these eclectic virtues behooving of a king, kings who might have become morally corrupt and spiritually fallen and therefore have lost their right to an exalted stature, kings who might have not lived up to their noble obligations and high expectations, who might have forgotten their moral

duties towards their subjects and have consequentially forfeited their right to glory, majesty and fame, but who sincerely wish to re-establish and re-attain their high stature and regain their lost glory, majesty and fame as noble kings and emperors.

The Lord shows them the correct path by way of his own example and his own life. He shows them how to follow a righteous and an auspicious way of life, inculcate exemplary virtuous character, and observe the noble and eclectic principles of probity, propriety and nobility in practice—in brief, to observe the tenets of ‘Dharma’—by observing them personally, and proving beyond doubt that they are indeed possible and feasible. His life serves as a beacon for others to follow; it serves as an inspiration for others.

[Lord Ram not only shows them the path of ‘Dharma’—i.e. the path of righteousness, nobility, propriety, probity, auspiciousness and nobility, but also sets for them high standards of ‘Charitra’—i.e. high moral character, excellent levels of ethical behaviour, exemplary levels of personal virtues and positive traits, and a stellar example of an ideal life that is worth emulating, honouring and adoring.]

Those who repeat his divine name ‘Ram’ are blessed with the virtue of ‘Gyan’—i.e. they inculcate true knowledge, wisdom and enlightenment which leads to their becoming self-realised and Brahm-realised.

[This is because the name of the Lord, i.e. ‘Ram’, is no ordinary name but has profound spiritual and metaphysical importance and significance which is described in this Upanishad as well as in the Ram Rahasya Upanishad. The name ‘Ram’ is a synonym for the supreme transcendental Brahm, and hence stands for the pure conscious Atma, the soul, which is the truthful ‘self’ of the spiritual aspirant. This realisation leads to his spiritual Mukti, or liberation and deliverance from the bondage of ignorance and delusions which had hitherto shackled him to this artificial world of material sense objects that are perishable and the cause of all his miseries and torments, as well as to the gross body which he had been erroneously thinking to be his ‘self’. Once the light of Gyan is shown in the worshipper’s inner-self, all darkness arising out of A-Gyan, or ignorance of the truth that leads to delusions, is dispelled.

In other words, Lord Ram shows the world that he is called ‘Ram’ because he has strictly followed and established these eclectic tenets or auspicious principles of life, and if they do so they too can be similarly honoured.] (4).

5. He bestows the spiritual virtues of ‘Vairagya’—i.e. renunciation, dispassion and detachment towards this material world and its sense objects, in the heart of those who do ‘Dhyan’—i.e. those who remember, contemplate and meditate upon the Lord’s divine and glorious virtues, his being as the personified form of the supreme transcendental Brahm, his teachings, and the truth of the pure conscious Atma, the ‘truthful self’, by meditating upon it.

For those who worship his divine form, he provides them with abundant ‘Aishwarya’—i.e. fame, glory, majesty, magnificence, authority and powers.

[Only a person who possesses exclusive right on something can give it to others. So, when it is said that the Lord bestows some largesse to his devotee, whether in the form of Dharma, Gyan, Vairagya or Aishwarya, it follows that the Lord has an undisputed sway, lordship and command over these virtues in this world. That is why he is called a ‘King’ and ‘Ram’. ‘King’ because he is very liberal with his largesse, and ‘Ram’ because he is ever ready to take good care of this world.] (5).

6. Great Yogis (acclaimed and realised ascetics) spend their time contemplating perpetually upon Lord Ram who is ‘Anant’—i.e. who is eternal and without an end,

who is 'Nitya-Anand'—i.e. who is always blissful and full of happiness, and who is 'Chid-Atma'—i.e. who is an enlightened soul, the pure consciousness that is the 'true self' of the entire creation, the soul that is unqualified supreme Consciousness, pure and uncorrupt. In other words, Lord Ram is a personification of the supreme Soul (Parmatma or Brahm) who possesses the eclectic virtues of being Anant, of being Nitya-Anand, and of being Chid-Atma.

Hence, Lord Ram is personified Supreme Being known universally as Parmatma or Brahm. This divine Lord had manifested as a human being specifically on the prayers of Lord Brahma. [That is, the unqualified, un-manifest and attribute-less Divinity called Brahm had revealed himself in the form of Sri Ram, who is an image or personification of that Brahm, on the prayers of the creator Brahma. This refers to the episode in the Purans wherein all the Gods and mother Earth, in the form of a holy cow, had approached Brahma and requested him to find a way to protect them from the horrors unleashed by the demons led by their king Ravana¹. At that time, they had prayed to Lord Vishnu who promised to come to earth as a human being to eliminate the demons. His incarnation or manifestation on this earth is called 'Ram'.]

Hence, the manifested divine Being known as Ram, and the un-manifest divine Being known as Vishnu are one and the same (6).

[Note—¹The story of the demon king Ravana has been elaborately described in Adhyatma Ramayan of sage Veda Vyas, in the epic's Uttar Kand, Cantos 1 and 2. An English version of this great epic has been published separately by this humble author.]

7. The supreme transcendental Brahm is 'Chinmaya'—i.e. an embodiment of enlightenment, wisdom and pure super-consciousness.

Brahm is 'Advitiya'—i.e. he is unique, matchless and without a parallel, being non-dual or 'Advaitya' by nature.

Brahm is 'Nishkal'—i.e. he is without any faults, shortcomings, taints and blemishes of any kind whatsoever.

Brahm has no 'Sharir'—i.e. he has no physical gross body with definite attributes and characteristic features, because essentially Brahm is a sublime, subtle, unqualified, attribute-less, formless and ethereal entity which has no grossness, no physical shape, no inhibitions and limitations that are imposed by a physical structure such as a gross body made up of the five elements (earth, water, fire, air/wind and sky).

But for the sake of those who worship and adore him as well as to fulfill their wishes and accomplish certain tasks for them, the same supreme transcendental invisible Brahm who has no qualifications, attributes and gross body manifests himself in a divine visible form which has physical qualities and attributes. [In other words, the invisible becomes visible; the attribute-less becomes one with attributes; the un-qualified assumes certain qualities; the sublime and subtle becomes gross. The transcendental Brahm becomes a human being. But in spite of this transformation, Brahm retains his inherent immaculacy, supremacy, divinity and sublimity much like the fire element that retains its grand virtue of being pure itself and being able to burn all impurities to make an entity pure (such as the case of purifying gold by putting it in fire), and its ability to illuminate its surroundings with its inherent light even if it has to reveal itself in such gross, degrading, demeaning and ignominious conditions as those needed to burn a huge mound of garbage or to cremate a dead body. In the case of the fire burning the dead body, it is actually the liberation that the Fire God provides to the soul by helping it to reduce to ashes its prison-like body and set its self

free from its snare. But it must be remembered that this instance of the fire that burns garbage, reduces even the costliest things to ashes, and even burns dead bodies represents the destructive force of creation, but it does not in any way affect the inherent goodness of the fire element as being the harbinger of life by providing this creation with warmth, heat, energy and light, as being a universal purifier and cleanser, as being immaculate and pure itself, and as being the most sacred entity in creation. This is why all offerings intended for the Gods are offered to the fire during the fire sacrifice instead of them being offered to the other elements of creation such as sky, air, water or earth.

In the same way, even though Lord Vishnu (who is regarded as Brahm's manifestation at the macrocosmic level, and also known as the Viraat Purush in this form) had to manifest himself as a human being in the form of Ram, the Lord did not lose his basic divinity and holiness. If he acted like an ordinary human at times, it was only to play his part in the cosmic drama or worldly theatre perfectly. All of Lord's works are done to perfection, so how can he not play his role as a human being to perfection? But those who are wise and enlightened realise that Lord Ram's worldly activities, such as his child-hood pranks or his running around in the forest frantically in search of his lost wife Sita who had been abducted by the demon Ravana, his miseries and wailings in her memory, or even his dependence upon the monkey army to overcome the ferocious demons, are only an illusion and do not tell the truth about the 'real' Ram. The knowledge of the 'real' Ram comes from the study of the Upanishads and understanding the profound import of his name 'Ram' as described in them.[To illustrate, a man plays different roles on stage as a member of a theatre group, but his personal life is quite different from his stage personality. A competent actor is he who plays his role to perfection, and therefore it is no wonder that the Supreme Being had played his role to perfection as a human being in the form of Lord Ram when he wailed and lamented for his wife Sita, or had to fight like an ordinary warrior to rescue her from the clutches of the demons!] (7).

8-9. The supreme Brahm who is the Supreme Being has revealed himself in various forms at different times, such as in the form of various Gods and Goddesses who are actually the same divine Lord (Brahm) assuming and playing different roles according to the needs of the creation and varying circumstances.

All the divine virtues and cosmic powers of the supreme Brahm have revealed themselves as various Gods and Goddesses. All these manifestations have different forms or bodies (sublime and subtle as well as gross and physical), different virtues and characteristics, and use a variety of arms and armaments to trounce the evil forces of creation, overcome the pervert and negative traits, and restore the balance in favour of the positive, the righteous and the auspicious forces in creation. All the Gods who exist in this creation are nothing else but myriad extended forms of that one supreme immutable and non-dual Brahm. [It's like the case of a man assuming different roles in his life. For instance, for his son he is a father, for a student he is a teacher, for a wife he is a husband, for an employee he is employer, when traveling by a car he is a driver or a passenger, and so on and so forth. The same thing applies to Brahm, the Supreme Being. In order to keep the wheel of creation moving, he has assumed different roles, both at the micro level of creation as well as the macro level. All these roles though apparently quite at variance with each other are nevertheless different aspects of the same Supreme Being.]

All these different forms of Gods and Goddesses using different arms and means to control and regulate this creation are actually Brahm in these forms to

perform different roles in creation, but none of them is separated or different or distinct or independent from the principal known as Brahm.

Therefore, Brahm assumes an astounding variety of divine forms (as Gods and Goddesses) in creation to serve it and protect its interest—some forms having two arms, some having four, others having six, eight, ten, twelve, sixteen or even eighteen arms¹.

All these divine forms of the Lord hold various signs of their being manifestation of the Lord himself, such as holding a Conch or having a mark of the same on some part of their divine form. [The Conch is a trademark sign of Lord Vishnu. All incarnations of Vishnu had it as a birth mark on some part of the body, usually in the palm of the hand.]

When he (Brahm) reveals himself in the ‘Viraat’ form (literally the huge, mammoth, colossus and vast cosmic form of the Lord that is all-encompassing, all-pervading and all-inclusive, and which is called the ‘Viraat Purush’) at the macrocosmic level of creation, he is said to have thousands of hands (symbolizing the sum total of all the creatures of creation). [In other words, when Brahm assumes the form of this visible world inhabited by living beings having a gross body, he is said to have thousands of hands as a metaphor for his being in all these individual forms. The term ‘thousand’ is only a figure of speech to imply the uncountable number of forms that the same Brahm takes in order to become each living being of this creation.]

The Lord is said to have as many countless shades of colours or complexions, and as many vehicles to move about or mediums to express himself in this world as there are his forms. [From the macrocosmic perspective this refers to the numerous Gods and Goddesses, and from the microcosmic viewpoint it refers to the countless variety of creatures that live in this world. Each has his or her own characteristic attributes, qualities, temperaments, nature and personality traits—which are like his or her ‘complexion or colour’. Since all these forms have their individual desires, aspirations, ideals and motivating factors that inspire them to act in a particular way and express themselves, they are said to have as many vehicles or ‘Vaahans’.] (8-9).

[Note—¹If we take a more broad and holistic approach of creation considering the view of the Upanishads that everything in creation is Brahm personified, then we deduce that not only the Gods but even all the varieties of animal and plant species in creation, right from the single-celled amoeba or simplest of algae and fungi to the most complex of animals and plants, both of astounding variety and magnificent diversity, are nothing but the same Brahm in all these forms. So, while we have a two-armed man symbolizing some God at the macro level of creation, we also have a woman standing for some Goddess. Just like we have benevolent or malevolent Gods and Goddesses, we also have noble, righteous, conscientious, pious and holy human beings, as well as cruel, pervert and sinful ones. Added to this is an un-imaginable variety of animals and plants in Nature. It’s observed that even some plants are blood thirsty like wild animals and cruel human beings—for instance we have the pitcher plant. Then again, not all animals are cruel and wild, for instance we have the cow. Amongst animals we find great diversity—for instance we have herbivores, omnivores and carnivores. Similarly, human beings are vegetarians, non-vegetarians and even cannibals. If we look at trees, we observe that a single tree may have numerous branches, and each of these branches is like a ‘limb’ of that tree. In the animal kingdom, the octopuses have so many tentacles, and the spider has so many limbs. So what is the wonder if Gods and Goddesses have so many limbs and heads because they are all parts of the process of creation in various stages of development and conclusion. Thus, a wise man must understand the essence of what this Upanishad means to convey instead of being bogged down by its imagery and the need to prove things that cannot be proved by any known worldly yardsticks.]

10. It is also imagined that all these countless forms of the Lord need different Shaktis or dynamic forces, powers and strengths, as well as armies or attendant warriors to help them carry out their myriad duties or various roles in creation.

[The Gods who take the lead in giving protection to the heaven and the heavenly bodies have their own armies to help them in performing their designated duties in the heaven. When Lord Vishnu revealed himself as Lord Ram, he too had an army of monkeys to help him eliminate the demons led by Ravana. But it is an imagination of the fertile mind that thinks the Supreme Being needs an ‘army’ to help him. The mind forgets the fact that even the members of such an imaginary army are also one or the other forms of the same Supreme Being as the God or the King under whom these armies live and function, as no living being in creation is exempt from the principle that ‘nothing exists that is not Brahm personified’. Besides this, it is incredulous to even think that the all-powerful and almighty Lord would need some subsidiary help or support to prop himself up. Brahm is the one who helps others, who supports others, who protects others, so it is absurd to think that someone else would help him, support or protect him! So, in effect, these armies of Gods in the heaven and the monkey army that helped Lord Ram on earth are actually the ‘Shakti’ of Brahm in a manifested form helping the Lord carry out the obligation of taking due care of the creation at all levels of existence. Just like a king or an emperor is the chief commander of the army which represents his power and authority, the army of gods in the heaven and the army of monkeys on earth are under the overall command of Brahm known as the Supreme Being in the heaven and as Ram on earth.]

Similarly, one only imagines that there are five individual forms in which the supreme Brahm exists¹, whereas the fact is that all these forms are various revelations of the same non-dual, uniform, indivisible and immutable Brahm. [It must be remembered that the term ‘Brahm’ applies to the ubiquitous cosmic Consciousness that has revealed itself as the Supreme Being known as Vishnu or the Viraat Purush at the macrocosmic level of creation, and as Lord Ram at the microcosmic level of creation.] (10).

[Note—¹There are many ways in which the term ‘five forms’ can be interpreted.

One is that it refers to the five elements of creation—such as the sky, air, fire, water and earth. The entire creation had been moulded out of these five.

The second interpretation is that it refers to the following five deities—the Gods Vishnu (the sustainer and protector) and Shiva (the concluder), the Goddess Durga (who rides a lion and is said to be the warrior goddesses who is the patron deity of warriors), and the Gods known as Surya (the Sun God) and Chandra (or the Moon God), or even Lord Ganesh (the deity who is worshipped before all other Gods, and is said to be the one who helps the worshipper overcome all hurdles and obstacles in any endeavour).

The third way to look at it is that the five divine forms of Brahm are the three Gods of the Trinity such as Brahma, Vishnu and Shiva, the Shakti or the cosmic dynamic energy of these three Gods revealed as Mother Goddess, and other countless Gods and semi-gods. Similarly, Prakriti or Nature is also one of the forms of the Shakti of Brahm. This Prakriti can be regarded as a form of Mother Goddess because the entire creation is conceived and developed in its vast bowl much like an embryo that grows in the womb of its mother. Actually, all of them are the same supreme Brahm revealed in these forms, either as the cosmic Father or as the cosmic Mother.]

11. Hence, right from Brahma, the creator and the progenitor of this creation, till the culmination of the process of creation and its very end, i.e. the whole creation

consisting of the animate as well as the inanimate world, right from its conception till its conclusion, is represented by the single word 'Ram'. This name of the Lord, which is 'Ram', encompasses everything in creation; it is synonymous with the whole gamut of creation. Its powers, potentials and prowess, its effect, impact and influence, are as stupendous, glorious and far-reaching as the meaning of its constituent letters (Raa and Ma).

[This fact is the subject matter of not only the present Ram Tapini Upanishad but also of the Ram Rahasya Upanishad. The significance, the glories, the spiritual value and the metaphysical importance of the two letters of Lord Ram's name, i.e. 'Raa' and 'Ma', have been extensively described in both of them. It is obvious here that 'Brahm' is implied when one speaks of 'Ram'. Since the entire creation is a revelation of Brahm, it naturally follows that it is also a revelation of 'Ram' if we are wise enough to realise that when the Upanishad refers to Lord Ram then it is not referring to some human king of Ayodhya but to the Supreme Being himself in this divine form.]

Hence, considering the fact that this Mantra of Lord Ram consisting of his divine name ('Raam') is the best and the most powerful and effective Mantra¹ amongst all the Mantras, one should accept it with the greatest of faith and reverence—i.e. be baptized with this Mantra and be initiated into the spiritual path by accepting the Mantra 'Raam' as one's meticulously and diligently chosen Mantra for the purpose of contemplation and meditation. In fact, this Mantra is the best one to be baptized with. One should repeat it constantly, consistently and persistently, with due faith, belief, diligence, sincerity and steadfastness. Without it, it is not possible to please the supreme Brahm. Since it is synonymous with and covers the entire gamut of existence of all the Gods (i.e. all of them come under its ambit and definition), repetition and worship of this single Mantra 'Ram' pleases them all. That is, by honouring Lord Ram one is deemed to have honoured all the Gods and divine forces of creation simultaneously. When one does Japa (repetition) using the divine Mantras of Lord Ram, he is deemed to have done Japa with all the Mantras of all the Gods combined. It is like a single-window solution to all the spiritual ills of Jiva (the living being) (11).

[Note—¹A *Mantra* is a spiritual formulae consisting of single letter or a group of letters forming words or phrases or even sentences that have great spiritual value and metaphysical importance for the creature. The Mantra has immense power and potential, and is the medium by which the creature can harness the dynamic energy of the various cosmic forces of Nature. Doing Japa with the Mantra has a multiplier effect and act as aids in the creature's pursuit to attain his desired objectives. The significance of a Mantra has been described in the following verse no. 12.]

12. Whatever deeds and actions an aspirant or seeker does or undertakes to do to achieve his goal are successful through the medium of a Mantra. The Mantra is a medium by which desired results are easily and comfortably attained; they are aids to one's fulfillment of desires and objectives in life—whether mundane or spiritual¹. A Mantra makes the attainment of the desired goal a certainty.

A Mantra indicates the result or rewards that can be expected by using it just like a certain ingredient in a medicine can indicate in advance what one can expect by the use of that particular formulation. [This is because each Mantra is like a mathematical formula, and each hymn is like an equation. Even as definitive results follow the use of certain pre-determined formula and equation in scientific quest or mathematical calculations, definitive results are also expected by employing specific

Mantras for doing Japa (repetition) or Yoga (meditation) and Dhyan (contemplation) with specific objectives in mind.]

The word Mantra is derived from two words—the first word is ‘*Manan*’ which means to persistently remember something so as to make the mind firmly rooted in it, to ponder and contemplate upon it, to deeply think about it and meditate on it so that one can arrive at some certain conclusion about the truth of that particular thing, while the second word ‘*Taan*’ means to give freedom and protection from some kind of torment or miserable condition, to deliver someone from his miseries and predicaments etc. Hence, a Mantra is an instrument by the help of which a person can find spiritual liberation and deliverance from his worldly torments and miseries. This is achieved by concentrating upon the Mantra, by relying upon its mystical powers and spiritual potentials, and using it to do meditation and contemplation. Constant repetition of the Mantra helps to multiply its effect and reinforce its earlier benefits. [Repetition of the Mantra is necessary for its full benefits to accrue and take effect. It’s just like the case of a patient having to repeat a medicine over a long period of time to get rid of some chronic disease. If he stops taking it before the disease is completely routed, then not only would the disease relapse but it would do so with a vengeance. Another example can be cited about a man’s skills and expertise in a professional field—if he discontinues using his knowledge and skills after some time in life, he forgets about them and gets out of tune. All the long years he had spent acquiring the knowledge and the special skill go to a waste if they are not practiced for a lifetime. Similarly, repetition of Mantras and practice of meditation is a life-long process, and a wise man should persevere with them.] (12).

[Note—¹In the present case, this Mantra that is employed for doing Japa is the ‘Ram Mantra’ which is a Tarak Mantra (refer Ram Uttar Tapini Upanishad, Canto 2, verse no. 1). This indicates that the aspirant seeks his final spiritual liberation and deliverance rather than hoping to get some worldly gain by employing it. Being a ‘Tarak Mantra’ instead of an ordinary Mantra, this Mantra of Lord Ram is the one that liberates the person from all spiritual delusions and worldly snares, and therefore to use it for some worldly accomplishments or gains would be absolutely absurd and ridiculous.

Again, since the Mantra of Lord Ram pertains to the cosmic Divinity known as the supreme transcendental Brahm which is pure Consciousness and the Absolute Truth of creation, it follows that a person who repeats this Mantra is deemed to be most enlightened and self as well as Brahm realised. He is deemed to have understood the great Truth of the ‘self’ and the Atma. He is rich with the divine virtues of Vairagya and Gyan as described in verse nos. 4-5 of this Canto 1 above.

While the eclectic Ram Mantra is used by a spiritual aspirant for his liberation, deliverance, emancipation and salvation, other Mantras of various demonination are used by other ordinary people to fulfill their worldly needs and desires, such as the case when one does a fire sacrifice to attain certain objectives in this world and uses various Mantras to successfully complete it. Such exercises are done with some sort of worldly aim in sight, such as acquiring various mystical powers called the Siddhis, or getting established in this world and attaining name, fame, majesty, strength, powers, material prosperity and wealth in this world, or for obtaining victory on opponents, and many other such desires and wishes for which a man usually uses a Mantra. But it is like bartering away the value of a precious gem in exchange of glass or worthless stone.

Every Mantra has a divine aspect; all of them have their own potentials and powers that are intrinsic to them, but it actually depends upon the user how good he makes of it. The wise one amongst them would obviously employ the stupendous powers and potentials inherent in any Mantra to obtain something of an eternal, abiding and matchless value—and what better use can one put the powers of the

Mantra than to use it to find permanent freedom from the fetters that tie his soul to this deluding and tormenting world of a continues cycle of birth and death along with its attendant horrors and miseries.

And to top it all, if such a wise man happens to be privileged enough to come across a Mantra that is the best of them all, and which can be thousands of time more effective by putting in the least of efforts, and which gives direct access to the supreme Authority in creation which has the authority and power to grant the much-desired and much-awaited freedom for the seeker, what more can he want. Such a Mantra is this glorious ‘Ram Mantra’ which is the ‘Tarak Mantra’. It is divine, sublime, priceless and matchless in spiritual value, and provides a direct access to the supreme Brahm. This Mantra can provide ‘Mukti and Moksha’ single handedly; it is one-stop solution for all the spiritual woes of the creature as it bestows upon him liberation, deliverance, emancipation and salvation at one go. That is why those who accept it as their spiritual formula are deemed to be the wisest and the most enlightened souls in this creation. A man who comes to know about Lord Ram’s ‘Tarak Mantra’ would discard all other Mantras and accept this single Mantra wholeheartedly as a penance for all his spiritual problems.

This single Ram-Mantra is the letter and the spirit, the essence and the life of all the Mantras taken together. It is like the juice of all the Mantras extracted for the spiritual benefit of the spiritual aspirant. It combines at once all their varied meanings, their uses and goals, their holiness and divinity, their supernatural powers and mysticism. It is indeed like the crown jewel of all the Mantras, and it has the power and potential of all the Mantras put together into a single formula.]

13. The Mantra of a deity is a complete representation of that deity. In the present case, the Ram-Mantra is a complete manifestation of the supreme transcendental Brahm, the Supreme Being and the Lord of the entire creation, who is known as Ram in his visible microcosmic form, and as Lord Vishnu in his invisible macrocosmic form.

The great and unique virtue of the Lord is that he is ambivalent—i.e. he is equally present in opposing or contradictory things and situations simltenously and at the same time.

[This presents a great paradox about Brahm, and is also the reason why the pronoun ‘it’ is generally used to refer to Brahm—because it is ‘neutral’. An entity that is neutral can survive with equal ease in situations having opposite forces. We learn from the scriptures that the entire creation is a manifestation of Brahm, and we also learn that this creation has an astounding intensity of variations and contradictions woven into its texture. For instance, we have a cauldron of fire such as the blazing sun existing side by side with the moon which is cold, we have the Sata Guna which is a noble quality coexisting with the Tama Guna which is the most abhorable quality that anyone can possess, we have the light of the day as well as the darkness of the night existing simltenously in different areas of the same earth, it is also possible to have a family rejoicing the birth of a son and lamenting the death of another at the same time, and the list can go on endlessly. In brief, the point is that Brahm does exist even in the most unimaginable of opposing situations—simply because nothing exists or happens without Brahm, or because Brahm is an all-pervading, ubiquitous and ambivalent entity.

When this neutral-gendered Brahm assumes some kind of form, however sublime and subtle it might be, such as the form of the Viraat Purush, the pronound ‘it’ is now replaced by the pronoun ‘he’ as the Viraat is visualized as the cosmic ‘Purush’ or the cosmic ‘Male’ aspect of creation. The basic reason is that in order to initiate the process of creation, the supreme Brahm provided the ‘spark of life’, and

this spark was like the primordial cosmic ‘sperm’. Hence, in its role as the creator, Brahm assumed the form of a cosmic ‘Father’ who is a ‘male’, a ‘Purush’, and hence the use of the male pronoun ‘he’ for this new role of Brahm. At the cosmic level of creation, this primary ‘Purush’ was called Vishnu or Viraat—‘Vishnu’ because Brahm had assumed the responsibility of sustaining and protecting the creation, and ‘Viraat’ because of his cosmic, all-pervading, all-encompassing and infinitely vast form. At the cosmic level Vishnu is invisible and without a physical body, but when he decided to reveal himself on this earth he assumed a gross form having a body in the form of an incarnation, such as Lord Ram in the present Upanishad. This incarnation too was in a male form. Hence, all such incarnations of Vishnu are regarded as manifestations of Brahm, the Supreme Being.

The dynamic forces and the cosmic energy of Brahm that the latter uses to get on with the objective he had assigned for himself came to be known as ‘Shakti’ at the cosmic universal level of creation. Being a neutral gender, the pronoun ‘it’ is employed when we deal with the primary Shakti of Brahm. But when Brahm transformed into the Viraat Purush or Vishnu, this Shakti of Brahm also transformed itself into a counterpart of this new form as some ‘Goddess’, such as Laxmi who is the divine consort of Vishnu. So, as the creation progressed from the invisible and subtle level to a more grosser and visible level, and the primary Shakti of Brahm metamorphosed as various Goddesses, the pronoun ‘it’ that was used for ‘Shakti’ is now replaced with ‘she’ as these Goddesses are in a female form.

The reason for the Shakti assuming a female form of a Goddess is that though the Supreme Being provides the ‘vital spark of life in the form of the sperm’, the resultant embryo that formed needed a place to lodge and incubate till the time it matured and emerged as the world we know today. This crucial role of first accepting the cosmic sperm and then acting as the cosmic crucible or womb where the resultant embryo would be lodged, where it would get its nourishment, where it would incubate and develop till the time it was mature and independent enough to emerge as the world we see today was played out by the Shakti of Brahm which took the form of a Mother Goddess to carry out these functions on behalf of Brahm.

When Brahm, the Supreme Being, revealed himself as an incarnation such as that of Lord Ram, the Shakti revealed itself as the female counterpart, which in the present case is Sita. Since Brahm and Shakti are the two aspects of the same Divinity, it follows that the same Brahm exists both in a male form as well as in a female form. This creation is a huge revelation of Brahm, and therefore it follows that the two opposing forms of a male and a female coexist in this creation as a revelation of the same Brahm performing different functions, one complementing and supplementing the other. These two forms of a male and a female are the same universal Brahm in their individual forms. Therefore, Ram and Sita are inseparable and indistinguishable from one another.

This is the cosmic mystery and the greatest paradox about the Lord. For instance, the Lord is present in equal intensity in the water as he is in the fire; he is at ease in his manifestation as the subtlest element called the sky as he is in the grossest form known as the earth. The Lord’s power is manifested equally in the north and the south poles of a magnet—as is evident from the fact that both the poles would equally attract iron pieces of whatever size.

Extended further, we deduce that the supreme Brahm is present both in the unmanifest, unqualified and attribute-less form as pure Consciousness (present in all the living creatures as their Atma), as well as in the form of a manifest, qualified form that has specific attributes and characteristic features as Sri Ram (the king of

Ayodhya). The Lord's Shakti is revealed in a female form as Sita to accompany Brahm in his male manifestation as Lord Ram.

In brief, it is envisioned that the eternal, invisible, attribute-less, unqualified and universal Consciousness known as the supreme transcendental Brahm has assumed the visible form that has a gross body, and this form is known as 'Ram'. Brahm's cosmic Shakti is revealed in the female counterpart of Ram as his divine consort 'Sita'.]

The Lord is not easy to please without worshipping his divine form. It is to felicitate worship and help the aspirant to reach his spiritual goal more easily that various divine forms have been devised to offer worship, respects and obeisance to the Supreme Being. So a wise man is one who understands that when he is offering worship to any given deity of his choice he is actually offering his homage to the Supreme Being in that form, and that this Supreme Being is one and not two.

[The system of worshipping a form of the Supreme Being had been devised by ancient sages and seers to make it easier for the ordinary man to honour the Lord as it is much easier and practical to recognize and honour someone with physical characteristics and attributes rather than someone who is unknown, invisible and unimaginable. Even the Mantra OM—which is universally recognized as a medium to attain Brahm and obtain self-realisation by employing it do Japa and Yoga—is also a symbol of the Supreme Being. When we wish to reach a certain place, we need to know some landmark or sign so as to recognize the place. Otherwise we may have actually found it but would miss it because we do not recognize it. Similarly, by worshipping some form of the Lord, it is easy to recognize the deity to whom worship is being offered. It helps the mind to become concentrated and remain focused, instead of getting confused and disoriented. A visual form of Brahm, a form that has definable attributes, virtues, qualities and characteristics is easy to relate to than an entity that is absolutely abstract and beyond comprehension in spite of it being an unequivocal and ubiquitous truth. For instance, it is easy for us to understand what 'water' is than to understand what a vapour or a moisture is, or what H₂O is because we come in contact with 'water' in our daily lives but do not have much of a daily use of any of the other forms of water.

The deity acts like a 'peg' to tie the rope to; it acts as a nail or the 'Kilak' to fix the mind; it acts as an anchor to keep the spiritual boat from drifting away in the vast sea of various philosophies and doctrines only to get lost somewhere down the line.]

To make the process more easier, special 'Yantras' have been devised which serve the same purpose as worshipping the divine form of the deity. In other words, the Yantra is deemed to be a symbolic body or the physical form of the deity that is being worshipped and honoured. It has the same spiritual value, potential and power as direct worshipping of the concerned deity.

[The Yantra is therefore regarded as being a symbol of the Lord himself. The Yantra is a worship instrument or apparatus in the form of a geometrical diagram of different patterns, and it incorporates the various Mantras of the Lord and his many manifestations which are marked on it. The main Mantra which is placed in the center of the Yantra is dedicated to the deity to whom this Yantra pertains, and the rest of the Mantras are placed in accordance to certain fixed pattern. It is just like the construction of a complicated machinery that is custom made in order to fulfill specific requirements. Even if one part is wrongly placed or omitted, the entire machine either fails to function or deliver the desired result. Likewise, it is very important that the greatest of attention is put on the placing of the Mantras at the correct point in the Yantra. Again, as complicated machines require skilled technician

to operate them, the Yantra should also be handled carefully by those who are experts in it, and should not be fooled around with by non-initiated persons.] (13).

Thus ends Canto 1 of Ram Purva Tapini Upanishad.

*__*__*__*

Section 1—Ram Purva Tapini Upanishad

Canto 2

[Canto 2 continues with the ideas of Canto 1 by further outlining the divine glories of Lord Ram.]

1. The Lord (i.e. Sri Ram to whom this Upanishad is dedicated) is ‘self born’ or ‘self revealed’—i.e. the Lord is ‘Swaayambhu’. He does not require any external medium or cause to reveal himself in a visible form; he has no one from whom he is born. This is because he is eternal and without an end, so there is no question of his taking a new birth, as he is always present, and had never died. It is only that he makes himself physically visible that creates an illusion of the Lord taking a birth or coming into being, and his vanishing from sight when he so wishes or when his job in the visible form is done that he is regarded as leaving this world for his heavenly abode. In fact, the Lord is uniform, universal, constant, immutable, imperishable, omnipresent and eternal, not needing to go anywhere and not needing to come from anywhere. [He reveals himself without any cause whatsoever, or waiting for any reason to do so, for he does it out of his own free will whenever he deems it fit, necessary and proper.]

The Lord is an embodiment and an eternal fount of ‘light’ as he is a personified form of the cosmic Consciousness that is eternally self-illuminated. Hence, the Lord does not require any other source of light to illuminate him or make his presence known. That is why he is honoured by the epithet ‘Jyotirmaya’—i.e. an entity that is ‘lighted’ and ‘illuminated’.

The Lord is without an end or beginning; he is eternal and infinite; he has no measurable dimensions and attributes—i.e. he is ‘Anant’. [Even though he appears to have a defined form as a human being, but essentially he is un-definable, unqualified, attribute-less and immeasurable, as well as is beyond the limiting factors of time, space and matter.]

In fact, he shines from his own self-generated light or illumination; he makes his presence evident by itself, requiring no other proofs to establish his presence, truthfulness, authenticity and veracity—i.e. the Lord is ‘Swamev Bhaasate’. [His form is eternally illuminated and radiant, symbolizing enlightenment, wisdom, erudition and pure consciousness. He is like the self-evident and self-illuminated Sun in the sky which does not need any proof to establish its presence or anything else to keep it illuminated.]

He pervades throughout this living creation or world in the form of Consciousness; it is he in the form of ‘pure consciousness’ that resides in all Jivas (living beings) in this creation. It is he who has established this creation and keeps it established; it is he who supports this creation and the life in it (1).

2. The Lord himself is the one who is the cause of the creation coming into existence; he is the one who sustains and protects it; he is the one who finally concludes it.

Towards this end, he willingly utilises the three basic qualities called the Gunas that act as catalysts to give effect to the Lord's wishes. These three Gunas help to bring about a particular change in creation, and modify the existing equilibrium in accordance with the wishes of the Lord.

These three Gunas are the following—Sata Guna, Raja Guna and Tama Guna. The dominance of the first quality called Sata Guna results in the emergence or retrieval of this present creation from the darkness that had prevailed after the previous phase of creation was annihilated. The dominance of the second quality called Raja Guna is responsible for the growth, the development, the sustenance and protection of creation that has come into existence. And finally, the third quality of Tama Guna brings about the conclusion of the existing creation.

Just like a huge banyan tree is secretly and imperceptibly present in its seed, only to emerge when the situation is conducive for its birth, this entire creation is secretly present in the supreme Lord and waiting for the right conditions that would cause it to emerge into a vibrant world. [And this 'right condition' is created when the Sata Guna becomes a dominant factor.]¹ (2).

[Note—¹It ought to be noted here that all these three Gunas are always present in this world, but in varying degrees. Under normal conditions equilibrium is maintained, but when certain Guna becomes more active or dominant this equilibrium is disturbed, and this results in a change becoming possible. The three Gunas play the role of a catalyst in effecting this change. Even as a computer can only function on the basis of its configuration and soft-wares installed into it, the creature was conditioned to act according to the ratio of these three Gunas built into his thought texture and personality traits. In the present case, when the creation was harboured in the bosom of the supreme Brahm, a quiet balance was in place. When the Lord decided to see the creation come into existence once again after a long hibernation period after its conclusion at the end of the last phase of creation, his mere wish ignited the Sata Guna to become active and charged, and this stirred up the cosmic ocean of quietude which resulted in the first ripples of creation. This has been envisioned by ancient sages and seers as the stirring of the primordial cosmic ether or the cosmic gel that created subtle waves of energy that coalesced with one another and overlapped each other to become energized and gather strength. This produced the primordial sound that has been conceptualized in the form of the Mantra OM. And from this initial whirring and humming came into being the rest of the elements as the primordial cosmic gel began to show signs of losing its homogeneity and becoming more and more heterogeneous.

As the cosmic cauldron began to cool down and the various constituent layers of creation began taking shape, the Sata Guna, being the best and the most sublime of the three Gunas, floated to the surface like butter does in milk. The Tama Guna, being the grossest of the three Gunas, was the heaviest, the meanest and the densest, and therefore it settled at the bottom. Meanwhile, the Raja Guna, being of an intermediary character, occupied the place between the two. There was no fine and well-defined demarcation line between them, and the demarcation was more of being relative in nature. Hence, there were areas where the three intermingled equally, while at others one Guna dominated over the other two.

The Tama Guna, being crude, acidic and corrosive by nature, eroded the part of the creation where it dominated, explaining why the creation ends when this particular Guna becomes dominant. This also explains why the creature in whom the Tama Guna is a ruling character soon lands in grave spiritual trouble. But since the Sata Guna has a natural quality to look up and regenerate, this creation re-emerges from its ruins when the Sata Guna takes over the Tama Guna in a new phase of creation. The Raja Guna helps the nascent creation expand and develop to its full potentials under its patronage. It provides the necessary warmth, energy, stamina and

dynamism necessary for growth and development. When the peak is reached, then like the sine wave the downward slide begins, reaches the bottom, and then picks up momentum once again to resurface as a new creation. This is briefly how the cycle continues and the wave of life oscillates infinitely.

The entire process of creation that followed has been explained in various Upanishads in varying languages, but basically all of them assert that Brahm had utilized these three Gunas to effect a change in the prevailing situation as and when the Lord deemed it fit and proper to do so.

The three qualities mentioned above are as follows:-

(i) Sata Guna—it is the most superior of the three qualities. It represents creative thoughts, positive attitude, characteristics of service, humility, devotion, nobility, virtuousness, righteousness, auspiciousness etc. That is why Brahma the creator was wise and created the primary scriptures called the Vedas, and all the inhabitants of this world were law-abiding citizens who respected the laws of Nature and paid homage to the forces of Nature personified as various Gods. Sins and vices were non-existent. But as the supreme Brahm had wished that 'change be the norm rather than the exception' in his creation, because if there was no change the world would stagnate and become stale, its development and growth would stop, and then the very purpose of effecting some change in the quietude of the cosmos that prevailed after its last phase was annihilated would be defeated. So Brahm ensured that 'change' would be automatically built into the creation he has initiated, and towards this end he made these three Gunas as fluid as possible. Even a slight stir is enough to disturb the balance and set in motion some change.

(ii) Raja Guna—it is the second quality producing worldly desires, passions, ambitions, stormy nature, expansionist tendencies, desire to obtain lordship and dominant role in creation etc. This Guna kept the creature engrossed in this world of material objects. The Lord built this Raja Guna into the texture of this creation and as an integral part of a creature's mental tendency and thought processes to ensure that he remains interested in keeping the wheel of creation turning on behalf of the supreme Creator known as Brahm.

(iii) Tama Guna—it is the third and the most mean and base of the three qualities that represent such negative traits as sins, vices, misdeeds, anger, wrath, vengeance, deceit, conceit, recklessness, jealousy, hatred etc. Obviously, when such traits are dominant in any society, it becomes degenerate and decays to an end rapidly. To say that Brahm brings about the conclusion of creation by taking the help of Tama Guna is a metaphoric way of saying that when these negative factors become the norm rather than the exception in any society, it is bound to fail, disintegrate and wither away on its own. Brahm brings about the conclusion by unleashing the Tama Guna in the world.]

3. Similarly, the whole animate as well as the inanimate world is intrinsically and latently present in the Beej Mantra or the seed/root Mantra of Lord Ram. This Beej Mantra is 'Raam/Raan(g)'. The very fact that it is called a 'Beej' clearly indicates that it is the 'seed' from which the rest of the creation has emerged (just like the case of the huge banyan tree emerging from its seed as cited in verse no. 2 of this Canto above). [Refer also to Ram Rahasya Upanishad, Canto 5, verse no. 9 which deals with the same subject and in almost an identical language.]

All the three aspects of creation (i.e. origin, sustenance, and conclusion) are represented in the form of the three deities of the Trinity (as Brahma who is responsible for creation, as Vishnu who is responsible for sustenance and protection, and as Shiva who is responsible for conclusion).

Since the supreme Lord (in this case Lord Ram who is personified Brahm, the Supreme Being) is the foundation of this creation, since he is the one who is the

supreme creator, sustainer and protector, as well as the concluder (as noted in verse no. 2), it follows that all these three aspects of creation and their representative deities are dependent upon the Lord for their existence and importance.

Again, since the Lord uses his cosmic dynamic powers to bring about change and give effect to his wishes of creating, sustaining and concluding this creation, it follows that the female counter-parts of these three deities (Brahma, Vishnu and Shiva) are in effect the 'Shakti', or the dynamic energy as well as the stupendous cosmic power, authority, ability and strength of the supreme Lord (Ram or Brahm) in a personified form.

Since the letter 'Ra' (pronounced as in *run*) of the Sanskrit language is the fundamental letter of the Beej Mantra of the Lord, which is 'Raam/Raan(g)'¹ and which is regarded as the 'seed' ('Beej') from which the rest of the creation has emerged (as explained above), it follows that all the three aspects of creation represented by these Gods and Goddesses rest upon or have their foundation upon this basic letter of the Lord's name¹.

Those who are wise, erudite, enlightened and Brahm-realised are aware of this fact (3).

[Note—¹The word 'Ram' or 'Raam' ('Ra/Raa' as in *rather* or *ration*, and 'M' as in *mum* or *come*) consists of four distinct sounds of the Sanskrit language—the consonant 'Ra' (as in *run*, *rung*), the long vowel sound 'Aa' which is the second vowel (as in *rather*, *arm* or *father*), the basic vowel 'A' which is the primary sound in any language (as in *a* table; *amongst*) and the consonant 'Ma' (sounded as in *mum* or *come*).

Lord Ram is represented by the basic letter 'Ra' of the word 'Ram' without which it would not have any existence. This is symbolic of the fact that without the Lord, the creation would not have any existence. Now, since Lord Ram is the supreme Creator, it follows that the letter 'Ra' also stands for Brahma, the creator of the visible world. With the same analogy, the second letter 'Aa' of the word Ram represents the sustainer Vishnu because Lord Ram is also the universal sustainer and protector of creation. And finally, since Lord Ram is the ultimate destination of the entire creation, he also represents Shiva, the concluder. Therefore, the last letter 'Ma' of the word Ram stands for Lord Shiva.

The initiation of the sound, the propagation of the sound, and the winding up of the sound, are represented by the three Trinity Gods known as Brahma, Vishnu and Shiva, while the loop which ties them together into one single and wholesome composite mass, or in other words, which completes the circle, is the supreme Brahm called Ram. This concept has been explained in Canto 3 of Ram Uttar Tapini Upanishad.]

Thus ends Canto 2 of Ram Purva Tapini Upanishad.

*__*__*__*

Section 1—Ram Purva Tapini Upanishad

Canto 3

[Canto 3 narrates in brief how the creation has evolved from the esoteric and mystical form of Lord Ram in the shape of his 'Beej Mantra', the basic letter around which the concept of all Mantras of the Lord is based. Since Lord Ram is supreme transcendental Brahm personified, and since Brahm is the cosmic super

Consciousness, the dynamism and the cosmic energy of the latter are revealed in the form of the Shakti (dynamism, authority, energy, potentials, powers, vitality, strength, import etc.) that is inherent in this Beej Mantra. If Brahm has revealed himself as Ram, then his Shakti has manifested itself as Sita, the divine consort of Lord Ram.

Again, since the living being's 'true self' is nothing but this cosmic Consciousness personified as his Atma, his soul, it follows that for a wise, enlightened and self-realised spiritual aspirant his 'true self' is also a personification of Lord Ram! In other words, there is no difference between 'an enlightened and realised soul' and 'Lord Ram'.]

1. Lord Ram and his divine consort Sita are worshipped through this Beej Mantra of the Lord (i.e. the Beej Mantra 'Raam/Raan(g)' stands for Lord Ram as well as for Sita). Or in other words, Lord Ram stands for the Viraat Purush or Vishnu, and Sita represents Prakriti or Mother Nature. [This is because Lord Ram stands for the supreme Brahm, while Sita stands for the Shakti or the dynamic aspect of the cosmic energy and the supreme inviolable powers of Brahm. Even as a king and his powers are inseparable from one another, Brahm and its Shakti are also inseparable and indistinguishable from one another. Brahm and Shakti are in-alienable, and therefore if Brahm reveals himself as Ram, his Shakti accompanies the Lord as Sita. As creation unfolded, Brahm came to be known as the 'Viraat Purush' or the primordial Male aspect of creation who provided the primary spark of life into the primordial cosmic gel to initiate the changes that would ultimately lead to the rolling forward of the wheel of creation. This form of Brahm was called 'Viraat' because of its colossus size and cosmic contours, and 'Purush' because it provided the first spark—or 'sperm'—of life. Brahm's dynamism and cosmic energy known as Shakti that brought about this change was called 'Prakriti' or Nature because it gave effect to the desire of Brahm to create and then sustain this creation in a perpetual manner by first conceiving and then harbouring and providing nourishment to the embryonic creation in its initial stages, and its subsequent development and growth. It was called 'Nature' because of two reasons—one, the primary Gunas, such as the Sata, Raja and Tama, that were used by the supreme Creator to inject certain qualities to the cosmic embryo determined the 'nature' of the off-spring that was eventually produced from it, and two, once the process of creation was set in motion, it took its own 'natural course' of evolution and development based on the laws of 'Nature' that 'naturally' came into force. All these factors were responsible for calling the primary form of creation as Prakriti or 'Nature'.]

It is from them (Ram as the 'Purush' or the primordial Male, and Sita as the 'Prakriti' or primary Nature) that the fourteen Bhuvans¹ (or the fourteen symbolic areas of the world) came into being.

It is from this cosmic form of the Lord that these Bhuvans (i.e. the entire gamut of creation) have come into being, it is this Lord that sustains them and protects them, and it is in this cosmic Lord that all of them would finally collapse into and vanish. [It is like the case of the waves in the huge ocean rising from its surface, developing and growing into huge and formidable walls of water that can often upturn ships and wipe out entire coastal villages when they lash ashore. When these waves have spent their force and energy, they collapse back into the ocean to take rest for some time only to re-emerge with renewed vigour when the time comes for the formation of a new train of high-rise waves. But this cycle of waves does not affect or alter the primary form or nature of the ocean even a tiny bit. Another fine example

would be that of the huge banyan tree emerging from a seed, growing into a huge structure, living its life to the full and dying to re-emerge from a seed once again.]

Lord Ram had assumed the form of a human being out of his own maverick power of creating delusions, called the power of 'Maya'. [This Maya is also a form of Shakti of Brahm, being very powerful and dynamic in its force and effect. This form of Shakti of the Lord is called 'Maya Shakti'. This form of dynamism of Brahm helps the latter to create delusions in this creation, which in turn keeps the creature trapped in the cycle of birth and death as it prevents him from realizing or becoming aware of the 'truth'. Brahm has employed this Maya Shakti to ensure that the wheel of creation rolled by him keep on rolling infinitely till the time the Lord decides to stop it. When he thus decides, he withdraws his Maya Shakti, and all delusions vanish. The concept of Maya Shakti has also been explained the form of a note appended to verse nos. 2 and 3 of the Sita Upanishad which is Chapter 9 of this volume.] (1).

[Note—¹(a) The name of the fourteen Bhuvans according to Padma Puran are— 7 upper worlds- (i) Bhu, (ii) Bhuvha, (iii) Swaha, (iv) Maha, (v) Janaha, (vi) Tapaha, (vii) Satyam; 7 nether worlds—(viii) Atal, (ix) Vital, (x) Satal, (xi) Rasatal, (xii) Talatal, (xiii) Mahatal, (xiv) Patal.

(b) In the beginning there was nothing to start with except the primordial cosmic gel. Then the Lord used his magical skills and stupendous powers to mould the entire creation from this jelly. The most evident example of this process is the formation of the complex human body from the single egg present in the mother and its fertilization by the male sperm resulting in an entity known as a man who is a microcosm of the entire creation. He is an image of the creation because the Lord had created man in his own image, and the entire creation is deemed to be a revelation of the supreme Lord who pervades throughout it uniformly. 'In his own image' is a figure of speech to emphasize the fact that whatever exists in the creation is one or the other form of the Lord, and there is nothing which is not a form of the Lord. Therefore, it would be safe to say that the maverick cosmic creator had no precedent to copy from; he had to go it alone.

The fact that the supreme Brahm created a man in his own image, or that Brahm revealed himself as a human being is endorsed by the Aiteriya Upanishad of the Rig Veda tradition as well as the first chapter on the genesis of creation in the Holy Bible, Old Testament.]

2. 'We bow and pay our respects to the supreme Lord Ram (who is none else but Brahm manifested) who lives in this world and uniformly pervades in it as its 'Atma' and its 'Pran'—i.e. as the creation's soul and its life, as its essence, as its fundamental basis and its core. [This is the reason why Brahm is called a 'Purush'—it is because Brahm lives inside every individual creature as his Atma or consciousness, and as his Pran or vital life factors such as his vital winds. In other words, the body of the creature is the divine abode where this Brahm lives. In fact, the word 'Purush' means one who lives inside a 'Pur' or a city or a dwelling.]¹'

The spiritual aspirant should think of Lord Ram as the Supreme Being called Brahm himself personified. Brahm is the primary and primordial cosmic Consciousness that prevailed even before this creation came into being or was even conceptualized. This form of the Lord (Ram) transcends even the three Gunas (Sata, Raja and Tama) that helped to determine the nature and texture of the would-be creation. It is this form of the Divinity that is worthy of adoration and paying respects to, and the worshipper should bow his head to it.

He should endeavour to establish oneness between his own 'self', i.e. his own Atma, and this supreme Lord, i.e. the supreme Atma. This is called 'self-realisation' and attainment of Brahm-hood. When this is achieved, the spiritual aspirant exclaims

in ecstasy of having discovered the greatest truth of creation as well as of himself—he says ‘I am Lord Ram who is Brahm’; or ‘There is no difference between me and Ram’. This is the highest level of spiritual attainment and marks the pinnacle of enlightenment and realisation² (2).

[Note—¹Having created this world, the Supreme Lord entered it in the form of the Atma, the pure consciousness. This Atma is the soul, the essence of this creation, for if the core is removed the outer structure would collapse as it would have nothing to support it, or nothing to stand on. In other words, the genes of the supreme Father were transferred to his off spring, the creature at the micro level and the creation at the macro level, in the form of ‘Consciousness’, because Brahm is nothing but cosmic Consciousness. Again, since Brahm is the ultimate and absolute Truth of creation, it follows that this Atma representing the supreme Lord is also the Truth in this whole setup. This Atma is the ‘true self’ of the creature because it represents the supreme Lord, Brahm or Ram, and just like the supreme Lord had allowed himself to be surrounded by Maya (delusions) willingly, and thereby got sucked in the vortex of numerous duties pertaining to his own creation—such as its sustenance, protection, nourishment and regulation etc.—a man also gets sucked in this world if he allows his Atma to be surrounded by delusions and ignorance of its exalted heritage.

Another important component of this creation that infuses ‘life’ in it is the ‘Pran’. The word ‘Pran’ means ‘life that is marked by conscious awareness and activity’. In practical terms, both the terms ‘Atma’ and ‘Pran’ co-exist because both are like the two sides of the same coin.

While the word ‘Atma’ means the soul and the consciousness, the word ‘Pran’ means the vital winds that govern the vital signs of life in the gross body and its functioning. In practice, both are synonymous with each other. This is because a creature is alive only as long as his body as the Atma as well as the Pran in it. If one leaves the body, the other becomes automatically defunct.

The importance and interdependence of the Atma and Pran on each other can be easily visualized. The Atma in the form of consciousness is said to have its residence in the heart of the creature. It is common knowledge that life remains in the creature and his organs are kept conscious only as long as the heart beats and supplies blood to the different organs of the body. But say how can the heart beat and keep the creature alive if the Pran or the vital winds decide to call it quits and paralyse the rest of the body, preventing the organs to perform their basic functions, such as the blood vessels to carry blood to the heart, and the tissues to produce energy by digesting food?

Similarly, the Pran, in the form of the vital airs or winds, controls all the signs of life in the creature, and keeps all the organs of the body, the external as well as the internal, alive and active. But say how can it do so if the heart stops beating?

The Lord has been conceptualized as a ‘Purush’—literally meaning ‘one who lives in a Pur, a city or palace’. Refer Brihad Aranyaka Upanishad of Shukla Yajur Veda, Canto 2, Brahman 5, verse no. 18 explicitly as the cosmic all-pervading macrocosmic form of the Supreme Being, called the Viraat Purush, who had entered each and every body of all the creatures and had taken up his residence there. According to the Aiteriyo Upanishad of Rig Veda, Canto 1, verse nos. 3, the supreme Brahm created the vast universe and his image in the form of the Viraat Purush, and the Gods were created from this Viraat—Canto 1, verse no. 4. When the mortal world consisting of the visible world was created, the human body was considered as the best image of the Viraat Purush, and thus all these Gods took up their residence in it—Canto 2, verse nos. 3-5. According to the Brihad Aranyak Upanishad of the Shukla Yajur Veda, Canto 2, Brahman 5, verse no. 18, it was this Viraat Purush himself that entered the body of all the creatures of this creation.

The Mundak Upanishad of Atharva Veda, in its Canto 2, section 1, verse nos. 9-10 clearly affirm that it is the Viraat Purush, the macrocosmic all-pervading gross body

of the supreme transcendental Brahm, that resides in the body of all living beings as their Atma.

According to reverend Sankracharya's commentary on *Kathopanishad*, Canto 1, Valli 3, verse no. 11 and Canto 2, Valli 1, verse no. 12, the word Purush refers to that supreme entity which uniformly pervades in and completely fills everything that exists. It also refers to one who resides inside any place and completely owns that place. Therefore, this word Purush refers to the supreme transcendental Brahm who has taken up residence in the gross body of the creature as the Atma at the micro level of creation, and as the cosmic Atma known as the Parmatma at the macro level. This Brahm pervades throughout them in a uniform way even as the sky and the wind element occupy all available space in the creation. That is also why sky is considered as a nearest analogy of Brahm because even the other all-pervading element, the wind/air, is present in it and not outside of it.

²This realisation is the culmination of one's spiritual exercises. It is the pinnacle of self-realisation and attainment of Brahm-hood.

The declaration that the spiritual makes in this verse finds resonance in the Mahavakyas or the great saying of the Vedas. Some of the Upanishads that describe these Mahavakyas are the following—

- (i) Rig Veda—Atmabodha Upanishad.
- (ii) Sam Veda—Chandogya Upanishad, Canto 6, section 16, verse no. 3 (Tattwamasi).
- (iii) Shukla Yajur Veda—Paingalo-panishad, Canto 3, verse no. 2-3, 8; Mandal Brahmin Upanishad, Brahman 2, section 2, verse no. 5; Brahman 2, section 4, verse no. 4; Brahman 3, section 1, verse no. 6; Brahman 3, section 2, verse no. 2; Adhyatma Upanishad, verse nos. 2, 10 (So-a-Ham), 30-31 (Tattwamasi).
- (iv) Krishna Yajur Veda—Shuk Rahasayo-panishad, verse no. 22; Kaivalya Upanishad, verse no. 16; Sarwasaar Upanishad, verse no. 12-14; Varaaha Upanishad, Canto 4, verse nos. 32, 37; Avadhut Upanishad, verse no. 2.
- (v) Atharva Veda—Atma Upanishad; Naradparivrajak Upanishad, Canto 7, verse no. 8 (Tattwamasi; Ayamaatma Brahm); Tripadvibhut Maha Narayan Upanishad, Canto 5, paragraph no. 15 ('So-a-Ham'); Canto 6, paragraph no. 22 ('Twam Brahmasmi'; 'Aham Brahmasmi'; 'Twamewaaham'; 'Ahamev Twam'); Canto 8, paragraph no. 5 ('Brahmaasmi' or I am Brahm; 'Ahamasmi' or Indeed it is I/me; 'Brahmahamasmi' or I am indeed Brahm; 'Yoahamasmi' or That is I/me; 'Brahmaamashmi' or Brahm is I/me; 'Ahamevaaham' or I am indeed I/me.); Ram Rahasya Upanishad, Canto 5, verse no. 13-14 (Tat Twam Asi—That Art Thou); Ram Uttar Tapaini Upanishad, Canto 3, verse no. 9-10 (So-a-Ham); Annapurna Upanishad, Canto 5, verse no. 8 (Brahmasmi—I am Brahm personified); Mahavakya Upanishad, verse nos. 6-8 ('Hans So-a-Ham'); verse no. 11 ('So-a-Hamarka'—that essence is me); Hayagriva Upanishad, verse no. 15 ('Tattwamasi'—i.e. that supreme essence or truth is you; the second Maha Vakya is 'Ayamatma'—i.e. that essence known as Brahm, the cosmic Consciousness, is my own Atma, my own 'self'; the third Maha Vakya is 'Brahm Aham'—i.e. Brahm is me; the fourth Maha Vakya is 'Aham Brahmasmi'—i.e. I am Brahm).]

Thus ends Canto 3 of Ram Purva Tapini Upanishad.

*__*__*__*

Section 1—Ram Purva Tapini Upanishad

Canto 4

[This Canto primarily deals with three points—(i) It describes the great Tarak Mantra of Lord Ram, and explains its metaphysical and spiritual greatness, importance and significance. (ii) It then outlines briefly the main events in the life of Lord Ram starting from the abduction of Sita by the demon king Ravana, narrating in brief how the Lord freed her by killing the demon, and ending with the Lord's return to his capital at Ayodhya and his anointment as its king. (iii) And finally this Canto describes elaborately the esoteric and mystical Ram Yantra—the magical charm instrument used to formally worship the divine form of the Lord using a matrix-like geometrical figure consisting of an array of concentric rings with an outer square boundary wall of parallel lines. This Yantra is also called a 'Bhupur', and it employs a lot of Beej Mantras of Lord Ram as well as of other deities. It is like a complicated IC used in modern-day electronic gadgets, and therefore it can be called a mystical gadget that is usually used in Tantra philosophy to harness the cosmic forces of creation for the spiritual benefit of the worshipper.

From the perspective of worship of Lord Ram it is deemed to be a divine seat of the Lord or even as a physical form of the Lord just like a consecrated idol of a certain deity is regarded as a personification of that deity.

The Canto outlines the detail of how this Yantra is constructed, and how the various Mantras are placed in it.]

1. The five letter primary Mantra used for dedication and devotion for Lord Ram is basically 'Raamaaye Namaha'. [Raa + Maa + Ye + Na + Maha = 5. Refer Ram Rahasya Upanishad, Canto 2, verse no. 10.]

In this Mantra, the word 'Namaha' refers to the Jiva, the living being, who is reverentially bowing before the Supreme Being represented by the word 'Raamaaye'. Now, the word 'Raamaaye' in this Mantra has two parts—viz. 'Raam' and 'Aaye'. The first part 'Raam' refers to the Supreme Being who has manifested as Lord Ram, while the second part 'Aaye' helps to establish a bridge that links the Jiva, the living being, with Raam, the Supreme Being. It helps the Jiva to realise that his own truthful self is the same divinity or pure conscious Atma that has taken another form as Lord Ram. [In this context, refer verse no. 2 of the previous Canto 3 which also speaks the same thing.]

Hence, the complete Mantra 'Raamaaye Namaha' has many connotations—viz. (i) 'Yes, I, the Jiva, do realise that my truthful 'self' is the same divinity as Lord Ram to whom I pay my obeisance by bowing reverentially'; (ii) 'I bow most respectfully before Lord Ram whom I know to be the Supreme Being'; (iii) 'I bow to the transcendental Brahm known as Ram whom I recognize as being also my own self'.

In other words, this Mantra is the one that is used by self-realised and Brahm-realised creatures who understand the true nature of Lord Ram as being a personification of the supreme Brahm as well as of the cosmic Consciousness that resides in the bosom of all living beings as their Atma or soul. This Atma is the creature's 'true self'.

[The suffix 'Aaye' of the word 'Raamye'—Raam + Aaye = Raamaye—is called the fourth Vibhakti of the word 'Ram'. A 'Vibhakti' is a certain case or inflexion of a word in the Sanskrit grammar.] (1).

2. The basic Mantra dedicated to Lord Ram is 'Raam/Raan(g) Raamaaye Namaha'. [Refer Ram Rahasya Upanishad, Canto 2, verse no. 16. It briefly means 'I bow reverentially to Lord Ram who is represented by the Beej Mantra Raam/Raan(g). This

Beej Mantra has the same spiritual importance and divine significance as the eclectic Mantra 'OM' which stands for the supreme Brahm.' Being the Beej Mantra for the fire element also, this Mantra for Lord Ram implies that the Lord possesses all the virtues of the cosmic fire element, such as him being majestic, powerful, dynamic, vital for life, full of energy and vitality, self-illuminated and illuminating others, divine, holy and purifying as the fire element. So, while on the one hand Lord Ram is the supreme transcendental Brahm personified, and on the other hand he embodies all the virtues of the all-powerful fire element.]

In this Mantra, the words 'Raamaaye Namaha' refer to the person who offers the worship to Lord Ram because he is the one who is bowing before the deity whom he worships, while the Beej Mantra 'Raam/Raan(g)' refers to the fundamental identity of the deity to whom this worship is being offered. In other words, the second part of the Mantra (i.e. Raamaaye Namaha) helps the spiritual aspirant to realise that the deity to whom he is paying his homage in the form of Lord Ram is none else but the supreme Brahm who is referred to in the first part of the Mantra by the Beej 'Raam/Raan(g)'. [Since this Beej is also the one for the cosmic fire element, this Mantra also implies that the deity to whom worship is being offered personifies all the purity, magnificence, splendour, glories and potentials of the fire element.]

A coordination between these two help to synergize their energies and coordinate their powers, strengths and potentials for the benefit of the worshipper so much so that all his desires and wishes are fulfilled. There is no doubt in it (2).

[Note—It is only when the two half of the Mantra are coordinated that the circuit is completed and desired energy generated that can empower the worshipper to achieve success in his spiritual endeavours. A harmony must be established between the worldly form of the Supreme Being as Lord Ram, represented by the word 'Ram' in the Mantra, and his cosmic, almighty and all-pervading divine form as Brahm represented by the Beej Mantra 'Raam/Raan(g)' so that the worshipper, who is represented by the last word 'Namaha' because he is the one who is bowing to pay homage, can actually establish a link between the worldly microcosmic individual form of the Lord as the king of Ayodhya known as 'Ram', and his ethereal divine macrocosmic and all-pervading supreme form as the transcendental, supreme and almighty 'Brahm' represented by the Beej Mantra 'Raam/Raan(g)'.

In this context the word 'Namaha' implies that the wise and enlightened worshipper is bowing before Ram who is not adored so much by him as a great human being or an extraordinary great king but as the manifested form of the Supreme Being himself, a form that is as magnificent, majestic and glorious as the fire element. This wisdom and erudition is absolutely essential if one were to remove doubts and all sorts of confusions, perplexities and schisms that may arise in his heart about the authenticity, the truthfulness and the philosophical import of this Upanishad. He must understand that the Lord he worships, the Lord to whom he is offering his prayers is no ordinary Lord or deity, but is the Supreme Being himself. The Mantra of Lord Ram is no ordinary Mantra but is the almighty and most dynamic of the Mantras as it is honoured by the epithet of being a 'Tarak Mantra', i.e. a Mantra that can provide the spiritual aspirant's soul its final liberation, deliverance, emancipation and salvation that he so earnestly seeks but which had eluded him till this time.]

3. When a person is called by his name, he comes forward or presents himself in front of the caller. Similarly, by the use of the Beej Mantra of the Lord, or repeating it while doing Japa, the devotee or the spiritual seeker is able to have a direct communion with Lord Ram in his primary, divine, cosmic and sublime form as the supreme Brahm that is as almighty and powerful as well as glorious and dynamic as the fire element. The Lord too comes forward or appears before the devotee or the

spiritual aspirant who remembers the Lord and calls him for help by directly using his name, i.e. by directly appealing to him by his personal name that is specific to the Lord¹ (3).

[Note—¹The Beej Mantra of Lord Ram is like his unique identity code. When he is addressed by this Beej he knows that the devotee is one of his close followers because only a person who is dear to someone would have the liberty and the privilege to call the other person by his first name or even by his nick-name. If someone is not too close to person, he would rather use the formal format of addressing him instead of calling him by his pet name or by his informal name. But when anyone is close and intimate with the other person he would prefer the informal address and call the person by his nick-name or his pet name. So, when the devotee prays to Lord Ram with this Mantra, he is directly approaching the Lord or establishing a direct link with him using his pet name so to say.

In this analogy, the Beej Mantra is like someone's pet name or nick-name by which he is fondly known to and informally addressed by those who are very close to him as compared to his formal name and address with which he is known to and addressed by the rest of the world in his formal working life. Hence, the use of the Beej Mantra establishes a close proximity between the worshipper and the deity worshipped, and it creates an environment of informality, closeness, endearment, friendliness and direct access as compared to full names with prefixes and suffixes to represent honours and titles by which we address those in high position in society, such as when addressing a king or a president of a country.

In short, the full Mantra of the Lord that employs his various names and honours would be like a formal form of address of the Lord instead of an intimate form which employs his short name or even his Beej Mantra.

We can look at the Beej Mantra from another angle. It is like a Master key that can open a number of locks—i.e. the Beej Mantra can provide the worshipper access to many of the hidden forces and powers of the deity worshipped that would have been impossible for him to access without this Mantra. The Beej Mantra acts as a booster or an enhancer or a catalyst that multiplies the effectiveness of the other Mantras. It establishes a kind of right-of-way to the deity worshipped.]

4. [Now, after having understood the metaphysical and spiritual aspects of Lord Ram and his esoteric Beej Mantra, the formal process of doing worship and offering obeisance to the Lord is being narrated.]

The spiritual aspirant/seeker should concentrate his mind and intellect on the main word of the Mantra. It is 'Raamaaye'. It consists of three syllables or letters—viz. Raa, Maa and Ye.

The first letter 'Raa' of this word refers to the Beej Mantra (the seed/root Mantra) of Lord Ram—viz. 'Raam/Raan(g)'. The second letter 'Maa' refers to the Lord's Shakti (i.e. his cosmic dynamic energy, potentials and powers revealed as Prakriti as well as Maya). And the last word 'Ye' is the binding force that bridges the gap between the individual Jiva and the Lord, and between the Lord and his divine Shakti. It is therefore called the 'Kilak'—the 'nail' that fixes this oneness between the two, the 'peg' which helps to keep both the Jiva as well as the Shakti permanently linked or attached to their supreme Lord, who in this case is Lord Ram as Brahm personified.

Now, for the purpose of formal worship, the process of Anga-Nyas¹ is being described. The 'Beej' (Raam/Raan(g)) should be meditatively established on the right half of the chest of the worshipper. The 'Shakti' part (Maa) should be established on the left half of the chest. And finally, the Kilak (Ye) should be established in the centre of the chest in the region of the heart. [We note here that on one side of the chest Brahm is established, and on the other side Brahm's Shakti is established. They

are fixed on the body by driving a symbolic nail through the heart which is regarded as the central point of the body and the pivotal point, because without the heart no living being can survive. Further, the Atma or the pure consciousness is also said to have its abode in this heart. It would be observed that the heart is the only organ that actually shows signs of activity by ‘throbbing or pulsating with life’; none of the other internal organs show this physical sign of life. This pulsation of the heart is self-perpetuating, and this shows the ability of the Atma to sustain its own self without any external prop. The Atma is central to the entire living creation.

Brahm is the cosmic Atma, while Shakti is its cosmic dynamism and energy. So, when this Brahm and Shakti are established on the worshipper’s body, they are symbolically linked or wired to the Atma by fixing it with a ‘Kilak’ on the heart. This ritual is a metaphoric way of saying that both Brahm and Shakti are centered on the Atma, and the latter is the pivot around which the whole creation moves.

In other words, the Kilak part of the Mantra helps to link the individual worshipper’s Atma to the supreme Brahm on the one hand, and to Brahm’s cosmic Shakti representing the Lord’s powers, dynamism and energy on the other hand. Therefore, the word ‘Raamaaye’ kind of reminds the worshipper by saying—“Look, you (the worshipper) and Ram (representing Brahm) are one and the same, and the strength, powers, energy, authority and vigour that you have are actually the Shakti of Brahm which is established in you”; or “whatever you are, whatever energy and powers you have, are Brahm and its Shakti on display”; or “there is no difference between you and your powers on the one hand, and Brahm and its Shakti on the other hand”. In this context, refer verse no. 1 of the present Canto 4.]

This process is prescribed for worship and offering of prayers to Lord Ram to seek his blessings so that all the desires, wishes and aspirations of the devotee can be fulfilled (4).

[Note—¹*Anga Nyas*—There are two aspects of invoking any given Mantra and sanctifying the worshipper’s body with them. They are known as (i) Anga Nyas and (ii) Kar Nyas. They are done with any Mantra using its seed or root called the ‘Beej’ of that Mantra, and are the two basic rituals of invoking the divine powers of the Mantras which are basically mystical formulas employed in religious practice, specially during occult rites and meditation of which this Khechhari is a part. The word ‘Kar’ means hand, and ‘Anga’ means body, while ‘Nyas’ refers to an invocation, or vesting or assigning any entity with something, or entrusting an entity with some trust and responsibility; to deposit, repose, trust, pledge, entrust, keep, place, etc. This is a ritualistic process in which certain parts of the body are touched and certain Mantras are said. It also means the purification of the individual parts of the body and the installation of the individual letter of the invoked Mantra, complete with its full potentials, at those points. Therefore, Anga Nyas is a process of pledging utmost faith and conviction on the divine and holy Mantra’s supernatural powers and potentials by invoking it and reposting it on the various locations of the body and its vital parts, such as the limbs, the abdomen and chest, the throat and forehead etc.

In other words, the process of doing Anga Nyas is to symbolically establish the Mantra’s divine mystical powers in the worshipper’s own body and make it sinless, holy, auspicious, sanctified and empowered. The deity being worshipped is symbolically requested to come and take its seat in the body, thereby ensuring that the worshipper is not only getting constant protection from this godhead but also has been dutifully purified and made auspicious. The body is now the symbolic seat of

Divinity represented by the deity, and from the metaphysical perspective it has been now officially made the abode of Brahm as all the Gods are nothing but manifestations of Brahm, the supreme transcendental Authority of creation. With the deity firmly established in the body of the worshipper, the latter is deemed to personify all the glorious, majestic, divine and magnificent virtues exemplified by the worshipped deity.

Anga Nyas is therefore the process of ritualistic worship by which certain fixed points in the body are designated where the chosen deity is mentally invoked through the specific Mantra. This envisions that the mystical divine powers of the patron God or deity being worshipped by the Mantra are mentally invested in these fixed cardinal points of the body, thereby empowering the aspirant with their stupendous potentials as well as symbolically assigning the body to the tutelary God or deity to whom the particular Mantra belongs for his protection and blessing.

In the context of the Beej Mantras, it refers to invoking their divine cosmic dynamic powers and establishing them on various parts of the body, or assigning the patron Gods of these seed Mantras some specific part of the body so that they can establish themselves there.

Hence, doing Kar Nyas with the Beej Mantras would be to establish these symbolic Gods representing the cosmic, divine and mystical powers that are encrypted in the different Beej Mantras on the hand of the practitioner, while Anga Nyas would be to do the same on other parts of the body such as the chest, abdomen, shoulders, throat, forehead etc.]

5. This is the traditional sequence followed for the use of all the Mantras during formal forms of worship—viz, first comes the ‘seed’ or ‘Beej’ of the Mantra, then the ‘Shakti’, followed by the ‘Kilak’, and finally the ‘Vinigyog’ or prayer for the fulfillment of the worshipper’s desires.

The worshipper should meditate upon Lord Ram as a personification of the supreme, transcendental, eternal, infinite, imperishable and measureless Brahm who is the cosmic supreme Consciousness and the supreme Atma or Soul known as the Parmatma of this creation. [Refer Canto 2, verse nos. 1-2.]

He should meditate and contemplate upon Lord Ram as a personification of the cosmic ‘fire element’. Lord Ram is the Fire God manifested with all his purity, brilliance, dazzle, glory, radiance, splendour, energy, authority, powers and potentials.

[This is because the Beej Mantra of Lord Ram—i.e. ‘Raam/Raan(g)’ is also the Beej Mantra of the fire element. As already stressed earlier, this is indicative of the fact that Lord Ram is as powerful and dynamic as the fire element besides being personification of the Supreme Being known as Brahm. In other words, Lord Ram is a form of the Supreme Being that has the latter’s Shakti represented by the ‘fire’ in its full glory in attendance. Lord Ram is a visible manifestation of the stupendous glory, majesty, magnificence, dynamism and energy of the cosmic fire element as much as he is of the cosmic supreme Consciousness.] (5).

6. Being richly endowed by the Sata Guna (which is the best quality and most auspicious amongst the three Gunas), the Lord is the one who creates this ‘Vishwa’ or the vast universe.

Inspite of being splendidous, fierce and potent like the ‘fire’ element (refer verse no. 5), Lord Ram is also cool and soothing like the rays of the ‘moon’. This creation (or world or universe) is therefore a unified form of two opposite forces of creation—one is the most dynamic, uncompromising, unforgiving and relentless

nature of Brahm represented by the ferocious and scorching fire element, and the other is the soothing, nourishing, solace and succour providing aspect of Brahm represented by the moon¹. [It must be noted that the Beej Mantra for the Fire is also the letter 'Ra', and its extended, enhanced and reinforced form 'Raam/Raan(g)'. Refer Ram Rahasya Upanishad, Canto 2, verse nos. 1-2, 6, 10-11, 40, 80; and Canto 5, verse no. 3.]

In other words, the soothing aspect of the Lord counters the heat and scorch of the fire element in the world, enabling life to flourish in it. [Earlier we have already read that Brahm is ambivalent—refer Canto 1, verse no. 13. That is, Brahm is present in equal intensity and force in any two given situations however contradictory or opposing they might be. This is absolutely true and actually feasible because everything in creation is one or the other form of Brahm. If Brahm is as hot as the fire element, then it cannot be denied that the same Brahm is as cold as the water element for the simple reason that both the water and the fire elements are one of the many revelations of Brahm. Therefore, if Brahm has revealed itself as the fire element of which the celestial sun is a vivid form, then it is equally true that the same Brahm has revealed itself as the life-giving and soothing elixir known as the Amrit of which the celestial moon is a condensed form. The simultaneous existence of the fire represented by the sun and the nectar of life that counters the scorching affects of the fire represented by the moon in the same sky exemplifies the great paradox about Brahm—that Brahm represents all forces of creation, no matter how opposing or contradictory they might be. That is why it is said that Brahm is an all-encompassing and all-inclusive divine and truthful but most mysterious, enigmatic and esoteric entity in creation.]

Goddess Sita represents the moon because she is as beautiful and charming as the latter. She is also the Shakti of the Lord, i.e. his dynamic energy, his cosmic powers and potentials manifested in the form of his consort to accompany the Lord during his sojourn on earth. But she derives her importance, authority and powers by being associated with the supreme Lord, and only carries out the Lord's wishes and instructions. Hence, if Lord Ram is the moon, then Sita is the unique quality of the moon for which it is so much lauded and praised in this creation. [The moon is loved by all because it is so beautiful and so soothing as compared to the sun which is scorching by nature. Who would have loved the moon if its disc would not have been so enchanting to look at against the background of the dark sky, and if its light would not have been so soothing and comforting to even the most tormented soul? Similarly, the glory of Lord Ram and his fame is established in this world because of Sita. Had it not been for Sita, the story of Ramayan would not have taken the course it did, and therefore the life of Ram would not have been so much remembered by the people as it actually is now; he would have ruled just like other great kings and found some mention in some history text, and nothing more. The Lord's glory and fame is established in this world because he had killed the ferocious demon named Ravana for the sake of liberating Sita from his clutches. The whole story of the epic Ramayana is built around this basic theme.

Therefore, if Ram represents Brahm, Sita represents Brahm's Shakti. If Ram is the Viraat Purush, Sita is the Prakriti or Mother Nature. If Ram is Lord Vishnu, Sita is Laxmi, the divine consort of Vishnu.]

When we consider how creation was created and how it got protection, we must look at Lord Ram and Sita from the perspective of Brahm and its Shakti. So, when Lord Ram is associated with Sita in his cosmic form as Brahm that is associated with its divine cosmic energy and dynamism known as Shakti or Maya, or as the Viraat Purush who is associated with the Prakriti (Mother Nature), the resultant

product is this mysterious creation. Lord Ram provides the spark of life in the form of the cosmic ‘sperm’ that represents the fire element, and the resultant embryo that represents the infant or nascent creation is protected by the cosmic Mother by lodging it in her womb so that it is protected from the scorching effects of the fire element. Hence, the Shakti of Brahm protects the creation by its soothing nature just like a mother protects the off spring produced by the father.

So, it is to recognize this fact that Lord Ram is said to be equivalent to the fire element, and Sita to be equivalent to the soothing rays of the moon. Hence, if Ram is the moon in the metaphoric sense, then Sita is the latter’s soothing light and beauty.

With Sita, Sri Ram resembles the beautiful full moon with its most enchanting, soothing and glorious moonlight. In other words, just as the moon would lose its glory, majesty, magnificence and fame if its light and beauty are removed from it, Lord Ram would also be devoid of his cosmic powers and authority if he is not associated with Sita.

Again, just like the moon and its light cannot be separated from each other, Lord Ram and Sita cannot be separated from one another. In other words, Lord Ram and Sita are the two aspects of the same cosmic Divinity (6).

[Note—¹The word ‘Ram’ has two syllables or letters—‘Raa’ (as in *rather*) which represents the ‘fire’ aspect of creation, and ‘Ma’ (as in *come*) which represents the moon or cool aspect. Incidentally, the letter ‘Ma’ also refers to a ‘mother’. Hence, if Lord Ram is the Father, the ‘Purush’, then Sita is the universal Mother, the ‘Shakti’ personified.]

7. The worshipper should meditate upon the divine and sublime form of Lord Ram as follows—The Lord is established alongside Prakriti. [The word ‘Prakriti’ refers to Mother Nature at the macrocosmic level of creation, and it represents the almighty Lord’s cosmic dynamic energy called all-powerful and ubiquitous Shakti.

When the Supreme Being who is known as the Viraat Purush or Lord Vishnu at the macrocosmic level, manifested himself as Lord Ram (see verse no. 1 of Canto 1), this Prakriti, which was also known as Laxmi in the context of Vishnu, revealed itself as Sita to accompany the Lord during his sojourn on earth. This was done to aid the Lord in his duties and obligations for which he had decided to come down to earth as a human being.]

Lord Ram has a dark complexion, wears a Pitambar (a yellow, seamless, silk body-wrapping garment worn by Vishnu), has matted lock of hairs on his head, has two arms, is adorned by large ear-rings, wears a garland of gems around his neck, and holds a bow. By temperament he is defined as being ‘Dhir’—i.e. someone who is calm, patient, sober, tolerant, fearless, courageous, serious and steady under all sorts of circumstances and the greatest of adversities (7).

8. His (Lord Ram’s) countenance is always pleasant, warm, elegant and cheerful. The Lord is invincible, and he is invariably victorious in war.

He is endowed with the eight mystical accomplishments called the ‘Siddhis’¹ that add glory and importance to his already exalted position, his majestic stature, his matchless fame, his magnificent glory, his divine radiance and splendour, and his inviolable authority and majestic powers.

The primary Prakriti (primordial Nature), which is the cause of creation and is a personified form of the divine Shakti of the Supreme Being, has manifested itself (as Sita, the Lord’s divine consort), and has established itself on his left. [That is,

when Prakriti revealed itself along with the Supreme Being or the Viraat Purush to accompany the latter, it assumed the form of Sita and established itself on the left of Lord Ram as his divine consort (Sita). This is to conform to the Hindu tradition that a wife always sits to the left of her husband.] (8).

[Note—¹The eight renowned Siddhis or mystical achievements that adorn Lord Ram are certain supernatural special powers that are possessed by him which are not normally available to ordinary humans. The Lord is richly endowed with these Siddhis which not only give him special divine powers and authority but add to his honour and exalted position in this world. These eight Siddhis are the following—(i) ‘Anima’ which is the power to become microscopic or so minute that one becomes invisible to the naked eye; (ii) ‘Mahima’ is to have magnificence, majesty, glory and fame; it bestows unmatched honour and acknowledgement for one’s achievements, wisdom, erudition, knowledge and skills; (iii) ‘Garima’ is the virtue that gives weight, stature, dignity, elegance, decorum, gravity and significance to the person who possesses it; (iv) ‘Laghima’ is the grand virtue of being simple and humble inspite of being great, powerful and authoritative; it is to have simplicity and humility despite possessing grandeur, majesty, power, authority and magnificence; (v) ‘Praapti’ is to be able to attain or obtain anything wished or desired for; (vi) ‘Praakramya’ is to have valour, ardour, strength, powers, prowess, potential and punch leading to triumph, glory and majesty; (vii) Ishwatwa is to be able to have lordship and sway over everything else; and (viii) ‘Vashitwa’ is to be able to control and subdue others and bring them under one’s influence and obedience.]

9. The radiance of Sita’s divine body resembles that of gold; she is fair complexioned and glows like pure gold. She has two arms, is adorned with all the ornaments befitting her exalted stature, and she holds a lotus flower in her hand. The son of the Kaushal-clan (Lord Ram) is sitting happily close to her (9).

10. [Verse nos. 10-13 describe a symbolic triangle which is a geometrical depiction of the creation as well as the relationship that exists between the three essential pillars of creation—viz. the Supreme Being represented by Lord Ram, the Jiva represented by Laxman (Ram’s brother), and the Shakti represented by Sita (Ram’s divine consort).]

To the right of Lord Ram is standing Laxman (his younger brother) with a bow and arrow in hand. His complexion is radiant and fair like gold.

The trio—Lord Ram, Sita (seated on his left), and Laxman (standing to his right)—form a metaphoric triangle (10).

[Note—This triangle has Sita at one point, Laxman at the opposite end, and Lord Ram at the apex. A triangle can only be formed if the three are not in a single line. Hence, both Sita and Laxman are positioned slightly at an angle with relation to Lord Ram to make it possible for the three to form a triangle.

The symbolism of a triangle is explained as a note of verse no. 12 below.]

11. The divine and complete Mantra of Lord Ram is ‘Raam/Raan(g) Raamaaye Namaha’ (रं रामाय नमः) consisting of three words—the first word ‘Raam/Raan(g)’ is called the Beej Mantra and is indicative of Lord Ram himself, the second word ‘Raamaaye’ symbolises the other half of Lord Ram, i.e. his divine consort Sita, and the third word ‘Namaha’ represents the Jiva, the living being, represented by Laxman who is ever ready to serve the Lord with all humility and submissiveness.

Hence, this Mantra also forms another symbolic triangle¹ for the purposes of worship and construction of the Yantra (worship instrument) of Lord Ram.

Once upon a time, all the Gods came to have a divine glimpse (Darshan) of Lord Ram (11).

[Note—¹In this triangle, the Beej Mantra ‘Raam/Raan(g)’ occupies the apex, the word ‘Raamaaye’ occupies the point to the left, and the word ‘Namaha’ to the right. This Mantra is mentioned in verse no. 2 of the present Canto 4.]

12. The Lord was seated under the shade of the Kalpa Tree¹.

The Gods prayed as follows—‘Oh Lord (Ram)! You are a personification of Kaam² and Maya³. We most reverentially bow before you⁴. [If we were to use the Beej Mantra for Kaam and Maya in the same way as the Beej Mantra for Lord Ram, i.e. ‘Raam/Raan(g)’, is used in verse no. 11 above, we have two new Mantras—viz. (i) Klim/Klin(g) Raamaaye Namaha, and (ii) Hrim/Hrin(g) Raamaaye Namaha. In these two Mantras, ‘Klim/Klin(g)’ is the Beej Mantra for Kaam, and ‘Hrim/Hrin(g)’ is the Beej Mantra for Maya. Refer also to Ram Rahasya Upanishad of the Atharva Veda tradition, Canto 2, verse no. 16.] (12).

[Note—¹The *Kalpa Tree*—It is the evergreen tree of the Gods. It is said to possess mystical powers and can bestow all that is desired by an aspirant or seeker. The Botanical name of the Kalpa Tree is *Adansonis Digitta*; it is also called ‘Parijaat’ meaning ‘descended from the sea’, and ‘Harsingar’ meaning ‘the decoration of the Gods, especially Lord Hari’. The English name of it is Coral Jasmine; in Latin it is called *Nyctanthes Arbor Tristis* (nyctanthes means the night flower, while arbor tristis means the sad tree). Its flower is said to be worn by the Gods. The orange colour of the flower is used for dying silk and cotton, a practice originating with Buddhist monks. According to legends, it was produced during the churning of the ocean for the search of Amrit, or the ambrosia of eternity and bliss, by the Demons and the Gods. The king of the Gods, Indra, took it away and planted it in his capital at Amravati. According to another legend (in Vishnu Puran), a princess named Parijaat fell in love with the Sun God and followed him throughout the day. As night approached, the Sun became disenchanted with her and did not like her overtures any longer. Disillusioned and despaired, she died, and a tree grew up from the ashes at the site of her funeral pyre. The flower of this tree could not bear the sight of the Sun, and therefore it blooms during the night, and with the crack of dawn, it falls and dies.

²The word *Kaam* refers to the God of this name, and he is the God of beauty and passions. Here the reference implies that Lord Ram is as charming and handsome, as attractive and enchanting as Kaam-deo, the patron God of these qualities. It also means that the Lord can fulfill all the desires of his devotees because the word Kaam also means desires, aspirations, wishes and yearnings etc.

³The word *Maya* means delusions and its accompanying hallucinations and illusions. The supreme Brahm had employed this magical power of Maya to create this world out of his imagination, expanded it to astounding dimensions, endowed it with stupendous charms and magnificence, gave it beauty, grandeur and majesty, and made it so real and life-like that even the wisest of sages and seers lost their bearings and took this world to be the real thing inspite of being wise enough to know that it is simply a creation of Brahm’s imagination. In short, the Gods are praising the supreme Lord for his astounding abilities and supernatural magical powers to create something out of nothing. They indirectly pray to the Lord to give them immunity from the delusory effects of his Maya so that they do not get entangled in its web of delusions like it has entangled the rest of the world.

⁴Now let us examine the symbolism and the significance of the use of an equilateral triangle to depict the relationship between the three units of creation—viz. the supreme Brahm who is the primary cause of everything in this existence, his Maya Shakti which actually results in the artificial world coming into being and

keeping the soul of the creature trapped in it, and the Jiva or the living being. In this context, refer to verse nos. 10-11 above.

An equilateral triangle is like a pyramid having three points or corners—A, B and C. Suppose the corner A, which is the apex of this triangle, stands for Lord Ram symbolizing the Supreme Being. This creation has unfolded from the Supreme Being and represents the Lord's two arms that form the two lines AB and AC of this triangle. The corner B stands for Sita representing the Lord's Maya Shakti, and the corner C stands for Laxman who symbolizes the Jiva, the living being. The creation represents the space enclosed by this triangle ABC. In other words, as long as this triangle exists it is imperative that all these three cardinal points must exist.

From this sketch it is evident that if the Jiva (C) wishes to find what is called the 'Kaivalya Mukti', or the final liberation and deliverance of his soul whereby it merges with Brahm, the Supreme Being, then point C must move towards point A and merge with it. But the problem with this is that the point B representing Maya remains. As long as Maya remains, total freedom is impossible. This is because the line A-B still exists reminding the Jiva of the previous world represented by the triangle ABC. As long as any vestiges of the Maya remain, total freedom from all delusions is impossible. And this means that complete Mukti hasn't been achieved.

Total and undiluted Mukti as well as complete annihilation of the world and its temptations created by Maya is possible only when two points B and C of the triangle merge into the point A—i.e. when the Jiva is able to eliminate Maya alongside approaching Brahm. In other words, a living being can attain Brahm-hood and Kaivalya Mukti only when Maya is completely eliminated.

This triangle also helps to explain what the scriptures mean when they say that Mukti (spiritual liberation, deliverance, emancipation and salvation) is obtainable by the mercy and grace of the Lord. In this triangle, the apex A represents the Supreme Being. When he decides to provide the Jiva (point C) with Mukti from all worldly delusions represented by Maya (point B), all he has to do is to retract lines AC and AB so that the points C and B move towards point A and finally merge with it. All that remains then is the point A and the triangle representing this creation vanishes from existence and sight. The point A in its primary form is a 'dot', and this 'dot' is represented by the 'Bindu' (literally also meaning 'a dot') as mentioned in the Upanishads in relation to the cosmic Naad (cosmic sound) which is conceptualized as the monosyllabic word OM. It is from this OM that the entire creation is visualized to have originated. This 'dot' also is like the center of a circle, or the axle of the wheel of creation around which the wheel rotates. We will read about a Ram Yantra in this Upanishad which is a worship instrument in the form of a geometrical diagram used to worship Lord Ram in Tantra system of worshipping. This Yantra consists of consecutive circles built around a central point where the Beej Mantra of Lord Ram, i.e. 'Raam/Raan(g)' is placed. This Yantra represented the creation in a miniature form. The central point is the 'dot' referred to here. It is around this dot symbolizing the Supreme Being or Lord Ram around whom the whole edifice of creation is revolves. If the 'dot' is removed, the entire structure would collapse and come to a naught; if the hub is removed, the wheel of creation would come apart.

The 'dot' is the first point of touch of the pencil upon the paper where the first corner of this metaphoric triangle ABC is made, and then this dot is actually elongated or stretched in the form of three lines to complete the figure of a triangle ABC. Hence, the 'dot' precedes the making of the triangle ABC. When this triangle is erased and a new one is to be made, the first thing to appear is again the 'dot'—which is the point where the pencil would first touch the paper. That is, the entire creation has its origin in the dot represented by the supreme transcendental Brahm. It is 'transcendental' because a dot is not easily visible to the naked eye and it also has no shape or outline. When we mark it with the letter 'A' we assign this dot with its first attribute. This is a metaphoric depiction of the first stages of creation—first we have Brahm which has no attributes, then the same Brahm is assigned a name of the

‘Viraat Purush’, literally the vast macrocosmic form of Brahm in the form of the primordial Male aspect of creation, i.e. we give Brahm some attributes, which is like giving the dot the name of ‘A’. Then in order to make a triangle out of this single point called ‘A’, we draw three lines branching out from it—and then assign letters B and C to the two other corners. The enclosure becomes a metaphor for this creation having three cardinal points without which this creation has no meaning—viz. Brahm (point A), Maya (point B), and Jiva (point C).

Two points would be obvious from this triangle—(i) that the minimum requirement for this creation to come into being is Brahm, Maya and Jiva, and (ii) the Jiva (living being) continues to be trapped or locked in this triangular structure and unable to attain Brahm until it manages to eliminate Maya, because as long as the Maya exists the triangle representing this deluding world continues to exist.

The ‘dot’, from which this symbolic triangle is made as an extension of this single point by drawing three lines stretching out from it as if they were its limbs or branches, represents Brahm. When we retrace these three lines back to their point of origin, we come to the ‘dot’ representing Brahm. In other words, this creation has its origin in Brahm, and this creation ends in Brahm.

Any equilateral triangle has three sides, and it represents a closed enclosure with no exit. Outside of this triangle there is nothing but void. Even if one point of this triangle is removed, the triangle would cease to exist. This is how the world that traps the creature is imagined to be and depicted in this triangle.

In this geometrical setup, even though the Jiva wishes to reach Brahm he would not be able to do so as long as the triangle exists—i.e. as long as the point represented by Maya persists. So, if the Jiva (point C) wishes to attain Brahm-hood (point A), it would be obligatory and absolutely necessary for the Jiva to eliminate or remove Maya (point B). Since a triangle exists only till we have three points linked with three lines, when one of the points is done away with—which in this case is the point of Maya—the triangle vanishes. What remains is only one single line with two ends—at one end is the Brahm and at the other end is the Jiva. Then it is easy for the latter to move quickly towards the former.

From the perspective of Mukti, the Jiva has two options to achieve Brahm-hood—one is to eliminate Maya himself by strenuous efforts, and the other is to request Brahm to retract the latter’s Maya so that the point B of the triangle is done away with. As a result of eliminating the point B, a direct link is established between the Jiva (point C) and Brahm (point A). This direct link is symbolized by the line AC of the now defunct, non-existent and redundant triangle ABC. Now it becomes easier for the Jiva to directly access Brahm and attain Brahm-hood by gradually moving towards his spiritual goal. That is, the Jiva (point C) slowly reduces the distance between points ‘A’ and ‘C’ (Brahm) to ultimately reach a stage when the point C finally merges with and becomes indistinguishable from point A. When this stage actually comes, it is obvious that the identity of the Jiva and Brahm become one and the same—i.e. the Jiva is deemed to have attained Brahm-hood. In spiritual terms, it is Jiva’s final Mukti. In other words, if the Jiva or the creature eliminates Maya or delusions, it becomes feasible and practical for him to obtain oneness with the supreme Brahm. This is the Jiva’s Mukti—this is his spiritual liberation, this is his deliverance from having to remain shackled to this world and being forced to be separated from the Parmatma.

Mukti here also means that the earlier triangle-like prison representing this deluding world that had trapped and imprisoned the soul of the creature within its boundaries has been completely and finally demolished, and there is no more fear from any such entrapments in future.

Now let us have another look at this triangle. When one of the corners of the triangle represented by the ‘creature’ (point C) ceases to exist, as in the case when the creature finds emancipation and salvation, the world represented by the triangle ABC simply vanishes. That is, as soon as the creature realises that he is linked to divinity in

its two fundamental forms represented by the two arms of the triangle—one that links him to Nature or Prakriti and its myriad delusions and deceptions called Maya (represented by point B), and the other that links him to the supreme Brahm (represented by the point A)—he graphically knows where he stands in the cosmic matrix. So, when he annihilates his independent identity as a 'Jiva' and merges himself with the supreme Brahm by acquisition of Gyan (i.e. by becoming enlightened and wise about the Truth of creation called Brahm, and the falsehood of the material world of sense objects represented by Maya), the triangle automatically vanishes.

In the above scenario, when the Jiva (point C of the triangle ABC) ceases to exist, what is left are the supreme Brahm (point A) and his Maya (point B). They are represented by the single line AB joining the remaining two points of the erstwhile triangle—a line that can be drawn to infinity or reduced to a point. This single point 'A' is the origin of the line AB or line AC, as well as the triangle ABC. This single point can be drawn into a line of infinite length, or made into a closed space of a triangle, or drawn into any other shape of any size we can imagine of by simply stretching the point A and keeping the pencil moving on the paper infinitely. So, this is a diagrammatic representation of how the supreme Brahm creates this universe even if we do not take into account the 'living world of creatures' as we know this world of ours to be.

The cosmos or creation is said to be infinite, uncertain, without any fixed form, shape and size, constantly evolving, continuously changing, and unfolding and unfolding endlessly, but it is also said that the same infinite creation assumes a finite shape. It is easy to visualize how this happens in the context of this triangle ABC. Here, the origin of the triangle ABC is the cardinal point or dot 'A'. The rest of the figure is an extension of this point—i.e. a line, whether straight or curved, is drawn out from the point 'A' to any direction we want. The other point of this line is 'B'. As long as it remains a line, it can be drawn out to an infinite distance, and retraced back to its original point. This line A-B has no shape or size, and neither does it enclose any space of any sort. This line is therefore a symbolic form of the infinite creation having its origin in Brahm.

But the same line can also be drawn into any shape or figure we want, and each shape or figure has a different name and meaning—for instance we can draw a circle, a triangle, a square, a rectangle, a parallelogram, a hexagon, an octagon etc. Suppose we assign three fixed corners to this line, then we have drawn a triangle, and this encloses a space. Once a triangle is made, its shape cannot be changed now as long as we wish to call it a 'triangle'. Therefore, the line A-B, that was primarily infinite, has now been made finite as a triangle ABC. Once this line is twisted to assume a 'shape' of a triangle, its destiny is fixed, i.e. it becomes a 'triangle', and now it cannot form any other shape. Further, the 'size' of a triangle also becomes fixed once the three corners are fixed.

This is a metaphoric depiction of how this primarily infinite creation becomes finite on the one hand, and the destiny of its components become fixed or pre-determined. So when Brahm (Supreme Being) creates Prakriti (represented by Maya Shakti or delusions) and Jiva (living being) in the process of creation, the primarily infinite creation becomes finite, and the destiny of the creature also becomes fixed. This creation represented by the triangle ABC is therefore like a prison for the creature, and the only way out of it is to make a breach in its walls. This is how Mukti can be achieved.

In the present context of this Upanishad, the apex corner this metaphoric triangle ABC represents the Supreme Being known as Lord Ram. The second corner B of this triangle is represented by the Lord's Maya Shakti in the form of Sita, Lord Ram's divine consort, and the third corner C is represented by the Jiva, the living being, in the form of Laxman, the Lord's younger brother.

In mystical and occult or Tantra forms of worship, this same philosophy of creation is depicted as a triangle with three corners having the Beej Mantras of the respective deities. That is, the apex corner 'A' has the Beej Mantra of Lord Ram, the corner 'B' for Sita, and the corner 'C' for Laxman.]

13. We (the Gods) give our due respects, pay our sincere obeisance and bow most reverentially before Lord Ram who is a personified form of the Vedas as well as the ethereal Mantra OM which is their primary origin. [This is because OM is the Beej Mantra for the supreme transcendental Brahm or Pranav, the Supreme Being who is the primordial and primary cause for the entire creation coming into being. Further, OM represents the first sound in creation, and it is this primary sound which eventually evolved to form distinct genres of sound that formed the basis of the spoken language and its alphabets. This primary form of sound was used to form words and hymns in which the Vedas were composed and revealed by the creator Brahma. The reference to OM implies that the Gods have recognized the following Mantra of Lord Ram too—'OM Raamaaye Namaha'. Here, the Beej Mantra 'Raam/Raan(g)' for Lord Ram is replaced by the Beej Mantra for Brahm, which is 'OM', with the clear understanding that Brahm and Ram are the same divinity existing in two planes of existence—i.e. whereas Brahm is the divine Principal of creation at the macrocosmic level of existence, Lord Ram is the same Brahm who had assumed a human form with certain specific job in hand. This 'job' was to eliminate the evil and demonic forces that had been tormenting and terrorizing humble creatures of this creation.]

Oh Lord! You are the Supreme Being in the form of Lord Ram who supports Ramaa (Laxmi, the Goddesses of wealth and prosperity) on the one hand (in your cosmic form as Lord Vishnu), and on the other hand you are a personified form ('Murti') of Maya itself. ['Ramaa', the Goddess of worldly wealth and material prosperity, is also referred to as the 'Maya', or deluding temptations of this world. This is because worldly material riches are astoundingly addictive and sticky by their inherent nature. Once a man is attracted to them, they attach themselves to him like the blood-sucking leech. Lord Ram is the one who has full control over this aspect of creation too because he is the Lord of everything in creation. It has been repeatedly stressed in the scriptures that Maya is like a maid-servant of the Lord, implying that Maya is under the overall command and control of the Lord. In practical terms it means that if a devotee wishes worldly riches and charms, the Lord can give him all the riches of the world, and if the devotee wishes salvation and emancipation from this world, the Lord can make him immune to the formidable temptations of the same worldly riches that can land him in a quagmire of problems. The Lord can grant anything the devotee wishes.] (13).

14. Janki (Sita) is like an ornament that adorns the Lord (Ram)¹.

The Lord is a slayer (or eliminator) of demons (representing the evil, sinful, denigrated, degenerated and corrupt creatures in this world). To demonstrate it, Lord Ram had slayed the ten-headed Ravana², the king of demons, for whom he was like Kaal, the God of death himself personified.

We pay our homage to Lord Raghuvir, the Lord who had taken birth as a brave and courageous warrior in the clan of king Raghu (of Ayodhya). The Lord is very polite, gracious, kind, dignified, civilized and cultured like a thoroughbred nobleman and a perfect gentleman ('Bhadra') (14).

[Note—¹That is, since Lord Ram is the divine husband of Sita who is Goddess Laxmi personified, it follows that all the worldly riches, wealth, honours, respects, fames, majesties, magnificence, grandeur, pomp and circumstance that adorn the Lord are actually the subtle qualities of Goddess Laxmi on display as the world is accustomed to honouring and giving importance to those who are blessed by Laxmi. Since this materialistic world gives immense importance to wealth and its accompanying powers, pomp, authority, grandeur and fame, this allusion to Laxmi herself being the ornamentation of Lord Ram is cited here to indicate the great majesty, authority, fame and powers that Lord Ram exercises in this world are as a result of Goddess Laxmi accompanying Lord Vishnu in his incarnation of Lord Ram as the latter's divine consort Sita.

This stanza also means that 'Lord Ram is the one who adorns Janki or Laxmi'. In this latter case, the meaning would be reversed—that is, Laxmi, the Goddess of wealth, has acquired her importance and prominence because of her association with the supreme Lord known as Ram. Or, that Sita has acquired all her glories because of her association with Lord Ram.

²The 'ten' heads of Ravana has a symbolic meaning. Usually the demons had only one head like all living beings. They were called 'demons' because of their evil and sinful deeds, corrupt and pervert mind and intellect, cruelty of behaviour, reckless and ruthlessness tendencies, and despicable general demeanours. The demons had a preponderance of the Tama Guna, and a negative nature marked by horribly violent and intolerably volatile temperament. They had contempt for ethics and morality; they paid no heed to the principles of Dharma (righteousness, probity, propriety, nobility and auspiciousness).

The numeral 'ten' simply means that their king Ravana was ten times more sinful and ten times more powerful than the rest of them. It also means that negativity and evil nature of Ravana was ten times more than other demons of his race. So the Lord decided to get rid of this great menace for creation first, and then treat the ten-headed Ravana's killing as a warning to the rest of the demon race to mend their selves or face the same punishment. The Lord wished to give the rest of the demons a chance to mend their ways out of fear for their lives, if for nothing else. In fact, this is what exactly happened. Not all the demons were killed and eliminated from the surface of earth during the epic war at Lanka—and the surviving ones were ruled by Vibhishan who was the younger brother of Ravana and who had taken sides with Lord Ram in the epic war at Lanka in which his elder brother Ravana was killed.

This proves one more very important and pertinent point—merely possessing a gross body like that of a demon does not mean that a Jiva is condemned if his Atma, his inner being is not demonic or sinful, and instead is holy and pious like other wise and realised souls in this creation. Further, merely Gyan or knowledge of the scriptures does not ensure that the creature would be provided with Mukti or spiritual liberation and deliverance—this is proved by the fact that though Ravana was an expert in the knowledge of the Vedas and other scriptures, and though he was a Brahmin by birth, he still was the most evil Jiva alive at that time. Therefore, it is how a Jiva (living being, a creature) puts his body and knowledge to practical use that is of paramount importance rather than merely possessin a certain type of gross body or being able to have an access to knowledge and scriptures.

Hence, while the Lord felt it necessary to eliminate the demon king Ravana, the same Lord made his brother Vibhishan as the king of the remaining demon race.

There is another interpretation of depicting Ravana with ten heads. He was not an ordinary demon or villain, for Ravana was an expert in the four Vedas (Rig, Sam, Yajur and Atharva), the four Up-Vedas or sub-Vedas (Dhanur Veda pertaining to the science of warfare, Aurveda pertaining to herbal medicines, Arthashastra pertaining to economics and public administration, and Gandharva-veda related to music, song and dance-drama), the Purans (mythological histories) and the Dharmashastras (other scriptures relating to the philosophy of Dharma or the laws of probity, propriety and

righteousness). But inspite of having thoroughly studied all the Vedas and scriptures, inspite of being an expert in their tenets, and inspite of having this huge body of knowledge at his disposal, Ravana still became extremely pervert and sinful because of his vanity, passions, lust for power, ego, haughtiness and arrogance. He did not understand the spiritual message and meaning of the scriptures, and he did not utilise this knowledge for his spiritual welfare, most probably because he limited himself to their literal knowledge only, a knowledge that gave him immense temporal powers and fame but proved to be his unmaking.

This has the message for all spiritual aspirants and seekers of Mukti that mere knowledge of the scriptures is not sufficient for one's salvation; one must implement them in practice. By killing Ravana the Lord has sent a strong message to such people who are proud of their overpowering control over the literal versions of the scriptures that salvation is not theirs if they are not careful in how they utilise this knowledge and skill intelligently with proper wisdom. The Lord would not excuse them even if they are Brahmins (Ravana was a Brahmin by birth) and learned (Ravana was matchless in his knowledge of the scriptures) if they become sinful and fall from their path.]

15. Oh Ram Bhadra (the gentleman, noble and honorable Lord Ram)! Oh Maheshwas (the almighty Lord)! Oh Raghuvir (the brave warrior born in king Raghu's clan)! Oh Nripottam (the best amongst the kings)! Oh the slayer of the 10-headed Ravana! Please grant us your protection and patronage. Save us, protect us!

Grant us or bless us with 'Sri' or divine treasures in the form of auspiciousness, righteousness and other great virtues and excellent qualities which have direct association with you— i.e. which can be used by us only for auspicious, righteous and noble causes, which will lead us to you, and which would give us emancipation and salvation (as opposed to the worldly treasures, prosperity, fame, pleasures and comforts that provide gratification to the sense organs, that inspire indulgences in and attachments to worldly affairs that only lead to entanglement of the soul and prevent its liberation and deliverance from the endless cycle of birth and death in which the creature finds himself trapped).' (15).

16. The Gods further said—'Bestow us and bless us with all the good virtues that you possess yourself or that would make us as exalted and honourable as your own divine self.' [That is, make it possible that we, the Gods, too can attain an exalted stature whereby we can also become one with you, or we can obtain liberation and salvation for our own selves.]

The Gods prayed to Lord Ram and felt happy, contented, cheerful, reassured and comforted. They secretly accompanied the Lord during his sojourn upon the earth to help him and serve him here till the time he had killed the demons (led by their king Ravana) (16).

17. Like the Gods, the sages, hermits and seers also prayed to him (Lord Ram).

Meanwhile, the demon Ravana stole (abducted) Lord Ram's wife (Sita) from the forest where she was staying at that period of time with the Lord. This misdeed on the part of Ravana was the cause that led to his final ruin (17).

[Note—This verse shows that the point of time to which this Upanishad refers was when Lord Ram, Sita and Laxmam were staying in the forest from where Sita was abducted by Ravana. It was this single event that led to the epic war of Lanka and ultimately established the great fame of Lord Ram through the epic known world-wide as the Ramayana. This period corresponds to the chapter known as the 'Aranya Kand' of this great epic.]

18. Since the demon had abducted Ram's consort (Sita) from a 'Van' (pronounced as *won* or *one*; meaning a dense forest), he was called 'Ravana'¹. [The first letter of the word *Ram* and the word *Van* are combined to form the name of the demon as 'Ra+van = Ravana'.]

There is another interpretation. 'Ravana' also means—'the one who makes others weep, cry, lament and wail due to the severe pain, misery, torments, terror and sorrows inflicted upon them' (for Ravana's actions had made Sita suffer, weep and wail).

Further, he made a lot of noise or false claims, or he used to brag haughtily about his achievements, his strength and powers as well as of his invincibility and lordship over even the heavens. Wherever he went, he behaved most wildly and acted like a savage, making a lot of din and clamour to spread fear and terror.

So, the first part of his name *Ravana* comes from the word *Rav* for 'fuss, noise, chatter, clamour, nuisance and din'². Thus, he became famous as 'Ravana' because he made a lot of noise and false claims.

Meanwhile, Lord Ram and Laxman began their search for Sita (18).

[Note—¹There is an interesting connotation of the word 'Ravana'. Since his name includes the Beej Mantra for Lord Ram which incidentally is also the Beej Mantra for the eternal fire element, i.e. the letter 'Ra', it implies that Ravana was not an ordinary soul but a highly learned and scholarly one. Then, the word 'Van', meaning a forest, implies that he was a 'treasury' of scriptural knowledge and learning. The fact that he became a 'demon' instead of a living being behooving of his high standard of scriptural scholarship, knowledge, learning and erudition as well as his birth in the Brahmin race shows how merely literal knowledge and expertise in the scriptures would not necessarily mean that a person is exalted, worthy of honour and reverence, and spiritually liberated if he has not actually understood the hidden meaning of the doctrines and philosophy of the scriptures, and if he has not actually implemented them in practice in his life and deeds.

In this context, refer note of verse no. 14 above in this Canto.

Ravana had become extremely haughty and arrogant because of his knowledge and acquisition of mystical powers that come naturally to them who do severe Tapa (penances, austerities, religious exercises), and Ravana had scored high on this count. He had done exemplary Tapa so much so that it had pleased Brahma the creator as well as Shiva the concluder. There are numerous instances in the story of the Ramayana when he has told those who had tried to persuade him to abandon his stubbornness and make peace with Lord Ram that he knows fully well that Ram is not an ordinary prince but the Supreme Being himself, and that Sita is not an ordinary woman but Shakti herself. He had stressed to them that he has purposely created this situation of animosity with the Lord by stealing Sita with full knowledge that this would lead to his getting slayed at the hands of the Lord, and that this was the only once-in-a-lifetime opportunity that he has got for his spiritual liberation from the prison of the evil body of a demon that he had acquired for himself due to his own follies and misdeeds. He would not let go of this golden chance by any means. When we take this point of view of Ravana into account, the whole story of Ramayana assumes a divine hue as the story of a highly learned and realised soul who has committed some mistakes in the past due to arrogance and lack of wisdom as to what his deeds would amount to, but realises and acknowledges later on that he is a sinful man. All the deplorable actions of Ravana around which the story of the epic Ramayana is woven are actually the attempt of a soul to find redemption for its past sins, and find emancipation and salvation once and for all.

Besides this point of his scriptural knowledge, it is also well established that he was the greatest devotee of Lord Shiva at that time. Shiva is the Lord who is

honoured by the title of being a 'Maha-Deva'—the great Lord God. Shiva is also the patron God of ascetics and hermits, and he is the wisest and most enlightened God in the pantheon of Gods. So, the point is—how can one expect an ardent and faithful devotee of such a great God as actually being as sinful and unholy internally as Ravana's external behaviour and life has made him appear to be?

²In this regard there is a legend that when Ravana lifted Mount Kailash, where Lord Shiva has his abode, in order to transplant it in his own kingdom of Lanka, Lord Shiva had exerted immense pressure on this mountain so as to make it exceedingly heavy and difficult to be shifted and moved over to Lanka by Ravana. At that time, Ravana had made a lot of fuss and created a lot of nuisance. Hence he came to be known as 'Ravana'.]

19. The two brothers Ram and Laxman roamed around in search of Sita in the forested areas on the surface of the earth. Eventually they saw the demon Kabandh¹ in front of them, and they slayed him.

Thereafter, they went to Shabari's place² (19).

[Note—¹Kabandh was a demon who had no head but only a torso with a mouth, protruding limbs etc. much like an octopus. In early history of evolution, may be the octopus had lived on land, and the Lord had met one of their kings. These abominable creatures might have been creating numerous problems for the human race, and so the Lord, who is responsible for the welfare of all living beings, decided to banish such creatures from the landed area of the earth and send them to the deep sea. When the king of octopuses known as Kabandh was killed, the rest of the species ran underwater out of fear for their lives. It is just like the case when the subjects of some distant realm of a great kingdom are tormented by some savage enemy of the kingdom, the king himself goes there to get rid of this enemy and provide succour to his subjects. In the present case, the savage was the Kabandh who was constantly terrorizing the hermits, sages, seers and ascetics who lived in the remote forests of the Lord's realm, and therefore it became obligatory for the great king, Lord Ram, to personally come and eliminate this menace.

²According to the story of Ramayana, Shabari was a woman belonging to a forest tribe called 'Shabari'. This tribe was classified as Shudras or lower caste, and sustained themselves by collecting and selling honey and fruits from the forest trees. Being of a low caste, she is said have been ostracized by others. She served a sage named Matanga very devotedly. The sage was a realised soul, and so pleased was he with her devotion and service that he blessed her at the time of leaving his body that she would find her emancipation and salvation when Lord Ram visits her while searching for Sita. Like her Guru, Shabari too left her mortal body after having the privilege of meeting and worshipping the Lord in person by lighting the pyre herself with her mystical powers. According to Adhyatma Ramayana of sage Veda Vyas, it was Lord Ram who had performed her last rites himself, a rare privilege that was even denied to his own worldly father Dasrath.

Shabari used to live in the hermitage where earlier sage Matanga had lived. This hermitage was near Mount Rishyamook where Sugriv, the exiled younger brother of the king of monkeys Vali, lived with his close confidantes Hanuman, Jamvant, Naal and Neel etc. This place was about ten Yojans or eighty miles from Kishkindha, the capital of the forest kingdom of which Vali was the king. Refer note of verse no. 21 below.]

20. Shabari worshipped them with great devotion. Thence they (Lord Ram and his younger brother Laxman) went ahead and met (Hanuman who was) the son of the Wind God and a great devotee of the Lord. At his behest, the Lord met and befriended the king of the monkeys (named Sugriv).

Then they (Lord Ram and Laxman) narrated the entire story about themselves and their predicament to him (i.e. to Sugriv, the king of monkeys) (20).

21. He (Sugriv) was skeptical about Lord Ram's prowess, potentials, powers, strength, courage, ability and valour. So, to test the powers and prowess of Lord Ram, Sugriv showed the Lord the colossus body (i.e. the head) of the demon named Dundubhi. Lord Ram threw it (i.e. flung it) away for ten Yojans (roughly 80 miles) without the least effort (by tossing it with the tip of his toes as if it was merely a child's play) (21).

[Note—The legendary story of Dundubhi is narrated in Kishkindha Kand, Canto 1, verse no. 61-70 of the epic story of the 'Adhyatma Ramayan' written by sage Veda Vyas. Briefly, Dundubhi was a great demon who assumed the form of a wild bison and attacked Kishkindha, the capital of the forest kingdom of which Vali, the elder brother of Sugriv, was the king, and challenged Vali. Annoyed, Vali held Dundubhi by the horns and dashed the demon violently on the ground, killing him. Vali then tore off his head and tossed it in the air. This head landed about ten Yojans (approximately 80 miles) away at the hermitage of sage Matanga, raining blood all around, and greatly annoying the sage and defiling his hermitage. At that time, the sage had cursed Vali that if he ever dared to come to this place situated on the mountain called Rishyamook, his head would split and he would die instantly. It was out of fear of this curse that Vali never ventured on this mountain, and it was out of this certainty that Sugriv took up residence there when the latter was exiled by his elder brother Vali due to some misunderstanding between the two brothers.

So Sugriv wished to test the strength of Lord Ram, especially his superiority of strength over Vali, to ensure that he would actually be able to overcome such a strong and powerful enemy as Vali when he asked the Lord to throw the demon's head if he could. This Lord Ram did by tossing it with the tip of his toes, proving to Sugriv that he is indeed very powerful and does possess super-natural strength.]

22. He (Sugriv) still had his doubts. So to reassure him, Lord Ram pierced seven tall coconut trees with a single arrow. This miraculous achievement made the king of monkeys (Sugriv) exhilarated, for now he was convinced and reassured in his heart that his arch enemy Vali would now be finally overcome, and that the constant terror that he had been subjected to till now would come to an end. This in turn made Raghav (Lord Ram) happy, because he was able to make his friend happy. [This stanza makes out one most important point and one of the greatest positive traits in a human being for which he is remembered adoringly by all—a good friend is one who empathises and sympathises with his friend. Lord Ram was happy because his friend Sugriv felt happy. Previously when Sugriv had told him about the cause of his misery, the Lord had assured him that he would do all that is possible to provide him relief from his torments, even if it meant that it would force the Lord to kill someone (Vali in this case) who had done no personal harm to the Lord.]

Thereafter, he (Sugriv) was confident that Lord Ram would be able to subdue and vanquish, or cause the downfall and dethroning of the king of monkeys (i.e. Sugriv's elder brother Vali who had exiled the former and usurped not only the kingdom but also his wife out of anger and jealousy created by misunderstanding)¹ (22).

[Note—¹The episode that led to the animosity between the two brothers Vali and Sugriv has been narrated in Adhyatma Ramayan of Veda Vyas, Kishkindha Kand, Canto 1, verse nos. 46-57. Briefly it is that once a demon named Mayavi challenged Vali for a duel. Beaten back by Vali, the demon entered a dark cave, and Vali pursued him inside it. Before it, he had requested Sugriv to keep a strict vigil on the mouth of the cave to ensure that the demon could not escape. After one month, a lot of blood seeped out of the cave. Thinking that the demon had killed his brother and would now

seek revenge from him and the rest of the monkey race, Sugriv closed the mouth of the cave with a huge boulder and went to the capital where the courtiers anointed him king even against his wishes. Meanwhile, Vali had killed the demon, and it was the demon's blood that had flowed out of the cave and which Sugriv had mistakenly taken to be that of Vali. When Vali returned home he found Sugriv on the throne. Obviously this created an immense misunderstanding and bad blood between the two brothers—with Vali thinking that Sugriv had willingly put the boulder on the cave's mouth to prevent his return so that he could be crowned a king and usurp the kingdom. Sugriv tried his best to explain, but the misunderstanding was so profound and the evidence so robust that Vali did not pay any heed to his pleadings of innocence, and beating Sugriv black and blue he kicked him out of the kingdom. It was then out of angst and fear of his own life that Sugriv took up residence on the Rishyamook Mountain because he knew that Vali would never dare to come here due to the curse of sage Matanga as described in note of verse no. 21 above.]

23. There, Vali's younger brother (Sugriv) roared thunderously, hearing which he (Vali) came eagerly out of his palace immediately. [This is obviously because Vali had never imagined that Sugriv would ever in his life gather enough and sufficient courage to challenge him again. So when he heard Sugriv roaring and challenging him in a sarcastic tone, he must have been extremely astonished and completely taken aback, wondering as to what has suddenly happened that has made this cowardly brother of his has gather enough strength to come and challenge him.] (23).

24. Then Raghav (Lord Ram) killed him (Vali) and installed Sugriv on the throne of the place (Kishkindha).

Thereafter, he (Sugriv) summoned all the monkeys and said, 'Oh brave monkey warriors! You are well aware of whatever is happening in all the directions of the earth (because you roam freely everywhere and have come to this place from all the corners of the earth upon being summoned by me) (24).

25. All of you must go out at once, search out Maithili (Sita, so-called because she was born in the kingdom of Mithila), bring her back and hand her over to Lord Ram.'

Receiving this command, all the monkeys set out in all the directions (of the earth in search of Sita).

Meanwhile, Hanuman crossed the ocean and reached Lanka (25).

[Note—Hanuman and his group had gone south in the direction of the island of Lanka where the demon king Ravana had held Sita captive. On the shore of the vast ocean, the group was made aware of Sita's location in Lanka by Sampati, the old vulture who could peer across the breadth of the ocean and see the city of Lanka. It was a stiff challenge to leap across the vast ocean, land in an enemy country, overcome their defenses and meet Sita, and then come back alive. It was only Hanuman who could do it, and so he was the one chosen for the epic mission and the great journey to and fro from Lanka.]

26. There (at Lanka) he saw Sita, killed numerous demons and burnt the city (of Lanka). Then he came back to Lord Ram and told him everything as they were (i.e. he narrated to the Lord everything as he saw them, as well as all that he had done) (26).

27. Then Lord Ram became very angry and wrathful, collected all the monkeys as well as all the available arms and armaments (needed for the assault on Lanka and the forthcoming war), and accompanied by them, he reached (or attacked) the city of Lanka (27).

28-29. He carefully examined (and closely reconnoitered) the city and declared war on its king (Ravana). In that war, he (Lord Ram) killed him (Ravana) along with his brother named 'Ghat-srotra' (i.e. one with large pitcher-like ears, here referring to Kumbhakarn), and Ravana's son named 'Sahastraaksha-Jitraayam' (i.e. one who had conquered Indra, the king of Gods, who had thousands of eyes or holes in the body)¹.

Thereafter, he (Lord Ram) made Vibhishan the king of that place (Lanka). [Vibhishan was the younger brother of Ravana who had sought and received refuge in the camp of Ram when he was publicly insulted by his elder brother. At the end of the epic war when Ravana was killed, the Lord had installed Vibhishan on the throne of the kingdom of Lanka and made him the king of the remaining demon race.]

After the coronation of Vibhishan, the Lord, accompanied by the daughter of Janak (i.e. Sita) who was seated to his left, and with all other monkeys too accompanying him (on the divine chariot of the Gods, called the 'Pushpak Vimaan'), embarked on the journey back to his own city (of Ayodhya) (28-29).

[Note—¹The son of Ravana referred to here was also called 'Meghanaad' because he roared and thundered like the cloud. The word 'Meghanaad' has two parts—viz. 'Megha' meaning a cloud, and 'Naad' meaning a loud reverberating sound.]

He is also called 'Indrajeet' or the one who had conquered Indra, the king of Gods. Indra is called 'Sahastraaksha' (literally meaning to have thousand eyes) because he is said to have thousands of eyes over his body as the result of a curse by sage Gautam to punish him for being sexually pervert as he had the vile temerity of having attempted sex with the sage's loyal wife in his absence by employing deceit. The lecherous Indra had assumed the physical body of the sage to satisfy his lust, but was caught by the sage. So the sage cursed him to have a thousand holes in his body. These 'holes' represented the female vagina, and the curse was in the form of sarcastic curse on Indra so that now onwards he would be able to see a woman's sexual organs spread all over his own body with thousands of eyes instead of only two to satisfy his lust, passions and mental perversions. It was also intended to tell the world in a symbolic manner about the punishment that one gets by being excessively lustful in the sense that one instance of lecherousness would create thousands of horrible spots that would taint a man's character and personality forever, no matter how socially established or well-placed he may be. After all, Indra was a king of Gods, and one can imagine his discomfiture that he would have to remain with a pot-holed and scarred body for the rest of his life.]

30. (After his coronation on the throne of Ayodhya—) The the two-armed Raghunandan¹ (literally meaning 'the two-armed son of the clan of Raghu'; here obviously meaning Lord Ram), is seated majestically on the royal throne (of Ayodhya, as its king emperor).

He holds a bow, is pleasant, benevolent, charming and cheerful in his disposition, and is magnificently adorned by all sorts of beautiful ornaments befitting his royal and divine stature (30).

[Note—¹Special mention is made of the fact that Lord Ram has 'two arms'. This is to remind the reader and emphasize the point that the Lord whose story is being narrated here is not an ordinary son who is one of the long list of kings belonging to king Raghu's dynasty, but Lord Vishnu himself personified. Lord Vishnu is the one who has four arms, and it is only to emphasize this point that a special mention is made here of this fact that Lord Ram has two arms—for otherwise it is absurd and most unnecessary to mention it when referring to a human king as every man has two arms, and there is nothing special about it. In brief, this special mention of Lord Ram having 'two arms' is to stress that though Lord Vishnu has four arms, but when the

Lord had assumed the form of a human being he took up the form that suits this role—i.e. he showed only two arms.

The Lord does everything to perfection—so when he became he had to play his role of a human being to perfection also, and in the process he had to assume a form with two arms as all human beings have two arms. This also goes to explain why the supreme Lord of this world behaved like an ordinary man as he roamed on the surface of the earth and wailed for his lost wife Sita inspite of being capable of wiping out the entire demon race by his mere wish. No, he would not do so because that would mean he is not an expert actor. When the supreme Lord had assumed a role of being a man, he had to act and behave like a man! A man cannot annihilate his enemy by his mere wish; he has to make effort, develop a strategy, gather friends and wage a war against his adversary in order to conquer him.]

31. [Lord Ram's seating posture is described here—] His right hand is held in the 'Gyan Mudra (posture)¹' while the left hand is in the 'Tej Mudra²' (also called the 'Bow-posture' as it symbolizes the Lord's stupendous valour, courage, might, strength, authority, powers and potentials).

[There is another way in which this stanza can be interpreted, and it is as follows—'His right hand is held in the Gyan Mudra and to his left is established an immense source of Tej or energy and splendour (represented by his divine consort Sita).' This Sita is an incarnation of 'Laxmi', the Goddess of wellbeing, prosperity and wealth; or of 'Sri', the personified virtues of grandeur, glory and majesty; or of 'Shakti', the personified form of the Lord's cosmic dynamism, energy, splendour and powers; or of 'Prakriti', the primary Nature and the Mother of the whole creation). All these entities are radiant and splendorous by nature, and inherently grand, majestic and powerful. They are represented by Sita sitting to the left of the Lord on the throne as symbolically being another half of the Lord because she is his divine consort who is inseparable from him. These facts are depicted by saying that the left of the Lord has the symbolic presence of these great virtues of creation which are remarkable by their rich radiance and splendour are inseparably associated with the Lord and accompany him in the form of Sita. When one honours the Lord, one automatically honours Sita. Verse no. 6 of Canto 4 has already said that the relationship between Lord Ram and Sita representing his Shakti is similar to the Moon and its beautiful and charming light, or the Fire and its inherent illumination and dynamism.]

That supreme Lord called Parmeshwar [Param = supreme; Ishwar = Lord], who is eternally 'Chinmaya' (or infinitely enlightened, wise, erudite, sagacious and realised), adopts these two postures as he sits on the throne to preach (his subjects and devotees). This sitting posture of the Lord is called 'Vyakhyana Mudra'—the posture he adopts when he is in the mood to preach or teach others on various subjects (such as about the great tenets, the maxim, the axioms and the doctrines as enshrined in the scriptures, the principles of spiritualism and metaphysics, the laws of Dharma or the laws concerning probity and propriety, righteousness and noble conduct, morality and ethics etc., and other such matters for the general good of his subjects and devotees)³ (31).

[Note—The three postures mentioned here—viz. Gyan Mudra, Tej Mudra or the Bow Mudra, and the Preaching Mudra. Now let us see what these three Mudras are

¹The *Gyan Mudra*—In this Mudra or sitting posture, the index finger of the right hand touches the tip of the thumb to form a ring. The palm is held open along with the three remaining fingers which touch each other. The right hand is bent at the elbow so that the palm and its fingers are placed right above the central part of the chest. The legs are bent at the knees and folded in, and the person sits erect with a straight spine.

²The *Tej Mudra*—This Mudra or sitting posture has three interpretations. One is that it radiates splendour and energy or ‘Tej’, and it also implies that the person is powerful enough to have unquestioned authority and control over others. When this Mudra is adopted by a self-realised and enlightened man, it also indicates that he is willing to bless others with his divine virtues that radiate out from his hands in the form of invisible rays of wisdom, enlightenment and realisation. The palm and the fingers act more like reflectors and antennas respectively in modern-day gadgets to affect this transfer of spiritual energy, mystical powers and dynamism by beaming the rays of these virtues from the spiritually charged, enlightened and self-realised man to the fortunate person on whom he is pleased.

The other interpretation is that the person who adopts this Mudra is ready to actively enforce the principles he is preaching. In the case of Lord Ram it also means the readiness and eagerness of the Lord to give his full protection to his devotees and subjects. It also symbolizes the Lord’s stupendous strength, authority, powers and potentials. Lord Ram is the Veda personified—see verse no. 13 of this Canto 4. So he is full of knowledge, wisdom and erudition. Only a person who is himself well-versed in any subject can teach others. His overall seating posture is compatible with his love for truthful knowledge, wisdom, erudition and enlightenment, and is indicative of his total dispassion, renunciation and detachment from this world as indicated by the Gyan Mudra in which he preaches. The Tej Mudra wherein the Lord holds a bow is indicative of the Lord’s ability and eagerness to uphold the laws of Dharma and ensure that the virtues of righteousness and auspiciousness, of probity and propriety, of morality and ethics, and noble conduct and thought are always upheld and do not suffer due to any cause whatsoever. The bow also indicates the willingness of the Lord to protect those who follow the noble path shown by him as well as to punish those who either create obstacles in such a path, or themselves act sinfully and in a pervert manner.]

The third implication of the Tej Mudra is that is the Bow Mudra or the ‘Dhanush Mudra’. This is derived from the physical posture that is adopted in this Mudra. To adopt this Mudra, the person’s left hand is usually used. Its index and middle fingers are made to touch each other and held erect, while the ring finger and the small finger are curled inwards and pressed by the thumb against the palm. Then the left hand is folded in at the elbow and held in a tightly closed position so that the forearm is held parallel to the bicep muscles with the two opened first and second fingers standing erect and close to each on the top of the left shoulder. From a distance this position resembles a bow which is held by the left hand with its upper end projecting above the top of the shoulder.

³The *Preaching Mudra*—In this sitting posture adopted when one is preaching others or giving some serious discourse, the tips of the thumb and the index finger touch each other while the other three fingers are unfolded, touch each other and point outwards. The right hand is usually used in this Mudra, and the forearm is held parallel to the biceps by bending the hand inwards from the elbow joint. The open fingers and the open palm face the audience. This latter posture is very dear to Lord Ram as well as to the Goddess of knowledge, Saraswati, as it is convenient to teach and emphasizes one’s point in this posture.]

32. [The story of Lord Ram beginning from the prayers of the Gods right up to his coronation has been described in brief in the forgoing verse nos. 12-31. Now we go back to the divine triangle described previously in verse nos. 10-12. The construction of the worship Yantra, which is an instrument that is used in formal forms of offering of ritualistic worship to the divine Lord using various esoteric Beej Mantras and a geometrical diagram, is being narrated now—]

Shatrughan is present to the north of Lord Ram and Bharat is to the south of him, while Hanuman is standing attentively right in his front with the open palms of

their folded hands touching each other in front of the chest (as a mark of showing respect to the Lord as well as a token of submission much like a disciple who wishes to hear every word that his teacher says, or like a loyal servant ever eager to carry out every single order of his master). These three gentlemen form another triangle (32).

[Note—The triangle is formed by Shatrughan at one end, Bharat at the other end, and Hanuman at the third end.]

33. Sugriv (the monkey king of Kishkindha) is present below Bharat and Vibhishan is present below Shatrughan¹, while Laxman is standing behind Lord Ram, waving a whisk and holding a royal umbrella over the Lord² (33).

[Note—¹The term ‘below’ implies that the dais where Lord Ram’s throne is placed is a raised platform or dais having several steps leading upto its top. His brothers and close associates are standing on different steps depending on their closeness to the Lord and in accordance with the social hierarchy, court order and decorum prevalent at the time of Lord Ram that governed the positioning of various attendants and other functionaries of the royal court of the Lord. These rules governed as to where the different courtiers of a king-emperor attending him should sit or stand while the latter is attending his royal court. Hence, the Lord’s brothers Laxman, Bharat and Shatrughan are standing on a step higher and closer to the Lord than the step on which Sugriv and Vibhishan stand. If the brothers are standing one step below the main platform of the dais, then Sugriv and Vibhishan should be standing on the second step.

However, Hanuman occupies a special place in the scheme of things as he is very dear to the Lord and privileged enough to receive the Lord’s attention more than anyone else. After all, the Lord had made it clear that his indebtedness towards Hanuman can never be repaid when the latter had come back with the news of Sita and conveyed her message to the Lord. It was Hanuman who had single handedly burnt the city of Lanka, thereby settling scores with Ravana in a symbolic manner on behalf of the Lord. Even during the epic war at Lanka, it was he who played an exemplary and stellar role in vanquishing the army of the demons. When Laxman lay unconscious in the battle-field when he was shot by an arrow of Meghnaad, the son of Ravana, it was Hanuman who had brought the medicine man of Ravana from inside the well-guarded city of Lanka to prescribe the proper treatment, and then went all the way to the mighty Himalayas to the north of India, uprooted an entire hill and brought it back to Lanka so that correct herbs could be administered to Laxman and he be brought back to life—all within the limited time-frame of the night before the break of day, and after having overcome all formidable obstacles put in the path by Ravana to hinder Hanuman’s progress. Finally, it was Hanuman who had brought the good news of Lord Ram’s arrival to Bharat when the latter was feeling hopeless and preparing to die at the end of the exile period. Hence, Lord Ram and his entire clan were extremely obliged to Hanuman. Therefore, no one questioned where he stood, and he always had the privilege of having a right of way and an unrestricted access to the Lord.

²Verse no. 10 outlines the 1st triangle, verse no. 11 the 2nd triangle, verse no. 32 the 3rd triangle, and verse no. 33 the 4th triangle. It should be noted that while Laxman was standing to the right of Lord Ram in verse no. 10, he has shifted place to behind him, and his place has been taken over by Bharat in verse no. 32. Besides this, it appears that Lord Ram has turned himself slightly to face Hanuman in verse no. 32 because it is said that Hanuman is standing respectfully and obediently facing the Lord.]

34. The two brothers (Bharat and Shatrughan) are standing with hand-held fans made from palm leaves. In this way, there are two imaginary triangles—one consisting of Laxman, Bharat and Shatrughan, and the other consisting of Hanuman, Sugriv and

Vibhishan. These two triangles have a total of six points, and therefore form a hexagon¹.

Lord Ram is seated in the center, surrounded by his attendants as described above.

Now, the positioning of the various deities in the worship instrument called the Yantra is being described. At the center of this Yantra is the hexagon mentioned above. In the center of the hexagon is seated the deity to be worshipped, which in this case is Lord Ram personifying the supreme transcendental Brahm.

Lord Ram is surrounded by various 'Aavarans'² (which literally mean a covering, shield, band, girdle, protective ring or sheath that encloses the deity from all sides). These Aavarans are in the form of various Beej Mantras of the Lord with different ascended sounds of the vowels (34).

[Note—¹When a worship instrument is constructed, its outline resembles a multi-tiered circular structure resembling a wheel. This wheel stands for the entire creation in a miniature form. At the center of this wheel is the hub representing the Viraat Purush around whom the entire creation revolves. This central area of the hub is designed like a six-pointed star, and at its center is a hexagon. Through the center of this hexagon passes the axle representing the cosmic Consciousness known as the supreme transcendental Brahm. The wheel is actually supported by the axle which is at its core but remains hidden from sight. The physical structure of the wheel however has the hexagonal hub as its center, and this hub is visible. In this analogy of the wheel of creation, Brahm stands for the axle, Lord Ram for the hub, and the rest of the components of the multi-tiered wheel stand for the different Gods and Goddesses who stand in attendance before the Lord and help him to regulate this vast creation and keep the wheel of creation rotating infinitely.

There are two triangles referred to here in this stanza. To construct the six-pointed star, one equilateral triangle is drawn erect while the other is drawn over it in an inverted position. Refer verse no. 40 below. The six corners of this star are enclosed in a circle drawn around it. This is the first circle. Subsequent circles are drawn outside it in concentric manner with increasing radii. These circles represent the various levels of creation.

²The word *Aavarana* means to cover in a veil, to sheath, to envelop, to wrap in a sheet, distortions, pretension, deception, deceit and something that does not allow the original thing to be seen by covering it with a thin veil that distorts its originality; a veil of ignorance about one's true nature, identity and essential form that cloaks the Atma/soul which is pure consciousness and the true self. Hence, the word 'Aavarana' literally means a covering, shield, band, girdle, protective ring or sheath that encloses the deity from all sides.

The basic *Beej Mantra* of Lord Ram is 'Raam or Raan(g)'. This is formed by the consonant 'Ra', as in the word *run*, to which the long vowel sound 'Aa' of the Sanskrit language is added, i.e. 'Ra' becomes 'Raa' as in *rather*, *father* etc., and then a dot is placed on its top to form the sound of a silent 'M' as in *mum* or *come*. Hence, the completed Beej Mantra becomes 'Raam'. It is also pronounced as 'Raan(g)' sometimes as the last syllable 'M' represented by the 'dot' or Bindu is silent. Now, to the basic alphabet 'Ra' are added other vowel sounds and the result is that we have a set of six Beej Mantras which are variants of the main Mantra 'Raa'. Incidentally, the Beej Mantra of the fire element is also the alphabet 'Ra'.

The various permutations and combination of this single letter 'Ra' would be the following Beej Mantras—Raam/Raan(g) (राम्) where the letter 'R' is pronounced as in the English word '*rather*, *round*'; Rim or Ring (रिम्); Room or Roong (रूम्) where the letter 'R' is pronounced as in the English word '*ruler*', Raim or Raing (रैम्) where the letter 'R' is pronounced as in the English word '*rang*'; Roum or ROUNG (रौम्) where the

letter 'R' is pronounced as in the English word '*wrong*'; and Raha (रः) in which the letter 'R' is pronounced as in the English word '*half*'.

As we observe here, the basic alphabet 'Ra' of the name of the Lord as 'Ram', which acts as the Beej Mantra for the Lord, can have different sounds depending upon the vowel sound added to it. In all these variants of the Beej Mantra, the basic sound is that of 'Ra'. It implies that the same basic truth and reality can appear to be different when viewed from different angles, with different levels of intelligence and wisdom. Therefore, no matter how one worships the Lord, no matter which Mantra is used for such worship, if the worshipper's mind is focused on the Lord, then these things become irrelevant. These variations of the same Mantra and Divinity are called 'Avaran' because they tend to hide the truth in a veil, creating dichotomies and variations, leading to confusions and making it difficult for a common man to unravel its secrets. If not understood wisely and interpreted judiciously, these Avarans surrounding Lord Ram's true identity can lead to a lot of doubts and perplexities in the mind of a spiritual aspirant about the reality of the Lord as being no one else but the Supreme Being himself personified.

These Avarans are like the various orthodox and heterodox theories about the same Supreme Being, and if one is not wise enough to pick up the Truth then he would be spending his entire lifetime making a wild-goose chase without reaching his spiritual goal. He must realise that all the different doctrines, philosophies and theories talk about one single universal and absolute Truth in different languages and metaphors.

In other words, all the six orthodox theories such as Sankhya, Nyaya, Vaisheshika, Purva Mimansa, Vedanta and Yoga, and the three heterodox theories such as Charvaka, Buddhism and Jainism—all of them talk about the same Divinity using different languages. A wise man must transcend them and see the 'light of Truth', for otherwise he would be lost in the haze created by the Avarans that surround the Truth.

In brief, the implication of this example of the Beej Mantra of Lord Ram having many variations is that it is important for a wise spiritual aspirant to break through the outer shell of illusionary and misleading forms of Mukti and Moksha (liberation, deliverance, emancipation and salvation), of Anand (bliss and happiness) as well as of Brahm (divinity and holiness) that are created by the Lord's Maya Shakti (powers of creating delusions), and instead endeavour to search out the real Truth by developing a deep insight into the reality of what constitutes divinity and holiness, and what is merely a make-belief form of it. The actual Truth is hidden in layers and layers of veils called the various 'Aavarans' that surround Brahm, thereby creating delusions about the latter.

Extended further, it would mean that one should break free from the many forms of Agyan (ignorance) that cause obstacles and come in the way of the seeker's search for the 'truth' about his Atma which is his truthful 'self' and pure consciousness representing the supreme Brahm.

In spiritual terms it implies that in order to access the supreme Brahm and find final emancipation and salvation, or becoming self and Brahm realised, the aspirant needs to overcome so many hurdles and break through layer after layer of surreal forms of divinity and holiness that often mislead him and divert his attention from the real goal. An aspirant who is not wise and enlightened enough would be dazzled by the glory and magnificent charms of so many Gods and their divine powers and abilities to fulfill all his worldly desires, but all this would only deflect him from his main aim of attaining his final salvation and emancipation. But at the same time, he has to show his respects to all these forms of the Lord in order to emphasize that he is humble and has no sense of pride and ego in him. Further, he has to keep all these attendants of the Lord pleased and in good humour so that they aid him in his spiritual progress, and do not unnecessarily cause problems for him.

In this context we have the example of the Tripadvibhut Maha Narayan Upanishad of the Atharva Veda. It describes how a spiritual pilgrim passes through different levels of heaven in order to reach the supreme heaven where Lord Vishnu, regarded as the personified form of the Supreme Being, has his divine abode. During his spiritual journey, the pilgrim meets so many Gods, Goddesses, holy Spirits and their attendants, pays his respect to them, and goes on moving higher and still higher till he reaches his spiritual destination. He does not fall prey to the temptation of dazzling grandeur and majesty that each of these enchanting heavens offer to him. The point is that a wise and enlightened man should understand the basic principles of metaphysics and spirituality, and pick up the real gem while discarding the look-alikes for his own spiritual welfare. He should not allow himself to be tricked by the various Avarans that surround the reality and the truth.]

35-37. The second Avaran (ring of attendants) around Lord Ram consists of Vasudeo, Shanti, Sankarshan, Sri, Pradumna, Saraswati, Anirudha and Rati. They form a ring around Lord Ram and are respectively present in the eight corners around him¹. [Thus, the second ring around Lord Ram consists of eight attendants.]

The third Avaran (ring of attendants) around Lord Ram consists of Hanuman, Sugriv, Bharat [35], Vibhishan, Laxman, Angad, Jaamvant and Shatrughan.

The fourth Avaran or the ring around Lord Ram consists of Dhristi, Jayant [36], Vijai, Suraashtra, Raastavardhan, Akop, Dharmpaal and Sumantra². [37]. (35-37).

[Note—¹The eight Gods and Goddesses and their respective locations around Lord Ram are as follows—Vasudeo (the Lord of Vausus, the primary assets of creation such as gems, fire, water etc.) is present in the south-eastern corner; Shanti (the goddess of peace and tranquility) is present in the southern corner; Sankarshan (Laxman, as he is an incarnation of the legendary Seshnath, the cosmic serpent on whose back Lord Vishnu reclines in the cosmic ocean, and who became Balraam, the older brother of Lord Krishna when Lord Vishnu incarnated in this form) is present in the south-western corner; Sri (or Goddess Laxmi, the goddess of wealth and prosperity) is present in the western corner; Pradumna (one of the many divine forms of Vishnu) is present in the north-western corner; Saraswati (the goddess of knowledge) is present in the northern corner; Anirudha (literally meaning one who cannot be stopped or obstructed; one of the many forms of Vishnu) is present in the north-eastern side; and finally Rati (the consort of Kaamdeo, the God of love and passion) is stationed on the eastern corner.

²We can visualize this situation in the form of a high dais where the Lord is seated, and the attendants of the Lord standing on different steps of the stairs which lead up to the top platform. These steps are located in the eight directions mentioned in these verses. These directions are the south-east, south, south-west, west, north-west, north, north-east and east. Each direction is guarded by successive rings of attendants. We can say that these attendants are standing on different steps of the stairs leading up to the dais where the throne of the Lord is placed. The step they occupy depends upon their seniority and position in the hierarchy of the Lord's attendants.

For instance, on the stairs in the *south-eastern corner* are standing Vasudeo on the first step, below him is Hanuman on the second step, and still below him is Dhristi on the third step. Similarly, in the *south* direction, Shanti is standing on the first step, Sugriv on the second step, and Jayant on the third step. In the *south-western* corner are positioned Sankarshan on the first step, Bharat on the second step, and Vijai on the third step. In the *western* direction are positioned Sri on the first step, Vibhishan on the second step, and Suraashtra on the third step. In the *north-western* corner are positioned Pradumna on the first step, Laxman on the second step, and Raastavardhan on the third step. In the *northern* direction are positioned Saraswati

on the first step, Angad on the second step, and Akop on the third step. In the *north-eastern* corner are positioned Aniruddha on the first step, Jaamvant on the second step, and Dharampaal on the third step. And finally, in the *eastern* direction are positioned Rati on the first step, Shatrughan on the second step, and Sumantra on the third step.

Refer also Canto 5, verse no. 6.]

38. When Lord Ram is surrounded by the ten Gods, who are called ‘Dikpals’ (i.e. the custodians of the celestial world), it forms the fifth Aavaran (ring) around him.

These ten Dikpals* are the following—Indra who is the king of Gods and who has a thousand eyes on his body, and is therefore called ‘Sahastraaksha’, Agni or the Fire God, Yam or the God of Dharma (i.e. the God responsible to ensure that the great tenets of righteousness and proper conduct are observed by the creatures, and to punish those who violate these laws), Niritiya (also known as Nairitya), Varun or the Water God, Anil or the Wind God, Indu or the Moon God (sometimes replaced by Kuber, the treasurer of Gods), Ishan or Lord Shiva, Brahma the creator, and Anant who is Lord Vishnu, the sustainer and protector of creation (or Lord Seshnath, the legendary serpent who holds the earth on its hoods in a symbolic gesture to indicate that Lord Vishnu is responsible for taking care of this creation).

[The eight Digpals are the divine forces of creation in a personified form of various Gods who are assigned the task of taking care of the entire creation. They are the following—(i) Indra who is the king of Gods and responsible for production of rain as well as to control all other Gods who are said to be represented by the various independent forces of Nature; (ii) Agni is the personified form of the fire element responsible for providing heat, energy, light, vitality, strength, vigour and vibrancy to creation; (iii) Yam is the personified form of death as well as assigned the duty to uphold the laws of Dharma (or the auspicious virtues of righteousness, nobility, propriety, probity etc.), and to punish those who violate it; (iv) Niriti or Nairitya who is the God responsible for the actual death and punishment of the sinful and unholy creatures in creation; (v) Varun is the personified form of the most essential ambrosia of life known as the water element that provides nourishment and lubrication to this creation, and is regarded as the basic element that harbours life in all its forms in its bosom; (vi) Anil is the personified form of the life-giving air or wind element which is also called Pran—literally meaning ‘life’ which is a proof of its importance and significance vis-à-vis this creation; (vii) Kuber is the treasurer of Gods and responsible to provide all the necessities of life to the inhabitants of this world; (viii) Ishan is Lord Shiva who is also known as Mahadev, the Great Lord, as well as the one who is responsible for maintain balance in this creation by controlling death, and hence is called the ‘concluder’; (ix) Brahma is the creator of the physical world as well as the body of knowledge known as the Vedas, and therefore assumes the role of a grand old patriarch of the family known as the world; and (x) Anant or Lord Vishnu who is so-called because he is eternal, infinite and endless, has infinite responsibilities, and is assigned the multi-prong duty of taking good care of the world in all respects. He is also called Anant as he is none but the eternal Brahm himself in the form of the Viraat Purush, the all-pervading, all-encompassing and almighty Lord of creation. In fact, even Brahma and Shiva are said to be born from this Viraat Purush.] (38).

[*Note—Refer also Canto 5, verse no. 6.

(a) The following are the various direction in which these ten Gods should be worshipped—(i) Indra in the east, (ii) Fire in the south-east, (iii) Yam in the south, (iv) Niriti or Nairitya in the south-west, (v) Varun in the west, (vi) Anil in the north-

west, (vii) the Moon God in the north (sometimes also represented by Kuber, the treasurer of the Gods because of the fact that both are treasurers—while the Moon stores the elixir of eternity and bliss, called Amrit, that the Gods drink, Kuber stores all the riches that belong to the Gods) the Moon because the latter stores the Amrit/ambrosia for the Gods), (viii) Ishan or Shiva in the north-east corner, (ix) Brahma at a point located near the top or zenith of the celestial globe which is slightly tilted towards the east side, and hence located at a point between the north and the north-east, and (x) Anant in the bottom corner or nadir end of the celestial globe but slightly towards the west to correspond to a point between the exact south and the south-east corner. [The line joining the two points where Brahma and Anant are worshipped passes through the center of the celestial globe but is slightly tilted from the perpendicular line so that its top end points to towards north and north-east while its lower end points towards south and south-west.]

(b) According to the *Tripadvibhut Maha Narayan Upanishad* of the Atharva Veda tradition, Canto 7, paragraph no. 58, the eight Lokpals are the following—Indra, Agni or the Fire God, Yama or the God of death, Nriiti, Varun or the God of water, Vayu or the God of wind, Soma or the Moon God, and Isha or Lord Shiva.

(c) The Beej Mantras or the root or seed Mantras of these Gods are respectively lum or lun(g) (लृ), Rum or Run(g) (रृ), mum or mun(g) (मृ), ksham (क्ष), vum or vun(g) (वृ), yum or yan(g) (यृ), sam or san(g) (सृ), hum or hun(g) (हृ), aam or aan(g) (आं), and num or nun(g) (नृ).]

(d) A brief introduction of the Gods mentioned above are given here—

¹Indra derives his name from ‘indri’ meaning the sense organs of the body—five organs of perception and five organs of action. The vital functions and the virtues of each of these organs are personified as a God. Since the heart is at the core of life of a man, the central authority that regulates all these Gods is also said to have its seat in the heart. That authority is the emperor of the body and its organs, and it is the Atma. Indra is a metaphor for or a personification of the combined virtues and characteristics that define all these organs and their functioning. The organs have an intrinsic tendency to move towards pleasing things and away from unpleasant things. Therefore, it is deemed that their messenger, the hand, brings to them only selected and best of things which is like bringing Amrit for their king Indra, because anything that is acquired by the subjects are first offered to the king before the subject can enjoy it. Indra in the present context is the Atma because the latter is the undisputed emperor of the body. According to the Rig Veda, 1/ 4-5; 51-57, Indra represents the combined forces of Nature represented by the different Gods. He loves to drink Som, the elixir of bliss and eternity (Rig Veda, 3/ 36/ 8). He has the Wind God called Marut as its chief assistant.

²The Fire God or Agni—He first appears in Rig Veda—1/1, 12/1-122. Since he was the first born amongst the Gods, he was called ‘Agni’ meaning the one who comes first, that which precedes. He is the foremost amongst the Gods worshipped on earth (Shatpath Brahmin, 6/1/11). He is compared to the Sun in the heavens. He has 7 tongues representing the 7 colours of the rays of the Sun or the colours of light (Rig Veda, 1/146/1; 3/6/2). Since he provides nourishment to the Gods by accepting the offerings made to the sacrificial fire at the time of fire sacrifices, he is deemed to be their sustainer and father (Rig Veda, 1/69/1). Other names of the Fire God called Agni or Agne are the following—Vishwavedus, Kavi, Kavikratu, Jaatvedus, Vaishwaanar, Tanunpat, Matrishwa and Naraashansha. It is believed that he was born from the mouth of the Virrat Purush (Rig Veda 10/90/13).

³The Yam God—He is extensively covered in the 1st and 10th Mandals of the Rig Veda. Sukta 10 of the tenth Mandal is totally devoted to him. Yam personifies the concept of death and life after death. As opposed to Niriti who is also the God related to death, Yam deals with giving justice to the dead person depending upon his deeds that he has done during his lifetime. Therefore, he is also called the patron God of

Dharma, because he gives the dead person an abode in the heaven for his righteous and noble life, whereas Niriti is the patron God of death and destruction due to sins and evil way of life. Yam's sister is Yami. His father is named Vivaswat or Vivaswaan, and he is also called 'Yam Vaivaswat' (Rig Veda, 10/14/5). His mother's name is Saranyu (Rig Veda, 10/17/1-2). He is regarded the patron God of those who are dying. He resides in the outer heaven. Out of the 3 Lokas (mythological worlds), the first two, i.e. 'Bhu' (earth; the terrestrial) and 'Bhuvaha' (the sky just above the surface of the earth; the space of the solar system) is the realm of Savita (the God who is treated as synonymous of Sun), while the third world, the 'Swaha' representing the heaven, is the abode of Yam (Rig Veda, 10/35/6). In some places he is also regarded as the son of a Gandharva and a marine beauty (Rig Veda, 10/10/4).

⁴*Niriti* or *Nairitya* God—First appears in Rig Veda, 10/59/1-3. He is regarded as the God responsible for destruction, ruin, decay, misfortune, bad luck, diseases, sins, miseries, troubles and torments. He is equivalent to death. He is treated as being synonymous with sin and death (Shatpath Brahmin, 7/2/1/3). Therefore, he is closely related to Yam in form as the God of death.

⁵*Varun*, the Water God—He appears first in the Rig Veda, 1/25; 2/28. He is the patron God of water (Gopath Brahmin, 1/1/7). He is regarded as the king amongst the Gods (Taiteriyā Sanhita, 3/1/2/7). He is the lord of all the Bhuvans or abodes (Rig Veda, 5/85/3). He is regarded as the patron God of the night (Atharva Veda, 9/3/18).

⁶*Anil* is the Wind God. He has been described variously as 'Maruts' and 'Vayu'. (a) The 49 Maruts—they are the Wind-Gods mentioned in Rig Veda, 1/37-39 and 1/165/3, 5, 7, 9. They are regarded variously as—(i) sons of Indra and Vrishni (Rig Veda, 2/34/2), (ii) Sons of Rudra (Rig Veda, 2/33/1), (iii) similar to the Fire-God (Rig Veda, 6/66/2), and (vi) Indra God (Rig Veda, 1/165, 171). The Purans call them sons of sage Kashyap and Diti.

Vayu or *Anil* or the Wind God appears in the Rig Veda, 1/2/1-3; 1/134. The 'vital air or wind element' was created from the Pran or the vital life-sustaining vitality of the creator Prajapati Brahma (Rig Veda, 10/90/13). He is regarded as the Atma of all the Gods (Shatpath Brahmin, 9/1/2/38). He bestows immortality to the Gods and other exalted souls who are able to please and control him (Rig Veda, 10/186/3). He has the fastest speed amongst the Gods (Taiteriyā Sanhita, 3/8/7/1). He moves in an oblique line (and not straight) (Jaimini Brahmin, 3/3/10).

⁷*Kuber*, the treasurer of Gods—According to Veda Vyas' 'Adhyatma Ramayan', Uttar Kand, canto 1, verse no.24-44, once sage Pulastya went to do severe penances in the Himalayas in the hermitage of sage Trinbindu. There his host married his daughter to him, and from this union was produced sage Visrawa. Sage Bharadwaj married his daughter to him, and the union produced Kuber. He was blessed by Brahma and other Gods and was made their treasurer. They also gave him the celestial plane called Pushpak aboard which Lord Ram had come back to Ayodhya after conquering Lanka. Kuber was the elder step brother of Ravana, the infamous king of the demon race and the villain of Ramayan.

⁸The *Moon God*, also known as *Indu* or *Chandrama*—He appears first in the Rig Veda, 10/85/19). He is the patron God of night. His origin is in the Mana (heart and mind; the emotions and thoughts) of the Parmatma or the supreme Lord (the Viraat Purush or Vishnu) (Yajur Veda, 31/12; Taiteriyā Brahman, 3/10/8/5). His existence depends upon the Sun God. On the dark night, he is supposed to enter the Sun (Aiteriyā Brahman, 8/28). Chandrama is synonymous with Som, the divine elixir and sanctified drink drunk during the religious sacrifices as it gives its drinker peace and a long life (Kaushatiki Brahman, 16/5; Aiteriyā Brahman, 7/11). He is the controller of seasons and months; he always changes so appear to be like a new born everyday. He gives peace and long life to the 'Stota', the chanter of hymns as prayers (Rig Veda, 10/85/19).

Chandra or the Moon Gods appears in the Vedas as follows-- Rig Veda—10/85/19; Yajur Veda—1/28; Atharva Veda—6/78/1-2; 19/1.

The Yogshikha Upanishad of Krishna Yajur Veda tradition describes this Moon as being as the symbolic form of the water element. The moon is said to be the celestial pitcher of Amrit, the elixir of eternity and bliss that is drunk by the Gods. In the human body, it is represented by the Eda Naadi passing through the left nostrils and which is used during do Pranayam. [Refer Canto 1, verse 166.] It is also present as the crescent moon, the Ardha Chandrakar Chakra, which is said to be the shape of the water element of which the patron deity is Vishnu, the sustainer of creation, and located from the knee to the hip region. [Refer Canto 1, verse 176 and Canto 5, verse no. 13.] At other places it describes the symbolic importance of creating a union of the moon and sun as metaphor for the union of the creature with the supreme Brahm. [Refer Canto 1, verse nos. 56 and 68 for instance.] In the context of Pranayam it is used to indicate the bliss obtained by the ascetic. [Refer Canto 1, verse nos. 120, 127.]

Canto 1, verse no. 133 of this Upanishad describes the great Mantra ‘So-a-ham’ and asserts that the moon stands for the letter ‘sa’ of this Mantra. Other instances where moon appears in Yogshikha Upanishad are Canto 1, verse nos. 133, 146, 176, Canto 3, verse no. 11, and Canto 6, verse no. 4.

The Rudra Hridaya Upanishad of Krishna Yajur Veda, in its verse no. 4 asserts that the Moon God is Vishnu personified. This is because Vishnu is the sustainer and nourisher of creation much like the Som which is a divine elixir that sustains the Gods and gives them eternity. Another reason is that the physical form of Som is like the male semen which harbours life intrinsically inside it and is the means by which creation is brought about, and Vishnu in his more sublime form known as Viraat Purush is also the Lord from whom the entire creation emerged.

⁹*Ishan* and Lord Shiva are the same. Shiva is the concluder of creation and is the third of the Trinity Gods, the others being Brahma the creator, and Vishnu the sustainer and protector of creation. Shiva has been assigned the task of bringing the world to an end. There are other connotations of this word ‘Shiva’—it refers to such virtues as truthfulness, holiness, divinity and purity; welfare and well being; righteousness and auspiciousness; renunciation, dispassion and detachment; wisdom, erudition, sagacity and enlightenment; peace, tranquility, serenity and their attendant happiness, joy and bliss. Lord Shiva is also considered as the most exalted and wisest amongst the Gods, and is therefore honoured with the epithet ‘Maha Dev’ or the Great God, and ‘Maheshwar’ or the Great Ishwar as he is regarded as the supreme Lord of the entire creation. Since ‘truthfulness and auspiciousness’ are qualities that are beautiful, this word also means something that is beautiful and beyond reproach.

The Atharvashikha Upanishad of the Atharva Veda tradition, in its Kandika 3 declares that ‘Shambhu’, one of the many epithets of Lord Shiva, is the highest deity to be worshipped and adored, and he represents the fifth state of consciousness that is called the Turiyateet, and to the fourth aspect of the ethereal word OM—i.e. when the word has been said fully and the mouth closes. The first letter of OM is A and it represents Brahma the creator, the second letter U represents Vishnu the sustainer and protector of creation, the third letter M represents Rudra the annihilator and one of the names of Shiva, and the three and half letter called the ‘Ardha Matra’ represented by the horizontal ‘S’ mark attached to the symbol of OM on its side represents Ishan, one of the names of Shiva and the God who is the ruler of all other Gods. Finally, the fourth complete Matra symbolised by the dot on the top is Shambhu or Lord Shiva. This Shambhu or Shiva is Brahm in its best and most pristine form. He is *called Shambhu* meaning one who exists or is established in an enlightened state of highest consciousness (i.e. is ‘Bhu’) that is marked by perfect self control, complete neutrality, absolute tranquility, serenity, peacefulness and blissfulness (i.e. is ‘Sham’). [Hence, Lord Shiva is called Shambhu because he possesses these auspicious virtues and is Brahm because only Brahm is the supreme transcendental Lord of creation who surpasses all earlier states of existence such as the Jagrat or waking state, the Swapna or dreaming state, the Shshupta or deep sleep state and the

Turiya or post-Sushupta state to permanently live in the Turiyateet state of perpetual bliss and tranquility.

The Yogtattva Upanishad of Krishna Yajur Veda tradition, in its verse nos. 92-94 says that Lord Shiva, in his form as Rudra, is the patron deity and personification of the fire element, and it is no wonder then that he is surrounded by ‘fire-spitting’ serpents as a symbolism of this fact. In this Upanishad’s verse nos. 98-102 it is asserted that Shiva is the patron deity and personification of the sky element.

The Dakshin Murti Upanishad of Krishna Yajur Veda, in its verse nos. 8, 10, 13, 15 and 19 affirms that Shiva is invariably wrapped by serpents. This Upanishad describes Lord Shiva as the south-facing Lord and elaborately elucidates the metaphysical significance of this from.

The Brihajjabal Upanishad of the Atharva Veda tradition, in its Brahman 4, verse no. 29 says that the Lord with three eyes (Trinetrum) is the bearer of this world having three aspects or the one who is the foundation upon which all the three Gunas such as Sata Guna, Raja Guna and Tama Guna rest (Trigunadhaaram) and is the one from whom the Trinity Gods (i.e. the creator Brahma, the sustainer Vishnu, and the concluder Rudra) are born. [This Lord is none other than Lord Maheshwar, the great Ishwar or Lord of creation who is also known as Shiva, Ishan, Isha etc. This Lord is synonymous with the supreme transcendental Brahm. This fact is endorsed Krishna Yajur Veda’s Varaha Upanishad, Canto 4, verse no. 32, and in Dakshin Murti or Dakshin Mukhi Upanishad.]

As the deity of the fire element, he is said to have ‘three eyes’ (Yogtattva Upanishad, verse no. 93), and as the deity of the sky element he is depicted as having a moon tucked in his lock of hairs, besides having five mouths, ten arms and three eyes (Yogtattva Upanishad, verse no. 100). Now let us see their significance.

The Maho-panishad of Sam Veda tradition, in its Canto 1, verse no. 7 describes that Shiva was born from the forehead of the Viraat Purush, the macrocosmic, invisible and all-inclusive gross body of Brahm, the Supreme Being.

The Panch Brahm Upanishad of Krishna Yajur Veda, verse no. 41 espouses that Shiva lives in the heart of the creature as an embodiment of ‘Sat-Chit-Anand’.

Ishan is one of the names of Shiva and it has been defined in Atharvashir Upanishad of Atharva Veda tradition, in its Kandika 4 as follows—“Why is he (Brahm in the form of Rudra) known as ‘Ishan’ (literally meaning the ‘Lord’ and his ‘insignia or authority’)? It is because he (Rudra) has full control over all the Gods and their powers and authority. Ishan signifies the Lord’s overriding authority and complete control over all the aspects of creation that are individually controlled by these Gods who actually act on behalf of Rudra representing the dynamic form of Brahm. These Gods are nothing but the different forces of Nature personified.

It is you who controls this entire creation as Indra, the king of Gods as well as the organs of the creature’s body over which these Gods rule. That is also why you are called ‘Ishan’.”

He is also known as *Maheshwar*, the great God. This term has been defined in Atharvashir Upanishad of Atharva Veda tradition, Kandika 4.

¹⁰*Brahma*, the creator is also known as Hiranyagarbha because he represents the primordial golden egg from which the rest of the creation emerged (or was born). He is said to have his abode in the Brahma-loka which is synonymous with heaven, hence he is depicted as having his realm on the top of the celestial globe.

Prajapati Brahma is the manifestation of the supreme cosmic transcendental creator Brahm, in the form of Brahma, the creator.

Brahma, the patriarch of the creation, has certain characteristic qualities which are exclusive to him and which make him the nearest analogue to Brahm, the Supreme Being who is the Supreme Soul of the cosmos. Brahma has the power to create and control destiny —and therefore he virtually decides the time of annihilation or death of the world, though the actual task of annihilating or ending this world or causing death is delegated to Lord Shiva, but the mandate to do so

comes from the supreme authority, who is not Brahma but Brahm, but the former has been delegated this authority by the latter. Brahma unfolded the world when he turned his head in the four directions and uttered the four basic words Bhu, Bhuvaha, Swaha and Maha (symbolising the creation of the earth, the sky, the heavens and the great creation having countless varieties and numbers of creatures, small and big, who would populate it) as well as the Vedas (Rig, Yajur, Sam and Atharva) and the profound body of wisdom and knowledge contained in them. (See Mahopanishad, Canto 1, verse no. 9 of the Sam Veda tradition). Knowledge, wisdom and enlightenment are the chief characteristic of Brahm represented by the Atma/soul. Brahma also has these characteristic features because he is the one who has not only created the physical world but also the great body of knowledge in the form of the Vedas. Brahma is depicted as a white-bearded and learned grandfather of creation. This is a symbolic way of saying that he is the oldest and wisest one amongst all those who live. Even Vishnu and Shiva and all the other Gods are much younger to him. Both the two Gods (Vishnu and Shiva) are known to exhibit some elements of Rajoguna and Tamogunas, i.e. they have some sort of worldly characteristics such as showing anger, having passion etc., or assuming different forms as in the case of their various manifestations, but Brahma, the old bearded patriarch, remains one original without any manifestation, much like the supreme Brahm who remains detached from and dispassionate towards the creation, although he is the cause of it, is responsible for it and is the resting place for it.

The Maho-panishad of Sam Veda, Canto 1, verse no. 8 describes how Brahma came into existence. The sweat drops from the forehead of Viraat Purush formed the water element which coagulated into the primary cosmic gel that glowed with energy. It was called the cosmic egg or Hiranyagarbha. It was from the latter that Brahma emerged atop a lotus.

The Prashna Upanishad of Atharva Veda, in its Canto 1 says that the Sun God is the Prajapati because the Sun is responsible for life on earth.

The four words pronounced by Brahma created the four basic components of the cosmos—‘Bhu’ represented the earth/terrestrial world, ‘Bhuvaha’ represented the space between the earth and the heavens or the sky where the solar system is located, ‘Swaha’ represented the sky beyond the solar system; it means the heavens or the deep recesses of cosmos; inter galactic space, and ‘Janaha’ represented the creatures that inhabited and populated these three worlds.

The four mouths of Brahma symbolise the 4 cardinal directions of the compass and the preaching of the 4 Vedas symbolising knowledge, erudition and wisdom.

Brahma is called ‘Prajapati’ or the one Lord who is responsible for the welfare of all the subjects of this vast creation without having any distinction between them. Since Brahma is the creator, he is like the father, and since he has established the laws that are to be followed by the subjects of this creation he is also like the king who decides the laws that form the codes of conduct in his realm. But the question arises that if Brahm is supposed to look after his creation with equality, then why does one creature suffer while the other does not. The answer lies the fact that one creature suffers and the other does not is none of Brahma’s faults but that of the creature itself because it goes berserk and does not follow the sanctioned paths as laid down in the different Upanishads, especially highlighted in this Valli in a very specific manner, and therefore has to undergo the consequences for its actions. The reason is that this world is characterised by the theory of action and reward, and what one does he is bound to enjoy or suffer from its results.

How Brahma was created from the auspicious quality called Sata Guna that dominated the initial stages of creation has been described from the metaphysical point of view in the Saraswati Rahasya Upanishad of Krishna Yajur Veda, verse no. 49.

Life span of Brahma—The Tripadvibhut Maha Naryan Upanishad of the Atharva Veda tradition, Canto 3, paragraph no. 8 describes the complete life-span of Brahma, the creator.

¹¹*Anant* has two implications—one is that this word refers to the legendary serpent known as Seshnath who holds the earth on its hood, and the other is that it refers to Lord Vishnu who is none but the eternal and infinite Supreme Being himself. The word literally means an entity that has no end. Truly speaking, it applies to the Supreme Being known as Brahm as he is the only one who is endless and without an end. Brahm's cosmic manifestation is known as Vishnu or the Viraat Purush. Anant supports the entire creation by forming its base or foundation, and this fact is depicted by saying that Seshnath holds the earth on its hood. Well, in another incarnation Vishnu had assumed the form of a Tortoise to support the mountain from sinking during the legendary churning of the cosmic ocean by the Gods and the Demons in search of Amrit, the ambrosia of life and eternity. Then again, Vishnu had become a Boar to retrieve the earth on his snout when it was hidden in the under-world by a demon. In other words, whenever the need arose to give support to creation, it was Vishnu who has assumed various forms—one of them being as Seshnath. In his incarnation as Lord Ram, this Seshnath had become Laxman, Ram's younger brother, and in Vishnu's incarnation as Lord Krishna, Seshnath had become Balraam, Krishna's elder brother.

The fact that Anant is Lord Vishnu and no one else is endorsed in the next verse no. 39 which says that his weapon is the famous 'Chakra', the discus of Vishnu.]

39. The ten Gods have their respective weapons¹ stationed near them in the next ring just outside of the previous ring. This ring is the 6th concentric layer or girdle protecting Lord Ram.

The next Aavaran (ring) that encircles Lord Ram, i.e. the 7th outer ring, consists of the monkeys such as Neel etc., and sages such as Vashistha, Vaamdeo etc. All of them remain involved in worshipping and paying their homage to Lord Ram. (Please see also Canto 5, verse no. 7) (39).

[Note—¹The ten weapons of these above mentioned ten Gods are as follows—

(i) Indra's Vajra which is said to be the strongest weapon in creation. It is revealed in the form of the almighty thunderbolt which reduces anything to rubble when it ever strikes the earth.

(ii) Fire-God's weapon known as Shakti which stands for dynamism, energy, strength, vigour and vitality.

(iii) Yam's weapon known as Danda or a stick or baton. Since Yam is regarded as the keeper of Dharma, the tenets of righteousness, probity and propriety, he needs to wield the stick to ensure the implementation of these virtues, and uses the baton to punish the guilty and the violators.

(iv) Niriti's or Nairitya's Khanga or a sword. This God is said to be responsible to actually implement the commands of the Death God, sometimes also referred to as the Yam God, and hence wields the sword to cut off the head to kill and cause death in a symbolic manner.

(v) Varun's weapon is the Paash or the sling, the loop, the snare or the shackle. It is a symbolic way of saying that the Water God keeps the entire creation under its control with the help of the snare or the loop, and surrounds the entire creation like a girdle. This is because no life is possible without water. This also implies that the surface of the habitable world, the earth, is surrounded by ocean (water) on all sides.

(vi) Vayu's weapon is Ankush or the goad or any other sharp knife-like weapon. The Wind God controls all the vital functions in the body and is responsible for 'life' in all its hues. That is why it is also called the Pran (life) of creation. Its weapon 'goad' is very evident when a man suffers colic with sharp stabbing pains resembling the stabbing with a knife.

- (vii) Chandrama's weapon is the Gadaa or the mace.
- (viii) Ishan or Lord Shiva's weapon is the Shul or the trident, a spear or a lancet.
- (ix) Brahma holds a divine Kamal or a lotus. This indicates that he is wise and immaculate as well as the creator of holistic knowledge.
- (x) And finally, the weapon of Anant or Lord Vishnu is the famed Chakra—the circular saw-like discus that is the trademark weapon of Lord Vishnu. This Chakra has been described in detail in the Tripadvibhut Maha Narayan Upanishad of the Atharva Veda tradition, in its Uttar Kand, Canto 7, verse nos. 3-13.]

40. [Verse nos. 40-66 describe in great detail how to construct the 'Pooja-Yantra' or the instrument used to offer formal forms of ritualistic worship to Lord Ram. It is in the form of a Charm or a Talisman Yantra or a magical apparatus in the form of a geometrical design that is used to offer worship to Lord Ram in ritualistic forms of formal worship as done under Tantra philosophy.]

After describing the outlines of the 'Pooja-Yantra' and the deities who are worshipped through it (verse nos. 10-12, 31-39), details of how to construct it in physical terms in the form of a geometrical diagram or a sketch are being described now.

Two equilateral triangles must be drawn in such a way that the second triangle is placed in an inverted position, up side down, on the first triangle. This results in the formation of a hexagonal enclosure at the center with six smaller triangles on its six surfaces.

In the central hexagon thus formed, two symbols of the divine word OM (ॐ) should be written so that they face each other like a mirror image (40).

41. In the centre of the hexagon and bracketed on two sides with the curved arches of the OM Mantra is written the Beej Mantra of Lord Ram—which is 'Raam or Raan(g)' (राम्).

Below this Beej Mantra of Lord Ram is written, in a symbolic manner or in codified form, the work that is to be done or wishes which need to be fulfilled. It is accomplished by writing it in the second case or inflexion of the Sanskrit language. It is called the 'Dwitiya Vibhakti' of Sanskrit grammar (equivalent to the objective case of English grammar)¹.

The name of the worshipper is to be written on the top of the Beej Mantra of Lord Ram. This name should be in the sixth case or inflexion of the Sanskrit language. It is called the 'Shashthi Vibhakti' of the Sanskrit grammar (equivalent to the possessive case of English grammar)² (41).

[Note—¹In the sentence 'I eat a mango', the word 'mango' is in the objective case, which in Sanskrit is called the Dwitiya Vibhakti.

²In the sentence 'This is John's work', the word 'John's' is in the possessive case, which in Sanskrit is called the Shashthi Vibhakti.]

42. As a next step, the word 'Kuru' (कुरु) should be written on either side of the Beej Mantra of Lord Ram (which is 'Raam/Raan(g)' --राम्).

Then the Beej Mantra representing the cosmic energy and dynamic powers of the Lord, called 'Sri' and represented by the monosyllable 'Srim/Srin(g)' (श्री) should be written exactly in the center of the Beej Mantra for Lord Ram (i.e. राम्). [To place the Beej Mantra 'Srim/Srin(g)' in the center of the Beej Mantra 'Raam/Raan(g)', the latter has to be split into two segments—the letter 'Ra' will be at the left of the Beej Mantra 'Srim/Srin(g)', while the long vowel sound 'Aa' of the Beej Mantra 'Raam/Raan(g)' will be to the right of the Beej Mantra 'Srim/Srin(g)'.]

The entire setup should be such that it is surrounded by or enclosed from all the sides by the twin mirror images of the Pranav word 'OM' written earlier according to verse no. 40 (42).

43. Outside the hexagon, there are six equilateral triangles, each having a base on one of the six faces of the hexagon.

The following Mantras should be written in the six triangles so that one Mantra is accommodated in one triangle. They are written on the base of each of the six triangles which happen to be the outer surfaces of the six sides of the central hexagon. The Mantras are the following—

(i) In the first triangle, the Mantra 'Raam/Raan(g) Hridayaaya Namaha' (रं हृदयाय नमः) should be written, (ii) in the second triangle, the Mantra 'Rim/Ring Shirse Swaha' (रं शिरसे स्वाहा) should be written, (iii) in the third triangle, the Mantra 'Room/Roong Shikhaayea Vashat' (रूं शिखायै वषट्) should be written, (iv) in the fourth triangle the Mantra 'Raim/Raing Kavachai Hoom/Hum' (रं कवचाय हुम्) should be written, (v) in the fifth triangle, the Mantra 'Roum/Roung Netraabhyaam Vaushat' (रं नेत्राभ्यां वौषट्) should be written, (vi) and in the sixth triangle, the Mantra 'Raha Astraaya Phut/Fut' (रः अस्त्राय फट्) should be written.

On the outer left hand side of each triangle's apex should be written the Beej Mantra for Ramaa (Laxmi), i.e. 'Srim/Srin(g)' (श्री), and on the right side, the Beej Mantra for Maya, i.e. 'Hrim/Hrin(g)' (ह्रीं) should be written. [That is, on either side of the apex of each triangle formed on the side of the hexagon, one Beej Mantra is written to the left of it and one Beej Mantra is written to the right of it. On the left is 'Srim/Srin(g)' and on the right is 'Hrim/Hrin(g)'.]

The Beej Mantra for Kaam (passion, desires), which is 'Klim/Klin(g)' (क्लीं), should be written in the middle of the space between any two triangles (that is, a total number of six Beej Mantra 'Klim/Klin(g)' are placed on the Yantra in between the six triangles) (43).

44. Both on the outside of the apex of each of the six triangles as well as just inside them, the seeker should write the Beej Mantra for Krodh or anger, i.e. 'Hoom/Hum' (हुम्) flanked on either sides with the Beej Mantra for Vaak or speech, i.e. 'Aim/Aiyan(g)' (ऐं).

Now, three concentric circles should be drawn just outside of the sketch made by the hexagon and its six triangles decorated by the Beej Mantras (as described in verse nos. 40-44).

Outside the third circle drawn as directed in this present verse, an eight-petal lotus should be drawn (44).

45. In the eight petals of the lotus made as prescribed in verse no. 44, the following three sequences of the Sanskrit alphabets are to be written—

(i) At the base ('Kesar') of the petals, the vowels of the Sanskrit alphabets are to be written so that each petal as a set of two alphabets (i.e. a pair of vowels— अ आ, इ ई, उ ऊ, ऋ ॠ, ए ऐ, ओ औ, अं अः).

(ii) Next, above these vowels, the consonants of the Sanskrit alphabets are to be written such that each petal has one category of consonant. These are called 'Varga'. [There are eight such categories or Vargas of consonants which are headed by the alphabets— क, च, ट, त, प, य, श, क्ष]

(iii) Above these alphabets, near the tip of each petal but inside it should be written the forty seven letters of the 'Mala Mantra' in sequence in such a way that each petal contains six letters of the full sequence. (Please see verse no. 63 for the full version of the Mala Mantra) (45).

46. The eighth petal of the lotus will have only five remaining letters of the 'Mala Mantra'. [The first 7 petals have 6 letters each = $7 \times 6 = 42$ letters in all, and the remaining $47 - 42 = 5$ shall be placed in the eighth petal.]

Now, another ring of eight petals of the lotus should be drawn outside the first ring as was described previously in verse nos. 44-45. The Beej Mantra of Ramaa, i.e. 'Srim/Srin(g)' (श्री), should be written at the base of each of these eight petals.

Then the individual eight syllables of the eight-syllable Mantra 'OM Namō Narayanaaya' (ॐ नमो नारायणाय) should be written in such a way that one syllable is accommodated in one petal. [The eight syllables are = OM + Na + Mo + Naa + Raa + Ya + Naa + Ye = 8.] (46).

47. Outside the second layer of lotus petals as described in verse no. 46, another (i.e. third) layer of a 12-petal lotus should be drawn. Each letter of the 12-letter Mantra 'OM Namō Bhagwate Vaasudevaaye' (ॐ नमो भगवते वासुदेवाय) should be written near the apex of each petal so that one letter is written in each petal in a sequential manner. [The twelve letters or syllables are OM + Na + Mo + Bha + Ga + Wa + Te + Vaa + Su + De + Vaa + Ye = 12.] (47).

48. At the base (the 'Kesar') of these twelve petals should be written the Sanskrit alphabets such that each of the 1st eleven petals have four letters of the alphabet while the last (i.e. twelfth) petal has the remaining seven letters. [In Sanskrit, there are sixteen vowels and thirty five consonants from the first alphabet A अ to the last alphabet Gya ञ.] These letters should be in a slightly convex line (instead of a straight line to conform to the rounded contours of the circles of the worship instrument).

Outside this 3rd layer of the lotus petals, another layer—the 4th layer—of a 16-petal lotus should be drawn. At the base of each of these petals should be written the Beej Mantra for Maya— i.e. 'Hrim/Hrin(g)' (ह्रीं) (48).

49. In each petal of the 16-petal lotus of the 4th layer, one should write the letters of the following Mantras in such a way that one petal has one letter—'Hoom/Hum' (ह्रुं), 'Phat/phut' (फट्), 'Na' (न), 'Maha' (मः), and the 12-lettered Mantra 'OM Hrim/Hrin(g) Bharataagraj Ram Klim/Klin(g) Swaha' (ॐ ह्रीं भरताग्रज राम क्लीं स्वाहा). [These twelve letters are OM + Hrim + Bha + Ra + Taa + Gra + Ja + Raa + Ma + Klim + Swa + Ha = 12. Along with the earlier four syllables, viz. Hum + Phat + Na + Maha = 4, the total number of letters become 16. So, each petal will have one letter. Refer—(i) Ram Rahasya Upanishad, Canto 2, verse no. 54; and (ii) Tripadvibhut Maha Narayan Upanishad, Canto 7, paragraph no. 30.]

The letters should be placed near the tip-end of the petals. Next, the sixteen Beej Mantras of the different close associates of Lord Ram who are well versed in the Mantras pertaining to Lord Ram (e.g. the Lord's devotee and close confidante named Hanuman) should be placed at the points where two petals join each other, i.e. between each pair of petals just above their junction points. [These 16 Beej Mantras are mentioned below in verse no. 50] (49).

50. These sixteen Beej Mantras (as mentioned in verse no. 49 above) are as follows— (1) ‘Hrim/Hrin(g)’ (ह्रं —for Hanuman), (2) ‘Strum/Strim’ (स्त्रं—for Sugriv), (3) ‘Bhrum/Bhrim’ (भ्रं—for Bharat), (4) ‘Vrum/Vrim’ (व्रं —for Vibhishan), (5) ‘Lrimum’ (ल्रं—for Laxman), (6) ‘Shrum/Shrim’ (श्रं — for Shatrughan), (7) ‘Jum/Jun(g)’ (ज्रं —for Jaamwant), (8) ‘Dhrim/DHrin(g)’ (ध्रं —for Dhristi), (9) ‘Jrim/Jring’ (ज्रं —for Jayant), (10), ‘Vrim/Vrin(g)’ (व्रिं —for Vijai), (11) ‘Srim/Srin(g)’ (स्रं —for Suraashtra), (12) ‘Ra(g)’ (रं—for Raashtra Vardhan), (13) ‘Am/Ang’ (अं —for Akop), (14) ‘Dhrim/DHrin(g)’ (धं—for Dharampaal), (15) and ‘Srim/Srin(g)’ (स्रं—for Sumantra). The Sanskrit alphabet ‘Cha’ (च) which has come in the main sloka marks the end of the sequence.

Next, another layer of a 32-petal ‘Maha-lotus’ (the great lotus) should be drawn outside the lotus with 16 petals. [This will be the 5th lotus.] Each of the petals of this lotus should have a symbol of ‘Naad’ (नाद) and ‘Bindu’ (बिन्दु), i.e. a concave surface with a dot on top (50).

51. The thirty two letters of the following Mantra should be written inside these thirty two petals, with one letter (syllable) in each petal—‘Rambhadra Maheshwaas Raghuvir Nripottam Bho Dashaasyaantkaasmaakam Sriyam Daapaye Dehi Me.’ (रामभद्र महेश्वास रघुवीर नृपोत्तम। भो दशास्यान्तकास्माकं श्रियं दापय देहि मे). [The brief meaning of this Mantra is ‘Oh gentleman Lord Ram! You are the almighty and the greatest Lord of creation, a brave member of King Raghu’s dynasty, and are the best amongst all the kings. You were the one who was the cause of the end or elimination of the ten-headed evil demon (named Ravana). Please grant the boon of Sri, or all sorts of majesty and glory, to me.’ The thirty-two letters are the following Raa + Ma + Bha + Dra + Ma + He + Shwa + Sa + Ra + Ghu + Vi + Ra + Nri + Po + Tta + Ma + Bho + Da + Sha + Syaa + Nta + Ka + Sma + Kam + Sri + Yam +Daa + Pa + Um + De + Hi + Me = 32 letters. Refer Ram Rahasya Upanishad, Canto 2, verse no. 81.]

Then the names of the eight Vasus¹, eleven Rudras², twelve Adityas³ and one Brahma should be mentioned near the apex-point of each petal, one name in one petal (51).

[Note—¹The 8 Vasus are the following— Dhruv, Dhar, Som, Aapha (water), Anil (wind), Anal (fire), Pratush, and Prabhaas.

²The 11 Rudras according to Vishnu Puran (1/1/15) are the following—Har, Bahuroop, Trayambak, Aparajeet, Shambhu, Vrishakapi, Kapardi, Raivat, Mrigvyadh, Sharva, Kapaali.

³The 12 Adityas are the following—Dhata, Arayma, Mitra, Varun, Ansha, Bhug, Indra, Vivaswan, Pusha, Parjanya, Twashta, and Vishnu.]

52. As a next step, a circle should be drawn just outside of this 32-petal lotus so as to encircle it and touch the tip of each of the petals¹.

Then, a peripheral boundary of three consecutive squares (in the form of a parallelogram having three lines to each side)² should be drawn so as to enclose the multi-layered circular diagram made as per prescription contained in verse nos. 40-51. This is called the ‘Bhupur’, or the enclosing wall around the great fort where the Lord is symbolically seated in the worship instrument.

Next, the symbol of two weapons, i.e. the Vajra (the weapon of Indra) and the Shul (the trident or spear or lancet) are marked at all the eight corners of the Bhupur so as to give protection to the gates of this symbolic fort. The sign of the Vajra should

be marked or drawn in the four directions (i.e. in the north, west, south and east), and the symbol of the Shul or the trident/spear/lancet should be drawn in the four corners of the worship Yantra or the Charm instrument (i.e. in the north-west, south-west, south-east and north-east corners).

The completed diagram is called the ‘Bhupur Yantra’³ or the apparatus that is used for mystical and occult forms of ritualistic as well as Tantrik worship practices adopted to offer obeisance to the Lord (52).

[Note—¹The total number of names will be $8+11+12+1 = 32$.

²The three lines outside the circular apparatus/diagram represent the three inherent qualities present in any creature—viz Sata (the good qualities, Raja (the medium qualities) and Tama (the mean and lowest qualities).

³The characteristic features of a Bhupur Yantra are the following—a square, the sign of Vajra (goad) and Shul (trident or spear or lancet). The colour that is used to make these lines and symbols is the yellow colour.]

53-54. Even as any grand venue or a huge pavilion has four gates or entrances on four of its sides towards its north, east, south and west (for easy access), there should be four gates or entrances marked on the four sides of the square outlines of the Bhupur Yantra. [These four gates should be in the four directions—north, east, south and west.]

Then the ‘Bhupur’ instruments used for worship of Lord Ram should be decorated with the twelve signs of the zodiac¹. These signs should be placed one each on either side of the four gateways (i.e. 4 gates x 2 zodiac signs on either side of it = 8 in total), and the remaining four signs should be placed on the four corners of the instrument (i.e. in the north-east, the south-east, the south-west, and the north-west corners).

Then it should be made to appear that the legendary serpent known as Anant or Seshnath holds this Bhupur Yantra on its hood. This is done by writing the eight names of the Seshnanth or Anant on all the eight directions of this Bhupur as follows—in the North is written the name of Anant, in the North-East is written the name of Vasuki, in the East is written the name of Takshak, in the South-East is written the name of Karkotak, in the South is written the name of Padma, in the South-West is written the name of Mahapadma, in the West is written the name of Shankha, and in the North-West is written the name of Kulik. This depiction would make it appear that these eight legendary serpents are supporting the entire instrument from its eight corners (53-54).

[Note—¹The twelve signs of the zodiac are the following—Aries, Taurus, Gemini, Cancer, Leo, Virgo, Libra, Scorpio, Sagittarius, Capricorn, Aquarius and Pisces. The zodiac is the belt or band of constellation of stars through which the Sun, the Moon and the planets move across the sky. The twelve signs of the zodiac represent the twelve constellations considered important by astrologers who were ancient astronomers as well as mathematicians. The twelve cycles of the moon coinciding with the twelve months of the year consisting of one solar cycle was the reason why the figure twelve was chosen because the Sun and the Moon were central to astrological calculations.]

55. After that, the Beej Mantra of the Nrisingh God—which is ‘Ksharoum/n(g)’ (क्षरौ)—should be mentioned on the center of the arch above the four main gates marked in the four directions (north, east, south, west), while the Beej Mantra of the Varaaha God—which is ‘Hum/n(g)’ (ह्रँ)—should be marked at the four corners of the Bhupur instrument (i.e. in the north-east, the south-east, the south-west and north-west corners)*. [Nrisingh is the half man and half lion incarnation of Lord Vishnu,

and Varaaha is the Lord's Boar incarnation. An entire Upanishad called the 'Nrisingh Tapini Upanishad' of the Atharva Veda is dedicated to the Nrisingh God; it is the 7th Upanishad of this Veda. Similarly, an Upanishad called the 'Varaaha Upanishad' of the Krishna Yajur Veda is dedicated to the Varaaha God; it is the 30th Upanishad of this Veda. These Beej Mantras are marked to invoke the respective deities and request them to protect the Yantra. This protection is in addition to the protection gained by placing the signs of the Vajra and the Shul as described earlier in verse no. 52, and the eight serpents as mentioned in verse no. 53.]

The Beej Mantra of Lord Nrisingh, i.e. 'Ksharoum/n(g)' (क्षरौ), constitutes of two letters—viz. the first is 'Ksha' which is a combined sound of two letters 'Ka' (pronounced as in *come*) and 'Sha' (pronounced as in *shun*), and the second is 'Raun/m(g)' (pronounced as in *wrong*). This second letter [Raun/m(g)] is based on the alphabet 'Ra' and is in the form of a half-syllable called the 'Reff/Reph'¹. It is then adorned by the 'dot' that is placed on the top of a letter in Sanskrit to give it a nasal sound. Hence, the effect is that the simple alphabet 'Ra' becomes 'Raun/Raun(g)'—as in the English word *wrong*.

Next we have the Beej Mantra for Varaaha—i.e. 'Hum/Hun(g)' (ह्रूं). It is based on the Beej Mantra for Maya or the delusion creating powers of the supreme Brahm—which is 'Hrim/Hrin(g)' (ह्रीं), and additionally adorned by the 'Indu and Naad' (collectively called the Chandra Bindu, the crescent shape and the dot on its top)². The 'Indu and Naad' is a reminder of the fact that this Mantra has the same spiritual value and dynamic powers as those possessed by the ethereal Mantra OM which is also adorned by the 'Chandra-Bindu' and which is synonymous with the supreme transcendental Authority of creation known as Brahm. So in effect the resultant Beej Mantra for Varaaha God combines the Shakti (dynamics, powers and energy) of both the Maya as well as Brahm which is the principal Authority that created this Maya (55).

[Note—¹The *reff* or *reph* is a burring, a whirring and a guttural sound represented by the sound of the letter 'R'. It indicates passion and affection of the mind. It also stands for an entity that is cruel and merciless, that is wrathful and contemptible by nature. It is a half-syllable that produces a sound equivalent to the word *whirr*, *wharf*. It is depicted in the form of a coma placed on a letter to give it the prolonged sound of the alphabet 'R'. This 'reff' or 'reph' is indicative of the Beej Mantra for Lord Ram which is 'Raam or Raan(g)'. It is also indicative of the dynamic powers and punch that the cosmic fire element possesses and depicted in form of the the roar of a blazing fire. In short, the 'reff' or 'reph' indicates that Lord Nrisingh is very fierce and un-compromising in his nature while giving protection to his devotees and punishing those who are vile and sinful. He is given the charge of the main entrance gates precisely due to these virtues because only a very brave, fierce, unrelenting and unforgiving person should be made to guard the main entrance to the fort or a city.

²The *Naad* and *Bindu* are collectively called the 'Chandra Bindu'. It is a sign resembling a concave crucible or shallow plate over which is placed a dot at its focal point. It is a 'moon-like spot' and hence called the 'Chandra' (moon) 'Bindu' (a dot). It is a nasal sound equivalent to the letter 'N' as in the words *can't*, *mount*, *taint* or *taunt*. The Moon is regarded as the heavenly pitcher of Amrit, the elixir of life and the ambrosial fluid of eternity and bliss. The Bindu is a drop of this Amrit. Hence, in metaphysics the term Chandra Bindu is used to refer to the supreme transcendental Brahm and the spiritual state of realisation of pure conscious 'self' when the aspirant enjoys bliss and experiences a surge of ecstasy. This is a metaphoric way of saying that he tastes Amrit dripping from the Moon.

In the present context it means that Lord Nrisingh is none else but Brahm himself personified.

*There is another interpretation of the *Bhupur Yantra*. If one closely sees the completed Ram Pooja Yantra or the worship instrument/apparatus used to worship Lord Ram and invoke supernatural forces to intervene on behalf of the worshipper and empower him with these divine powers in occult forms of worships, it would be noted that if the same instrument is used by a devotee with the spiritual approach of seeking refuge and shelter with his Lord for his all round well beings, instead of acquiring divine powers himself, then the instrument/apparatus appears to resemble a fort of an emperor. The Bhupur Yantra is the outer periphery or the three-layered walls of the fort. Its gates or entrance points are guarded by legendary snakes or dragons as well as by the Nrisingh God who has a ferocious form of half lion and half man. The protection of the four corners of the fort wall is the responsibility of the Varaaha God who has the form of the wild boar which salvaged the earth. The circular part of the main instrument represents the palace of the emperor who happens to be Lord Ram himself here. The various rings of petals etc. represent the circle of his different layer security ring of his body guards and kings as well as knights who are standing in attendance. This implies that a person who has taken refuge and shelter of the emperor is assured of the protection of all the attendants of the emperor.]

56. The Nrisingh God's Beej Mantra 'Ksharoum/(n)' (क्षरौं) is famed as a magic Talisman against malignant stars and is also used for the conquest of enemies. It is empowered by the combined strength of two most powerful and forceful dynamic elements of creation—the first is the 'fire' represented by the basic alphabet 'Ra' of the second letter 'Raum/Raun(g)', and the second is the supreme source of all powers and dynamism in creation, known as Brahm, that is represented by the Bindu or the 'dot' placed on the top of this second letter 'Raum/Raun(g)'.

In a similar manner, the Varaaha God's Beej Mantra 'Hum/Hun(g)' (ह्रूं) is empowered by the most powerful element of Maya represented by the alphabet 'Ha'. This is because the same alphabet 'Ha' is used in the construction of both the Beej Mantra—for Varaaha ('Hum/Hun(g)'—ह्रूं) as well as Maya ('Hrim/Hrin(g)'—ह्रीं). Then again, like the Beej Mantra for Nrisingh God, this Beej Mantra for Varaaha is also empowered with the authority and dynamism of Brahm in the form of the 'Indu and Naad' placed as the sign of the 'Chandra Bindu' on its top.

Therefore we conclude that both these two Beej Mantras—one of Nrisingh and the other of Varaaha—are equally empowered by the cosmic 'Shakti' or the dynamic powers and energy of creation (56).

57. The Beej Mantra for Varaaha, which is 'Hum/Hun(g)' (ह्रूं), is placed on the four corners of the Bhupur Yantra. [Refer verse no. 55.]

Now, the Beej Mantras of 'Lord Ram's Mala Mantra¹' are being described. [The word 'Mala' refers to a prayer rosary. Hence, these Beej Mantras are uttered as the worshipper turns the beads of the prayer rosary while he worships the Lord through the Bhupur Yantra. The following narration is rather esoteric in nature as it involves the construction of simple Sanskrit words that are used in the Mala Mantra of Lord Ram by using mystical names and esoteric terms for each individual letter of the Mantra. Hence, we shall break it into several parts for the convenience of narration as well as for understanding how it is constructed.]

The *first part* consists of the three words 'OM Namaha/Namo Bhagwate.' It means—

'Salutations to the supreme Brahm (OM)! I most reverentially bow before the Lord'.]

The first letter of the Mala Mantra is ‘Taar’, meaning that which provides spiritual liberation, deliverance, emancipation and salvation. Hence, it is the Beej Mantra for Brahm, which is ‘OM’ (ॐ).

It is followed by ‘namaha’ (नमः). [This is indicative of submission and means that the worshipper is bowing before the Lord with great respect.]

Then the following Beej Mantras are used in sequential form—the Beej Mantra for ‘Nidra’ (i.e. sleep, which is the Sanskrit alphabet ‘Bha’ pronounced as in *abhor*—भ), ‘Smriti’ (i.e. memory, for which the Beej Mantra is the Sanskrit alphabet ‘Ga’ pronounced as in girl, girdle—ग), ‘Meda’ (i.e. flesh, Musk for which the Beej Mantra is the Sanskrit alphabet ‘Va’ pronounced as in avert—व), and ‘Kaamika’ (i.e. name of a Goddess for whom the Beej Mantra is the Sanskrit alphabet ‘Ta’ pronounced as in French ‘T’—त) (57).

[Note—¹Lord Ram’s *Mala Mantra* that is being described here is given, with little variations, in two other Upanishads of the Atharva Veda, viz. Ram Rahasya Upanishad, Canto 2, verse nos. 90-92, and Tripadvibhuta Maha Narayan Upanishad, Canto 7, paragraph no. 57. The full form of the Mala Mantra which has forty-seven letters is given in verse no. 64 of the present Canto 4.]

58. The ‘Kaamika’ is endowed with the qualities of ‘Rudra’ (i.e. is forceful, strong and unrelenting by nature, and if not satisfied, it creates anger and wrathfulness; its Beej Mantra is the Sanskrit vowel ‘Ae’ pronounced as in *may, gay, bake*—ए).

[The Mala Mantra till this point consists of the following words—‘OM Namaha/Namo Bhagwate’.

The fourth word of the Mala Mantra is ‘Raghunandanaaye’—meaning the great son born in the dynasty of king Raghu.’ This forms the *second part* and is constructed as follows—]

After that comes ‘Agni’ (i.e. the fire for which the Beej Mantra is the Sanskrit alphabet ‘Ra’ pronounced as in *run, rum*—र), ‘Medha’ (i.e. the power of belief, faith, recollection for which the Beej Mantra is the Sanskrit alphabet ‘Gha’ pronounced as in *log-hut, Nottingham*—घ) which is adorned with ‘Amar’ (i.e. the virtue of eternity for which the Beej Mantra is the Sanskrit alphabet ‘Oo’ pronounced as in *full, bull*—उ).

Then comes ‘Dirgh Kalaa’ with its ‘Bindu’ symbolizing the ‘Chandra Bindu’ placed on a letter. It is marked by the grand virtue of being ‘Akrur’—the opposite of cruelty. In other words, the entity that is adorned by the Chandra Bindu (the Dirgha Kalaa and its Bindu) is always merciful, compassionate, considerate, gracious and loving. The Dirgha Kalaa is represented by the Beej Mantra ‘Na’ (pronounced as in *none, noun, gone*—न). When the bindu is placed on it, it gathers the prolonged nasal sound of ‘N’ (as in *can’t, gone*).

After it comes ‘Hlaadini’. [It is the sound of the Sanskrit alphabet ‘Da’ as in the words *the, rather, mother* etc.’ with a nasal sound of ‘N’ preceding it. The latter is produced by the ‘dot’ placed on the alphabet just before it, and it helps to link these two alphabets when pronouncing the entire word. Hlaadini also means ‘refreshing, comforting, gladdening, exhilarating, very noisy and loud, the incense tree, and lightening or the thunderbolt of Indra. It is represented by the Beej Mantra ‘Da’—द).

This is followed by the long sound of the Sanskrit alphabet ‘Na’—i.e. ‘Na’ with the long vowel sound of ‘Aa’ added to it as a suffix. This produces the word ‘Naa’ as in the word *neither*, *Nitrogen*, *nice* etc. (58).

59. Finally, the word for ‘Kshudha’ or hunger, which is the Sanskrit alphabet ‘Ya’ (य) as in *young*, *yearn* etc. is added at the end of this phase of the Mala Mantra. [The ‘hunger’ here is not for worldly gains but for one’s spiritual welfare.]

[The word that is now formed till this point is ‘Raghunandanaaye’. When this is added to the previous part of the Mala Mantra, it becomes the following—‘OM Namaha/Namo Bhagwate Raghunandanaaye.’]

The fifth word of the Mala Mantra is ‘Rakshoghna-vishadaaye’—meaning ‘give me your protection against all poisons and evil factors.’ This word (in the form of a phrase) is the *third part* of the full Mantra and it is constructed as follows—]

The next letter is the Beej Mantra for Krodh (anger), which is the Sanskrit alphabet ‘Ra’ (र) pronounced as in the word *run*, *rung*.

The next letter is the Beej Mantra for Amogha (literally meaning infallible, undefeatable, unailing) which is the Sanskrit alphabet ‘Ksha’ (क्ष) and which is a combined sound of two letters ‘Ka’ as in *kerb*, and ‘Chh’ as in *catch*, *ketchup*.

The next letter is the Beej Mantra for Vishwa (world, universe) which is the Sanskrit alphabet ‘O’ (ओ) and pronounced as in the exclamatory word *Oh* or in the word *oracle*, *organ*.

The next letter is the Beej Mantra for Medha (intellect, sense, prudence, understanding, comprehension, wit) which is the Sanskrit alphabet ‘Dha’ (ध) but pronounced silently as in the exclamatory word *breathe*.

The next letter is the Beej Mantra for Dirghaa which is the nasal sound of the letter ‘Na’ (न).

The next letter is the Beej Mantra for Jwaalini (literally meaning that which is burning fiercely) which is one of the various Kalaas (aspects) of Vahini (fire element). This is represented by the Sanskrit alphabet ‘Va’ (व) pronounced as in the word *avert*.

The next letter is the Beej Mantra for Rudra in the lower tone—i.e. the vowel sound ‘E’ (इ) of the Sanskrit language and pronounced as in the word *if*, *nip*.

The next letter is the Beej Mantra for Mritu or death. It is represented by the Sanskrit alphabet ‘Sha’ (श) pronounced as in the word *shawl*. [The word ‘Shaman’ in which this alphabet is used literally means conclusion or elimination or control. From the cosmic perspective it would obviously mean conclusion of this deluding and entrapping world, and from the individual’s point of view it would mean elimination of all worldly delusions and entanglements.] (59).

60. The alphabet ‘Sha’ (as mentioned in verse no. 59) is established or placed respectfully before the next letter of the Mantra. It is the Beej Mantra for Hlaadini with a long vowel sound. It is represented by the Sanskrit alphabet ‘Daa’ (दा) pronounced as in the word *thou*.

And finally, the letter for ‘Twak’ (literally meaning the bark of a tree, skin, rind) which is the Sanskrit alphabet ‘Ya’ (य), as in the word *yearn*, concludes this fifth word of the Mala Mantra.

[This word is 'Raksho-ghna-vishdaaye'. Hence, the Mantra till this point becomes 'OM Namō/Namaha Bhagwate Raghunandanaaye Rakshoghnavishdaaye'.

The sixth word of the Mala Mantra is the following—'Madhur-prasanna-vadanaayaa-mit-tejase'. It means 'The Lord is sweet by nature, has a cheerful countenance, and is happy. He is extremely radiant, majestic and glorious.' The following narration describes the various Beej Mantras used for its construction. This would be the *fourth part* of the full Mantra.]

The next letter is the Beej Mantra for Kshwel (an unspoken sound) which is represented by the Sanskrit alphabet 'Ma' (म) pronounced as in the word *mother*, *run*, *rung*.

The next letter is the Beej Mantra for Priti (to have affection and love) which is represented by the Sanskrit alphabet 'Dha' (ध) pronounced as in the word *breathe*.

The next letter is the Beej Mantra for Amar (to be eternal and free from death; imperishable and infinite) which is represented by the Sanskrit alphabet 'Oo' (उ) pronounced as in the word *bull*, *pull*.

The next letter is the Beej Mantra for Jyoti (illumination and light) which is represented by the Sanskrit alphabet 'Ra' (र) pronounced as in the word *run*, *rung*.

The next letter is the Beej Mantra for Tikshna (sharp, incisive, pointed, potent, effective) along with that of Agni (fire element). These are taken together to form the composite letter 'Pra' as in *prank*, *pram*. [This letter has two parts—Pa (प) + Ra (र) = Pra.]

The next letter is the Beej Mantra for Shwet (white, bright) which is represented by the Sanskrit alphabet 'Sa' (स) pronounced as in the word *sung*. This is followed by the sound of the dot (' ') which is placed on top of a Sanskrit letter to give the nasal sound equivalent to 'um' or 'un(g)' as in *sum* or *sung* (60).

61. The next letter is the Sanskrit alphabet 'Na' (न—pronounced as in the word *none*) which is the fifth alphabet from the one representing 'Kaamika'. [The Beej Mantra for Kaamika is 'Ta' (त) as in French 'T', and hence the fifth letter from it would be Na—न. The 'dot' mentioned in verse no. 60 helps in linking these two alphabets Sa and Na to produce the sound of 'Sanna'—सन्न]

The next letter is the one that follows the alphabet 'La' (ल)—i.e. the letter 'Va' (व) as pronounced as in the word *avert*.

The next Sanskrit alphabet is 'Da' (द) as pronounced in the word *then*. This alphabet comes two steps after the alphabet 'Ta' (त).

The next Sanskrit alphabet is 'Na' (न) as pronounced in the word *none*. It comes after the letter 'Dha' (ध). This letter 'Na' (न) has the vowel sound 'Aa' (आ) added to it. Hence, the resultant letter is 'Naa' pronounced as in word *noun*.

Then comes the letter for the wind element which is 'Ya' (य) with a long vowel sound of 'Aa' (आ) added to it as a suffix. The resultant letter is 'Yaa' (या) as in the word *yard*.

This is followed by Sanskrit alphabet 'Ma' (म) with the short vowel sound of 'E' (इ) added to it as a prefix. The letter 'Ma' stands for Vish or poison. Hence, the letter becomes 'Me' (मि) (61).

62. Then comes the Beej Mantra for 'Kaamika' which is the Sanskrit alphabet 'Ta' (त) pronounced as in French 'T'. This is associated with the Beej Mantra for Rudra (a

form of Shiva) for whom the Beej Mantra is the vowel sound 'Ae' (ए) as pronounced in *may*. The resultant letter is 'Te' (ते) as in word *tame*. [In Sanskrit, the alphabet 'Ta' (त) is pronounced from the tip of the tongue like in the French 'T' as opposed to its English pronunciation which uses the back of the tongue.]

The next letter is the Beej Mantra for 'Sthir' (steady) for which the Sanskrit alphabet is 'Ja' (ज) pronounced as in the word *judge*.

Finally, the letter 'Sa' with the vowel sound of 'Ae' on top concludes this sixth word of the Mala Mantra. This letter is 'Se' (स+ए = से) pronounced as in the word *say*. [61 ½.]

[This forms the sixth word of the Mala Mantra of Lord Ram. This word is—'Madhur-prasanna-vadanaayaa-mit-tejase'.

When this is added to the previous part of the Mantra, we have the following part of the Mala Mantra—'OM Namaha/Namo Bhagwate Raghunandanaaye Rakshoghnavishdaaye Madhur-prasanna-vadanaayaa-mit-tejase.'

Now, the construction of the seventh word 'Valaaye or Balaaye' is being described. This would be the *fifth part* of the full Mantra.]

The next letter is the Beej Mantra for Tapini (the most powerful and dynamic energy of creation) which is represented by the Sanskrit alphabet 'Ba' (ब) pronounced as in the word *bag*.

The next letter is the Sanskrit alphabet 'La' (ल) with the long vowel sound of 'Aa' added to it. Hence, the resultant letter is 'Laa' (ल + ा = ला) pronounced as in the word *lion* (laa + ion).

The last letter stands for 'Anil' (wind or air element), and it is the Beej Mantra 'Ya' (य).

This forms the seventh word 'Balaay' (बलाय).

[The Mantra till this point is the following—'OM Srimom Namo Bhagwate Raghunandanaaye Rakshoghnavishdaaye Madhur-prasanna-vadanaayaa-mit-tejase Balaaye.'

Now, the eighth word 'Raamaaye' is being narrated. The word refers to the deity for whom this Mantra is meant, i.e. 'Lord Ram'. This would be the *sixth part* of the Mantra.]

The next letter is the Beej Mantra for 'Anal' (fire element) which is represented by the Sanskrit alphabet 'Ra' (र) with the long vowel sound of 'Aa' (आ) added to it. This forms the letter 'Raa' as in the word *rather*. [Raa र + आ = रा.] (62).

63. The next letter is the Beej Mantra for 'Lord Narayan' (Lord Vishnu) which is the Sanskrit alphabet 'Ma' (म) standing for Kaal (time; end; conclusion of creation), with the long vowel sound of 'Aa' (आ) added to it. This forms the letter 'Maa' as in the word *Ma* for mother. [म+आ = मा]

The last letter is the Beej Mantra for 'Pran' (life) which is the Sanskrit alphabet 'Ya' (य) as in the word *yearn*. [This completes the eighth word 'Raamaaye'. The

Mantra till this point becomes—‘OM Namaha/Namo Bhagwate Raghunandanaaye Rakshoghnavishdaaye Madhur-prasanna-vadanaayaa-mit-tejase Valaaye Raamaaye.’]

[Now, the ninth word of the Mala Mantra, i.e. ‘Vishnave’ is being constructed as follows. This would be the *seventh part* of the full Mantra.]

The next letter represents the Beej Mantra for ‘Vidya’ (knowledge, skills) that is characterized by possessing the grand virtue that is associated with ‘Ambhas’ (the sky element). [In other words, knowledge is as vast as the sky.] It is represented by the Sanskrit alphabet ‘Va’ (व) with the short vowel sound of ‘E’ (इ) prefixed to it. The resultant letter is ‘Vi’ (व + इ = वि) pronounced as in the word *we*.

This is followed by the Beej Mantra for ‘Peeta’ (yellow) which is the Sanskrit alphabet ‘Sha’ (ष) to which is added the Beej Mantra for Rati which is the Sanskrit alphabet ‘A-Na’ (ण). [Rati is the divine consort of the God of passions and ambitions, known as Kaamdeo; the word also means to remain actively involved in something which in the case of Lord Narayan is to take care of this creation.] Hence, the resultant letter is ‘Shna’—ष्ण pronounced as in the word *Krishna*.

The last letter is ‘Va’ (व) which follows the Sanskrit alphabet ‘La’ (ल). It is adorned with the Beej Mantra for ‘Yoni’ (womb) which is the Sanskrit vowel ‘Ae’ (ए). Hence, the complete letter becomes ‘Ve’ (व + ए = वे) pronounced as in the word *way*, *away*.

[This completes the ninth word of the Mala Mantra, i.e. ‘Vishnave’. Hence, the Mantra till this point becomes—‘OM Namaha/Namo Bhagwate Raghunandanaaye Rakshoghnavishdaaye Madhur-prasanna-vadanaayaa-mit-tejase Valaaye Raamaaye Vishnave.’]

Finally, the word ‘Namaha’ is added to the above Mantra to imply that the worshipper is bowing reverentially to the Supreme Being represented by the word OM. Since this Mantra is dedicated to Lord Ram, this ‘Namaha’ is meant for the latter (63).

[Note—The full Mala Mantra of Lord Ram as constructed in accordance to the guideline provided in verse nos. 57-63 is as follow—‘OM Namaha/Namo Bhagwate Raghunandanaaye Rakshoghnavishdaaye Madhur-prasanna-vadanaayaa-mit-tejase Valaaye Raamaaye Vishnave Namaha.’ (ॐ नमो भगवते रघुनन्दनाय रक्षोघ्नविशदाय मधुर प्रसन्नवदनाय मिततेजसे बलाय रामाय विष्णवे नमः).

Briefly this Mantra means ‘OM salutations (or salutations to the supreme Brahm or Pranav)! I bow reverentially before Lord Ram who is also known as Raghunandan (because he had manifested in the clan of king Raghu of Ayodhya). He is the protector from all troubles and remover of all hurdles. He is of a sweet temperament; is of a cheerful disposition; and is an embodiment of extreme Tej (splendour, radiance, glory and magnificence). He is strong, powerful and valiant. He is Vishnu, the Lord of Sri (Laxmi). It is to Lord Vishnu as Lord Ram, and vice versa, that I bow reverentially.’]

64. The final shape of the forty-seven lettered ‘Mala Mantra’ of Lord Ram (as described in note of verse no. 63 above) pertains to Lord Ram who is crowned as the king of Ayodhya—that is, it relates to the supreme Brahm, the Supreme Being, when he had revealed himself as the noble king of Ayodhya. Since Lord Ram had a physical body and a visible form, this Mantra therefore relates to the ‘Sagun’ or manifested form of the Supreme Being that has a gross body, and which possesses specific attributes, qualities and characteristics as opposed to the cosmic form of the Lord

which is sublime, subtle, invisible, unqualified and without any kind of attributes. In other words, this Mala Mantra honours the Supreme Being known as Brahm in his incarnation as Lord Ram.

However, this Mala Mantra has great spiritual potentials and possesses stupendous mystical powers to liberate the Lord's devotees from the snare created by the three Gunas (or inherent qualities which are an integral part of all living beings)¹ that are closely associated with Maya (the worldly delusions)² which binds the creature to this artificial mundane world and its material sense objects.

[In other words, the forty-seven lettered 'Mala Mantra' of Lord Ram, who is no one else but the supreme Brahm manifested in a human form, has the astounding mystical power of destroying or eliminating the negative and evil effects of the three Gunas that keep the Lord's devotees bound in fetters, under the influence of delusions created by Maya Shakti, to this artificial world of sense objects and its illusionary charms. This helps in ensuring their spiritual liberty and deliverance from these fetters, as well as from the endless cycle of birth and death along with its associated miseries and horrors.]

This forty-seven letter Mantra should be written in the petals of the lotus inside the diagrammatic worship instrument of Lord Ram (which is in the form of a Talisman Yantra or a magical charm apparatus used for ritualistic worship of Lord Ram) as prescribed in verse no. 45 earlier (64).

[Note—¹The three qualities called the *Gunās* of the creature mentioned above are—

(i) *Sata Guna*—the noble, virtuous qualities; (ii) *Raja Guna*—passions and worldly desires; (iii) *Tama Guna*—mean, lowly and base qualities.

(a) The *Sata Guna* is the best of the three qualities present in any creature. It is a positive quality and is marked by a propensity for following the path of nobility, auspiciousness, probity, propriety, virtuousness, holiness and righteousness. Creatures that have a predominance of *Sata Guna* are inclined to do selfless service, be benevolent, merciful, kind and gracious, have coolness of head and a rationale and balanced mind, be contented, have humility and piety etc. Such creatures are devoted to good values in life and have a desire to acquire knowledge that would help them reach higher spiritual goals in life.

This *Sata Guna* is marked by high standards of ethical and moral existence that makes the bearer of such qualities highly respected in society. Such people have a spiritual dimension to their personality. This quality is spiritually uplifting and gives a divine halo to those who possess it and practice it.

The *Vasanas* that have the *Sata Guna* or quality dominant in them are like a veil covering the lamp or like a smoke covering the fire. A slight breeze will remove this smoke. Similarly a little bit of prayer and meditation will remove the *Satwic* desires; its removal requires the least effort.

(b) The second quality is the *Raja Guna* and it makes a man more attracted to this material world and its charms, and less spiritually inclined. The *Raja Guna* is the medium quality marked by a greater percentage of worldly passions, desires and attachments and their natural offshoots in a creature. It makes a creature inclined towards the material things of the gross world and their enjoyments, towards creation of wealth, its enhancement and protection, and generally having a desire for growth, development and expansion etc. It covers such qualities as worldly yearnings, passions, a stormy nature, agitated behaviour, ambitions, selfishness, expansionist tendencies, a desire to acquire, retain and develop such acquisitions even to the detriment of one's long term spiritual welfare and even if such actions cause pain to others. All these pertain to this materialistic world. Such qualities give worldly fame and prosperity. If these qualities are judiciously mixed with the *Satwic* qualities, then they provide the person the better of the two worlds, both in terms of worldly fame as well as spiritual well being.

The Vasanas that have the Rajsic Guna or quality dominant in them can be compared to dust on a mirror. In this case some dusting and rubbing is needed to clean the mirror; a greater effort is needed as compared to the case with Satwic quality.

(c) The third quality is called the *Tama Guna* and is the meanest and the basest of the three Gunas. It is a demeaning quality in a creature that leads to his downfall and perpetual entanglement with things that are considered improper and unethical. It creates an inclination for committing all sorts of sins, misdeeds and demeanours. It leads the creature towards negativity and inspires him to acquire negative qualities such as various vices, evils, sins, perversions etc. It makes him inclined to be greedy, rapacious, haughty, arrogant, lustful, intoxicated, vile and wild to the extreme. Such a creature with a predominance of Tama Guna has utter disregard for propriety, noble virtues and ethics, for righteousness and morality.

In brief, it is the most degrading, denigrating and contemptible of the three characteristics in a person, and leads to such behaviour which is utterly immoral, denigrating and depraved, marked by grossness, crassness and recklessness. It therefore leads to his downfall, ignominy and ruin as well as ignorance, delusions, gloom, inertia, anger, frustration etc.

The Tamsic Guna or quality is like the embryonic membrane that covers the foetus in the womb. They cannot be removed easily and require great diligence, effort, persistence, dedication and careful handling requiring time and patience. It is the basest and the lowliest of the three characteristics, and the worst type to possess.

The Vasanas that have the Tama Guna in dominance are regarded as the 'bad Vasanas' or better still the 'worst type of Vasana' that any individual can have.

The varying quantity and intensity of these three in any given individual would decide his specific character and how he is inclined to deal with the world and a given circumstance. The various permutations and combinations of these three qualities create a particular nature of an individual, giving him his individuality and his special personality which are unique to him; they determine his temperament, behaviour, thought process, et al. Two individuals having the same external form of the gross body might look very much alike but they vary immensely in their nature, habit, temperaments, inclinations, behaviour, thinking, outlook, the way they act and do their deeds, the way they tackle the problems of life, the level of their wisdom and intelligence, their personality and their general way of living.

This is also the reason why it is believed that a creature has to roam in 84 Lakh wombs or forms of life; it is only a metaphor—it does not mean an actual and countable specific number of births that the creatures have to take, but only symbolise the huge possibilities of individual characteristics that are determined by the differing ratios of these three Gunas, and the immense number of individuals that exhibit these characteristics in this creation.

The three Gunas that determine the individual character of the creature, that determine his 'individuality' as compared to the general character of the group to which that individual belongs, are like the isotopes in chemistry. The isotope refers to the phenomenon wherein one of two or more atoms of the same chemical element that contain the same number of protons but different numbers of neutrons in their nuclei and therefore have the same atomic number and chemical properties but different mass numbers and physical properties. For example, two brothers have the same genes and the same inheritance, but the presence of the three Gunas in different ratios between them changes their personality and thought processes. One may be a highly righteous man while the other might be just the opposite. Their parents are the same, their upbringing is the same, they have attended the same school and ate the same food, but there is a deep chasm when it comes to their character as individuals.

Since each individual is like an independent piece of mosaic that completes the entire picture in conjunction with other such pieces, this individual creature's nature and character helps to determine the overall shape of the creation. These Gunas keep

the creation in a state of constant change, because numerous creatures die every moment and new ones are born. The Supreme Being has to be constantly on the alert because of this flux.

The various permutations and combinations of these three qualities create a particular 'nature' of an individual giving him his individuality and his special characters which are unique to him; they determine his temperament, behaviour, thought process et al. Two individuals having the same external form of the gross body—e.g. two men—might look very much alike but they vary immensely in their nature, habit, behaviour, thinking, outlook, action and deeds, wisdom and way of living. This is what is meant when it said that a creature has to roam in 84 Lakh wombs or forms of life; it is only a metaphor—it does not mean an actual, countable specific number that there are actually and physically 84 Lakh types of bodies of living beings; it only symbolically refers to the huge possibilities that are possible with these three 'Gunas' and their different combinations that can imaginably produce a myriad variety of creation that can be created with these three basic qualities and their various sub classes of qualities.

The proportion of the three Gunas decides the nature, natural temperament, tendencies, habits and inclination of the creatures. For example, a person with a greater proportion of 'Satvic' (noble) characteristic will be considered nobler than a man with a greater proportion of 'Rajasic' or 'Tamsic' qualities. So we can say that sages, seers, prophets, scholars and generally enlightened persons have a high degree of 'Satvic' qualities in them; kings and householders who live a noble life are example of those with higher amount of 'Rajasic' quality in them; while sinners, killers, drunks, rowdy elements, cheats etc. are those people with higher 'Tamsic' quality in them. These Gunas have direct bearing on the personality of a man.

The Naradparivrajak Upanishad of the Atharva Veda, in its Canto 3, verse no. 77, says that these three Gunas are the basic Dhatus (elements) in creation.

The Yogshikha Upanishad of Krishna Yajur Veda, Canto 1, verse no. 116 elucidates how these three Gunas are like the three Granthis (knots) of the body as far as the ascetic is concerned.

The Shwetashwatar Upanishad of Krishna Yajur Veda, in its Canto 4, verse no. 10 describes the relationship between Prakriti, Maya and Gunas in a very succinct manner.

How the three Gunas affect the man's character have been very precisely and expressly narrated in Shaarirako-panishad of Krishna Yajur Veda in its verse nos. 7-13.

How the three Gunas were used by Brahm to create this world has been beautifully described in Paingalo-panishad, 1/7 and 2/3. Canto 2, verse no. 3 describes how Sata and Raja were used, while Canto 1, verse no. 7 narrates the use of Tama.

The concept of Gunas affecting the Atma has been elaborately dealt with in various Upanishads, for example the Maitrayanyu Upanishad, 1/11, 2/5, 3/5, etc. of the Sam Veda tradition.

²When *Maya* is associated with the three Gunas, it is called *Trigunmayi Maya*—or the powers of delusions that are calibrated by the influence of the above three Gunas.

Now let us examine this concept of 'Trigunmayi Maya' in brief.

Maya is a word which has two parts, Ma + Ya. The first half means a 'mother; a progenitor; something that creates', while the other half refers to the 'notion of doubt, of either this or that; the notion marked by uncertainty'. The word 'Ma' also means 'to measure, mark off, by any standard; to show, to exhibit, to display; to infer, to conclude; to be formed, built, made of'. Therefore, the composite word Maya refers to a situation which harbours or creates uncertainties, where it is uncertain whether what is said or understood or seen or witnessed or experienced is actually the truth or not. It is virtually the 'mother of all confusions, doubts and perplexities'. It therefore

refers to something or some situation which creates or produces perplexities, doubts and confusions, something that is not real; that which is deluding, illusionary, deceptive, mirage-like and deceitful, and is caused by the ignorance about its truth and reality; something that has no substance or pith; displays no certainty and leads to wrong inference. The term Maya is used to define this entire complex phenomenon at once. Hence, Maya is a synonym used for all that is deceptive, faulty, false, deluding, ignorance-based, illusionary, imposturing, deceitful, invisible and super-natural in the sense that it defies all logic and understanding; all that which has no reality or substance inspite of appearing to be for real; all that is hollow and lacks gravity though appearing to be solid and dense. It creates hallucinations in a creature's mind leading him to believe that what he sees is the truth. It is the deluding and magical powers of the supreme transcendental Lord that hides the reality and creates an imaginary world of deceptions and misconceptions.

Maya is the indescribable and inconceivable cosmic dynamic power that Brahm employs to create delusions.

Maya is the deluding power of the supreme Authority in creation known as Brahm that has been used by him to create the sense of duality. The factual position is that everything is one and the same, and the different views of them is simply an illusion just like one sees a mirage in a desert and thinks it to be real whereas everyone knows that it is a physical phenomenon created due to the effect of excessive heat on desert sand, and it is the deluded mind that thinks it to be real though it is well aware that such things do happen in a desert and it is wise advice not to follow this illusion. Likewise, when Brahm decided to initiate the process of creation, he had to create a smokescreen of delusions to enable him to hide the truth, because otherwise everyone would renounce this world of artificiality and become recluses, and the result would be everyone becoming a monk, renouncing the world and the resultant termination of the cycle of birth and death! So under the influence of Maya or delusions, the living creature thinks that it, the Jiva, and Ishwar, the Lord, are two separate entities. The Jiva offers prayers to the Ishwar and looks upon him for his benevolent mercy and intercession in order to survive and prosper in this competitive world; the Ishwar looks upon the Jiva to offer him oblations and worship that would sustain and nourish the former as well as keep him in an exalted and honourable position. There exists a mutual symbiotic relationship between the two. The Jiva lives on the earth, while the Ishwar lives in the heaven. The Jiva watches the exalted stature, glory, fame and powers that the Ishwar possesses, and so the Jiva tries to acquire that stature for himself. Therefore the Jiva does good and auspicious deeds to go up to heaven, but the deeds themselves pull the Jiva down because of their inherent and inbuilt nature to tie down anyone who gets involved in them. So the creature continues to oscillate like a pendulum between being a mortal being living on earth and the immortal being living in the heaven.

This is the theory of 'duality'. Both are covered in an invisible veil of ignorance-based delusion. From the metaphysical point of view, Ishwar is the sum total of all the causal bodies that exist in creation, while the Jiva is represented by the individual causal body which harbours the pure conscious Atma or soul. This factor of the 'pure conscious Atma or soul' is common to both the Ishwar and Jiva, and hence to treat them differently is a stupid proposition caused by deluding effects of the mind. This is called being sheathed by a veil of Maya, or being under the influence of ignorance that prevents one from realizing the truth and reality.

Maya has three basic constituent qualities. Hence it is called Trigunmayi (त्रिगुणमयि), i.e. one which has the three Gunas or qualities. These three Gunas or qualities are—Sata, Raja and Tama. 'Sata' is the most auspicious, virtuous and noblest quality in a man and raises him to a high moral and spiritual pedestal. It marks predominance of righteousness and the highest standards of spirituals and mental evolvement leading to high thoughts, noble actions and righteous behaviour. 'Raja' is the medium quality in a person, and it is marked by worldly passions, desires, yearnings and greed. It

makes a man more worldly than spiritual. 'Tama' is the third and most lowly of the three qualities and is used has a synonym for darkness and evil. Obviously, 'Tama' means ignorance, delusions and all the forces or qualities that are evil, mean, lowly, miserly, wicked and base. They pull down a man from high pedestal and virtually dump him in the dust yard of creation to rust and decay.

These three qualities together, in various permutations and combinations, decide the innate nature of a man. The greater presence of 'Sata' makes a man nobler as compared to a high ratio of 'Tama' which makes him wicked, pervert and evil. Various proportions of these qualities will therefore produce innumerable varieties of creatures having different temperaments, thought processes, behaviours, demeanors and mental setup in this world.

When a man understands any 'Truth' after rigorously examining the 'truthfulness' of that truth, when he has established the veracity of facts, he believes in it more firmly and more convincingly. No matter what other people tell him about the truth being not the correct or the whole truth, he would not listen to them, simply because he has verified the facts for himself, he has witnessed the truth himself, he has logically eliminated all falsehoods to deduce that what he knows is the 'truthful Truth'. His Truth is based on rigid and solid foundation; he is unwavering and steady in it. If he is steadfast and convinced in his knowledge, no matter how much ignorance and delusions (Maya) try to push him away from the absolute 'Truth', he will remain steadfast and unwavering in it. There will be no doubts and confusions in his mind.

The basic idea here is that Maya is like a transparent coloured sheet which covers the supreme 'truth' in the creation. Since it is transparent, it assumes the attributes of the 'truth' that it covers, because for all practical purposes an ordinary man is unable to see that veil because of its transparency. But at the same time, being tinged by different Gunas, the view of the 'truth' as seen through the veil of Maya gets tainted or distorted consonantly. This is a simple way of understanding what is called 'illusion and Maya vis-à-vis the Truth and Reality'. Maya nevertheless hides the truthfulness of the Truth, and instead lends its own attributes and characteristics to that Truth known as the 'Nirgun Brahm' by the Upanishads when the latter is observed through this veil, while at the same time assuming the glorious attributes of Brahm itself. So ignorant fools think that the Maya is the real thing, whereas they are actually seeing the 'veiled truth' as observed through this covering of Maya, because the actual 'truth' is hidden from view by this transparent sheet which has lend it its own colour and hue to it. As a result, that Nirgun appears to have some attributes, and it thereby becomes 'Sagun', or the one with attributes and characteristics, by the interference of Maya.

The 'Trigunamayi Maya' is further classified into three sub-classes—viz. Sata Guni Maya, Raja Guni Maya, and Tama Guni Maya. This nomenclature depends upon the dominance of one or the other of the three Gunas in any given situation. Thus, when the Maya is dominated by the Sata Guna, it is called 'Sata Guni Maya'; when it is dominated by the Raja Guna, it is called 'Raja Guni Maya'; and when it is dominated by the Tama Guna, it is called 'Tama Guni Maya'.

The *Pashupata Brahm Upanishad* of the Atharva Veda tradition, Canto 1, verse no. 10, describes these three types of Mayas. The *Pashupata Brahm Upanishad* of the Atharva Veda tradition, Canto 2, verse nos. 33, 44-45 describe how Maya creates this world.

How the conquering and subsequent elimination of Maya helps the creature to conquer and sub-sequentially eliminate the world and its delusions has been described in *Mantriko-panishad* of Shukla Yajur Veda tradition, verse nos. 4-8.

The *Nrisingh Purvatapini Upanishad* of the Atharva Veda tradition, in its Canto 3, verse no. 2-3 describes Maya and says that it is the creator, the sustainer and the concluder of creation.

The *Rudra Hridaya Upanishad* of Krishna Yajur Veda, verse no. 49 describes why it is important to overcome Maya.

The *Saraswati Rahasya Upanishad* of the Krishna Yajur Veda, in its verse nos. 47-49, 52-54, 56-57 describe what Maya actually is, how it creates this world and hides the ‘truth’ known as consciousness, and goes on to describe the two important types of Shaktis or dynamic powers of Maya—one called the ‘Vikshep Shakti’ and the other called the ‘Aavaran Shakti’.

Maya has three other names as well—viz. (a) Maha Maya—or the great powers exhibited by Brahm at the cosmic level. This Maya is the progenitor of all other types of Mayas which keep the individual creature trapped in their net. The Maha Maya is the virtual mistress of all the delusions and misconceptions and their attendant ignorance that keep all the creatures of this creation enthralled by their deceptive charm. (b) Yog Maya—this is the stupendous magical powers created by the union of the supreme authority of creation known as Brahm, and the mystical and esoteric powers that delusions and hallucinations can create for the creature. (c) Maya Shakti—this is the ‘shakti’ or power and authority displayed by Maya in association with Brahm from whom it acquires its stupendous energy and powers.

The *Sarwasaaro-panishad*, verse no. 15 of Krishna Yajur Veda tradition, and the *Mantriko-panishad* of the Shukla Yajur Veda tradition, verse no. 3-8, describes Maya in substantial detail.

Why Maya created this world and its effect on it has been beautifully described in *Paingalo-panishad* of Shukla Yajur Veda tradition, in its Canto 1, verse no. 12.

The stupendous powers of Maya have been called its ‘Shakti’. This concept has been described in *Yogshikha Upanishad* of Krishna Yajur Veda, Canto 6, verse no. 48. This Maya is so powerful that it misleads even the Gods as stated in *Panch Brahm Upanishad* of Krishna Yajur Veda tradition, in its verse no. 24.

The *Kathrudra Upanishad* of Krishna Yajur Veda tradition, verse no. 43 describes how Maya was created by the Supreme Being and how it is kept under tight leash by him.

Sage Veda Vyas’ *Adhyatma Ramayan*, in its Lanka Kanda, canto 14, verse no.28-29 describes the relationship between Maya and Brahm, albeit in the context of Lord Ram.

The mysterious net of delusions that keeps the creature trapped in its snare is called Maya Jaal. The word ‘Maya’ briefly means delusions and ignorance, and ‘Jaal’ means a net, a web, a snare, a trap, a magical spell’.

The *Tejobindu Upanishad* of Krishna Yajur Veda, in its Canto 5, verse no. 33 describes this Maya Jaal.

The *Tripadvibhut Maha-Naryan Upanishad* of the Atharva Veda, Canto 3, paragraph no. 16 cites a very fine illustration to explain how ‘Maha Maya’ or the Great Delusion affects Brahm.

The fact that Maya is under the overall control of Ishwar, the Lord of creation, inspite of being all-powerful has been emphasized in the *Tripadvibhut Maha Narayan Upanishad*, Canto 4, paragraph no. 10.]

65. [Verse nos. 65-67 describe the greatness and effectiveness of the worship instrument of Lord Ram.]

This Lord Ram’s Talisman Yantra or a magical charm instrument/apparatus is worthy of worship by all as it is a representative of all the senior and chief Gods, because all of them are represented by their respective Beej Mantras in this Yantra. [These Beej Mantras are the ‘seed or root letters’ that are like a unique formula specific to each God. By worshipping this single instrument, all the Gods are deemed to be worshipped, along with the chief deity, Lord Ram.]

It has been preached and prescribed by ancient erudite sages and seers, and worshipped (used) by other great sages and seers who followed their example.

It bestows emancipation and salvation, a long life, and a healthy and disease free body to the spiritual seeker/aspirant (65).

66. Not only this, this Mantra also bestows sons to those who don't have one (and wish to have a son). What more can be said about this Mantra than the fact that by using it a man can attain/accomplish everything very soon. By taking its refuge (i.e. using it as a means to achieve one's aims), a seeker/aspirant can acquire glories and fame that accompany successful accomplishment of Dharma (acquire the great virtues of goodness, noble thoughts, virtuousness, auspiciousness and righteousness), Gyan (the virtues of wisdom, enlightenment, erudition and truthful knowledge about the reality), Vairagya (the virtues of renunciation, detachment and dispassion) and Aishwarya (the virtues of fame, glory, renown, majesty, powers, honour and respect) in this world (66).

67. This Talisman Yantra (or the magical instrument) used for worship of Lord Ram, along with its various esoteric Beej Mantras and the mystical methods employed for its use, are a closely guarded secret (i.e. it is not accessible to a layman or an uninitiated person). Without proper guidance, even the most erudite and intelligent person cannot understand or use it.

Worldly people (i.e. those who are engrossed in pursuing this materialistic world and remain entangled in it) are not worthy (entitled) to be instructed on its construction, use and potential powers. [This is because they won't believe in its potentials and mystical powers, and become skeptical instead. They would deride and ridicule it as part of some occult practice associated with a black-magic ritual which is devoid of sense. Besides it, these instruments are as dangerous as they are beneficial even as any student of science knows that wrong chemicals mixed in a chemistry lab might prove to be most hazardous, if not fatal. So, any misstep or other error committed even inadvertently might result in potential backfiring of the powers and effects of the Talisman instrument, causing more harm than good to the worshipper. That is why it is described as a secret knowledge that is inaccessible to all and sundry, and should not be used without proper guidance. This instrument is like a highly developed and complex scientific instrument or a technical gadget that should not be fooled around with. Its operation and mechanics should be learnt under expert guidance, and then it should be properly used. If due diligence is not exercised in its use and operation, and if the operator is not fully aware of its intricate design and well-versed in emergency trouble-shooting, then the same instrument or gadget would either be useless or cause havoc for the user.] (66).

[Note—(a) There is an Upanishad called 'Akshamaliko-panishad' belonging to the Rig Veda tradition that elucidates in great detail about the symbolism of the various alphabets and syllables as well as their consecration in the beads used as a prayer rosary. A reading of this Upanishad would show that each letter of the alphabet has a specific power, and when all of them are established in the beads of the prayer rosary, the latter acquires stunning powers and potentials of super-natural dimensions. This Upanishad is included in this author's anthology of Rig Veda Upanishads.]

Thus ends Canto 4 of Ram Purva Tapini Upanishad.

-----*****-----

Section 1—Ram Purva Tapini Upanishad

Canto 5

[The details of Lord Ram's worship using the 'Yantra' is being described in this Canto.]

1. The worshipper should first worship the honourable deities at the gate¹ of the place where the worship instrument is kept for formal worship. In practice it means that the deities are offered worship at the symbolic gates marked on the four sides (north, east, south and west) of the Bhupur Yantra. [For the Bhupur, please refer Canto 4, verse nos. 52-56.]

Then the worshipper should sit comfortably with a cheerful mind in the 'Padmaasan' posture². [This is the Lotus posture of sitting while doing rituals or meditation.]

To begin with, 'Bhut Shuddhi' is to be done—literally meaning 'cleaning of the elements'³. This implies that the five basic elements called 'Bhuts' (i.e. earth, water, fire, wind and space), which together constitute the body of the worshipper, should be symbolically purified so that it (the body) becomes fit and ready to worship the Lord. In terms of metaphysics, it implies the merger of all the five elements of Nature with the supreme Brahm from where they had emerged so as to establish oneness between the individual creature (i.e. the worshipper) and the Supreme Being who is being worshipped. [After all, the main object of worship of the Lord is to obtain Mukti, or spiritual liberation and deliverance of the worshipper, and this objective is made possible only when the five independent elements are thoroughly cleansed of their worldly taints and other negativities that act as spiritual drags and unnecessary encumbrances for them.]

Then the 'Ram Yantra' (worship instrument) should be consecrated and infused with divine mystical powers so as to activate all the dynamism inherent in the various Beej Mantras of various Gods representing the different forces of creation which are used to construct the Yantra. Thus, the worship instrument is energized and empowered with dynamic mystical powers when it is properly consecrated and activated. This process is known as 'Pran Pratistha'⁴—literally meaning 'establishing of life and injecting of vitality, vigour, strength and mystical powers in the instrument'.

This is done along with the ritual called 'Maatrikaa Nyas'⁵.

It should be carefully noted that the concerned Gods should be worshipped in all the four sides of the seat or dais where the 'Ram Yantra' (instrument) is being worshipped—i.e. in the front, behind, the sides etc.

The eight-petal Lotus that is marked in the central part of the Yantra is also worshipped simultaneously. [The eight petal Lotus is described in Canto 4, verse no. 44-46.] (1).

[Note—¹The *Dwar Pooja* is to be done when a worshipper embarks upon the formal form of worship of the Pooja Yantra or worship instrument that is placed on the altar in the center of the pavilion constructed for such worship rituals. It also indicates the offering of worship to the deities who are invoked for the purpose of affording their protection to the ritual and ensuring its completion without any hindrance. This process of Gate-Worship called the 'Dwar-Pooja' is as follows—the seeker/aspirant/worshipper should finish his ritualistic purification bath, wear clean clothes and garlands, and then he should silently and with due devotion enter the pavilion for worship of 'Ram Yantra' through the gate. There he should sip some water and keep offerings ready for worship. Then the Mantra-sanctified water should be symbolically poured (i.e. a few spoons should be sprinkled) on the gates. The

horizontal lintel at the top of the gate should be made up of the 'wild fig tree' called Gular (*ficus glomerata*).

The Mantras that are to be used to invoke the blessings of these four divine entities are also mentioned in verse no. 3. This verse says that the name of these four deities are used in the fourth case of the Sanskrit grammar, and to it is then prefixed by their unique Beej Mantra and suffixed by the word 'Namaha' to signify that the worshipper is respectfully bowing before the concerned deity as a mark of great respect. To make the Mantra complete, give it proper sanctity and infuse divine powers in it, the Beej Mantra for Brahm, which is OM, is prefixed to the Mantra. It is to be noted that the Beej Mantra of any God is made by using the first alphabet of the concerned God's name, and adding a 'dot' on its top. This 'dot' in the Sanskrit language is equivalent to the sound 'm' as in mum, or sometimes also pronounced as 'n' followed by a silent 'g' as in rung.

The Beej Mantra thus formed of these four deities are the following—for Vighesh it is 'Vim/Vin(g)', for Durga it is 'Dum/Dun(g)', for Vaani (representing Goddess Saraswati) it is 'Vaam/Vaan(g)', and for Kehatrapaal it is 'Ksham/Kshan(g)'. When the Beej Mantra 'OM' standing for Brahm is added as a prefix to these unique Beej Mantras of these four deities, and then to it is added their names, followed by the word for submission and bowing, which is Namaha, we have the following four Mantras—

(i) For Lord Vignesh it is 'OM Vim/ng Vighanaaya Namaha' (ॐ विं विघ्नाय नमः) which means 'Salutations to the supreme Brahm (or OM Salutations)! I bow most reverentially before Lord Vignesh and seek his blessings.'

(ii) For Kshetrapaal it is 'OM Kshem/ng Kshetrapaalaaya Namaha' (ॐ क्षं क्षेत्रपालाय नमः) which means 'Salutations to the supreme Brahm (or OM Salutations)! I bow most reverentially before the Kshetrapaal and seek his blessings.'

(iii) For Goddess Durga it is 'OM Dum/ng Durgaaya Namaha' (ॐ दुं दुर्गाय नमः) which means 'Salutations to the supreme Brahm (or OM Salutations)! I bow most reverentially before Goddess Durga and seek her blessings.'

And (iv) for Vaani it is 'OM Vaam/ng Vaanyea Namaha' (ॐ वां वाण्यै नमः) which means 'Salutations to the supreme Brahm (or OM Salutations)! I bow most reverentially before Vaani (as a personification or revelation of Goddess Saraswati), and seek its blessings.'

These four Mantras are used to worship and invoke the blessings of their respective deities in the following manner—Lord Vignesh (Ganesh) is worshipped on the right side of the gate and the Kshetrapaals on the left of the gate. On the top of the gate, i.e. in the lintel, Goddesses Durga and Saraswati are worshipped with their respective Mantras.

The holy river Ganges should be worshipped next to Lord Vighna in the right side of the gate, while the river Yamuna should be worshipped next to the Kshetrapaal in the east side of the gate with flowers and water offerings.

Then on the steps of the gate or on the threshold, the weapons should be worshipped with the Mantra 'Astraaye Phat' (अस्त्राय फट्). [Astra = weapon; Phat = one that pierces, ruptures, tears apart.]

The process should be repeated on all the four gates/doorways of the pavilion.

It ought to be noted carefully here that these 'gates' provide access to the altar where the worship Yantra is placed.

²The posture for sitting in the *Padmasan* (literally, like a lotus; the word Padma means a lotus) is described in the Trishikhi Brahmin Upanishad of Shukla Yajur Veda tradition, in its Canto 2, verse no. 39. To sit cross-legged so that the upper part of the feet (i.e. the opposite side of the sole) along with the toes of one leg is placed on the thigh of the opposite leg (i.e. left toes on the right thigh, and right toes on the left thigh), is called Padmasan. [The soles would be pointing outwards while resting on the thighs and the body would be held erect—i.e. the spine, neck and head would be

in a straight line. The hands, with palms facing upwards and resting one on the top of the other, are placed on the folded legs in front of and below the navel. The chin is drawn in and held tightly near the base of the Adam's apple at the pit of the throat. This sitting posture is said to dispel/ameliorate all diseases and counter or antidote all poisons. That is, this sitting posture is very beneficial for the body]

According to the Yog Kundalini Upanishad of Krishna Yajur Veda, in its Canto 1, verse no. 5, the Padmasan is basically to sit in an erect position, cross-legged, so that the sole of one foot rests, facing upwards, on the thigh of the opposite leg. This posture of meditation helps one to overcome all sins and their evil affects.

³The *Bhut Suddhi* is the formal purification of the five Bhuts (the fundamental elements in creation). It essentially consists of imagining that the body consists of the five basic elements, viz. earth, water, fire/energy, air/wind, and space/sky, and then first merging them all, one by one, into one single entity, and finally into super consciousness which is synonymous with the supreme transcendental Brahm. This process purifies the body as it does away with its grossness and transforms it into an entity that assumes subtlety associated with the pure consciousness.

The process is as follows—(a) Imagine that the body from the toe to the knees consist of the 'earth element', is square in shape, has the mark of the Vajra (goad), and is yellow in colour. It is marked by the seed/root syllable or Beej Mantra 'lum/n(g)' (लृं). (b) The part of the body from the knees to the navel consist of the 'water' element, is shaped like a crescent moon, has the mark of the lotus, and is white coloured. It is marked by the seed/root syllable or Beej Mantra 'wum/n(g)' (वृं). (c) The part of the body from the navel till the throat (Adam's apple) consists of the 'fire' element which is triangular in shape, has the sign of 'Swastika' (ॐ), and is red coloured. It is marked by the seed/root syllable or Beej Mantra 'rum/n(g)' (रृं). (e) The part of the body from the throat till the root of the nose and the middle of the eyebrows consists of the 'wind' element, is hexagonal in shape, dark in colour, and has 6 dots outlining the six points of the hexagon. It is marked by the seed/root syllable or Beej Mantra 'yum/n(g)' (यृं). (f) The part of the body from the root of the nose to the centre of the skull is the 'space/sky' element, is circular in shape, its colour is grey like smoke/fog, and it is marked by a flag/standard. The seed/root syllable or Beej Mantra 'hum/n(g)' (हृं) is marked in it.

All these five elements should be merged with one another in a sequential form, beginning from the earth at the bottom of the body and going right up to the cranium where the sky element is located. In other words, the earth is made to submerge its self into the water element, the water into the fire element, the fire into the wind element, the wind into the sky or space element, and finally the sky/space element is freed from its confinement inside the skull to assume its original form as the vast, infinite, measureless and endless cosmos called the Prakriti or Nature in its macrocosmic dimensions. This Nature is without any specific attributes and is all-pervading and all-encompassing.

This Prakriti is also known as Maya which is the delusion-creating powers of Brahm, the supreme Consciousness. So, in the final step of purification, it is obligatory to remove this Maya altogether as it is the primary cause of the erroneous notion that the pure consciousness that is the true 'self of all living beings is the gross body consisting of elements of varying degrees of grossness, and that this body lives in a world which also consists of elements in varying degrees of grossness. Therefore, truthful cleansing would be a thorough rinsing of the inner-self so that all forms of delusions and misconception are removed.

When both the Maya (delusions and their attendant misconceptions and hallucinations) and the Prakriti (a person's natural habits, inclinations and temperaments) are eliminated, the worshipper is freed from all of their tainting affects. This results in his ability to relate himself with his truthful and immaculate form as the 'pure consciousness' rather than the gross body as well as the gross world

consisting of the five elements in their varying degrees of grossness. In other words, the 'self' of the individual merges with the 'cosmic Self' or the cosmic Consciousness of creation known as Brahm. This is complete cleansing of the worshipper as it is only possible when all Maya and its negative affects are done away with. Mere physical washing of the gross body by taking ritualistic baths in rivers that are visibly polluted or by any other means can never truly clean the soul sufficiently enough so that it is prepared to receive the guest-of-honour in the form of Brahm, the Supreme Being!

In this way, the seeker/aspirant/worshipper should meditate for some time and imagine that he has merged himself, i.e. his Atma or soul, with the supreme Soul called the Parmatma so as to become inseparable from the latter. This Parmatma is not one but the cosmic Consciousness known as the supreme Brahm.

Then, after recovering from deep concentration and meditative trance, he should imagine that his body is being recreated from that supreme Brahm by following the reverse sequence of events. This newly created body will have been purged in a symbolic way of all the sins and faults which were present in the worshipper's earlier body. Theoretically, it is like taking a new birth with a detoxified and purified body. The worshipper becomes a different person from his earlier self, and he then becomes eligible to worship Lord Ram using the divine Ram Yantra. The reverse sequence of events is as follows—the supreme soul—the world/Maya—space/sky—wind/fire—water—earth. Hence, the body has been purged and catheterized of all earlier impurities, and has now become worthy to worship the Lord who is immaculate, holy and divine.

The all-pervading, omniscient, omnipotent, attribute-less, almighty, all-encompassing and auspicious supreme Soul is present as the seeker's or worshipper's Atma in his own body. This process is deemed to be the best way for the symbolic purification of body that is needed to offer worship to the Supreme Being who cannot be approached with a polluted and dirty self.

The importance to thoroughly cleanse oneself before approaching the Lord is simple to understand even in the modern context—can anyone ever imagine that he would present himself in the royal court of a king, or in the front of the president of a sovereign country while he is dirty, stinking, shabbily dressed and in a general unkempt condition?

Another way of doing Bhut Shuddhi is as follows—The worshipper meditates upon his subtle heart as being in the form of a blooming lotus flower which has attained its maturity by being nourished and aided by the ethereal Mantra 'OM' representing Pranav or the supreme Brahm, the cosmic Consciousness.

Dharma (the virtues of righteousness, probity, propriety and nobility) is its metaphoric root, and Gyan (truthful knowledge, wisdom, erudition, sagacity and enlightenment) is its stem. Vairagya (the grand virtue of renunciation and dispassion towards this material world and its charms) is its symbolic thallus.

The eight petals of this divine Lotus are represented by the eight Siddhis or mystical achievements that bestow the worshipper with supernatural powers. [These eight Siddhis are Anima, Garima, Praapti, Laghima, Mahima, Parakramaya, Ishwatya and Vashitwa. Refer note of verse no. 8 of Canto 4.]

The Atma or soul (the pure consciousness) dwells in the center of this divine Lotus. This Atma is self-illuminated and incandescent. It effuses a glorious light like the filament of the lighted lamp. Meditating and contemplating upon the Atma in the aforesaid manner, the spiritual aspirant should pull up the Pran, the vital winds and the life consciousness, from the lower ends of the body, up through the Sushmuna Naadi (the central nerve passing through the spinal cord) and upto the point of the Brahm randhra, which is a hair-like slit on the skull (cranium). At this point of time, the worshipper experiences supreme ecstasy and bliss that are the hallmark of Brahm. He feels oneness with the supreme Consciousness. He then realises the truth of the statement 'So-a-ham'—'that essence is I/me'.

This is the method of Yoga whereby a union between the individual and the cosmic Consciousness is established by eliminating the grossness of the various Bhuts that come in the way of this union. It is, in other words, cleansing of the soul from the tainting effects of the various Bhuts.

The worshipper visualizes that all the accumulated sins and misdeeds of all his previous lives have assumed the form of a Purush or a man with a gross body. Killing of a Brahmin is the head of this imaginary man, stealing of gold or anything else are his two arms, drinking wine and getting intoxicated is his heart, having extra-marital affairs, especially with his teacher's wife, is this man's hips and genitals, association with all sorts of sins and misdemeanors are his two legs, and all the rest of the sins and misdeeds, small and big, are like the hairs on the body of this man who is sin personified. This imaginary man has red coloured eyes, beard and hair. The complexion of his body is dark or black. He holds a sword and a shield in his hands.

The worshipper should imagine that such a fearful man who is an image of horrendous sins is present inside his own body in the right side of his abdomen. By employing various techniques of Yoga, such as doing Pranayam (breath control exercises) complete with its three phases of Kumbhak, Rechak and Purak aided by meditating upon the Beej Mantras of the wind element (which is 'Yam/Yang'), he should imagine that this sinful image of the man is being dehydrated with the internal heat generated by Yoga, and gradually becomes emaciated, dried and withered.

Then this dried-up body of the sinful man should be burnt and reduced to ashes by meditating upon the fire element and symbolically igniting it by using its Beej Mantra—which is 'Raam or Rung'.

Then the aspirant must imagine that the ash formed from the burnt-out body of the erst-while sinful man who was present inside him has been ejected out of his present body through the navel.

Then the aspirant should wash himself with clean water to clean the present body after the earlier corrupt body has been symbolically cremated and got rid of in the manner described above. This bathing is symbolically done by invoking and meditating upon the Beej Mantra 'Vam/Vang' for the water element.

In other words, after having performed the last rites of his ancestral body which was a personification of all his past sins, the spiritual aspirant takes a dip in the water to clean himself. This dipping is done not physically but in a symbolic manner by meditating upon the Beej Mantra of the water element.

When this symbolic bathing by taking a dip in the holy river or any other water body is complete, he steps back on the dry ground. In other words, he re-emerges in this world with a purified and sanctified body which is rid of all his past sins. This cleansed body is now ready to worship the Supreme Lord. From the metaphysical perspective, the cleaned worshipper is like a Hans—the Swan who lives in a lake or a pond which may be dirty but which does not affect the Swan which remains eternally clean so much so that it can pick up clean water from the polluted water in which it might be forced to live due to circumstances beyond its control. The Swan is also believed to be so wise and choosy that it can pick up pearls in an assortment of gems, and drink pure milk leaving behind adulterants added to it.

⁴The process of *Pran Pratistha* (consecration) means assigning the 'Ram Yantra' with divine mystical powers and infusing it with life, energy, vigour, vitality, strength, dynamism and potentials of an astounding proportions. Once accomplished successfully, the Yantra does not remain merely a diagram or geometrical matrix but assumes mysterious powers that help the worshipper to accomplish stupendous feats that would be normally impossible. It is like the numerous instruments or apparatuses in modern science, medicine and engineering that has helped man to perform astounding tasks and achieve magical feats that would be impossible to accomplish without the help of these aids.

The 'Pran Pratistha' involves an elaborate ritual using complicated religious process using various Mantras etc. The worshipper should place his hands on the

Ram Yantra or the idol of the Lord and pronounce specified Mantras for the purpose while imagining that the Yantra or the idol is being infused or injected with dynamism, energy and vitality, and thereby becoming alive and activated. It is similar to the case of switching on the electric current to make the electrical gadget activated and perform astounding tasks. Elaborate machines and computers would fail to deliver if not properly circuited and powered by the electric current. Even a minor fault would bring it to a grinding halt. The case with the Yantra is exactly the same—even a slight deviation from the prescribed method would render it useless, and it is this carelessness that has made them useless in modern times. Since their effectiveness depends on a host of spiritual requirements along with diligent and careful invocation of complicated Mantras which a man is not able to comply with today, he ridicules these Yantras as being a part of black-magic or sorcery rituals.

⁵The word ‘Maatrikaa’ literally means ‘the little mothers’, and they represent the cosmic Shakti or the dynamic but subtle powers of the deity to which a given Mantra pertains. This Shakti of the deity is present in its Beej Mantra. It is like the case of each element of the Periodic Table having its unique atomic number, and each atom having a particular number of electrons. The word ‘Nyas’ means ‘to establish, to place, to empower, to repose, to entrust’.

Hence, *Maatrika Nyas* is to empower the Bhupur Yantra as well as the worshipper’s own body with divine Shakti that is inherent in the various Beej Mantras of various Gods and Goddesses that are used in the construction of the worship instrument.

The Maatrika Nyas is to establish the mystical powers and dynamic energy of the various Gods and Goddesses by invoking their Shakti that is inherent in the Beej Mantras dedicated to them.

Since the cosmic energy and dynamism of the supreme Brahm is said to be revealed in the form of ‘Shakti’ conceptualized in a female form, the phrase ‘Maatrikaa Nyas’ therefore refers to the posting of the stupendous powers and dynamic energy of the supreme Brahm on the Bhupur Yantra so as to activate it and make it energized and empowered with the same Shakti, the same dynamism, energy, vitality, strength and powers of the supreme Brahm, that are delegated to the various Gods by the Supreme Being.]

2. Having completed the worship of the deities present at the Gate, the worshipper should now enter the pavilion and worship the chief priest or his Guru (moral preceptor) with the firm belief that the latter represents the chief deity to whom the worship is to be offered. [This chief deity in the present case is Lord Ram.]

The chief priest or Guru is seated in the front of and below the raised platform or the altar where the worship Yantra for Lord Ram is placed. The worshipper should keep his attention focused on Lord Ram while he worships the priest or Guru. He should imagine that the Lord is sitting on an elegant gem-studded high throne which has a soft silken seat.

Then he should visualize that the throne of Lord Ram is supported from the bottom by the following four divine powers to whom the worshipper offers his oblations and worship—viz. (i) Shakti (the personified form of the cosmic energy and dynamism of the Supreme Being that is responsible for sustenance of this world), (ii) Kurma (the legendary Tortoise which held the Mandrachal Mountain and the earth on its back to prevent them from sinking into the nether world during the legendary churning of the ocean by the Gods and the Demons), (iii) Naag (the legendary serpent called the Seshnath who is said to hold the earth on its hood), and (iv) Prithivi (earth) itself personified as a divine Goddess holding a blue Lotus (2).

[Note—¹The *Shakti* is to be worshipped in the form of a Goddess. She holds two lotus flowers in her two hands.

Lord *Kurma* is present on the shoulder or head of this Shakti. He is of a blue complexion.

Lord *Seshnath* is present on the back of Kurma (Tortoise) which is like a celestial rock. His body is like a white Lily flower.

Seshnath holds the Mother *Earth* on his hood. She is in the form of a Goddess whose complexion is dark like catechu tree (*Xanthocymus epictorius*). She holds a blue lotus flower in her hands, and the surging blue ocean with its pulsating waves is like the beautiful waist-band around her hips.

In the center of this Earth is a gem-encrusted island upon which there is a jewel-studded throne.

This is how the throne of Lord Ram is supported from below.

There is another version of how the throne of the Lord is held aloft by these four divine entities. Each of the four legs or pedestals of the throne is held from below by one of these four entities. Therefore they are placed on the four corners—the north-east, the south-east, the south-west and the north-west corners of the dais where the Lord is established.

The Mantras that are used for worship are the following—

(i) Mantra for the Goddess Shakti, which supports the creation and acts as the fundamental energy and strength which lends vitality and validity to it, is—‘Aadhaar Shakti Namaha’ (आधार शक्ति नमः). It means ‘I bow reverentially to Goddess Shakti who is the base that forms the foundation that holds aloft everything in this creation.’

(ii) Mantra for the legendary tortoise called Kurma, which is a manifestation of Lord Vishnu to support the earth as well as the Mountain called Mandrachal which began to sink into the nether world at the time of the churning of the ocean, is—‘Kurmaaye Namaha’ (कूर्माय नमः). It means ‘I bow reverentially to Lord Kurma.’

(iii) Mantra for the legendary serpent called Sheshnath, who supports the earth on its hoods and upon whose coiled body Lord Vishnu rests in the celestial ocean of milk called the Kshir Sagar, is—‘Sheshaaye Namaha’ (शेषाय नमः). It means ‘I bow reverentially to Lord Sheshnath.’

And (iv) the Mantra for Goddess Earth who holds the divine Lotus held in her hands is ‘Kamalaaye Namaha’ (कमलाय नमः). It means ‘I bow reverentially to Goddess who holds the Kamal or Lotus.’]

3. Vighna (i.e. Lord Ganesh, who is invoked to remove all hurdles and help in successful completion of the worship as well as accomplishment of desired results), Durga (the Mother Goddess), Kshetrapals (the custodians of the various areas of the world) and Vaani (the faculty of speech personified as Goddess Saraswati)—these four divine entities should be worshipped at the four corners of the Ram Yantra platform (i.e. at the door-steps that lead up to the main platform) by invoking their respective names in the fourth case of Sanskrit grammar called the ‘Chaturtha Vibhakti’, and then prefixed by their respective Beej Mantras and suffixed by the word Namaha for bowing before them as a token of respect and submission¹.

The next step is to worship a personified form of the four great rewards that are expected to be gained or great achievements that are expected to be attained by a worshiper by successfully completing the formal process of worship of the Yantra and its chief deity, which in this case is Lord Ram. [This is a symbolic way of reminding the worshipper or educating him about the great benefits that await him for his efforts and diligence.] This worship is done at the four legs or pedestals located at the four corners of the platform or dais where the worship Yantra of Lord Ram is installed. These four corners are the the south-east, south-west, north-west and north-east corners.

The four great achievements or rewards, and the leg or pedestal where they are symbolically honoured are the following—(a) the virtue of Dharma (i.e. access to the virtues of righteousness, noble thought and conduct, goodness, propriety, probity) is worshipped at the leg or pedestal that lies in the south-east corner of the platform, (b) the virtue of Artha (i.e. prosperity, wealth, material well-being) is worshipped at the leg or pedestal that lies in the south-west corner, (c) the virtue of Kaam (i.e. fulfillment of all desires, wishes, yearnings and worldly expectations that satisfy one's passions for enjoyment of this world) is worshipped at the leg or pedestal that lies in the north-west corner, and (d) the virtue of Moksha (i.e. spiritual liberation, deliverance, emancipation and salvation) is worshipped at the leg or pedestal that lies in the north-east corner of the platform².

Similarly, the 'opposites of the above four fruits' (like the Christ and the anti-Christ) are worshipped in the four sides— (a) anti-Dharma or 'Adharma' is worshipped in the eastern direction, (b) anti-Artha or 'Anartha' is worshipped in the southern direction, (c) anti-Kaam or 'Akaam' is worshipped in the western direction, and (d) anti-Moksha or 'Amoksha' is worshipped in the northern direction³ (3).

[Note—¹The Mantras, how they are constructed, and their basic meaning have been described in detail in note no. 1 of verse no. 1 of this Canto 5. The four Mantras are as follows—(a) Lord Vighna on the right side by the Mantra 'OM Vim/n(g) Vighnaaye Namaha' (ॐ विं विघ्नाय नमः), (b) Kshetrapals on the left with the Mantra 'OM Kshum/n(g) Kshetrapaalaaye Namaha' (ॐ क्षं क्षेत्रपालाय नमः), (c) Durga on the lintel or top of the doorway by the Mantra 'OM Dum/n(g) Durgaaye Namaha' (ॐ दुं दुर्गाय नमः), and (d) Vaani by the side of Durga with the Mantra 'OM Vang Vaanye Namaha' (ॐ वां वाण्यै नमः).

²These four—Dharma, Artha, Kaam and Moksha—are called the great fruits or rewards symbolic of a successful life. They are represented by the bull, the lion, the ghost and the elephant respectively. Their colours are respectively red, black, yellow and blue. These should be imagined as being the shape of the four legs or pedestals of the platform. The symbolism is very obvious here—the sincere worship of the supreme Lord Ram bestows the aspirant with all these glories along with the majesty and magnificence that are naturally associated with them.

As in the previous case, the ritual of worshipping would involve the invocation of the respective Mantras of these four rewards which are imagined in the form of personified deities. Following the general guidance laid out for construction of any deity's Mantra, the four Mantras of these four rewards would be as follows—

(i) OM Dham/n(g) Dharmaaye Namaha' (meaning—OM salutations (or salutations to the supreme Brahm)! I bow most respectfully to Dharma and request the latter to bless me with its characteristic glories and virtues.'

(ii) OM Am/n(g) Arthaaye Namaha' (meaning—OM salutations (or salutations to the supreme Brahm)! I bow most respectfully to Artha and request the latter to bless me with its characteristic glories and virtues.'

(iii) OM Kaamam/n(g) Kaamaaye Namaha' (meaning—OM salutations (or salutations to the supreme Brahm)! I bow most respectfully to Kaam and request the latter to bless me with its characteristic glories and virtues.'

And (iv) OM Mom/n(g) Mokshaaye Namaha' (meaning—OM salutations (or salutations to the supreme Brahm)! I bow most respectfully to Moksha and request the latter to bless me with its characteristic glories and virtues.'

These four great rewards are visualized as four Kalpa Trees which are the ever-green trees of heaven that can give any kind of fruits wished by the worshipper.

³The opposite factors to those mentioned above are also worshipped or shown due respect so as to ensure that their patron-Gods are kept in good humour, and they do not create unnecessary hindrance and mischief for the aspirant. It is often seen that evil ones create unwarranted troubles if their extortionist demands are not met. This is

the reason why 'Adharma' which is the opposite of the virtues of Dharma and which implies un-righteousness, improper conduct, ignoble thoughts and reproachable behaviour etc., 'Anartha' which is the opposite of Artha and means adversities, ruin and misfortunes, 'Akaam' which is the opposite of Kaam and implies failures, frustrations and non-fulfillment of one's desires, and 'Amoksha' which is the opposite of Moksha and indicates remaining bonded or shackled to this material world and the gross body, and an inability to find freedom from their seemingly unbreakable fetters are also worshipped along with Dharma, Artha, Kaam and Moksha.

Like the above Mantras for positive virtues, the ones for these negative and opposing virtues will also be constructed on the same basic principle as follows—

(i) OM A-dham/n(g) A-dharmaaye Namaha' (meaning—OM salutations (or salutations to the supreme Brahm)! I bow most respectfully to A-dharma and request the latter to bless me and be kind towards me so as not to cause hindrance in my successfully acquiring the virtues defined as Dharma.'

(ii) OM A-am/n(g) A-narthaaye Namaha' (meaning—OM salutations (or salutations to the supreme Brahm)! I bow most respectfully to An-artha and request the latter to bless me and be kind towards me so as not to cause hindrance in my success and good fortunes.'

(iii) OM A-kaamam/n(g) A-kaamaaye Namaha' (meaning—OM salutations (or salutations to the supreme Brahm)! I bow most respectfully to A-kaama and request the latter to bless me and be kind towards me so as not to cause hindrance in my successfully accomplishing my objectives.'

And (iv) OM A-mom/n(g) A-mokshaaye Namaha' (meaning—OM salutations (or salutations to the supreme Brahm)! I bow most respectfully to A-moksha and request the latter to bless me and be kind towards me so as not to cause hindrance in my spiritual liberation, deliverance, emancipation and salvation.')

4. The process of worship of the 'Ram Yantra' should be commenced from the circular figure in the center of the Bhupur Ram Yantra.

To begin with, in the central part of the instrument, the Sun, the Moon and the Fire (Agni) must be worshipped using their seed/root syllables or Beej Mantras as is done traditionally by wise and erudite worshippers¹.

The three consecutive rings or circles drawn in the central part of the Bhupur Yantra (refer Canto 4, verse no. 44) are to be worshipped as symbolic forms of the three qualities of Sata, Raja and Tama that encircle the creature and the rest of the creation from all sides, and it is of paramount importance for the worshipper to break free from their fetters so as to find Moksha (which is the best form of the four great rewards mentioned in verse no. 3 above)² (4).

[Note—¹The Mantras for the worship of these three deities would be as follows—

(i) OM Sum/n(g) Suryaaye Namaha' (meaning—OM salutations (or salutations to the supreme Brahm)! I bow most respectfully to the Sun God and request the latter to bless me with its characteristic glories and virtues.'

(ii) OM Cham/n(g) Chandraaye Namaha' (meaning—OM salutations (or salutations to the supreme Brahm)! I bow most respectfully to the Moon God and request the latter to bless me with its characteristic glories and virtues.'

(iii) OM Am/n(g) Agnaaye Namaha' (meaning—OM salutations (or salutations to the supreme Brahm)! I bow most respectfully to the Fire God and request the latter to bless me with its characteristic glories and virtues.'

²A brief description of these three Gunas is given in verse no. 2 of Canto 2 of this Upanishad. Their respective Mantras for worship are as follows—

(i) For Sata Guna it is 'OM Sum/n(g) Sattwaaye Namaha' (ॐ सं सत्त्वाय नमः). It briefly means 'OM salutations (or salutations to the supreme Brahm)! I bow most

respectfully to the Sata Guna, and request the latter to bless me with its characteristic glories and virtues.’

(ii) For Raja Guna it is ‘OM Rum/n(g) Rajase Namaha’ (ॐ रं रजसे नमः). It briefly means ‘OM salutations (or salutations to the supreme Brahm)! I bow most respectfully to the Raja Guna, and request the latter to be kind on me.’

(iii) For Tama Guna it is ‘OM Tum/n(g) Tamase Namaha’ (ॐ तं तमसे नमः). It briefly means ‘OM salutations (or salutations to the supreme Brahm)! I bow most respectfully to the Tama Guna, and request the latter to kindly leave me alone or excuse me.’]

5. After that, the following eight divine entities are worshipped in their personified form in a symbolic manner on the eight petals of the central 8-petalled lotus of the Bhupur Yantra. [Refer Canto 4, verse nos. 44-46.]

First, the petals on the four angles or corners and their relevant deities are worshipped and honoured, followed by those in the four cardinal points or directions. The worshipping is done in a clockwise manner, starting first with the petals that point to the four corners or angles, followed by those petals that point to the four directions.

Thus, we have the following course of worship—

(A) Worship of the lotus petals in the four corners—(i) Atma or soul which is pure consciousness and the true ‘self’ of the worshipper is honoured and worshipped on the lotus petal pointing towards the south-east corner; (ii) Antar-atma or the worshipper’s inner-self and his sub-conscious is honoured and worshipped on the lotus petal pointing towards the south-west corner; (iii) Parmatma or the supreme Soul of creation, also known as Supreme Being, is honoured and worshipped on the lotus petal pointing towards the north-west corner; and (iv) Gyan-Atma or that aspect of the supreme Consciousness that is eternally wise and enlightened, which never comes under the influence of delusions and ignorance, honoured and worshipped on the lotus petal pointing towards the north-east corner¹.

(B) Worship of the lotus petals in the four directions—(i) The Maya-tattwa (माया तत्त्व—i.e. the basic elements that characterize and define Maya, or the numerous delusions, misconceptions and entanglements that exist in this creation and are fostered by ignorance) is honoured and worshipped on the lotus petal pointing towards the eastern direction; (ii) the Vidya-tattwa (विद्या तत्त्व—i.e. the fundamental principles, basic doctrines and essential virtues of wisdom, knowledge, erudition, sagacity, learning and enlightenment etc. that can help one to overcome Maya and Agyan) is honoured and worshipped on the lotus petal pointing towards the southern direction; (iii) the Kalaa-tattwa (कला तत्त्व—i.e. the essential qualities in all the living beings that determine their individual personality and character; also meaning the various art, skill, craft etc. that exist in creation, as well as the basic fact that the world is ever-changing and no two things or instances are alike) is honoured and worshipped on the lotus petal pointing towards the western direction; and (iv) the Para-tattwa (पर तत्त्व—i.e. the supreme, absolute, essential, constant and universal Truth and Reality that refers to Brahm, the universal Consciousness) is honoured and worshipped on the lotus petal pointing towards the northern direction² (5).

[Note—¹Their respective Mantras are—(i) OM Atamane Namaha (ॐ आत्मने नमः) meaning ‘OM Salutations to the Atma before which I bow most reverentially’, (ii) OM Antaraatmane Namaha (ॐ अन्तरात्मने नमः) meaning ‘OM Salutations to the Antar-atma before which I bow most reverentially’, (iii) OM Parmaatmane Namaha (ॐ परमात्मने नमः) meaning ‘OM Salutations to the Parmatma before whom I bow most

reverentially', and (iv) OM Gyaanaatmaane Namaha (ॐ ज्ञानात्मने नमः) meaning 'OM Salutations to the Atma which is an embodiment of the virtues of Gyan—i.e. which is wise, enlightened, knowledgeable and learned. I bow most reverentially before it'.

²Their respective Mantras are—(i) OM Maya-tattwa Namaha (ॐ माया तत्त्व नमः) meaning 'OM Salutations! I bow before the fundamental delusions called Maya (that is created by Brahm)'; (ii) OM Vidya-tattwa Namaha (ॐ विद्या तत्त्व नमः) meaning 'OM Salutations! I bow before the grand virtues of wisdom, knowledge and enlightenment which are collectively called Vidya'; (iii) OM Kalaa-tattwa Namaha (ॐ कला तत्त्व नमः) meaning 'OM Salutations! I bow before the various skills, arts and crafts that exist in creation as well as the magical nature of this creation to change every moment'; and (iv) OM Par-tattwaaye Namaha (ॐ पर तत्त्वाय नमः) meaning 'OM Salutations! I bow before the supreme Tattwa or the great Principal and Authority of creation (which is the supreme transcendental Brahm)'. It is called 'Para Tattwa' as it transcends all known definitions and criterions, and is beyond comprehension and grasp of knowledge; it is the epicenter and progenitor of all essential Tattwas in creation.

As is the case with all the entities to which worship is being offered in this Yantra, the above eight are also honoured in a symbolic manner.]

6. The next step in the process of worship involves the honouring of and offering of worship to the various Shaktis such as Vimla etc.¹ [These 'Shaktis' are the various divine cosmic dynamic powers of the Supreme Being that have revealed themselves in the form of various Goddesses who are actually personifications of the various forces of Nature.]

Then the chief deity to whom worship is to be offered and for whom this Bhupur Yantra is meant and dedicated to is invited, honoured and worshipped². In the present case this deity is obviously Lord Ram. The whole divine body of the chief deity, which is Lord Ram in this case, is washed with clean sanctified water in a symbolic manner by sprinkling water on the Yantra as well as on the various parts of the worshipper's body itself. [This gesture implies that the Lord is invited to take his seat on the formal worship instrument as well as on the body of the devotee. This is done to make the worshipper enlightened about the fact that he is no longer an ordinary man but an honoured one who has sanctified himself by accepting the supreme Lord and inviting him to be enshrined in his own body. In other words, this gesture is intended to tell him that the shrine of the Lord is no where in the outside world but in his own body. The Lord is to be honoured and worshipped inside his own self and no where else—in fact, this is what is meant by the Maha Vakya (the great saying of the Vedas) 'So-a-ham'—i.e. that essence, that Supreme Being is none but me or I'. This eclectic realisation is the culmination of all spiritual endeavors and the truest form of Mukti when one is freed from the fetters of ignorance and its accompanying delusions.]

Besides this, the purpose of sprinkling clean water simultaneously on the instrument, where the Lord is invited to take his exalted seat, as well as the body of the worshipper is to indicate that only those who have thoroughly purified themselves and made their bodies as holy as the worship altar are the ones who are eligible to offer worship to the Lord. This process warns the worshipper to be on his guard, and be careful about what he thinks and does once he has decided to worship the Lord.]

After that, the various Lokpals and Dikpals such as Dhristi etc.³ are worshipped along with their weapons⁴. [Refer Canto 4, verse nos. 38-39.] (6).

[Note—¹The Shaktis in the form of Goddesses are as follows—Vimlaa, Utkarshini, Gyaanaa, Kriyaa, Yogaa, Prahavi, Satyaa, Ishaanaa and Anugrahaa. They are present in the tendril of the lotus having eight petals that is worshipped here. They are

established in a posture of granting various boons and bestowing fearlessness to the devotee who worships them.

²The full Mantra with which Lord Ram is to be invoked and worshipped is given in Canto 4, verse no. 63—‘OM NAMO BHAGWATE RAGHU-NANDANAYE RAKSHOGHNAVISHDAYE MADHUR PRASANNA-VADANAAYA MITTEJSE BALAYE RAMAYE VISHNAVE NAMAHA’ (ॐ नमो भगवते रघुनन्दनाय रक्षोघ्नविशदाय मधुर प्रसन्नवदनाय मिततेजसे बलाय रामाय विष्णवे नमः).

³The various Digpals are the great and senior custodians of creation, the word ‘Dig’ implying ‘great and senior’, while the Lokpals are the different caretakers of the various realms of the physical world and are junior to the Digpals.

The eight Lokpals are like the knights under a great King who in the present case is Lord Ram. They carry out the orders of the Lord in the physical world at a more mundane level of creation. These eight Lokpals are the following— Dhristi, Jayant [36], Vijai, Suraashtra, Raastravardhan, Akop, Dharmpaal and Sumantra. See earlier Canto 4, verse nos. 36-37.

The various Digpals are the divine forces of creation in a personified form of various Gods who are assigned the task of taking care of the entire creation. They are the following—(i) Indra, (ii) Agni, (iii) Yam, (iv) Niriti or Nairitya, (v) Varun, (vi) Anil, (vii) Kuber, (viii) Ishan, (ix) Brahma and (x) Anant. Refer Canto 4, verse no. 38 for details.

⁴The arms and armaments are—Vajra of Indra, energy of fire, baton of Yam, sword of Niriti, sling of Varun, goad of Anil, mace of Kuber, trident of Shiva, lotus of Brahma, and discus of Anant. See earlier Canto 4, verse no. 39.]

7. After that, the aspirant should worship Raghav (Lord Ram) along with the great sages such as Vashistha etc.¹, and chief monkeys such as Nal etc.² who are attending the Lord (or, who are standing near the Lord). [Refer Canto 4, verse no. 39.]

The worship should be accompanied by the offering of sandalwood and other items which are considered best and auspicious for being offered to the Lord.

Then the aspirant should offer or surrender the rewards of all his Japa (i.e. the repetition of the holy Mantra) to Lord Ram³ (7).

[Note—¹The name of the chief sages are as follows—Vashistha, Vamdeo, Jabali, Gautam, Bhargwadaj, Vishwamitra, Valmiki, Narad, Sanak, Sanandan, Sanatan and Sanat Kumar. See Canto 4, verse no. 39.

²The chief monkeys who accompanied the Lord back from Lanka after his victory over the demon king Ravana are the following—Nal, Neel, Sushen, Maind, Sharabh, Dwivid, Dhanad, Gawaksha, Kirit, Kundal, Srivatsa, Kaustav, Shankh (conch), Chakra (discus), Gada (mace) and Padma (lotus). See Canto 4, verse no. 39.

³The Mantra pronounced while offering the rewards of doing Japa to Lord Ram is the following—Guhyadgooyahsya goptaatwam grihaanasmatkritam japam; sidhirbhavartu may dev twatprasaadaatkripaanidhe (गुह्याद्गुह्यस्य गोप्तात्वं गृहाणस्मत्कृतं जपम् । सिद्धिर्भवतु मे देव त्वत्प्रसादात्कृपानिधे॥). [Oh Lord! I have been continuously repeating your holy name and as its reward have come to realise the eclectic secrets about you. I am offering all the efforts to you and request you to bless me with divine mystical powers and success in my spiritual endeavours.]

According to some experts, the Mantra is as follows— ‘Avum Bhutam Jagadaadhaarbhutam Raamam Bande Sacchidaanandrupam, Gadaarishankhaabjdham Bhawaarim Sa Yo Dhyayenmokshapnoti Sarwaha’. (एवं भूतं जगदाधारभूतं रामं बन्दे सच्चिदानन्दरूपम् । गदारिशंखाब्जधरं भवारिं स यो ध्यायेन्मोक्षप्नोति सर्वः ॥). [I offer my respects and worship to Lord Ram who is the very basis and foundation of all the Bhuts or living beings in this creation. The Lord is an embodiment of truthfulness, consciousness and blissfulness. He holds a mace, a lotus, a conch and a discus. By

meditating and contemplating upon this divine vision of the Lord (as Vishnu) one can find Moksha or spiritual liberation and deliverance, salvation and emancipation.]

8. The aspirant should meditate upon Lord Ram as follows—‘He who is of such a glorious and elegant majesty as well as of magnificent fame and divinity, who is the very cause and the foundation of the world (i.e. the world rests on and survives because of him), who is an image of supreme and eternal bliss, who holds a mace, a discus, a conch and a lotus in his lotus-like hands, who is the destroyer of the shackles tying the creature to this mundane, deluding, artificial and entrapping world consisting of an endless cycle of birth and death— I revere him, adore him, honour him, and pay my sincerest obeisance to such a great Lord known as ‘Ram’.’

Those who say this with great honesty, sincerity, truthfulness and commitment of mind and heart, and meditate and contemplate upon Lord Ram in the manner outlined in this Upanishad, are sure to find Moksha, or spiritual liberation, deliverance, emancipation and salvation, for themselves in this world (8).

9. At the time of winding up his worldly activities (i.e. at the time of his departure from the earth), Raghav (Lord Ram)—who pervades uniformly in the whole world as an omnipresent and ubiquitous cosmic Soul—simply vanished from sight. [That is, Lord Ram had not ‘died’ in the conventional sense by leaving behind any remains of his gross form (body) when he finally decided to leave this world. He did not ‘die’ as the word is generally understood to mean in relation with the death of a human being, for the Lord literally melted away or dissolved in the air at the site of his departure just like a simmering mirage vanishes from sight in a desert.]

Lord Ram’s arms (weapons) in the form of the conch, the discus, the mace and the lotus too vanished along with him. [These four things always accompany Lord Vishnu in whatever form or wherever he is. They also accompanied the Lord in his incarnation as Lord Ram. So when the latter left this world it is obvious that these inseparable companions of Vishnu would also leave with him.]

The Lord reverted back to his original natural form as the attribute-less, supreme, almighty, all-encompassing, all-pervading, infinite, imperishable, absolute and eternal supreme Lord of creation (known as Lord Vishnu or the Viraat Purush). Accompanied by his cosmic Shakti or dynamic powers personified as Sita (who was an incarnation of Goddess Rama or Laxmi, the divine consort of Vishnu), Lord Ram entered his divine abode in the heaven.

Those who were close to him during his sojourn on this earth—the citizens of Ayodhya and the subjects of his realm, his kith and kin, his brothers and other family members, his companions and attendants headed by Vibhishan (the demon king of Lanka), Sugriv (the monkey king) etc.—all of them also went to his abode along with him (9).

[Note—The way Lord Ram made his final departure from the world along with his subjects have been graphically depicted in Adhyatma Ramayan of Veda Vyas in its Uttar Kand, Canto 9. An English version of this Ramayan has been published separately by this humble author.]

10. His (Lord Ram’s) devotees, by the blessings of the Lord, obtain whatever they wish to have, attain success in whatever they do, and are blessed with full accomplishment of objectives and fulfillment of desires in all their endeavours. They not only enjoy the fruits of their acquisitions or the rewards of their efforts in this world while they are alive, but upon death they attain the supreme stature called

‘Param Pad’—i.e. they reach the highest abode and obtain the most exalted state which is equivalent to or synonymous with the supreme Lord himself.

In other words, the Lord’s ardent and sincere devotees are able to enjoy the best of the two worlds—while they are alive in this material world they are able to enjoy the best of things and the greatest of fame and majesty that this world has to offer, and when they die they find Mukti or liberation and deliverance from the fetters of this material world and attain Moksha or emancipation and salvation for their souls. This means they will not have to take a birth or die again in this world which normally keeps a creature entangled in its net. They live a happy and contented life on earth, and obtain permanent peace and rest upon death.

Those who read these hymns, which bestow all the desired wishes as well as give fulfillment and prosperity, are able to purify their inner-self, and consequentially obtain deliverance from this entrapping world; they get liberation from the horrors of birth and death; they are bestowed with emancipation and salvation for their souls. Indeed, they find Mukti and Moksha. Amen! (10).

Thus ends Canto 5 of Ram Purva Tapini Upanishad

-----Shanti Paath-----

* __* __* __*

Section 2—Ram Uttar Tapini Upanishad

Canto 1

[This Canto describes the spiritual and metaphysical importance of Kashi, also known as Varanasi, which is an ancient pilgrim city in India which is supposed to possess mystical powers that provide Mukti, or liberation and deliverance to the soul of those who die here. The reason is that Lord Shiva utters the divine name of Lord Ram, which is regarded as the Tarak Mantra (which is a divine word that has the unique ability to provide emancipation and salvation to the soul), in the ears of the dying man or woman at this place. This fact is cited in our present Upanishad to bring to the fore the stupendous spiritual powers and prowess of the divine name and Mantras of Lord Ram, and to show that the Lord is none but the Supreme Being himself personified. One can imagine the astounding spiritual fruits or rewards that a spiritual aspirant can get for himself if he uses the Lord’s various Mantras to do Japa (repetition) and Dhyān (meditation and contemplation) with when merely hearing the Lord’s name being uttered into one’s ears at the time of death can provide liberation and deliverance from this world and its endless cycle of birth and death, along with their attendant horrors.]

1. OM salutations! Brishaspati (the moral preceptor or the Guru of Gods) asked sage Yagyawalkya¹—‘Oh Brahmin! Which is the holy site that dwarfs Kurukshetra in its holiness, divinity and sanctity? Which is the place chosen even by the Gods to worship their seniors? Which is the place much sought after by the creatures seeking spiritual deliverance, emancipation and salvation?’

Yagyawalkya replied—‘Certainly, this place—which is known as ‘Kashi’ (also known as the city of Varanasi in the north of India)—is called the ‘Avimukta Tirtha’¹.

It is the holy site which is the first and foremost place for doing noble, religious and righteous deeds—i.e. it is the ‘Kurukshetra’ for spiritual aspirants desirous of Mukti, or spiritual liberation and deliverance. [The word ‘Kurukshetra’ has two parts—‘Kuru’ means to ‘do’, and ‘Kshetra’ means an area or realm. Hence, the Kurushetra is the area or place where one must do deeds in order to obtain one’s desired objectives or fulfill one’s dreams. In the spiritual field, this doing of deeds in order to realise one’s objectives is to do auspicious and righteous deeds so that Mukti, or liberation and deliverance, is obtained from the endless cycle of birth and death in which the creature is trapped from time immemorial and countless generations of previous births. It is not that doing of good deeds elsewhere would not bear sweet fruits, but only that here the results are quicker and easier to beget as the spiritual soil, so to say, is more fertile at this place, and harnessing of positive energy of the super consciousness is more easy and readily possible here.]

It is the place of worship selected even by the Gods to honour the Supreme Being. It is the location where the creature can attain oneness with the Parmatma (the supreme transcendental Soul, or the Lord God of creation) more easily and with the least effort. Hence, one should treat this place called ‘Kashi’ as the real Kurukshetra as compared to other religious or pilgrim site he goes visiting in search of Mukti.

It is in this place where Lord Shiva (Rudra) preaches the dying creature about the ‘Tarak Brahm³’. This nectar-like advice makes the creature immortal, helps in his final liberation from all worldly fetters arising out of ignorance and delusions, and helps in his deliverance from this mundane world. It is this advice of Lord Shiva about the Tarak Brahm that gives the dying creature a once in a life-time opportunity and the final chance to obtain emancipation and salvation.

Hence, one should attempt to take up a residence in Kashi and have faith in its ability to provide Mukti. One should never abandon it. This is the truth'. Sage Yagyavalkya thus explained the importance and significance of Kashi and the Tarak Brahm to Brishaspati (1).

[Note—¹Sage Yagyavalkya—Sage Yagyavalkya belonged to that Vedic period when people had an integral and holistic view of life and the reality behind existence, and all-activities, secular or religious, were regarded as one big, wholesome and composite religious sacrifice called a Yagya. Life itself was consecrated and devoted to the realization of the transcendental and supreme truthful Reality. There was no distinction between renunciation and involvement in life’s chores. There was no dichotomy between the two, and the various debates arising in Indian spiritual practices due to different interpretations and re-interpretations of the Vedic and Upanishadic tenets was a product of the later period. One such exemplary sage and seer belonging to that golden period was Yagyavalkya—he was an enlightened wise man who was not only a self-realised householder but an ardent ascetic, an acclaimed scholar and an exemplary renunciate man par-excellence, all at the same time.

It is believed that Yagyavalkya was an incarnation of Lord Brahma, the creator, when he was cursed by Lord Shiva. [Skand Puran, Nagar Khand, 1-9.] His father was named Brahmabahu (literally, the limbs of Brahma, because the latter’s limbs had manifested as this person). [Vayu Puran, 61.] But according to a book of religious law written by Yagyavalkya himself known as ‘Yagyavalkya Sanhita’, his father also had the same name. So, our Yagyavalkya was, in effect, ‘Yagyavalkya, the second’. [Yagyavalkya Sanhita, 1.]

Yagyavalkya’s teacher in the science of Yoga (meditation) and the knowledge of the self (metaphysics and philosophy) was sage Vashistha, son of Hiranyanabha Kaushalya, a king of the Raghu dynasty which ruled Ayodhya in ancient times. [Vayu Puran, 88; Bhagwat Mahapuran, 93/106.] The sage performed severe penances and

austerities, know as Tapa, at Mithila, the birth place of Sita, the divine consort of Lord Ram. [Skandpuran, Reva Khand, 42.]

He used to attend the court of great ancient wise kings, such as king Janak (the father of Sita—Brihad Aranyaka Upanishad, canto 3-4) and Yudhisthir (of the Mahabharat fame—Mahabharat, Sabha Parva, 4/32). It was in the court of king Janak that Yagyavalkya had defeated all the assembled scholars of the time on various metaphysical and theological concepts. He is also believed to be a chief priest in Yudhisthir's Rajsu Yagya.

Sage Yagyavalkya was one of the greatest, most erudite, wise and renowned seers of his time. He was a senior and enlightened man, so wise and learned a scholar that even king Janak, who himself was a most self-realised and enlightened king of his era, was so much bowled over by his erudition, depth of knowledge and scholarship that he accepted the sage's discipleship (refer Brihad Aranyaka Upanishad, Canto 4, Brahmin 2, verse nos. 1, 4). He was proclaimed the undisputed champion and winner in a metaphysical and theological debate held in the court of Janak during the course of a great fire sacrifice held where great scholars, seers and sages from far and wide had assembled (refer Brihad Aranyaka Upanishad, Canto 3, Brahmin 1-9).

He was a much sought after teacher and an honoured exponent of the eclectic Advaita Vedanta philosophy of non-duality. This basically propounds, inter alia, that everything in existence, visible or invisible, minute or colossal, important or unimportant, are all fundamentally the same singular unit called Brahm manifested in myriad and diverse ways, that therefore nothing that exists which is not Brahm is not true, that this Brahm is the only supreme Authority and Divinity in the entire creation, that this Brahm and the individual Atma or pure consciousness of the creature are one and the same, and not two independent units, that this Atma is the pure self, etc. Anything contrary to this is false and fallacious.

It is believed that all major Upanishads belonging to the Yajur Veda tradition are either directly or indirectly expounded and enunciated by and elucidated upon by Yagyavalkya or any one of his long line of disciples who had acquired this eclectic knowledge from him. (Brihad Aranyaka Upanishad, 2/6/1-3, 4/6/1-3 and 6/5/1-3.)

The high spiritual prowess and reach of Yagyavalkya can be judged from the fact that he could communicate directly with the Supreme Being called Mandal Purush in his visible manifestation as the brilliant and splendorous Sun as described in Mandal Brahmin Upanishad of Shukla Yajur Veda tradition. The fact that Yagyavalkya had a repeated communion with the Sun God, at least on four occasions is clearly marked out in Mandal Brahmin Upanishad, 1/1/1-2; 2/1/1-2; 3/1/1-2; 4/1/1-2.

Yagyavalkya was a rich householder sage and seer. This is borne out by the fact that (a) on each occasion when he attended great debates he was showered with huge largesse by king Janak in the form of immense quantity of gold and thousands of cows (Brihad Aranyaka Upanishad, 3/1/1-2, 4/1/1-7, 4/3/33, 4/4/23), and (b) when he asks his wife Maitreyi to partition his vast estate before he went on to take Sanyas (Brihad Aranyaka Upanishad, 2/4/1-2, 4/5/1-2).

The creation of Yajur Veda's two branches:- Yagyavalkya was one of the several disciples of sage Vaishampayana. Once the teacher asked his disciples to perform the 'Brahmavadhya' sacrifice (a type of penance) for him. Yagyavalkya was so confident of himself that he offered to do it all by himself for his teacher. The teacher thought that he was haughty and boastful. So, disowning or disinheriting him from his line of disciples, he commanded that Yagyavalkya should return all that he had learnt from his teacher. The sage returned all the Mantras of the Yajur Veda that he had learnt from his teacher by 'vomiting' them out. The rest of the disciples were very cunning; they transformed themselves immediately into partridges, called Tittars, and gobbled up everything. From that developed the Krishna Yajur Veda's Taittiriya branch. It is called 'Krishna' after the teacher, and 'Taittiriya' after the partridges.

Now, not to be demoralised so easily, Yagyavalkya worshipped the Sun God who blessed him with a fresh set of Mantras of the Yajur Veda. Since it came from the

‘bright sun’, this set of Mantras was called the ‘Shukla Yajur Veda’. [The word ‘Shukla’ means ‘bright or light or illuminated’.] The sage revised this into fifteen sub-texts, called the Vajasanis, i.e. those belonging to the horse race. This is because the Sun God had assumed the form of a ‘horse’ to teach him, and the word ‘Vajis’ means a horse.

Yagyavalkya had fifteen disciples (e.g. Kanva, Madhyandin etc.) who mastered one each of these fifteen sub-text created by Yagyavalkya. [Vishnu Puran, 3-5; Vayu Puran, 60-1.]

Family—He had two wives. The elder was named Katayani, and the second was called Maitreyi. From the elder wife, he had a son named Katyanana. [Skandpuran, Nagar Khand, 130; Brihad Aranya Upanishad, 4/5/1.] According to ‘Yogi Yagyavalkya’, a hand book on Yoga, his third wife was Gargi, though she is depicted as a rival interviewer who tested the sage’s erudition and scholarship in Brihad Aranyaka Upanishad. [Yogi Yagyavalkya, edited by Upendranath, Vasumati — Calcutta, 1-5.]

Sanyas—Though Yagyavalkya was externally a householder sage and seer, he was internally a self-realised and an enlightened man, a sincere ascetic and a renunciate monk who knew the futility of worldly pursuits. He was not preaching what he did not believe in. So he finally took to the eclectic path of Sanyas as clearly mentioned in Brihad Aranyaka Upanishad, 4/5/15.

Works—Yagyavalkya wrote great texts on Yoga, metaphysics and law pertaining to daily life, much like Manu’s Smiriti Law. (i) Yagyavalkya Sanhita contains religious laws; (ii) Yog Sanhita was composed in the hermitage of sage Upmanyu [Kurma Puran, 25.]; and (iii) Yogi Yagyavalkya on Yoga philosophy.

Yagyavalkya was a great and acclaimed Yogi (an ascetic) as well as a metaphysical philosopher and preacher par-excellence who was well-versed in the knowledge of Brahm and the Atma.

²The word *Avimukta* literally means ‘that which is not free; that which is bound or shackled’. Here the word means that place or that entity that has the potential to set free those who are shackled by providing them liberation and deliverance from their bondage. It has many connotations such as—(a) The holy pilgrimage site of Kashi or Varanasi, a city of northern India where Lord Shiva is said to reside eternally on this earth and provide this liberation and deliverance to the soul of a dying man by uttering the Tarak Mantra in his ears. This is being referred to in our present Ram Uttar Tapini Upanishad. (b) Another site is Kurushetra where the legendary Mahabharat war was fought. (c) According to Yoga philosophy, this site is located at two places corresponding to the holy sites mentioned above—one is the area around the ears, and the other is central point between the two eyebrows. (d) The Brahmrandhra which is the top central point of the head is also said to be the abode of Brahm. It is the Avimukta area because when the ascetic is able to concentrate his attention on this citadel, he achieves supreme bliss and peace. According to Yoga, when the vital energy of Kundalini is aroused, it snakes up the spine and enters this area, thereby immense bliss to the aspirant.

Refer also to Canto 2, verse no. 3, and Canto 4, verse nos. 2-13 of this present Upanishad.

This concept has been elaborately described in the following Upanishads also—(i) Shukla Yajur Veda’s Advai Tarak Upanishad, verse no. 3; Tarsar Upanishad, Canto 1, verse no. 1.

³*Tarak Brahm* is that divine aspect of the super consciousness known as Brahm which provides the spiritual aspirant with Mukti and Moksha—i.e. final liberation, deliverance, emancipation and salvation. The formula used to achieve this eclectic goal is known as the *Tarak Mantra*.

The Tarak Mantra is therefore a group of esoteric, ethereal and holy syllables, words or phrases having mystical powers and divine potentials that can achieve miraculous results for the adherent as they have the authority to bestow special

spiritual abilities on the creature and help in his liberation and deliverance, his emancipation and salvation. The word 'Tarak' means an entity that takes one across some formidable obstacle that seems otherwise insurmountable and unconquerable. It is a medium by which all hurdles and impediments in one's path that prevent one from attaining his spiritual goal are overcome easily. It is therefore an instrument that provides spiritual liberation and deliverance to the seeker, one that gives emancipation and salvation to the creature's soul, a vehicle that can take a creature across the ocean of endless miseries and pains from which he is suffering in this world and from which he sincerely wishes to find freedom.

The Mantra that has the astounding spiritual potential and mystical powers that can provide the soul of the frustrated, agitated and hapless creature trapped in the labyrinth of miseries and torments with final liberation and deliverance is called the Tarak Mantra. It helps him find freedom from all the fetters and delusions associated with this world and creation, and obtain final peace and rest for his soul.

Other Mantras can give him everything else in this creation, such as attainment of all types of Siddhis and other super-natural powers and abilities, or acquisition of other rewards such as Dharma, Artha and Kaam as mentioned in verse no. 3 of Canto 5 of the Ram Purva Tapini Upanishad, or other such great achievements that are rare, but they do not provide him with 'Moksha' so easily as does the Tarak Mantra.

Some of the important Upanishads that are dedicated to this Tarak are the following—Tarak/Tarsar Upanishad; Ram Purva Tapini Upanishad, Canto 4, verse nos. 1-12; Ram Uttar Tapini Upanishad, Canto 1-2 (full); Canto 4, verse no. 14; Canto 5, verse nos. 4/1-47; Canto 6, verse nos. 1-3; Ram Rahasya Upanishad, Cantos 2-3 and 5 (full); the Atharva-shikha, 2/1; Atharvashir, Kandika (Canto) 4; Advaitarak, verse nos. 3, 7-11; Nrisingh Purvatapini Upanishad, Canto 1, verse nos. 15-16; Naradparivrajak Upanishad of Atharva Veda, Canto 8 which is fully devoted to this theme; Bhasma Jabal Upanishad, Canto 2, paragraph nos. 4 and 18 (Shiva's Tarak Mantra).

Lord Shiva advises the dying Jiva (creature; the living being) about the supreme truth and absolute reality in creation. He enlightens the creature about the supreme, transcendental, eternal, absolute and the only Truth in this creation, called Brahm, which incidentally is the cosmic Consciousness as well as the ultimate destination of the soul of the creature where the latter would find eternal rest, peace, bliss, tranquility, beatitude and felicity.

Lord Shiva enlightens the creature that his true identity is the Atma, the pure consciousness, which is eternal, imperishable, incorrupt and pure, and which is synonymous with the supreme Brahm as the latter is nothing but the cosmic form of the same Consciousness. The creature is made aware of the fact that his 'true self' is not the gross body that is dying and that would be cremated in the fire, but it is the Atma that never dies as it is eternal and imperishable. Therefore, the creature is made to feel reassured that there is nothing to fear from death.

Shiva preaches the creature about the divine Mantra of Lord Ram as has been prescribed in this Upanishad that ensures his liberation and deliverance from the fetters of this mundane and ensnaring world. This is because the Mantras of Lord Ram have the stupendous mystical powers, the potential, the strength, the valour and the dynamism that they can actually break the shackle by which the wary creature had been forcefully tied, unwillingly and secretly, to the gross body and bonded to the gross world. To cite a simple illustration, the divine Mantras of Lord Ram are like powerful rays of laser or powerful bursts of electrons or currents of high voltage electricity that can perform miraculous tasks unheard of or unimagined.

Besides this, Lord Ram is Brahm personified, and his four-letter name 'Ram' is equivalent to OM, which is the Mantra for Brahm, in its spiritual strength and metaphysical importance. It is significant to note that out of all the countless Mantras and Beej Mantras enumerated in various Upanishads and other scriptures, the name of Lord Ram and his Beej Mantra 'Raam' are the only ones that are honoured with the

title of 'Tarak Mantra'—i.e. the Mantra that can provide liberation, deliverance, salvation and emancipation to the creature. Though OM is directly related to the supreme transcendental Brahm, it is 'Raam', the Beej Mantra and the name of Lord Ram which is called the 'Tarak Mantra'. When OM is used before it, it is used as a salutation and a sign of showing respect to the main deity—which is 'Ram'.

This Upanishad also elucidates and expounds upon the fact that there is no difference at all between Brahm and Ram. Hence, what Lord Shiva preaches to the dying man at Kashi by way of Lord Ram's Mantra is essentially the truth about Brahm and the spiritual aspirant's own 'self' which is pure consciousness. It ignites in his mind and sub-conscious the realisation that he is indeed an image of the supreme Brahm or of the cosmic Consciousness known as the Parmatma (Param = Supreme; Atma = Consciousness, Soul, Being). He realises that there is indeed no difference between the supreme Consciousness that prevails in the entire creation as Brahm, and his own Atma which is nothing but a microcosmic form of this Consciousness. This realisation fills his heart with unbound joy and ecstasy of the highest order. Therefore he does not regret at his departure from this miserable world and its accompanying pains; he does not regret at having to abandon the gross body which he would have realised by now is not his 'truthful self' at all.

Since he has found the ultimate fruit of all his endeavours, and since he has understood about the illusionary nature of the pleasures and comforts of this world, he has no unfulfilled desires or wishes left at the time of death, and neither does he want to acquire another body to enjoy the world any longer. He has attained the greatest happiness and joy that comes with spiritual realisation, and therefore he would naturally not want anything inferior. Enlightenment and self-realisation has also make him aware that there is no external heaven somewhere in the remote corner of the sky where he can hope to find happiness, but it is in his own inner-self, and it is achieved by attaining mental peace, stability, tranquility and calmness.

Lord Shiva is deemed to be the most enlightened and the wisest amongst the pantheon of Gods, and obviously when he teaches someone the teaching would match his erudition and level of wisdom. The hearer of the advice given by Lord Shiva is equally fortunate and privileged at having had the golden opportunity of being preached about the greatest Mantra, known as the Tarak Mantra, by the greatest teacher known as Lord Shiva. Being an exalted and learned ascetic himself, Shiva would naturally teach the creature the way to get rid of all delusions and attain final rest and peace for himself.

With this enlightenment and acquisition of wisdom of the highest order, the creature finds peace of mind and contentedness in heart. This preaching leads to his realisation about his eternal and truthful form as the Atma that is eternal and imperishable, and this realisation helps in the creature's liberation from numerous delusions that had trapped his soul to the material attractions of the world and the pleasures of the gross body. This eclectic realisation of the truthful nature of the Atma and his own 'self' provides the dying man immense peace of mind and a sense of fulfillment. He is able to break free from the fetters that shackle him to the vicious and endless cycle of birth and death. It gives his tormented soul its final peace, rest and bliss.

There is another twist to this concept of treating Kashi as the place that provides Mukti. When a man lives here, he watches endless corpses being brought in for cremation. He observes that the rich and the poor, the well-connected and powerful as well as the down-trodden and the humblest—all meet the same fate. He sees the mighty and the high lying on the same stack of wood to be cremated as the pauper and the beggar. He further notices that the towering fortunes and worldly acquisitions of a man are all left behind and nothing accompanies him to the funeral pyre. If a man is wise and thoughtful enough, these observations would make him ponder about the reality of this world, the utility of pursuing this material world, the transient and impermanent nature of the world as well as the body, the numerous inconsistencies

that exist in this life, and to search for something that has an eternal value that would give him real peace and happiness. At this stage he comes in contact with the wisdom enshrined in the Upanishads. But he might not have the time or the intellectual capital to understand their profound philosophies, so he takes to the recourse provided by Lord Shiva himself—and it is to take the shelter of Lord Ram and repeat his powerful Mantras just like a diseased man takes the best medicine diligently to get rid of his disease. If this medicine is provided by an expert doctor, what more can he wish and expect. Lord Shiva is the wisest amongst the Gods, and when he himself advises this remedy for a creature's spiritual ills, a wise man would not bat an eyelid before grasping this golden opportunity with both hands, so to say, and find permanent peace and happiness of his soul.]

Thus ends Canto 1 of Ram Uttar Tapini Upanishad.

-----*****-----

Section 2—Ram Uttar Tapini Upanishad

Canto 2

[In this Canto, sage Yagyawalkya explains to sage Bharadwaj the importance of the ethereal Mantra 'OM' and its similarity to the Tarak Mantra of Lord Ram.]

1. Once, sage Bharadwaj¹ asked sage Yagyawalkya—'Oh Lord! Who or what is the 'Tarak'—or who is that divine Being, or which is that entity that provides the final liberation, deliverance, emancipation and salvation to the creature, or in other words, delivers the soul of the creature from this mundane, deluding and entrapping world from which it is ordinarily extremely difficult to break free and find liberation, and gives the creature freedom from all future transmigration?

And, who is the one who benefits from this benevolence and spiritual boon—or, who is the one that gets the benefit of this deliverance, liberation, emancipation and salvation?

To answer this question, the famous sage Yagyawalkya replied—'The Tarak Mantra (which is a group of letters or syllables or words that are infused with divine mystical powers and charged with dynamic spiritual energy that enables them to acquire the great magical potential to deliver the soul of the creature from this deluding and entrapping world, and provide it with emancipation and salvation once and for all) is as follows—

'The Sanskrit alphabet 'Ra' (र) standing for 'Anal' or the fire element, with the sign of the second vowel 'Aa' (आ) added to it (indicating its extended, enhanced and expanded reach, energy, potentials, powers and majesty), and with a 'dot' (called an Anuswar ' . ') on its top (standing for its supremacy over all other Mantras)—i.e. the monosyllabic word 'Raam/Raan(g)' (राम)—is the first word of the divine holy Mantra of Lord Ram. It is also called the 'Beej Mantra' of Lord Ram. [Refer Ram Rahasya Upanishad, Canto 2, verse nos. 1-2.]

The second word consists of three parts—viz, 'Raa' (रा), followed by the word 'Maaye', and then 'Namaha' (माय नमः).

Hence, the full 'Tarak Mantra' becomes 'Raam/Raan(g) Raamaaye Namaha' (राम रामाय नमः). [Refer Tripadvibhuta Maha Narayan Upanishad, Canto 7, paragraph no.

22; Ram Rashasya Upanishad, Canto 2, verse no. 16; Ram Uttar Tapini Upanishad, Canto 6, verse nos. 1-3.]

Besides this, the two other Mantras under this category of Tarak Mantra are the following—‘Ram Chandraaye Namaha’ (राम चन्द्राय नमः), and ‘Ram Bhadraaye Namaha’ (राम भद्राय नमः). [Refer [Tripadvibhuta Maha Narayan Upanishad, Canto 7, paragraph no. 26; and Ram Rahasya Upanishad, Canto 2, verse no. 25.]

These three Mantras and their constituent parts are respectively representative or symbolic of the three aspects of Divinity—viz. OM, Tattwa and Brahm.

[We note here that each of the three Mantras has three individual parts—viz. the first Mantra ‘Raam Raamaaye Namaha’ has these three parts—(i) Raam, (ii) Raamaaye, and (iii) Namaha. Therefore, the word ‘Raam’ stands for OM which in itself is a synonym for and a Beej Mantra for the supreme Brahm, the word ‘Raamaaye’ stands for the Tattwa or the principal Divinity to whom this Mantra is dedicated, which obviously is Lord Ram, and the word ‘Namaha’ refers to Brahm, the Supreme Being, to whom this Mantra refers to and to whom one bows in reverence when he says this Mantra. In other words, it is Brahm to whom the entire Mantra is dedicated, it is Brahm who is being praised by this Mantra, and it is Brahm to whom the worshipper bows in reverence.

Now, if we consider all the three Mantras together, the composite interpretation would be as follows—the first Tarak Mantra ‘Raam/Raan(g) Ramaaye Namaha’ is equivalent to OM; the second Tarak Mantra ‘Ram Chandraaye Namaha’ is equivalent to Tattwa; and the third Tarak Mantra ‘Ram Bhadraaye Namaha’ is equivalent to Brahm.

It ought to be noted here that all these three terms, i.e. OM, Tattwa and Brahm, essentially refer to the same eclectic entity that is the absolute Truth and Reality of creation, and it is the supreme transcendental Consciousness known by different names.

‘OM’ is the Beej Mantra or the root or seed monosyllabic word referring to Pranav, which in turn is synonymous with the primary Authority in creation and is the cosmic Consciousness known as Brahm that is responsible for the entire creation coming into being, as well as for its maintenance and its conclusion. OM stands for the most sublime and primary form of energy that was responsible for initiating the process of creation, and which is still reverberating in the ether in the form of cosmic background sound. The entire creation is regarded as being a revelation of OM.

OM is the defacto Beej Mantra for the supreme transcendental Brahm just like ‘Raam’ is the Beej Mantra for Lord Ram. Since Lord Ram is a personified form of Brahm, it follows that OM and Raam are synonymous with each other.

The word ‘Tattwa’ means basic or fundamental aspect of anything. Since ‘Truth’ is the fundamental reality in any given situation and the basis of everything that has substance and meaning, in the spiritual sphere it is known as super Consciousness revealed as the Atma at the microcosmic level of creation and as Brahm at the macrocosmic level, therefore the word obviously refers to them. It also refers to the basic elements in whose form the universal Consciousness has revealed or expressed itself in order to give effect to the shaping of this vast and multifarious creation. In the case of Lord Ram, the 2nd part of the first Mantra is ‘Raamaaye’, and it refers to Lord Ram as a manifestation of Brahm, as well as Brahm’s divine Shakti revealed as Sita, the consort of Lord Ram. Like Brahm and his Shakti being the primary cause of this creation coming into being, Lord Ram and Sita are also equally important and have the same stature as far as the spiritual aspirant who uses this Mantra for his spiritual welfare is concerned. The Upanishads have unequivocally and universally stressed

that the Consciousness and Brahm are the only Tattwa (fundamental aspect) in creation, and therefore it is correct to say that the word 'Raamaaye' refers to this Tattwa. This word 'Raamaaye' refers to the 'fundamental truth' about Lord Ram as being a manifestation of Brahm and the cosmic super Consciousness itself personified.

Finally, Brahm is the universal Supreme Being, the one whose Beej Mantra is OM and who is the Tattwa referred to above. Hence, the word 'Namaha' is used to pay sincere homage to the Supreme Being known as Brahm who has revealed himself as Lord Ram.]

These three Mantras have symbolically manifested in the form of the three virtues of 'Sat, Chitta and Anand' respectively. In other words, these Mantras symbolize the three great auspicious virtues of creation—viz. 'Sat' meaning truthfulness, 'Chit' meaning consciousness and awareness as well as the sub-conscious, and 'Anand' meaning the ecstasy and bliss, the exhilaration and happiness that accompanies the realisation of the truth of the 'self' as being consciousness in all its glory and magnificence.

This is the way one should interpret them, have trust and firm conviction in them, and worship, revere, honour and adore them with sincere devotion and dedication (1).

[Note—¹Sage *Bharadwaj*—Sage Bharadwaj is regarded as one of the seven celestial sages known as Sapta Rishis. Ironically, we find many ancient sages with this name, and therefore it is clear that this word was used more as a surname or title rather than the name of an individual sage or seer. Bharadwaj is regarded as a Vedic sage after whom a lineage of sages and seers of the highest order was established. His disciples assumed their teacher's name as their title, and came to be known as Bharadwajs.

Sage Bharadwaj Baarhasptya is the seer of several hymns of the Rig Veda, Mandal no. 6. He is the son of Brihaspati, the moral preceptor of the Gods. He was the father of Dronacharya of the Mahabharata who has taught Arjun the science of archery.

The epic Ramayana mentions one Bharadwaj who was the disciple of sage Valmiki and lived near the banks of river Ganges in Prayag, the pilgrim city known as Allahabad in modern India. It was at his advice that Lord Ram stayed at Chitrakoot during the first phase of his forest exile.

Sage Bharadwaj is credited with two great works—viz. Bharadwaj Shrauta-Sutras consisting of ten sections, and Bharadwaj Griha-Sutras.]

2. The divine ethereal word OM has four sound syllables or letters of the Sanskrit language— viz, A, O, U, M. But in practice, it has six sound forms forming the following six syllables or letters as follows—the first is 'A' (अ—pronounced as in *a* pen, *run*) which is the 1st letter of the Sanskrit alphabet, the second is 'Oo' (उ—pronounced as in *bull*) which is the 5th letter of the Sanskrit alphabet, the 3rd is 'Ma' (म—pronounced as in *mother*) which is the 38th letter, the 4th letter is the half-syllable in the form of a sign known as the Ardha Maatra, the 5th is the 'Anuswar' (dot '—producing the sound equivalent of a silent letter 'M' as pronounced at the end of words such as *mum*, *come*), and the 6th is the crescent shaped 'Naad' (ँ—placed on the symbol for the word OM. [The Naad consists of two parts—the crescent shaped moon at the bottom and a dot dangling on the top of it at its focal point; it is also collectively called the 'Chandra Bindu', and it's a nasal sound which is something like 'ng' added as a suffix to a word—e.g. *swung*, *rung*.]

The final geometrical shape or symbol of the divine, ethereal and cosmic word OM for Brahm is—ॐ.

In this way, the cosmic, primordial, ethereal and divine sound OM is also called the 'Tarak Mantra'. It is so-called because it has the potential and mystical powers of providing liberation and deliverance to the creature from the shackles which tie him to this mundane world of an endless cycle of birth and death.

You must consider that word OM, or its synonymous word 'Raam/Raan(g)' (ॠ), as the Tarak Mantra. It is worthy of being worshipped, revered, honoured and adored; it is worthy of being contemplated and meditated upon. It provides deliverance from the horrible torments that the creature has to suffer in the womb, at the time of his birth, his old age and at the time of his death, as well as other great fears from this world that the creature has to suffer from. [This is obviously because this Mantra has the potential to provide emancipation and salvation to the soul, thereby freeing it from the burden and compulsions of taking birth in this world and having to face its interminable horrors. That is why it is called the 'Tarak' in the first place.] (2).

3. [This verse describes the benefits that accrue to a person who has faith in the Tarak Mantra, repeats it with devotion (i.e. does Japa with it), and uses it as a means to attain liberation and deliverance (called Mukti) from his spiritual and worldly torments.]

Any Brahmin (i.e. any wise and learned person who is a sincere aspirant or spiritual seeker, or any person who is eager, mentally inclined and honest to learn and know about the supreme Brahman, or any person who is nobler in thoughts, actions, inclination, temperaments, desires etc. than the others; the word Brahmin does not refer to any specific class of society here), who repeats this Tarak Mantra constantly, consistently and persistently, becomes empowered to overcome the ill affects of all types of evils, sins, misdeeds, misdemeanors etc. that he might have committed so far.

He becomes so holy that he literally leaps across death (i.e. he does not suffer from the terrible agonies associated with death).

Not only that, he is also freed (pardoned) from such grave sins as killing a Brahmin (or any learned and senior person, or for that matter any living creature), destroying an embryo in the womb (i.e. causing abortion) as well as killing a brave warrior deceitfully. Not limited to this, he in fact is exonerated from the sin of all the forms of killings that he might have been involved in¹.

He is delivered from this world and crosses over all the hurdles of life.

Wherever he stays, for all practical purposes, he is deemed to be living in the 'Avimukta site' (i.e. in the pilgrim site of Kashi/Varanasi—see verse no. 1 of Canto 1, and verse nos. 1-8 of Canto 4).

He is deemed to be great. He attains the supreme state of existence marked by eternity, felicity and beatitude. He is able to taste the elixir of eternal and imperishable life (3).

[Note—¹This blanket pardoning of sins should not be construed as a license for murder and committing other sins in the belief that mere repetition of the holy Mantras and living in Kashi would provide freedom from their horrific consequences. No, they wouldn't. Unless the man is sincere about his repentance and regrets honestly, unless he sincerely wants to reform himself and turn a new leaf in his life, mere reading of any scripture or visiting a pilgrim site or repeating some Mantra would not serve any purpose. An honest man who has realised his mistakes and wishes to atone for his misdeeds would not shy away from accepting his misdeeds, which in itself requires a great deal of moral courage and strength of mind as accepting one's crimes and confessing may be used against him. Such a man would

also like to undo what mistakes he had done previously in his life as far as he can. Towards this end, he would willingly suffer, because this suffering is a form of 'Tapasya' or penance for him to wash away the soot that has clung to his pure self because of his past.

The very fact that the man is sincerely desirous of emancipation and salvation ensures that he has decided to reform himself and is very eager for repentance for his past misdeeds and sins that he might have committed out of ignorance or out of compulsions of circumstances. Every man has the right to reform himself, for to err is an ordinary part of human life. No one can claim that he has not committed any wrong any time in life. The very realisation that he has been erring, that he must redeem himself while there is still some time left, and the sincerity with which the aspirant seeks liberation from bondages that are consequent of his past evil deeds is a sign that he should be given a chance to reform himself.

The Upanishad gives the remedy and the means of his spiritual upliftment, redemption and rehabilitation. It essentially tells him that everything is not lost, and there is still a chance of finding Mukti from the evil consequences of his past deeds. The basic idea that is being stressed here is that every man or woman gets a chance for redemption in life, and it is another matter how he or she looks at it or even recognizes that opportunity. The chance is there, but that chance is not to be played fools around with; it has to be used judiciously. It should not be used to hoodwink the world and escape punishment, but for true repentance and mending of ways. A man should not revert back to his bad old habits once he is assured of pardon for his past mischief.

The forgiveness is meant for those who sincerely wish to atone for their sinful past and lead a reformed life. This pardon is not for them who wish to exploit the magnanimity of the scriptures to hide behind them to escape punishment by claiming that now since they have read such and such Upanishad which grants pardon they ought to be forgiven from being punished, only to revert to their bad old ways once pardoned. Even in modern society first time offenders are given a chance at reformation and change, but any such law granting reprieve should not be misused. Habitual offenders deserve no mercy whatsoever.

This is essentially what the aim of this Upanishad is; this is the implied meaning when it says that even such horrible sins as murder would be excused. The subtle and implied intentions of the scriptures should be correctly interpreted to really benefit from them, and not to use them to justify reckless behaviour, as that would be tantamount to killing their spirit. That these wise principles enshrined in the scriptures would be twisted and turned on their heads by selfish men is not their fault.

Refer also to Canto 4, verse no. 14, and Canto 6, verse nos. 8-9, 13-18 of this Upanishad. In Canto 6, verse no. 14 it is said that a Srotiya Brahmin, i.e. a Brahmin who has studied the Vedas, commits theft of gold or gems belonging to others, he is also pardoned from this sin. But again it must be noted that this pardoning of the sin is applicable only if he decides to repent and take the spiritual recourse of surrendering before the supreme Lord and repeats his divine Mantra to purify his inner-self. But again, as in all the previous cases of sins being forgiven, the regret must be sincere, and the desire to repent and relent most honest, in order to benefit from this pardoning clause prescribed in the Upanishad. Frankly, this would involve accepting one's guilt and returning the gold or the gem to the rightful owner if it is at all possible. If that would mean punishment of some kind, then it has to be accepted. The provision of granting a pardon as prescribed in this Upanishad should not be taken as a blanket license for committing theft and evil deeds, for that is not at all the intention. The pardoning is given as a caveat that the sin is never repeated under any circumstance in the future, that one is sincerely repentant and needs an avenue for redemption, and if it is at all possible then all attempts must be made to compensate the offended party to the best of one's ability.

This forgiveness from sins has been prescribed in a number of other Upanishads as well—for instance the Mahavakya Upanishad, verse no. 12; the Bhasma Jabal Upanishad, Canto 1, paragraph no. 10; the Ganapati Upanishad, verse no. 17; the Devi Upanishad, verse no. 32; the Hayagriva Upanishad, verse no. 13; the Dattatreya Upanishad, Section 3, stanza 4; and the Sharav Upanishad, verse no. 39.]

Thus ends Canto 2 of Ram Uttar Tapini Upanishad.

*__*__*__*

Section 2—Ram Uttar Tapini Upanishad

Canto 3

[This Canto describes how the four letters of the ethereal Mantra OM had manifested themselves as the four brothers Ram, Laxman, Bharat and Shatrughan. Then it goes on to assert that Sita, the consort of Lord Ram, is a manifestation of Mother Nature known as the primordial Prakriti. Intertwined in this discussion are metaphysical concepts regarding the four states of consciousness such as the Jagrat or waking, Swapna or dreaming, Sushupta or deep sleep, and Turiya or post deep sleep or the early stage of transcendental existence.]

1. The 1st syllable of the cosmic, divine, sublime and ethereal word OM is the Sanskrit alphabet 'A' (अ) corresponding to the English alphabet 'A' and pronounced as *a pen, son*. The son of Sumitra, i.e. Laxman¹ (the younger brother of Lord Ram), who enchants the entire world by his bewitching charm and pleasant demeanours, is a manifestation of this letter. In Vedant, he represents the Jagrat² or the 'waking state of consciousness' of the Atma (or the soul). In this state of existence, the Atma is aware of the external gross world at large, and therefore it is recognized as 'Vishwa'—literally meaning 'the world'. [Amongst the 4 chief names of Vishnu, he represents the name 'Sankarshan'.]

The 2nd syllable of OM is the Sanskrit alphabet 'Oo' (उ) corresponding to its English counterpart 'U'. Shatrughan³, who is known for his stupendous 'Tej', or his potentials, powers, dynamism and glory as the vanquisher of enemies, is a manifestation of this letter. In Vedantic terms, he represents the Swapna⁴ or the 'dream state of consciousness'. In this state of existence, the Atma is unaware of the external gross world at large, and is centered on the subtle world of the inner-self and the sub-conscious which is powerful and full of energy that more often than not remains hidden, dormant and concealed during the waking state. This state is therefore recognized as the 'Taijasa'—literally meaning 'energetic, vibrant, full of vigour and dynamism' even in a subtle form. Another reason for it being called 'Taijasa' is that it can 'dream and imagine' things of stupendous varieties and dimensions which the creature cannot ever hope to see or conceive in his mind when he is awake. [Amongst the four chief names of Vishnu, he stands for 'Pradumna'.] (1).

[Note—The four states of existence of consciousness: These four states have been described in a number of Upanishads—viz. (a) Shukla Yajur Veda—Trishikhi Brahman Upanishad, Canto 2, verse nos. 149-150; Brihad Aranyak Upanishad 2/1/16-20, 4/3/9-38; Subalo-panishad, Canto 4 full as well as Canto 9, verse no. 1-7; Paingalo-panishad, 2/11-16; Mandal Brahmin Upanishad, 2/4-2/5; Turiyateet Upanishad. (b) Krishna Yajur Veda tradition—Varaaha Upanishad, Canto 2, verse

no. 59-64, 72; Canto 4, verse no. 11-20; Brahmo-panishad, verse no. 1, 20-21; Kaivalya Upanishad, verse no. 12-14; Dhyan Bindu Upanishad, verse no. 93/12-93/15; Sarwasaar Upanishad, verse no. 4; Shaarirak Upanishad, verse no. 14; Brahm/Amrit Bindu Upanishad, verse no. 11. (c) Atharva Veda tradition—Mandukya Upanishad, verse nos. 3-7; Atharvashikha Upanishad; Nrisingh Purvatapini Upanishad, Canto 4, verse no. 4-7; Naradparivrajak Upanishad, Canto 5, verse nos. 1, 24-26; Canto 6, verse no. 3-4, Canto 8, verse nos. 9-16, 19-20; Ram Uttar Tapini Upanishad, Canto 3, verse nos. 1-4 (in relation with Sri Ram and others), and verse nos. 5-8 (in relation with the Atma); Param Hans Upanishad, paragraph no. 6.

¹Refer note of verse no. 5 of this Canto 3 for an exposition on Laxman being equivalent to the Jagrat state.

²Briefly, the *Jagrat state* is the 1st stage or the waking of consciousness. During this state, a creature's sense organs that constitute its gross body are active and they receive inputs from the physical material world outside which they in turn transfer to the mind which forms the creature's subtle body. This mind then filters through the clutter of information, then either orders the organs of action to respond accordingly, or it consults its supervisor, the intellect, for advice. Meanwhile, the mind stores all the information in its data bank for future reference much like the record room of an office. The true self of the creature, the pure conscious Atma, is like the King in whose secretariat the mind and intellect work, and therefore the Atma is the final Authority which takes the final decision and is responsible for all the things done by each of these individual entities. Even as the King cannot absolve himself for the sins committed by his subjects during his rule or plead ignorance of whatever is happening in his kingdom though he is not directly involved in them or in the day to day routine work of the kingdom as he stays in his palace and cannot be practically expected to control each movement in his kingdom, but he is morally responsible for them and cannot deny this responsibility. Similarly, the Atma of the creature is responsible for each and every thing that the creature does though the Atma is limited to its palace-like residence in the heart of the creature. So, the otherwise immaculate Atma is accused of things that body or mind of the creature does because the Atma is at the helm of affairs.

During this Jagrat state, the Atma interacts with the outside world through the medium of the sense organs of the gross body (i.e. the physical body). The sense organs of perception of the body collect information from the external world and pass them over to the mind, which in turn processes them and passes necessary instructions to the organs of action on the one hand, and files data for future reference in its memory bank on the other hand. The mind would also refer to the intellect those things which are not routine in nature. It is the transcendental state of supreme enlightenment and self-realisation.

The Jagrat state is when the consciousness is aware of the external world of material objects, and this is made possible through the medium of the sense organs of perceptions such as the eye, ear, nose, tongue and skin which enables the creature to respectively see, hear, smell, taste and feel this world. The creature's responses are carried out with the help of the organs of action such as the hands which receive, the legs that take him to the desired place, the mouth that helps him to speak and eat, the excretory organs that helps it to eliminate waste from the body, and the genitals which helps him to recreate and enjoy the sensual pleasures of the world. These organs are located in the gross body, and since the world is experienced through them, the latter is also deemed to be gross. The coordination of all the perceptions and actions is done by the mind-intellect which is the subtle part of the body.

The first stage of Jagrat or waking state of consciousness has been beautifully described in Brihad Aranyaka Upanishad of Shukla Yajur Veda, Canto 2, Brahman 1, verse no. 20; Canto 4, Brahman 3, verse nos. 16-19, 31, 34-35.

³Refer note of verse no. 6 of this Canto for an exposition on Shatrughan being equivalent to the Swapna state.

⁴The *Swapna* state—Next comes the state in which a person sleeps, and in metaphysical terms it is called *Supta*. This is the sleeping state of consciousness. Here, the creature is alive because it's Pran or the vital winds move around and remain active in its different Naadis (tubular ducts in the body such as the nerves which number seventy thousand).

The Prashna Upanishad of Atharva Veda, Canto 4, verse no. 2 very precisely describes what sleep is.

Swapna or dreaming state is the 2nd state of consciousness when the latter has withdrawn its self from being actively involved in the outside world through the medium of the sense organs of perception and action. But the mind does not sleep and remains active as before, though this activity is at the subtle level of the sub-conscious. Here, the consciousness remains active through the medium of the vital winds, called the various Prans present inside the body, and moves in the different Naadis (tubular ducts in the body, such as the nerves and veins etc.) which keep the mind working. Refer Shukla Yajur Veda's Paingalo-panishad, Canto 2, verse no. 12, and Brihad Aranyaka Upanishad, Canto 2, Brahman 1, verse no. 18; Canto 4, Brahman 3, verse no. 20; Krishna Yajur Veda's Dhyan Bindu Upanishad, verse nos. 58-60; Rig Veda's Kaushitaki Brahmin Upanishad of Rig Veda, Canto 4, verse no. 19.

This Pran is deemed to be synonymous with the life factors and consciousness in the body as well as with the latent fire element present inside the body which gives the energy, strength and vitality to the body to live and remain active. If it were not for the fire element (Tej) and the wind element (Pran), the consciousness (Atma, the 'self') would have found it difficult to live in the body. In fact, the Prashna Upanishad of Atharva Veda, Canto 4, verse no. 3 clearly states that the Pran in its manifestation as Agni or fire.

Since no external stimuli is being received from the outside world, the mind begins to replay what is stored in its memory bank and uses its stupendous abilities to imagine and recreate situations and circumstances in an imaginary world of dreams. Since the Atma living in the causal body depends upon the mind living in the subtle body to feel or sense anything pertaining to this world, for all practical purposes therefore the Atma begins to live in this new world of dreams conjured up by the mind and gets as involved in it as it was during the waking state. Since the mind is active here, the man remembers some of his dreams even when he wakes up. So as far as the Atma is concerned, the two states of waking and dreaming mean the same—the world exists for it in both these two states.]

2. The 3rd syllable 'Ma' (म) of the cosmic, divine, sublime and ethereal word OM corresponds to the English letter 'M'. It has manifested itself as Bharat¹ who was most realised, enlightened, erudite and wise. According to Vedant, he represents the 3rd stage of existence of consciousness, called the 'Sushupta'² state which is the 'deep sleep state of consciousness'. In this state of existence, the Atma is unaware of both the external world at large as well as the subtle world that exists in a person's dreams. In other words, the Atma is left undisturbed and free to be centered around its own truthful self, which is enlightened and wise, hence recognized as 'Pragya'—literally meaning 'wise, awakened, enlightened, aware, erudite and sagacious'. [He represents the 3rd name 'Anirudha' of Vishnu.]

The 4th half-syllable added as a tail end of the 2nd letter 'U' is called the 'Ardha Maatra'. This represents Sri Ram³ who is an embodiment of eternal bliss, peace and tranquility that is associated with Brahm-realisation, as well as the one who is most learned and highly expert in the scriptures. He symbolises the 4th state of consciousness called 'Turiya'⁴ which is marked by supreme and eternal bliss, or the high quality of bliss of self-realisation that is called 'Brahmaanand' attained during

the last stage of 'Samadhi' by Yogis (ascetics). [Sri Ram represents the 4th name 'Vasudeo' of Vishnu. Samadhi is a trance-like state of bliss and ecstasy that is obtained when one reaches certain high level of super consciousness when all grossness is eliminated and only the sublime survives.] (2).

[Note—¹Refer note of verse no. 7 of this Canto for an exposition on Bharat being equivalent to Sushupta state.

²The *Sushupta* or deep sleep state of consciousness—Beyond the second state of existence of consciousness is the third eclectic state called the *Sushupta* or deep sleep state. This has been elaborately dealt with in the Brihad Aranyaka Upanishad of Shukla Yajur Veda, Canto 2, Brahman 1, verse no. 19; Canto 4, Brahman 3, verse nos. 14-15, 19, 21-30. During this stage the creature does not dream.

The Sushupta or the deep sleep state of consciousness is the 3rd state in which the mind has also become defunct, and the Atma has withdrawn itself into the exclusive domain of the causal body and lives in seclusion, disconnected with the external world because of the non-involvement of either the gross body or the subtle body. Here it is surrounded by the space of the subtle sky around the heart, called the Hridya Akash. During this state of existence, the vital winds, called the Pran or 'life' of the creature, keep on moving in the different Naadis (various ducts such as nerves and veins etc.) as during the dreaming state so as to keep the body alive as is evident from the fact that all the subtle and imperceptible functions of the inner organs of the body such as the liver, kidneys, heart, pancreas, digestive organs, lungs etc. continue uninterrupted as before, because if they cease to function the body would die. It is the mind now that has gone in a defunct state. But this phase is temporary and shows the true nature and fundamental characteristic of the Atma, which is blissful and peaceful, contented and fulfilled, not feeling restless and perplexed in any manner whatsoever because it is now not being disturbed by the mind's constant nagging. That is why a sound asleep man does not want anything, he does not feel anything, he is not worried about anything, he is not concerned about anything, and he does not remember anything. That is also why one feels very relaxed and refreshed after even a short deep sleep when the mind and the body both find their rest.

The Prashna Upanishad of Atharva Veda tradition, in its Canto 4, verse no. 6 describes in clear terms why a creature stops dreaming.

³Refer note of verse no. 8 of this Canto for an exposition on Ram being equivalent to the Turiya state.

⁴The *Turiya* state—Then comes the 4th state of existence of the Atma, and it is known as *Turiya* state. This state is reached when the third state becomes a perpetual phenomenon instead of being only a temporary phase. Once this state of Turiya is reached, then even though the man might wake up from sleep and appear to be going about his normal duties in a routine manner in this world, his pure consciousness remains aloof and distanced from the sense organs of perception and actions as well as from the mind. This is the 'transcendental state' of existence of consciousness, and it goes beyond the third state of Sushupta or deep sleep state of consciousness. Here the spiritual aspirant lives in a state of perpetual Samadhi. That is, he remains in a constant state of blissfulness and meditation though he lives in this physical world and goes about his normal affairs like an ordinary man.

During this 4th state called 'Turiya', the Atma acquires all the characters of the earlier three stages, viz. the waking, the dreaming and the deep sleeping states in their individual form as well as in a combined and composite way. In this state of spiritual existence, the consciousness exhibits all the traits of the earlier three states at the same time along with the unique traits which would obviously be a net result of the combined affect of all the individual traits that are so unique to each of the three earlier states of existence consciousness—viz. the waking state, the dreaming state, and the deep sleep state.

The 4th state of existence of the consciousness or Atma is also called the 'Turiya Chaitanya state'. In this state, the creature exists in its purest form as the pure consciousness which is undiluted, uninterrupted and unpolluted by any impulses or inputs from the external world. This results in its pristine and immaculate form as 'consciousness' to shine through (much like the flame of the candle which shines with all its brightness and splendour once the tainted glass covering around it is removed). This consciousness is the true 'self' of the creature and its real identity.

Thus, it is the Atma or the pure consciousness as the true 'self' of the creature that is the witness of the existence of the other three states in which the creature lives. This 'self' or Atma is imperishable and without a birth or beginning. This is because the other three states continue to appear and disappear in a rhythmic cycle as the creature wakes up to face the world after his phase of sleep is over, only to go back to sleep again when it is exhausted, and wake up again refreshed and rejuvenated from sleep. But the fourth state is like the Sun in the sky which is steady and shines constantly upon the world and lights it up. This Sun is unaffected by anything happening in this world and to this world, and remains completely dispassionate and detached from anything mundane and terrestrial. Nights and days appear and disappear in a cyclic manner, but the Sun remains the same. During the night it is erroneously assumed that the Sun is no more, but as science has proved the Sun is there in the sky though it might not be visible to the creature during that period of time called the 'night' as it is shining on the outer side of the globe. The day is comparable to the waking state of consciousness, the moon-light night to the dreaming state of consciousness when a man is able to see this world but with a different light, while the dark night when nothing is visible is comparable to the deep sleep state of consciousness when nothing of the external world is visible.

The Varaaha Upanishad of Krishna Yajur Veda, in its Canto 2, verse no. 64, describes what the practical implication of this Turiya state of consciousness is.

The Subala-panishad of Shukla Yajur Veda tradition, in its Canto 9, verses 1-7 elaborately describes the fourth state of existence of the consciousness called the Turiya state. It says that the bliss and happiness, collectively called 'Anand', which is found in the 4th state of existence of the consciousness called 'Turiya' when one experiences and witnesses the divine supreme transcendental Being (Brahm), also ends with Turiya. It is the 'final frontier', the ultimate goal that the soul strives to reach. So, when the fount of bliss (Anand) is reached in the Turiya state, nothing more is left to be achieved or acquired. As soon as a man abandons this supreme state of existence and wakes up into this mundane existential material world, he immediately loses that bliss which he was enjoying in the Turiya state. The word Turiya means 'fourth quarter', and once this segment is reached after crossing the first three quarters, there is nothing beyond it and the complete cycle is achieved. There is accomplishment of all that has to be accomplished; there is the 'final coming home, full cycle' for the soul. Everything comes to a full stop.]

3. Sita, the divine consort of Lord Ram, represents the cosmic Shakti of Brahm. This Shakti is a personified form of the cosmic dynamic energy, powers and authority of the Supreme Being by which he creates, sustains and concludes this entire creation along with all its inhabitants. [That is why this Shakti had to accompany Brahm in the latter's manifestation as Ram so that the evil demonic elements exemplified by the demon king Ravana could be got rid of. This is because Brahm utilises his cosmic Shakti or his dynamic powers of an astounding profundity to do anything. The Shakti carries out the orders of the Supreme Being and acts on his behalf. So, when Brahm decided to come down to earth to eliminate the evil, pervert and negative forces of creation which had become dominant and were creating insurmountable problems for the rest of the subjects of the vast realm of the Supreme Being, thereby stifling

Dharma and all righteousness and auspiciousness, the Shakti accompanied the Lord to help him fulfill his objectives. It is just like the more practical example of a king or an emperor being accompanied by his army and generals when he goes to some part of his vast and extended kingdom or empire to restore the rule of law and overcome some savage enemy who had been tyrannizing, causing horrors and perpetrating cruelty on the helpless subjects of the king or emperor. The king or the emperor actually does nothing in physical sense, but it is the army and its generals as well as the ministers of the sovereign who actually do what is needed to be done on his behalf. Similarly, Shakti, in the form of Sita, accompanied Brahm when the latter decided to come down to earth as an incarnation in the form of Lord Ram.] (3).

[Note—An entire Upanishad named ‘Sita Upanishad’ of the Atharva Veda tradition is dedicated to Sita. It is included in this volume.]

4. That cosmic, divine, sublime and primordial energy (referred to in verse no. 3) is called Sita. She represents the ‘Naad and Bindu’ represented by the ‘dot’ and the ‘crescent’ (◌◌) respectively that is put on the sign of the ethereal Mantra OM (ॐ) representing the supreme Brahm or Pranav, and without which the word OM remains un-adorned. [This mark is like a crown of OM. Even as any king, who is the sovereign of his realm, acquires his powers because of the crown on his head, Brahm also acquires his stupendous dynamic powers and majestic potentials because of this divine cosmic energy called ‘Shakti’ that he possesses. It is this Shakti that has revealed itself in the body of Sita.]

Erudite and wise ones also recognize her (Sita) as the ‘Mool Prakriti’ because she is a manifestation of the essential, primordial, primary Nature which is a basic component of this creation. This ‘Prakriti’ as well as the ‘Shakti’ are inseparable from and an integral part of the cosmic Authority known as the supreme Brahm. While Shakti is the dynamism of Brahm, Prakriti is the revelation of this Shakti at the cosmic level of creation.

When this Brahm assumed a visible form as Lord Ram, it is natural that the inseparable aspects of Brahm, i.e. Prakriti and Shakti, would also reveal themselves simultaneously. Hence, Sita is invariably and unequivocally associated with Lord Ram even as Shakti and Prakriti are associated with Brahm. It is this Brahm who is personified in the form of Lord Ram, and it is Shakti that is personified in the form of Sita (4).

5. [Verse nos. 5-8 that describes the four Paads or limbs or aspects of Brahm, the supreme transcendental divine Being, as corresponding to the four subtle sounds of the ethereal word OM. These sounds correspond to the four letters A, O, U and M that together constitute OM. Since the Atma, the pure conscious ‘self’ of the Jiva, the living being, is a microcosmic form of the Supreme Being, and since everything in creation is a manifestation of Brahm and nothing else, this Upanishad then goes on to explain how the four states of existence in this creation—known as the Jagrat or waking state, the Swapna or the dreaming state, the Sushupta or the deep sleep state, and the Turiya or the post-Sushupta or the transcendental state—correspond to these four letters of OM as well as to the four Paads of Brahm.

To understand Brahm in a holistic way, all of them have to be understood in a comprehensive and integrated manner, and not in a fractured manner. It is important to note here that OM is a monosyllabic sound, like a continuous rumble of distant thunder or the trundling sound of a running train, or the continuous notes played on the harmonium. But even as a musician knows the finer notes and tones being played

on the harmonium although the general sound produced by the instrument appear to be one continuous stream of music, those sages and seers of the past who were highly realised and expert in meditation and contemplation could discern the finer sound components of the otherwise uniform sound of the ethereal word OM that has its genesis in the vibrations produced in the cosmic ether signaling the presence of energy and dynamism in a most subtle and sublime form in the background of creation. This they named Pranav or the cosmic vibration of life that generated the energy that drives the dynamo of life in this creation. This was also called the cosmic Consciousness because it was able to inject vibrancy, dynamism and life into the otherwise inane and lifeless primary ingredients of creation.

The four components of OM were envisioned as the four phonetic sounds of the Sanskrit language corresponding to the alphabets A, O, U and M of the English language. Since everything in this creation is a revelation of one Brahm, it follows that the entire creation represents these four components of OM, and that the entire creation also represents the four Paads of Brahm.

Further, the Consciousness is regarded as having four primary states of existence—viz. the Jagrat or waking, Swapna or dreaming, Sushupta or deep sleep, and Turiya or transcendental state beyond the Sushupta. Therefore, these four letter-components of OM as well as the four Paads of Brahm are represented by these four states of existence of Consciousness.

These are the basic points that are being elucidated and expounded upon in the following verses of this Canto.]

The cosmic, divine, sublime and ethereal monosyllabic word OM is known as 'Akshar' as it is imperishable and immortal. [The Sanskrit word 'Akshar' has two meanings—one is a 'letter' and the other is something that 'does not decay, is imperishable and eternal'. OM is likened to a 'letter' because it is a monosyllabic sound. For the purpose of study and analysis of its magnificent divine aspects it is hypothetically split into three (A, U, M), four (A, O, U, M) and even six (A, O, U, M, Chandra Bindu and Ardha Maatra) components. It ought to be remembered that OM is not an ordinary monosyllable, but it is the Beej Mantra for the supreme transcendental Authority of creation and the cosmic Consciousness known as 'Brahm' that is at the root of everything that exists. This 'cosmic Consciousness' is known as Parmatma, the supreme Atma, the Brahm, the Supreme Being, at the macrocosmic level of creation, and as the Atma, the individual soul of the creature known as the Jiva, the living being, at the microcosmic level of creation.]

The entire visible world is but a manifestation/revelation of OM. In other words, the world is a visible form of the various aspects of OM (and since OM is the Beej Mantra for Brahm, this world is a visible manifestation of the latter). The visible physical world establishes and makes evident or visible the magnificent and stupendous glory of that invisible supreme Authority of creation known as the sublime Consciousness or the divine Brahm that is represented by the ethereal sound of OM.

Whatever existed, whatever exists and whatever shall ever exist in the future, as well as any other dimension or aspect of time and space which is beyond these three, are also nothing else but a manifestation or an extension of OM as a representative of Brahm. It is all-inclusive and comprehensive in nature.

Surely, everything is Brahm and a manifestation of Brahm, and nothing else. Therefore, it is also OM in a visible and manifested form. [Since everything is a manifestation of Brahm, and OM is a word used to indicate Brahm as it is a Beej

Mantra of Brahm, it follows that the entire creation is a symbol of OM in its physical form. This eclectic world view of creation creates a high level of equanimity of thought, and establishes uniformity and universality in this creation. It removes all causes or basis of dichotomies, schisms, frictions, ill-will and jealousy, thereby instilling harmony and calmness in the entire creation just like the case of the word OM which is treated as a monosyllabic sound though it has four sound components that are perfectly integrated in its sound structure.

Hence, though we assign different names and categories to different units of creation for the purpose of dealing with them in day-to-day life, it will be wise and enlightened to regard them as an integral and an inseparable part of one wholesome cosmic entity for all practical purposes.

As has been said above, OM is the Beej Mantra of Brahm. Brahm is known and recognized by this word OM. They are synonymous with each other. If this world is a visible manifestation of Brahm and an extension of its glory, it follows that the world is actually a manifestation and an extension of OM and its glory. Again, since Brahm is pure Consciousness, it follows that what is basic to this world is 'consciousness' and nothing else. In other words, if 'Brahm' and 'consciousness' are removed from this world, nothing worthy remains in it. Hence, Brahm or cosmic Consciousness is the 'Tattwa' of creation; it is the essential and basis unit of creation around which the rest of the edifice of creation is moulded.

OM has four basic sounds—viz. the sound of the letter 'A' (as in *son*) which represents the first aspect of Brahm symbolizing the initiation of creation, 'Oo or U' (like the letter 'O' in the word *go*) stands for the second aspect of Brahm and corresponds to the development, expansion and growth of the world, 'M' (as in *mum*) stands for the third aspect of Brahm and corresponds to the conclusion of the world, and finally the prolonged nasal sound of 'M' that is made after OM has been pronounced completely and the mouth closed stands for the fourth aspect of Brahm, and it corresponds to the time between the last creation and the beginning of a new phase. Hence, it naturally follows that the entire creation is nothing but a revelation of the four subtle and most esoteric aspects of the supreme Consciousness known as Brahm that is envisioned in the form of a sound equivalent to that made by saying the monosyllabic word 'OM'. This is why OM is regarded as the Beej Mantra for Brahm just like we have the monosyllabic word 'Raam/Raan(g)' as the Beej Mantra for Lord Ram because the Lord's name 'Ram' is based on a single Sanskrit letter 'Ra' as in the word *run*.

The four letters of OM, i.e. A, O, U and M, exist only in a hypothetical plane and are employed for the express purpose of analysis and study. It must be remembered that OM is a monosyllabic sound that is one, continuous, and unbroken sound. These letters have been imagined just for the purpose of understand OM. This instance is cited to explain how the entire creation and the four states of existence of consciousness are indistinguishable from one another when we consider the entire creation in a holistic and wholesome manner. Similarly, this also explains how Brahm is one single indivisible and immutable whole though it has been said to have four Paads in the present Upanishad as well as in other Upanishads.]

The world is a visible and gross manifestation of what is essentially invisible, sublime, subtle and supreme entity—i.e. the visible gross physical world is a manifestation of Brahm who is invisible, subtle, sublime and supreme. The visible and verifiable world proves that there is something beyond the spectrum of visibility that is real and truthful, and of which it is an image. That essential element which forms the 'soul' and the 'basic identity' of the world is called its 'Atma'. Since it is

Brahm that is at the core of all aspects of creation, it follows that Brahm is also the 'Atma or soul' or 'essence and fundamental aspect' of creation, or the 'Tattwa' of creation—both at the macrocosmic level of creation, in which case it is called the 'Paramatma' (the supreme and transcendental Atma), as well as at the microcosmic level of creation, in which case it is simply called the Atma of the individual creature.

This Atma or Parmatma has four Paads or limbs or aspects corresponding to the four Paads of Brahm represented by the four sounds of OM. Again, since the Atma is nothing but pure consciousness, it follows that the four Paads of the Atma or Brahm represent the four states of existence of the 'consciousness'¹.

[Although the supreme Brahm is indivisible, immutable and eternal, and it cannot be fractioned or partitioned, we hypothetically divide its entire being into four stages or states of existence just in order to understand or grasp its full form or nature like the monosyllabic sound OM that has been split into four components just for the purpose of study and analysis. That is, this division is done to facilitate study and comprehension of an entity that is usually beyond the reach of the mind and the senses.

The universal sound OM is split into four components A, O, U and M. These are regarded as being representatives of the four aspects of creation—viz. the origin, the development, the expansion and growth, and the conclusion respectively. They also respectively represent the four states of existence of consciousness—viz. the Jagrat or waking state, Swapna or dreaming state, Sushupta or deep sleep state, and Turiya or post-Sushupta state. This latter concept is explained below.]

The supreme transcendental Atma or the cosmic Consciousness, also known as 'Brahm' and represented by the word OM, has so-called four states of existence—viz. (a) The waking state of consciousness called 'Jagrat' (or Vishwa), (b) the dream state of consciousness called 'Swapna' (or Taijasa), (c) the deep sleep state of consciousness called 'Pragna', and (d) the 'Turiya' state of consciousness which is synonymous with the supreme blissful state of consciousness called 'pure Brahm', and which is beyond the earlier three states of existence of consciousness.

To begin with, the 1st state of consciousness, called the 'First Paad' or the first leg of the conscious Atma, is being described here in this verse as follows—

During the waking state of consciousness, the entire manifest gross world is the Atma's play-ground. The consciousness is spread in all the directions of the gross world because during this waking state of its existence it is aware of the entire length and breath of this world and all its happenings. Since this world is gross, the Atma during this waking state also becomes gross in nature because of its association with this gross world. The Atma assumes the basic gross character of this world as it is invariably influenced by the gross nature of its surrounding habitat with which it has to keep constant contact. During the Jagrat state, the Atma of the creature interacts with the physical gross world in which the creature lives. The Atma keeps company with the material sense objects of this world through the sense organs of the body of the creature. This contact is bound to have its influence upon the Atma, and since the world is gross and artificial, since it is dominated by the three Gunas (Sata, Raja and Tama) in varying proportions, as well as by Maya (delusions) along with its own array of problems, it follows that this influence is not positive at all, it is not conducive to the Atma's welfare and peace. Such is the influence of the Jagrat state that the Atma becomes restless and agitated; it forgets that its primary nature is one of being eternally peaceful and rested. In brief, the Atma acquires some degree of grossness and a tainted character so typical of this world.

From another angle this concept can be understood as follows—the conscious Atma, which essentially has no form and attributes, manifests its self in the form of the visible world, and resides in all the forms that this world takes. This is because Atma and Brahm are synonymous, and it is Brahm that is revealed in the form of the world. That is, all the living creatures of the world have the same Atma or pure consciousness in them. In other words, the Atma assumes the gross body of all the living beings, and it is with these bodies that the Atma of the individual interacts with the world of material sense objects. The Atma becomes aware of the presence of the various sense objects of the world by the medium of the sense organs of the gross body. These organs help the Atma to perceive the world and respond to it. That is why they are called organs of perception and organs of action of the Atma. The Atma is linked to the world through the sense organs that collectively make up the gross body of the creature.

Hence, during the Jagrat or waking state of consciousness, the Atma has spread its tentacles in the external material world and its sense objects which are primarily gross in nature. It lives in this world just like it lives inside the body of the individual creature. Therefore, the gross world becomes its de-facto body while the Atma exists in the Jagrat (waking) state. It begins to identify its self with the gross body (and forgets that it is most sublime and subtle in nature, and is the invisible consciousness that has no form). During the Jagrat state, the Atma is not only aware of the gross world but relates to it very intimately.

Hence, it is metaphorically said that the seven worlds² are the Atma's gross body during the Jagrat or waking state of consciousness—it physically lives in them, it mentally and emotionally relates to them, it is involved in them, and it is attached to them. During the Jagrat state, the Atma thinks that the external world is all that there is to it in existence, that the truth about which the scriptures speak is the external physical world with which it physically interacts during this state. But the deluded Atma forgets that the scriptures also speak that this world is an imagination of the mind because it has its origin in the mental wish of the supreme Creator to create something, that therefore it is artificial, deceptive, deluding and entrapping by its inherent nature. It becomes difficult for the Atma to realise the truth of this conclusion of the scriptures as it physically interacts with the gross world and feels its present in tangible terms. Therefore, the Atma takes to this world like fish to water, not realizing that this plunge would land it in a grave bog of slush and quicksand. Therefore, the otherwise immaculate and untainted Atma, which is regarded as the pure consciousness personified, becomes tainted and corrupted by all the characteristic negativities, unholy influences and demeaning qualities typical of this world.

[The seven worlds represent all forms of the living creation, and all forms of creatures that live in them. Hence, they symbolically refer to all forms of life where the Atma or the pure consciousness is aware of the existence of the external gross world—even in a rudimentary form.]

The Atma uses its nineteen symbolic 'mouths'³ to eagerly devour or passionately taste and imbibe the sweetness of the external world and the numerous comforts and pleasures it has to offer.

[Even as a man uses his mouth to partake delicious eatables, this Atma uses its so-called mouths to 'taste or sample' the extraordinary charms and juicy succulence of the external world, its material comforts and the pleasures of the sense objects. And just like the man gets addicted to some tasty eatable, the Atma gets hooked to the world and its charms. It then goes out to hammer and tong to grasp the world and 'devour it' in a symbolic manner by remaining engrossed in it and thinking of nothing

else but this world like a hungry man let loose on a dining table. The Atma gets hooked to the world and its material sense objects. Rather, the world attaches itself to the Atma like the leech which sucks the blood of wisdom, erudition, rationality, enlightenment and truthfulness out of the Atma, making the latter lose its pristine pure, uncorrupted and blissful nature. The Atma acts like a greedy bee that hops from flower to flower sucking a bit of nectar from this and a bit from that. It also behaves like a greedy bird that hops from one fruit to another on a tree, nibbling a bit of all of them till the end of the day, resulting in destroying all the fruits, littering the ground under the tree, but still remaining unsatisfied, and feeling tired at the end of the day.]

That supreme and sovereign entity which enjoys this gross world and is aware of its existence is called 'Vaishwanar'⁴. This is the supreme Brahm's first Paad or aspect. It is also the first form or state of existence of the Atma. (5).

[Note—¹The *four Paads of Brahm* is a subject of discussion, exposition and elucidation in a number of Upanishads. These four Paads of Brahm have been explained in (i) Sam Veda's Chandogya Upanishad, Canto 3, section 18, verse nos. 2-6, Canto 4, Section 5, verse no. 2, Canto 4, Section 6, verse no. 3, Canto 4, Section 7, verse no. 3, and Canto 4, Section 8, verse no. 3. (ii) Krishna Yajur Veda's Brahm Upanishad, verse no. 1. (iii) Atharva Veda's Mandukya Upanishad, verse nos. 3-7; Nrisingh Tapini Upanishad, Canto 4, verse nos. 4-7; Tripadvibhut Maha-Narayan Upanishad, Canto 1, paragraph 5; Canto 4, paragraph nos. 2-3, 6; Canto 8, paragraph no. 4; Ram Uttar Tapini Upanishad, Canto 3, verse no. 5-8; Par Brahm Upanishad, verse no. 5; Narad Parivrajak Upanishad, Canto 8, verse nos. 9-19.

²The *seven subtle forms of the world* are represented by the seven words pronounced by Brahma, the creator, at the time of creation. They are the following—Bhu (भूः), Bhuvaha (भुवः), Swaha (स्वः), Maha (महः), Janaha (जनः), Tapaha (तपः), Satyamaha (सत्यमः).

According to Brahmaand Puran (BP) and Vaaman Puran (VP) there are the following lokas— 'Bhu' (भूः) or earth [BP-3,4,2-18]; 'Bhuvaha' (भुवः) or the space between the earth and the heaven [BP-3,4,2-19]; 'Swaha' (स्वः) or the heavens known as Brahma's abode; the space beyond the earth's atmosphere; cosmic wind represented by the solar wind blows here [BP-3,4,2-20]; 'Maha' (महः) or the world created by Brahma pronouncing the divine word Maha meaning the great heaven or the outer space; it is believed that great sages and seers stay here; it is 1000 Yojans or appx. 8000 miles away from the Swaha Loka [BP-3,4,2-21; VP-52,21-22]; 'Janaha' (जनः), so called because it was to be inhabited by the humans and the cows [BP-3,4,2-22; VP-52, 22]; 'Tapaha' (तपः) or the Loka where great amount of austerity and penances are done; it is said to be 60 million Yojans or appx. 60 x 8 million miles away from the Janaha Loka [BP-3,4,2-24; VP-52, 23]; and 'Satyam' (सत्यम्) or the truthful heaven where the supreme Lord has his abode; it is 300 million Yojans or appx. 300 x 8 million miles beyond the Tapaha Loka [BP-3,4,2-25; VP-52, 24].

According to some legends, the distances of various mythological Lokas from the earth or Bhu Loka is as follows—the Bhuvha Loka is situated at a distance of 25 Lakh Yojans from earth, the Swaha Loka is situated at a distance of 50 Lakh Yojans from earth, the Maharloka is situated at a distance of 1 Crore Yojans from earth, the Jana Loka is situated at a distance of 2 Crore Yojans from earth, the Tapa Loka is situated at a distance of 4 Crore Yojans from earth, and the Satya Loka is situated at a distance of 8 Crore Yojans from earth.

1 Yojan = a distance of 4, 8 and 16 miles according to different calculations. It is usually taken to be equivalent to 8 miles.

1 Lakh = one hundred thousand (1,00,000). 1 Crore = ten Lakhs (10 x 1,00,000).

The seven Bhuvans or Lokas according to the Vedantic view are the following:-- the seven organs of perception situated in the region of the head —viz. the two eyes +

two ears + two nostrils + one tongue/mouth = seven. Refer *Mundak Upanishad* of Atharva Veda, Canto 2, section 1, verse no. 8.

The *Nrisingh Purvatapini Upanishad* of the Atharva Veda tradition, in its Canto 4, verse no. 4 also refers to these seven Lokas as being a part of the first Paad or leg or limb or aspect or facet of the cosmic Brahm.

³The *nineteen symbolic mouths* of the Atma are the different organs, both gross and the subtle through which it interacts with the external world and recognizes it at all. These are as follows—(a) the five organs of perception such as eye, nose, ear, tongue and skin; (b) the five organs of action such as the hand, leg, mouth, anus/excretory and genitals; (c) the five Prans or the vital winds such as the main Pran which controls the very life of the creature and all other functions including the other Prans or vital winds, the Apaana which controls digestion and excretion, the Samaana which helps in distribution of nourishment and blood equally throughout the body, the Vyaana which control the activities of other winds and helps in maintaining pressure and balance in the body, and the Udaana which controls the power to rise and move around; and (d) the four ‘Antaha-karans’ are the four sheaths that surround the Atma and form its subtle forms; these are the food sheath, the vital air sheath, the mental sheath and the intellectual sheath. [According to the Shaarirak Upanishad of the Krishna Yajur Veda, verse no. 4, the four aspects of the ‘Antahakaran’ (the inner-self consisting of the subtle body; the conscience; the sub-conscious) consists of the following four units—viz. the Mana (mind), the Buddhi (intellect), the Chitta (the faculty of reasoning, thought, understanding, attention, the sub-conscious etc.), and Ahankar (ego, pride, haughtiness and the accompanying arrogance and hypocrisy; lack of humility, simplicity and piety).]

These are called the so-called ‘mouths’ of the soul because it is through them that the soul partakes of this world. The entity whose gross body enjoys and experiences this world is called the ‘Viraat’ at the macrocosmic level and ‘Vishwa’ at the microcosmic level. This is the 1st step to understand the supreme Soul called ‘Parmeshwar’ or the supreme Lord known as Brahm.

⁴*Vaishwanar Atma*—References: (a) Krishna Yajur Veda’s Brahmo-panishad, verse no. 21; Pran Agnihotra Upanishad, verse no. 15. (b) Atharva Veda’s Mandukya Upanishad, verse no. 3.

The term *Vaishwanar* in simple words means the form of Brahm that is as large and as vast as the universe, enclosing it from all sides like a moat of a fort, and even existing beyond it. This all-inclusive, all-pervading and all-encompassing macrocosmic form of Brahm is the ‘Vishwa’ or the world because this world is a manifestation of Brahm, it is Brahm revealed in its myriad and diverse forms, and it is the glory of Brahm on display. If fact, if one wishes to witness Brahm, he must observe Brahm at play in this world itself. The physical aspect of Brahm in the form of the visible world is equivalent to the Jagrat state of consciousness because it is in this state that the creature sees the world. Here the word ‘creature’ refers to his Atma or soul which is pure consciousness and his true self. This Atma is called Vaishwanar because, like Brahm, it is manifested as all forms of life in this world. [Refer Mandukya Upanishad of Atharva Veda, verse no. 3.]

The Atma is called a Vaishwanar because the man becomes aware of the world when he sees it with his own eyes. This is why it is called the ‘waking’ state of consciousness. The presence of the consciousness known as the Vaishwanar in the eye is a metaphor for this waking state because when a man ‘sees’ anything only when he is awake and not while he sleeps.

The word ‘Vaishwanar’ has many connotations as follows—(i) The fire used in sacrificial rituals. (ii) The microcosmic pure consciousness that resides inside the body of the creature and helps it to digest food. (iii) Vedanta says that it is the pure consciousness that is a fraction of the Supreme Consciousness, and it resides in the body of the creature even as the Supreme Consciousness resides in the macrocosmic vast body of Nature or creation. It is representative of the supreme, transcendental

entity that is the Lord and the primary cause and the governing authority of the whole creation. (iv) Since creatures have myriad forms, it has as many forms as the creatures themselves, incorporating all of them in it. Hence, it is also called 'Viraat Purush' (which means the vast, colossus, all incorporating, all-pervading, almighty form of the microcosmic Atma of the creature as well as the macrocosmic Atma of the creation; it is measureless, infinite and eternal). This is the subtle form of 'Vaishwanar'. (v) The gross manifestation of this 'Vaishwanar' is the 'Annamaya Kosh' or the food sheath which is one of the five sheaths enclosing the Atma of the creature. (vi) Its state of existence is defined as the 'waking state of consciousness'. (vii) The word also means—relating to or belonging to all men, omnipresent, known and worshipped everywhere, universal, general, common, complete, immutable, full in number, a collective noun for all the Gods, one who is all commanding and almighty.

In verse no. 1 it has been said the *Laxman* is equivalent to the Jagrat state of consciousness. Now let us examine the similarity between Laxman and this state. Laxman is an incarnation of the Seshnath, the legendary serpent who holds the world on its hood. Hence Laxman is the bearer of the world, and therefore called the Vaishwanar. By extension he also holds the seven worlds; their very existence depends upon them being supported by the Seshnath or Laxman—hence, these seven worlds are like part of his vast macrocosmic body.

He is always vigilant and alert, ever ready to serve Lord Ram and take care of his needs; he is well aware of the happenings in this world, and the Lord is made aware of them through Laxman—hence he represents awareness of the external world by the Atma, and therefore symbolizes the Jagrat state or the waking state of consciousness. Laxman is well versed in all the spheres of knowledge which is said to have nineteen branches, hence he has nineteen mouths which imply that he has the ability to learn and teach others all these nineteen branches of knowledge. They are the following—the four Vedas such as Rik/Rig, Sam, Yajur and Atharva, the five sub-Vedas such as Aurveda (knowledge of herbal medicines), Dhanurveda (the science of warfare and archery), Gandharva-veda (the skills of music and dance), Artha-shastra (economics and public administration) and Darshan-shastra (philosophy), Purans and Itihasas (ancient mythological histories), Dharm-shastras (various scriptures), Nyaya (law; jurisprudence), Mimamsa (investigation, analysis and determination), , Vyakaran (grammar), Jyotish (astronomy and astrology based on mathematics), Chanda (poetry and prose), Kalpa (rituals associated with formal worship and fire sacrifices), Shiksha (education) and Nirukta (commentaries or exposition on the Vedas).

The word 'Laxman' means 'one who can see'—this is because this brother of Lord Ram can 'see' this world in its actual form, in its truthful shape, and is well-versed in all the knowledge pertaining to this creation that has taken a visible form. This means two things—one, that Laxman was well aware of the falsehood of this physical external world of sense objects, and was therefore never attracted to them. He rather preferred to serve Lord Ram with full devotion as he knew the truth of who he actually was—that Lord Ram was none else but the Supreme Being himself personified.

The second interpretation is that Laxman was the eye and ear of Lord Ram; it was Laxman who guarded the Lord from all enemies and predators while the Lord slept in his hut during his forest sojourn; it was Laxman who accompanied the Lord to the forest to act as his bodyguard and caretaker, always vigilant and careful in his duties as the Lord's watchman and lookout. It was Laxman who acted as the symbolic sense organ of perception of the Supreme Being manifested as Lord Ram during his journey through this material world of gross objects. Just like the case of the Atma that uses the sense organs of the body to reconnoitre the world and interact with it, Ram used Laxman in all his dealings with the world. The Lord's dependence upon Laxman is highlighted on numerous occasions in the epic story of Ramayana, such as for

example when Sita was stolen, it was Laxman who had encouraged Ram to make efforts to find her instead of getting depressed and dejected at this loss. Even a cursory reading of the epic would make it clear that if there was no Laxman accompanying Lord Ram, then perhaps the Lord would not have been able either to kill Ravana and retrieve Sita or even return safely back to his kingdom after the harrowing events during his forest exile.

The idea of Laxman being an equivalent of the Jagrat state of the Atma fits in well with all the events of the epic story if interpreted with metaphysical perspective. For instance, Laxman is described as getting angry quickly—this is in consonance with the practical experience we all have in this world. When a man interacts with the world, he is bound to face certain instances when he loses his cool and gets angry, because everything cannot be according to one's wishes or expectations. Hence, the character of Laxman fits in well with the state of the Atma or the Jiva during the waking state of consciousness.

Again, in the forest when Lord Ram slept peacefully inside his hermitage, Laxman guarded the outside, and it is believed that he did not sleep a wink during the fourteen long years of exile. Similarly, the Atma remains ensconced comfortably inside the gross body of the Jiva (living being), while the sense organs are the ones that reconnoiter the world outside and keep an eye on the affairs of the physical world on behalf of the Jiva.

Being an incarnation of the Seshnath, the cosmic serpent on whose coiled body Lord Vishnu reclines in the cosmic ocean known as Kshirsagar, Laxman symbolically devours the entire creation by the fierce fire spewing from his mouth at the time of dooms-day. Hence, he is called 'Sankarshan'. Perhaps this is the reason why Laxman had accompanied the Lord to the forest to ensure that the evil demons were eliminated from earth.]

6. The 2nd state of existence of the Atma, the pure consciousness, is called the 'Swapna state' of existence, or the dreaming state. The imaginary world that is visualized by the latent 'Vasanas' (passions, desires and yearnings) that are inherently present in the sub-conscious of the creature is called a 'dream'. This is an imaginary world inspired by the Vasanas present in the bosom of the creature.

During this state, the man is virtually lying unconscious and completely inactive in the physical sense as his gross physical body is completely inactive and lying like a log of wood. He lies on the ground as if he had no life in him, and was like a dead man as far as his external activities pertaining to his gross body and its organs are concerned. But during this state of existence known as Swapna (dreaming), the mind remains very much active though the external gross body and its sense organs are completely inactive. During this state, the mind, accompanied by the sub-conscious, is as active as it was during the Jagrat (waking) state, the only difference being in the level of its activity. So, while in the Jagrat state its activity pertained to the gross world, during the Swapna state this activity is happening in a subtle level. A man dreams because the mind and the sub-conscious conjure up a most fascinating world in which the Atma lives during this phase of existence. To a great extent, the capacity of the mind to 'imagine and fly' is fully unleashed and tapped in one's dreams as opposed to the physical world while the man was awake—because while the latter phase presents many physical barriers of practical nature, none such obstacles are there in one's dreams. In some senses, the world of dreams is fancier and more charming than that of the physical world of the waking state simply because in this subtle state of existence the mind is given wings to imagine and fly according to its wishes without having to cope with any limitations of the physical gross world. [For instance, a man cannot fly in practical terms when he is awake, or he cannot

physically jump from a tall building without aid and survive as this would be nothing less than a suicidal jump, he can indeed attempt such feats while dreaming. In fact, the full potentials of the mind and the sub-conscious are unlocked during the dreaming phase—as is proved occasionally when insurmountable problems of daily life face by a harried man find their solutions when he sleeps, leading him to wake up with answers to the same problems that had defied all attempts to solve them earlier.]

It is the mind that imagines, and not the gross body. Therefore, during the Swapna or dreaming state of existence of consciousness, the Atma is very much active and aware of the happenings around it, but instead of them being related to the gross plane of existence they are now confined to an imaginary world conceived in a 'dream'. Hence, 'dream' or the Swapna state of existence of the consciousness is synonymous with that which is an 'imaginary' conception of the mind without any physical gross dimension. It is something that has no real physical existence and pith. In other words, the Atma or the consciousness exists in its 'Sukshma' or the subtle form now in the dreaming state.

For all practical purposes, the Atma (or the creature's 'self' or his consciousness) interacts with this imaginary world of dreams during the 'Swapna' state of existence in the same way as it had been doing in the gross world while it was awake during the waking state called 'Jagrat'. That is, even during a dream, as long as it lasts, the Atma thinks that it is actually interacting with all the participants of that dream; it weeps, it laughs, it plays and it talks with them all as if they were alive and for real in the virtual world. For this purpose, the Atma uses its 'virtual' nineteen organs or mouths as it had been doing while it was interacting with the physical gross world while awake, though now they are in their 'subtle forms' instead of their gross forms.

Therefore, even in the dream state of existence of the Atma, there are seven worlds and nineteen mouths, though they exist in a subtle form, and not in their gross forms. The Atma lives in this subtle world of dreams, is an integral part of it, identifies its self with it, is influenced by it and is as involved and attached to its components in the same way as it did during the waking state.

That Atma which exists in this subtle form, that Atma which exists in the subtle world, and that Atma which uses the subtle organs to interact with this subtle world, is called 'Taijas'. This Taijas is the microcosmic subtle form of the Atma which has its counterpart at the macrocosmic level of creation in the 'Hiranyagarbha'. The latter therefore is the macrocosmic subtle aspect of the cosmic Consciousness very much like the Taijas is at the microcosmic level.

The Taijas has all the constituent parts of the 1st step or stage (called the 'Vishwa') as described in the preceding verse, but instead of being gross by the virtue of its association with the external gross world of material sense objects it now is in a subtle form as it is associated with a subtle world. Instead of being in contact with the deluding outside world involving its gross organs of action and perception, it is now more subtle in nature being based on the mind and its capacity to imagine and fly. [But it must nevertheless be noted that the Atma, the pure consciousness, still does not find pure peace and happiness as it is still buffeted by waves of emotions and the influence of Vasanas in the subtle level of its existence during the dreaming state of its existence as much as it was distracted and influenced by the physical world during the waking state. The only obvious difference is that during the dreaming state there is no physical barriers and limitations that are natural to the gross body and the gross physical world which has limited the stupendous potentials of the Atma. As compared to the physical gross body, the subtle mind has stupendous powers and potentials—

the mind can fly and imagine things that were simply incredulous to even speak of during the waking state of the body, thereby lending the Atma with equal potentials to imagine and reach those realms where it could not ever hope to do while awake. In brief, the Swapna is called 'subtle' as it gives 'wings to the Atma' and enables it to perform deeds that it was unable to in the Jagrat state. The physical world that exists during the waking state imposes certain inhibitions on the Atma, but all such fetters are removed while it dreams, and therefore it can do unimaginable things during its dream which would be unthinkable for it to do during its interaction with the world while in its waking state of existence.

During the Swapna or dreaming state of existence, the external stimuli from the outside world cease to affect the mind, but the latent and inherent tendencies, called the various 'Vasanas', create an imaginary world of perceptions and actions which are far more colourful than the actual world of the waking state, and which form an independent world of their own, called the world of dreams. This state of the Atma is not gross like the 1st stage, but it is a subtle state of existence of the consciousness, the state known as the Taijas state.

The word 'Taijas' is derived from the root 'Tej' meaning 'energetic, fast, dynamic, agile, full of vigour and vitality'. It is obvious from the above discussion that the Atma does indeed possess these potentials during the dreaming state of its existence. The word 'Taijas' also refers to light and its illumination. Hence, the Atma in this state is illuminated by the virtue of its inherent ability to create something from nothing—i.e. to 'dream' of things that do not have any substance and then be convinced that this imaginary world is truthful.] (6).

[Note—This Swapna or dreaming state of consciousness is equivalent to the second Paad or limb or aspect of Brahm. It is represented by *Shatrughan*, the second brother of Lord Ram. Refer verse no. 1 of this Canto 3. Shatrughan is an incarnation of Pradumna, the personified form of Kaam, the patron deity of passion and yearnings or Vasanas. The Vasanas reside in the heart of a creature, hence Shatrughan lives in the heart of all the creatures as their inherent desires and passions to overcome all hurdles and obtain their objective. The word 'Shatrughan' means 'one who crushes all enemies'—i.e. the Atma is able to overcome all restrictions imposed by the gross physical world in order to reach its target determined by the Vasanas during the dreaming state.

Since during the Swapna state of existence only Mana, i.e. the sub-conscious aspect of the mind and the subtle aspect of the heart, are active while the gross body sleeps or is absent, and that this Mana acts silently without any outwardly show of action, Shatrughan too lived a silent life and worked behind the curtain by carrying on with his assigned job of taking care of the daily affairs of the kingdom while Lord Ram was in the forest, and even later on after the Lord's return. The Ramayan, the epic story of Ram, has only few references to Shatrughan while it copiously praises Laxman for taking an active part in the deeds done by Lord Ram, especially the main purpose of overcoming the demons, and Bharat for his unwavering and untainted devotion for the Lord. The role of Shatrughan is of immense importance if one were to ponder who ran the kingdom while the Lord was away in the forest and also when he returned and was crowned. The nitty-gritty of administration of the vast empire was the responsibility of Shatrughan, but since he represented the 'Swapna' state of the cosmic Consciousness he preferred to word quietly and subtly behind the curtains instead of attempting to hog the limelight.

Since he resides in the Mana, he is aware of the inner thoughts of all the creatures and is the patron deity of the Mana. He represents that aspect of the supreme Brahm that enables the Lord to know the inner thoughts of all living beings as well as to control these thoughts.

Just the physical world is borne by Laxman in his primary form of Seshnath, the subtle world is borne by Shatrughan in his primary form as Pradumna or Kaam (in the form of Vasanas—inherent desires, yearnings and passions hidden in a man's inner self).

The deity who is the patron of the subtle world would also be responsible for its upkeep, and would also enjoy the things of this subtle world. Hence, the subtle aspects of the seven worlds as described in note of verse no. 5 have Shatrughan as their patron deity and sustainer. Shatrughan interacts with them by employing the subtle aspects of the nineteen entities, called metaphorically as the 'nineteen mouths', as described for Laxman in note of verse no. 5.

Since Praduman is another form of Kaam-deo (cupid), the deity of love and passions, he is deemed to be very charming, handsome and attractive—or he has a radiance of charm, majesty and glory effusing out of him in the form of Taijas (glow, radiance, light, illumination, halo).]

7. The 'sleeping state' during which the person does not desire/wish to enjoy any of the objects of this materialistic world and is neither conscious of their existence, a state when he does not even dream of any imaginary non-existent world—such a state of existence of consciousness is called 'Sushupta' or the deep sleep state of consciousness. This state is beyond the dream state, and is the third state in the hierarchy of existences in which the Atma or the pure consciousness lives. It corresponds to the third Paad or limb or aspect of the supreme Brahm who is the cosmic Consciousness personified.

Where the gross organs of the gross body represented by the organs of perception (eye, nose, ear, tongue and skin) and action (hand, leg, mouth, genitals and excretory), as well as the subtle organ represented by the mind, the sub-conscious and the intellect have become defunct or stand eliminated, that eclectic state of existence of the consciousness is called Sushupta.

The body which houses this state of the Atma is called the 'causal body'. It is so-called because the Atma or pure consciousness that lives in this state is the entity that is the 'cause' of the creation of both the world of dreams in the Swapna state as well as the world of material sense objects during the Jagrat state. During this Sushupta state of consciousness, the entire world, both the real as well as the imaginary, coalesce and merge into nothingness or non-being. They are now most quietly and imperceptibly shrunk into the entity that was the 'cause' of their existence at all in the first place. That is why it is called the 'causal' body.

The wise entity that was empowered with the knowledge that enabled it to create something and then sustain it is called 'Pragya'. It lives in this causal body. This Pragya is none other than the Atma or the pure consciousness, also called the 'true self' of the creature. This Atma of the individual is the microcosmic counterpart of the cosmic Atma of creation. At the individual level of the creature, it is called 'Pragya', while the same entity in its macrocosmic level is called 'Ishwar'—or the supreme Lord. It is 'Lord' as it is the central Authority that not only determines the existence of both the worlds—the Swapna as well as the Jagrat—but presides over them, enjoys what they have to offer or suffers from them, and then decides when to get rid of them.

This state of Sushupta is indicative of the dissolution of creation as nothing then remains. Then two options are available—either the Atma reverts back to the earlier two states of existence, or proceed ahead to the fourth state of Turiya which is actually a permanent state of Sushupta.

The entity living in the causal body and known as Pragya is one of its kinds; it has no duality and no parallels. It is an image of eternal bliss, beatitude and felicity, and it is wise, enlightened, realised and truthful. It is this entity that enjoys this world of eternal bliss and tranquility. It is pure consciousness and enlightenment personified. These virtues are its 'mouth', i.e. it accepts anything using these virtues as its accepting organs. In other words, it judges the world using the yardstick of enlightened consciousness, and not the way the mind had been judging it previously. The mind has a tendency to 'fly' in the vast sky of imagination, while the intellect 'moves' on sound ground of logic and rationality. Wisdom and erudition weighs everything and makes the creature aware that what he believes to be real is actually false and misleading. This is the function of the enlightened Atma. Once the sun of wisdom and enlightenment dawns on the creature's spiritual horizon, he finds immense peace and tranquility because all ghosts and phantoms arising in the darkness created by delusions and ignorance are eliminated for good.

In terms of Vedanta, the causal body encloses the Atma which is surrounded by the bliss sheath. When this Atma is not disturbed by constant interference by the mind and the intellect, it remains oblivious of the outside world, and being comfortably ensconced in the bliss sheath, it remains blissful and peaceful.

This Pragya (wise, enlightened, knowledgeable, erudite and sagacious) aspect of the Atma, which is pure consciousness, is the symbolic third Paad or limb or aspect of Brahm.

[The Atma or the soul of the creature is trapped in a body having these three layers of the body that are like sheaths that surround the soul—the gross body (verse no. 5), the subtle body (verse no. 6) and the causal body (verse no. 7). As soon as these are dissolved or removed or done away with, the Atma enjoys a state of merger with the eternal Atma of the cosmos. Or in other words, the individual Atma of the creature becomes one with the Parmatma, the supreme transcendental Atma. This Parmatma is also known as the Supreme Being, the supreme Brahm, and the cosmic Consciousness in the form of the cosmic Soul of creation.] (7).

[Note—This third state of existence called Sushupta corresponds to *Bharat*, the third brother of Ram. Refer verse no. 2 of this Canto 3. He epitomizes the virtues of devotion, faith, humility, probity, propriety, righteousness and conscientiousness, besides total detachment towards the material charms of the material world. He also exemplifies the virtues of Vairagya (renunciation, detachment, non-involvement with the material world and the charms of its sense objects), Yoga (meditation and concentration of one's faculties on the objective selected) and Tapa (sufferance, austerity, penance, self-control etc. for some great cause).

Hence he shows what is needed if one is to achieve the goal of reaching the Lord—i.e. he shows by example the virtues one must inculcate to obtain Mukti and Mokha. Therefore he is called the 'Paad' or limb of Lord Ram who is Brahm personified. He is the 'third Paad' (limb) as the minimum number of legs required for anything, such as a stool, to be stabilized is 'three'. In other words, if a spiritual aspirant desires to be established in his spiritual path he must follow the example of Bharat and inculcate the noble virtues which the latter implemented in his life.

Where the gross organs represented by the organs of perception and action of the gross body, as well as the subtle organ represented by the mind and the intellect have become defunct or stand eliminated, this state of existence of the consciousness is called the Sushupta. During this state the person does not have any desire for enjoying the material objects of the external gross world nor of the subtle world that exists in one's dreams. That is, he is completely in a state of Vairagya or renunciation—this is how Bharat lived in the middle of pomp and pelf of a flourishing kingdom. Hence he corresponds to the third state of Sushupta.

He is not at all moved by the ups and downs of administering a vast kingdom, remaining focused on meditation and contemplation. Hence he remains perpetually blissful and happy—the characteristic feature of the Sushupta state.

He is an incarnation of Aniruddha because he enjoys uninterrupted bliss and continuous meditation. The word ‘Aniruddha’ means ‘without any obstacles; unhindered and unstopped’.

Since he was most wise and thoughtful, he personified the Pragya aspect of the Atma in the third state of its existence.]

8. The supreme Atma or Consciousness that exists beyond the third state of Sushupta, i.e. that state of consciousness which transcends the earlier three states related to this world, is said to be the fourth Paad or aspect of Brahm. It is called the Turiya state.

The Atma that exists in this fourth state called the Turiya or transcendental state is the one that is said to be the creator or progenitor of the other three states. [When the pure consciousness decides that it wishes to interact with the world, it would have to retrace the path followed by it to reach this higher spiritual state of Turiya—i.e. it would have to pass through all the three stages mentioned in verse no. 5-7. But if it decides to get rid of the world and find eternal peace, it will not do so. Then in such a case, the person who has reached this fourth state of consciousness, called the Turiya, would remain in this world like other men do, but would be a totally changed and transformed man—he would be totally immune to this world and its charms and temptations, as well as its pains, miseries and sufferings. He would seem to be awake and going about his normal duties, but internally he would be in the state of deep sleep, not at all being aware of or interested in what the body, both its gross components as well as its subtle components, do. He would be virtually ‘sleep walking’ as far as the world is concerned. All the characteristics that are enumerated below in this verse are of the Turiya state of consciousness.]

The Atma in this Turiya or fourth state of existence is called the ‘Parmatma’ or the supreme Atma—for now it is not an ordinary Atma of the creature that is affected by the deluding influences of the world, but beyond such considerations. It is also known as the ‘Ishwar’ or the Lord of the creation—for now it has reached the state when it no longer relates its self with the mundane world of material sense objects, it does not wish its comforts and pleasures, but has risen high up to occupy a much exalted stature that makes it ‘superior’ to all the rest in creation. Such a high Atma is Parmatma and it is also the Ishwar or Lord of creation. It is called ‘Ishwar’ because it is the undisputed Lord of all that exists. It is this Atma that has not only created everything but also enjoys them and eliminates them should it want to do so. In other words, if a wise man so wishes and is firmly determined, then he can easily forgo the attractions of the world in a moment by just making a firm decision that he is not interested in them. This world exists only because the Atma, or the consciousness which is the ‘true self’ of a creature, wishes it to exist.

[According to Vedanta, Ishwar represents the sum-total of all the causal bodies in this creation. This is because Ishwar is the ‘cause’ of coming into being of whatever that exists in this creation. Anything, no matter how inconsequential and miniscule, that has an existence owes its presence to the Ishwar. It is like the case of line or any other figure drawn on a piece of paper. Its origin is in the first ‘dot’ that was formed when the tip of the pen had first touched the paper. The line or the figure is merely an extension of this dot. If the line is retracted and seeks its original point it will come back to this dot. If there is no dot, the line cannot be drawn. Similarly, everything in this world has its origin in this single ‘Ishwar’, and the rest is simply an extension of this Ishwar.]

The supreme macrocosmic Atma, the cosmic Consciousness, is the Soul or essence or the Tattwa of creation, and like its counterpart present in the causal body of the individual creature, it is also Pragya—i.e. it is wise, enlightened, awake, conscious, realised, intelligent, sagacious and erudite.

This Parmatma is all-knowing and omniscient as it lives inside the secret inner chambers of the creation in the form of the Atma of all the creatures. Being an ‘insider’, he knows everything; he is privy to the inner thoughts and ideas of the mind, the sub-conscious and the intellect of the creature; nothing is hidden or out of sight of him.

Being a resident inside the bosom of all the creatures in the form of their Atma, and being all-pervading, immanent and omnipresent by the virtue of it being the most subtle and sublime entity known as ‘consciousness’ in creation, this Parmatma is known as ‘Antaryaami’—one who lives inside everything and knows even that which is not known to the outside world.

Parmatma or the cosmic Atma is the cause of everything in existence—hence it is the ‘supreme Creator’. It is this Atma that is the origin of all the Bhuts (elements), their sustenance and growth, and their final resting place. [This can be easily visualized by a simple illustration. When we wish to draw any figure on paper—say a line or a circle, we use a pencil or pen which makes a ‘dot’ at the spot where it first touches the paper. This ‘dot’ is then virtually stretched in all imaginable directions on the surface of the paper to make the desired shapes visualized by the mind—whether it is a circle or a triangle. If we retrace the lines the way they were drawn, we come back to the original dot. This symbolically depicts the way the creation is regressed.]

Since the Parmatma (Supreme Being) is ‘consciousness’ itself personified, it follows that he does not need any other thing to be the cause of his own origin—simply because it is ‘consciousness’ that makes ‘life’ possible in creation, it is ‘consciousness’ that magically transforms a lifeless gross body into an active and vigorous creature. If ‘consciousness’ is removed from this world, the latter would be absolutely worthless and lifeless. Left to its own accord, this world would not be able to remain alive or revive its self in case ‘consciousness’ decides to abandon it. This quintessential factor of life in this creation is known as the ‘Atma’.

The cosmic Atma or the cosmic Consciousness is a complete neutral entity and characterized by paradoxes. For instance, it is neither introvert nor extrovert. It is an embodiment and a fount of wisdom, erudition, enlightenment, sagacity and knowledge on the one hand, but ironically the same Atma appears to exhibit the opposite virtues by allowing its self to be accompanied or engulfed by Maya (delusions) that has helped this Atma to create the world of artificiality and entrapments.

This cosmic Atma is all-knowing as well as ignorant. It is omniscient on the one hand, but remains indifferent and neutral to all forms of knowledge on the other hand. It remains merely a mute spectator, a mere witness and a neutral observer of all that is happening around it, giving the impression that it is gross, blockhead, ignorant and dumb. Its neutral and dispassionate state is often misinterpreted in this wrong way. The neutrality of the Atma is due to the fact that it is renunciation and dispassion personified; it remains indifferent to all delusions and hallucinations that are the hallmarks of this creation. But since it has to remain in this world, it appears to be influenced by all the taints and shortcomings that characterize this world.

This state of the Atma whereby it appears to exhibit dual characteristics which lead to confusions about its truthful form and nature as a sublime and subtle entity that is free from all grossness and delusions is known as the Jagrat as well as the

Swapna states of consciousness depending upon the level of grossness or subtlety exhibited by the Atma respectively. This happens because during both these two states of existence, the Atma appears to be involved headon in the affairs of the world, whether this involvement is at the physical level of the gross world as it happens during the Jagrat state, or at the subtle level as it happens during the Swapna state.

The same Consciousness is uniformly and universally present in all the creatures of creation as their Atma, and in fact the entire creation is nothing but its image, but still each individual creature is unique and different from the other. Many factors that are extraneous to the Atma—such as the characteristic attributes of the gross body, the presence of the various Gunas in different and varying proportions, the level of mental and intellectual development, the Vasanas and Vrittis (inbuilt desires and passions, as well as natural tendencies and inclinations) that an individual possesses—go collectively to make an individual unique inspite of the same Atma living in them. [A person fights others as if they were different from his own self, and there is so much diversity and dichotomy in creation that it becomes impossible to reconcile what is said in the Upanishads and what is actually observed in the practical world.]

The Atma is said to be almighty so much so that its mere wish can create and destroy the world, but ironically it requires the aid of the ‘Shakti’ or energy and power and dynamism of Nature to do anything at all. [This is best understood by the story of Ramayana itself. Lord Ram was Brahm personified, and therefore he should have killed the demon king Ravana by mere wish, instead of having to go to Lanka to do so. Then there are versions of Ramayana, such as the Adbhut Ramayana of Valmiki and Adhyatma Ramayana of Veda Vyas which tell how it was Sita, an incarnation of Brahm’s Shakti, that had actually helped the Lord accomplish the astounding deeds that he is credited for.]

This Atma is so small and subtle as well as sublime that it cannot be heard, seen, felt, touched, smelt or held. It is not an object that can be used in the conventional sense a man uses other entities of creation.

The Atma has no attributes, qualifications and dimensions that can be quantified and measured. It has never been visibly seen or observed, it has never been practically used and experimented with, and it has never been comprehended, grasped or caught either by the mind-intellect complex or by the sense organs of perception and action.

The Atma has no specific characteristics, qualities, virtues or attributes that can be used to define and qualify it. It is such a miraculous and inexplicable entity that it cannot be incorporated as a subject that can be comprehended by deep research and ponderings. It is beyond the purview of thought, imagination, intellect and conception. [That is, this supreme entity cannot be reduced to any physical matter that can be researched and experimented in a laboratory. It cannot be made a subject to be judged by the calculating mind which has a natural tendency to reduce everything to logic and rationality.]

The Atma cannot be even indicated or represented by indirect methods, such as by the use of signs, formulas, symbolism, metaphors, similes, analogues and examples. The only holistic and comprehensive proof of its existence and truthfulness is the ethereal experience that one has upon attaining self-realisation obtained when one reaches the higher states of super conscious existence known as the state of Samadhi. It is experienced only by attained and self-realised seekers. This supreme, ethereal, divine and holy entity is completely devoid of any delusions and falsehoods, any deceit and artificiality.

The Atma cannot be comprehended as it is beyond the scope of the mind and intellect. There is nothing in existence that can be used to compare the Atma with. There is no sign that can be used to indicate anything about the Atma. The only way to know the Atma is to 'experience and witness its presence' in the form of the 'super consciousness', and other vital life-factors of existence such as the Pran (or the vital winds). [That is, if one was to search an entity known as the Atma with the help of certain characters or virtues, no matter how great and magnificent they may be, one would fail in his search. This is because the Atma is extremely subtle and sublime by nature, and it has no grossness and density whatsoever that can be perceived by the sense organs of the body, including the mind and the intellect. That is why it is said that the Atma is beyond comprehension and reach of the sense organs of the creature. However, the existence of the Atma can be experienced during higher levels of existence which are in consonance with the plane in which the Atma actually exists. It is just like the case of modern radio communication where one can listen to a particular station only when he is tuned to that frequency.]

It is absolutely calm, peaceful, serene and tranquil; it is beautiful and auspicious; it is the ultimate Truth and Reality; it is the benevolent benefactor of all and provides all auspiciousness and welfares (i.e. it is 'Shiva').

Such a unique, divine, incomprehensible and incomparable cosmic Consciousness is regarded by those who are wise and in the know of things as the 'Advaitya Brahm'. This Brahm is an eternal, majestic, powerful, sublime, fascinating, almighty and stupendously magnificent entity.

[That is, the supreme entity known as Brahm has unique and apparently paradoxical characteristics enumerated here. This makes Brahm one of its kinds, because it is impossible to duplicate them. Advaitya means non-dual. Hence the Brahm that is unique and without parallel is 'Advaitya'. The Brahm that is uniform and universal, that is irrefutably and unequivocally one, and not two, inspite of the countless forms in which it has revealed itself in this creation—is 'Advaitya'. The Brahm that is both visible as well as invisible, that is here as well as there—is known as 'Advaitya Brahm'. The Brahm that is in the present as it was in the past, and would remain the same in the future—is 'Advaitya Brahm'.]

Those who are well-versed in the essence of all spiritual and metaphysical knowledge, those who are blessed with wisdom and erudition of the highest order that has enabled them to have deep insight into the fundamental universal truth of everything in creation in its essential form, call this supreme transcendental Truth and the ultimate Reality of creation as 'Brahm' and the 'cosmic Atma' or 'Consciousness'. It is the fourth Paad or limb or step or form of Brahm.

In other words, the wisdom to understand what has been said of Brahm in this verse is the fourth and the last step to realise the truthful and essential nature of the supreme transcendental Brahm, about the Atma, about the pure consciousness that exists at both the macrocosmic as well as the microcosmic levels of creation at the same time. The fourth Paad of Brahm is the latter's cosmic transcendental form that goes beyond the gross and the ordinary level of the subtle that borders the gross level of existence. It corresponds to the higher level of existence of super consciousness that is all-pervading, all-encompassing and omnipresent, that is all-knowing and omniscient, that is almighty and supreme. [This fourth Paad is equivalent to the Turiya state of consciousness because it transcends the mundane and moribund existence of the Atma in this physical gross body that is bound to this physical gross world of material sense objects, thereby forcing the otherwise eternally free, ethereal, sublime and subtle Atma (the consciousness) to lead a trapped and deluded existence

as long as it remains confined to this gross body and attracted to the gross world. and forced to live in and interact with and .] (8).

[Note—The fourth Paad or aspect of Brahm is personified as Lord Ram. All the characteristics described in this verse are reflected in the life of Lord Ram. For instance, in the story of Ramayana we find that though Lord Ram was an incarnation of the all-knowing and omniscient Brahm but still he had searched for Sita like an ordinary man when she was abducted by Ravana, the demon king of Lanka. Though he is almighty, he had to take the help of the monkey army to conquer Lanka and retrieve Sita. Though he is Advaitya and single, he was always accompanied by Sita and one of his companions, such as his brothers, or one of the monkey or demon friends that he had made during his trip to Lanka. Though he is neutral and dispassionate, he had waited for Sita when she was kidnapped like an ordinary man who loses his dear wife.

From the metaphysical perspective, all the events in the life of Lord Ram teach a wise man how the immaculate Atma gets mired in this world if it allows itself to get involved in its mundane affairs. Even a cursory reading of the story of Ramayana would show how Lord Ram, who was none else but the Supreme Being himself, was subjected to all the experiences that a common human being goes through in the course of his life in this world simply because the Lord had allowed himself to be involved in the affairs of the physical world by assuming a gross body. When this analogy is applied to the Atma it is easy to see how and why the Atma gets sucked in the affairs of the world if it allows itself to be identified with the gross body (of the creature) in which it lives. Though the Atma of the creature is well aware that the world and all its material sense objects are false, entrapping and deluding by nature because the Atma is inherently all-knowing, wise and enlightened, but still it remains engrossed in it as if it did not know the truth. Every man knows that he would die, but still he continues to hoard wealth for the ‘future’ which might never come.

Therefore, the entanglements of the Atma in the world are its own creation. Even the Supreme Being himself had to undergo all sorts of worldly sufferings when he assumed a human form as Lord Ram, so the sufferance of the Atma by its involvement in the world is of no wonder.]

9. The true understanding of the divine nature and cosmic nature of the Atma/soul or the pure consciousness is possible with the advice and guidance given by self-realised, wise, erudite and enlightened teachers as well as ancient scriptures. It can be understood, comprehended and grasped only with the aid of an uncorrupt, unbiased and sharp mind that is analytical, rationale, intelligent and receptive.

This Atma/soul is eternally self-luminous, brilliant, radiant and splendid—i.e. it is always enlightened and wise, it is self-realised and all-knowing, it is free from ignorance and its accompanying darkness.

It is free from the tainting affects of Avidya or lack of true knowledge—i.e. the Atma, left to its own devices, would never do anything that is in-auspicious, unrighteous, unholy, improper and unscrupulous. [From the practical point of view we can regard it as the inner voice that invariably warns a person by ringing a bell inside his inner self whenever he is about to commit anything that is wrong. His ‘conscience’ would immediately object. This first objection that arises from the inner self is the voice of the Atma that resists all unrighteous deeds and thoughts. That the man overlooks them and continues nevertheless with his evil designs is the reason why the Atma—which is the man’s ‘true self’—is forced to suffer from the misdeeds done by the body and the mind. Had the man listened to his inner voice he would not only have prevented himself from much physical sufferings but would also have given his Atma true peace. But unfortunately this does not happen—because the allurements

of the physical world and the desire to gratify the sense organs of the body, the various inherent Vasanas or worldly passions and yearnings, and Vrittis or tendencies and habits that are part of his nature, and such other elements are too strong to be easily overcome.]

All actions and deeds that have their genesis in ignorance and delusions, or those which are done or inspired by ignorance and delusions due to lack of wisdom, truthful knowledge and awareness of the reality, cast their negative shadow on the otherwise immaculate nature of the Atma. [The Atma is pure consciousness that remains free from being attached to the body that actually does the deeds. When the creature comes under the influence of delusions, he thinks that his body is his true 'self' instead of the Atma. This is due to ignorance about the reality and the truth, making the creature erroneously think that it is the Atma that does the deed, whereas in fact it is the body that is actually involved in doing any deed.]

The devotee prays to and worships Lord Ram so that the Lord eliminates such negative aspects of his Atma, and removes the darkness of ignorance as well as its deluding effects that shackles the person in its vice-like grip.

The Atma (pure Consciousness; the Soul) is 'Advaitya'—i.e. it is eternally one, without a second, unique, non-dual, indivisible, immutable and peerless.

It (the Atma or consciousness) is an embodiment of supreme, absolute and universal 'Anand'—i.e. it is always in a state of bliss, happiness, peace and tranquility.

It (the Atma or consciousness) is the foundation and the resting place for all that exists.

It (the Atma or consciousness) is the only majestic authority and the supreme power in existence.

It (the Atma or consciousness) does not have any trace of the spiritual darkness created by Avidya (ignorance about the spiritual truths) and Moha (attachments and longings for this material world and the body that are accompaniments of Avidya). [The Atma is not attracted to the fascinating charms of this world, nor does it have any desire to enjoy them or hoard them because it is well aware of their perishable nature and the web of entanglements that they create in their wake. It is neither interested in the body because it is aware of its imperishable nature too. It keeps a safe distance from both the world as well as the body, both of which are gross, perishable and ensnaring by nature. The Atma is a separate entity distinguished from the gross body as well as the equally gross world, and it is merely a witness to what is happening around it. Neither does the Atma suffer from anything in this world nor does it feel happy from anything. When a wise and intelligent person understands this, he is said to have reached the 'Turiya state'—for now he lives in this world with complete detachment and indifference. This provides him with bliss so characteristic of the Turiya state. No problems of the world worry him or disturb him any longer.]

In other words, if a man comes to realise what his 'true self' is, if he understands it to be the pure Atma which is consciousness personified, hence an image of Brahm, the cosmic Consciousness, all darkness in the form of Avidya and Moha are immediately dispelled. He is filled with the light of spiritual realisation; he is illuminated with the brilliant light of enlightenment. Obviously, where there is light there cannot be darkness!

With this enlightenment and wisdom, the spiritual aspirant would realise that 'he', i.e. his 'true self', is the same Atma that is endorsed by all the scriptures as being the supreme Atma of creation, and which is described by the name of 'Ram' in this

Upanishad. This Atma of the individual creature and the cosmic Atma of the whole creation is the same Brahm who has revealed himself as Lord Ram.

Lord Ram is none but the self-illuminated and brilliant cosmic transcendentatqal Authority known as Brahm. He is the Supreme Being himself personified. There is no duality or distinction between any of the three entities known as the Atma, Brahm and Ram. Knowledge of this is true enlightenment and erudition.

Lord Ram is as indefinable and incomprehensible as is the supreme transcendental Brahm. [In earlier part of this Upanishad it has been asserted that Lord Ram is no ordinary human being but Brahm, the Supreme Being himself personified. Since Brahm is synonymous with the Atma, and since the Atma resides in the subtle heart of all living beings as their 'pure self', it follows that when a spiritual aspirant truthfully becomes 'self-realised' he would see that 'he' (as his Atma and not the gross body) and 'Ram' (the divine Brahm and not the gross body of a prince of Ayodhya) are one and the same holy, sublime and divine entity called the 'Advaitya Brahm'—the non-dual Brahm.

When this actually happens, it is said that such a person has reached the pinnacle of spiritualism, and he is deemed to have attained freedom from the snare created by Avidya (ignorance), Moha (wordly attachments) and Maya (delusions)—that is, he has attained Mukti or Moksha (spiritual liberation, deliverance, salvation and emancipation.)

Such a realised spiritual aspirant should think 'That is me/I'—'So-a-Ham'¹. There is no difference between me and the supreme Brahm who has revealed himself as Lord Ram. He thinks of non-duality between his own Atma and the supreme Atma known as the Parmatma in the revealed form of Lord Ram. Therefore, he knows the truth of the eclectic phrase 'Atma-Ram'. It is this 'Ram' that is being lauded and worshipped in the Mantras which address the Lord as Ram Chandra, Ram Bhadra etc.

Lord Ram who is eternally enlightened and self-illuminated, is honoured and recognized by the eclectic but most esoteric terms used to address him, such as 'OM' (the Beej Mantra of Brahm and the ethereal word which is said to the parent of all Mantras), 'Tat' (that), 'Sat' (truth), 'Yat' (is), 'Param' (supreme).

Indeed, that divine and transcendental Lord Ram who is addressed by these terms and who is beyond the comprehension of the mind and reach of the faculty of speech is no one else but 'I' or 'Me'—i.e. he is 'Atma-Ram'.

Constant reflection on this eclectic Mantra and keeping the mind focused on the irrefutable truth of this great Maha Vakya ('So-a-Ham'; 'Atma-Ram') would finally establish oneness between the spiritual aspirant and Lord Ram who is none but Brahm personified. In other words, this way of meditation and contemplation would help the spiritual aspirant to establish oneness between himself and the supreme Brahm in the form of Lord Ram. The wise aspirant should endeavour to establish oneness and non-duality between his own Atma and the supreme transcendental Atma of the cosmos known as Brahm or Ram (9).

[Note—¹*So-a-Ham* is one of the famous Maha Vakyas of the Vedas. The word 'that' refers to Brahm, while 'me or I' refers to the Atma which is the true identity of the aspirant. There are countless Upanishads that describe the Maha Vakyas. For instance—

(i) Rig Veda—Atmabodha Upanishad.

(ii) Sam Veda—Chandogya Upanishad, Canto 6, section 16, verse no. 3 (Tattwamasi).

(iii) Shukla Yajur Veda—Paingalo-panishad, Canto 3, verse no. 2-3, 8; Mandal Brahmin Upanishad, Brahman 2, section 2, verse no. 5; Brahman 2, section 4, verse

no. 4; Brahman 3, section 1, verse no. 6; Brahman 3, section 2, verse no. 2; Adhyatma Upanishad, verse nos. 2, 10 (So-a-Ham), 30-31 (Tattwamasi).

(iv) Krishna Yajur Veda—Shuk Rahasayo-panishad, verse no. 22; Kaivalya Upanishad, verse no. 16; Sarwasaar Upanishad, verse no. 12-14; Varaaha Upanishad, Canto 4, verse nos. 32, 37; Avadhut Upanishad, verse no. 2.

(v) Atharva Veda—Atma Upanishad; Naradparivrajak Upanishad, Canto 7, verse no. 8 (Tattwamasi; Ayamaatma Brahm); Tripadvibhut Maha Narayan Upanishad, Canto 5, paragraph no. 15 ('So-a-Ham'); Canto 6, paragraph no. 22 ('Twam Brahmasmi'; 'Aham Brahmasmi'; 'Twamewaaham'; 'Ahamev Twam'); Canto 8, paragraph no. 5 ('Brahmaasmi' or I am Brahm; 'Ahamasmi' or Indeed it is I/me; 'Brahmahamasmi' or I am indeed Brahm; 'Yoahamasmi' or That is I/me; 'Brahmaamashmi' or Brahm is I/me; 'Ahamevaaham' or I am indeed I/me.); Ram Rahasya Upanishad, Canto 5, verse no. 13-14 (Tat Twam Asi—That Art Thou); Ram Purva Tapini Upanishad, Canto 3, verse no. 2 (I am Lord Ram who is Brahm personified; there is no difference between me and Lord Ram); Ram Uttar Tapaini Upanishad, Canto 3, verse no. 9 (So-a-Ham; Atma-Ram); Annapurna Upanishad, Canto 5, verse no. 8 (Brahmasmi—I am Brahm personified); Mahavakya Upanishad, verse nos. 6-8 ('Hans So-a-Ham'); verse no. 11 ('So-a-Hamarka'—that essence is me); Hayagriva Upanishad, verse no. 15 ('Tattwamasi'—i.e. that supreme essence or truth is you; the second Maha Vakya is 'Ayamatma'—i.e. that essence known as Brahm, the cosmic Consciousness, is my own Atma, my own 'self'; the third Maha Vakya is 'Brahm Aham'—i.e. Brahm is me; the fourth Maha Vakya is 'Aham Brahmasmi'—i.e. I am Brahm).

This is in consonance with the philosophy of the Upanishads that stress that the Atma, the truthful identity of the creature, is none other than Brahm. That is why an enlightened one says that 'I am Brahm'; or 'I and Brahm are one'. There is no sense of pride and haughtiness or vanity and self-praise in it; it is a statement of truthful conviction said from the heart which is devoid of all imposture and deceit. Such an enlightened person is not expected to boast and expect false honours from this world. This conclusion derived at by logical reasoning will inculcate the feeling in the seeker/aspirant that he posses all the grand and holy characteristics, virtues and attributes associated with the divinity known as Lord Ram—such as possessing supreme bliss, peace, tranquility and serenity, being eternal and imperishable, have unadulterated enlightenment, wisdom, erudition and truthful knowledge, being endowed with the splendorous and dazzling light of enlightenment that comes with self-realisation, etc. All these make the aspirant feel self-illuminated like the supreme Lord himself; he acquires those majestic and mystical spiritual powers that come with self-realisation. This gives the aspirant a high degree of blissfulness and complete sense of fulfillment.]

10. Those wise, erudite, enlightened and self-realised people who come to understand the basic, universal and absolute spiritual truth about their 'real self', known as the Atma, as being a personification of Lord Ram—that there is no difference or duality between them and the supreme Lord of creation known as Brahm who had revealed himself as Lord Ram, well surely, such persons are not to be defined as being ordinary humans. They have understood the true meaning of the Maha Vakya 'Atma-Ram'.

They are deemed to be liberated, delivered and freed from the fetters of ignorance and delusions that keeps ordinary, less fortunate and ignorant people eternally shackled to this gross body and equally gross world¹.

Such wise, spiritually enlightened and self-realised men are said to be an image of Lord Ram himself. There is no doubt in it.

This is an Upanishad, and therefore it speaks the truth. Hence, those who understand the truth of its teaching do indeed find Mukti—they are spiritually liberated and delivered from the fetters of ignorance and delusions; they are spiritually liberated from this gross body and the gross world; they find emancipation and salvation for themselves.’ [But it must be noted that belief in the oneness of the Atma and Brahm, as well as the fact that the Atma is one’s true self, should be sincere and honest. To bear fruit, it must be truthfully accepted, without an iota of doubt, with a clear conscious, and without having any pretensions and deceit in one’s heart.]’

This is how sage Yagyawalkya preached sage Bharadwaj (10).

[Note—¹This is because ignorant people treat the body as their true self, and the world as the real thing and the main goal of life. Since both the body and the world are perishable and gross by nature, such people never do find permanent peace and happiness. They keep of being tossed around like a ship on a rough ocean. They feel miserable and restless due to this tossing and turmoil that is so very characteristic of this world. But once they realise that their ‘self’ is not the body but it the Atma which is separate from the body and only lives in it, they would treat this body as an alien thing or an extraneous element. Now they begin to wonder why they had acquired this body in the first place if the Atma is their ‘self’ instead of the body. Then they search for an answer and find it in the scriptures that clearly tell them that this unfortunate situation befalls upon the creature because it had wrongly identified its ‘self’ with the gross body and then indulged madly in an equally gross world in some past time, and the present dilemma is due to the accumulated affects of all those mistakes. Then obviously a wise man would not repeat the same mistakes again so as to land him once again in the same trouble. In other words, in the present life a wise, enlightened and self-realised man would treat himself as distinct from the body and the world, and instead think that he is a divine entity having an exalted origin. This would prevent him from committing the same mistakes that had landed his Atma in the present state in this world. Besides this, from the practical standpoint also when a man thinks in positive terms his entire personality undergoes a drastic change. He overcomes his negativity and dejection of spirits that bog down his progress in life and keeps him chained to miseries and agonies—some of them real and more of them imaginary. When one thinks ‘I am big and noble’, he indeed becomes one as compared to a man who thinks negatively and finds that he is surrounded by unhappiness and miseries all around him.

‘Ishwar is the Atma as seen and/or grasped by the mind. His highest name is OM. So repeat it, meditate on it and think of all its wonderful nature and attributes. Repeating the OM continually is the only true worship. It is not a word, it is God himself’ — Swami Vivekanand (The Complete Works of Sw. Vivekanand, 9 vols, 7/62).

*The Lord is His name (Jeremiah, 33/2; Isaiah, 48/2; Amos, 4/13).
I will praise thy name, o Lord, for it is good (Psalms, 54/6).
Magnify the Lord with me, and let us exalt his name together (Psalms, 34/3).
Let them also that love thy name be joyful in thee (Psalms, 5/11).
For our heart shall rejoice in him because we have trusted in his holy name (Psalms, 33/21).]*

Thus ends Canto 3 of Ram Uttar Tapini Upanishad

-----*****-----*****-----

Section 2—Ram Uttar Tapini Upanishad

Canto 4

[This Canto is dedicated to highlighting the significance and importance of the 'Avimukta Kshetra' & 'Tarak Mantra'. It narrates why Kashi gets its unique stature of being the place that gives Mukti to the creature who dies there. It is to be read in conjunction with Cantos 1 and 2 of this Upanishad, as well as Canto 4, verse nos. 1-12 of the Ram Purva Tapini Upanishad.]

1. Once, sage Atri¹ asked sage Yagyawalkya—‘How can I know about the ‘Chidaatma’ (the eternal and pure conscious Atma that is the cosmic universal Consciousness personified, and is wise, enlightened and intelligent; the Atma that resides in all the living beings as their soul, and forms their enlightened ‘self’) that is described as being ‘Anant’ (literally meaning an entity that is without an end, is eternal, infinite and imperishable), ‘Avyakta’ (an entity which is not manifest, is unknown and indescribable; is invisible, indefinable, nameless, formless, incomprehensible and attribute-less), ‘Paripurna’ (an entity that is complete in all respects, is wholesome, is fulfilled, is self-sufficient, and wants nothing), and as being an embodiment of the virtue of ‘Anand’ (full of bliss, happiness, felicity and beatitude)? (1).

[Note—¹Sage Atri— Sage Atri is an ancient sage credited with the composition of the 5th Mandal of the Rig Veda Samhita. His name appears in other places in the Rig Veda Samhita also (10/137/4 for instance). His disciples assumed his name as their surname and came to be known as Aatreyas.

Sage Atri is classified as a ‘Maharishi’ because he was one of the senior and the most exalted sages of his time. He is listed as a member of the Sapta-rishis, the cluster of seven celestial sages. Therefore, according to mythology, he is also a member of the Sapta Rishi Mandal, or the cluster of seven stars known as the Great Bear.

He is said to be one of the ten Manas-putras or mental born sons of the creator Brahma. Therefore, he was one of the Prajapatis or progenitors of mankind also. He is said to have given protection to the Sun God against the demon Svarbhaanu who caused the solar eclipse by composing a ‘fourth’ hymn against the curse of the eclipse, the other three being the usual liturgy of prayers offered during the eclipse to save the Sun God from this curse. He is said to be chief priest of the five ancient tribes of Vedic period settlers called the Panch-janas. When he was tortured by the demons, he was rescued by the Ashwini-kumars.

Atri’s wife was the famous hermitress named Anusuiya (meaning one who has no jealousy against anyone). She was the daughter of Kardama Prajapati and a stellar instance of chastity and virtuousness as a wife and a hermitress. According to mythological accounts, sage Atri and his chaste wife Anusuyia were childless, and having a desire to have a son they prayed and did severe penance. All the three gods of the Hindu Trinity, i.e. Brahma the creator, Vishnu the sustainer, and Shiva the concluder appeared before the couple and requested them to ask for a boon. Upon the couple’s request, all the three Gods became their sons. Brahma became the sage known as Chandra representing the Moon God, Vishnu became the wise and enlightened sage Dattatreya, and Shiva became the angry sage Durvasa.

During his forest sojourn, Lord Ram had visited him in the Dandakaaranya forest where the sage preached him the nuances of Dharma (Ramanya by Valmiki, Aranyakand, 117). He was an authority on Dharma (tenets of righteousness, probity and propriety) and has been quoted in the Manusmriti (3/16) and the epic Mahabharata (in its Anushaashan Parva, 65/1).

A separate text called the ‘Atreya Dharma Shastra’ is attributed to him. It has nine chapters that deal with Daan (charitable donations and gifts), Japa (prayers) and

Tapa (austerity and penances). Other texts attributed to him are the 'Atri Smriti' and the 'Atri Samhita'. The latter has roughly 400 verses and deals with the principles of Dharma.]

2. The famous sage Yagyawalkya replied—'Such an exalted Atma which is eternal and indescribable is said to be symbolically established in the spiritual realm called the 'Avimukta Kshetra'. That is why a sincere spiritual seeker should endeavour to worship and honour as well as contemplate and meditate upon the Atma there.' (2).

3. Atri asked again—'But where is this place called 'Avimukta'?' (4).

4. Sage Yagyawalkya answered—'That place is situated between 'Varanaa' and 'Naashi'.' (4).

5. Atri asked—'What are 'Varanaa' and 'Naashi'; what is the meaning and the significance of these two?' (5).

6. Yagyawalkya replied—'That which stops or puts a leash on or restricts all the evil consequences of whatever is done by the creature is called 'Varanaa'. Or, that which prevents the creature from committing more sins and misdeeds, that which stop his further spiritual downfall and moral degradation is called 'Varanaa'. [The word 'Vaaran' means to stop, to prohibit, to sensor, to restrict. The word 'Vaaran' is a verb, while the word 'Varanaa' is a noun. Hence, the entity known as 'Varanaa' is the one that stops (Vaaran) further growth of evil tendencies in a creature.]

Similarly, that which not only destroys, eliminates, crushes, purges or catheterizes all the sins and evil deeds done by the creature but also overcomes their evil consequences for his benefit (so that he does not have to face sufferance from their negative effects, and is ensured of his spiritual welfare) is called 'Nashi'. [The word 'Naash' means to destroy and eliminate, to purge and remove. If 'Naash' is a verb, then obviously 'Nashi' is a noun—an entity that destroys.]' (6).

[Note—The literal meaning of the word *Avimukta* is 'that which is not liberated; that which is bound, requiring liberation'. The word here signifies that the creature who is presently not liberated can find his spiritual liberation if he takes the recourse of finding shelter in the Avimukta Kshetra. In other words, a living being who is bound to this mundane world of delusions and artificiality due to his ignorance and also due to the entangling effects of his accumulated past deeds but has realised his follies and pathetic condition, and who is sincerely yearning to break free from the fetters that pillory him to this deluding world of transmigration and its accompanying horrors, can find his spiritual liberation and deliverance if he takes the shelter of the Avimukta Kshetra. This would help him to finally break free from the vicious cycle of birth and death and its accompanying horrors. Hence, 'Avimukta' site is 'that place where those who are yet not spiritually free reside in order to get future spiritual freedom'.

The word 'Vaaran', from which 'Varanaa' has been derived, means to stop, prohibit, obstruct, prevent or bar, while 'Naashi' refers to elimination and destruction. From the perspective of this terrestrial world, the Avimukta Kshetra that is located between Varanaa and Naashi is called 'Varanasi', a city in northern India and situated on the banks of the holy river Ganges. It is said to be the terrestrial abode of Lord Shiva, and it is here that it is believed that Shiva utters the Tarak Mantra in the ears of a dying man so that the latter gets Mukti. Refer also to verse nos. 9-14 of the present Canto no. 4. The concept of the Avimukta Kshetra that provides Mukti to the soul of the creature is also dealt with in Canto 1, verse no. 1, and Canto 2, verse no. 3 of this Upanishad.

From the spiritual and metaphysical perspective, the composite word refers to that place which has the majestic and mystical spiritual potential and power not only to stop the creature's further spiritual decline but also to help him redeem himself from the bad or negative consequences of his past misdemeanors. It is like a holy site where the pilgrim goes seeking salvation. There, he would take a bath in a river or pond to clean himself and then go to some shrine to pay his obeisance to the presiding deity of the place and seek the latter's blessings. In the present case, the 'cleaning of the body' is a metaphoric way of saying that an aspirant washes off all his past misdeeds by sincerely regretting for them, and taking a vow of not repeating his mistakes again. If he indeed succeeds in turning a new leaf in his life, if he indeed improves himself and becomes a changed man, and if he sticks to his new chosen path then it is sure that his spiritual redemption is at hand. He must be ready to atone for his past sins by undergoing sufferance as a token of his punishment, but all future torments would be eliminated.

Such a man is considered wise and enlightened as he would be eagerly searching for the 'truth' that has been lauded in the Upanishads, and in order to find this 'truth' he would be honestly following the advice of these Upanishads. Obviously when a man follows the instructions of a learned teacher, who in this case is the Upanishad itself, with faith and conviction, he is bound to be successful in his endeavours. Therefore, a man who understands the actual meaning and significance of the term *Avimukta vis-à-vis* his *Atma* (i.e. his true 'self') and how it impinges on his spiritual welfare is sure to find *Mukti* or *Moksha* for himself—that is, he is assured of liberation and deliverance from the evil affects of his sins and misdeeds, and consequentially find emancipation and salvation for himself.

A sincere aspirant would set his house in order by exercising the greatest of restraint on his wayward sense organs and prevent them from acting in an unscrupulous and unrighteous manner. He would endeavour to eliminate all the accumulated scum of his life in the form of the evil affects of his reckless past deeds done out of ignorance that has burdened his soul till now. He would divert his attention and mind away from both the world of material sense objects as well as from the gross body and its need for gratification, and instead turn it inwards towards his inner self and nobler goals in life. By realizing that the body and the world are perishable and entrapping by nature, he would keep his *Atma* away from their clutches.

But for this to be effective the aspirant has to be sincere and committed. Pretensions can cheat the people of the world, but they cannot cheat one's own 'self'. The precondition for salvation and emancipation of the *Atma* is sincerity of purpose and commitment on the part of the spiritual aspirant.

The realisation by the creature of the fact that he has indeed been wayward and sinful, and that all his present sufferings are a result of his past misdeeds, is the first step towards *Mukti*. Then he would look for a way out of his predicament and find the solution in the teaching of the Upanishads. He would then grasp this lifeline with both hands and follow it till emancipation and salvation is indeed available to him. Naturally his life would become exemplary and free from further sins. This would ensure that he gets freedom from the continuous cycle of miseries and torments to which he was hitherto bonded.

The study of the Upanishads and practice of their eclectic principles and philosophies kindles 'self-realisation' in the spiritual aspirant when he realises who he actually is, and what the difference between his 'true self' and the body as well as the rest of the gross world is. He becomes wise and enlightened about the eclectic existence of the divine but most esoteric entity known as the '*Atma*' or pure consciousness. He realises that the real subtle and sublime truth is something different from the gross world and the gross body. So he is freed from the strong fetter of ignorance that had shackled him so far to the world as well as the body. Identifying himself with the ethereal *Atma* instead of the gross body is in its self finding *Mukti*—

i.e. it is being freed from the limitations and shackling effects of the body and the world in which the aspirant lives, it is being delivered from the horrible cycle of ignorance and its accompanying delusions.]

7. Sage Atri asked—‘Where is the symbolic location of this Avimukta site from the metaphysical and the spiritual perspective of the aspirant? That is, where can one hope to find this spiritually important holy site besides its terrestrial location (between the Varanaa and the Naashi as described in verse nos. 3-6 of the present Canto 4, as well as in verse no. 1 of Canto 1, and verse no. 3 of Canto 2)?’ (7).

[Note—There are two ways at looking at a thing—one is at the grosser level of creation that pertains to the physical world, and the other is at the subtle level of creation that has a sublime dimension. From the former point of view of the physical world, the Avimukta Kshetra is the city known as Kashi situated on earth in the northern part of India, and from the second point of view pertaining to metaphysics, it is located in the forehead between the two eyebrows. The second view is based on the eclectic view that the body of the aspirant is a miniature world in a symbolic manner, because the Jiva, the living being, is a microcosm of the whole creation. There are umpteen numbers of Upanishads that stress the point that for a wise and enlightened spiritual aspirant, his body itself is an abode of the Supreme Being, and that one need not search the Lord anywhere in the external world but within one’s own inner self. The body is regarded as a sanctified abode of Brahm. The Truth lies within, and not without anywhere.

It is not practically possible and feasible for each and every living being to go and reside in Kashi to seek Mukti, but nevertheless it is everyone’s right to claim Mukti. So, the best thing is to become wise, and seek this Mukti within one’s own inner-self by concentrating the mind and its attention on the symbolic Avimukta Kshetra located in the forehead. This implies that one should meditate and focus one’s attention and energy of the Pran on this point of the body. In Yoga Upanishads it is pointed out how an ascetic gathers his Prans (his vital wind forces) from all parts of the body, and pulls them up to concentrate his attention on this area of the forehead. When he is successful in doing it, it is said that he experiences the light of enlightenment and wisdom. This is metaphorically depicted as the acquisition of the ‘third eye of wisdom’ that is said to be located here. Therefore, it is not necessary for everyone to flock to Kashi seeking Mukti or Moksha. Merely living in Kashi will serve no good for the Atma if the Jiva (living being; the creature) remains as engrossed and trapped in the never-ending cycle of affairs of the mundane world of material sense objects as he was before coming here. Instead, a person who remains where he is at present, but endeavours to focus his mind, sub-conscious and intellect in the search of the ultimate spiritual Truth by meditating and contemplating upon this Truth is more fortunate and successful in attaining his spiritual goal than his bretheren who merely lives in Kashi and wastes his precious life doing nothing, or worst still, in remaining engrossed in all sorts of worldly affairs.]

8. Sage Yagyawalkya replied—‘The point in the forehead where the root of the nose meets the point that lies between the two eye-brows is called the metaphysical or the spiritual site of ‘Avimukta’. This point is symbolic of the illuminated heaven where the supreme Atma or Brahm has its abode¹.

This junction point is also called ‘Sandhya’—literally meaning a place where two units or entities unite or join together. This is because it symbolizes the point where the Duloka (the lower heaven) meets the immensely illuminated Param Dham (the upper heaven or the supreme abode of the Supreme Being). Indeed, those who are well-versed in the metaphysical knowledge of the supreme transcendental Brahm regard this point as the place where one can come in direct contact with Brahm².

Those who are well versed in the knowledge of Brahm worship him at this point while they do their daily worship known as ‘Sandhya’³.

Hence, in order to attain Mukti, or spiritual liberation and final deliverance from the body and the world, a wise man should worship the invisible and indescribable supreme Lord (i.e. Brahm manifested as the cosmic Consciousness known as the Atma of creation) by residing in the Avimukta Kshetra.

He must understand that this ‘Avimukta Kshetra’ has two locations—from the physical point of view it is located in the terrestrial world between Varanaa and Naashi (as described in verse nos. 3-6 of the present Canto 4, as well as in verse no. 1 of Canto 1, and verse no. 3 of Canto 2, which corresponds to the holy city of Varanasi, also known as Kashi), and from the metaphysical and spiritual point of view it is located in the forehead between the two eyebrows (where the third eye of wisdom is located and where the aspirant experiences extreme bliss and ecstasy if his Pran is concentrated here—as described in the present verse no. 8)⁴.

Only such a wise, realised and enlightened person who has understood where the Avimukta Kshetra is really located (from the spiritual point of view) is competent to teach others about it. Verily, such a person who is aware of this site is certainly liberated and delivered; he is certainly entitled to preach about the essential knowledge of the eternal and truthful Atma to others⁵. [This is natural, as only a person who knows something can tell others about it. The rest of the people are imposters and only mislead others.] (8).

[Note—¹It is believed that at the time of creation, the supreme Brahm entered the body of the creature through the Brahm-randhra, the hair-like slit in the cranium, and took up his residence in the mind. Refer Aeiteriya Upanishad of the Rig Veda tradition, Section 1, Canto 3, verse no. 12, and Paingal Upanishad of Shukla Yajur Veda, Canto 1, verse no. 11. That is why the head is the area of the body where the man’s faculty of reasoning, reflection, thoughts, analysis and intelligence are located—because Brahm is all-knowing and omniscient.

²The word *Sandhya* refers to the place in the forehead where the two Naadis called ‘Ida’ and ‘Pingla’ coming from the base of the spine and passing through the two nostrils come to meet each other at the root of the nose. It is here that the Sushumna Naadi, the most important nerve coming from the base of the spine and through which the vital Pran (life forces) rises up when the Kundalini is ignited, also meets these two Naadis, thereby creating a vibration in the nerves of the head, which in turn results in titillating them and creating an extreme sensation of ecstasy and bliss.

The internal point in the forehead where the two eyebrows meet the root of the nose is said to be the location of the so-called ‘symbolic third eye of wisdom’. This is the area of the head where a man’s faculty of reasoning, reflection, thoughts, analysis and intelligence are located. That is why when we ponder deeply upon something, our forehead furrows automatically as a sign of intense concentration of all the faculties of the mind.

According to the philosophy of Yoga, this is the point where the ascetic who diligently follows the rules of meditation and contemplation focuses his Pran (life forces, including the consciousness) by pulling it up from all other parts of the body by means of various techniques, such as Pranayam (breath control), Aasans (various sitting postures), Bandhas (restrictions on the body) etc. And it is here that he experiences an extreme sense of spiritual thrill or ecstasy. The area of the head higher than this point is said to be the abode of Brahm. When the Pran moves ahead on its onwards journey, it reaches the top of the skull and finally escapes through the Brahm-Randhra, the hair-like slit on the cranium from which it is believed Brahm had entered the man’s body at the time of creation and took up his residence in the head. This is the reason why the virtues of intelligence, wisdom, reasoning, thinking etc. are

all located in the head rather than in any other part of the creature's body—simply because Brahm is synonymous with these grand qualities.

According to the philosophy of Kundalini Yoga—which pertains to obtaining spiritual bliss as well as liberation from the fetters of the gross body by the kindling of the cosmic energy lying trapped and untapped inside the body in the form of a spiral coil at the bottom of the spinal cord—when the vital energy of Kundalini is aroused, it snakes up the spinal cord through the Sushumna Naadi and enters this area of the forehead mentioned in this verse. When this happens, the practitioner experiences an extreme sense of spiritual ecstasy and bliss not to be found elsewhere. The energy of the Kundalini acts more like the rocket that propels the Atma or pure consciousness of the creature towards the realisation of its true potentials by rising high and leaving the mundane affairs of the body and the world behind. Once the creature tastes the nectar of bliss and ecstasy which had been eluding him all through his life, he would naturally not like to revert to his earlier state of sorrows and miseries. The aspirant metaphorically experiences the presence of Brahm in the head when he experiences extreme bliss and ecstasy, a high degree of beatitude and felicity, because Brahm is synonymous with these virtues.

This concept has been elaborately described in the Shukla Yajur Veda's Advai Tarak Upanishad, verse no. 3; Tarsar Upanishad, Canto 1, verse no. 1.

The point of concentration referred above, according to Canto 3 of Saubhagya Laxmi Upanishad belonging to the Rig Veda tradition, is called the 'Bhru Chakra' or 'Agya Chakra'. It is often called the 'third eye of wisdom'. These Chakras are subtle and sublime energy centers in the body, and are extensively dealt with in all the Upanishads that deal with Yoga. This particular Chakra is said to control wisdom and enlightenment in a man; its colour is Indigo and it also regulates such virtues as fortitude, tolerance and forgiveness.

³The word *Sandhya* also refers to a special ritual done by the Aryans three times a day—in the morning, midday and at sunset. The word *Sandhya* means a period or juncture point occurring three times a day when two periods of time meet each other—viz., morning, when the sun rises and darkness of the night meets the light of the day, noon when the pre-noon hours meet the post-noon hours and the sun is in its zenith in the sky, and evening hours when the sun is setting and lighted hours meet the dark hours. During these periods, Gayatri Mantra or any other devotional Mantra or hymns or prayers are said in honour of Sun-God or any other patron God of the devotee. Observation of these sacraments are said to be very rewarding and beneficial for the person who does them.

⁴If he is not able to physically live in the terrestrial Avimukta Kshetra, he would get the same benefit of spiritual liberation and deliverance if he makes Atma (pure consciousness; his 'true self') symbolically live in the Avimukta Kshetra by focusing his attention (mind) and his Pran (vital life-forces of the body represented by the vital winds) in the area of the forehead narrated in this verse. [In fact, from the spiritual perspective this latter Avimukta Kshetra is of a greater importance as it is available to all the creatures in equal measure. It might not be practically feasible for each and every creature to go and live in the city of Kashi. Besides this, even if one is fortunate to get this benefit of being physically present in this holy city but remains engrossed in the affairs of the material world, pursuing its false charms and indulgent in its sense objects, or remains focused on the efforts to gratify the gross body and the natural urges of its sense organs—then his living in this terrestrial Avimukta Kshetra is of no value. Merely living in it would not provide him liberation, deliverance, emancipation or salvation.

On the contrary, a person who lives an ordinary life in any ordinary village or city, but a righteous and auspicious life that is lived according to the prescription of the Upanishads, a person who practices the profound spiritual principles of Upanishads by seeing the supreme Brahm everywhere, and who practices meditation and contemplation by focusing his mind and his Pran in the Avimukta Kshetra that is

symbolically present in the forehead is indeed able to attain the rewards as promised in this Upanishad. That is, such a wise and enlightened person does find Mukti and Moksha for himself even though he is not living in the city of Varanasi or Kashi—or for that matter, in any other holy terrestrial site.

In this context it ought to be noted that there are a number of Upanishads that emphasize the point that the body of the creature itself is a holy pilgrim site as well as a shrine of the Lord. For instance, the following Upanishads treat the body as an abode of Lord Shiva—(i) The Krishna Yajur Veda's Yogshikha Upanishad, Canto 1, verse nos. 72, 165-168, Canto 2, verse nos. 6-10, 20, Canto 3, verse nos. 1-15, Canto 5, verse nos. 2-5, 13-16, and Canto 6, verse nos. 32-33, 47; and Skand Upanishad, verse nos. 10-11. (ii) Sam Veda's Jabal Darshan Upanishad, Canto 4, verse nos. 48-59.

Body as an abode of Shakti (the dynamic manifestation of Shiva and revealed as a divine Goddess) and 4 Peeths has been propounded in the Krishna Yajur Veda's Yogshikha Upanishad, Canto 5, verse nos. 6-12.

Body as an abode of Shiva and Shakti is expounded in (i) Krishna Yajur Veda's Yog Kundali Upanishad, Canto 1, verse no. 75; Yogshikha Upanishad, Canto 5, verse no. 4. (ii) Atharva Veda's Brihajjabal Upanishad, Brahman 2, verse no. 8-9.

Importance of the body as a medium of obtaining Siddhis (mystical powers) is stressed in the following Upanishads—(i) Krishna Yajur Veda's Yogshikha Upanishad, Canto 5, verse no. 4. (ii) Shukla Yajur Veda's Advai Tarak Upanishad. (iii) Atharva Veda's Ram Uttar Tapini Upanishad, Canto 4, verse no. 1-8.

Importance of the body as a Linga (symbol of Brahm and the Atma)—Krishna Yajur Veda's Yogshikha Upanishad, Canto 2, verse no. 10.

Body as a pilgrim site called 'Triveni Sangam'—Krishna Yajur Veda's Yogshikha Upanishad, Canto 6, verse no. 30.

The spiritually evolved idea of obtaining Mukti and Moksha by turning inwards and experiencing the presence of the supreme Brahm inside the body has been expounded in the Advai Tarak Upanishad of Shukla Yajur Veda tradition. In fact, this entire Upanishad is dedicated to this theme.

The body has *four Peeths* symbolising the abode of divine Shaktis or Goddesses. This is endorsed in the Krishna Yajur Veda's Yogshikha Upanishad, Canto 1, verse nos. 170-175, and Canto 5, verse nos. 3, 8-12.]

⁵By meditating and concentrating one's attention at the focal point of the nose and the two eyebrows mentioned above, the spiritual aspirant acquires such stupendous spiritual insights that he becomes enlightened about the glorious and mystical nature of the supreme transcendental Brahm who pervades throughout the creation as its consciousness known as the Atma. Only a person who knows anything can teach about it. The Atma is such an esoteric sublime entity that it cannot be 'learned' in conventional manner by merely studying voluminous scriptures; it has to be experienced and witnessed first hand to somewhat comprehend what it actually is. It is so profoundly mystical and mysterious that it cannot be put into words.

But a self-realised person who has witnessed the presence of the cosmic Consciousness can guide others on the correct path to be followed so that they too can realise the presence of the Atma though it is true that Atma cannot be taught about like other subjects merely because the teacher is well acquainted with it. An enlightened and self-realised seeker is at least qualified to guide others.

Therefore, any seeker/aspirant who resides in the 'Avimukta' site—whether in its physical location in the city of Kashi or Varanasi, or in its metaphysical symbolic location in the forehead as described in this verse—and spends his time meditating upon and concentrating his mind and intellect on the Atma (the soul, the true form of the 'self' as the illuminated and conscious entity which is a miniscule reflection or image of the supreme, all-pervading, omniscient, almighty macrocosmic Soul of the creation called Parmatma) at its metaphysical location at the conjunction point between the eyebrows and the root of the nose, is truly deemed to be erudite,

sagacious, wise, enlightened and self-realised. He is the one who is deemed fit and qualified to preach on metaphysics and spiritualism; he is said to be truly enlightened about Brahm.]

9. After that, sage Yagyawalkya said to sage Atri—‘Once upon a time, Lord Shiva worshipped Lord Ram for one thousand Manvantars¹ by offering sacrifices, doing Tapa (penances and austerities) and repeating his Tarak Mantra² (i.e. the Lord’s holy name which provides the creature with liberation, deliverance, emancipation and salvation) (9).

[Note—¹*Manvantar* = 1/14th fraction of 1 day of Brahma; 71 four-Yug cycle or era of the celestial cycle of birth and death according to the Hindu philosophy.

²The *Tarak Mantra* of Lord Ram is given in verse no. 14 of this Canto 4. Besides this, there are other places where various variations of the Tarak Mantra are given—viz. Ram Purva Tapini Upanishad, Canto 4, verse nos. 1-12; Ram Uttar Tapini Upanishad, Canto 2, verse nos. 1-3; Canto 5, verse nos. 4/1-47; Canto 6, verse nos. 1-3; Ram Rahasya Upanishad, Cantos 2, 3 and 5.

10. This pleased Lord Ram so much that he said to Shiva, ‘Oh Parmeshwar (i.e. the supreme Lord)! Ask for any wish you desire; I shall give it to you.’ (10).

11. Then the enlightened and wise Lord Shiva said—‘Oh Lord! Those who die at the Manikarnika Tirtha (a holy site located on the banks of river Ganges), or in the area under my domain which is called Kashi, or in the water of the river Ganges, or on its banks—please be kind to give all such creatures the benefit of Mukti, or liberation and deliverance from the cycle of birth and death as well as freedom from all sorts of spiritual torments. All of them should be blessed with the fruits of emancipation and salvation. I do not want any other boon to be granted by you (or there is nothing else except this that I want).’ (11).

12. Then Lord Ram replied—‘Oh Lord of the Gods (‘Devesh’)! Any creature, even those as humble and lowly as worms and insects, who would die anywhere in your holy domain, would get instant deliverance. There is no doubt about it. (12).

13. To provide deliverance to all those who die in your holy domain known as ‘Avimukta Kshetra’ or Kashi/Varanasi, I shall reside there even in stone idols as well. [That is, those who worship me sincerely in even such lifeless objects as a stone idol shall have the benefit of liberation and deliverance from this mundane, entrapping and deluding world consisting of a vicious cycle of birth and death.] (13).

14. Oh Shiva! Anyone in your holy realm who worships me (or invokes my holy name or remembers me) by using my ‘Tarak Mantra’ consisting of six letters (रं रामाय नमः — Raam/n(g) Raamaaye Namaha), I will liberate him from all sins, even from such horrendous ones which are ordinarily unpardonable like the killing of a Brahmin¹. You should not worry about it (14).

[Note—¹On the face of it, it appears incredulous that the Lord would forgive the killing of a Brahmin, or in other words condone murder of any kind. The idea is to give the sinner a chance to redeem his Spirit even if he had committed a grave error. It may be due to compulsion of circumstances beyond his control that he was forced to commit some grave sin, or it was committed inadvertently or out of ignorance. If he sincerely regrets for it, if he is ready to undergo its punishment, then by all means he must be given a chance to redefine his life and turn a new leaf. This is very

important—for it means if a man commits some kind of misdeed out of ignorance or some other cause, and he sincerely regrets for it and is therefore given a chance at redemption, it would mean that at least one soul has been saved and the burden of the earth is reduced by that extent.

If no hope is given for redemption and forgiveness for sins, it will not help the society in any manner whatsoever. Even if one man is reformed it so much the better, because otherwise he would add to the ever-growing list of the fallen, the evil and the sinful, without any hope ever of this list coming to an end. All the scriptures have a sincere desire to uplift the creature from the quagmire of spiritual delusions in which he has landed himself, and that is why they show him a direct path of redemption and reformation. Obviously it is the fallen and the sinful that need to be lifted up, and not those who are already on a high ground of morality and righteousness!

The Lord is not a cruel tyrant who is ever eager to find sinners so that he can torture them no end in the name of punishment for sins because he derives sadistic pleasure in their miseries. No, that is not at all the case. The Lord is ever so gracious and merciful; he is ever so compassionate and kind that he wants to give the sinner the maximum leverage possible in life so that he can be saved. So every possible opportunity is given to the sinful man to re-define his life and make it better in the time to come.

Refer also to note of verse no. 3 of Canto 2 of this Upanishad.]

15. Anyone who accepts this Mantra either from Brahma (the creator) or from you (Lord Shiva the concluder)¹ is able to obtain all the Siddhis² (mystical powers) that naturally accompany the Mantra while he is still alive, and when such a person dies he is able to find physical freedom from the shackle of the gross body when his Atma makes its exit from the gross body for good. After that he does not have to take a birth again, and his soul merges with me to become one with me³ (15).

[Note—¹By referring to Brahma and Shiva as the ones by whom a seeker of Mukti can be initiated—here meaning getting baptized—in the holy Mantra of Lord Ram, the Lord seeks to erase the imaginary dividing line that the followers of Vishnu and Shiva have drawn between themselves by calling themselves as either Vaishnavs or Shivites respectively.

Lord Ram has himself taught the Tarak Mantra to Lord Shiva here in the present Canto 4, verse nos. 9-16, and to Brahma, the creator, in Canto 5, verse nos. 1-5.

Another spin to it is that 'Brahma' refers to Brahmins or upper crust of the society who are regarded as learned and wise and the keepers of the upright conscience and righteous behaviours of the society, while Shiva refers to the people belonging to the lowest rung of society for the general demeanors, behaviours, life styles, food habits, residence of Lord Shiva etc. as depicted in the scriptures and traditional lore is the opposite of the way Brahmins live. But at the same time, he is referred to as the 'Lord of Gods' (see verse nos. 10, 12) by Lord Ram himself. It is well known that Shiva is the most superior amongst the Gods in knowledge, wisdom, enlightenment, erudition etc. in the whole of creation. He is even referred to as 'Rameshwar', i.e. the Lord of Lord Ram. Shiva's realisation of the illusionary and deluding nature of this world is reflected in his having renounced all worldly desires and comforts, and being ever engrossed in meditation in the Himalayas. The location of his 3rd eye is exactly at the place as prescribed in verse no. 2 of this Canto, i.e. he is wide awake to the realisation of Brahm. He is the only God to have this awakening.

So, the reference of Lord Ram to both Brahma and Shiva as the ones from whom his divine Mantra can be accepted signifies the fact that (1) the divine Mantra of Lord Ram is liberating even for the exalted as well as for the lowly, (2) the source of the Mantra-giving process is less important than the sincerity of the seeker/aspirant, and (3) even apparently crazy-looking fellows like Shiva might be actually the most erudite, self-realised, attained and enlightened one that ever existed in this creation.

²That is, all spiritual achievements and supernatural powers would be easily available to a man who uses the Lord's Mantra for the purpose of Japa or repetition, Yoga or meditation, Dhyan or concentration and contemplation, etc. Such a person becomes self-realised and experiences the stupendous spiritual powers of the Mantra when he experiences the bliss and ecstasy that accompany its constant repetition that leads him to become acquainted with the eternal Atma which is consciousness personified. He also realises the potential of the Mantra in actually providing him with liberation and deliverance from all spiritual miseries that had been tormenting him till then. He is now assured of emancipation and salvation, an assurance that fills him with an extreme sense of contentedness and fulfillment. He is so filled with bliss that he does not seek happiness in the outside world, and instead remains contented in his inner self. He distances himself from the gross body and an equally gross world, and instead remains focused on his Atma. He does not allow his 'self' to be involved in world and get trapped by its numerous delusions and temptations. He keeps himself aloof from the gross body and the deeds done by it. Briefly, he lives in a perpetual state of 'Turiya' or the transcendental state of existence of consciousness even though he has to live a normal life in this world. As such, for all practical purposes from the spiritual perspective, he is deemed to be liberated from the fetters of the body and the world that shackle ordinary creatures, and is deemed to be delivered from their entangling web of delusions and their accompanying hoard of miseries and torments.

³In other words, when the self-realised, enlightened and wise man dies, he would find his final Mukti, or liberation and deliverance, his final Moksha, or emancipation and salvation, when his individual Atma reverts back to its primary form and merges with the supreme Atma known as the Parmatma. It must be noted that when Lord Ram says 'the spiritual aspirant's Atma would merge with me', he is referring to the supreme Brahm, the Supreme Being, and the universal cosmic Consciousness that he personifies. Obviously, when the individual Atma merges with the cosmic Atma, all distinctions and barriers are removed, and then the former becomes indistinguishable and inseparable from the latter. This is the final 'dissolution' of the soul; it is the final liberation of the Atma as all its fetters are removed and it becomes the cosmic entity that it primarily was before it began to be identified as an individual creature. This is the aspirant's final Mukti or Moksha when all grossness and worldly encumbrances of the Atma are removed and it is restored to its original sublime and ethereal form as the pure consciousness.]

16. Oh Shiva! When you utter my divine Mantra in the right ear of the dying person anywhere in the holy realm called Avimukta, that person is certain to get liberation and deliverance; he would certainly find emancipation and salvation.'

In this way, a person who is fortunate enough to have a divine and purifying sight of the 'Avimukta Kshetra' which is blessed by Lord Ram himself, is sure to get rid of the sins and various faults that have been accumulated by him over numerous cycles of births and deaths (16).

Thus ends Canto 4 of Ram Uttar Tapini Upanishad.

-----*****-----*****-----

Section 2—Ram Uttar Tapini Upanishad

Canto 5

[This Canto lists the great forty-seven Mantras of Lord Ram. They were revealed by sage Yagyawalkya to sage Bharadwaj.]

1. After that, sage Bharadwaj asked the famous sage Yagyawalkya—‘Oh Lord! Please tell me about those divine Mantras which immensely please Lord Ram and are instrumental in giving a divine and holy vision of the Lord to his devotee.’ (1).

2. Yagyawalkya replied—‘Oh Brahmin! Just like Lord Ram had told Lord Shiva about the significance of Kashi while blessing him with a boon (see Canto 4 above), he had preached to Brahma in a similar fashion on some other occasion. Brahma had then praised and paid his obeisance to Lord Ram by bowing before him and singing his glories using the same set of hymns or Mantras that the Lord had divulged to him. Hearing his discourse (or divine advise), Brahma had bowed before him reverentially and sung his praises and glories using the following hymns (2).

3. To begin with, Brahma mentally bowed most reverentially before Lord Ram who is the foundation, the pillar and the backbone that supports the entire creation. As such, he is no one else but the great Lord Vishnu¹ who is the sustainer, protector, caretaker and nourisher of this creation. He is known as Narayan as he is free from all sorrows and miseries as well as all sorts of faults, taints and shortcomings that are associated with this creation. He is a treasury or a fount of eternal and supreme bliss, peace, contentedness and tranquility as well as of wisdom, knowledge and enlightenment. He is an abode or treasury of all these virtues. He is an embodiment of divine light and illumination (which is a metaphor for his supreme divinity, holiness, sublimity, magnificence, wisdom, erudition and enlightenment). He is indeed ‘Parmeshwar’ (i.e. the supreme Lord of all).

Brahma (the creator) bowed mentally before the divine form of Lord Ram, who is none but Lord Vishnu manifested in his form, and prayed to him using the sacred hymns as follows—[There are a litany of forty-seven Mantras dedicated to Lord Ram which are listed here. These are the hymns used in offering worship to the Supreme Being, the Lord God, during formal prayers held during ritualistic worship. It is like the Common Book of Prayer used during liturgical services.] (4).

[Note—¹*Vishnu* is also known as Lord Narayan. In the context of creation, Vishnu is also known as the Viraat Purush, the macrocosmic gross body of the supreme transcendental Brahm, the Supreme Being. It is from the Viraat that even the creator of the visible world, i.e. Lord Brahma, was born. It is from the Viraat that Lord Shiva, the concluder was born. The entire creation is said to be a manifestation of Viraat. The word ‘Viraat’ means an entity that is vast and colossus, that has an infinite dimension, and that encompasses the entire creation within its ambit. When creation unfolded, the Viraat Purush assumed the role of the supreme sustainer, the caretaker, the nourisher and the regulator of this vast creation which was his own creation, and therefore like his own off-spring.

Whenever there was trouble in this creation, and when the balance of power needed to be restored in the favour of the righteous and the good virtues, the Lord took one or the other form depending upon the exigencies of the circumstance prevailing at the time. Each of these forms of Vishnu was called an incarnation.

Lord Vishnu is the sustainer and the care-taker of the world. He is the most important of the Trinity Gods consisting of Brahma, the creator, and Shiva, the concluder. It’s easy to produce and destroy, but it is indeed a mammoth task to sustain and nourish what has been born. Lord Vishnu is also depicted as the Viraat Purush, the macrocosmic gross body of the creation from whose body the rest of the

creation is said to have been formed; the Viraat embodies the whole creation in his own self. According to Purans, even Brahma and Shiva have been created from Vishnu. His name first appears in the Rig Veda, 1/154-156. The Lord represents all that is virtuous, noble, righteous, auspicious, high and glorious in this creation. He is all pervading, all encompassing and omnipresent. He is a personification of Yagya, or the various religious sacrifices (Shatpath Brahman, 1/1/2/13). The Lord has taken numerous forms and revealed himself on different occasions to uphold good and righteous, and trounce bad and evil. Lord Vishnu is also depicted as a synonymous deity for Brahm; he is Brahm personified.

Detailed notes on the *Viraat Purush* and *Lord Vishnu* are appended to the relevant verses in the following Upanishads of this volume—(i) Chapter 11, Tripadvibhuti Maha Narayan Upanishad, Canto 1, paragraph 1, 5-6; Canto 2, paragraph 11-12; Canto 7, paragraph no. 18 and its note; Canto 8, paragraph no. 17; (ii) Chapter 10, Sharav Upanishad, verse no. 15, and verse no. 25 with its accompanying note; and (iii) the present Chapter 13, section no. 2, Ram Uttar Tapini Upanishad, Canto 5, verse no. 4/36 and its note.

Refer also Vishnu Puran, Chapter 1, Canto 2, verse nos. 1-32, 55-70.]

१. ॐ यो वै श्रीरामचन्द्रः स भगवान् द्वैतपरमानन्दात्मा, यः परं ब्रह्म भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/1. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan'¹ (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

He is 'Advaitya'—i.e. he is non-dual, without a parallel, is peerless and unique.

He is the 'Atma' (or soul; the pure consciousness) that is an embodiment or a fount of 'Param Anand'—i.e. he is the personified form of the eternal and ethereal cosmic Consciousness that is an image of supreme, pure and absolute bliss, beatitude and felicity.

He is the most majestic, exalted, sublime and supreme transcendental Brahm personified. The three Lokas called Bhu (भु), Bhuvaha (भुवः) and Swaha (स्वः)² are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/1).

[Note—¹The word *Bhagwan* has two parts— 'Bhag' and 'wan'. The 2nd part 'wan' means 'one who possesses'. The 1st part 'Bhag' refers to the following six qualities or virtues in their entirety—(1) Aishwarya of all sorts—i.e. someone who has all majesty, powers, wealth, fortune, opulence, flourish, supremacy, sway, dominance, glory, grandeur, omnipotence and other glorious virtues (सम्पूर्ण ऐश्वर्य), (2) Dharma—i.e. to have the virtues of auspiciousness, righteousness, probity, propriety, virtuous and noble conduct and thought (सम्पूर्ण धर्म), (3) Yash—i.e. the fame, glory, majesty and renown that comes with possessing noble and virtues qualities (सम्पूर्ण यश), (4) Sree—i.e. wealth, prosperity, pomp and circumstance, prestige, splendour, glory and honour, and all other factors associated with those qualities mentioned in serial no. 1-3 above (सम्पूर्ण श्री), (5) Gyan—i.e. comprehensive knowledge, erudition, wisdom, skills, expertise and enlightenment (सम्पूर्ण ज्ञान), and (6) complete Vairagya—i.e. full and sincere renunciation, detachment and dispassion towards this world and its material sense objects as well as towards this body and its desires for gratification (सम्पूर्ण वैराग्य)].

Hence, anyone who is endowed with the above six qualities is called a 'Bhagwan'.

Conventionally, the word is used as a synonym for the words 'Lord, God, Supreme Being', and is used for someone who is glorious, divine, holy, majestic, honoured and revered.

²The three worlds represented by the three cryptic words are 'Bhu' representing the earth, 'Bhuvaha' representing the sky above the earth, and 'Swaha' representing the heavens. These representative words and their respective worlds were created by the creator Brahma at the beginning of creation.]

-----२. ॐ यो वै श्रीरामचन्द्रः स भगवान् यश्चाऽखण्डैकरसात्मा भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/2. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

He is the supreme Atma or Soul (the pure cosmic Consciousness) which is eternal, uniform, universal, indivisible and immutable; it is a single entity that cannot be partitioned, fractioned and fractured in any way whatsoever. It is one unified whole.

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/2).

-----३. ॐ यो वै श्रीरामचन्द्रः स भगवान् यश्च ब्रह्मानन्दामृतं भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/3. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

He is a personified form of the Amrit (the ambrosia or elixir) of supreme and undiluted Anand (bliss, happiness, ecstasy, beatitude and felicity) that is associated with Brahm and Brahm-realisation.

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/3).

-----४. ॐ यो वै श्रीरामचन्द्रः स भगवान् यस्तारकं ब्रह्म भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/4. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

He is the Tarak Brahm—i.e. he is the supreme Lord who can provide the creature with liberation and deliverance from this world and its never ending miseries and the

cycle of birth and death. He is the supreme Lord who can provide the soul of the creature with emancipation and salvation.

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/4).

५. ॐ यो वै श्रीरामचन्द्रः स भगवान् यश्च ब्रह्मा विष्णुशिवो यः सर्वदेवात्मा भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/5. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

He is the one who has revealed himself as the Trinity Gods known as Brahma (the creator), Vishnu (the sustainer) and Shiva (the concluder). [This is obviously true as these three Gods of the Trinity represent the Supreme Being performing three functions of creation, and Lord Ram is that Supreme Being.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/5).

६. ॐ यो वै श्रीरामचन्द्रः स भगवान् ये सर्वे वेदाः साङ्गाः सशाखाः सपुराणा भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/6. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

All the Vedas, their branches, all the Purans and other scriptures are nothing but the Lord revealed in their forms.

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/6).

७. ॐ यो वै श्रीरामचन्द्रः स भगवान् यो जीवात्मा भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/7. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

He is the Lord who has revealed himself as the Jivatma or the living being. [The word 'Jivatma or Jiva Atma' refers to the living being. Jivatma is the cosmic consciousness that comes to live in a gross body, or assumes a form of a gross body. Since this gross body harbours the Atma or the pure cosmic consciousness inside it, it begins to show all the signs of life and vitality, hence called a 'Jiva'—i.e. a living being. The otherwise inane and lifeless gross body has now become alive and active because of the presence of the Atma inside it, thereby giving it the unique honour of

being a 'Jiva Atma'. Since the Atma is an universal and unchanging entity that is Advaitya or non-dual by nature, and it is another name for the cosmic Consciousness known as Brahm that has manifested as Lord Ram, it follows that the Jiva Atma is also the Lord in this form.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/7).

—
८. ॐ यो वै श्रीरामचन्द्रः स भगवान् यश्च सर्वभूतान्तरात्मा भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/8. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

He is the Lord who resides in the bosom of all living beings as their Atma, the pure conscious soul, the cosmic Consciousness that resides in the subtle heart or the inner-self as the 'true identity or the true self' of the creature.

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/8).

—
९. ॐ यो वै श्रीरामचन्द्रः स भगवान् ये देवाऽसुरमनुष्यादिभावा भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/9. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

All the Gods, the non-Gods called the Asurs, and the Humans—indeed, all of them are the same Lord Ram (or the supreme Brahm) revealed in their forms.

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/9).

—
१०. ॐ यो वै श्रीरामचन्द्रः स भगवान् ये मत्स्यकूर्माद्यवताराः भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/10. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

It is Lord Ram (in his cosmic form as Vishnu) who had revealed himself as incarnations of Lord Matsya¹ (the Fish incarnation of Vishnu) and Kurma² (the Tortoise incarnation of Vishnu).

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/10).

[Note—¹*Matsya Avtaar* or the Fish incarnation of Lord Vishnu—In this incarnation as a Fish or Matsya, which is the first of ten divine incarnations of Vishnu, the Lord is said to have saved Manu, the progenitor of mankind, and the Saptarishis (the seven mental sons of the creator Brahma) along with their wives during the dooms-day deluge. They were made to board a boat which was pulled by this Fish and saved from being drowned. They re-populated the world later on. It is a story identical to the Biblical story of the Noah's Arc.

²*Kurma Avtaar* or the Tortoise incarnation of Lord Vishnu—Kurma or Tortoise incarnation of Vishnu—It is the second incarnation of Vishnu. The Lord had supported the legendary Mountain called Mandara which had started sinking during the churning of the ocean by the Gods and the Demons in search of Amrit, the elixir of eternal and life.]

—
११. ॐ यो वै श्रीरामचन्द्रः स भगवान् यश्च प्राणो भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/11. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

It is Lord Ram who has revealed himself as the 'Pran' or the vital life sustaining forces of creation. [The word 'Pran' literally means 'life and consciousness'. The word is used to mean the vital winds in conventional terms of Yoga and Upanishads because the vital winds are said to regulate all the functions of the creature's body. No living being can survive without the presence of air in this world.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/11).

—
१२. ॐ यो वै श्रीरामचन्द्रः स भगवान् योऽन्तःकरणचतुष्टयात्मा भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/12. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

It is Lord Ram who has revealed himself as the four aspects of the inner-self of all living beings, called the 'Antahakaran Chatusthaaye'. [The 'Anthakaran' is the inner self of the creature. It forms his subtle body. It has the following four components—Mana (mind), Buddhi (intellect), Chitta (the faculty of concentration, paying attention and memory; knowledge and sub-conscious), Ahankar (ego, pride, arrogance) and their attendant Vrittis (inherent character, traits, habits, inclinations and temperaments of a creature based on these basic components of the subtle body). That is, the basic nature of a person and the way he would react to a given circumstance, the way he would deal, behave and interact with the world, the way he would interpret things, the way he thinks, the things that would appeal to him and the things he would abhor, etc.—that is, the overall personality of the creature, all depends upon the mental setup tinged with the fundamental character traits that are firmly ingrained in him.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/12).

— १३. ॐ यो वै श्रीरामचन्द्रः स भगवान् यश्च यमो भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/13. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

It is Lord Ram who has revealed himself as the 'Yam'. [The word 'Yam' has three connotations—(i) Yam is the God of death¹, and hence Lord Ram is the one who brings about the conclusion of creation in the form of Yam. (ii) Yam is the God of Dharma—the deity who is responsible for implementation of the tenets of Dharma, or the eclectic principles of auspiciousness, righteousness, probity and propriety as well as nobility in thought and conduct. Hence, Lord Ram ensures that the tenets of Dharma are upheld in this creation. (iii) Yam also means self restraint and control over the sense organs. Hence, Lord Ram exemplifies these grand virtues of creation.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/13).

[Note—¹*Yam* as God of death and the deity responsible for upkeep of Dharma is the one who judges the creature for his deeds during his life and ascertains the reward or punishment that he deserves for them; he is therefore also called Dharma-Raj or the king who is responsible for ensuring that the grand and eclectic principles of Dharma are implemented in full in this world. If any creature violates its principles then Yam punishes him by condemning him to suffer in hell.

Yam God is extensively covered in the 1st and 10th Mandals of the Rig Veda. Sukta 10 of the tenth Mandal is totally devoted to him. Yam personifies the concept of death and life after death. As opposed to Niriti who is also the God related to death, Yam deals with giving justice to the dead person depending upon his deeds that he has done during his lifetime. Therefore, he is also called the patron God of Dharma, because he gives the dead person an abode in the heaven for his righteous and noble life, whereas Niriti is the patron God of death and destruction due to sins and evil way of life. According to legends, Yam's sister is Yami. His father is named Vivaswat or Vivaswaan, and he is also called 'Yam Vaivaswat' (Rig Veda, 10/14/5). His mother's name is Saranyu (Rig Veda, 10/17/1-2). He is regarded the patron God of those who are dying. He resides in the outer heaven. Out of the 3 Lokas (mythological worlds), the first two, i.e. 'Bhu' (earth; the terrestrial) and 'Bhuvaha' (the sky just above the surface of the earth; the space of the solar system) is the realm of Savita (the God who is treated as synonymous of Sun), while the third world, the 'Swaha' representing the heaven, is the abode of Yam (Rig Veda, 10/35/6). In some places he is also regarded as the son of a Gandharva and a marine beauty (Rig Veda, 10/10/4).]

— १४. ॐ यो वै श्रीरामचन्द्रः स भगवान् यश्चान्तको भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/14. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is ‘Bhagwan’ (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

Lord Ram is the one who concludes this creation or brings it to an end, and is the only one who lasts even after the creation is concluded. [In other words, (i) Lord Ram is Lord Shiva personified, or Lord Shiva is none but Lord Ram in his role as the concluder of creation, and (ii) Lord Ram is the cosmic Consciousness or the supreme Brahm who is the only entity that survives the conclusion of creation, and from whom the next phase of creation starts. This is because Lord Ram as Brahm is infinite, eternal and imperishable cosmic Consciousness.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/14).

—
१५. ॐ यो वै श्रीरामचन्द्रः स भगवान् यश्च मृत्युभूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/15. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra ‘OM’, himself personified.

Indeed, he is ‘Bhagwan’ (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

It is Lord Ram who has revealed himself as the Mrityu or death¹. [In other words, the God of Death is a form that Lord Ram takes to bring about the conclusion of creation. That is why it has been said in the scriptures that a wise and enlightened man does not fear from death as he has developed a sufficiently holistic view of life in which he sees the Lord everywhere in every phase of creation—he sees his Lord equally in life as well as in death.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/15).

[Note—¹Lord Ram is the sustainer as well as the concluder of the creation. There is no perplexity in it because as Brahm personified, the Lord is the beginning and the end of all that exists. Besides this point, Lord Ram has to get rid of evil and corrupt forces of creation so that righteousness and auspiciousness can prevail. Therefore, he is personified death for those who are pervert and sinful.]

—
१६. ॐ यो वै श्रीरामचन्द्रः स भगवान् यश्चामृतं भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/16. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra ‘OM’, himself personified.

Indeed, he is ‘Bhagwan’ (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

It is Lord Ram who has revealed himself as the ‘Amrit’ or the ambrosia or elixir of life. He is the nectar of life, the vital force of life, the essence of life, the eternal source of life.

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/16).

—
१७. ॐ यो वै श्रीरामचन्द्रः स भगवान् यानि पञ्चमहाभूतानि भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/17. OM salutations (or salutations to the supreme Brahman)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahman (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahman) himself personified.

It is Lord Ram who has revealed himself as the 'Panch Maha-Bhuts', or the five principal elements of creation. [In other words, the five elements that constitute the basic backbone of creation have their value and importance because they are one of the many forms of the Supreme Being known as Ram. Or, Lord Ram has assumed five forms called the 'Panch Bhuts' in order to carry out different functions of this creation. The Panch Maha-bhuts are the sky or space, air or wind, fire or energy, water or elixir of life, and earth upon which the entire edifice of creation rests. The difference between 'Five Bhuts' and 'Five Maha Bhuts' is that the former refers to the above five elements at the microcosmic level of creation dealing with the individual creature, while the latter term is applied to the same elements when they are considered in their macrocosmic form.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/17).

—
१८. ॐ यो वै श्रीरामचन्द्रः स भगवान् यः स्थावरजङ्गमात्मा भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/18. OM salutations (or salutations to the supreme Brahman)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahman (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahman) himself personified.

It is Lord Ram who has revealed himself as the entire creation—both in its immobile form as well as in its mobile form. [The word 'Sthaavar' refers to something that does not move or show apparent signs of life—such as members of the plant kingdom and rocks, mountains etc., while the word 'Jangam' means those who are mobile and exhibit clear signs of life—such as the members of the animal kingdom. In other words, every single unit of creation is a form of the supreme Brahman who is known by another name as Ram.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/18).

—
१९. ॐ यो वै श्रीरामचन्द्रः स भगवान् ये पञ्चाग्नयो भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/19. OM salutations (or salutations to the supreme Brahman)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahman (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahman) himself personified.

It is Lord Ram who has revealed himself as the 'Panch Agnis'¹, the five divine forms of the sacred fire.

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/19).

[Note—¹The five divine fires are the following—Garhyapatya' (गार्हपत्य—the fire of the household hearth), (b) 'Dakshinagni' (दक्षिणाग्नि—the fire used as a witness to making charities or any other religious festivity), (c) 'Ahavaniya' (आहवनीय—the fire to invoke the Gods during a ritualistic sacrifice), (d) 'Sabhya' (सभ्य—the fire of the Vedic period which was continuously lit) and (e) 'Awasathya' (आवसथ्य—the fire of the later Smriti period).

The *Garhyapatya fire*—This is the householder's fire. A householder has land and farm representing 'earth' in which he grows food. This food is grown with the help of the light of the Sun, and it is cooked in the fire of the fire place in the house. Hence, the Garhyapatya fire, or the householder's fire, is intrinsically present and is implied in these four entities. It is an integral part of these four. The earth has the 'fire element' because without heat and warmth, no seed would germinate and no life can survive on this earth. The food has fire present inherently in it because it is the energy inherent in food which helps to energise the creature that eats it. The presence of heat in the sun does not need to be explained because it is very evident.

The fire was the central piece of all religious life in early times of the Vedic period when a fire sacrifice was deemed to be the best religious activity that a righteous man can expect to do. In this context, the Garhyapatya fire is the main fire lit during such formal fire sacrifices. The fire pit was either square-shaped or rounded. In the context of the fire sacrifice, it was used for the purpose of daily rituals, cooking or warming the offerings, heating of the vessels, to perform circumambulation, to act as a main cauldron or reservoir of the sacred fire which was to be kept perpetually burning throughout the life of the householder once it was lit.

The *Dakshinagni fire*—This fire is a witness to making of charities when some water is poured as libation to the Gods. It signifies that the Gods are offered water to drink. To give water to the thirsty is the greatest form of charity. Therefore, this fire is symbolically present in water, and when it is poured, it signifies that the heat produced by sins committed by the person has been doused. Charities and donations make a man famous and renowned, hence the allusion to directions of the earth. His glory shines like the bright moon and he is called a star among human beings. He is the most exalted amongst his peers and compatriots even as the moon is most prominent amongst the stars in the sky.

Like in the case of the Garhyapatya fire, the fire that was lit in the main sacrificial shed or site just near the main fire pit but to the south of it and where donations and charities were made was called Dakshinagni fire. The fire pit for this fire was semi-circular or bow-shaped.

The *Ahawaniya fire*—This fire is lit to invoke the Gods, and the Gods live in the heaven; hence the reference to the sky, heavens and electric. Since Pran is the best form of the vital winds, the allusion means that the Gods are the most exalted forms that exist in creation. The 'electric' is a metaphor for immense strength, potent and power, which of course the fire possesses. This inherent quality of Electric that it possesses most

stupendous powers and strength is likened to the presence of Brahm in it even as the great power and strength present in a man is due to the Atma or Pran present in him. Even as a man is useless without the presence of Pran in him, the Electric would lose its importance if there was no Brahm present in it which gives it its punch and strength.

According to Vedic tradition, the invitational fire, the Ahawaniya fire that is lit to invite or invoke the Gods, is started from a spark brought from the Garhyapatya fire of the patron who does the fire sacrifice or on whose behalf it is being done. If such a fire is not available with him, then it is brought from some other person's house who worships the sacred fire on a daily basis. The Dakshinagni is then lit to bear witness to the charities made during the fire sacrifice.

The following are also regarded as the five fires— (i) The Sun, (ii) The Lightening, (iii) The Terrestrial fire, (iv) The Master or Lord of the household, and (v) The Chief Priest.

Scriptures ordain that a learned person should worship the fire element by doing five types of sacrifices in his life. These are called the Panch Maha Yagya (the five great sacrifices). They are the following— (1) Bhut Yagya refers to taking care of other creatures in creation, such as feeding animals and providing for their protection and shelter. (2) Manushya Yagya refers to doing the same thing for fellow human beings as done for animals and other creatures of this creation. (3) Pitri Yagya refers to offering oblations to dead ancestors and doing religious activities for the peace of their souls. (4) Dev Yagya refers to the performance of fire sacrifices in which offerings are given to the sacred fire which sustain the Gods and are done to honour them. (5) And Brahm Yagya refers to the study of the Vedas and other scriptures that enlighten the man about the ultimate Truth known as Brahm. These five sacrifices have been described in Ashramo-panishad, verse no. 3.

According to the *Pran Agnihotra Upanishad* of Krishna Yajur Veda, verse no. 12, the five holy fires are the following—Pran or breath (because it keep the body warm and alive), Ahawaniya, Dakshinagni, Garhapatya, and Sarwa-Praaschitya or the fire of repentance, expiation and penance'.

According to the *Pran Agnihotra Upanishad* of Krishna Yajur Veda, verse no. 19, there are *five fires* in the body. They are—(i) Suryaagni also known as Darshanaagni, (ii) Ahawaniya Agni, (iii) Sharir Agni, (iv) Dakshinaagni, and (v) Koshtagni or Kosta Agni which is akin to the Garhyapatya Agni.

The *Yogshikha Upanishad*, Canto 5, verse nos. 29-32 of the Krishna Yajur Veda describes the following 5 *fires*—Kalagni, Samulaagni, Vadaagni, Electric (lightening) and Sun (the cosmic cauldron of fire).

—
२०. ॐ यो वै श्रीरामचन्द्रः स भगवान् यः सत्पव्याहृतयो भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/20. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

It is Lord Ram who has revealed himself as the 'Sapta Maha Vyarihitis'¹, the five divine forms of subtle life. [The Vyarihitis were the first esoteric words uttered by Brahma, the creator, at the time of creation, and each of them metamorphosed as a world of its own.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/20).

[Note—¹The *Vyahritis* are the primary root words pronounced by the creator Brahma at the time of the beginning of creation and from which formed the nucleus around which the seven worlds formed. In other words, the rest of the creation was revealed from these primary sounds created by Brahma.

The seven 'Vyahritis' are the words—(1) Bhu, (2) Bhuvaha, (3) Swaha, (4) Maha, (5) Janaha, (6) Tapaha, and (7) Satyam. 'Bhu' was the nucleus for earth, 'Bhuvaha' for the sky above the earth, 'Swaha' for the space beyond the earth's atmosphere and is generally meant for the heavens, 'Maha' stands for the greater heavens beyond the solar system, called the Maha-Loka where enlightened sages and seers are supposed to dwell (as opposed to earth where ordinary creatures including subterranean creatures would finally take up residence), 'Tapaha' was the place where exalted ascetics would do penances and austerities, and 'Satyam' was the truthful and ultimate abode where the ultimate and irrefutable supreme truthful entity which is the only Authority in creation resides.

According to Sankhya Shastra and the Purans, Brahma, who is known as 'Swayambhu' (self-created and self-begotten in the sense that he had no father or ancestor from whom he descended) created seven elements called 'Vyahriti', viz. Bhuh, Bhuvaha, Swaha, Mahaha, Janaha, Tapaha and Satyam respectively (भूः, भुवः, स्वः, महः, जनः, तपः, सत्यमः) which constitute the fundamental elements which formed the gross body of the creation as its core building blocks at the macro level. Encircling this core is the rounded globe called 'earth' which is surrounded by concentric circles constituting of 'water' (जल), 'energy' called 'Tej' (तेज), 'wind or air' (वायु), 'sky or space' (आकाश), the notions that are described as 'pride, ego, arrogance, haughtiness and vanity' collectively called 'Ahankar' (अहंकार), and the notions of 'importance, majesty, grandeur, magnificence and lordliness' called collectively as 'Mahattatva' (महत्तत्त्व). Each of them was ten times larger than its preceding layer or circle.

The seven Vyahritis and the worlds they represent are the following—
 (a) 'Bhu' represents this world (earth), fire, Rig Veda and Pran (life giving breath); (b) 'Bhuvaha' represents the sky called Antariksha, wind or air, Sam Vedas and Apaana wind (i.e. the wind which passes down the intestines and helps in digestion and excretion); (c) 'Swaha' represents Dukoka (the heavens), Aditya (the celestial sun), Yajur Veda and Vyan (the wind that prevails throughout the body); (d) 'Maha' represents Aditya (the Sun God), Chandrama (the Moon God), Brahm (the supreme transcendental Being who has no specific attributes) and Anna (food which sustains life in this creation); (e) 'Janaha' represents the world inhabited by mortal creatures such as the life on earth; (f) 'Tapaha' represents the world where great ascetics and hermits live to do severe penances and austerities, and therefore it is most auspicious and holy and marked by an effulgence of divine energy and splendour; and (g) 'Satyam' representing that truthful abode where the supreme transcendental Brahm lives; it is the ultimate destination of all spiritual pursuits, and is marked by eternal beatitude and felicity.

The Taittiriyo-panishad of Krishna Yajur Veda, in its Valli 1, Anuvak 5 describes these Vyahritis. It however focuses on four Vyahritis only, i.e. Bhu, Bhuvaha, Swaha and Maha. In this verse, the different ‘Vyahritis’ are being worshipped as manifestations of the supreme transcendental Brahm.]

—
२१. ॐ यो वै श्रीरामचन्द्रः स भगवान् या विद्या भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/21. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra ‘OM’, himself personified.

Indeed, he is ‘Bhagwan’ (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

It is Lord Ram who has revealed himself as glorious virtue known as ‘Vidya’— i.e. knowledge in all its forms. [Knowledge is the most important component of creation as even the basic functions of life depend upon knowledge.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/21).

—
२२. ॐ यो वै श्रीरामचन्द्रः स भगवान् या सरस्वती भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/22. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra ‘OM’, himself personified.

Indeed, he is ‘Bhagwan’ (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

It is Lord Ram who has revealed himself as ‘Saraswati’¹, the Goddess of knowledge, erudition, sagacity, skills and wisdom as well as the faculty of speech. [In other words, the sublime and grand virtues that are represented by this goddess are nothing but one of the numerous majestic and eclectic virtues of Lord Ram revealed in that divine form.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/22).

[Note—¹*Saraswati*—In the form of a goddess known as Saraswati who personifies the virtues of learning, wisdom, erudition, knowledge, expertise and skills of all kinds as well as all kinds of arts, crafts and sciences and all other bodies of knowledge that exist in this creation, she appears first in the Rig Veda, 1/164/49, and subsequently in Rig Veda, 6/61/1-14, 7/95/1-2, 4-6, and 7/96/1-3. The Goddess is also honoured in other Vedas as follows—in Sam Veda, 1461, in Yajur Veda, 20/84 and 34/41, and in Atharva Veda, 6/94, 18/1/42-43. The faculty of speech called Vak has been personified as a goddess. She is related to Brihaspati, the patron God of speech and wisdom (Rig Veda, 10/71/1). She is the patron goddess of speech because all forms of knowledge need speech and the ability to express and explain things properly to be perpetrated and become useful for this creation. Suppose there was no speech, then the knowledge would not have been disseminated so widely. All the Vedas are said to be created by her; hence she is regarded as the mother of the Vedas (Gayatri Rahasyo-panishad, 4/5/9-10).

According to the Purans, she is the Shakti or dynamic power of the creator Brahma because any specialised process would require technical skills, expertise and relevant knowledge in order to complete it successfully—especially the one as technical and complicated as the one related to the creation of a vast and infinitely complex structure known as the universe that is continuously evolving and ever changing in nature, in which no two units are alike, and which has defied explanation and full understanding even at the hands of the highest of intelligent brains. No success in any auspicious endeavour is possible without intelligence, wisdom, erudition, relevant knowledge, skills and expertise.

Since Goddess Saraswati embodies these virtues in her self, and since the Vedas are the traditional ancient repositories of all knowledge that was created by Brahma the creator, it is said that the Vedas are personified forms of Saraswati. Again, since the information contained in the timeless Vedas were passed on from generation to generation by the process of teaching and learning which entails the use of speech and skill with language, this Goddess is said to patronize these two—the faculty of speech called Vak, and skills with the language. Learning and teaching also requires intelligence and a properly functioning mind and its subconscious, these too were patronized by Saraswati. That is why a person who is highly learned and scholarly, who is wise, intelligent and erudite, is said to be especially blessed by Goddess Saraswati. The Vedas created by Brahma would have been useless had it not been for Saraswati that enabled these Vedas to be revealed, taught and propagated from generation to generation.

Etymologically, 'Saraswati' represents a river, and this is how she is represented in the Rig Veda, because the word literally means 'to flow'. This is a very apt definition for Saraswati because that knowledge which 'flows and spreads', which 'grows and develops', is good for all and it blooms, while that which is locked in books and shelves of libraries is as good as non-existent, it becomes stagnant and has no practical value and utility. Metaphorically, this 'flow' can also represent speech because what we speak also flows forth from our mind and tongue; that is why good orators are said to be making a flowing and flowery speech that springs out from their mouth in a natural flow much like a stream gushing out from a natural spring or flowers that blossom in the spring season on their own.

Since the light of knowledge and wisdom is the anti-thesis of the darkness created by delusions and ignorance, she is iconographically depicted clothed in spotless white—the colour of all-inclusiveness purity and irrefutable immaculacy, of absolute truth and reality, as well as of wisdom, knowledge and light that removes the various shades of darkness representing ignorance and delusions. She sits on a lotus also symbolizing purity and cleanliness.

Her mount or vehicle is the Hans, the Swan, which is itself regarded as a very wise bird. It is believed that it would pick up pearls and leave the rest of the gems aside from a collection of jewels, and drink pure milk and leave its adulterants to symbolise its ability of selecting and accepting the best of what is available. Saraswati sitting on the Hans implies that mere technical knowledge, skill and expertise alone are not enough if it is not complemented with wisdom, insight, erudition and enlightenment. This means a person on whom Saraswati is pleased would use his discretionary intellect and wisdom to select the best option available to him; he would pick out the nuggets of wisdom contained in the vast and voluminous scriptures that are of any spiritual worth for him

and accept them in his daily life, leaving aside the rest. The swan moves majestically in a pond of lotus flowers, it lends glory to the pond and the flowers because it is the only living entity in the immobile surroundings. Likewise, a wise and learned man is like a gem in the society.

In mythological lore, a Peacock is also depicted as her vehicle. The peacock is said to be the most beautiful bird with its opened plume of colorful feathers—this symbolises the fact that knowledge can not only bring the best things of the world to the person who has knowledge and expertise on any subject but also to symbolise that it is a person's degree of mental development and the level of his wisdom, knowledge, erudition and enlightenment that makes him attractive, much respected and honoured rather than the amount of physical wealth he possesses, the strength of his body or its beauty that has any real importance. The peacock in its self is not a beautiful bird; it is its colourful plume of open feathers that makes it so charming and attractive. So, mere knowledge and intelligence is not as important as their type and the use to which they are put. A man's knowledge can be the cause of ruin and miseries for others, while another man's knowledge can show happiness and peace to the less fortunate ones. Obviously, the latter is revered by the society and the former is loathed.

In iconographic accounts, she is shown as having four hands. The four arms are indicative of her all-inclusiveness, as they stand for the four Vedas as well as the four cardinal points of the directional compass (east, south, west and north). Further, the supreme transcendental cosmic Consciousness known as Brahm is also said to have four Pads or aspects—refer Chandogya Upanishad, Canto 4, Section 5-8 of Sam Veda tradition.

In one version, two of the hands hold a Veena (Indian lute)—one hand holding it, while the other hand strumming its string to indicate that she is eternally singing the hymns of the Vedas, deriving eternal bliss from this singing, and perpetually immersed in contemplation and meditation. The Veena, a musical instrument used to sing melodiously, indicates the ability to be sentimental and emotional on the one hand, and this involves the interaction of the heart because a good singer sings from the heart, and to be intelligent and have a sharp mind which naturally involves the mind and intellect on the other hand, because one has to be an expert in the Vedas and the languages in order to remember the complicated verses and recall them flawlessly while singing. Coordination between the heart and mind is very necessary for singing; singing is not possible if the heart and the mind are not rested, are not at peace with them selves, and not in harmony. The third hand has an Akshamala (prayer rosary). The rosary indicates that inspite of knowing everything and being Brahm personified, she remains constantly engrossed in doing Japa or repeating some divine Mantra herself to teach her followers never to abandon contemplation and meditation as well as the use of divine Mantras. The fourth holds a book symbolizing knowledge in all its forms, in its most visible and tangible form. The book indicates knowledge not only of the scriptures but of all the sciences, arts and crafts taken together.

In another version, she is depicted as holding a rosary, a goad, a loop and a book in her four hands—refer verse no. 38 of the 'Saraswati Rahasya Upanishad'. The symbolism of the goad and the loop is obvious. They indicate the fact that when a man becomes wise he is able to rein in his sense organs by using the loop, and coax himself to follow the correct

path by using the goad of wisdom, erudition, knowledge and enlightenment.

Saraswati is considered as the divine consort of Brahma, and hence represents his power of intelligence, wisdom, skill, erudition, expertise and knowledge that enabled Brahma to create the Vedas and the rest of this creation.

An entire Upanishad called *Saraswati Rahasya Upanishad* belonging to the Krishna Yajur Veda tradition is dedicated to her.

In Christianity, *Saint Catherine* is honoured as the patron saint of learning, students and educational institutions. She is a lady saint like goddess Saraswati and was born in Alexandria in a wealthy family in CE 294. Her name before baptism was Dorothea. She had accepted Christ as her betrothal, and as proof of her devotion for the Lord she was given a ring in her dreams which she found on her fingers when she woke up. But this dedication led to her being martyred during the rule of the Roman Emperor Maximian. It is believed that the angel of God took her body to the foot of Mountain of Moses in the Sinai desert. This mountain is where Moses had received the ten Commandants from the Lord. A monastery in her name exists there today.]

— २३. ॐ यो वै श्रीरामचन्द्रः स भगवान् या लक्ष्मी भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/23. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra ‘OM’, himself personified.

Indeed, he is ‘Bhagwan’ (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

It is Lord Ram who has revealed himself as ‘Laxmi’¹, the Goddess of wealth and prosperity. [In other words, it is Lord Ram in his cosmic role as the sustainer of creation assumed the form of goddess known as Laxmi so that he can provide the creature with material comfort and pleasures of life so that the creature is not put to undue inconvenience.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/23).

[Note—¹*Laxmi* is the Goddess of well being, majesty, wealth and prosperity. She is the divine consort of Lord Vishnu and represents the dynamism of the Lord that helps him to carry out the function of sustenance, development, growth, nourishment and protection of this vast and myriad creation.

The Nrisingh Purvatapini Upanishad of the Atharva Veda, in its Canto 4, verse no. 11 describes the Mantra dedicated to this Goddess. To quote—“OM salutations! The most glorious, majestic, powerful, great and divine Goddess is the *Laxmi** of the three worlds called the Bhu Loka (the terrestrial world where mortal creatures live; the earth), the Bhuvaha Loka (which is the lower heaven where the junior Gods and spirits live), and the Swaha Loka (the upper heaven where the Lord of the world Vishnu lives). [*The word *Laxmi* is used here as an adjective to describe the glorious virtues and majestic qualities that give greatness and supremacy to an entity. It is usually measured in terms of grandeur, magnificence, prosperity, opulence, supernatural powers, sway and authority that such an entity possesses. In materialistic world it is usually a synonym for material wealth, prosperity, opulence and the fame that

comes with them. In other words, the divine Goddess Laxmi who is the consort of Lord Vishnu personifies these virtues. Since Lord Vishnu is another name for the Viraat Purush, the macrocosmic all-pervading and all-inclusive form of the supreme Brahm, from whom the entire creation has been born and who completely soaks it like water in sponge, it follows that Laxmi represents the dynamic qualities of Vishnu that helps the Lord to sustain and protect the world.]

Let the great Goddess Maha-Laxmi whose other name is 'Kalkarni' (i.e. the one who actively controls all the deeds and actions of the creature in all phases of time and circumstance) inspire and impel us towards doing auspicious, righteous and noble deeds.'

This Mantra dedicated to the great Goddess Laxmi in the Gayatri Chanda (style of poetical composition) is enunciated in the Yajur Veda, and is therefore called the 'Maha-Laxmi Gayatri Mantra' of the Yajur Veda. It has twenty-four letters or syllables.

Laxmi is the patron goddess of wealth, and she epitomizes all round welfare and well being, not only in material terms but also in spiritual terms for only a well off aspirant who has not to bother about his daily needs can comfortably involve himself in religious activities such as doing fire sacrifices and making charities. If a man is mentally worried about his bread and butter, he would find it hard to concentrate on spiritual pursuits without a sense of guilt of not living up to his responsibilities towards his family, especially when he has spent the whole life as a householder with a large bundle of responsibility on his shoulders. Even the cosmic sustainer and care-taker, Lord Vishnu had to keep her with him in order to take care of the material needs of his subjects. An entire Upanishad, called the 'Saubhagya Laxmi Upanishad' belonging to the Rig Veda tradition is dedicated to this goddess. This Upanishad is chapter no. 9 of this humble author's anthology of Rig Veda Upanishads.]

—
२४. ॐ यो वै श्रीरामचन्द्रः स भगवान् या गौरी भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/24. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

It is Lord Ram who has revealed himself as 'Gauri', the Goddess who is the divine consort of Lord Shiva and considered as the Mother Goddess. [The Goddess Gauri is also known as Parvati who is regarded as the Mother of all other forms of goddesses. She is a personified form of Shakti, the cosmic dynamic powers and energy of the supreme Brahm by which the latter does anything. This Shakti is not different or separate from Brahm but only a manifestation of the latter's cosmic dynamism, energy and powers. Since Lord Ram is none else but Brahm personified, it is said here that all the dynamisms and energies that are present in this creation, and all the Goddesses who are personifications of these grand virtues of Brahm, are actually the Lord himself playing out these roles in a secret form.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/24).

२५. ॐ यो वै श्रीरामचन्द्रः स भगवान् या जानकी भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/25. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

It is Lord Ram who has revealed himself as 'Janki', the daughter of King Janak and his divine consort. [Janki is also known as Sita. She is an incarnation of Goddess Laxmi or Rama who is the divine consort of Lord Vishnu and a manifestation of Shakti in its macrocosmic form.]¹

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/25).

[Note—¹*Sita* is the cosmic primordial primary energy and power called 'Shakti', which was responsible for setting in motion the process of creation, personified. She is the divine consort of Lord Ram who is none other than Lord Vishnu in a human form. An entire Upanishad, called 'Sito-panishad' is dedicated to her. It extols her divine, ethereal, holy and sublime aspects, and is the 4th Upanishad of the Atharva Veda. It is included in our present volume.

As has been pointed out earlier, Shakti is the dynamism and energy of the supreme transcendental Brahm in a personified female form. Shakti is an integral part of Brahm and is nothing but one of the Supreme Being's various forms to perform specific functions. It is this Shakti that has revealed itself as Sita or Janki. Hence, it is appropriate to say that it is Lord Ram who himself has revealed as Sita. Again, since it is Brahm that pervades in each pore of creation and there is nothing in this creation that is not Brahm, it clearly follows that Sita is also a form of this universal divinity known as Brahm.]

—

२६. ॐ यो वै श्रीरामचन्द्रः स भगवान् यश्च त्रैलोक्यं भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/26. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

It is Lord Ram who has revealed himself as the three legendary worlds, and hence is called the 'Trilokya'. [The word 'Trilokyam' has two connotations—one is that the Lord is able to see everything in all the three worlds, that nothing is hidden or secret from him because he is omniscient and all-knowing as well as a resident in the inner-self of all the creatures as their Atma or soul, and two, that all the three worlds are his revelation, or that all the three phases of creation—viz. the past, the present and the future—are uniformly pervaded by the Lord who is the omnipresent and all-encompassing Supreme Being of creation. The three worlds are the terrestrial world, the lower heaven represented by the sky just above the surface of the earth, and the upper heavens represented by the deep recesses of the sky.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/26).

२७. ॐ यो वै श्रीरामचन्द्रः स भगवान् यश्च सूर्यो भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/27. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

It is Lord Ram who has revealed himself as 'Surya¹', the Sun God in his subtle manifestation, and as the visible celestial Sun in his more visible form.

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/27).

[Note—¹The Sun/*Surya*— The Sanskrit word for the Sun God or Aditya is *Surya*. This word has three connotations—viz. (i) Sartehe—one how moves. This refers to the Sun because it moves constantly across the sky. It also refers to the supreme cosmic Consciousness that makes all movement possible. (ii) Sviryate—this means one who receives and accepts. This virtue refers to the fact that all offerings offered to the fire sacrifice are done in the presence of the Sun, and since the latter is the celestial cauldron of fire all the offerings are deemed to be offered to it. In another plane, it refers to the Jiva, the living being, who receives stimuli from the world and then accepts them and deduces that the world from where they originate is real and true. (iii) Suvatehe—meaning one who shines. This is very obvious in the case of the Sun. This virtue refers to the supreme Self or supreme Consciousness that is self-illuminated and self-effulgent.

Sun God or Surya appears first in the Rig Veda, 1/50. He is one of the chief Gods that sustain life. He is closely related to the Fire God; the Sun is a visible manifestation of the fire element. The sun is regarded as the 'eye' of the Viraat Purush, and at the time of creation when this Viraat Purush revealed himself as the individual creature such as for example a cow, a horse and a man, the Sun God took up residence in the eye (refer Aitereyo-panishad of Rig Veda, Canto 1, verse no. 4, and Canto 2, verse nos. 3-4). He is also regarded as visible manifestation of the supreme transcendental Brahm (refer Brihad Aranyaka Upanishad, 2/1/2; 2/5/5; 3/7/9. The Sun God watched the deeds done by all the creatures (Rig Veda, 1/50/2). The Sun is like the Atma of all the creatures (Akchu Upanishad, Canto 1, verse no. 1; Rig Veda, 1/115/1; Shatpath Brahman, 14/3/2/9).

The Sun is the brightest, the most splendourous, the brilliantly radiant, the most majestic and grandest entity in the entire firmament. The whole length and breadth of the sky is lit with its light; all the objects present in the sky, visible or invisible, are illuminated by its light. It is the eternal and infinite celestial source of light, heat and energy; it inspires, fosters, sustains and protects life in this world; it is synonymous with and a metaphor for life in all its dimensions. Its splendour and radiance makes it an apt metaphor for knowledge, wisdom, erudition, sagacity and enlightenment. As an embodiment of this virtue of knowledge, wisdom, erudition and sagacity he has been held in high esteem and as the great teacher and preacher of eclectic knowledge pertaining to the philosophy expounded by the Upanishads. He had assumed the form of a horse and revealed the Shukla Yajur Veda to the great sage Yagyavalkya. He was also the teacher of Hanuman, said to be incarnate Wind God and Lord Shiva, and who was the great, most ardent and the wisest devotee of Lord Ram.

From the physical perspective also, the Sun is regarded as a fount of light, energy and heat which supports life in all forms in this physical world. No life is imaginable without the presence of the Sun.

According to mythological accounts, the Sun God was the son of sage Kashyap and his wife Aditi from whom all the Gods were born. He is said to be a revelation from the eye of the Viraat Purush also known as Vishnu who is the macrocosmic all-pervading and all-encompassing vast and invisible form of the Supreme Being known as the transcendental Brahm. The physical Sun in the sky is the Viraat Purush's visible form. He was married to Sangya, the daughter of Vishwakarma who is regarded as the architect, builder and planner of the Gods. Sangya had two sons and one daughter from the Sun God—viz. the sons named Shraadhha-dev also called Vaivaswat Manu and Yam the god of death, and the daughter named Yamuna which is also the name of a famous river in India. Sangya could not bear the intensity of the Sun's heat and light, so she left her 'shadow' or image and herself went away disguised as a mare to do sever penance. From this 'shadow' were produced two sons and a daughter. The two sons were Shani God who is believed to be full of malice and evil forebodings reflecting the genes of his mother as a dark shadow, and Saarvarni Manu, and the daughter was Tapti literally meaning one who is fierce and hot. In due course of time, the Sun God found out that his real wife Sangya was involved in doing severe Tapa, so he was extremely pleased with her and brought her back. It was from her form as a mare that the Ashwini Kumars were born. They derived their name from the root 'Ashwa' meaning a horse. These twin sons of the Sun God are regarded as the medicine men of the Gods.

The Sun God revealed himself as Sugriv, the king of the monkey race, during Treta-Yug when Lord Ram incarnated, and as Karna during Dwapar when Lord Krishna came as an incarnation of Vishnu. Sun God rides a chariot driven by Arun who is the son of Vintaa (his mother) and the elder brother of Garud, the legendary heron or eagle who is the mount of Lord Vishnu. The seven horses of the chariot represent the seven colours of the Sun's light. He is constantly on the move and controls and regulates the seasons, months, solstice and year.

The Surya Mandal, i.e. the divine abode of the Sun God, has been narrated in the Vishnu Puran, section 2, canto 10, verse nos. 1-23. It is also referred to in the Tripadvibhuti Upanishad of the Atharva Veda, Canto 5, paragraph no. 15 as falling in the path of a spiritual aspirant who, upon leaving his gross body, is going astride the Garud (the divine vehicle of Vishnu which is represented by the OM Mantra here) through the path of the sky to the heaven where Lord Vishnu lives.

References of the Upanishads dealing with the Sun God—

- (a) Rig Veda = Aiteriyo-panishad, Canto 1, verse no. 4, Canto 2, verse no. 4.
- (b) Sam Veda = Chandogya Upanishad, 1/6/3, 5, 6; 1/10/7; 2/9; 2/14; 2/24/12-14; 3/1-11; 3/18; 5/13; 6/4/2 etc.; Savitri Upanishad.
- (c) Shukla Yajur Veda = and Brihad Aranyak Upanishad of Shukla Yajur Veda—2/1/2; 2/5/5; 3/7/9; 3/9/5; 5/15.
- (d) Krishna Yajur Veda = Akchu Upanishad, Cantos 1 and 2; Brahmo-panishad, verse no. 1; Taittiriya Upanishad, Valli 1, Anuvaak 1, verse no. 1; Valli 1, Anuvaak 5, verse no. 2; Shwetashwatar Upanishad, Canto 2; Naryan Upanishad, verse no. 1.
- (e) Atharva Veda = Prashna Upanishad, Canto 1; Surya Upanishad; Gayatri Upanishad.

According to Yoga Upanishads, the Sun God has his symbolic presence in the naval of the body in the Nabhi Chakra or the Manipur Chakra, and as the fire element in the Mooladhar Chakra, the Swadhisthan Chakra and the Kundalini. The dynamic energy of the sun represented by its life-giving powers is revealed in the form of consciousness that flows in the Pingla Naadi, the nerve passing through the right nostril.

The *Akchu Upanishad* lists some of the virtues of the Sun God in its Canto 1, verse no. 1 which is exclusively dedicated to his grand virtues.

Aditya or the Sun God, or his visible form as the celestial Sun, has been repeatedly regarded by the Upanishads as a visible *manifestation of the Viraat Purush* who himself is the macrocosmic gross body of Brahm. For example, Sam Veda's

Chandogya Upanishad—1/6/3, 5, 6; 1/10/7; 2/9; 2/14; 2/24/12-14; 3/1-11; 3/18; 5/13; 6/4/2 etc.; Shukla Yajur Veda's Brihad Aranyak Upanishad—2/1/2; 2/5/5; 3/7/9; 3/9/5; 5/15; Krishna Yajur Veda's Brahmo-panishad, verse no. 1; Taittiriya Upanishad, Valli 1, Anuvaak 5, verse no. 2.

He is the *eye* of the Supreme Being—refer Aiteriyo-panishad of Rig Veda, Canto 1, verse no. 4, and finds his abode in the creature's eye— refer Aiteriyo-panishad, Canto 2, verse no. 4.

The Prashna Upanishad of Atharva Veda, Canto 1, verse nos. 4-6, 8 describes the Sun God as the *Pran*—the vital life giving factor in creation, the life consciousness, and in Canto 1, verse nos. 9, 12-15 as Prajapati—the creator, motivator, nourisher, sustainer, protector and caretaker of the subjects of this creation. He is called the Fire God or the Vaishwanar Agni, the Viraat Purush, the Pran or life consciousness that supports all life in this world—Canto 1, verse no. 7.

The Akchu Upanishad of the Krishna Yajur Veda tradition is fully dedicated to the Sun God. It has two parts—in its Canto 1 sage Sankriti offers prayers to the Sun God, and Canto 2 contains the metaphysical and spiritual teachings of the Sun God for the benefit of the sage.

The Taittiriya Upanishad of the Krishna Yajur Veda tradition, in its Valli 1, Anuvaak 1, verse no. 1, says that the Sun God is known as 'Mitra', literally meaning a friend. This is because the Sun God's benevolence and life-sustaining abilities make him a fast friend of every single living being in creation. He fosters life and is a friend of life rather than being its enemy by annihilating it. He helps the world to develop and grow as well as to acquire its stupendous magnificence and glory—refer Taittiriya Upanishad, Valli 1, Anuvaak 5, verse no. 2.

He is also known as 'Savita'—refer Savitru-panishad of Sam Veda tradition, and Shwetashwatar Upanishad, Canto 2 of Krishna Yajur Veda tradition.

The Narayan Upanishad of Krishna Yajur Veda, in its verse no. 1 says that he was born from Lord Narayan, i.e. Lord Vishnu. The same thing is asserted in Brahmo-panishad of Krishna Yajur Veda, verse no. 1 which states that Aditya, the Sun God, is a manifestation of Lord Vishnu. But this is understandable because Vishnu and the Viraat Purush is the same Lord having different names according to the degree of subtlety and the scriptural text one is referring to; both are synonymously used. Whereas the Viraat Purush was the macrocosmic gross body of the supreme transcendental Brahm that appeared in the first stage of creation when Brahm decided to initiate it, he was called Vishnu at a little later stage when the visible creation was just about to be initiated, because it is from Vishnu that Brahma the creator was born who later gave shape to the creation itself.

'Aditya' or the Sun God appears in the Vedas as follows—Rig Veda-- 1/41/4-6; 2/27; 8/47/14-18; 10/185; Sam Veda—395; 397; Yajur Veda—23/5; 34/54; Atharva Veda—5/3/9-10; 16/3.]

२८. ॐ यो वै श्रीरामचन्द्रः स भगवान् यश्च सोमो भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/28. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

It is Lord Ram who has revealed himself as 'Som or Soma'¹. [The word 'Som' refers to the Moon God, while the word 'Soma' refers to a drink derived from the sap of a herb of the same name that is used as sanctified drink during fire sacrifices. It is white in colour. This drink is offered to the Gods as well as taken as sanctified drink by the participants of the rituals. It is said that Soma, the drink, is stored in Som, the celestial Moon, thereby giving the latter its name 'Som'. It is the elixir that gives

ecstasy and bliss to the Gods. In the present context it means that both the elixir of life known as Soma as well as the Moon God who is charged with its custody are actually the Supreme Being revealed in their forms. The Soma is the Supreme Being's magnificent quality of giving happiness, joys, bliss and ecstasy, while the glorious Moon in the heaven represents the virtues of providing peace, tranquility, calmness and rest to the creature who is finding himself agitated and restless due to the continuous turmoil and the numerous torments and miseries of this existential world.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/28).

[Note—¹The *Som* or the Moon God (also known as Chandrama)—He appears first in the Rig Veda, 10/85/19). He is the patron God of night. His origin is in the Mana (heart and mind; the emotions and thoughts) of the Parmatma or the supreme Lord (the Viraat Purush or Vishnu) (Yajur Veda, 31/12; Taittiriya Brahman, 3/10/8/5). His existence depends upon the Sun God. On the dark night, he is supposed to enter the Sun (Aiteriya Brahman, 8/28). Chandrama is synonymous with Som, the divine elixir and sanctified drink drunk during the religious sacrifices as it gives its drinker peace and a long life (Kaushatiki Brahman, 16/5; Aiteriya Brahman, 7/11). He is the controller of seasons and months; he always changes so appear to be like a new born everyday. He gives peace and long life to the 'Stota', the chanter of hymns as prayers (Rig Veda, 10/85/19).

Chandra or the Moon God or Som appears in the Vedas as follows—Rig Veda—10/85/19; Yajur Veda—1/28; Atharva Veda—6/78/1-2; 19/1.

The Yogshikha Upanishad of Krishna Yajur Veda tradition describes this Moon as being as the symbolic form of the water element. The moon is said to be the celestial pitcher of Amrit, the elixir of eternity and bliss that is drunk by the Gods. In the human body, it is represented by the Eda Naadi passing through the left nostrils and which is used during do Pranayam. [Refer Canto 1, verse 166.] It is also present as the crescent moon, the Ardha Chandrakar Chakra, which is said to be the shape of the water element of which the patron deity is Vishnu, the sustainer of creation, and located from the knee to the hip region. [Refer Canto 1, verse 176 and Canto 5, verse no. 13.] At other places it describes the symbolic importance of creating a union of the moon and sun as metaphor for the union of the creature with the supreme Brahm. [Refer Canto 1, verse nos. 56 and 68 for instance.] In the context of Pranayam it is used to indicate the bliss obtained by the ascetic. [Refer Canto 1, verse nos. 120, 127.]

Canto 1, verse no. 133 of this Upanishad describes the great Mantra 'So-a-ham' and asserts that the moon stands for the letter 'sa' of this Mantra. Other instances where moon appears in Yogshikha Upanishad are Canto 1, verse nos. 133, 146, 176, Canto 3, verse no. 11, and Canto 6, verse no. 4.

The Rudra Hridaya Upanishad of Krishna Yajur Veda, in its verse no. 4 asserts that the Moon God is Vishnu personified. This is because Vishnu is the sustainer and nourisher of creation much like the Som which is a divine elixir that sustains the Gods and gives them eternity. Another reason is that the physical form of Som is like the male semen which harbours life intrinsically inside it and is the means by which creation is brought about, and Vishnu in his more sublime form known as Viraat Purush is also the Lord from whom the entire creation emerged.

The Ram Purva Tapini Upanishad of the Atharva Veda tradition, Canto 4, verse no. 38 says that Chandrama or the Moon God is one of the ten Digpaals or custodians of the ten directions of the celestial globe. He is the patron deity of the north-western direction and worshipped in that corner. Verse no. 39 says that his weapon is known as Gadaa or the mace.

The Moon God is said to be a custodian God of the Soma, a white coloured drink derived from the sap of a plant of the same name. It is used as a sanctified drink during fire and other religious sacrifices and is offered to Gods. It is said to provide ecstasy and bliss. The Moon derives its name as ‘Som’ because of the fact that it is considered as the heavenly pitcher of this Soma juice stored by the Gods.]

_____ २९. ॐ यो वै श्रीरामचन्द्रः स भगवान् यानि नक्षत्राणि भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/29. OM salutations (or salutations to the supreme Brahman)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahman (or the Supreme Being), who is addressed by the ethereal Mantra ‘OM’, himself personified.

Indeed, he is ‘Bhagwan’ (the Lord God, the Supreme Being, the supreme transcendental Brahman) himself personified.

It is Lord Ram who has revealed himself as the different ‘Nakshatras’¹ or stars and their constellations. [In other words, all the gross bodies in the heaven such as the numerous stars and their equally numerous clusters are one of the myriad forms of the supreme Lord known as Ram.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/29).

[Note—¹The *Nakshatras*—The word Nakshatra refers to the star or constellation (group or cluster of independent stars) that is present in the lunar mansion which is the 1/27th part of the path of the moon’s revolution around the earth. It represents 13.33 degrees of the sky. Since the sidereal revolution time of the moon is a little less than 27 days and 8 hours, the moon travels through one Nakshatra during the course of a day. The day is therefore named after the particular Nakshatra through which the moon is passing on a particular day according to the lunar calendar. The Nakshatras occupy a very important place in astronomical and astrological calculations.

The Atharva Veda (14/7) and Maitraayaniya Sanhita (2/13/20) lists the names of twenty eight Nakshatras. These are the following—Ashvini, Bharani, Krittika, Rohini, Mrigshiras, Aardraa, Punarvasu, Pushya, Aashlesha, Maghaa, Purva-phaalguni, Uttar-phaalguni, Hastaa, Chitraa, Swaati, Vishaakhaa, Anuraadhaa, Jyeshtha, Mulaa, Purva-aashaadha, Uttar-aashaadha, Shrivanaa, Dhanisthaa, Shatabhisha, Purva-Bhaadra-padaa, Uttar-Bhaadra-padaa, and Revati.

The Purans however consider that the twenty seven Nakshatras are daughters of Daksha Prajapati and married to the Moon God called Chandra.

The Nakshatras are related to the twelve Zodiac signs called the Raashis. The Nakshatras are further classified as males and females, as well as benevolent ones and malevolent ones depending upon their positive or negative impact on the creature.]

३०. ॐ यो वै श्रीरामचन्द्रः स भगवान् ये च नवग्रहा भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/30. OM salutations (or salutations to the supreme Brahman)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahman (or the Supreme Being), who is addressed by the ethereal Mantra ‘OM’, himself personified.

Indeed, he is ‘Bhagwan’ (the Lord God, the Supreme Being, the supreme transcendental Brahman) himself personified.

It is Lord Ram who has revealed himself as the ‘Nava Grahas’¹ or nine Grahas or planets. [In other words, all the planets in the heaven are one of the numerous forms of the supreme Lord known as Ram.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/30).

[Note—¹The *Nava-Grahas* or nine planets—The Navgrahas are the following—Sun, Moon, Mars, Mercury, Jupiter, Venus, Saturn, Rahu and Ketu.

According to some texts, there are only eight Grahas or Astha Grahas because they treat the last two, i.e. Rahu and Ketu, as one entity. Refer Atharvashir Upanishad of Atharva Veda tradition, Kandika 2, verse no. 9. This Upanishad is in honour of Lord Rudra as another name of Brahm, and says that Rudra is a personification of the eight Grahas.

The Vishnu Puran, section 2, canto 12, verse no. 1-28 describes the Grahas and their divine chariots and their horses.]

३१. ॐ यो वै श्रीरामचन्द्रः स भगवान् ये चाऽष्टौ लोकपाला भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/31. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra ‘OM’, himself personified.

Indeed, he is ‘Bhagwan’ (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

It is Lord Ram who has revealed himself as the ‘eight Lokpaals¹’. [The word ‘Lokpaal’ means one who takes care of the world. Obviously, this role is played by Vishnu amongst the Trinity Gods. It is Vishnu who has incarnated as Lord Ram, so the similarity is evident. Here the implication is that the it is Lord Ram or Lord Vishnu who has manifested himself as the eight Lokpaals to take care of the eight directions of the gross world.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/32).

[Note--¹The *eight Lokpals* are the custodians of the eight directions of the world. They are represented by the following— (i) Indra (इन्द्र—the king of Gods), (ii) Agni (अग्नि—the Fire God), (iii) Yam (यम—the Death God; also called Dharma Raj because he upholds righteousness and nobility of thoughts and conducts), (iv) Niriti (निर्ऋति—the God who controls death due to sins and evil tendencies as opposed to Yam who judges the destiny of those who die depending upon the content of righteousness and probity element in their earlier life), (v) Varun (वरुण—the Water God), (vi) Vayu (वायु—the Wind God), (vii) Kuber (कुबेर—the treasurer of Gods), and (viii) Ish (ईश—Lord Shiva). Though Brahma and Anant (Vishnu or Sheshnath, the legendary hooded serpent on whom Vishnu reclines in the cosmic ocean called Kshir Sagar) are also considered guardians of the world and are listed as the last two amongst the ten Diggals, but the above eight Gods are regarded as the Lokpals.

Ram Purva Tapini Upanishad of the Atharva Veda tradition, Canto 4, verse no. 36-37 mentions the name of eight Lokpals, and verse no. 38 mentions the names of eight Diggals. Verse no. 39 lists their weapons.]

—

३२. ॐ यो वै श्रीरामचन्द्रः स भगवान् ये चाऽष्टौ वसवो भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/32. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra ‘OM’, himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

It is Lord Ram who has revealed himself as the 'eight Vasus'¹. [The Vasus are the Nature's gift to creature. They were the natural assets formed by the supreme Brahm so as to make life feasible and convenient in creation. In other words, the supreme Brahm who is also known as Lord Ram not only created this world but ensured that it is well provided for and its basic needs are taken care of by manifesting himself in the form of these eight primary requirements of life. This is the reason why one of the names of Vishnu is 'Vasudeo'—the Lord of Vasus. It ought to be noted here that Lord Ram is an incarnation of Vishnu or Vasudeo.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/32).

[Note—¹The *eight Vasus*— These *Vasus* are the various patron Gods who preside over the essential elements of life. They are eight in number as follows—Vishnu who is the sustainer, Shiva who is the annihilator, Kuber who is the treasurer of the wealth of the Gods, the Sun, Water, Fire, Wealth represented by gems and gold, and 'Ray' representing glory and fame. The element 'Fire' is the most potent, prominent and essential force in creation, because without fire the world would freeze to death. Hence, the Fire-God is said to be the chief amongst the Vasus. The 'fire' element is the active force in creation and is primarily responsible for kindling the cosmic cauldron that set in motion the process, and once having set it in motion it then sustained it and would finally annihilate it by burning it to cinders. On the other hand, Lord Vishnu is the passive force of creation represented by his other form of Viraat Purush which is the primary male aspect of creation. Lord Vishnu, who is the sustainer of the creation, is the Lord of Laxmi who is the Goddess of wealth, and is the supreme creator because Brahma, the old patriarch of creation who created the visible world and its creatures, was himself born atop the divine lotus that emerged from the navel of Lord Vishnu. Lord Vishnu utilizes the services of Laxmi who is the personification of the active forces of creation to create, sustain and annihilate the world.

The Vasus are symbolic Gods who represent those essentials aspects of creation without which life would be difficult to conceive and sustain and finally conclude.

The eight Vasus are the patron Gods who provide succour and a dwelling place for the whole creation. They symbolise those primary necessities of life without which existence is not possible. They are— (i) Kuber (the God of wealth and prosperity), (ii) the Sun God (who provides energy and food) and his rays and radiance (i.e. sunlight and the energy that it provides), (iii) Shiva (the concluder or annihilator of the creation), (iv) Vishnu (the sustainer), (v) the Water God (called Varun), (vi) the Fire God (called Agni), (vii) any body of water such as a pond, a river etc., and (viii) holy and pious people (who give advice and guidance to the creatures of the creation). According to Brihad Aranyak Upanishad 3/9/3, the Vasus are the following—Fire, Earth, Air, Antariksha (the space of the solar system), Aditya (Sun), Duloka (heavens), the Moon, and the Nakshatras (the stars and the planets).

According to Purans, the eight Vasus are the following—Dhruv (ध्रुव), Dhar (धर), Som/Soma (सोम—the sap of an elixir-providing plant called Som/Soma which is used during religious ceremonies as sanctified liquid offered to the Gods; it is white in colour and is said to be stored in the moon), Aapha (आप—water), Anil (अनिल—wind), Anal (अनल—fire), Pratush (प्रत्यूष) and Prabhaas (प्रभास).

These eight Vasus are the semi-Gods who symbolise the various types of assets needed to sustain this world. They therefore represent such assets as jewels, precious stones and gems, gold and other forms of wealth and property. Vasus also refers to

the fire and water elements as well as their grosser forms as the terrestrial fire and water bodies such as ponds and lakes; to the virtue of radiance, splendour and glory; to the ray of light; to Kuber (the treasurer of Gods), Shiva, Sun, Vishnu, and a simple and pious gentleman.

The Ekakchar Upanishad of Krishna Yajur Veda, in its verse no. 7, says that these Vasus are manifestations of Brahm in order to provide the creation with the necessities of life.

The Atharva-shikha Upanishad of the Atharva Veda, in its Kandika (Canto) 1 says that the Vasus were created in the beginning of creation from the first Matra 'A' of OM representing the first leg of the supreme Brahm along with Brahma the creator, the Rig Veda, the Gayatri Chand and the Grahapatya Agni.

The Brihajjabal Upanishad of the Atharva Veda, Brahman 4, verse no. 16 lists the eight Vasus as follows—Ghar, Dhruv, Soma, Kripa, Anil, Anal, Pratyush and Prabhash.

The Nrisingh Purvatapini Upanishad of the Atharva Veda, in its Brahman 1, verse no. 3 says that the Vasus, along with the Rudras and Adityas etc., were born out of the third step of the divine Anushtup Chanda in which the Mantra of Lord Nrisingh was revealed to the creator Brahma when he did severe Tapa in order to initiate the process of creation.

Lord Vishnu has one of his names as 'Vasudeo' because he is the sustainer and protector of creation, signifying his undisputed lordship over all the essential elements in Nature, called the Vasus of which there are eight in number, which were created at the beginning of creation to help sustain the upcoming creation. It ought to be noted here that Vishnu is also called Viraat Purush, the macrocosmic gross body of Brahm, and it is from this form of Brahm that the creator of the visible creation, i.e. Brahma the old patriarch of creation, had emerged atop a divine lotus that sprouted from the navel of Vishnu. In other words, everything has its origin in the supreme Brahm.

The word 'Vishnu' consists of two components—'Vishwa' meaning the world or the entire creation, and 'Anu' meaning an atom. Hence, this is made up of atoms called Vishnu, and therefore the latter pervades throughout this creation. The whole creation is a manifestation of Vishnu. The divine glories of Lord Vishnu have been extolled in the Tripadvibhuti Maha Narayan Upanishad of the Atharva Veda tradition, Canto 1, paragraph 5-6; Canto 8, paragraph nos. 17, as well as in Vishnu Puran, Chapter 1, Canto 2, verse nos. 1-32, 55-70.]

३३. ॐ यो वै श्रीरामचन्द्रः स भगवान् ये चैकादश रुद्रा भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/33. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

It is Lord Ram who has revealed himself as the 'eleven Rudras¹'. [The word 'Rudra' means angry, and it is one of the names of Lord Shiva, the concluder of creation and the third of the Trinity Gods. In other words, Lord Ram had assumed the form of Rudra or Shiva in order to bring this creation to conclusion. Refer verse no. 4/5 and 4/15.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/33).

[Note—¹The *eleven Rudras*—*Rudra* is the angry form of Lord Shiva. The word means 'the terrible one; the angry and ruthless one; one who roars and thunders; one

who makes the enemy weep; one who destroys this trans-migratory world of birth and death; one who destroys ignorance and delusions; one who eliminates evil and perversions.'

Rudra is a Vedic deity and has been eulogized in three full Suktas (hymns) dedicated to him. These are Rig Veda's 1/114/1-11; 2/33/1-15, and Yajur Veda's 16/1-66. Besides these Suktas, Rudra is honoured as a deity at a number of places in the Vedas—viz. Rig Veda—1/43/1-4, 5/42/11, 7/46/1-4, 7/59/12; Atharva Veda—5/6/3-4, 6/55/2-3, 7/92/1, 11/2; and Yajur Veda—11/54.

Rudra is regarded as the father of Marut, the Wind God (Rig Veda, 2/33/1). Rudra assumes many forms—usually it is eleven forms (Taittiriya Sanhita, 3/4/9/7), but sometimes they are also said to be thirty-three in number (Taittiriya Sanhita, 1/4/11/1). Rudra is regarded as having a close relationship with Agni, the Fire God (Shatapath Brahman, 5/2/4/13). The Padma Puran, Swargakhanda, Chapter 8 mentions only eight Rudras. These eight, eleven or thirty-three forms of Rudra might mean as many aspects of Shiva.

However, in terms of the Upanishads, the eleven Rudras stand for the ten vital winds called Prans + one Mana or mind. The ten Prans are five chief Prans such as Pran (breath), Apaana, Samaana, Udaana and Vyana, and five subsidiary Prans such as Nag, Kurma, Krikara, Devdutta and Dhananjaya. [Refer—Trishikhi Brahmin Upanishad, Canto 2, verse nos. 77-87 of Shukla Yajur Veda tradition; Dhyana Bindu Upanishad, verse nos. 55^{1/2}-57 of Krishna Yajur Veda tradition.]

Rudra is said to have created such mythological figures as Bhuts (ghosts), Pretas (disembodied spirits), Pishacha (goblins), Khusmaandas (malignant imps).

In iconography, he has been depicted as wearing long tresses coiled on the head, has strong powerful arms, has a body decorated variously with serpents or priceless ornaments, and holds a strong and invincible bow and arrow as well as a thunderbolt. When necessary, he becomes ferocious and charges at his enemies on a chariot or on foot, while at the other times he is full of mercy and compassion. He is closely associated with forests and mountains, and is also the patron deity of herbs and medicinal plants. Hence, he is the killer of diseases and a great healer. Here, 'healing' would mean spiritual healing rather than physical ailments afflicting a creature.

He destroys sins and evil tendencies in the world, and grants the boon of liberation and happiness.

According to the epic Mahabharata, Anushasanaparva, Chapter 14, it is Shiva in the form of Rudra who destroys this creation at the end of one cycle of creation.

The Sharav Upanishad of the Atharva Veda, in its verse no. 6, describes Rudra as Sharav—the killer or destroyer. In this Upanishad, Lord Shiva had assumed this form to liberate Vishnu from the form of Nrisingh (a half man and half lion form) which the Lord had taken to kill the demon Hiranyakashipu who had been tormenting the devotees of Vishnu to such an extent that he did not spare even his son Prahalada. After slaying this demon, Nrisingh roamed around in the forests striking terror in other creatures. It was then that Shiva, the universal Lord who has been honoured with the epithet of 'Mahadev' as he is the greatest and supreme God, had assumed the form of Sharav, the killer, and liberated Vishnu from the body of Nrisingh. Thus liberated, Vishnu had thanked him a lot and went to his divine abode called Vaikunth. So this ferocious form of Shiva known as Sharav was also called 'Rudra', the angry and ferocious form of the Lord. One can imagine the fight that might have raged between Nrisingh and Rudra, and obviously Rudra must have been more ferocious than Nrisingh in order to subdue the latter.

There is another connotation of the word 'Sharav'. The word literally means the killer or slayer. In other words, Sharav is that form of the Supreme Being which instils fear in the heart of evil and pervert creatures, and kills or eliminates their evil tendencies. The word also refers to 'the Lord who shines in the heart of his devotees' as their Atma or pure consciousness.

The creature or the embodied soul is called 'Shar' or the form of the ethereal spirit that has assumed a gross physical body having a head. One who cuts off the head is known as 'Sharav'. The head is a metaphor for pride and ego and their accompanying traits of hypocrisy, haughtiness and arrogance. It is in the head that all evil planning is done, and it is the head that inspires the creature to indulge in all sorts of vices and inauspicious deeds. When this happens, the great God, the Parameshwar, makes it sure that the soul of such a creature is liberated from the sinful body in which it has been trapped by killing the gross body and liberating the soul.

So, while on the surface it appears to be a physical fight between two powerful creatures, one being the Shar and the other being the Sharav, here referring to Nrisingh and Rudra respectively, it is actually a system evolved by Nature whereby evil and perversions are kept under check. It is a system instituted by the Supreme Being himself to regulate and maintain balance, order and law in his creation. Though Nrisingh was Lord Vishnu himself in that form, the latter forgot who he actually was once the Lord had assumed a physical form. This is the effect of Maya—the overwhelming power of delusions that automatically comes with having a gross body like that of ordinary creatures. This situation also highlights the reason why all the creatures are under the overpowering control of Maya—if Maya can delude Vishnu to forget about who he is and wander in the forests as some cruel creature in his form as Nrisingh then it is little wonder that ordinary creatures are held under the overpowering sway of Maya.

Now, who would liberate such primarily innocent souls trapped by Maya, and who would provide protection to other innocent creatures who are being subjected to torments by this single deluded and evil-possessed soul? Naturally it is their supreme Father who is very merciful and who is greatly pained at the predicament in which his off springs, the creatures, find themselves in. So this Father intervenes not only to free the trapped soul in the evil body, but also to provide succour and solace to other creatures who are being tormented by this single individual.

Thus, the Parameshwar assumed the form of Shriv or Rudra to liberate Vishnu from the evil body of Nrisingh.

The 11 Rudras—(1) Lord Shiva has eleven forms called *Rudras*. The eleven Rudras are the various manifestations of Lord Shiva. They are the following:--(i) Mannu (मनु), (ii) Manu (मनु), (iii) Mahinas (महिनस), (iv) Mahaan (महान), (v) Shiva (शिव), (vi) Ritdwaj (ऋत्ध्वज), (vii) Ugrareta (उग्ररेता), (viii) Bhav (भव), (ix) Kaal (काल), (x) Vamdeo (वामदेव), and (xi) Dhritvrat (धृतिव्रत). The eleven Rudras appear in Rig Veda 1/43/1, and Taittiriya Brahman 3/4/9/7. They are regarded as the father of the Wind God or the Maruts (Rig Veda, 2/33/1). The word Rudra means one who is angry, terrible and wrathful. Amongst the Rudras, Lord Shiva is regarded as the most senior and enlightened.

(2) The eleven Rudras according to Vishnu Puran (1/1/15) are the following—Har (हर), Bahuroop (बहुरूप), Trayambak (त्र्यम्बक), Aparajeet (अपराजित), Shambhu (शम्भु), Vrishakapi (वृषाकपि), Kapardi (कपर्दी), Raivat (रैवत), Mrigvyadh (मृगव्याध), Sharva (शर्व), and Kapaali (कपाली).

(3) Lord Shiva has eleven forms, and one of them is 'Rudra', which literally means anger, wrath and vehemence. The Lord is considered to be the most enlightened of the Trinity Gods, and is therefore called 'Maheshwar'. He always remains in a meditative posture, always contemplating and meditating on the supreme Soul and the Truth. But still he shows anger and mercilessness, because one of his tasks is to punish the evil and sinful ones by ruthlessly slaying them in order to protect the good and righteous souls in the creation. Further, when his meditation and peace is disturbed he also becomes angry. He remains aloof and disinterested in the world, because he is very wise and enlightened, and he stays in the form of an ascetic. Ordinary people think that he is proud, arrogant and haughty because he does not give

a damn to worldly formalities and niceties of behaviour. Shiva's failure to conform to set norms of proper and sane conduct makes him look most odd God.

The word 'Rudra' is literally used as a metaphor for anger, wrath, vehemence and cussedness. But this a very misleading title for Shiva because there are a number of great Upanishads which describe Rudra as none but the Supreme Being known as the transcendental Brahm from whom the entire creation has emerged, who sustains it and in whom the creation would finally collapse. It is this Brahm in the form of Rudra who is treated at the supreme Lord God of creation, and hence is called Maheshwar. The Rudra Hridaya Upanishad of the Krishna Yajur Veda tradition and Atharvashir Upanishad of the Atharva Veda tradition are exclusively dedicated to this theme. The Dakshin Murti Upanishad of the Krishna Yajur Veda describes the esoteric significance of the Shiva Tattva or the essential knowledge of Shiva who is the greatest Guru or moral preceptor and teacher of the creatures.

The Atharvashir Upanishad of Atharva Veda is especially relevant here because it explains the various epithets used to describe the virtues and glories of the supreme transcendental Brahm by Lord Rudra himself, and upon close reading it would be very clear that Rudra is describing Brahm when he describes himself.

The Nrisingh Purvatapini Upanishad of the Atharva Veda, in its Brahman 1, verse no. 3 says that the Rudras, along with the Vasus and Adityas etc., were born out of the third step of the divine Anushtup Chanda in which the Mantra of Lord Nrisingh was revealed to the creator Brahma when he did severe Tapa in order to initiate the process of creation.]

३४. ॐ यो वै श्रीरामचन्द्रः स भगवान् ये द्वादशाऽऽदित्या भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/34. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

It is Lord Ram who has revealed himself as the 'twelve Adityas'¹. [The Aditya is the Sun God, and is regarded as the most potent and powerful evidence of the existence of the Supreme Being. Refer verse no. 4/27. This verse means that it is Lord Ram as the Supreme Being who has not only revealed himself as the Sun God but also keeps the celestial Sun burning and sustaining life in this world. The entire solar system revolves around the Sun, implying that the entire wheel of creation is centered on Lord Ram. The Lord is like the central axis around which the wheel spins.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/34).

[Note—¹The *twelve Adityas*— The *twelve Adityas*—(a) According to mythology, there are said to be *twelve Adityas* which are simply as many forms of the Sun God. These are the revelations of Brahm in the form of the Sun to carry out the following functions of creation—(a) take care of the world (Rig Veda, 2/27/4); (b) are like the heads (Taittiriya Brahman, 1/2/3/3) and eyes (Jaimini, Uttar. 2/1/2/3) of all the creatures.

These twelve Adityas appear first in the Rig Veda 1/41/4-6 and 2/27. They are the sons of Aditi, the mother of Gods (Atharva Veda, 8/9/21). They are the following—the eight Vasus + Indra + Sun + Vishnu + Shiva = twelve in number.

(b) According to Brihad Aranyak Upanishad 3/9/5, the twelve months of the year represent these twelve Adityas, one month for one Aditya. In this Upanishad, sage Yagyawalkya draws a parallel between the twelve months of a year and the twelve Adityas for the following reasons—First, with the passage of one complete

year, a corresponding number of years are subtracted from the total number of years that a person is supposed to live in this world. That is, death comes so much the nearer to him. The passage of the sun across the sky from dawn to dusk is used as a symbolic way of depicting the passage of the life of a man from his birth till his death. Since there are twelve mythological suns and twelve months in a year, a parallel is drawn between them and the life of a man.

Second, the whole life of an individual creature as well as the entire creation as a whole depends upon the various seasons that appear in a year. If even one of the seasons is disturbed, the entire cycle of life is disturbed correspondingly. For the smooth functioning of life, all the seasons must appear in a rhythmic and systematic manner, and it is a scientific fact that the seasons, upon which the life on earth is so dependent, also themselves depend upon the sun. That is why the Adityas are termed as being synonymous with the twelve months of the year as well as with the life cycle of creation.

(c) According to Vishnu Puran, the twelve Adityas are the following—Dhata (धाता), Arayma (अर्यमा), Mitra (मित्र), Varun (वरुण), Anshu (अंशु), Bhug (भृगु), Indra (इन्द्र), Vivaswan (विवस्वान), Pusha (पूषा), Parjanya (पर्जन्य), Twashta (त्वष्टा) and Vishnu (विष्णु).

The Sun God is worshipped by twelve names during the twelve months of a year. These names and the months are as follows—(1) as Dhata during the first Hindu month of Chaitra also known as Madhu (roughly corresponding to mid-March and mid-April); (2) as Aryama during the second Hindu month of Vaishakha also known as Madhav (roughly corresponding to mid-April to mid-May); (3) as Mitra during the third Hindu month of Jyestha also known as Shukra (roughly corresponding to mid-May and mid-June); (4) as Varun during the fourth Hindu month of Ashad also known as Shuchi (roughly corresponding to mid-June and mid-July); (5) as Indra during the fifth Hindu month of Sravan also known as Nabha (roughly corresponding to mid-July and mid-August); (6) as Vivaswan during the sixth Hindu month of Bhadrapad also known as Nabhasya (roughly corresponding to mid-August and mid-September); (7) as Pusha during the seventh Hindu month of Aashwani also known as Tapa (roughly corresponding to mid-September and mid-October); (8) as Kratu during the eighth Hindu month of Kartik also known as Tapasya (roughly corresponding to mid-October and mid-November); (9) as Anshu during the ninth Hindu month of Marga Shirsha also known as Saha (roughly corresponding to mid-November and mid-December); (10) as Bhag during the tenth Hindu month of Pausa also known as Pushya (roughly corresponding to mid-December and mid-January); (11) as Twashta during the eleventh Hindu month of Magh also known as Esh or Ish (roughly corresponding to mid-January and mid-February); and (12) as Vishnu during the twelfth Hindu month of Phalgun also known as Urj (roughly corresponding to mid-February and mid-March).

Since the Sun God is a manifestation of the Supreme Being known as Viraat Purush, he is like an Emperor who, during his sojourn across the sky which is like his vast realm, is accompanied by many sages called Rishis, celestial courtesans called Apsaras, celestial musicians called Gandharvas, servants called Rakshas or demons, guards known as Bhalls, and serpents called Naags. The Rishis walk in the front singing the Lord's glories in sacred hymns; the Apsaras dance to the music scores by Gandharvas; the Rakshas (demons) push the chariot from rear; the Bhalls take care of the chariot and guide it along, while the Naags pull it forward.

These attendants are also different like the forms in which the Sun God is worshipped in different months as described above. The list is outlined month-wise in the following sequence—Rishi, Apsara, Gandharva, Raksha, Bhalla and Naag.

(1) The month of Chaitra—Rishi is Pulastya; Apsara is Kritsthal; Gandharva is Tumburu; Raksha is Heti; Bhalla is Rathkrit; and Naag is Vasuki.

- (2) The month of Vaishakha—Rishi is Pulaha; Apsara is Punjiksthali; Gandharva is Narad; Raksha is Praheti; Bhalla is Ojaha; and Naag is Kachaneer.
- (3) The month of Jyestha—Rishi is Atri; Apsara is Menaka; Gandharva is Hahaa; Raksha is Paurusheya; Bhalla is Rathaswan; and Naag is Takshak.
- (4) The month of Ashadha—Rishi is Vashishta; Apsara is Rambha; Gandharva is Huhu; Raksha is Shukra; Bhalla is Chitraswan; and Naag is Sahajanya.
- (5) The month of Sravan—Rishi is Angira; Apsara is Pramlocha; Gandharva is Vishswaivasu; Raksha is Varya; Bhalla is Srota; and Naag is Elapatra.
- (6) The month of Bhadrapad—Rishi is Bhrigu; Apsara is Anumlochaa; Gandharva is Ugrasen; Raksha is Vyagrha; Bhalla is Aasaaran; and Naag is Shankhapal.
- (7) The month of Ashwin—Rishi is Gautam; Apsara is Ghritaachi; Gandharva is Dhananjay; Raksha is Vaat; Bhalla is Suruchi; and Naag is Sushen.
- (8) The month of Kartik—Rishi is Bhardwaj; Apsara is Varchaa; Gandharva is Parjanya; Raksha is Senjit; Bhalla is Vishwa; and Naag is Earaawat.
- (9) The month of Margashirsha—Rishi is Kashyap; Apsara is Urvashi; Gandharva is Ritsen; Raksha is Vidyuchhatru; Bhalla is Taksharya; and Naag is Maashankha.
- (10) The month of Paush—Rishi is Aayu; Apsara is Purvachitti; Gandharva is Sfurja; Raksha is Arishtanemi; Bhalla is Uurna or Oorna; and Naag is Karkotak.
- (11) The month of Magh—Rishi is Jamdagni also known as Richik-tanaya; Apsara is Tilottama; Gandharva is Shatjit; Raksha is Brahmapet; Bhalla is Dhritrashtra; and Naag is Kambal.
- (12) The month of Phalgun—Rishi is Vishwamitra; Apsara is Rambha; Gandharva is Suryavarchaa; Raksha is Makhaapet; Bhalla is Satyajit; and Naag is Aswatar.

The Nrisingh Purvatapini Upanishad of the Atharva Veda, in its Brahman 1, verse no. 3 says that the Adityas, along with the Vasus and Rudras etc., were born out of the third step of the divine Anushtup Chanda in which the Mantra of Lord Nrisingh was revealed to the creator Brahma when he did severe Tapa in order to initiate the process of creation.

The Sun is said to have *twelve Kalaas* (shapes, forms, dimensions or aspects) and the Sun with each Kalaa would therefore be known by that name. They are called ‘Dwaadash Aditya’, meaning the twelve forms in which the Sun God is known. They are the following—Tapini, Taapini, Dhumraa, Jwaalini, Ruchi, Shushumna, Bhogadaa, Vishwaa, Bodhini, Dhaarini and Kshamaa.

Lord Ram is said to belong to the solar race because he had twelve Kalaas possessed by the Sun. There is an obvious parallel here.]

३५. ॐ यो वै श्रीरामचन्द्रः स भगवान् यश्च भूतं भव्यं भविष्यत् भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/35. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra ‘OM’, himself personified.

Indeed, he is ‘Bhagwan’ (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

It is Lord Ram who has revealed himself in all the dimensions of time and space—the past, the present and the future. In other words, there is not a single moment when Lord Ram as the cosmic Consciousness is not present in this world. [This implies that though the Lord’s worldly sojourn had ended when he left this earth for his heavenly abode as described in all the Purans and the epic Ramayana as well as in the Ram Purva Tapini Upanishad, Canto 5, verse no. 9, he continues to live amongst us at each moment of our lives.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/35).

३६. ॐ यो वै श्रीरामचन्द्रः स भगवान् यो ब्रह्माण्डस्याऽन्तर्बहिर्व्याप्नोति विराट् भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/36. OM salutations (or salutations to the supreme Brahman)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahman (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahman) himself personified.

It is Lord Ram, in his form as the Viraat Purush¹, who pervades uniformly throughout this universe and encloses it from all sides. He is present inside as well as outside this creation, being all-pervading, omnipresent and all-encompassing.

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/36).

[Note—¹The *Viraat Purush*—The *Viraat Purush*, according to metaphysics, is the gross body of the creation and it is this body which is the source from which the rest of the cosmos was moulded or created or manifested. That is, the entire creation, both visible and invisible, is a manifested or revealed form of this Viraat Purush.

Purush has been defined in Brihad Aranyak Upanishad, Canto 2, Brahman 5, verse no. 18 explicitly as the cosmic all-pervading macrocosmic form of the Supreme Being, called the Viraat Purush, who had entered each and every body of all the creatures and had taken up his residence there. According to the Aiteriyo Upanishad of Rig Veda, Canto 1, verse nos. 3, the supreme Brahman created the vast universe and his image in the form of the Viraat Purush, and the Gods were created from this Viraat—Canto 1, verse no. 4. When the mortal world consisting of the visible world was created, the human body was considered as the best image of the Viraat Purush, and thus all these Gods took up their residence in it—Canto 2, verse nos. 3-5.

The Mundak Upanishad of Atharva Veda, in its Canto 2, section 1, verse nos. 9-10 clearly affirm that it is the Viraat Purush, the macrocosmic all-pervading gross body of the supreme transcendental Brahman, that resides in the body of all living beings as their Atma.

The Ram Purva Tapini Upanishad of the Atharva Veda, in its Canto 3, verse no. 2, clearly states the supreme Lord resides in this creation as its Atma and Pran.

According to reverend Sankracharya's commentary on Katho-panishad, Canto 1, Valli 3, verse no. 11 and Canto 2, Valli 1, verse no. 12, the word Purush refers to that supreme entity which uniformly pervades in and completely fills everything that exists. It also refers to one who resides inside any place and completely owns that place. Therefore, this word Purush refers to the supreme transcendental Brahman who has taken up residence in the gross body of the creature at the micro level and in the Viraat Purush at the macro level. This Brahman pervades throughout them in a uniform way even as the sky and the wind element occupy all available space in the creation. That is also why sky is considered as a nearest analogy of Brahman because even the other all-pervading element, the wind/air, is present in it and not outside of it.

The Viraat Purush is the macrocosmic gross body of the supreme transcendental Consciousness known as Brahman. The counterpart of the Viraat Purush at the microcosmic level of creation is the Man or the Purush. The Man is an image of the Viraat Purush.

According to Vedanta, the Viraat is the sum total of all the gross bodies in the creation at the macrocosmic level. [Refer—The Tripadvibhuti Maha Naryan Upanishad of the Atharva Veda tradition, Canto 2, paragraph nos. 10-11.] The individual gross body of the creature is the microcosmic form of that Viraat, because the entire creation is a manifestation of the same Viraat, it is an image of Viraat.

According to the Purans, Viraat is known as Lord Vishnu. Since the Viraat is the male aspect of creation and the primary source of life, Vishnu is also regarded as the creator as well as the sustainer of the creation. But since Vishnu, as Viraat Purush, is the macrocosmic gross body of Brahm, the supreme transcendental Being, he is also regarded as being synonymous with Brahm.

The entire universe has been created by Vishnu's passive powers using Shakti as its active power and partner. The word 'Viraat' refers to something that is vast, colossus, immeasurable, fathomless and infinite; something that is beyond all terrestrial yardsticks and measurements. The supreme Lord encloses the entire creation from all the sides like an envelop, and at the same time he remains uniformly and inseparably present throughout it like salt which has been dissolved in water.

At the time of creation, the Trinity Gods, i.e. Brahma the creator, Shiva the concluder, and Vishnu the sustainer, had all emerged from the Viraat Purush. According to Purans, this Viraat and Lord Vishnu are the same divine factors of creation. The subtler form is known as Viraat, while its grosser form is Vishnu—though the terms 'subtle and gross' are only relative and for the purpose of understanding, because both are the same indivisible Brahm who is non-dual and immutable.

The word Purush according to metaphysics refers to the primary and supreme creator of creation known as the Viraat Purush who represents the macrocosmic gross Male body or aspect of the cosmos and is the first macrocosmic gross revelation of Brahm. Ultimately, this Brahm is the Supreme Being who has revealed himself as the Viraat Purush. The creation unfolded from this Purush when he metamorphosed as the gross body of the entire creation, visible and invisible. Therefore, he is the sum-total of all the gross bodies of all the creatures taken together in this creation at the macrocosmic level, and it is from his macrocosmic body that the entire creation was moulded. In other words, the Viraat Purush represents the entire spread of the cosmos. At the micro level of the world, the individual creature is the counter part of Viraat Purush. In other words, the individual gross body of the creature is the microcosmic form of that Viraat, because the entire creation is a manifestation of the same Viraat; it is an image of Viraat.

Literally, the word 'Purush' means someone who resides in a body. [Refer Brihad Aranyak Upanishad of the Shukla Yajur Veda, Canto 2, Brahman 5, verse no. 18.] Here the body is the gross forms of the various entities of creation in which the Viraat Purush, as the cosmic manifestation of the supreme Brahm or cosmic Consciousness took up residence at the time of creation, and does so since that time. When the creation would finally wind up, this Viraat would revert back to his original form as the invisible Brahm or the cosmic Consciousness. An entire Sukta in the Rig Veda, 10/19 is dedicated to this Viraat Purush

In the Purans, he is also known by other names, such as Vishnu, the sustainer. Since the Viraat is the male aspect of creation and the primary source of life, Vishnu is also regarded as the creator as well as the sustainer of the creation. But since Vishnu, as Viraat Purush, is the macrocosmic gross body of Brahm, the supreme transcendental Being, he is also regarded as being synonymous with Brahm. The entire universe has been created by Vishnu's passive powers using Shakti as its active power and partner.

The word 'Viraat' refers to something that is vast, colossus, immeasurable, fathomless, and infinite and beyond all terrestrial yardsticks. The supreme Lord encloses the entire creation from all sides like an envelop, and at the same time he remains uniformly and inseparably present throughout it like salt which has been dissolved in water. At the time of creation, the Trinity Gods, i.e. Brahma the creator, Shiva the concluder, and Vishnu the sustainer, had all emerged from the Viraat Purush. According to Purans, this Viraat and Lord Vishnu are the same divine factors of creation. The subtler form is known as Viraat, while its grosser form is Vishnu—though the terms 'subtle and gross' are only relative and for the purpose of

understanding, because both are the same indivisible Brahm who is non-dual and immutable.

The Viraat Purush is also the creator of this world as pointed out in Canto 2, paragraph 11 of Tripadvibhūt Maha-Narayan Upanishad, and the former is also entitled to be called Brahma the creator. It must be carefully noted that the difference lies in the level or plane of creation in which a particular entity is being considered for study.

The cosmic form of the Viraat Purush has been described in the Tripadvibhūt Maha Naryan Upanishad of the Atharva Veda tradition, Canto 2, paragraph no. 11; and Canto 6, paragraph no. 11.]

३७. ॐ यो वै श्रीरामचन्द्रः स भगवान् यो हिरण्यगर्भो भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/37. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

It is Lord Ram who had revealed himself as the Hiranyagarbha¹. [The 'Hiranyagarbha' is the cosmic egg from which the rest of the creation, including the Viraat Purush referred in verse no. 4/36 above, have emerged. It is the sum total of all subtle bodies of creation at the macrocosmic level of creation. Another name of Hiranyagarbha is 'Brahma the creator'. In other words, it is Lord Ram who is none else but the supreme transcendental Brahm personified, and it is from him that both the cosmic egg known as Hiranyagarbha at the most subtle level of creation, and a more grosser form of it known as Brahma the creator had emerged at the very initial stages of creation.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/37).

[Note—¹Hiranyagarbha—Hiranyagarbha is the macrocosmic subtle body of Brahm, so called because it is akin to the cosmic golden egg lying in the womb of Brahm from which emerged the Viraat Purush, the gross body of Brahm at the macrocosmic level of creation. The word Hiranyagarbha has two components—'Hiranya' meaning yellow, and 'Garbha' meaning the womb. Hiranyagarbha was the primordial cosmic fertilised egg, deriving its name from the fact that its yolk core was yellow and glowing with an incandescent light like the one radiating out from the splendorous Sun in the sky, called the Maartand.

There are different versions regarding this Hiranyagarbha. According to the concept of Vedanta, Brahm is the cosmic supreme and transcendental Consciousness residing in the macrocosmic causal body called the Ishwar. In this context, when Brahm decided to reveal or unfold this creation, first the causal body known as a Ishwar developed the macrocosmic subtle body called the Hiranyagarbha, and from this evolved the macrocosmic gross body of Brahm called the Viraat Purush. This is the picture at the macrocosmic level. All these three sublime bodies of Brahm at the cosmic level—viz. Ishwar, Hiranyagarbha and Viraat Purush—were invisible, subtle, unqualified, without any attributes, all-inclusive and all-pervading. It was the unrevealed form of Brahm. But that was just the beginning.

When this visible world was created, which had attributes and qualifications, the same macrocosmic units of Brahm metamorphosed themselves into their respective counterparts in the individual creature's body. Hence, Ishwar is represented by the Pragya or the individual's causal body, Hiranyagarbha is represented by the Taijas or

the individual's subtle body, and the Viraat Purush is represented by the Vishwa or the individual's gross body.

These three bodies are the three states in which consciousness exists, both at the macrocosmic level as well as the microcosmic level. At the microcosmic level, the Pragya relates to the deep sleeper state of consciousness called the Sushupta state, the Taijas relates to the dreamer state of consciousness called Swapna state, and the Vishwa relates to the waking state of consciousness called Jagrat state. The three corresponding states at the macrocosmic level are the Ishwar which relates to the cosmic deep sleep state of Consciousness called cosmic Sushupta, the Hiranyagarbha which relates to the cosmic dreamer state of Consciousness called cosmic Swapna, and the Viraat Purushh which relates to the cosmic waking state of Consciousness called cosmic Jagrat.

According to Purans, the Hiranyagarbha refers to the Brahma the creator, as well as to the Viraat Purush because Brahma was born atop a lotus that emerged from the navel of Lord Vishnu who is no one else but the Viraat Purush. If the word 'Hiranyagarbha' is to indicate the cosmic egg, then it was from this egg, lodged in the womb-like navel of Vishnu, that Brahma emerged. Hence, the 'original creator' was not Brahma but the Viraat Purush as Vishnu, and therefore the latter is the Hiranyagarbha—the golden cosmic egg. So we conclude that Hiranyagarbha essentially refers to the cosmic egg from which the rest of the creation evolved. Since Brahma is said to be the great grandfather of this creation, he is aptly named Hiranyagarbha, i.e. the cosmic egg from which this visible and gross form of creation evolved.

This concept of Hiranyagarbha being produced from the body of the Supreme Being called Narayan or Ishwar have been elaborately dealt with in *Maho-panishad*, Canto 1, verse no. 8 of the Sam Veda tradition. The same idea is reiterated in the *Tripadvibhut Maha-Narayan Upanishad* of Atharva Veda, Canto 2, paragraph nos. 9-12, and Canto 3, paragraph nos. 7-14 in the context of genesis of creation which addresses the primordial Lord as 'Adi-Narayan' or the Lord who preceded this creation.

The Hiranyagarbha is very subtle like the mind-intellect of the creature. The mind-intellect is also called the subtle body because it is through this mind-intellect that the Atma of the individual creature creates this world by using the mind's stupendous ability to imagine, envision and conceptualise things, and then using the intellect to justify it to be true, real and logical. But this instrument of the mind-intellect is invisible, is so subtle and hidden from view that its presence is only deduced by its astounding potentials which are manifested in the form of the gross body and its own stupendous capabilities. Whatever the mind wishes to do, it gets it done by the body.

There is another connotation to this observation. Since the mind is the creator of the world by its power of imagination, and then sustaining or perpetuating its own creation by believing in the truthfulness and reality of the world, it is therefore the mind itself that can conclude this world. So, while it is like Brahma the creator, it is also like Vishnu the sustainer and protector, and Shiva the concluder. If the same mind can assume three roles, it is not incongruous to believe that the same Hiranyagarbha is Brahma and Vishnu simultaneously. Since Shiva is a synonym used for the supreme transcendental Brahm—because the word 'Shiva' stands for an entity that is truthful, beautiful, auspicious, divine and holy as affirmed by a number of Upanishads of the Krishna Yajur Veda tradition that deal with the 'Shiva Tattwa', this Hiranyagarbha is also Shiva.

The word Hiranyagarbha has two components—'Hiranya' meaning yellow, and 'Garbha' meaning the womb. Hiranyagarbha was the primordial cosmic fertilized egg deriving its name from the fact that its yolk-core was yellow and glowing with an incandescent light like the one effusing from the splendorous Sun in the sky, called the Martand. It was lodged in the womb-like navel of the Viraat Purush. It also

resembled the musk deer in the sense that musk spreads its fragrance everywhere but it is not visible because it is hidden in the abdomen of the deer. Similarly, this Hiranyagarbha had spread its glory, radiance and splendour through the length and breath of the void of the cosmos, but was not visible itself.

This Hiranyagarbha is like the musk present in the body of the musk deer. The deer is not able to see the musk but is nevertheless maddened by its perfume, running mad in search of the source of the perfume not knowing that it is hidden well inside its own body. Similarly, the creature is unaware that the supreme Brahm is residing in his own bosom as the pure consciousness called the Atma while he spends his entire life searching for it everywhere in the outside world.

Hiranyagarbha is called Maartanda, the Sun, because of its golden colour and brilliance like the golden yellow and brilliant disc of the sun in the sky. Like the light of the sun illuminates the world and brings everything in it to light or knowledge, the Hiranyagarbha too brings to the fore the intentions of Brahm by revealing this vast creation. The Hiranyagarbha had spread the sacred divinity, the stupendous glory, the dazzling radiance and the brilliant splendour through the length and breath of the vast realm of the cosmos like the sun spreading its glory on the earth by way of its energy, light, heat and warmth.

The word 'Hiranyam' also refers to 'Amrit or elixir or nectar of eternity and bliss'; it also means 'green'. That is why greenery is associated with fertility, vibrancy, life and abundance of food and plentiful vegetation. The trees are green, and their precursor, the algae and moss, were also green. Indeed the food is the elixir of life in the world—nothing can ever survive without food and water. So, 'Hiranyagarbha' first created these to initiate the process of creation, and then sustained them once the process got under way. The 'Viraat Purush' as well as the 'Hiranyagarbha' are both used often synonymously to indicate the macrocosmic forms of the Male aspect of creation whose female counterpart is called 'Nature' or Shakti. The Shakti is the dynamic aspect of Brahm's creative powers and an effective method of displaying the Lord's cosmic authority.

The concepts of *Viraat* and *Hiranyagarbha* are inter-related as the latter refers to the subtle body of Brahm and the former refers to the gross body of Brahm at the macrocosmic level of creation. They have their origin in the supreme Brahm called 'Adi-Narayan'. This concept has been elaborately explained in the Tripadvibhut Maha-Narayan Upanishad of Atharva Veda, Canto 2, paragraph nos. 9-12, and Canto 3, paragraph nos. 7-14 in the context of genesis of creation.

The terms *Viraat* and *Hiranyagarbha* must be clearly understood to avoid confusion because they are used for both Brahma as well as Vishnu. The term 'Viraat' means anything of colossus dimensions and nature, something that is vast and infinite. The Viraat Purush is the gross body of the Supreme Being known as Brahm from which the rest of creation emerged—refer Canto 2, paragraph 10-11 of Tripadvibhut Maha-Narayan Upanishad of Atharva Veda. This Viraat has his roots in the cosmic egg in which the subtle body of Brahm took shape as the cosmic embryo, called the Hiranyagarbha—refer Canto 2, paragraph 12, stanza no. 1 of the same Upanishad. The latter is so-called because it was hidden in the cosmic womb ('Garbha'), and like the yellow-coloured yolk of the egg it was radiant and golden ('Hiranaya') in colour.

It was from this cosmic embryo called the Hiranyagarbha that the creation emerged, including the Viraat Purush, hence it is called 'Brahma the creator'. Refer Canto 2, paragraph 12, stanza 1 of Tripadvibhut Maha-Narayan Upanishad.]

३८. ॐ यो वै श्रीरामचन्द्रः स भगवान् या प्रकृति भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/38. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

It is Lord Ram who has revealed himself as the 'Prakriti'¹. [The word 'Prakriti' refers to Nature in its macrocosmic dimension. This Prakriti forms the primary nature of the individual creature. It is the driving force that impels the creature to do something in a particular way and also decides his natural habits, temperaments, tendencies, desires and aversions etc. At the cosmic level, it is the womb in which the entire creation conceived by the Supreme Being was nourished and developed till it took its shape in the form of the visible world. Hence, this verse means that it is Lord Ram playing out his cosmic role as the Mother who would nourish the creation in her cosmic womb as well as give the would-be creation its characteristic personality by shaping its nature, inclinations, temperaments, desires and aversions, its Vasanas (passions) and Vrittis (natural tendencies) etc.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/38).

[Note—¹*Prakriti*— The word Prakriti basically means 'nature' with all its connotations. The Chambers dictionary defines it as the power that creates and regulates the world; the power of growth; the established order of things; the cosmos; the external world especially that untouched by man; the inherent qualities in anything that makes it what it is; the essence; the being; the constitution; a kind or order; naturalness; normal feeling; conformity to truth or reality; the inborn mind; the character, instinct or disposition; the vital power; the course of life; the nakedness of truth; the primitive undomesticated condition; the strength or substance of anything; a deity personifying some force of physical nature.

Sir Monier Monier-Williams, in his encyclopedic Sanskrit-English dictionary describes it thus—'making or placing before or at first'.

The Chambers dictionary defines it as the power that creates and regulates the world; the power of growth; the established order of things; the cosmos; the external world especially that untouched by man; the inherent qualities in anything that makes it what it is; the essence; the being; the constitution; a kind or order; naturalness; normal feeling; conformity to truth or reality; the inborn mind; the character, instinct or disposition; the vital power; the course of life; the nakedness of truth; the primitive undomesticated condition; the strength or substance of anything; a deity personifying some force of physical nature.

The word Prakriti has many connotations, viz. the original or natural or basic form or condition of anything; the original or primary nature, character, condition, constitution, temperament, disposition; the fundamental form or shape or essence or pattern or standard or model, rule; Mother Nature which has the active physical natural forces that are responsible for unfolding the creation, its sustenance and annihilation; something that is inherent, innate, genuine, unaltered, unadulterated, basic, normal, bare, naked, crude, integral and stripped of all pretensions; the fundamental pattern, form, standard and model upon which the rest of the things are based; the crude or basic or root or seed form of any word, and by extension of anything expressed; that which decides the existential mode of anything; the coefficient, the multiplier of any fundamental element.

As inherent nature and temperament of a creature, it determines the way the world behaves and thinks; it determines the basic character of the creature and the creation as a whole because the individual creature is but a single unit of the creation. It ought to be noted here that the concept of Prakriti is intricately woven into the fabric of creation and conforms to both the views of Avyakta (un-manifest) and Vyakta

(manifest). At the subtle level, Prakriti is Avyakta, while at the gross level it is Vyakta. The word would also therefore have two applications.

The word Prakriti also refers to the 'personified will of the Supreme Being in the creation', and it therefore is synonymous with the powers of the Supreme Being personified as Mother Nature in whose womb the entire creation has revealed itself. It is deified forces of Nature and revealed as different renowned and powerful Goddesses.

The Prakriti represents the cosmic creative will of the creator that has revealed itself as the primary female aspect of creation which is known as 'Shakti', while its male aspect is known as the 'Viraat Purush'. The Shakti is the active ingredient or force that creates and regulates everything, while the primary entity or Being whose will this Shakti is implementing is called Brahm who remains passive.

According to the Purans, this Prakriti or Nature has been personified as different Goddesses, while Brahm has been known as Viraat Purush in the terminology of Vedanta or the Upanishads, and Vishnu in the Purans. The Shakti is the female aspect of Purush, and is considered as inseparable from him; in fact they are two halves of the same Brahm. In order to create, Brahm revealed himself in these two primary forces which revealed themselves as the cosmos or Nature. As the different inherent tendencies of a creature, the forces of creation came to be known as Sattva, Raj and Tam which determines and regulates the continuous cycle of creation, sustenance and conclusion. The Purush is the male aspect while his female counterpart is the Prakriti. Since a man resides in this world, he is surrounded by Nature which casts its shadow upon him. All the maverick tricks that Mother Nature knows create an impression upon a man. He is enthralled and so overwhelmed by the deception created by Nature that he forgets about the falsehoods of what he sees, as well as about the truthful nature of his own pure self. He is deluded by false impressions so much so that they appear to be true to him. Consequentially, he drifts along in the swift currents created by those delusions. He acquires the colours of Prakriti without realising the truth about its falsehood.

According to Sankhya Shastra, Prakriti is the original producer of the material world consisting of the three Gunas or fundamental qualities that are inherent in all the creatures and they decide the character and temperament of that creature depending upon the dominance of one quality over the other two. These three Gunas are—(i) 'Sata', or those which are auspicious and righteous and noble, (ii) 'Raja', or worldly qualities marked by such notions as having passions, desires, greed etc. and (iii) 'Tama', or those qualities that are 'dark' by nature, such as those that are categorised as sinful and pervert, leading to a creature's moral downfall.

The word Prakriti refers to the following—(a) Mother Nature and (b) the natural habits, temperaments and inclinations of a person. The Purush is the male aspect while his female counterpart is the Prakriti. Since a man resides in this world, he is surrounded by Nature which casts its shadow upon him. All the maverick tricks that Mother Nature knows create an impression upon a man. He is enthralled and so overwhelmed by the deception created by Nature that he forgets about the falsehoods of what he sees, as well as about the truthful nature of his own pure self. He is deluded by false impressions so much so that they appear to be true to him. Consequentially, he drifts along in the swift currents created by those delusions. He acquires the colours of Prakriti without realising the truth about its falsehood.

The term has been described in the Niralambo-panishad of Shukla Yajur Veda, verse no. 6. The Paingalo Upanishad of Shukla Yajur Veda, in its Canto 1, verse no. 3 describes how Prakriti came into being and how its three basic characteristics of Sata, Raja and Tama Gunas represented by three primary colours of white, red and dark metamorphosed into the myriad character traits that would mark the creation and its inhabitant creatures when the creation would eventually come into being.

The Saraswati Rahasya Upanishad of the Krishna Yajur Veda, in its verse nos. 47-49, describe very succinctly and clearly the concept what Maya (the dynamic

powers to creation delusions), Jiva (the individual creature; the living being), Ishwar (the supreme Lord God; the Supreme Being), Prakriti (Nature) and Jagat (the manifested world; creation).

The Shwetashwatar Upanishad of Krishna Yajur Veda, in its Canto 4, verse no. 10 describes the relationship between Prakriti, Maya and Gunas in a very succinct manner.

The Garbha Upanishad, in its paragraph no. 3 outlines the eight Prakritis or nature of a creature.

The *various Vikaars* or faults, imperfections, shortcomings, taints, blemishes and corruptions that mire the inherent character and nature of Prakriti or Nature at the macrocosmic level of creation have been enumerated in Shaarirako Upanishad of Krishna Yajur Veda, verse no. 17.]

३९. ॐ यो वै श्रीरामचन्द्रः स भगवान् यश्चोङ्कारो भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/39. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra ‘OM’, himself personified.

Indeed, he is ‘Bhagwan’ (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

It is Lord Ram who has revealed himself as the ‘OM or Omkar’¹. [OM is the monosyllabic word standing for Brahm. Everything that exists is said to be incorporated in this single word. It is the Tarak Mantra as well. Hence, this verse implies that OM refers to Lord Ram as much as it is meant to refer to Brahm, the cosmic Consciousness. OM and the RAM are synonymous words—refer Ram Purva Tapini Upanishad, Canto 2-3; and Ram Uttar Tapini Upanishad, Canto 2, verse nos. 1-2; Canto 3, verse nos. 1-4 and the first half of verse no. 5.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/39).

[Note—¹OM—It is the ethereal Mantra dedicated to the supreme Brahm. It is the primary sound from which the rest of the creation evolved as it provided the basic energy needed to start the process of change in the cosmic ether by stirring the stagnant gel at the beginning of the process of creation. It is OM that is revealed in the form of all knowledge and their encrypted form as the Vedas and other scriptures. It is OM that has revealed in the form of the faculty of speech which helps not only in the dissemination of information but even enables the creature to express himself and let his desires be known. It is the Beej Mantra or the seed Mantra of Brahm and the word by which the supreme transcendental Brahm is known and identified. The three letters of OM, viz. A, U and M, are said to be representative of the three phases of creation—i.e. ‘A’ stands for the beginning of creation, ‘U’ for its development and expansion, and ‘M’ for its conclusion. The three letters of the name of Lord Ram—viz. R, A and M correspond to these three letters, and by extension to the three primary phases in creation as outlined above. The importance of OM in relation to Lord Ram has been explained in Canto 2, verse nos. 1-2; Canto 3, verse nos. 1-4 and the first half of verse no. 5 of this Ram Uttar Tapini Upanishad. Refer also to Ram Purva Tapini Upanishad, Canto 2-3.

Ancient sages conceptualized the abstract divinity known as Brahm in the form of a word OM and then proceeded to explain the entire concept of creation, its development and its conclusion by analyzing this single word. In the present context, this verse means that OM not only refers to the supreme transcendental Brahm but also to Lord Ram in his cosmic form as the Supreme Being.]

४०. ॐ यो वै श्रीरामचन्द्रः स भगवान् यश्चतस्रोऽर्धमात्रा भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/40. OM salutations (or salutations to the supreme Brahman)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahman (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahman) himself personified.

It is Lord Ram who has revealed himself as the 'four Ardha Maatraas'. [In other words, Lord Ram represents the four 'Ardha Maatraas'. The Ardha Maatraas are the half-syllables used in Sanskrit language, and are placed above, below, before and after an alphabet to give it a proper sound. This helps the concerned alphabet to acquire a proper form and gives a meaning to the word of which the alphabet with its Ardha Maatraas is a constituent part. This personification of Sri Ram as Ardha Maatraas symbolises the fact that without him the creation loses its meaning, glory and existence even as a word loses its meaning and impact without the alphabets having proper Ardha Maatraas.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/40).

[Note—¹The *Ardha Maatraas*—In the context of OM, the Ardha Maatraa refers to a half-syllable placed at the end of the third letter 'M' of OM in the form of a 'Halant' or a mark of an oblique line placed below M. In the symbol of OM, it is represented by a horizontal 'S' sign placed to the right groove of the symbol which represents the long vowel sound of 'Ooo' in Sanskrit (like in *boot*). Normally, the letter 'M' of the word OM is to be hummed in a prolonged sound stretching into infinity. But since it is not done and the worshipper becomes silent, it is called 'half Maatraa' or half syllable. It is tantamount to conclusion of the word OM, and since OM is envisioned as representing the whole gamut of creation, this Ardha Maatraa is symbolic of conclusion of creation. That is why it is accompanied by the universal fire of destruction called the Samvartak Agni.

The Atharva-shikha Upanishad of the Atharva Veda tradition, in its Kandika 1 says that the Ardha Maatraa of OM represents the Moon God, the Mantras of the Atharva Veda, the Maruts (the Wind God), the Viraat Chanda and the Samvartak Agni. It is the fourth leg or Paad of Brahman and follows the third letter 'M' of OM.

The Tripadvibhuta Maha-Narayan Upanishad of the Atharva Veda, Canto 7, paragraph no. 68 says that Lord Vishnu represents the Ardha Maatraa.]

४१. ॐ यो वै श्रीरामचन्द्रः स भगवान् यश्च परमपुरुषो भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/41. OM salutations (or salutations to the supreme Brahman)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahman (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahman) himself personified.

It is Lord Ram who is a personification of the Supreme Being called the 'Param Purush'. [The word 'Param' means 'supreme and transcendental', while 'Purush' means a 'male'. Hence, the phrase 'Param Purush' refers to the supreme, transcendental macrocosmic form of the Male aspect of Nature; the supreme Lord of creation; the Viraat Purush in his most subtle and sublime cosmic form known as the Adi-Narayan or Maha-Vishnu that exists beyond the known world.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/41).

४२. ॐ यो वै श्रीरामचन्द्रः स भगवान् यश्च महेश्वरो भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/42. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

It is Lord Ram who has revealed himself as 'Maheshwar'—the great Lord or the great Ishwar. [The word 'Mahesh' usually refers to Lord Shiva as he is regarded as the most wise and enlightened God in creation. The fact that Lord Shiva—or Maheshwar—is none else but Lord Ram in his form is also affirmed in verse no. 4/5 and 4/43. The word also means that Lord Ram is the Lord of all the Gods.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/42).

४३. ॐ यो वै श्रीरामचन्द्रः स भगवान् यश्च महादेवो भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/43. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

It is Lord Ram who has revealed himself as 'Mahadev'—the great God. [The word 'Mahadev' is conventionally used for Lord Shiva as he is regarded as the senior most God amongst all the Gods because of his high degree of wisdom, erudition and enlightenment. Hence, this verse implies that it is Lord Ram himself who has manifested as Lord Shiva, the Lord known as Mahadev. Refer verse no. 4/5 and 4/42. The word also means that Lord Ram is the great God or Deva who is the senior most God amongst all the Gods.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/43).

४४. ॐ यो वै श्रीरामचन्द्रः स भगवान् य ॐ नमो भगवते वासुदेवाय महाविष्णुर्भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/44. OM salutations (or salutations to the supreme Brahm)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahm (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahm) himself personified.

Lord Ram is honoured and worshipped by the same twelve-lettered Mantra which is deemed fit and worthy to be used for honouring and worshipping the great Lord Maha-Vishnu, the Supreme Being. This eclectic Mantra is 'OM Namō Bhagwate Vashu Devaye' (ॐ नमो भगवते वासुदेवाय). [This shows that Lord Ram and Lord

Maha-Vishnu are the same divine entity. It is in accordance to the eclectic philosophy of Advaitya Vedanta or the principle of non-duality. Refer also to verse no. 4/5.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/44).

४५. ॐ यो वै श्रीरामचन्द्रः स भगवान् यः परमात्मा भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/45. OM salutations (or salutations to the supreme Brahman)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahman (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahman) himself personified.

Lord Ram is the 'Paramatma' or the supreme Atma or the supreme Lord God of creation. Refer also to verse no. 4/1-4, 4/7-8, 4/36.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/45).

४६. ॐ यो वै श्रीरामचन्द्रः स भगवान् यो ज्ञानात्मा भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/46. OM salutations (or salutations to the supreme Brahman)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahman (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahman) himself personified.

Lord Ram is the 'Gyan-Atma'—i.e. he is the personification of the pure Consciousness that is deemed to be knowledgeable, enlightened, wise, omniscient, all-knowing, sagacious and erudite. In other words, ignorance and delusions do not come within earshot of Lord Ram. This stanza might also be interpreted as to mean that Lord Ram is a personified form of Gyan (knowledge, wisdom and enlightenment) as well as Atma (pure consciousness and the 'true self' of all the living beings. Hence, Lord Ram is Truth personified as Gyan and Atma are truthful. Refer verse no. 4/6, 4/8, 4/21-22.]

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/46).

४७. ॐ यो वै श्रीरामचन्द्रः स भगवान् यः सच्चिदानन्दा—द्वैतैकरसात्मा भूर्भुवः स्वस्तस्मै वै नमो नमः ।

4/47. OM salutations (or salutations to the supreme Brahman)! The most divine Lord Sri Ramchandra is none but the supreme transcendental Brahman (or the Supreme Being), who is addressed by the ethereal Mantra 'OM', himself personified.

Indeed, he is 'Bhagwan' (the Lord God, the Supreme Being, the supreme transcendental Brahman) himself personified.

Lord Ram is a personification of the virtues of 'Sat, Chit and Anand'—i.e. he is truthfulness, consciousness and blissfulness personified.

The three Lokas called Bhu, Bhuvaha and Swaha are nothing but the same divine Lord revealed in those forms.

I most reverentially and repeatedly bow before such a great and divine Lord known as Sri Ramchandra (4/47).

5. The erudite, sagacious, wise and enlightened person, who is deeply steeped and expert in the knowledge of Brahm and repeats these forty-seven divine and holy Mantras of Lord Ram daily, with due sincerity, consistency and devotion, in order to adore, worship and honour Lord Ram, is able to please the Lord very much.

The Lord gives such a person his divine vision; the worshipper is able to establish a direct connect with the Supreme Being.

Such an exalted and fortunate person obtains the essence of eternity which is known as Amrit (or the elixir of eternal life). In other words, such a wise, enlightened and self-realised and Brahm-realised person is able to obtain supreme, absolute and eternal bliss, happiness, beatitude and felicity for himself that accompanies spiritual evolvment. As a bonus, he gets liberation and deliverance from this world, and ensures emancipation and salvation for his soul. Such persons obtain oneness with the supreme Lord by merging their Atma with the supreme Atma of creation (5).

Thus ends Canto 5 of Ram Uttar Tapini Upanishad.

-----*****-----

Section 2—Ram Uttar Tapini Upanishad

Canto 6

[This Canto outlines the divine spiritual glories of the great ‘Tarak Mantra’ of Lord Ram which is the six letter Mantra ‘Raam/Raan(g) Raamaaye Namaha’, as well as of this Upanishad. It enumerates the great benefits awarded to those who diligently study and implement its teachings.]

1. After the above discourse, sage Bharadwaj approached sage Yagyawalkya once again and requested—‘Oh Lord! Please be kind to enumerate the great glories and the divine powers of the magnificent Mantra of Lord Ram that is honoured as the ‘Mantra-Raj’ because it is like a King amongst all the Mantras.’

Yagyawalkya replied—‘The Supreme Being who is self-illuminated, who is most brilliant, radiant and splendorous, who can be known by personal experience and not by teaching or hearing, and who is the unique and most magnificent super Consciousness personified—he is regarded as being represented by the first letter of Lord Ram’s six letter Mantra (1).

[Note—The monosyllabic Mantra Raam/Raan(g) is equivalent to the word OM that is universally used in all the hymns and refers to the supreme Brahm. The six letter Mantra that is cited in this verse is ‘Raam/Raan(g) Raamaaye Namaha’—(रां रामाय नमः). Raam/Raan(g) + Raa + Maa + Ye + Na + Maha = 6. Refer Tripadvibhut Maha Narayan Upanishad, Canto 7, paragraph no. 22; Ram Rashaya Upanishad, Canto 2, verse no. 16; Ram Uttar Tapini Upanishad, Canto 2, verse no. 1, and Canto 4, verse no. 14.]

2. The central part of this Mantra (i.e. the word ‘Raamaaye’) refers to the supreme transcendental Brahm (personified as Lord Ram) who is himself ‘Akhand’ (i.e. constant, unwavering, non-dual, unfractioned, indivisible and immutable) and an

embodiment of 'Anand' (bliss, happiness, joys, beatitude and felicity) that is also Akhand.

Those who are wise, erudite, knowledgeable and enlightened realise or recognize this Brahm as a divinity that is a personified form of the virtues of 'Sat-Chit-Anand'—i.e. Brahm is an image of Truth, Consciousness, and Bliss (2).

3. The third and last part of the Mantra (i.e. the word 'Namaha') is a respect paid to the supreme transcendental Brahm referred to in the earlier parts.

Hence, those who are wise, erudite, Brahm-realised and enlightened understand that this third word (Namaha) also refers to the same Divinity that is implied in the earlier two words, and which is 'Purna Anand'—i.e. an image of Anand or bliss, happiness, joys, beatitude and felicity that is wholesome and complete in all respects. [In other words, when the spiritual aspirant worships the entity referred to in this Mantra, he is overwhelmed by the fact that it is a source of completeness and undiluted bliss. The devotee of Lord Ram adores and worships the Lord as the supreme transcendental Brahm personified, as the cosmic supreme Consciousness personified, as supreme Bliss personified, and as the supreme Truth personified. This Mantra is therefore called the Tarak Mantra as it provides true liberation to the aspirant from all the fetters that had been dragging him down and had pinned him to the world of spiritual miseries and torments.]

All the Gods and wise men as well as those who seek Moksha (emancipation and salvation) constantly remember this exalted Lord and mentally bow before the Lord who provides them with their goal of attaining Moksha (3).

4. Those self-realised, wise and erudite spiritual aspirants who do daily (regular) Japa (repetition) with this six letter divine 'Mantra-Raj' (the Mantra which is the best amongst all the Mantras) dedicated to Lord Ramchandra¹ with due diligence, faith, commitment and devotion become absolutely spiritually clean and purified as if they had been put in fire which had burnt all their impurities and taints, making them absolutely clean, untainted, immaculate and holy².

Such an aspirant becomes as empowered, exalted, holy and divine as if he was the son (i.e. a personification or representative) of the Fire God, the Wind God, the Sun God, the Moon God, Brahma (the creator), Vishnu (the sustainer and protector of creation), Rudra (Lord Shiva's angry form responsible for annihilation of creation), and all other Gods at once.

All the Gods recognize him as one who is an expert in the knowledge of Brahm, and honour him as such.

All that he does in any season or time is always successful.

He gets the reward of studying the Ithihas and Purans (ancient religious historical and mythological Hindu scriptures).

He gets the same spiritual benefits by doing Japa with Ram's Mantra as is derived by successfully repeating Lord Rudra's (Shiva's) hundred thousand divine names, called the 'Rudra Sahastra Naam'.

He is deemed to have repeated the Pranav Mantra, i.e. OM, for one thousand million of times.

He purifies and makes holy ten generations before him and ten generations to come after him.

He becomes the most purified and holy in his own generation by eliminating the bad affects of all his sins and misdeeds.

He becomes most exalted, holy and auspicious.

He obtains the elixir of life called Amrit. [This elixir known as Amrit is a metaphor for nectar and all the best of the virtues in this world. It provides the aspirant with exemplary peace, tranquility, bliss, happiness, joys, eternity and imperishability.]

There is a scriptural saying that such a person is able to obtain all the auspicious fruits that are got by worshipping and paying homage to Lord Ganesh (the deity who is worshipped before all other Gods during any endeavour to ensure its successful completion). [This stanza can be interpreted as follows also—‘Such a person is honoured first amongst all his compatriots and peers. He becomes the leader of men. He is counted as the first amongst wise and enlightened as well as empowered and blessed men.’]

All the fruits that are obtainable by worshipping and paying homage to Lord Shiva, the various Shaktis (cosmic divine powers of the Supreme Being manifested as various Goddesses) as well as the Sun God are obtained by the aspirant who does Japa with the Mantra of Lord Ram and honours the Lord. [The Sun God is the main deity to whom worship is offered daily by the use of the Gayatri Mantra that is dedicated to it. This ritual of worship is called Sandhya—i.e. the obeisance that is paid to the Sun God three time of the day when one phase of the day meets the other. That is, at dawn, noon and dusk.]

Similarly, all the fruits that are obtainable by offering worship and paying homage to Lord Vishnu and his divine forms by his followers are also got by him (i.e. by the aspirant who uses the Mantra of Lord Ram for doing Japa and offers his worship to the Lord). This is expected as Lord Ram is an incarnation of Lord Vishnu.] (4).

[Note—¹The word ‘Ramchandra’ has two parts—viz. ‘Ram’ which is the spoken form of the Beej Mantra ‘Raam/Raan(g) dedicated to Lord Ram, and ‘Chandra’ refers to the Chandra-Bindu, which is also known as ‘Naad’ and ‘Bindu’. This Chandra-Bindu is placed on the top of an alphabet to give it a nasal sound representing the cosmic background ethereal sound called the ‘Naad’ which is represented by the divine word OM that is universally used as the Beej Mantra for the supreme transcendental Brahm. The Chandra-Bindu is written as a crescent-shaped bowl with a dot hanging on its focal point, and it is placed on the sign of OM to complete the pronunciation of the word ‘OM’.

In brief, the word ‘Chandra’ when added to the word ‘Ram’ becomes ‘Ram-Chandra’ which is a Mantra in its own right. It replaces the word ‘Raamaaye’ in the six-letter Mantra referred to in this Canto. Thus, the new six-lettered Mantra would be ‘Ramchandra Namaha’. Ra + Ma + Cha + Ndra + Na + Maha = 6.

Refer Canto 2, verse no. 1 which describes this Mantra also being a Tarak Mantra.

²The fire is unforgiving; anything put in it is not spared. Pure gold is put in the fire to purify it. The fire is used to burn all the impurities and extrinsic elements present in gold to bring out the purity of the metal. The ‘fire test’ is used as a metaphor for the test of purity and to establish beyond doubt the trustworthiness, the truthfulness and immaculacy of any given entity. The Beej Mantra of the Fire is the Sanskrit alphabet ‘Ra’ (as in rung), and it is also the root from which the first part of Lord Ram’s Mantra, i.e. ‘Raam’ is made. Hence, the basis of Lord Ram’s Mantra is the Beej Mantra of the fire element. In other words, the fire element is hidden in this Mantra. So when the six letter Mantra of Lord Ram is used to do Japa, the hidden fire in it would silently do its job of burning all the spiritual imperfections, taints, corruptions, impurities and other negative factors present inside the bosom of the aspirant and help his to cleanse his inner-self involuntarily. It is like the case of taking any medicine which silently does its job once it enters the patient’s body.]

5. The divine Mantra of Lord Ram has thousands and thousands of times more glories, majesty, magnificence, divine powers and spiritual values than the Mantras dedicated to Lord Ganesh¹.

The six-lettered Mantra of Lord Ram (as described in verse nos. 1-3) is the essence of Amrit, the nectar or elixir of life, eternity, peace, contentedness, bliss, felicity and beatitude (5).

[Note—¹Lord Ganesh is also known as Shadaanan and Vinayak, the son of Lord Shiva and Parvati. He is said to be the wisest and most honoured of the Hindu Gods and is always worshipped in the beginning of any endeavour or enterprise, whether it pertains to the mundane worldly affairs or to the spiritual realm. This is done to invoke his blessings which preempt any evil forces from throwing a spanner in the wheel of the successful completion of the exercise.

He is also known as ‘Ganpati’ as he is the chief amongst the Gods as well as amongst the attendants of Lord Shiva.

An entire Upanishad named the Ganapati Upanishad is dedicated to this deity. It is the 25th Chapter of this volume.

The great metaphysical truths about Brahm have been taught by Lord Shiva to Ganesh elaborately in Cantos 1-4 of Tejobindu Upanishad of Krishna Yajur Veda tradition.]

6. This six-lettered Mantra of Lord Ram is like the infallible multi-purpose herbal medicine that provides a sure cure for all spiritual ailments that afflict the creature.

It is honoured by the title of ‘Mantra-Raj’, literally the ‘King of Mantras’, as it is the best amongst all the Mantras dedicated to all the Gods, and it wields all super-natural powers, authority and majesty like a king who wields unquestioned authority and sway over his kingdom (6).

7. It can be used for doing Japa and honouring the Lord at all times—i.e. in all the days, all the months, all the seasons, and all the year round.

It is so powerful and potent that it can burn anything. [In other words, the Mantra of Lord Ram is as powerful and purifying as the blazing fire which burns all impurities of anything that is put in it, or even if anything comes in its contact. Like the fire, the Mantra of Lord Ram burns or eliminates all the worldly impurities, taints and corruptions that tarnish the Atma of the spiritual aspirant, thereby cleaning his soul and bringing out the natural shine, purity, holiness and divinity in it. It transforms an ordinary man into a divine and holy being who is mystically empowered and spiritually elevated. It turns a new leaf in his life—i.e. it helps him to overcome all his worldly miseries and misfortunes, it helps him to find rest and tranquility, it helps him to turn his life from one big forest of pains and torments into a garden of bliss and happiness. It scrubs off the thick layer of dark spiritual faults that surround the aspirant’s Atma and lets him access Mukti for himself. It burns all the fetters that tie down the aspirant’s soul to this body as well as to the world of delusions and ignorance, thereby setting his soul free, and allowing it to fly off to its freedom. It provides the aspirant Mukti and Moksha—i.e. it gives him liberation, deliverance, emancipation and salvation.]

It negates or offsets the affects of all the negative weights represented by the accumulated grossness (sins etc.) that have been added to the scale¹ of his spiritual life over past generations, and instead makes his life so light and sublime that it becomes equivalent to the sky in its subtlety² (7).

[Note—¹The word in the text is ‘Tula Raashi’ which literally refers to the Libra sign of the Zodiac. But here the word ‘Tula’ is used to indicate a scale used to weigh things or materials of varying quantities. The word ‘Raashi’ also means a quantity. Hence, the meaning fits well into place.

Therefore, the term ‘Tula Raashi’ is used here to signify that all the accumulated negative qualities and other factors of his life, of whatever quantity and intensity, when placed on one side of this scale can easily be offset by the good affects of the devotion for Lord Ram and the Japa of the Lord’s Mantra that they have on the aspirant’s life.

²It is important to note that the reference to the sky is not without significance. The sky is pregnant with so many natural and artificial impurities that it can hardly be called clean and sublime from the ordinary man’s perspective. But when one ponders deep he finds that all these impurities do not affect the basic nature of the sky of being uncorrupt and pure. For instance, the dark cloud makes the sky appear dark too, but once the cloud is removed the sky regains its pristine cleanness. The colours of the sky changes during the course of the day but science has enlightened us that these colours are not natural to the sky but are caused by scattering of the sun’s light by the dust particles in the atmosphere. The chimneys of the numerous factories bellow a continues stream of noxious smoke into the sky, but a few miles away from them the sky is as clean as if there were no chimneys around at all. The sky harbours uncountable bodies in its belly—right from our own earth to far away stars and black holes. All live in the bowl of the same sky but without creating even a ripple in its vast and fathomless ocean of ether. Similarly, an aspirant who becomes Brahm-realised lives in this world but is untouched by its delusions and unaffected by its tumultuous events.

Besides this, Brahm is compared to the sky because of the fact that the former is as fathomless, as vast, as subtle and sublime, as eternal and infinite, as unchanging and steady, as all-pervading, all-including and all-encompassing as the sky element. Hence, the Brahm-realised person too becomes all-accepting and all-compassionate by nature. He accepts everything that comes his way, without distinction, and treats each of them as an image of Brahm. In other words, he is all-accepting as the sky which also accepts everything that is put into it.]

8-9. Such horrible sins as killing of a thousand Brahmins, being ungrateful to a person who has given knowledge and wisdom (such as one’s Guru—i.e. teacher and moral preceptor), theft of gold (or any kind of theft), drinking wine (or getting addicted to intoxicating things which results in one losing his mental control and become indulgent and deluded), being lustful towards a Guru’s young wife [8], and other such numerous horrible sins and misdeeds, whether big or small, are nullified by this Mantra of Lord Ram¹. [In other words, the divine and holy Mantra of Lord Ram is powerful enough to protect the spiritual aspirant from the horrific consequence of sins—both of omissions as well as of commissions.]

Hence, one should do Kirtan (loud singing) with the Mantra of Lord Ram which has such magnificent virtue as being able to eliminate all the sins and their evil affects as well as completely purify the practitioner or worshipper (refer verse no. 13 below) [9]. (8-9).

[Note—¹In this context, please refer to note of verse no. 3, Canto 2 of this Upanishad which explains the hidden meaning of this blanket pardon given to those who worship Lord Ram and uses the Mantra for doing Japa.]

10. Even the ghosts, evil spirits, demons, fiends, devils, ogres, hobgoblins, or Brahm-rakshas (Brahmin who becomes a demon upon death)—verily, they too accept the divine powers of Lord Ram’s majestic Mantra and submit before it. [In other words,

even such powerful but evil and malignant forces of creation as represented by these entities can be overcome by the positive effects of the powerful Mantra of Lord Ram. A person who uses the Lord's Mantra has nothing to fear from these evil entities; they cannot harm him in any way.] (10).

11. This Mantra of Lord Ram can bestow upon its worshippers the benefit of obtaining all possible worldly 'Aishwarya' (majesty, glory, magnificence, fame, name, power, authority, potentials, sway and influence over others) while they live in this world, and helps them to obtain the highest stature in the heaven upon death.

It blesses them with the greatest of spiritual boons in the form of obtaining access to the Supreme Being or Brahm. This is called 'Kaivalya Pad'—i.e. the most exalted stature which is one of its own kind, and is without parallel. [This is called Kaivalya Mukti whereby the individual Atma of the spiritual aspirant merges with the supreme Brahm to become one with the latter. When this comes to happen, the creature finds permanent freedom from the cycle of birth and death in this gross world which is ensnaring by its inherent nature.] (11).

12. This Mantra of Lord Ram affords protection from all sorts of cruel and inimical elements that might be a cause of pain, miseries and torments to the worshipper, whether they be in the village (where he lives, in the form of his enemies and those who are jealous of him, keep ill-will for him, are malicious towards him and hate him), or in the forest (in the form of wild animals), and all types of other inimical elements that are cruel and malevolent towards him.

The Mantra also eliminates the sin of drinking wine and imbibing other intoxicating things (12).

13. This Mantra of Lord Ram affords protection against the bad affects of eating things not worthy of eating (refer verse nos. 8 and 17), and learning or being aware of something that is not worthy of being learnt or being aware of.

All the horrible consequences of such things can be negated or offset by doing Kirtan of Lord Ram's Mantra (refer verse no. 9) (13).

[Note—The edicts and proclamations of the Upanishad should be understood in the correct context and with proper wisdom. When it says that Lord Ram's Mantra gives protection against the bad affects of eating things not eatable it does not mean that one should eat poison and test the veracity of this statement—for he would not survive to prove or disprove this principle. The idea is that should one happen to eat some kind of food that is not obtained by rightful means by mistake or negligence, or because one was not aware of its origin or because he had to eat it in order to survive, then he can atone for his sin by taking the recourse of this Mantra of Lord Ram. It shows that the man is sincerely regretful for what he had to eat under the prevailing circumstances, or had eaten it by mistake but now wishes to atone for his sin.

One should be careful to not stretch things to absurd proportions just for the sake of argument and attempting to ridicule the scriptures by undertaking to have a too literal meaning of the scriptures instead of understanding their hidden meaning and their intentions in the correct spirit.

Similarly, if one happens to become aware of something that is not the righteous thing to be known or learnt or be aware of, such as how to steal or kill or the art of cheating others, then one can be protected from their inherent negative effects on one's Atam if he turns his mind away from this knowledge by endeavouring to forget about it, and instead focuses it on the positive aspects of life and the holiness of his own self by remembering the divine Mantra of Lord Ram. The reading of the Upanishad would have already made him enlightened about the fact that his 'true

self', i.e. his Atma which is pure consciousness, is none but the supreme Lord Ram or Brahm personified himself. The use of the holy Mantra of Lord Ram serves to remind him of his basic divine and holy nature and heritage. Any conscientious man who is aware of his responsibilities and standing in society would obviously not do anything to demean and demote himself and become a subject of censor and ignominy.

The positive energy and vibrations generated by doing Japa or Kirtan with this Mantra would wash off or peel off the tainted coat of negative energy and negative vibrations that surrounds the Atma by a person's actions or deeds done out of ignorance or due to influences of various delusions.

The general meaning and understanding of the word *Japa* is 'constant repetition of any holy name of the God or any divine word or Mantra'. This verse tells us that if that is not possible for a man, or if he is not interested in it, then the next best option for him is to read good books. This will have similar good effects on his mind as doing 'Japa'. Because if the mind is not kept busy, it will gravitate towards corrupt and pervert thinking; it cannot sit idle. If it is not possible to leash it by means of chanting or repetition of 'Mantras', then at least it should be reined in by reading good books instead of allowing it to wander aimlessly here and there like a vagrant indulging in useless roaming about. Remember, an idle mind is the workshop of devil. See also Trishikhi Brahmno-panishad, verse nos. 2/28-34 of Shukla Yajur Veda in this context. An English version of this Upanishad has been included in a separate vol. no. 3 published by this author in this series of the anthologies of the Upanishads classified according to their respective Vedas.

The *Shandilya Upanishad* of the Atharva Veda tradition, Canto 1, section 2 says that Japa is one of the ten Niyams or spiritual observances that any spiritual aspirant should practice. It then defines Japa and its types as follows—"Japa is to honestly practice (repeat and meditate upon) the Vedic Mantra (hymn) that has been prescribed by one's Guru (moral preceptor). Japa is done in two ways—one is verbal or audible, and the other is non-verbal or mental or silent. The mental or silent form of Japa is done by repeating the Mantra mentally in a silent mode without uttering a word audibly, and involves concentration of the mind and turning its thoughts inwards. The verbal or audible form of Japa is again of two types—viz. one that is done loudly and the other that is simply muttered. The Japa done while muttering the Mantras is thousands of times more beneficial than doing Japa loudly, and mental Japa that is done silently is far better than even the one done by slowly muttering and it's multiple times more beneficial."

The *Kirtan* is a sort of a vocal Japa where the Lord's name or his divine hymns are sung or chanted aloud by a single person while he is alone, or in the presence of others as during religious congregations. When Kirtan is done in an assembly, usually the leader of the group says the leading line which is then repeated in chorus by others. Kirtan is generally very charming to hear and it benefits a large number of people, because, first, it is chanted or sung aloud, and second, it is captivating because of its mellifluous music. Whereas Japa is a personal affair, Kirtan becomes more often than not a community affair.

The basic difference between *Japa* and *Kirtan* is that while the former is done silently the latter is done aloud. The Kirtan generates vibrations of positive energy that radiate out in all the directions by the means of the sound waves that travel in all the directions from the place where the loud chanting or singing of the Lord's holy name is being done. While Japa benefits only one single individual, Kirtan benefits a large number of people and helps to charge the environment with positive vibrations. In some aspects Kirtan is an easier method for focusing one's energy on the divine Brahm as it involves the faculty of speech and even the organs of the body because it involves loud chanting and singing which involves the mouth and the faculty of speech, along with clapping of the hands and sometimes dancing in ecstasy. During Japa it might be hard to focus one's mind on one object of worship because the mind has a natural tendency to be restless and wander about, and this tendency is taken care

of during Kirtan as now loud singing or chanting as well as clapping of the hands and oftentimes dancing is undertaken, and this helps the mind to be more active and feeds its tendency to be restless. Hence, Kirtan is a less difficult way of focusing the mind on the Lord than doing silent Japa.]

14. The horrible consequences that a srotriya Brahmin who indulges in such ignoble deeds as stealthily stealing gold or gems (or for that matter any other asset) belonging to someone else should suffer from are eliminated or prevented by the virtue of the great purifying and neutralizing effects of the Mantra of Lord Ram.

[That is, should an exalted person of the high stature of a Brahmin who has studied the Vedas (Srotriya Brahmin) commit some grave sin as stealing something, he can be exonerated of the sin if he decides to repent and take the spiritual recourse of surrendering before the supreme Lord and repeats his divine Mantra to purify his inner-self. But again, as in all the previous cases of sins being forgiven, the regret must be sincere, and the desire to repent and relent most honest, in order to benefit from this pardoning clause prescribed in the Upanishad. Frankly, this would involve accepting one's guilt and returning the gold or the gem to the rightful owner if is at all possible. If that would mean punishment of some kind, then it has to be accepted. The provision of granting a pardon as prescribed in this Upanishad should not be taken as a blanket license for committing theft and evil deeds, for that is not at all the intention. The pardoning is given as a caveat that the sin is never repeated under any circumstance in the future, that one is sincerely repentant and needs an avenue for redemption, and if it is at all possible then all attempts must be made to compensate the offended party to the best of one's ability.] (14).

15. The grave sin of killing (or harming in anyway) of a Brahmin, a Kshatriya, a Vaishya or a Shudra (who form the four basic classes of Hindu society)—i.e. any living being for that matter—is pardoned or the evil consequences of such horrific sin remitted if one takes the spiritual recourse of Lord Ram's holy Mantra and surrenders before the supreme Lord.

Similarly, all the grave consequences that accrue due to a man's indulgences in worldly 'Moha' (worldly delusions leading to numerous attachments, affections, longings, desires etc. for material sense objects and their comforts and pleasures; to be subservient to the gross body and its desire for self gratification) are also dispensed with as a result of the grace of the powerful, mystically empowered, divine and holy Mantra of Lord Ram (15).

16. Those who are sincere devotees of Lord Ram and worship the Lord through his divine and holy Mantras (i.e. the six-letter Mantra as mentioned in verse nos. 1-3) are able to overcome the evil affects of such horrendous crime as being lustful towards one's own mother (16).

17. The accumulated negative affects that a man is subjected to and suffers from by being in the company of persons who are highly sinful is also eliminated by the good and positive affects of the Lord's holy and mystically empowered divine Mantra.

Similarly, all the evil affects that accrue due to wrong speech or talk (such as speaking a lie, using uncouth words, or using words that harm the interest of others), wrong way of sleeping (such as sleeping at the wrong time or with the wrong person), wrong seat or posture (literally wrong 'Aasan', such as adopting the wrong posture during meditation or any other religious exercise, or sitting with the wrong person),

and wrong food (refer verse no. 13) are immediately eliminated as a good and positive effect of the mystical powers of the divine and holy Mantra of Lord Ram (17).

18. Such grave sin as killing of one's father and mother in a premeditated form are pardoned and its most horrible evil affects eliminated by the good and positive affects of systematic use of the holy and divine Mantra of Lord Ram with the aim of overcoming the bad affects of this horrible sin (18).

19. It is said that one can do atonement for one's sins by observing penance at the holy site called 'Prayag'. [This site is located at the confluence of three holy rivers—Ganges and Yamuna as well as the mythological river Saraswati which is said to have gone underground. It is located in the present-day city of Allahabad in northern India.]

Well, there is another way of doing the same—and it is to systematically use Lord Ram's divine and holy Mantra for the expiation of sins. [In other words, the term Prayag which is synonymous with atonement for sins by doing penance is also applicable to the holy Mantra of Lord Ram. Or, the Mantra of Lord Ram is like the pilgrim site known as Prayag, and is equally powerful and holy for the purpose of expiation of sins. Just like one's sins are washed off by taking a holy dip in the waters of the holy rivers present in the terrestrial city of Prayag, one can also get rid of all his spiritual impurities by taking the shelter of Lord Ram and cleaning his inner-self and his Atma by using the Lord's Mantra. It must be noted here that this Mantra is as purifying as the fire element because the very first letter 'Raam/Raan(g)' of Lord Ram's Mantra is also the Beej Mantra of the Fire God.]

Hence, the divine and holy Mantra of Lord Ram is mystically empowered to eliminate all sins and bestow spiritual purity and holiness on the worshipper and devotee of the Lord (19).

20. The Mantra of Lord Ram is a combined form of all the holy sites. It is like the Kurushetra itself personified (refer Canto 1, verse no. 1). [In other words, the spiritual benefits derived by the use of Lord Ram's holy and divine Mantra are equal to going on pilgrimage to all the holy sites. The Kurushetra is regarded as one of the holiest of the holy sites—hence, its comparison with the Mantra is to highlight the latter's spiritual importance and prowess.]

The holy Mantra of Lord Ram is powerful enough to destroy all the evil consequences of sins that are done or contemplated upon by the use of one's mind, i.e. those sins that are done willingly, consciously, thoughtfully and in a premeditated manner, as well as those sins that are not actually done but thought of and planned in the mind (20).

21. The divine and holy Mantra of Lord Ram bears the same fruits and has the same mystical benefits that are derived by doing the seven types of great fire sacrifices and other religious sacraments¹ using the seven types of offerings prescribed for such occasions², as well as by doing the Chandrayan sacrifice in a variety of ways³.

Hence, the divine and holy Mantra of Lord Ram is potent enough to destroy all the sins and eliminate all their evil consequences just like the way it is done by following the above method of doing various sacrifices and penances (21).

[Note—¹The *seven great fire sacrifices* are the following—(i) The seven Paak Yagyas are the fire sacrifices done for the purpose of worldly gains and material prosperity. They are also called Kaamyeshthi Yaga, or literally that which is done

with the aim of fulfilling some specific desires or aspirations. They are performed in the Garhyapatya Agni or the fire of the household with cooked offerings such as boiled grains mixed with Ghee (clarified butter).

These seven Paak Yagyas are the following—Huta, Prahuta, Aahuta, Shulagava, Baliharana, Pratyavarohana, and Ashtakaahoma.

(ii) Since doing Homa by the offering of a Havi is an integral part of Yagya or the fire sacrifice, the latter is classified into seven types depending upon the type of Havi offered. If the Havi consists of rice, barley, oat, milk and clarified butter, then the seven types of fire sacrifices are called the following—Agnyaadheya, Agnihotra, Darshapuranmaas (also called the Prakriti or original fire sacrifice), Chaturmaas, Aagrayan, Niruddhapashubandha, and Sautraamani.

All these fire sacrifices are performed in the three main fires—viz. the Garhyapatya, the Dakshinagni and Aahavaniya.

(iii) If the Havi is the juice of the Soma plant, then the fire sacrifice is called the Soma Yagyas—so called because the extract or juice of the Soma plant is offered as an offering. These seven Soma Yagyas are the following—Agnisthoma, Atyaagnisthoma, Ukthya, Shodashi, Vaajpeya, Atraatra, and Aptoryaama.

The *Agnisthoma*—This is the first of the Soma Yagyas where the sanctified liquid extracted from the herb called Som is used as offerings to the sacred fire and the Gods. It is spread over five days and requires an attendance of sixteen priests. It is performed in the spring season annually. Its climax is reached when the Soma juice is extracted at midday from the herb.

The *Atyaagnisthoma*—as the name itself suggests, this is a more intense form of the Agnisthoma sacrifice. The prefix ‘Atya’ means great or intense or extended form.

The *Ukthya Yagya*—This is the fire sacrifice in which the hymns of the Sam Veda are used for recital and offering of oblations to the sacred fire.

The *Shodashi Yagya*—As the name suggests, it is done continuously for sixteen days of the lunar calendar. It starts on the dark-moon day and finishes on the full-moon day. The word ‘Shodasha’ also refers to the sixteen purification rites enjoined for a twice-born from birth till death. It also means observing the sixteen obligatory steps in formal forms of worship—such as Awaahan (invocation of the deity), Aasan (offering of seat to the deity), Ardhya (offering oblations), Padya (washing of feet), Achaman (sipping of sanctified water to cleanse the mouth), Madhupark (offering of desserts or mouth sweeteners), Snan (ablution; bathing), Vastraavharan (clothing), Yagyopavit (wearing of the sacred thread), Gandha (offering perfumes), Pushpa (offering of flowers), Deep (showing ceremonial light), Naivaidhya (offering fresh oblations to the deity in the form of sweet pudding or porridge), Tambul (betel leaves), Parikrama (circumambulation), and Vandana (offering prayers).

The *Vaajapeya Yagya*—This is performed by one who desires unlimited dominion. This sacrifice had many special features and the number 17 plays a dominant role—for there are 17 animals that are sacrificed, 17 objects are distributed as fees for the priests, and it lasts for 17 days culminating in a chariot race in which the patron who does the fire sacrifice is made to win at any cost.

The *Aptoryaama Yagya*—This is a modification of the Agnisthoma Yagya and is done for the fulfillment of desire. The chief patron who does this sacrifice is expected to give one thousand cows as gift or charity. A fully decorated chariot is donated to the chief priest.

The *Atraatra Yagya*—This is form of Soma sacrifice but done in one day only. An ewe or ram is sacrificed for Goddess Saraswati, the goddess of speech, wisdom and knowledge.

Other forms of classification of the Fire Sacrifices—(i) Some fire sacrifices are to be done regularly and daily. They are called Nitya—for instance, the Agnihotra.

(ii) The Naimittika is the fire sacrifice done for a special cause—for instance, the fire sacrifice called Kashaamavatishti that is done for the protection of the household against the danger of fire.

(iii) The Kaamya is the fire sacrifice that is done for fulfillment of specific desires—such as the Kaamesthi Yagya.

(iv) The Aishtika is the fire sacrifice in which the Havi (the offerings) consist of materials like rice cakes (called Purodaasha), clarified butter or Ghee (called Aajya), and sweet pudding or porridge (called Charu).

(v) The Pashuka is the fire sacrifice in which the offering is an animal. For instance, the Ashwamedh Yagya.

(vi) The Saumika is the fire sacrifice in which the offering consists of some juice or extract. The Soma Yajyas come under this category.

²The *seven offerings* are called the Samidhas. They are used as offerings during fire or other religious sacrifices. The Mundak Upanishad of Atharva Veda, Canto 2, section 1, verse no. 8 refers to the seven types of Samidhas (fuel for the fire sacrifice; the firewood) and seven types of Yagyas (fire sacrifice). Now let us see which are these seven Samidhas and seven Yagyas. Since the term Homa and Havi are an integral part of the fire sacrifice, they should be understood as well in order to get a comprehensive picture.

The Samidha is the fuel that is needed to keep the fire of the sacrificial pit lit. It is a general term for the firewood. Wood from seven types of trees are used for this purpose as follows—Ashvattha (*Ficus religiosa*), Bilva (*Aegle marmelos*), Chandan (sandal wood), Devdaaru (pine), Khadira (*Acacia catechu*), Nayagrodha (Indian fig tree), and Palaas (*Butea frondosa*).

The wood from the following trees are not to be used for the purpose of Samidha—Bibhitak (*Terminalia bellerica*), Kapittha (wood apple), and Neem tree.

Each stick of the firewood should not be thicker than the thickness of the thumb, must have the bark on them, and should not be eaten by wood-worms or insects, or infected by any kind of germs—i.e. should be fresh.

The Brihajjabal Upanishad of Atharva Veda tradition, Brahman 5, verse no. 5 says that a Sanyasi should wear the Bhasma (the sacred ash) derived from a fire sacrifice in which Samidhas have been offered.

³*Chandraayan/Chandrayan*—The word means ‘following the phase of the moon’. The Hindu scriptures have prescribed a number of methods of atonement for one’s misdeeds and expiations for sins. The Chandrayan is the universal penance for expiation of almost any kind of sin—especially where no specific remedy is prescribed.

It is so-called as during this exercise one follows the phase of the moon in his eating habits. Starting with fifteen morsels of food on the full-moon day it is gradually reduced by one morsel per day till the new-moon day when not a single morsel is eaten by the aspirant. Then from this day onwards, one morsel per day is increased till the full-moon day when once again he eats fifteen morsels. This is one cycle of the penance. It can be repeated as many times as desired according to the intensity of the sin to be atoned for. This penance is also called ‘Pipillikaamadhyā’ or ‘middle of an ant’ exercise because it starts and ends with full fifteen morsels of food with nil food in the middle.

There is a variation of the Chandrayan described above. In the modified version, the penance is started with one morsel on the full-moon day, gradually increased to fifteen morsels on the new-moon day and then progressively reduced by one morsel each day till the full-moon day when once again only one morsel is eaten. This is called ‘Yavamadhya’ or ‘middle of the wheat grain’—as this grain is thickest at the center and tapers off at the two ends.

In the third variation, eight morsel of food is eaten each day for a month’s time. This is called ‘Yati-Chandrayan’—or the Chandrayan that is prescribed for wandering ascetics who beg for food for sustenance.

The size of the morsel of food is approximately that of a big myrobalan fruit. A person who undertakes the penance called Chandrayan should tonsure the head, do

initial fasting as a preparatory step, offer libations of clarified butter (Ghee) and water to the Gods, consecrate the food before eating it, and worship the Moon God.]

22. Whatever remnants of sins that persist inspite of one's best efforts to completely eliminate them, such as by giving donations of gold (for noble causes) of the amount that equals one's own body weight, or making such other great charities and giving away of alms—these residual sins and their lurking consequences are removed by the grace of the divine and holy Mantra of Lord Ram (when it is practiced systematically). This Mantra provides the spiritual aspirant complete purity and cleansing of sins—both of omissions as well as of commissions (22).

23. All the sins that a person might commit in the third phase of life (i.e. during old age and when he is nearing death when he is not expected to commit any sin, but instead is expected to guard against them), or any remnants of earlier sins that might not have yet been done away with and linger on till his old age or till the time of his death—verily, such sins or their remnants are also forgiven and remitted on the strength of the divine and holy Mantra of Lord Ram when it is eagerly and sincerely remembered and invoked. [Once again, if a person sincerely repents for his sins before death, then the Upanishad provides him with the remedy for his spiritual malady—and it is to surrender himself before the Lord, and concentrate his mind in doing meditation and contemplation upon the supreme Brahm using the Mantra of Lord Ram. This Mantra would cut through his sins like burning acid cuts through metal, and remove the dark coat of spiritual faults that prevents the dying man's emancipation and salvation. This is the fundamental reason and the basic mechanism by which those who die in Kashi are provided with Mukti or Moksha by Lord Shiva. This has been elaborately described in this Upanishad in Cantos 1 and 4.] (23).

24. It is this divine and holy Mantra of Lord Ram that can prevent a man from drifting away to an uncertain destiny in the third phase of his life if he fixes his mind and heart on it, if he attaches himself to it. [That is, the boat of his life casts its anchor and is firmly moored on the banks of spiritual liberation and deliverance instead of drifting away in the choppy waters of the uncertain spiritual future. In other words, by taking the refuge of the Mantra of Lord Ram, the apirant find rest, peace, calmness and tranquility of the mind and the soul. He becomes assured that his emancipation and salvation are ensured, and that he would not have to take a birth and undergo the horrors of another cycle of having to cope with the miseries of this world and the pain of death again like the way he had undergone during his current life. If a man does Japa with Lord Ram's Mantra, uses it regularly to worship the Lord, and ties himself to it in a symbolic manner, then he is prevented from getting lost in the huge ocean represented by this deluding world and an uncertain future destiny. His liberation and deliverance from the uncountable sufferings become a certainty.]

A man who is not fortunate enough to have studied the scriptures in his life or have had the privilege of hearing discourses gets the same spiritual benefit if he is preached this divine and holy Mantra of Lord Ram. This would help him reap the same benefit that is got by doing all sorts of penances and sacrifices to rid one's self of sins and their consequences (24).

25. Any ill affects of wrongly or incorrectly using the Beej Mantras of the supreme Brahm, or the evil consequences that accumulate by doing misdeeds on a regular basis

in life, whether it is done by men or by women, are eliminated or destroyed by the grace and the good influences of the divine and holy Mantra of Lord Ram (25).

26. The divine and holy Mantra of Lord Ram is the medium for worshipping the Lord, paying obeisance to him, and obtaining his divine grace and blessing.

It helps to overcome the fear from famine, drought and other misfortunes that might happen in the life of the aspirant (26).

27. This divine and holy Mantra of Lord Ram is a personification of the Lord, and as such is very munificent and benevolent towards his devotees, bestows upon them all round welfare, well-being, cheerfulness, joys, happiness, calmness and peacefulness. It helps them to overcome the restlessness and agitations caused by anger and wrathfulness.

None of the other Mantras have the same glory, the divine powers and the majesty as that possessed by this single Mantra of Lord Ram (27).

28. This Mantra is quick to please Lord Ram very much if it is sung or chanted aloud in a systematic manner. It bestows the worshipper with a long life and all sorts of worldly Aishwarya (majesty, fame, grandeur, prosperity, authority and power) while he is alive, and upon death it blesses him with the attainment of the supreme abode of Lord Vishnu (i.e. helps him to obtain heaven; helps him in his spiritual liberation and deliverance) (28).

29. This is the essence of all that has been said by me (sage Yagyawalkya). The letters of this divine and holy hymn or Mantra dedicated to Lord Ram are the ones that are incanted by the Gods in the heaven; they are the ones that reverberate in the sky in the form of the heavenly sound (known as the cosmic Naad which is the music of the Gods in the heaven).

Those who are wise and erudite believe that the letters of this divine and holy Mantra have revealed themselves in the form of the hymns of the Vedas and all the other scriptures of various denominations.

This glorious and divine Mantra—which is as brilliant and magnificent, as radiant and splendorous as the celestial Sun—is able to provide the spiritual aspirant with the divine vision of the exalted and holy abode of Lord Vishnu which itself is as glorious, as splendorous and as brilliant as the celestial Sun. [That is, a spiritual aspirant is able to access heaven, which is a metaphor for the exalted stature of existence when one finds eternity, fulfillment, the highest degree of bliss and complete spiritual contentedness. if he uses this holy, mystically empowered and powerful Mantra for his spiritual endeavour of obtaining emancipation and salvation. It bestows upon him the radiance and splendour that is like that of the Sun. This Mantra is itself glorious and splendorous like the Sun.]

This mystically empowered Mantra is like the mystical eye that enables the spiritual aspirant to see (realise) the Truth and visualize the splendorous abode of Lord Vishnu in the heavens. It bestows upon the aspirant the divine vision by which he can see beyond the gross world, and peer deep inside it and peep behind it to see the subtle and the sublime world of the divine Spirit, or the 'world of consciousness'. [That is, with the aid of this Mantra the spiritual aspirant is able to become 'self and Brahman realised'. He is able to have a divine vision of the Supreme Being who had not only manifested as Lord Ram on this earth but is present in the subtle heart of all the creatures as the self-illuminated and glorious Atma which is like the brilliant and self-

evident Sun that is present in the sky. It must be noted here that the Sun is regarded as the ‘eye’ of the supreme Brahm. Its light and brilliance is a metaphor for intelligence, erudition, sagacity, knowledge, wisdom and enlightenment because these virtues help one to see the things in the correct perspective and peer deep inside the surface to unravel the greatest secrets that are not easily known from the outside. The Mantra virtually acts as the spiritual eye of the aspirant that enables him to see beyond the gross world and have a divine insight into the essence and subtle aspect of everything.]

It is like the nectar that is imbibed by those who are erudite, wise and enlightened. It makes a man wide awake (or awakened) to the Truth and Reality; it makes him self-realised and Brahm-realised.

It bestows upon him the exalted and supreme abode of Lord Vishnu—i.e. it gives him an exalted spiritual stature by blessing him with liberation and deliverance, by granting his soul emancipation and salvation.

OM salutations! This is the great teaching of this Upanishad. It is the truthful Upanishad and what it says is the truth! Amen!’ (29).

Thus ends Canto 6 of the Ram Uttar Tapini Upanishad.

Chapter 14

Shandilya Upanishad

This Upanishad derives its name from sage Shandilya who approached the ancient sage Atharvan to learn the details of the various aspects of Yoga (meditation) and Brahm, the invisible but the divine and sublime Supreme Being. The knowledge was then passed on to the line of disciples of sage Shandilya who then named this Upanishad in the honour of their Guru.

The Upanishad has three Cantos of which the first one is the largest, occupies the greater part of the text, and deals with the concept of Yoga in a comprehensive manner.

Canto 1 has eleven sections and a total of ninety-seven verses. It deals comprehensively with the philosophy of Yoga and its practice. It explains the various terms associated with the philosophy of Yoga with a metaphysical perspective, and a reading would show how implementing these in practice can actually lead to an overall improvement in the life and personality of the practitioner.

In Canto 1, section 1 opens with sage Atharva telling sage Shandilya about the eight-fold path of Yoga, and then describes the ten aspects of Yam (self-restraint of the sense organs and the mind). Section 2 deals with the ten kinds of Niyams (spiritual orders and regulations). Section 3 outlines the eight Aasans (sitting postures) of Yoga. Section 4 is complicated and gives details about the various Naadis (nerves and veins), the Kundalini (the coiled subtle energy center at the base of the spine, called the ‘serpent power’ because of its coiled nature and its latent dynamism), and the ten

vital winds called the Prans, and it explains how these Naadis are de-clogged and activated with the help of the energy of the Kundalini and the vital winds, along with the process to do so. Section 5 deals with the eligibility for Yoga and then goes on to describe the preliminaries of Pranayam (breath control). Section 6 compliments the previous section and completes the discussion on Pranayam. Section 7 is dedicated to Hath Yoga and describes how to cleanse the blocked Naadis, the method of doing Pranayam, rules governing food during Yoga, various Bandhas (closure of body apertures) and Mudras (postures), and the manifold benefits of Yoga such as attainment of various Siddhis (mystical powers). Sections 8-9 describe the five kinds of Pratyahars (restraining the mind and withdrawing it from involvement with the sense organs) and Dharnas (convictions and beliefs). Section 10 narrates the two kinds of Dhyana (remembrance and concentration of the mind), while section 11 deals with the eclectic concept of Samadhi or total absorption in meditation.

The second and third Cantos primarily deal with the esoteric concept of Brahm. The second Canto is the shortest with only one section having six verses, while the third and the last Canto has two sections with twenty-one verses. Hence, there are in all fourteen sections and one hundred twenty-four verses. Now let us have a bird's eye view of what the Upanishad deals with.

Canto 2 is pre-eminently a summary of Advaita Vedanta and deals with the eclectic concept of the non-dual Brahm, the Supreme Being and the cosmic Consciousness which is the universal theme in all the Upanishads. It outlines some of the unique qualities of Brahm and asserts that it is a divine entity that cannot be defined, is beyond the faculty of speech and the comprehension of the mind, and is invisible but nevertheless omnipresent in this creation.

Finally, Canto 3 builds up on the theme of Brahm and in section 1 answers the question as to how the one and non-dual Brahm can assume the form of this multifaceted world of such immense diversity. Section 2 elucidates the different meanings of the term Brahm.

-----Shanti Paath-----

Please see appendix no. 1 for the English of this Shanti Paath.

Canto 1/Section 1

[This section opens with sage Atharvan telling sage Shandilya about the eight-fold path of Yoga, and then describes the ten aspects of Yama which is self-restraint of the sense organs and the mind. It is in the form of a prose and describes all the terms in a holistic manner.]

1. Once upon a time, sage Shandilya¹ approached the great ancient sage Atharva² and requested him to preach him on the various aspects of Yoga as a means of realizing the Atma, the soul or the pure consciousness which is also called the 'self'.

Shandilya requested sage Atharva, 'Oh Lord! Please teach me about the eight-fold path of Yoga that can help me to realise the Atma and its essence.'

The wise and enlightened sage Atharva replied, 'Oh great sage! Yoga (meditation and contemplation) has eight limbs or aspects or branches, called 'Ashtaanga Yoga'³. These are Yam (self-control), Niyam (observation of spiritual

laws or rules), Aasan (sitting postures), Pranayam (breath control), Pratyahar (restraint of the mind), Dharna (belief), Dhyana (concentration of mind; remembrance) and Samadhi (trance-like state of permanence in Yoga).

Yam and Niyam are of ten types each, Aasans are of eight types, Pranayam has three phases, both Pratyahar and Dharna have five types each, Dhyana is of two types, while Samadhi is of only one type with no variations.

The ten types or aspects of Yam are the following—Ahimsa (non-violence), Satya (truthfulness), Asteya (non-stealing), Brahmacharya (abstinence, continence, celibacy), Daya (mercy), Saralta (simplicity, humility), Kshama (forgiveness), Dhairya (patience), Alpa-ahar (moderation in eating), and Pavitra (purity and cleanliness).

[Now, each of these terms are being defined—] ‘Ahimsa’ means not harming or causing pain to any creature, at any time, and by any means—not by one’s thoughts or involvement of the mind in any way, not by speech or words, not by the body and its actions. [That is, non-violence should be holistic and comprehensive in nature—it is not limited to only avoiding physical cruelty or aggression but also includes mental and verbal aspects.]

‘Satya’ means to tell, honestly, truthfully and with the greatest sincerity one can have, whatever is for the good and true welfare of the other person, whether he likes it or not. This would involve the mind and its thoughts, the speech and the words used to tell the truth, and the body that implements this truth in the shape of deeds done by it and actions taken by it. [That is, Satya involves not telling things simply because they might appear pleasing to the hearer, or said out of some vested interest at stake, but to say things which are genuinely in the interest and long-term good of the other person. Such things might be unpleasant to hear in the beginning and might even cause rebuke or ill-will for the speaker of the truth, but they give the speaker or the advisor great mental and spiritual satisfaction for having spoken the truth without deceit or fear, besides helping to create positive vibrations around him, and ushering in an atmosphere of trust and brotherhood.]

‘Asteya’ broadly means non-stealing, and it includes the idea of keeping one’s self aloof from the wealth of others, of not being attracted towards such assets that do not rightly belong to one’s own self, of eyeing the wealth of others with envy and jealousy, of having a greed for them, yearning for them, and waiting for an opportunity to either harm them or deprive the other person of his possessions, or usurping and grabbing the assets rightfully belonging to others by any crooked or deceitful means one can think of. This neutrality and non-lusting must be genuine and sincere, and should involve one’s mind and its thoughts, one’s speech, as well as one’s body and the deeds done by it or actions taken by it. One should be sincere in not being tempted by the wealth of others, and of course this would involve the mind and the sub-conscious which must be duly trained and cultured. [That is, one must never be envious of other people’s prosperity and acquisitions; one must never allow the mind to ever contemplate of harming these assets or plan to grab them by force or conceit. Similarly, one must never allow the speech to ever utter a word of jealousy and say anything that might harm these assets simply because they belong to others, or create prejudice against the rightful possessor of such assets. One must not allow the body to do anything that would in anyway, directly or indirectly, cause harm to the assets that belong to others. Since the general meaning of the word ‘Asteya’ is ‘non-stealing’ it follows that even mental greed or yearning for something that belongs to others, and imagining how good it would have been if it belonged to me, is as good as the actual stealing of it. When the Upanishads talk about implementation

of any principle, they imply a wholesome attitude and a holistic approach towards it, and not only physical aspect of it such as its literal implementation which is devoid of the spirit of the doctrine. Not physically able to steal anything but be mentally obsessive about it is as good as actually stealing it. In other words, the purity of mind, sub-conscious and intellect are as important as the physical act of abstaining from stealing.]

‘Brahmacharya’ is to abstain from all sexual activities or any kind of indulgences and unrestrained behaviour involving the mind, the speech as well as the physical body and its sense organs under all circumstances. [That is, mere observance of physical celibacy is not enough. One must observe total control over the mind and its faculties so that they are not allowed even to think of any lustful subject or indulge in any inauspicious, unrighteous, unethical, immoral and improper thoughts related to sense gratification or attractions of the material sense objects of the world. One must never think or talk about sensual subjects that arouse passions and disturb the tranquility of the mind. One must never allow the gross organs of the body to be attracted towards objects of self gratification, or of sensual pleasures and comforts. In short, all sensual attractions, all forms of indulgences, all instances of temptations, all examples of self-gratification, and all sorts of unrestrained behaviour of the mind, the speech and the body are covered by the term Brahmacharya. It means total and comprehensive self-restraint or self-control in all spheres of life, and not just of the organs of sensual pleasures.]

‘Daya’ refers to having compassion and mercy towards all the creatures, to be graceful and kind towards all, from the lowly and the humblest to the highest and the exalted.

‘Aarjav’ or ‘Dhairya’ means to have exemplary tolerance, fortitude, courage, forbearance, resilience and patience of mind, to be immensely steady in one’s thoughts and behaviour, to restrict one’s speech and desist from speaking any wrong word against anyone or to anyone, and to keep the body under strict control and not react under any kind of provocation or situation, whether favourable or unfavourable. It implies that a person remains completely neutral and equanimous when faced by favourable and expected circumstances, or by unfavourable and untoward ones.

‘Kshama’ implies to be truly forgiving and un-affected by any offense caused by the other person, to bear with stoic calmness, equanimity, forbearance and a sense of neutrality all sorts of behaviours one has to face from others, whether done inadvertently or purposely, whether such behaviour is favourable or unfavourable, whether it is likable or not. One must be exemplarily calm, unruffled and be forgiving towards others, whether one is praised and honoured by them, or criticized and humiliated by them. One must be sincerely forgiving for any kind of mischief, any kind of misdeed, kind of transgression, any kind of provocative behaviour, any sort of insults, aspersions, asides or insinuations inflicted or cast upon him by other person, directly or indirectly, or by situations created by his adversary that lead to him being subjected to humiliation and insult. Kshama involves remaining unruffled and completely calm, both emotionally as well as sentimentally, under all prevailing situations and under all instigations. One must not harbour any animosity, ill-will, a sense of grievance, a feeling of hatred or a desire for revenge against anyone, or for any deed done by the latter, which has in any way harmed one’s own interest or even has been a cause of annoyance for him. [Therefore we see that Kshama, Daya and Dhairya go hand in hand; one must accompany the other to give meaning to what is being said in this great Upanishad. It has already been emphasized that a wholesome

approach is needed when one reads the Upanishad and hopes to benefit from this eclectic and grand philosophy promoted by it.]

‘Dhriti’ is having equanimity, neutrality, fortitude, firmness and steadiness of mind under all circumstances, even when one is subjected to immense emotional turmoil, both of the positive kind such as having happiness and joys, as well as of the negative kind such as being subjected to immense anguish and pain. [That is, one must remain unruffled and maintain one’s poise and calm under opposing situations—such as the one when he suffers from some great financial loss or loses his dear and near ones on the one hand, or when he begets some great fortune or meets his beloved ones unexpectedly on the other hand.]

‘Alpa-ahar’ is to eat with moderation or restraint. It implies eating only so much as to keep one-fourth of the stomach empty. It also implies eating such things that are soothing for the system and non-irritating by nature, things that are invigorating and energizing for the body. Such eatables are foods that are soothing for the digestive system, as well as sweet, pleasant and comforting for the body in general. Some of such eatables are clarified butter (Ghee) of the best quality, unadulterated milk, and other such things.

‘Shauch’ means to be clean and purified both externally as well as internally. While external cleanliness can be done by rubbing the body with clay and washing off the dirt with water, internal cleanliness and purity is achieved by keeping the mind, the sub-conscious and the intellect free from all sorts of taints, corruptions and negativities, and instead concentrating their efforts towards auspicious and righteous endeavours such as on spiritualism and attainment of the Truth. [Both sorts of cleaning are necessary. One should keep the physical body clean because it is the residence of the Atma, the pure ‘self’, and if the residence is dirty and filthy it would create a negative environment for the Atma, causing the latter restlessness and having a negative impact on its nature. Further, the body is regarded as the temple of the Lord because this Atma is a miniature form of the cosmic Atma known as the ‘Parmatma’, the Supreme Being. Just like a man keeps his place of worship, the ‘shrine’, physically clean so as to maintain its sanctity, it is equally important to keep one’s body clean as it is the abode of the ‘personal deity’ known as the Atma. But this body is driven by the mind and its various faculties, and therefore to ensure that the personal shrine of the Atma in the form of the physical body is able to maintain its sanctity and credibility it is imperative to keep the internal apparatus clean and uncorrupt. If the mind and its components are not clean then no matter how clean the external body may be it is of no good to the spiritual aspirant, for sooner rather than latter the body would fall prey to the many temptations of the corrupt world and its attending delusions. Therefore, all efforts of the mind should be diverted away from the falsehoods of the material world of the sense objects and focused on the Atma and the universal truth of the conscious ‘self’.] (1).

[Note—¹*Shandilya*—The word ‘Shandilya/Shandilya’ means the son of sage Shandila. In ancient scriptures the name of sage Shandilya appears at various places, the earliest reference being in the Shatpath Brahman (9/4/4/17; 10/1/4/10) which belongs to the Shukla Yajur Veda. It is believed that it was compiled around 3000 B.C.

Shandilya was a great authority of the fire ritual, and in fact the fire which he worshipped has been named after him as Shaandila. He was a pupil of sage Atharva from whom he learned this present Shandilya Upanishad, and his main disciple was named Kushri. According to other lists of lineage, his teachers included Vaatsay, Kaishorya, Kashyap, Vaishtapureya, Gautam etc.

Since the Shandilya Upanishad was taught to him by sage Atharva, it obviously follows that the two sages were contemporaries of each other.

The Chandogya Upanishad also refers to sage Shandilya in its Canto 3, section 14 wherein the sage taught the knowledge of the divine Being known as Brahm which have a clear resonance in Cantos 2 and 3 of our present Shandilya Upanishad.

The great epic Mahabharata mentions sage Shandilya many times as being a sage who attended the court of king Yudishthira (Sabhapurva, 4/17). He had propounded the laws governing giving of donations (Mahabharata, Anushashanpurva, 65/19).

Sage Shandilya is credited with the composition of the treatise on Bhakti or devotion, called the Bhakti-sutras—the essential principles that govern the attainment of Bhakti. Besides it, the Shandilya Upanishad as well as Shandilya Sanhita are also attributed to him.

According to the Ram Rahasya Upanishad, Canto 1, verse no. 1, of the Atharva Veda, he was one of the sages who had approached Hanuman, the wisest, the highly enlightened and the most dedicated devotee of Lord Ram, to enquire about the profound metaphysical philosophy related to the Lord.

²*Atharva*— Sage Atharva is the ancient sage who first revealed the fourth Veda called after his name, i.e. the Atharva Veda. He was the son of Brahma, the creator, according to Vedic mythology. He first brought down fire from the heaven to earth, and hence was the first sage to have propagated the worship of the sacred fire. The word ‘athar’ is the absolute word for the fire element, and hence this sage was named ‘Atharvan’ to commemorate this auspicious deed of his. He made the supreme Fire God, who is synonymous with the dynamic powers of the Supreme Being called Brahm, make this earth as his habitat, thereby paving the way for the forthcoming generations to utilise the stupendous powers and potentials of this fire element in practical terms here on earth itself. Since he brought the fire down on earth, he was also the first to initiate the process of worship of this element, both in its sublime form as the Fire God and its more tangible and gross form as the sacred fire worshipped during formal ritual of the fire sacrifice as well as in other informal forms as done by various sections of society in their daily lives. In fact, sage Atharva was considered as the Fire manifested, so pure and holy he was.

When he brought the Fire God in the form of the sacred fire from the heaven, he offered Soma (the extract of a herb called Som and used as a holy and sanctified liquid-offering meant to be offered to the Gods for their eternal life and sustenance) to him to please him and to show respect to this God who was now the guest of honour for Atharvan. In order to please him further while offering Soma to him, the sage chanted the hymns that he had learned from his father, the creator Brahma. This started the practice of offering of Soma to the sacred fire during the ritual of the fire sacrifice along with the chanting of hymns of the Atharva Veda.

According to the Purans, his earthly wife was Shanti, the daughter of Kardama Prajapati. He is regarded as a personification of the Fire God, and is often invoked in conjunction with another great sage named Angiras (who was another son of Brahma). In this form he is called ‘Atharvangiras’ (Atharvan + Angiras) and is regarded as the father of the Fire God to commemorate the fact that these two sages are responsible for the honour and exalted position that the Fire God occupies in the pantheon of Gods, and also the fact that they were responsible for propagating the worship of the fire as the most holy and the most sacred form of worship of the Supreme Being.

According to Mundakopanishad of Atharva Veda, Mundak 1, section 1, verse no. 1, Atharva is the eldest of the six mental-born sons of Brahma. Brahma had first taught him the best metaphysical knowledge called Brahm Vidya, and Atharva had later taught it to Angiras, his younger brother and first disciple (Mundakopanishad, 1/1/2). The descendents of Atharva came to be known as Atharvaan, and those of Angira as Aangiras. One of the many important sages preached by sage Atharva was Shandilya/Shandilya, son of sage Shandila, and this teaching is contained in the

present Upanishad called the ‘Shandilya Upanishad’ dedicated to sage Shandilya in his memory.

Since sage Atharva had started the practice of worship of the Fire God in the form of the sacred fire of the fire sacrifice and had used the initial Mantras taught to him by his father Brahma, the Mantra of this Veda came to be known after him as ‘Atharvaa’, and since his brother Angira had carried forward this practice started by his older brother by actually invoking these Mantras during formal sacrifices held from time to time after the first exercise, the Mantras came to be known after both the brothers ‘Atharvaangiras’.

The Mantras of the Atharva Veda which were initially pronounced by sage Atharva came to be known after him as ‘Atharvaa’ or ‘Atharva’, and those by the two brothers jointly as ‘Atharvaangiras’.

According to Mahabharat, the great epic related to Lord Krishna penned by sage Veda Vyas, Atharva had searched out the fire concealed in the ocean (Mahabharat, Vanparva, 222).

Some of the Upanishads taught by sage Atharva are the following—Atharva Veda’s Prashna Upanishad, Mundak Upanishad, Atharva Shikha Upanishad and Shandilya Upanishad—all belonging to the Atharva Veda tradition.

Since he was the worshipper of the Fire God, it is natural for him to worship the Sun God as a manifestation not only of the supreme Brahm but also of the Fire God. The hymns dedicated to the Sun God as contained in the Surya Upanishad of the Atharva Veda, which is the seventh Upanishad of this Veda, is attributed jointly to sages Angira and Atharva. Refer verse no. 1 of Surya Upanishad.

³*Astanga Yoga*—Some of the Upanishads that deal with this philosophy of Yoga are the following—(i) Krishna Yajur Veda = *Varaaha Upanishad*, Canto 5, verse nos. 11-14; (ii) Atharva Veda = *Par Brahm Upanishad*, verse no. 2.

The chief exponent of Yoga was sage Patanjali, and he had crystallized the principles of Yoga in his Yog Sutra which contains 185 Sutras or formulas or keys for doing Yoga. Yoga is one of the 6 schools of Indian Hindu Philosophy. We shall now briefly see the essential elements of Patanjali’s Yog Sutra.

Patanjali is considered the grandfather of Yoga. Here we shall see in brief his basic ideas of Yoga, and we would observe that they are more philosophical in their content, import and application than the mere physical exercise involved in doing routine Yoga (meditation). Patanjali’s philosophies on Yoga are universally applicable to all the Upanishads, whether they are mere philosophical treatises or the ones dealing with only meditation exercises in detail. In the context of Upanishads on Yoga, let us have a brief glimpse on what sage ‘Patanjali’, has to say on the subject.

‘Patanjali’ has enumerated eight-fold path of Yoga, called Ashtanga Yoga—or the Yoga with 8 limbs or branches. Each phase of his prescription is designed to enable the practitioner to attain the supreme consciousness by quieting the mind and merging it with the truth which is universal, all pervading and infinite.]

-----*****-----

Canto 1/Section 2

[This section describes the ten types of Niyams or observances. Like the previous section, it is also in the pattern of a prose.]

1. The term ‘Niyam’ (literally meaning certain rules and regulations that one is strictly expected to follow in order to be successful in one’s endeavour) applies to the following observances—Tapa (austerity, penance and sufferance for some noble and auspicious cause), Santosh (contentedness), Astik (to be a believer), Daan (to give

charity and make alms), Ishwar-poojan (worship of God), Siddhanta-srawan (listening to the tenets and doctrines of the scriptures being explained), Hri (shame, prudence, modesty and self-respect), Mati (thoughts, intellect, sense, understanding, inclination, convictions, desires of the mind, and being mindfulness of one's duties and ethical behaviour), Japa (repetition of Mantras), and Vrat (religious fasting, observing austerity, keeping righteous vows and strict self-control or self-restraint).

[Now, each of these terms would be explained in a holistic way.] The term 'Tapa' in the context of Yoga (meditation) is to observe various religious sacraments such as the 'Krischa Chandrayan'¹ which helps the body to become thin, energized, fit, reactivated and detoxified, as well as shed its unnecessary flab and burden of ailments.

'Santosh' means to be satisfied and contented with whatever is available by providence, and never to greed or yearn or wish for more.

'Aastik' (believing) implies that one should sincerely believe in what the Vedas have said about religion and other spiritual matters.

'Daan' is to give alms to the poor, make donations and charities to the deserving, with due respect to the dignity and self respect of the recipient or the beneficiary, without expecting anything in return. These charities and donations must be made out of the wealth that has been obtained by rightful means, and which rightly belongs to the person who gives such alms, or makes donations or charities. [In other words, if charities are made to humiliate others, to demean their spirits and social standing, to show them that they are underprivileged, unfortunate and inferior to the donor, to create a situation when the other members of the society become lazy, indolent and unproductive in the expectation of getting largesse without making efforts to meet their requirements by doing deeds, or to show off one's wealth and majesty, or to reap some sort of worldly fame and name as a philanthropic person etc., or if such charities or alms are made out of assets acquired by unlawful and unethical means—then such alms, charities and donations are deemed to be null and void.]

'Ishwar-poojan' is to honour, to offer respectful worship and to pay sincere obeisance to the Supreme Being in his various manifestations, such as Lord Vishnu (the second of the Trinity Gods, the sustainer and protector of creation, and the Lord who had manifested as various incarnations on earth) and Lord Shiva (the third of the Trinity Gods, the concluder of creation and the patron God of ascetics) amongst others. Such worship and honour should be done cheerfully, with great devotion and faith, and by following the proper sanctified method for this purpose as narrated in the scriptures.

'Siddhanta-srawan' is to attentively hear the tenets and doctrines of the Vedas and the Upanishads being explained by those who are well-versed in them, those who are highly erudite and extremely learned in the finer nuances and intricacies of these great scriptures.

'Hri' (shame, modesty, self-respect and dignity) is to feel ashamed at one's own self for doing something that goes against the eclectic doctrines of Dharma (ethics, morality, righteousness, auspiciousness, probity, propriety and correct thought and action). Therefore, it also entails that one avoids doing anything that is regarded as unholy, lowly, demeaning, degrading and despicable by the Vedas as well as by traditional wisdom and universally accepted convention.

'Mati' (thoughts, intellect, sense, understanding, inclination, convictions, desires of the mind, and being mindfulness of one's duties and ethical behaviour) is to sincerely wish and have an inborn inclination to follow the tenets of the Vedas. It would include proper training of the mind-intellect apparatus to think and contemplate

rightly, correctly and with a positive attitude about the right things and in a right perspective. One should therefore turn away from those things that are demeaning and degrading for the soul, and which undermine the exalted stature of one's divine 'self'.

'Japa' is to honestly practice (repeat and meditate upon) the Vedic Mantra (hymn) that has been prescribed by one's Guru (moral preceptor). Japa is done in two ways—one is verbal or audible Japa, and the other is non-verbal or mental or silent Japa. The mental or silent form of Japa is done by repeating the Mantra mentally in a silent mode without uttering a word audibly, and involves concentration of the mind and turning its thoughts inwards. The verbal or audible form of Japa is again of two types—viz. one that is done loudly, and the other that is simply muttered. The Japa done while muttering the Mantras silently is thousands of times more beneficial than doing Japa loudly, and mental Japa that is done silently without even opening the lips is far better than even the one done by slowly muttering the words, and it is multiple times more beneficial.

'Vrat' (observance of religious vows) is to diligently, steadfastly, honestly, consistently and regularly follow the different eclectic principles, the doctrines and the tenets of the Vedas and the Upanishads—to avoid things that are proscribed by them, and do things that are prescribed by them (1).

[Note—¹The word 'Chandrayan' means 'following the phase of the moon', while 'Krischa' means to become thin and lean. Hence, the term *Krischa Chandrayan* means to make the body thin by strictly restricting the diet according to the established system of doing the Chandrayan Vrat. Hence it involves restricting one's food intake by strictly following the phase of the moon—reducing it gradually during the waning phase of the moon, and increasing it in a step-by-step reverse order in which it was reduced during the waxing phase of the moon.

The Hindu scriptures have prescribed a number of methods of atonement for one's misdeeds and expiations for sins. The Chandrayan is the universal penance for expiation of almost any kind of sin—especially where no specific remedy is prescribed.

It is so-called as during this exercise one follows the phase of the moon in his eating habits. Starting with fifteen morsels of food on the full-moon day it is gradually reduced by one morsel per day till the new-moon day when not a single morsel is eaten by the aspirant. Then from this day onwards, one morsel per day is increased till the full-moon day when once again he eats fifteen morsels. This is one cycle of the penance. It can be repeated as many times as desired according to the intensity of the sin to be atoned for. This penance is also called 'Pipillikaamadhya' or 'middle of an ant' exercise because it starts and ends with full fifteen morsels of food with nil food in the middle.

There is a variation of the Chandrayan described above. In the modified version, the penance is started with one morsel on the full-moon day, gradually increased to fifteen morsels on the new-moon day and then progressively reduced by one morsel each day till the full-moon day when once again only one morsel is eaten. This is called 'Yavamadhya' or 'middle of the wheat grain'—as this grain is thickest at the center and tapers off at the two ends.

In the third variation, eight morsel of food is eaten each day for a month's time. This is called 'Yati-Chandrayan'—or the Chandrayan that is prescribed for wandering ascetics who beg for food for sustenance.

The size of the morsel of food is approximately that of a big myrobalan fruit. A person who undertakes the penance called Chandrayan should tonsure the head, do initial fasting as a preparatory step, offer libations of clarified butter (Ghee) and water to the Gods, consecrate the food before eating it, and worship the Moon God.]

Canto 1/Section 3

[This section has fifteen verses and narrates the eight types of Aasans (sitting postures) of Yoga (meditation). Refer also to (i) Shukla Yajur Veda = Trishikhi Brahmin Upanishad, Canto 2, verse nos. 35-52 describes seventeen Aasans; Mandal Brahmin, Brahman 1, section 1, verse no. 5. (ii) Krishna Yajur Veda = Varaaha Upanishad, Canto 5, verse no. 15-17; Yog Kundali, Canto 1, verse nos. 5-6; Yog Tattva, verse no. 29; Yog Shikha, Canto 1, verse no. 84. (iii) Sam Veda = Jabal Darshan Upanishad, Canto 3, verse nos. 1-13. (iv) Atharva Veda = Annapurna Upanishad, Canto 4, verse no. 87.]

1. There are said to be eight principal Aasans or sitting postures to be adopted while doing Yoga or meditation and contemplation. These are the following—Swastik, Gomukh (to sit like a cow), Padma (the lotus posture), Vir (the warrior's posture), Singh (to sit like a lion), Bhadra (to sit like a gentleman), Mukta (to free one's self from the sensual urges) and Mayur (to sit like a peacock).

In the Swastik-aasan, the two legs are folded in from the knee joint and the soles of the feet are placed on the knees of the opposite side. With the legs thus bent and the soles resting on the knees, the practitioner sits erect with a straight back (1).

2. The Gomukh-aasan is to sit like a cow. This is accomplished by bending the body forward and folding in the two legs from the knees so that the left side of the buttock rests upon the right ankle joint and the right buttock on the left ankle joint. [Obviously, to sit like the cow, the body would be in a horizontal position and while the hind part rests upon the folded-in legs as mentioned above, the front part would rest upon the hands that too would need to be bent in at the elbows with the palms of the hand lying flat on the ground in the front. The head is held slightly elevated as compared to the horizontal position of the backbone.] (2).

3. Oh Shandilya! The Padmasan is to sit like a lotus. In this posture, the legs are folded in from the knees and the soles are placed on the thighs of the opposite side. Then the body is held erect and the big toes are grasped by the hands of the opposite sides. [In other word, first the left sole is placed on the right thigh for instance, and then its big toe is clasped by the left hand. The same thing is done with the right sole and its big toe. As a result, the hands would need to be crossed over each other in front of the navel. The rest of the body meanwhile is held ram-rod straight.] (3).

4. The Virasan (to sit like a warrior) is done by folding in the two legs from the knee and resting the hind parts of the two thighs on the calves of the same side. The upper part of the body, from the hip-bone upwards, is held erect. [Hence, the body rests on the folded-in legs with the two knees touching the ground in the front and the hind part of the body supported by the feet held parallel to the backbone so that its their ankle joints touch and extend support to the rear of the buttock while the toes lie flat on the ground, pointing forwards towards the knees so as to form a base for keeping the body in balance. It is a modified version of kneeling down where the calf and the posterior part of the thigh are at right angles to each others, because in the case of the Viraasan posture the weight of the body lies not on the knees but on the feet that are tucked below the buttocks with their soles pointing outwards, the ankle joint pressing

against the lower end of the buttock, and the toes flat against the ground, so as to act as a prop that supports the hip and the backbone from the rear of the body.]

5-6. Now, Singhasan is being described. [It is how a lion sits. It is modification of the Virasan described in verse no. 4.] The right ankle joint is made to touch the left ankle joint, and the palms are placed on the knees of the respective side with their fingers open and spread out over the knees like a palm-fan. [Obviously, to sit in this way is to adopt the Virasan posture with two caveats—one is that the two ankle joints should touch each other as they support the buttock and backbone at the rear side of the body as described in the formation of the Viraasan posture, and the other is that the open palms of the two hands should be placed, facing down, open the two bent knees, with their fingers spread out on the knees like a palm-fan.] [5]

The practitioner should sit still with the mouth open and eyesight fixed or focused on the tip of the nose. [In other words, he must stare straight ahead at a point directly in front of the nose.]

This is called the 'Singh-Aasan' and acclaimed ascetics always laud it. [6] (5-6).

7. The Siddhasan is adopted by pressing the anus with the left leg (i.e. by its ankle joint) and placing the right leg on the testicles (i.e. pressing the groins with the ankle joint of the right leg). The eye sight is fixed at a point between the two eyebrows. [Though not mentioned, the backbone and the head are held straight in a line in this case as well.] (7).

8. To sit in the Bhadrasan, the two ankle joints are tucked below the testicles and pressed against them, while the rear end of the two legs (i.e. the soles of the feet) are clasped firmly by the hands (taken behind the body). [For doing this, the legs would have to touch each other, bent at the knees and folded in, with the calf pressed against the posterior of the respective thigh. This would enable the ankle joint to be pressed against the testicles from below. Then the hands are taken back and the soles clasped from the rear of the body. Meanwhile, the spine, neck and the head are to be held straight in a line.]

This Bhadrasan is able to overcome the bad affects of all sorts of poison and get rid of different kind of diseases (8).

9. To sit in a Muktasana posture, the suture running along the central part of the testicles is pressed from the below by the left ankle joint (by folding in the left leg), and then this ankle joint is pressed by the right ankle joint (by folding in the right leg). [It is a variation of the Bhadrasana posture. Whereas in the latter case the two ankle joints are held close to each other, side-by-side, and press the testicles simultaneously from below, in the present case of the Muktasana the testicles are pressed at the center from below by only the ankle joint of the left leg and then this ankle joint is further pressed by the ankle joint of the right leg. The back and the neck are however held erect in this case as well.] (9).

10-11. The Mayurasana (literally, to sit like a peacock) entails putting the palms flat on the ground, pressing the elbows against the abdomen on either side of the navel, and then balancing the body in a horizontal plane with the hands and open palms resting flat on the ground to act as pedestals. [10] In this posture, the head and the legs are turned upwards and away from the ground. The body is held parallel to the ground

and is like a log of wood that is supported by two pedestals that are formed by the forearms and the palms. This posture resembles the outline features of a peacock.

This 'Mayurasan' has the potential to destroy all sins. [11] (10-11).

12. By practicing these Aasans all the diseases present in the body are eliminated along with all the toxins or other poisonous elements that may be present inside the body. [That is, these physical exercises help to revitalize and re-energise the body, detoxify it and rejuvenate it.] (12).

13. If a man is unable to follow any one of the rigid Aasans described above, he should then adopt any sitting posture that is convenient to him. In other words, the Aasans are to be calibrated according to the needs and convenience of the practitioner of Yoga (13).

[Note—This is very important and indicates that the Upanishads do not prescribe the rigidity of the Aasans as a means of inflicting torture on the aspirant. The toughness of the Aasans is based on the age-old wisdom that the more severe the ailment the equal severe is its remedy to affect a cure. Even modern medicine accepts that the potency of the medicine and the duration of the treatment is directly proportionate to the disease and its severity. But if any of the Aasans cause stress or distress to the practitioner then it would be counter-productive and hence should be avoided. The main idea is to sit calmly and steadily with a focused mind and controlled body, to focus on meditation and contemplation, to rein in the restless and wayward mind along with the equally restless body and its wayward sense organs. If this is accomplished by other means or Aasans than the ones mentioned in this section, then all is well and good. It is no sense in doing one of these Aasans with the body being subjected to such inconvenience that it remains fidgety, and the mind on its edge.]

14. An aspirant or practitioner who has successfully mastered the technique of these Aasans should be deemed to have conquered or obtain control over all the three worlds¹ (14).

[Note—¹The three worlds usually refer to the terrestrial world, the lower heavens and the upper heavens, or the heavens and the nether world. In brief, he is able to exercise his control over all spheres of life. From the metaphysical perspective it means that he can control his involvement with the physical material world during the waking state of consciousness called the Jagrat state, he can control his involvement with the world of dreams during the dreaming state of consciousness called the Swapna state, and he can even control his deep sleep state of consciousness called the Sushupta state. In other words, he is a self-realised person whose Atma, whose 'true self' which is pure and uncorrupt Consciousness, has become awakened and vigilant. No delusions of any sort, whether pertaining to the physical world or the imaginary world of dreams or to the neutral world of indifference would ever move him or affect his composure under any circumstance.]

15. When one has successfully observed the various principles of Yam and Niyam (as describes in sections 1 and 2 above) and mastered the art of doing various Aasans (as described in verse nos. 1-11 of this present section no. 3), he should then endeavour to practice 'Pranayam' or breath control exercises. By practicing it, the Naadis (various tubular ducts in the body; the nerves, veins and other ducts that carry life-forces in the body) are cleaned and detoxified, thereby revitalizing and re-energizing them (15).

-----*****-----

Canto 1/Section 4

[This section deals with three important concepts pertaining to Yoga—(i) one is the Naadi, or the various tubular ducts in the body through which all the life forces flow inside the creature's body, and how to clean, de-clog, re-vitalise and re-activate them, (ii) the other is the Kundalini which is a coiled subtle energy center at the base of the spine, and (iii) the third is the Vital Winds or Prans present inside the body that keeps it alive and active.

The Upanishads that deal with *Naadis* are the following—(i) Sam Veda's Jabal Darshan Upanishad, Canto 4, verse nos. 5-22 ½, 35-42, 46-47, Canto 5; and Yogchudamani Upanishad, verse nos. 15-21. (ii) Shukla Yajur Veda's Trishikhi Brahmin Upanishad, Canto 2, verse nos. 67-76, 88-89, 99; Subal Upanishad, Canto 9 (which elaborately describes the relationship between Naadi, the vital winds and the sense organs). (iii) Krishna Yajur Veda's Kshuriko, verse nos. 8-20; Varaaha Upanishad, Canto 2, verse no. 61 (consciousness moves in Naadis during sleep), Canto 5, verse nos. 22-31, 54, 67; Yog Tattva Upanishad; Dhyan Bindu Upanishad, verse nos. 50-60; Yogshikha Upanishad, Canto 5, verse nos. 17-27, Canto 6, verse nos. 4-19, 22, 41-47; Yog Kundalini Upanishad, Canto 1, verse nos. 10-18 in relation with the activation of the Kundalini (which is the spiral dynamic energy center at the base of the spine) and doing Pranayam (breath control). (iv) Atharva Veda's Prashna Upanishad, Canto 3, verse no. 6; Mundak Upanishad, Mundak (Canto) 2, section 2, verse no. 6; Shandilya Upanishad, Canto 1, section 4, verse nos. 1, 9-11; Bhavana Upanishad, verse no. 2, stanza no. 20 (it lists fourteen main Naadis).

The Upanishads that deal with *Kundalini* and its activation are the following—(a) Krishna Yajur Veda's Yog Kundali Upanishad, Canto 1, verse nos. 7-8, 43-46, 65-74, 76, 82-84; Dhyanbindu Upanishad, verse no. 66-69; Yogshikha Upanishad, Canto 1, verse nos. 82-139; Yogtattva Upanishad, verse nos. 81-84. (b) Sam Veda's Yogchudamani Upanishad, verse no. 36-39. (c) Atharva Veda's Bhavana Upanishad, verse no. 2, stanza no 12.

The Upanishads that describe the *vital winds or Prans* are the following—(i) Sam Veda—(a) Chandogya Upanishad in its Canto 3, sections 13; Canto 5, section 1, verse nos. 1-15; Canto 5, sections 19-23 (describes how the five winds are satisfied; it also enumerates the Mantras pertaining to the five Prans); and Canto 7, section 15, verse no. 1; (b) Jabal Darshan panishad, Canto 4, verse no.23-24; (c) Maitrayanu Upanishad, Canto 2, verse no. 6-7 (which describes the functions of these winds). (ii) Shukla Yajur Veda—(a) Subalo Upanishad, Canto 9, verse no.1-14; (b) Paingalo-panishad, canto 2, verse no.3; (c) Trishikhi Brahmin Upanishad, Canto 1, verse no. 5, 8-9; Canto 2, verse nos. 54, 77-87; (d) Brihad Aranyaka Upanishad, Canto 3, Brahman 9, verse no. 26; Canto 4, Brahman 2, verse no. 4; Canto 4, Brahman 1, verse no. 3; Canto 5, Brahman 13; Canto 6, Brahman 1. (iii) Krishna Yajur Veda—(a) Dhyanbindu Upanishad, verse nos. 55^{1/2}-60, 95-100; (b) Varaaha Upanishad, Canto 5, verse no. 28; (c) Yogshikha Upanishad, Canto 1, verse no. 166; (d) Amritnado-panishad, verse no. 33-38; (e) Brahm Vidya Upanishad, verse no. 17-19; (f) Yogshikha Upanishad, Canto 1, verse no. 165 and Canto 5, verse no. 2; (g) Taittiriya Upanishad, Valli 3, Anuvak 3, 7; (h) Katho-panishad, Canto 2, Valli 2, verse no. 10; (i) Yog Kundalini Upanishad, Canto 1, verse no. 2 (especially describes the three methods to control the Prans); (j) Pran Agnihotra Upanishad, verse nos. 11-12, 14-18 (which describe the fingers that are directly related to the five principal winds and the Mantras of these winds). (iv) Atharva Veda—(a) Prashna Upanishad, Canto 2-3;

Mundak Upanishad, Canto 3, section 1, verse no. 4; Shandilya Upanishad, Canto 1, section 4, verse no. 12-13; Annapurna Upanishad, Canto 5, verse nos. 25-32, 50-53 (its verse nos. 52-53 avers that for a self-realised ascetic, the terms Pran and consciousness are the same). (v) These vital winds have also been elucidated upon in sage Veda Vyas' Adhyatma Ramayan, Aranya Kand, Canto 4, verse no. 38-39.]

1. Sage Shandilya asked sage Atharva, 'Oh Lord! What is the way to clean (purify, de-clog and revitalize) the Naadis? How many Naadis are there (in the body)? How were they created? How many vital winds flow in them? Where are they located? What are their functions? In short, please enlighten me about all the things worth knowing in this body.' (1).

2-3. Sage Atharva replied, 'This body measures ninety-six fingers in length. The Pran or vital winds are longer by twelve fingers as compared to the length of the body. A practitioner of Yoga or meditation who is able to establish a synergy or compatibility between the vital winds and the fire element that is inherently present inside the body is called a skilled ascetic and a successful practitioner of Yoga.

[The wind is usually more forceful and powerful than the fire element as a strong wind blowing fiercely can blow out even a raging fire. If the latent fire in the body is weakened, it results in low heat, strength, vitality and energy levels. This manifests in many ways—such as low appetite and weak digestion, low vision and inability to perform mental tasks requiring constant supply of energy, lethargic bowel movement and poor circulation of blood, low vitality and lack of animal heat, and such other vital signs of life that depend upon heat and energy inherent in the fire element. Therefore it is necessary to keep the vital winds under control so that the life-giving fire is not suppressed or blown out completely. Since the vital winds which also sustain life and are synonymous with life are equally important as the fire element, a proper balance is to be struck between the two so that one does not prove inimical to the other but exist in a cooperative manner to help the body function in prime shape. In order to bring this about, both the wind element and the fire element are to be in equal intensity, or the wind element should be a notch less powerful than the fire element. This is because if the fire element is active and strong enough, it would not only keep the body warm and sufficiently energized but also consequentially keep the winds active and energized by keeping them warm. Cold wind is counterproductive to life while warm wind fosters life.] (2-3).

4. The location of the fire element in the body of humans is like a triangle which is glowing and radiant as a piece of hot, molten gold.

In four-footed creatures (the land-bound animals) it is square in shape, while in birds (that have wings and fly in the air) it is circular.

The fire element is subtly present here as an auspicious flame of fire that remains hidden from view but is nevertheless the most important element of the body (4).

[Note—The area of the midriff around the middle of the abdomen is said to be the abode of the fire element. Its apex is near the navel and the lower end is in the region of the groins.]

5. The middle of the human body is located at a spot that is two fingers above the anus and two fingers below the genital (i.e. in the exact center of the groin).

For four-footed creature (animals) the middle of the body is located in the region of the heart, while in the birds it is the center of the abdomen itself that forms the middle of their body.

This middle part of the body is generally nine fingers high and four fingers wide. It is shaped more or less like an egg (i.e. it is oblong, with the broad end towards the navel and the tapered end pointing towards the lower end of the body) (5).

6. The navel is located at its center at the top. The navel is circular in shape and there is wheel with twelve spokes located in it.

The Jiva (the living being) is impelled or coaxed or driven by the force of this wheel to move around (in this world), and the numerous good and bad deeds and their attendant consequences that he has accumulated over his past act as the motivating factor¹. [This is called the 'Nabhi Chakra' and it is one of the subtle energy centers of the body. The Nabhi Chakra is said to be the center of energy that is akin to the Sun, and by inference it means that it is the one center that keeps the wheel of life turning in the body just like the celestial Sun keeps the wheel of life moving in this world by providing the latter with light, energy, heat and warmth. If the Sun decides not to shine, the life on earth would be wiped out in a jiffy. This is exactly what is meant here in a metaphoric manner. Since all the Naadis have their center in the area of the navel, and since it marks the area of the body in the abdomen where all the major organs of digestion, excretion, reproduction, etc. are located, it is the one point in the body that acts like the hearth in the household. If the fire in this heart is allowed to die, the house would freeze cold and its inhabitants would also die due to the freezing temperatures and lack of cooked food.]

Even as the spider moves around and remains trapped in the net made from a thread created by its own self, the creature remains trapped and keeps on roaming in this world because of a net that he has cast around himself and which is his own creation. It is web which completely traps him. [This net or web represents his numerous latent desires, his hidden passions and temperaments called his Vasanas and Vrittis respectively that act as inspirations for his many deeds and actions, which in turn produce their own chain of consequences, leading to a complex structure which is similar to a complex web created by the spider. Again, just like the spider is the one which can gobble up the net and free its self, the creature is the one who can actually bring about his own freedom by eliminating the web of this world by trouncing his Vasanas and Vrittis, and overcoming their delusory affects upon himself.]

The Jiva or the living being rides on the various Prans (vital winds) present in the body. In other words, the subtle and invisible entity that lives in the body and is recognized as the Jiva or the living being depends upon the vital winds that are present inside the body to become active and make its presence felt inside the gross body which would be otherwise completely inane, lifeless and dead. The gross body would show no signs of life if there was no Jiva or the living being residing inside it, and this Jiva in turn depends upon the vital winds to become active and show signs of life as reflected by the activities and movement of the gross body. The presence of the signs of life in the body—i.e. the recognition of the body as a 'Jiva' or living being—depends upon the presence of the vital winds inside it. [Life exists in the gross body and the latter is kept alive by the presence of the various vital winds inside it. The word 'Jiva' literally means one who is alive. Hence, the factor that makes the body alive and active, the element that helps the 'self' or the Atma of the creature to show activity and agility is the wind element. If the wind element leaves the body, the latter would be dead and of no good. This fact has been emphasized in Chandogya

Upanishad, Canto 5, section 1, verse no. 6-15; Brihad Aranyaka Upanishad, Canto 1, Brahman 3; Canto 6, Brahman 1, verse nos. 8-14.] (6-7).

[Note—¹*Wheel*—References: (a) Atharva Veda = Prashna Upanishad, Canto 1, verse no. 11; Canto 6, verse no. 6; Mundak Upanishad, Mundak (Canto) 2, section 2, verse no. 6; Nrisingh Purvatapini Upanishad, Canto 5, verse nos. 2-7; Naradparivrajak Upanishad, Canto 9, verse no. 3-4, 6; Tripdvibhut Maha-Narayan Upanishad, Canto 7, paragraph 3-14 (which describes the ‘Sudarshan Chakra’ of Vishnu). (b) Krishna Yajur Veda = Shwetashwatar Upanishad, Canto 1, verse no. 4, 6; Canto 5, verse no. 12; Canto 6, verse nos. 1-3. (c) Shukla Yajur Veda = Paingalo-panishad, Canto 4, verse nos. 3-4.]

8. The region of the Kundalini lies below the navel and above the groins.

The Kundalini has eight coils, and together they represent eight sorts of characteristics or inherent nature exhibited by the Kundalini.

[The *Kundalini* is a coiled subtle energy centre of the body that lies at the base of the spine, called the Mooladhar Chakra—or the whirling energy center that forms the base of the body. The Kundalini blocks the lower end of the spinal cord by one of its ends. When it is aroused or activated during Yoga, it is heated, and its trapped energy is released into the Sushumna Naadi, the central duct passing through the spinal cord. This energy is also called the Kundalini and it passes through the various Chakras en-route to the top of the head. While doing so, all the Chakras are opened like a bud opening under pressure. When the energy of the Kundalini reaches the top of the head, the practitioner experiences extreme sense of ecstasy, called the exhilaration of self-realisation when he feels extremely blissful and contented. Usually, the energy would revert back to its original position when the ascetic wakes up from his meditation session, but with sustained practice the Kundalini can be trained to remain perpetually whirling in the top of the head, i.e. in the Shasraar Chakra which is like a wheel having a thousand spokes. { ‘Sahastra = a thousand; Ara = spokes of the wheel; Chakra = wheel. } According to the Tantra philosophy it is like a lotus with a thousand petals. In Yogic parlance, when the Kundalini is stationed in this region of the head, the practitioner of Yoga is said to live in a state of Samadhi—i.e. a state of trance when he experiences bliss and contentedness, and is unaware of anything, including his own body. From practical angle this is because the nerves of the brain are subject to subtle vibrations which have the effect of massaging and titillating them. Refer verse no. 10 below.]

This Kundalini lies in a dormant state at the base of the spine (in the region of the body called the Mooladhar Chakra). During Yoga involving various meditation exercises, the vital winds called the Pran and the fire element present inside the body are systematically controlled and harnessed. This results in the food (nutrients) and water (the fluid components of the body in which the food is dissolved—e.g. the blood, mucous, various enzymes and hormones etc.) present in the body too being regulated properly. The vital winds spread uniformly inside the body, and the fire element is also equally distributed. In other words, the entire internal apparatus of the body is brought under control.

It is then that sufficient energy is generated and the vital wind called the Apan Vayu (which is present in the lower end of the body to help downward movement of the food in the intestines, its digestion and its final excretion, as well as in the mouth to help imbibe food and water), which is heated by the regulated fire element, enters the Kundalini. This helps to establish a seamless link between the Apan Vayu that is present in the mouth and the one that is present in the lower end of the body.

The Apaan Vayu rises up along with the Kundalini from the back of the body (because the energy of the Kundalini rises up through the Sushumna Naadi which is present in the spinal cord which itself lies along the backbone) to reach the mouth, and finally goes right up to the top of the head to reach the Brahm-Randhra.

[The *Brahm-Randhra* is a hair-like slit in the skull on the top of the head. At the height of Yoga, the energy of the Kundalini is thrust out of the body through this slit by the heated and pressurized Apaan Vayu. According to Yoga philosophy, this is how the ascetic leaves his body to find Mukti or liberation and deliverance from all fetters represented by the gross body and its organs. Refer verse no. 10 below.]

The glorious and divine radiance of the Kundalini is revealed in the form of a subtle and sublime entity that is radiant and splendorous, and that majestically resides in the subtle space of the heart called the 'Hridaya Akash'.

[This entity is the Atma or the pure consciousness which is self-illuminated and shines in the subtle heart much like the celestial sun which shines in the sky. The allegory here serves to highlight the fact that the Kundalini has the same energy and importance as the sun, and just like a wise man can utilize the sun's light, heat and energy for his all round benefit, the energy and the potentials of the Kundalini too can be utilized by a wise aspirant for his spiritual welfare. Another purpose is to emphasize that the Atma is as splendorous and radiant as the Kundalini and the sun, but like in the case of the Kundalini which needs to be activated to be of any good for the aspirant, the Atma too needs to be properly cultivated and realised to be of any spiritual good of the aspirant. Otherwise, both the Kundalini and the Atma would remain neglected and dormant in the body while the person continues to suffer from all sorts of spiritual ailments. It would be an ironical situation wherein gold lies hidden inside the house while a man suffers from financial problems.] (8).

9. There are fourteen main Naadis (tubular ducts through which the vital life-forces flow inside the body) that surround the Kundalini.

These Naadis are the following—Ida, Pingla, Sushumna, Saraswati, Varuni, Pusha, Hastajivha, Yashaswani, Vishwodari, Kuhu, Shankhini, Payaswani, Alambusa, and Ghandhari (9).

10. Wise ascetics assert that out of them the Sushumna Naadi is the main one, and it is capable of bearing the world (i.e. life) as well as is the path by which the ascetic attains Moksha (liberation and deliverance). [See the note of stanza no. 1 of verse no. 8 above.]

This Naadi lies at the rear of the anus and goes up the spinal cord to reach the top of the head where the Brahm-Randhra is situated. [See the note of stanza no. 2 of verse no. 8 above.]

It is clearly visible, very fine, and honoured as a pathway to Brahm who is worshipped as Lord Vishnu by his followers. [In other words, the Mantras used for doing Yoga (meditation and contemplation)—which would help in concentrating the mind and energy of the body for the purpose of activation of the Kundalini, which in turn would help the practitioner in realizing the bliss of experiencing Brahm or cosmic Consciousness—would be the Mantras of Lord Vishnu.] (10).

11. The Ida Naadi is situated to the left and the Pingla Naadi to the right of the main Naadi called the Sushumna Naadi. [The Ida and the Pingla are intertwined around the Sushumna.]

The energy of the Moon flows through the Ida Naadi, while that of the Sun flows through the Pingla Naadi.

[Now, the two opposing characteristics represented by the Moon and the Sun are being enumerated—] The Moon has a predominance of Tama Guna, while the Sun is dominated by the Raja Guna. [The Tama Guna is a metaphor for darkness and inertia, and that is why the disc of the Moon has no light of its own, and except for the full-moon night its disc is always darkened to some extent. Besides this, the Moon always shines in the night which is the period when the creature wishes to rest and shed all activities. On the other hand, the Raja Guna is associated with light and a desire to rise and be productive. This is why the Sun is self-illuminated and energetic, and its rise is associated with activity and productivity.]

The Moon is associated with Amrit or the ambrosia of life and bliss, while the Sun is linked to the scorching poison. [The soothing rays of the moonlight have a cooling effect on the scorched earth that was heated by the Sun during the day, and these rays are able to provide comfort and solace to the tormented creature. On the other hand, the sun's rays are ferocious and cruel by nature, and they can scorch and burn if not guarded against. The white colour of the Moon's disc is said to be due the colour of the Amrit or elixir of life and bliss stored in it by the Gods, while the Sun is said to the celestial cauldron of fire.]

These two join hands to bear the whole time between them. [That is, the full day is divided between the Moon and the Sun, and there is no phase of time beyond them or which does not fall within their jurisdiction.]

Since the Moon and the Sun symbolically move along the Ida and the Pingla Naadis as cited above, it follows that the Sushumna Naadi is the one that actually bears or holds and enjoys everything governed by time. [In other words, it is around the Sushumna Naadi that the life of a creature revolves. It is this Naadi that sustains life and consciousness in the body of the creature, where the body itself is a world in miniature form and the creature is the Atma or the pure conscious soul that lives in this world. In simple terms this is brought about by the fact that the Sushumna Naadi is the central nerve of the spinal cord, and it is through this Naadi that all the impulses of the body move from one point to another. The nerves take all the impulses to the brain, and the latter's instructions to all the organs of the body. Should the Sushumna Naadi fail, the entire circuit would be disrupted and the 'world' (here represented by the 'body') would be 'dead' as far as the 'Jiva' (here the living being represented by his Atma) is concerned. It is like the case of the main overhead high-tension electric wire snapping and plunging the entire city in darkness.]

Behind the Sushumna Naadi is located the Saraswati Naadi, and to the side of it is the Kuhu Naadi.

The Vaaruni Naadi is situated between the Kuhu and the Yashaswani Naadis.

The Payaswani Naadi is situated between the Pusha and Saraswati Naadis.

The Yashaswani Naadi is situated between the Gaandhaari and the Saraswati Naadis.

The Alambusa Naadi is located in the center of the Kanda. [The 'Kanda' literally means a root or tuber, and it is shaped like a short carrot or turnip. Its pointed end faces downwards towards the male genitalia and its upper rounded end is near the navel. The Alumbusa Naadi runs along its center.]

The Kuhu Naadi is spread below the Sushumna Naadi till the area of the genitals.

The Vaaruni Naadi is spread in all the directions below and above the Kundalini.

The Yashaswani and the Saumya Naadis go up to the big toes of the two legs.

The Pingla Naadi goes upwards and reaches the right nostrils.

The Pusha Naadi rises behind the Pingla and goes up to the right eyes.

The Yashaswani Naadi goes up to the right ears.

The Saraswati Naadi goes up to the upper surface of the tongue.

The Shankhani Naadi moves up from below and reaches the left ear.

The Gaandhaari Naadi moves up behind the Ida Naadi and goes up to the left eye. [The Ida Naadi itself goes up to the left nostrils.]

The Alambusa Naadi radiates above and below the base of the anus.

Other minor Naadis are located inside or around these primary fourteen Naadis. There are finer Naadis inside them as well.

Just like the leaf of the banyan tree is covered by a network of veins and capillaries, the Naadis too cover each area of the creature's body¹ (11).

[Note—¹Refer verse no. 13 below which says that there are in all seventy-two thousand Naadis through which the vital wind called the Samaan Vayu distributes nutrients extracted from the food eaten and digested inside the body to all its corners. Hence we conclude that the Naadis listed in verse no. 9 are only the chief ones, whereas the total numbers of Naadis are seventy-two thousand.]

12. The ten Prans or vital winds symbolizing life-forces of the body that constantly move in the Naadis are the following—Pran, Apaana, Samaana, Udaana, Vyaana, Naaga, Kurma, Krikara, Devdutta, and Dhananjaya (12).

13. The Pran (i.e. the chief vital wind) moves or is located chiefly in the mouth, the nose, the throat, the navel, the big toes of the feet, and below and above the Kundalini.

The Vyaana moves or is located chiefly in the ears, the eyes, the waist region, the thighs, the nostrils, the throat, and the hip region.

The Apaana moves or is located chiefly in the anus, the genitals, the thighs, the stomach, the testicles, the hip area, the navel, and the midriff where the fire is present (refer verse no. 4 above).

The Udaana is present and moves about in all the joints of the body.

The Samaana is present and moves about in the hands and legs (limbs) and all other appendages of the body. It also helps in equal distribution of the nutrients of the food that has been digested inside the body by the help of the fire element to all parts of the body through the network of seventy-two thousand Naadis. Hence, the Samaana wind also moves in all the seventy-two thousand Naadis and works in close association with the fire element. [There are fourteen chief Naadis listed in verse no. 9, while the closing stanza of verse no. 10 asserts that there are numerous other Naadis that form a network of Naadis exactly like the veins and capillaries seen in the leaf of a banyan tree.]

The other vital winds such as Naaga etc. are subsidiary in nature and they live and move about in the skin, bones etc.

The vital winds that live in the stomach and middle part of the abdomen (i.e. the Apaana and the Samaana) help to separate the water (fluids, enzymes, digestive juices etc.) present in the stomach from the nutrients of the food eaten (after the food is digested), and then take the nutrients through the Naadis to all the parts of the body (while the fluid portion and the grosser aspect of the food left after digestion and extraction of nutrients are taken to the organs of excretion, i.e. to the kidneys and the rectum respectively).

The Apaana Vayu keeps the internal fire responsible for cooking and digesting of food eaten burning. The food eaten is literally placed on the top of the water, and the water is placed on the fire which is stoked from below so as to heat this water which in turn cooks or digests the food eaten. [This is a simple kitchen of the body. The fire of the hearth represented by the abdomen is the triangular fire area mentioned in verse no. 4. The air needed to keep the fire burning and the grate of the oven ventilated is the Apaana wind. The stomach is the pot. The fluids present in it are the water. And the chewed or pulverized food that is put in the stomach is the raw material from which the nutrients are needed to be extracted. Once this is done, the Samaana wind would take these nutrients to the different parts of the body, while the waste matter is taken to the kidneys and the anus for excretion.]

The fire element present in the body is protected by the Apaana wind as the latter helps to keep it lighted and prevents it from being extinguished. [As in the instance of the cooking of the food cited above, the Apaana wind, which is predominantly present in the lower part of the abdomen, keeps the fire alive by fanning it from the below.]

This fire when stoked by the Pran Vayu (the vital winds) gathers heat and brings to a boil the water element present in the middle part of the body (i.e. the stomach) so that the vegetables and cereals that enter the stomach are properly cooked by it—i.e. the food is properly digested and its nutrients separated from the grosser aspects of the food such as the sweat, the urine, the blood, the semen, the various juices and other fluids present in the body (viz. the bile, the pancreatic juices, the various digestive enzymes, the mucous, the hormones etc.).
